amp-pél-ī-dæ, s. pl. [From Ampelis (q.v.).] Chantrelers. A family of birds belonging to the order Passeres, and the sub-order Dentirostres. They stand between the Laniidae, or Shrikes, and the Muscicapidae, or Flycatchers. They chiefly inhabit the warmer regions. They are often very beautiful in their plumage. They feed on fruits and insects. The Ampelidae may be divided into six sub-families: (1) Dieruriinae, or Drongo-Shrikes; (2) Campophaginae, or Caterpillar-eaters; (3) Gymnoderiinae, or Fruit Crows; (4) Ampelinae, or True Chantrelers; (5) Piprinae, or Minkins; and (6) Pachycephalinae, or Thick-heads.

amp-pél-īd-ō-sæ, s. pl. [From Gr. ἀμπέλος (ampelos) = a vine.] Vine-worts. An order of plants placed by Lindley under the Berberal Alliance. They are called also Vitaceae. The calyx is small; the petals 4-5; the stamens as many, and inserted opposite to the petals; the ovary two-celled; the berry often by abortion one-celled, with few seeds. There is not a modern genus Ampelos.

amp-pél-ī-næ, s. pl. [ÁMPELIDÆ (4).]

amp-pél-is, s. [Gr. ἀμπέλις (ampelis) = dimin. from ἀμπέλος (ampelos) = (1) a young vine, (2) a kind of bird.] The typical genus of the family of birds called Ampelidae, or Chantrelers. The beautiful Bohemian Chantrelers is *Ampelis garrula*. [CHATTERER.]

amp-pél-ī-te, s. [Gr. ἀμπελίτης (ampelitis) = pertaining to the vine, γῆ ἀμπελίτης (gē ampelitis) = "vine-earth;" Lat. ampellitis = a kind of bituminous earth with which the vine was sprinkled as a preservative against worms; from ἀμπέλος (ampelos) = a vine.] Perhaps a preparation of cannel-coal, with which husbandmen in France smear their vines to kill insects. [CANNEAL-COAL.]

amp-pél-ōp-sis, s. [Gr. ἀμπέλος (ampelos) = vine, and ὄψις (opsis) = look, appearance.]

Bot.: A genus of Ampelidæ (q.v.) Being rapid in growth, the species are sometimes used for covering walls and arbours.

amp-père, s. [Named from a French electrician.] [UNIT, s. 11. 4. (2).]

ampere-meter, ampero-meter, s. Elect.: An instrument for measuring in amperes the strength of an electric current. Also called ammeter.

amp-pér-ian, a. Relating to André Marie Ampère (see AMPÈRE) or to his theories.

amp-pér-sand, s. [See def.] A corruption of *and per se* = and standing by itself; the sign &.

amp-phī, in composition. [Gr. ἀμφί (amphi) = on both sides; *Saosc. abhi, abhis*; Lat. *amb* and *em*; O. H. Ger. *umpi (um)*. [AMA.] On both sides. (See the words which follow.)

amp-phī-ar-thrō-sis, s. [Gr. ἀμφί (amphi) = on both sides; ἀρθρωσις (arthrosis), or, more classically, ἀρθρωδία (arthrodia) = articulation; ἀρθρῶν (arthrōn) = to fasten by a joint; ἀρθρῶν (arthron) = a joint; \* *arō (arō)* = to join; *Saosc. ar.*]

Anat.: A form of articulation in which two plane or mutually adapted surfaces are held together by a cartilaginous or fibro-cartilaginous lamina of considerable thickness, as well as by external ligaments.

¶ It is considered by Todd and Bowman to be a variety of the synarthrodial joint. In man it occurs in the articulations between the several vertebrae, between the ossa pubis, and between the ilium and the sacrum.

amp-phīb-ī-s, a. pl. [Nent. pl. of ἀμφίβιος (amphibios) = living a double life, i.e., both on land and water; Gr. ἀμφί (amphi) = double, and βίος (bios) = life.] [AMPHIBIOUS.]

Zoology: Animals which can live indiscriminately on land or water, or which at one part of their existence live in water and at another on land. It is used—

1. By Linnaeus for the third of his six classes of animals. He includes under it reptiles in the wide sense of the word, with such fishes as are most closely akin to them. He divides the class into three orders, Reptiles, Serpentes, and Nantes.

2. By Cuvier, in his *Règne Animal*, for his third tribe of Carnivorous Mammalia, the first and second being the Plantigrades and Digitigrades. He included under it the Seals and their allies. In his *Tableau Élémentaire*, the arrangement is different, the Amphibia being an order ranked with the Cetacea (Whales), under his third grand division, Mammalia, which have extremities adapted for swimming, the first being "Mammalia which have claws or nails," and the second "those which have hoofs."

3. By Macleay, Swainson, Huxley, and other modern zoologists, the fourth great class of animals corresponding to Cuvier's reptilian order Batrachia. It is intermediate between Reptilia and Pisces. They have no amnion. Their visceral arches, during a longer or shorter period develop filaments exercising a respiratory function, or branchia. The skull articulates with the spinal column by two condyles, and the base occipital remains unossified. But Huxley divides them into four orders, the Urodela, the Batrachia, the Gymnophiona, and the Labyrinthodonts. The frog, the toad, and the newt are familiar examples of the Amphibia.

\*amp-phīb-ī-āl, a. & s. [Eng., &c., amphibia; -al.]

1. As adjective: Pertaining to any amphibious animal.

2. As substantive: An amphibious animal.

¶ Now superseded by AMPHIBIAN (q.v.)

amp-phīb-ī-an, a. & s. [Eng., &c., amphibia; -an.]

1. As adjective: Pertaining to any amphibious animal, or specially to the Amphibia (q.v.).

2. As substantive: An animal belonging to the Amphibia (q.v.).

"... the close affinity of the fish and the amphibian.—Huxley: *Classif. of Animals*, xxv.

"It is founded on some reptiles and amphibians."—Darwin: *Descent of Man*, vol. 1, pt. 1, ch. 1.

amp-phīb-ī-ō-līte, s. [Gr. ἀμφίβιος (amphibios), and λίθος (lithos) = stone.] A fossil amphibian.

amp-phīb-ī-ōl-ōg-ī-cal, a. [Eng. amphibiology; -ical.] Relating to amphibiology.

amp-phīb-ī-ōl-ō-gy, s. [Eng. amphibiology; -logy.] In Ger. amphibibologie. From Gr. ἀμφίβιος (amphibios), and λόγος (logos) = a discourse. The department of science which treats of the Amphibia.

amp-phīb-ī-ōūs, a. [In Fr. amphibie; Sp. & Ital. *anfibia*; Port. *amphibia*; Gr. ἀμφίβιος (amphibios) = amphibious, living a double life, i.e., on land and water; ἀμφί (amphi) = on both sides, double, and βίος (bios) = life.]

1. Capable of living both on land and in water.

"As soon as the young [crocodiles] are born, they hasten to cast themselves into the water, but the greater number of them become the prey of tortoises, of voracious fish, of amphibious animals, and even, as is said, of the old crocodiles."—*Griith's Cuvier*, vol. ix., p. 188

2. Of a mixed nature.

"Traulus of amphibious breed. Motley fruit of ungrafted seed." Swift.

amp-phīb-ī-ōūs-ness, s. [Eng. amphibiousness.] The quality of being able to live both on land and water, or of partaking of two natures.

amp-phīb-ī-ūm, s. [In Ger. amphibium; Latinised from ἀμφίβιος (amphibios), neut. of ἀμφίβιος (amphibios) = living a double life.] Living either on land or water. Its plural is Amphibia (q.v.). While the sing. *amphibium* is rare, *amphibia* is a common scientific word.

"Sixty years is usually the age of this detested *amphibium* [the crocodile], whether it be beast, fish, or serpent."—*Sir T. Herbert: Travels*, p. 304.

amp-phīb-ī-lē, s. [In Lat. *amphibolus*; from Gr. ἀμφίβηλος (amphibolos) = doubtful, ambiguous; ἀμφιβάλλω (amphibalō) = to throw around as a garment; *v. i.*, to turn out uncertainly; ἀμφί (amphi) = around; βάλλω (ballō) = to throw.] The name of a mineral, or great mineral genus which the British Museum Catalogue makes synonymous with Hornblende. Dana considers that the term Amphibole proposed by Hally should have the precedence, inasmuch as that distinguished scientist was the first rightly to appreciate the species, bringing together under it hornblende, actinolite, and tremolite. It varies

much in composition, and its constituent elements will be best exhibited under its several varieties. These Dana classifies as follows:—

1. *Containing little or no alumina*:  
1. Magnesia—Lime—Amphibole = Tremolite.

2. Magnesia—Lime—Iron—Amphibole = Actinolite.

3. Magnesia—Iron—Amphibole = Antholite.

4. Magnesia—Lime—Manganose—Amphibole = Tschiterite.

5. Iron—Magnesia—Amphibole = Cummingtonite.

6. Iron—Manganose—Amphibole = Dunoerite.

7. Iron—Amphibole = Grunerite.

8. Asbestos.

II. *Aluminous*:

9. Aluminous Magnesia—Lime—Amphibole = (a) Edenite, (b) Smaragdite.

10. Aluminous Magnesia—Lime—Iron Amphibole = (a) Pargasite, (b) Hornblende.

11. Aluminous Iron—Lime—Amphibole = Norallite.

12. Aluminous Iron—Manganose—Amphibole = Camsigradite. (See these words.)

¶ Dana makes Amphibole the type of a group, and also a sub-group, of minerals, which he classes at the head of his Bisilicicate.

amp-phī-bōl-ī-ā, amp-phīb-ōl-ī-y, s. [Lat. *amphibolia*, from Gr. ἀμφιβολία (amphibolia) = (1) the state of being attacked on both sides; (2) ambiguity. From Greek ἀμφιβάλλω (amphibalō) = (1) put round as a garment; (2) attacked from both sides; (3) ambiguous: ἀμφιβάλλω (amphibalō) = to put round, to surround, to double; ἀμφί (amphi), and βάλλω (ballō) = to throw.]

A. *Chiefly in the form Amphibolia*:

Logic: What logicians have described as the *fallacia amphibolia*. It occurs when a sentence, though consisting of words each of which, taken singly, is unambiguous in its meaning, is yet itself susceptible of a double-signification, on account of the order in which the words are arranged, or for some similar reason. The Latin language was particularly liable to afford examples of amphibology—a fact well known to those who gave forth the "prophetic" utterances of the ancient oracles, as in the famous answer returned to Pyrrhus when he asked counsel as to whether he would be successful if he invaded the Roman empire.

"Aio te, Æacida, Romanos vincere posse" ("I say that you, O son of Æacus, can conquer the Romans;") or "I say that the Romans can conquer you, O son of Æacus." Similarly, the witch "prophecy" in English, "The Duke yet lives that Henry shall depose," may mean "The Duke yet lives who shall depose Henry," or, "whom Henry shall depose;" but it may be said that the word that is ambiguous, and that consequently the sentence is an example not of amphiboly, but of equivocation. (See *Whately's Logic*, 9th ed., 1848, bk. iii., § 204.)

B. *In the form Amphiboly*:

Ordinary Language: In the same sense as that given under A., Logic.

"Come, leave your schemes, And bid the amphibolies."

Ben. Jonson: *Magn. Lady*, II. 4.

"If it oracles contrary to our interest or honour, we will create an *amphiboly*, a double meaning where there is none."—*Whitlock: Manners of the Eng.*, p. 254.

"Making difference of the quality of the offence may (say they) give just ground to the accused party either to conceal the truth, or to answer with such *amphibolies* and equivocations as may serve to his own preservation."—*Sp. Hall: Cases of Conviction*.

amp-phī-bōl-īc, a. [Eng., &c., amphibolice; -ic.] Pertaining to amphibole, containing amphibole; consisting to a greater or less extent of amphibole.

amp-phīb-ō-līte, amp-phīb-ō-līte, s. [Eng. *amphibolite* (q.v.); *lite* = Gr. λίθος (lithos) = a stone.]

1. Another name for Hornblende-rock (q.v.). (Dana.)

2. A name for a rock, called also Dthahase, which consists of hornblende and Labradorite compacted together into a fine-grained compound.

amp-phīb-ō-lōg-ī-cal, a. [Eng. *amphibology*; -ical.] Pertaining to amphibology; of amphibology meaning.

"A fourth *hulmatoes*, ingratulates himself with an *amphibological* speech."—*Burton: Anat. Met.*, p. 611.

bōll, bōy; pōut, jōvnl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -līg. -tion, -sion, -cloun = shūn; -fion, -gion = zhūn. -tious, -sious, -cious, -ceous = shūs. -ble, -dle, &c. = bēl, dēl.

am-phib-ō-lōg-i-cal-ly, adv. [Eng. amphibological; -ly.] In a manner to involve an amphibolia; with ambiguity of meaning. (Johnson.)

am-phib-ōi-ō-gy, \* am-phib-ōi-ō-gie, s. [In Fr. amphibologie; Sp. and Ital. anfibia; Port. and Lat. amphibologia; Gr. ἀμφίβολος (amphibolos) = (1) put round as a garment, (2) attacked from both sides, (3) ambiguous; λόγος (logos) = word, discourse.] The same as AMPHIBOLIA (q.v.).

"For goddesses speak in amphibologies, And for one sooth they tell us twenty lies." Chaucer: Troil. and Cress., lv. 1, 408-7.

"Now the fallacies whereby men deceive others, and are deceived themselves, the ancients have divided into verbal and real: of the verbal, and such as conclude from mistakes of the word, there are but two worthy our notation; the fallacy of equivocation and amphibology."—Erasmus: Vulg. Errors.

am-phib-ōi-ōid, a. [Eng. amphibole, and Gr. εἶδος (eidos) = appearance.] Having the appearance of amphibole.

am-phib-ōi-ōus, a. [Eng. amphiboly, -ous. In Lat. amphibolus; Gr. ἀμφίβολος (amphibolos).] [AMPHIBOLIA.]

- 1. Of actions: Doubtful, ambiguous. "Never was there such an amphibolous quarrel; 'both parties declaring themselves for the king, and making use of his name in all their remonstrances to justify their actions."—Havelock.
- 2. Of words: Susceptible of a double construction, though the meaning of each word, taken singly, is apparent. "An amphibolous sentence is one that is capable of two meanings, not from the double sense of any of the words, but from its admitting of a double construction."—Whately: Logic, 9th ed. (1848), bk. iii., § 10.

am-phib-ōi-ōy, a. [AMPHIBOLIA.]

am-phī-brāch, am-phī-brā-chyſ, s. [In Ger. amphibrachys; Fr. amphibrache; Lat. amphibrachys; Gr. ἀμφίβραχος (amphibrachos) = short at both ends; ἀμφί = on both sides; βραχίς (brachis) = short.]

Pros.: A foot of three syllables, the middle one long, and the first and third short: ♩ - ♩, as in the Greek ἔλαον (ē-lā-ōn), the Latin ā | līs | mā, or the English in | ā | mān.

am-phī-brānch-ī-ā, s. pl. [Gr. ἀμφί (amphī) = on both sides; βραγχία (branchia) = (1) fins, (2) gills, (3) for βράγχια (branchia) = the bronchial tubes.] The tonsils and the parts surrounding them. (Glossogr. Nova, &c.)

am-phī-ōē-ī-ā, s. [Gr. ἀμφίκοιλος (amphikōilos) = hollowed all round, quite hollow; ἀμφί, and κοίλος (kōilos) = hollow.] In Prof. Owen's classification, the first sub-order of Crocodylia (Crocodyles), which again is the 9th order of the class Reptilia, or Reptiles. (Owen: Palaeontol.)

am-phīc-ōm-ē, s. [Lat. (Pliny), from Gr. ἀμφοκόμος (amphokōmos) = (as adj.) with hair all round; (as subst.) an unidentified precious stone, used for divination and to inspire love.]

Bot.: A genus of Bignoniaceæ (Bignoniacs). A. Emodi and A. arguta, both from India, are fine flowers.

am-phī-cōſ-mī-ā, s. [Gr. ἀμφί (amphī) = on both sides; and κόσμος (kosmos) = well-ordered; κόσμος (kosmos) = order.] A genus of ferns, of which the typical species, A. carpensis, is a fine tree-fern, twelve to fourteen feet high, growing at the Cape of Good Hope and in Java. (Treas. of Bot.)

am-phīc-ty-ōn-īc, a. [Eng., &c., Amphictyon; -ic.] Relating to the Amphictyonic League or its members.

"The affairs of the whole Amphictyonic body were transacted by a congress."—Thirlwall: Hist. Greece, vol. 1, ch. x.

am-phīc-ty-ōnſ, s. pl. [According to the Greeks, from an ancient hero, Amphictyon, said to have founded the most celebrated of the Amphictyonic associations; but he seems to have been a myth invented and named in order to explain the existence of the association. Doubtless from Gr. ἀμφικτιώνες (amphiktiones) = they that dwell near, next neighbours; ἀμφί (amphī) = round about; and κτίω (ktio) = to people a country.] Delegates from twelve of the states of ancient Greece which entered into a league to protect the temple of Apollo at Delphi, and to promote peace among the confederate states. The conception was a noble one, but, like the Holy Alliance in modern times, the performance was of a different character. The Amphictyonic

League were chiefly responsible for two cruelly-conducted wars, and on the whole exerted an evil rather than a beneficial influence. Besides the association which attained such celebrity, and which met in the spring at Delphi, and in the autumn at a temple of Demeter, within the pass of Thermopylae, there were other ancient Amphictyonies of lesser celebrity.

"... a war which will be hereafter mentioned between the Amphictyons and the town of Crisa."—Thirlwall: Hist. Greece, vol. 1, ch. x.

am-phīc-ty-ōn-y, a. [Gr. ἀμφικτιονία (Amphiktionia) = (1) the Amphictyonic league or council; (2) a league in general.] The Amphictyonic League or its council, as also any association of a similar character.

"The term amphictyony, which has probably been adapted to the legend, and would be more properly written amphictyon, denotes a body referred to a local centre of union."—Thirlwall: Hist. Greece, vol. 1 (1838), ch. x., p. 374.

am-phīd, a. [Gr. ἀμφί (amphī) = around.] Chem.: A name applied by Berzelius and others to any compound consisting of an acid and a base. It is opposed to Haloid (q.v.).

am-phī-dēs-mā, s. [Gr. ἀμφί = on both sides; δέσμα = a bond.]

Zool.: A genus of orbicular, bivalve mollusks, with long siphons, and a large tongue-shaped foot. (Van der Hoeven.)

am-phīg-ā-mōus, a. [Gr. ἀμφί = on both sides, or doubtful; and γάμος = marriage.]

Bot.: Having no trace of asexual organs. (De Candolle.)

am-phī-gās-trī-ā, s. pl. [Gr. ἀμφί (amphī) = on both sides; and plur. of γαστήριον (gastērion) = a sausage; dimin. from γαστήρ (gastēr) = the belly.]

Bot.: Stipule-like appendages at the base of the leaves of various Jugermannias.

am-phī-gēne, s. [Gr. ἀμφί (amphī) = on both sides; and γεννάω (gennāō) = to engender, to produce; so called from the erroneous belief that it had cleavage on both sides.] A mineral, the same as Leucite (q.v.).

am-phīg-ēn-ōus, a. [Gr. ἀμφί (amphī) = on both sides; and γεννάω (gennāō) = to engender.]

Bot.: Growing all around an object.

am-phīg-ēn-yte, s. [From amphigene (q.v.).] The name given in the parts around Veauvius to a lava occurring there which has thickly disseminated through it grains of amphigee. (Dana.)

am-phī-hēx-ā-hē-dral, a. [In Fr. amphihexaèdre: from Gr. ἀμφί (amphī) = on both sides, on two sides; and hexahedral, from hexahedron = a cube, not a hexagonal figure.]

Crystallog.: Hexahedral in two directions; terminating in each of two directions with a hexahedron or cubical figure. (Cleaveland, quoted by Webster.)

am-phīl-ō-gīte, s. [Gr. ἀμφίλογος (amphīlogos) = disputed, disputable; ἀμφί (amphī) = on both sides; λόγος (logos) = . . . discourse.] A doubtful mineral, if mineral it be, called also didymite, and provisionally placed by Dana under Muscovite. It was formerly called talcose schist, and Dana believes it probably only a mica schist.

am-phīl-ō-gy, s. [Gr. ἀμφιλογία (amphīlogia) = dispute, debate, doubt; ἀμφί (amphī) = on both sides; and λόγιον (logion) = an announcement; λόγος (logos) = a word, a discourse.] Equivocation; ambiguity of speech. (Johnson.)

am-phīm-ā-çēr, s. [Lat. amphimacrus; Gr. ἀμφίμακρος (amphīmakros), as substantive = an amphimacer; as adj. = long at both ends; ἀμφί (amphī) = on both sides; μακρός (makros) = large, long.]

Prosody: A foot consisting of three syllables, the first long, the second short, and the third long: as Gr. εὐμενής (eumenēs), Lat. deſtūnt and Eng. slūmbering. (Glossogr. Nova, &c.)

am-phī-ōx-ī-dē, s. pl. [From amphioxus (q.v.).] A family of fishes, which Owen makes the only one under his first sub-order Pharyngobranchii, or Cirrhostomi, of his Order I., Dermopteri. Huxley regards it as the only family under his sixth and last order of fishes, the Pharyngobranchii. [AMPHIOXUS.]

am-phī-ōx-ūs, s. [Gr. ἀμφί (amphī) = on both sides; ὄξυς (oxus) = sharp. So designated because it tapers at both ends.] A genus of fishes of an organisation so humble, that the first specimen discovered was believed by Pallas to be a slug, and was described by him as the Limax lanceolatus. It is now called Amphioxus lanceolatus. It is found in the Archipelago, and is a member also of the British fauna. [AMPHIOXIDÆ.]

"... so lowly organised as the lancelet, or amphioxus."—Darwin: Descent of Man, vol. 1, pt. 1, ch. vi.

am-phī-pneust-ā, am-phī-pneists, a. pl. [Gr. ἀμφί (amphī) = on both sides, and πνεύω (pneō), fut. πνεύσομαι (pneusomai) = to breathe. Double-breathers.]

Zool.: An old order of tailed amphibiens which retain the gills through life.

am-phī-pōd, am-phī-pōde (sing.), am-phīp-ōd-ā, am-phī-pōds, am-phī-pōdes (pl.), s. [From Gr. ἀμφί (amphī) = on both sides; ποῦς (pous) = geait, ποδός (podos) = foot; ποδά (pada) = feet. Having feet on both sides.]

A. Sing.: An animal belonging to the Crustaceous order Amphipoda. [See plural.]

B. Plur.: An order of Crustaceans, consisting of species provided with feet both for walking and swimming. They live in the water, or burrow in the sand, or are parasitic upon fish. When they swim they lie on their side. Some, when on shore, leap with agility. The order consists of two families, the Hyperiidæ and the Gammaridæ.

am-phīp-ō-dā, a. [AMPHIPOD.] The same as amphipodona (q.v.).

am-phīp-ō-dan, s. [AMPHIPOD.] Any individual of the Amphipoda.

am-phīp-ōd-ōus, a. [Eng. amphipod; -ous.] Pertaining to the Amphipoda (q.v.).

am-phīp-rī-ōn, s. [Gr. ἀμφί (amphī) = on both sides, and πρῖον (prion) = a saw.] A genus of fishes belonging to the order Acantopterygii, and the family Scenidæ.

am-phīp-rō-sty-le, s. [In Fr. amphiprostyle; Port. amphiprostylo; Ital. anfiprostilo; Lat. amphiprostylos; all from Gr. ἀμφίπροστύλος (amphīprostylos) = having a double prostyle; ἀμφί (amphī) = on both sides, and πρόστυλος (prostylos) = having pillars in front; πρό (pro) = before, and στύλος (stulos) = a pillar.]

Arch.: A temple having a portico at either end; a temple with pillars before and behind, but none on the sides. (Glossogr. Nova.)

am-phī-sar-çā, s. [Gr. ἀμφί (amphī) = on all sides; and σάρξ (sarx), genit. σαρκός (sarkos) = flesh.] A name applied to fruits which are syncarpous, superior, dry externally, indelhiscent, many-celled, and pulpy internally. (Lindley.)

am-phīs-bæ-nā, s. [Lat., from Gr. ἀμφίβατα (amphibaina) = a serpent found in Libya, fabled to have two heads, and in consequence to be able to move equally well in either direction. Gr. ἀμφίς (amphīs) = at or on both sides; βαίνα (baina) = to walk, to step.]

I. Myth.: The fabled snake of the Greeks and Romans just described.

"With complicated monsters head and tail, Scorpion and asp and amphibiaena dire." Milton: P. L., bk. x., 523-4.

Zool.: A serpent-like genus of lizards, formerly classed with the Ophidia. The species are American. They feed on insects, and are often seen in the vicinity of ant-hills.

am-phīs-bæ-nī-dæ, s. pl. [From the typical genus Amphibæna (q.v.).] The family of Saurians, of which the genus Amphibæna is the type. They are cylindrical, vermiform animals, with their heads no thicker than their necks, and their tails exceedingly short. Their eyes are small, and sometimes concealed. Only in the genus Chitotes are there viable limbs. Most of the species come from America.

am-phīs-çī-ānſ, am-phīs-çī-ī, s. pl. [Lat. amphiscii, from Gr. ἀμφισκίος (amphīskios), as adj. = throwing a shadow both ways; ἀμφί (amphī) = on both sides, and σκιά (skia) = a shadow.] Those who live in that part of the

âte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pine, pît, sîre, sîr, marine; gô, pôt, or, wôre, wôlf, wôrck, whô, sôn; mûte, cûb, cûre, quite, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = ē; ð = é. qu = kw.

world where, at one season of the year, their shadows fall northward, and at another southward. In other words, the people residing within the tropics.

**ām-phīs'-ī-ēn cōck'-a-trīce**, s. [Fr. *amphiscien* = tropical (see AMPHISCIANS), and Eng. *cockatrice*.]

*Her.*: A name for the mythic animal called the Basilisk, which resembles a cockatrice, but is two-headed; the second head being affixed to its tail. (*Gloss. of Her.*)

**ām-phīs'-ī-lē, ām-phys'-y-lē**, s. [Gr. *ἀμφί (amphi)* = on both sides; and second element doubtful.]

*Zool.*: A genus of fishes of the order Acanthopterygii and the family Fistulariæ. They have the back covered with large scaly plates. Locality, the Indian Ocean.

**ām-phī-spēr'-mī-ūm**, s. [Gr. *ἀμφί (amphi)* = on both sides, on all sides; and *σπέρμα (sperma)* = a seed.]

*Bot.*: Prof. Link's name for a pericarp, which is of the same figure as the seed it contains.

**ām-phīs'-tō-ma**, s. [Gr. *ἀμφί (amphi)* = on both sides; *στόμα (stoma)* = mouth.] A genus of parasitic worms, which have two minute apertures like mouths, one at each end of their body.

**ām-phīs'-y-lē**, s. [AMPHISILE.]

**ām-phith'-a-lite**, s. [In Sw. *amfthalit*.

From Gr. *ἀμφιθαλής (amphithalēs)* = (1) blooming on both sides; (2) flourishing, abounding, rich; *ἀμφί (amphi)* = on both sides; *θάλειον (thalēion)* = 2 aor. inf. of *θάλλω (thallō)* = to abound, to be luxuriant. Dana says that it is so called because it is usually surrounded by other beautiful minerals, though unattractive itself.] A sub-translucent mineral, of a milk-white color. Composition: Phosphoric acid, 30.06; alumina, 48.50; magnesia, 1.55; lime, 5.76; and water, 12.47. It occurs in Sweden.

**ām-phī-thē'-ā-tral**, a. [Eng. *amphitheatre*; *-al*. In Ger. *amphitheatrīsch*; Fr. *amphithéâtral*; from Lat. *amphitheatralis*.] Pertaining to an amphitheatre; resembling an amphitheatre. (*Tooke*.)

**ām-phī-thē'-a-tre**, s. [In Dan. *Dut.*, & Ger. *amphitheater*; Fr. *amphithéâtre*; Sp. & Ital. *anfiteatro*; Port. *amphiteatro*; Lat. *amphitheatrum*. From Gr. *ἀμφιθέατρον (amphitheatron)*: *ἀμφί (amphi)* = on both sides, and *θέατρον (theatron)* = s theatre, from *θεάομαι (theomai)* = to see.]

1. As the name implies, a double theatre. The ancient theatres were nearly semi-circular in shape; or, more accurately, they were half ovals, so that an amphitheatre, theoretically consisting of two theatres, placed with their concavities meeting each other, was, loosely speaking, a nearly circular, or, more precisely, an oval building. Amphitheatres were first constructed of wood, but in the time of Augustus stone began to be

THE COLISEUM AT ROME.

employed. The place where the exhibitions took place was called the *arena* (Lat. = sand), because it was covered with sand or sawdust. The part next the *arena* was called *podium*, and was assigned to the emperor, the senators, and the ambassadors of foreign nations. It was separated from the arena by an iron railing and by a canal. Behind it rose tiers of seats, the first fourteen, which were cushioned, being occupied by the *equites*, and the rest, which were of bare stone, being given over to the common people. Except when it rained,

or was exceedingly hot, the amphitheatre was uncovered. Among the sights were combats of wild beasts and gladiator fights. The Romans built amphitheatres wherever they went. Remains of them are still to be found

PLAN OF THE COLISEUM.

1. Section of ground plan. 2. Section of first floor. 3. Section of second floor. 4. Section of highest gallery.

in Great Britain at Cirencester, Silchester and Dorchester; but the most splendid ruins existing are those of the Coliseum at Rome, which was said to have held 87,000 people.

"Conceive a man placed in the burning iron chair at Lyons, amid the insults and mockeries of a crowded amphitheatre, and still keeping his seat; or stretched upon a grate of iron over coals of fire, and breathing out his soul among the exquisite sufferings of such a tedious execution, rather than renounce his religion or bisempe his Saviour."—*Addison*.

2. The upper gallery in a theatre. In England, the front seats in such gallery.

3. *Fig.*: The place or scene of any contest or performance; also, a valley resembling an amphitheatre in shape.

4. *Gardening*:

(a) The disposition of trees or shrubs in an amphitheatric form; their arrangement for this purpose on a slope, or with the smaller ones in front, so as to make it appear as if they were growing on a slope.

(b) The arrangement of turf in an amphitheatric form.

**ām-phī-thē'-āt-ric, ām-phī-thē'-āt-ric-al**, a. [Lat. *amphitheatricus* = pertaining to an amphitheatre.]

1. Pertaining to an amphitheatre; exhibited in an amphitheatre.

"In their amphitheatrical gladiatures, the lives of captives lay at the mercy of the vulgar."—*Gayton*. *Notes on D. Quiz*, lv. 21.

2. In form resembling an amphitheatre.

"... the name of bay is justified, as applied to this grand amphitheatrical depression."—*Darwin*. *Voyage round the World*, ch. xix.

**ām-phī-thē'-āt-ric-al-ly**, adv. [Eng. *amphitheatrical*; *-ly*.] In the form of an amphitheatre. (*Worcester*.)

**ām-phī-thēre**, s. The English term corresponding to the word AMPHITERIUM (q.v.).

"... we must travel to the antipodes for myrmecobians, the nearest living analogue to the amphitères and spalacotherms of our oolitic strata."—*Owen*. *Classification of Mammalia*, p. 55.

**ām-phī-thē-rī-ī-dæ**, s. pl. [AMPHITERIUM.] A family of fossil mammals classed by Owen with the Insectivora, but possessing some marsupial affinities.

**ām-phī-thēr'-ī-ūm**, s. [Gr. *ἀμφί (amphi)* = on both sides, here = doubtful; *θηρίον (thērion)* = s beast, especially one of the kind hunted; dimin. of *θήρ (thēr)* = a wild beast. So called by Blainville from the difficulty of placing it, there having been discussions whether it was a mammal, a reptile, or even a fish.] A genus of fossil mammals, founded by Blainville from a fossil jaw found in Oxfordshire in the Stonesfield slate, a sub-division of the Lower Oolite. The A. *Prevoitii* was examined by Cuvier in 1818, noticed by Buckland in 1823, and figured by Prevost in 1825. There is a second species, the A. *Broderipii* of Owen.

**Ām-phī-trī-tē, Ām-phī-trite**, s. [In Ger., &c., *Amphitrite*; Lat. *Amphitrite*.] Gr. *Ἀμφιτρίτη (Amphitritē)* = (1) the wife of Poseidon (Neptune), (2) the sea.]

1. *Classic Myth*. (See the etym.)

"Or some enormous whale the god may send (For many such on *Amphitrite* attend)." *Pope*: *Homer's Odyssey*, bk. v., 538-9.

2. *Zool.*: A genus of animals belonging to the class Annelida, and the order Tubicola. They have golden-colored bristles, arranged like combs, or a crown, in one or more rows, on the anterior part of the head. There are very numerous tentacula round their mouths. Some form light tubes, which they carry along with them.

3. *Astron.*: An asteroid, the twenty-ninth found. It was discovered by Marth and Pogson March 1, 1854, the date on which Bellona was first seen by Luther.

**ām-phīt-rōp'-al**, a. [Gr. *ἀμφί (amphi)* = on both sides, and *τροπή (tropē)* = a turning round or about, or *τροπός (tropos)* = a turn, *τρέπας (trēpas)* to turn.]

*Bot.*: Curved round the body to which it belongs. (*Lindley*.)

**amphitropal embryo**, s. An embryo so curved as to have both apex and radicle presented to the hilum, as in *Pisces*.

**ām-phīt-rōp-ois**, a. [AMPHITROPAL.]

*Bot.*: A term used in describing the ovules of plants.

An *amphitropous ovule*: One whose foraminif and chalazal ends are transverse with respect to the hilum, which is connected with the latter by a short raphe. (*Lindley*.)

**Ām-phīt-rŷ-ōn**, s. [Gr. *Ἀμφιτρῶν (Amphitrōōn)* = a king of Thebes, the son of Alcæus and Hippomenê.]

1. *Lit.*: [See Etym.]

2. *Fig.*: A host, the giver of a banquet.

**ām-phī-tŷpe**, s. [Gr. *ἀμφί (amphi)* = on both sides; *τύπος (typos)* = type.] An application of the catoptric process, negative and positive pictures being produced at once.

**ām-phī-ūm'-a**, s. [Gr. *ἀμφί (amphi)* = on both sides; the second element is said to be a corr. of Gr. *πνεῦμα (pneuma)* = breath, for these animals have both gills and lungs.]

*Zool.*: The type genus of the family Amphimidae. They have exceedingly elongated bodies, with the legs and feet but slightly developed. One species (the A. *tridactylum*) has three toes, another (the A. *means*) has but two.

**ām-phī-ūm'-ī-dæ**, s. pl. [AMPHIUMA.]

*Zool.*: A family of Urodellian Amphibis, chiefly from North America. [AMPHIUMA.]

**ām-phōd'-ēl-ite**, s. [In Sw. *amphodolit*.] A mineral, a variety of Anorthite. Its color is reddish-grey or dingy peach-blossom red. It is found in Sweden and Finland. It is called also Lepolite.

**ām-phor-a** (Lat.), † **ām-phor** (Eng.), s. [Ger., Port., &c. *amphora*; Fr. *amphore*, from Lat. *amphora*; Gr. *ἀμφορέυς (amphoreus)*; cf. A.S. *amber*.]

I. Among the Romans:

1. A two-handed vessel, generally made of clay, and used for holding wine, oil, honey, or even the skeletons or ashes of the dead.

AMPHORÆ.

2. A liquid measure, containing 48 sectari, or nearly six gallons. The Greek *amphoreus* held nearly nine. The capacity of the Saxon *ambra* is unknown.

"... which forbade all senators and sons of senators from being the owners of a ship of the burden of more than 800 *amphoræ*."—*Arnold*: *Roma*, ch. xlii.

II. *Bot.*: A genus of distomaceous plants.

**ām-phōr-al**, a. [Eng., &c., *amphora*; *-al*.] Pertaining to or resembling an amphora.

**ām-phōr'-io**, a. [Eng., &c., *amphora*; *-io*.] Resembling an amphora.

**bōil, bōy; pōūt, jōwl; cat, çell, chorus, çhin, bench; go, çem; thin, this; sin, aç; expect, Xenophon, exist. ph = f.**  
**-tion, -sion, -cioun = shūn; -tion, -sion = zhūn. -tious, -sious, -cious, -ceous = shūs. -ble, -dle, &c. = bəl, dəl.**

amphoric resonance, a

Med.: A sound as of one blowing into an amphora, bottle, or smaller vessel, heard in certain circumstances in auscultation of the lungs.

ăm-pith'-ô-ê, ăm-phith'-ô-ê, s. [From Amphitoe, one of the Nereids.]

Zool.: A genus of Amphipodous Crustaceans.

ăm-plo, a. [In Fr. ample; Sp. amplio; Port. amplo; Ital. ampio. From Lat. amplius.]

I. Large, wide, great. Used specially—

1. Of material things or of space:

(a) Spacious, roomy; widely extended.

"... and all the people in that ample house."

Speaker: *E. Q.*, III. xl. 49.

"And Mycalessa's ample piny plain."

Pope: *Homer's Iliad*, bk. II., 593.

"Their cliffs above and ample bay below."

*Ibid.*, 681.

"An ample forest, or a fair domain."

*Ibid.*, bk. xx., 223, 224.

(b) Large in material bulk.

"O'er the smooth surface of an ample crag."

Wordsworth: *Kecursion*, bk. III.

2. Of the mind or spirit: Great intellectually, morally, or both; of vast courage.

"Thy soul as ample as thy bounds are small."

Endurat the brut, and dar'st defy them all."

Cooper: *Exposition*.

3. Of wealth or its distribution:

(a) Large in amount.

"The other fifteen were to be replaced noblemen and gentlemen of ample fortune and high character."

—Macaulay: *Dist. Eng.*, ch. II.

(b) Liberal; munificent.

"Extended Phrygia o'w'd th' ample reign, And all fair Lesbos' blissful seats contain."

Pope: *Homer's Iliad*, bk. xxiv., 683-4.

"When men lived in a grand way, With ample hospitality."

Longfellow: *Tales of a Wayside Inn*; *Prelude*.

4. Of style in speaking or writing: Copious, diffuse, not concise.

"His confessions during his imprisonment were free and ample."

—Fowler: *Dist. Eng.*, pt. II., vol. III., ch. xiv.

II. Fully sufficient, if not even more than enough.

"... ample and conclusive evidence."—Darwin: *Descent of Man*, pt. I., ch. I.

"Foreign nations did ample justice to his great qualities."—Macaulay: *Dist. Eng.*, ch. xi.

¶ Crabb says of the difference between ample, spacious, and capacious: "Ample is figuratively employed for whatever is extended in quantity; spacious is literally used for whatever is extended in space; capacious is literally and figuratively employed to express extension in both quantity and space. Stores are ample, room is ample, an allowance is ample; a room, a house, or a garden, is spacious; a vessel or hollow of any kind is capacious; the soul, the mind, and the heart are capacious. What is ample suffices and satisfies; it imposes no constraint. What is spacious is free and open; it does not confine. What is capacious readily receives and contains; it is liberal and generous." (Crabb: *Eng. Synon.*)

ăm-plo-nêss, s. [Eng. ample; -ness.] The quality of being ample.

"Impossible it is for a person of my condition to produce any thing in proportion either to the amplexness of the body you represent, or of the places you bear."—South.

ăm-plêx-ă-tion, s. [Lat. amplexus = an embracing; amplexor = to embrace.] An embrace.

"... the amplexation of those sacred feet." —Bp. Hall: *Contemp. on the Resurrection*.

ăm-plêx-i-caul, †ăm-plêx-i-caul-ent, a. [Lat. amplexor = to embrace, and caul = the stem of a plant.]

AMPLEXICAUL LEAVES. 1. Germander Speedwell (*Veronica Chamædrys*). 2. Handit Dend Nettle (*Lambium amplexicaule*). 3. Eleocharis (*Inula Helenum*).

Bot.: Embracing the stem, clasping the

stem; as the base of the leaves in some cases does. Example, *Hycosyamus niger*. (Lindley, &c.)

ăm-plî-ă-te, v.t. [In Sp. & Port. ampliar; Ital. ampliare; from Lat. amplio.] To make wider, to extend, to enlarge.

"He shall look upon it, not to traduce or extenuate, but to explain and dilucidate, to add and amplify." —Brosius.

†ăm-plî-ă-tion, s. [In Fr. ampliation; Sp. ampliacion; Port. ampliacao; Ital. ampliacione; from Lat. ampliatio.]

A. Ordinary Language:

1. Enlargement, extension.

"Ostent matters admit not of an ampliation, but ought to be restrained and interpreted in the mildest sense."—Ayliffe's *Parergon*.

2. Diffuseness; amplification of style.

"The obscurity of the subject, and the prejudice and prepossession of most readers, may plead excuse for any ampliations or repetitions that may be found, whilst I labour to express myself plain and full." —Holder.

B. Law: Deferring of judgment till a case has been more fully examined.

¶ AMPLIFICATION is now generally used in its stead.

ăm-plî-fî-că-te, v.t. [In Sp. & Port. amplificar; Ital. amplificare; from Lat. amplifico.] To amplify, to enlarge, to extend. (Johnson.)

ăm-plî-fî-că-tion, s. [In Fr. amplification; Sp. ampliacion; Port. ampliacao; Ital. ampliicazione; from Lat. ampliificatio.]

I. Ordinary Language:

1. Gen.: Enlargement or extension of space, or of a material object. Specially, an enlargement of the ordinary size of an object by the aid of the microscope.

"The degree of the amplification of the one-fiftieth object-glass made for me." —Beale: *Bioplasm* (1872), § 2.

2. Specially: In the same sense as No. 11. (Rhet.)

"... elaborate amplifications, in which epithets rise above epithet in wearisome climax."—Macaulay: *Dist. Eng.*, ch. vi.

II. Rhet.: A descent to minute particulars in a narrative, so as to lengthen it unduly; the presentation of a subject in many lights, when a smaller number would better answer the purpose; the employment of a multitude of words where a few would be more effective; copiousness of language.

ăm-plî-fied, pa. par. [AMPLIFY.]

ăm-plî-fî-êr, ăm-plî-fî-êr, s. [Eng. amplify; -er.]

1. One who enlarges any space or any material object.

"... the wonderful tyranny which should follow in a great Rome whereof they were the first amplifiers."—Cicero: *English Orator*, pt. II., Pref.

2. One who uses amplification in rhetoric.

[AMPLIFICATION.] "Dorians could need no amplifier's mouth for the highest point of praise."—Sidney.

ăm-plî-fî, v.t. & i. [In Fr. amplifier. From Lat. amplius = ample; facio = to make.]

A. Transitive:

I. Ordinary Language:

1. To enlarge or extend a space, any material substance, or an object of sense. Specially, to enlarge the size of an object by the aid of the microscope; or to increase sound by reflection from a concave mirror.

"All conceive that proceed from more narrow to more broad, do amplify the sound at the coming out." —Bacon.

2. To enlarge or extend anything not material in its composition.

(a) Generally: "... is't not meet That I did amplify my judgment in Other conclusions?"

Shakespeare: *Cymbeline*, I. 4. "I tell thee, fellow, Thy general is my lover; I have been The Book of his good acts; whence men have read His fame unparallel'd, happily amplified."

Shakespeare: *Coriol.*, v. 2. (b) Specially: In the same sense as No. II.

"He further supposes that these brief notices were amplified by the historians, upon their own conjectures."—Lewis: *Credibility of the Early Roman Hist.* (1855), ch. xii., pt. II., § 19, vol. II., p. 22.

II. Technically:

Rhet.: To enlarge on any subject; to descend to minute particulars in a narrative; to use a superfluity of arguments in a debate; to em-

ploy a diffuseness of style in writing; to exaggerate.

B. Intransitive:

1. To speak or write diffusely.

"I have (as I think I formerly told you) a very good opinion of Mr. Rowe's sixth book of Lucret; indeed, his amplifies too much, as well as Bréval, the famous French imitator."—Pope: *Letter to H. Cromwell* (1710).

¶ It is sometimes followed by on.

"When you affect to amplify on the former branches of a discourse, you will often lay a necessity upon yourself of contracting the latter, and prevent yourself in the most important part of your design." —Watts: *Logic*.

2. To exaggerate; to speak or write hyperbolically.

"Homer amplifies, not invents; and as there was really a people called Cyclopes, so they might be men of great stature, or giants."—Pope's *Odyssey*.

ăm-plî-fî-îng, pr. par. [AMPLIFY.]

ăm-plî-tû-de, s. [In Fr. & Port. amplitude; Sp. amplitud; Ital. amplitudine. From Lat. amplitudo = (i.) width, breadth, size, bulk.

(ii.) Of moral qualities, &c.; (1.) greatness; (2.) dignity, grandeur; (3.) Rhetoric, copiousness. From *amplus* = ample.]

A. Ordinary Language:

I. Of space or of material things:

1. Width, breadth, extent.

"Whatever I look upon, within the amplitude of heaven and earth, is evidence of human ignorance." —Glanville.

2. Size, bulk, largeness, greatness.

"Men should learn how severe a thing the true inquiry of nature is, and accustom themselves, by the light of particulars, to enlarge their minds to the amplitude of the world, and not reduce the world to the narrowness of their minds." —Bacon.

"... the amplitude of the largest is probably a hundred times that of the smallest."—Tyndall: *Frag. of Science*, 3rd ed., vii. 137.

II. Of the mind: Breadth, comprehensiveness, capacity, greatness, largeness.

"But in truth that amplitude and acuteness of intellect, ..."—Macaulay: *Dist. Eng.*, ch. vii.

"... amplitude of comprehension." —*Ibid.*, ch. xiv.

III. Of the position or resources of an individual or a community:

(a) Power, splendour, dignity.

"... but in the great frame of kingdoms and commonwealths, it is the power of princes or estates to add amplitude and greatness to their kingdoms." —Bacon: *Essays, Civ. and Mor.*, ch. xxix.

(b) Sufficiency, abundance, or over-abundance.

IV. Copiousness, superabundance of words.

"You should say every thing which has a proper and direct tendency to this end; always proportioning the amplitude of your matter, and the fulness of your discourse, to your great design; the length of your time, to the convenience of your hearers."—Watts: *Logic*.

B. Technically:

I. Nat. Phil.: Breadth, width, extent (Used especially of anything which oscillates or vibrates.)

"Technically speaking, the amplitudes of the oscillations are increased."—Tyndall: *Frag. of Science*, 3rd ed., viii., 2, p. 178.

"To determine by means the amplitudes of the vibrations of particles of air in a wave of sound." —Prof. Airy: *Sound* (1856), p. 148.

"But the ultimate amplitude of the recoil is soon attained."—Tyndall: *Frag. of Science*, 3rd ed., I., 24.

II. Gunnery: The amplitude of the range of a projectile is the distance it traverses measured along the horizontal line subtending the parabolic curve along which it moved in its flight. It is now in general more simply termed the range of a gun.

III. Astron.: The angular distance from the east point of a heavenly body at the moment of its rising, or from the west point at the instant when it sets. Depending, as it does, on the declination of the heavenly body and the latitude of the place, the sine of the amplitude is equal to the sine of the declination, divided by the cosine of the latitude. The amplitude of the fixed stars remains unaltered during the year; that of the sun or the contrary, greatly varies: standing at nothing at the vernal and autumnal equinoxes, and 39° 44' in the latitude of London at the summer and winter solstices. Amplitude, measured when the sun or a star rises, is called *ortive*, or *eastern*; and that when it sets, *occidentous*, or *western*. If a star rise north of the east point, its ortive amplitude is northern, and its occiduous amplitude southern, and vice versa. The azimuth of a heavenly body is the complement of its amplitude.

Magnetic amplitude is an amplitude measured not from the true, but from the magnetic east or west.

făte, făt, făre, amidst, whăt, fáll, father; wê, wêt, hêre, camêl, hêr, thêre; pine, pit, sîre, sîr, marine; gô, pôť, or, wôre, wôlf, wôrċ, whô, sôn; mûte, cûb, cûre, qnite, cûr, rûle, fûll; trÿ, Sÿrian. œ, œ = ê. ey = â. ew = ũ.

amplitude compass, s. A compass designed to aid in measuring the amplitude of the sun or other celestial body at its rising or setting.

am-PLY, adv. [Eng. ample; -ly.]

1. Largely, liberally.

"For whose well-being, So amply, and with hands so liberal, Thou hast provided all things." Milton: P. L., bk. viii.

2. Quite, completely.

"But shallow cisterns yield A scanty short supply: The morning sees them amply fill'd, At evening they are dry." Cooper: Gleaner's Living Water.

"The pledge which he had given had therefore been amply redeemed." Macaulay: Hist. Eng., ch. xxv.

3. Copiously; in detail.

"Some parts of a poem require to be amply written, and with all the force and elegance of words; others must be cast into shadows, that is, passed over in silence, or but faintly touched." Dryden: Duressnoy.

ampt-mán, s. [Sw. amtman; Dan. amtmand = bailiff.] The custodian of a castle. (Scotch.)

"Before my departing, I took an attention from the amptman of the castle, of the good order, and discipline that was kept by us there." Moore's Exped., pt. ii., 9, 10.

am-pül, \*am-pöl-y (Eng.), am-pül-la

(Lat.), s. (Ampulla has the pl. ampullæ.) [A.S. ampulle, ampolle, ampelle = a vial, bottle, or flask; Fr. ampoule; Sp. and Ital. ampolla; Port. ampola; all from Lat. ampulla = a nearly globular vessel; a glass or earthenware flask bellying out like a jug, used especially to hold unguents, perfumes, &c. Perhaps from amp = amb, umbi, Gr. ἀμφι = around, and Lat. olla = a pot or jar.] [AMPHORA.]

A. In the forms ampul, ampoly, and ampulla:

Eccles.: One of the sacred vessels used at the altar. Such vials were employed for holding the oil for chrismation, as also that for consecration, coronation, enclosing the relics of saints and similar purposes. [See AMPULLA.]

AMPULLÆ.

"And ake he to his cello sake, He saw a fend pull the gate, And boysets on him sell he bare, And ampullæ also leche ware." Ch. Coll. Med., Edinb. (Boucher.)

B. In the form ampulla only:

I. Biol.: Any membranous bag shaped like a leathern bottle.

II. Specialty:

1. Anat.: A dilatation occurring in each of the semi-circular canals of the ear.

"Each is dilated at one end into an ampulla of more than twice the diameter of the tube." Todd & Bowman: Physiol. Anat., ii., p. 74.

III. Botany:

1. One of the little flasks composed of metamorphosed leaves found on certain water-plants, such as Utricularia. It is called also Ascidium (q.v.).

2. A spongiolate of a root.

am-pül-lä-ocous, a. [Lat. ampullaceus; from ampulla (q.v.).] Pertaining to an ampulla (q.v.); resembling a little flask or bladder.

am-pül-lär-ī-a, s. [From Lat. ampulla.] A genus of Mollusca, of the family Paludinae.

Its English name is Apple-shell or Idol-shell. The shell is globular, with a small spire, and a large ventricose body. In 1851, Mr. S. Woodward estimated the known species at fifty. In 1871, Tate made them 138. They occur in South America, the West Indies, Africa, and India, in lakes and estuaries. They are fine large shells, occurring, as a rule, in fresh water, though species are found in Egypt, in Lake Mareotis, which is a salt-water lagoon, and in India, among marine shells, at the mouth of the Indus.

am-pu-tā-te, v.t. [In Dan. amputere; Fr. amputer; Port. amputar; Lat. amputo, -avi, -atum; puto = to prune, to cleanse. From the root pu, in Latin purus; Sansc. pu = to purify.]

1. Surgery: To cut off. (Used especially of a limb, or the portion of a limb.)

"Amongst the cruisers it was complained that their surgeons were too active in amputating fractured members." Wiseman: Surgery.

2. Gardening: To prune trees.

am-pu-tā-tēd, pa. par. & a. [AMPUTATE.]

am-pu-tā-tīng, pr. par., a., & s. [AMPUTATE.]

am-pu-tā-tion, s. Eng. amputate; -ion.]

In Ger. & Fr. amputation; Port. amputação; Ital. amputazioni; all from Lat. amputatio = a cutting or lopping off; amputo = to cut away or off.]

1. Surgery: The act of cutting off a limb, or a portion of a limb.

"Amputation is not unfrequently advisable in order to prevent the occurrence of gangrene." Miller: Surgery (1864), p. 149.

2. Gardening: The pruning or dressing of vines, &c. (Dyche, 1756.)

\*am-pū-te, v.t. [Lat. amputo.] [AMPUTATE.] To cut off. (Cockeram.)

am-pyX, s. [Gr. ἀμψυξ (ampyx) = a band or fillet.]

1. A band or fillet used by the ancient Greek and Roman women for binding their front hair; a head-band; a hood.

2. A similar head-band for elephants and horses. Homer describes the steeds of the god of war as thus adorned.

AMPYX.

am-ri-ta, s. & a. [Sansk. amrit = the water of immortality, nectar; amar = immortal; a, like the Gr. α, priv., and mruta = dying; cognate with Lat. morior = to die; mors = death.]

A. As subst.: The ambrosia of the Hindoo gods.

B. As adj.: Immortal; conferring immortality, or bearing fruits that do so.

"The divine Amrita trees That blesses heaven's inhabitants With fruits of immortality." Moore: Light of the Haram.

ams-dor-rī-ans, s. pl. [From Nicholas Amsdorf, their leader.]

Church Hist.: A German Protestant sect in the sixteenth century who, with their chief, are said to have maintained that good works are not only unprofitable, but are obstacles to salvation. Amsdorf made this assertion in the heat of controversy, and does not seem to have meant much more by it than to enforce the teaching of the Apostle Paul, "that a man is justified by faith without the deeds of the law" (Rom. iii. 28).

\*am-shāck, v.t. [HAMSHACKET.] (Scotch.)

am-sō-nī-a, a. [Named from Charles Anson, a scientific traveller in America.]

Bot.: A genus of plants belonging to the order Apocynaceæ, or Dogbanes. The species are pretty, and are easily propagated. They were introduced from North America.

\*amt, s. [ANT.]

a-mūck, a-mōk, a. or adv. [It has no connection with the English word muck; but is from the Malay amuk = engaging furiously in battle, attacking with desperate resolution, rushing in a state of frenzy to the commission of indiscriminate murder. (See the def.) Applied to an animal or a man in a state of violent rage. (Marston: Malayan Dict., 1812.) Wild, headlong, frenzied; in a state of frenzy. Used only in the expression To run a muck or amuck, which means to rush, under the influence of opium or "bhag" (an intoxicating drug made from hemp), out of one's house into the street, armed with a sword, a dagger, or other lethal weapon, and kill every one—man, woman, or child—who cannot with sufficient promptitude escape. This maniacal and inhuman method of venting rage is mostly confined to the Malays; or it practised by other races, it scarcely ever passes beyond the limits of the Mohammedan world. (Generally followed by at, sometimes with on or against.)

am-u-lēt, s. [In Dln., Dut., & Ger. amulet; Fr. amulette; Sp., Port., & Ital. amuleto; Lat.

amuleum. From Arab. hamalet = an amulet; hamalet = to carry.]

1. Lit.: Anything hung round the neck, placed like a bracelet on the wrist, or otherwise attached to the person, as an imagined preservative against sickness, "witchcraft," or other evils.

Amulets were common in the ancient world, and they are so yet in nations where ignorance prevails. Thus an observant visitor to a school in India may see many a pupil with a piece of ordinary string tied bracelet-fashion round one or both of his wrists. This is an amulet, or talisman, which having been blessed by a Brahmin, has then been sold for half a rupee (about a shilling), or even for a rupee itself, as a sure preservative against fever. [See TALISMAN, CHARM.]

AMULET.

"... the little images of the tutelæ deities, even the earrings, probably considered as amulets or talismans, were taken away and buried." Milman: Hist. of Jew., vol. i., p. 86.

"How could she thus that gem forget? Her mother's sainted amulet." Byron: Bride of Abydos, ll. 8.

2. Fig.: A preservative against sin.

"... thou hadst an amulet In the loved image, graven on thy heart, Which would have saved thee from the tempter's art." Moore: Lalla Rookh; Velud Prophet.

am-u-lēt-īc, a. [Eng. amulet; -ic.] Pertaining to an amulet. (Webster.)

† a-mūr-ca, s. [In Ital. amura and morechia; Lat. amurca; Gr. ἀμύργη (amorgē), ἀμύργης (amorgēs) = the watery part which flows out when olives are pressed; oil- lees: ἀμύργη (amorgē) = to pluck or pull. (Never used of liquids.)] Oil-lees; a lye made of oil.

"Though grain, that toucheth oil or fat, receiveth hurt, yet the steeping of it in the dregs of oil, when it beginneth to putrefy, which they call amurca, is thought to assure it against worms." Bacon: Nat. Hist., Cent. vii., § 670.

\* a-mūr-cōs-ī-ty, s. [From Lat. amurca (q.v.).] The quality or qualities inherent in the lees of any substance. (Johnson.)

\* a-mūr-cois, a. [Eng. amurca; -ous.]

1. Pertaining to the lees of oil. (Ash.)

2. Foul with the dregs of anything.

a-mūg-a-ble, a. [Eng. amuse; -able. In Fr. amusable.] Capable of being amused. (Macintosh. Worcester.)

a-mūg-e, v.t. & t. [Eng. muse, v.t.; Fr. amuser = to divert; from musar = to letter, to trifle; Ital. musare = to lounge; Ger. müssig = idle.]

† A. Intransitive:

1. To muse, to think, to reflect; to be absent in mind, owing to the concentration of the attention on the thoughts with which one is occupied at the time.

"Or in some pathless wilderness amusing, Plucking the mossy bark of some old tree." Lee: Lullies Junius Brucis, l. 2.

B. Transitive:

\* 1. To cause to muse; to occupy or engage the attention, and consequently to divert it from other objects.

"Being amused with grief, fear, and fright, he could not find a house." Fuller: Ch. Hist. of Britain, bk. ix., § 14.

"Such a religion as should afford both sad and solemn objects to amuse and affect the passive part of the soul." South: Sermons.

\* 2. To keep a person from departing, or from acting, by telling him some frivolous story which causes him to lose his time and his opportunity; to delude by vain promises, or expectations, or pretences; to cheat, to deceive.

"Bishop Henry, on the other side, amused her with dubious answers, and kept her in suspense for some days." Swift: Character of K. Stephen.

"And then for the Pharisees, whom our Saviour represents as the very vilest of men, and the greatest of cheats; we have them amusing the world with pretences of a more refined devotion, while their heart was at that time in their neighbour's coffers." South: Serms., ii. 133.

bēl bōy; pōut, jōvī; cat, çell, chorus, çhin, bench; go, çem; thin, this; sin, aç; expect, Xenophon, exist. -īng. -clan, -tian = shan. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -sious, -ceous = shūs. -ble, -ple, &c. = bēl, pēl.

**ám-ýl-ôid**, *a.* [*AmN*, and Gr. *εἶδος* (*eidos*) = form, appearance.] Resembling or containing amy.

**amyloid substance, or lardacein**, *s.*  
*Chem.*: An albuminoid (q.v.) which in certain diseases is deposited in the liver. It is coloured red by iodine, and violet by H<sub>2</sub>SO<sub>4</sub> and iodine; concentrated HCl dissolves it, forming acid-albumin. Dissolved in KHO, it forms potassium albuminate. It can also be obtained by the action of very dilute HCl and fibrin, and evaporating the solution to dryness in a water-bath. It is insoluble in gastric juice.

**Am-ýr-ald-ýsm**, *s.* [From Moses Amyraldus or Amyraut, a French theological professor at Saumur, who was born in 1596, and died in 1664.]

*Church Hist. & Theol.*: The tenets of Amyrald and his followers. They were that God desires the happiness of all men, and that none are excluded from it by an eternal decree. That those who would be saved must believe in Christ. That the power of believing is refused to none, but divine assistance effective for the purpose is not bestowed on all. These views were called 'Universalis', but they were so in words rather than in reality.

**ám-ý-rále**, *s.* An old form of ADMIRAL. (*Scotch*.)

**ám-ýr-i-dá-pé-se**, *s. pl.* [From the typical genus *Amyris* (q.v.).] An order of exogenous plants placed by Lindley under his Rutales, or Rutal alliance. The Amyridaceae have a panicked inflorescence, hypogynous stamens, double the petals in number, a one-celled ovary, with two to six pendulous ovules; the fruit sub-drupaceous, samaroid, or leguminous, with from one to two seeds, the leaves compound with pellucid dots, and abounding in resin. They occur in the tropics of India and America, in the latter region extending as far north as Florida. In 1846, Lindley estimated the known species at forty-five.

**ám-ýr-in**, *s.* [Lat. *myrrha* and *myrrhis*; Gr. *μύρρις* (*myrrhis*) = a plant, *Myrrhis odorata*.] The typical genus of the Amyridaceae, or Amyrid order of plants. It has a finely smelling resinous gum. *A. Gileadensis* produces the celebrated Balm of Gilead. [*BALM*.] The *A. toxicaria* is said to be poisonous. The *A. Plumieri* and the *A. heandra* furnish part of the Gum Elemi of commerce. The wood of *A. balsamifera* in Jamaica yields one kind of Lignum Rhodium. The layers of the liber of a species belonging to the same genus are employed by the Nubian Mohammedans for paper. (*Lindley: Veg. Kingd.*, p. 460.)

**a-mýs**, *adv.* Old spelling of AMISS.

**a-mýz-tli**, *s.* The Mexican name of a species of Sea-lion (*Otaria*), found on the sea-coasts and estuaries of the American Pacific coast. Its skin is valued on account of the length and softness of its hair.

**án**, *article*. [A.S. *an*, *æn* = (1) one; (2) angle, sole, another; (3) a certain one, some one; (4) any, every one, all. In Sw. *en*; Dan. *en*, *æn*; Dut. *een*, *eene*; Ger. *ein*; Gael. *aon*; Irish *éin*, *ean*, *aon*; Welsh *un*, *yn*; Cornish *unyn*; Arm. *yunaw*; Lith. *wena*; Fr. *un*, *on*; Sp. *uno*, *un*; Port. *hum*; Ital. *uno*; Lat. *unus*; Gr. *eis* (*heis*), masc. *én* (*hen*), neut. one.] [*ONE*.]

I. Its form: The indefinite article, and at first its only form, being placed before words beginning with a consonant, no less than those commencing with a vowel, as is still the case with the similar word *one*. [*ONE*.] (See the subjoined examples in which *an* is used before a consonant.)

"He it setten on an mirie stede."  
*Story of Gen. and Exod.* (1250), ed. Morris, 680.  
"In a weie an time he cam."—*Ibid.*, 1, 485.  
"Ge an husk rane and wel tidl."—*Ibid.*, 2, 015.  
"An kire."—*Ibid.*, 2, 451.  
"An wise man."—*Ibid.*, 2, 649.  
"An sei."—*Ibid.*, 2, 789.

Now the form *a* occurs as well as *an*. For rules as to when the one and when the other is employed, see *A. as a part of speech* (A., V., p. 1). See also Moon's *Bad English* (1866), pp. 56, &c.

¶ In some words now beginning with *n*, that letter has become detached from *a*, and has adhered to the commencement of the subsequent word, which formerly began with

a vowel. Thus, in East Anglia, according to Forby, an ass is called a *nasil* or *nazzle*, i.e., *an assil*, or *an azzie*. Similarly, a newt, originally called an *eft*, *ewel*, or *ewt*. In *adder*, again, the contrary appears to have happened: it was at first a *nadder*, and became an *adder*. So also with *apron*, originally *napron*. [*ADDER*, *NATRIX*.]

II. Its signification: The primary signification of *an* is (1) *one*, in a very indefinite sense, *any one*; (2) *each*; (3) *any*; (4) *one in particular*; (5) *every*. (See *A. as a part of speech* (A., V., p. 1). See also Moon's *Bad English*, p. 89.) Sometimes *an*, like *a*, is placed before a participle or an adjective without in any way altering the meaning.

"And when he had fasted forty days and forty nights, he was afterward an hungred."—*Matt.* iv. 2.

**án**, *conj.* [A contracted form of *AND* (q.v.). Wedgwood thinks this may have come from *e'en*, a contraction of *even*; O. Sw. *æan* = and yet, still, continuously. Home Tooke derives it from A.S. *unnan* = to give. In Lat. *an* is = or, or whether; Gr. *án* (*an*), contraction from *éan* (*ean*) = if, haply, perchance; Arab. & Sam. *an* = if; E. Aram. *ʔ* (*an*), and *ʔn* (*ayin*) = if, or whether.]

¶ *An* is obsolete in English, but still exists in Scotch.

I. IF.

\* (a) Old English:

"He can't flatter, he!  
An honest mind and plain, he must speak truth,  
An they will take it, so; if not, he's plain."  
*Shakspear: King Lear*, ll. 2.

(b) Scotch:

"Troth, I kenns—an they come so many as they speak o'."  
—*Scott: Antiquary*, ch. xlv.

2. As if.

"My next pretty correspondent, like Shakspeare's Ilon in *Pyramus* and *Thisbe*, roars an it were any nightingale."  
—*Addison*.

\* 3. And.

"Thuruch manl a cuntré up an down."  
*Amis & Amiloun*, 1, 70.

**án**, or **a**, as a *prefix*, derived from the Greek. [Gr. *án* (*an*), or *á*, generally called *á* (*alpha*) privative, but *án*, and not *a*, is the original form. In English, Anglo-Saxon, Old Saxon, German of all ages, and Goth. *un*; Dut. *on*; Old Norse & Sw. *o*; Dan. *u*; Wel. *un*; Gael. *ana*, *an*, *am*; Lat. *in*; Sansc. *an*.] From a study of its use in Gaelic, Prof. Key infers that it originally signified *badly*, from which there came the senses (2) of negation, and (3) of intensity. Badness is a negation of good, and the more intense that it is, the more is it worthy of the name of *badness*. (See Prof. Key's *Philological Essays* (1866), pp. 127—148.) Now *an* priv. is used before a vowel, and *a* before a consonant, as *anomalous*, *atheist*.

\* **án**, \* **áune**, *v.t.* [A.S. *unnan*, *geunnan* = to give.]

1. To give. (*Boucher*.) To appropriate, to allot as one's own. (*Jamieson*.)

"Y take that me gode an."  
*Sir Tristrem*, lll. 7. (*Boucher*.)

2. To consent. (*Boucher*.)

"Ich an wel cwith the nightingale,  
Ah wrause, naut for thire tale."  
*Hale and Nightingale*, 1, 78.

\* **án**, *v.t.* [O. Sw. *an*, *prea*. tense of *una*, or *unna* = to wish well. (S. in *Boucher*.)] To wish well to. (*Boucher*.) To owe, to be indebted to. (*Jamieson*.)

"Tristrem speke higan  
In King, God loke the  
As y the love and an  
And thour best served to me."  
*Sir Tristrem*, l. 77.

\* **án**, *adv. or conj.* [Icelandic *en*, *enn* = than.] [*THAN*.] Than.

"And als was he mar an prophet"  
*MS. Coll. Med., Edinb.* (*Boucher*.)

**án**, *prep.* [*ON*.]

\* **án**, *s.* [*INN*.]

**án-a**, *prefix & s.* [From Greek. Gr. *áva* (*ana*) = up; with numerous significations derived from this primary one. According to Prof. Key, cognate with Lat. *an*, *a*, *ad*, & *in*; Wel. *ad*; Gael. *ath* or *as*; Breton *ad* or *as*; Irish *ath*, *adh*, *an*, or *amh*; Old Sax. *ant*; Mid. Ger. *ent* or *en*; Mod. Ger. *ent*; Dut. *ont*; Old Frisian *and*, *ont*, *on*, *and*, *ant*, *und*; Dan. & Sw. *und*; A.S. *on*, *od*, *at*, and *ed*. (Key: *Philolog. Essays*, pp. 1 to 56.)]

1. As a *prefix*: Up to; increase, or strengthening; repetition, or improvement; back, backwards. (See the various words which follow.)

2. As a *substantive*. [Gr. *áva* (*ana*), in the distributive sense = each, throughout.]

*Med. Prescriptions*: The like quantity. It is often contracted to *āā*, or *ā*: as *ana* 3 oz.; *aa* 3 oz.; or *a* 3 oz.

"In the same weight prudence and innocence take,  
Ana of each does the just mixture make."  
*Cowley*.

"He'll bring an apothecary with a chargeable long  
hill of *anax*."—*Dryden*.

**á-na**, **á-na**, *suffix & s.* [From Latin. In Fr. *ana*. Properly, the termination of the neut. pl. in Latin adjectives ending in *anus*, as in sing. *Trojanus* = a Trojan man; neut. pl. *Trojana* = Trojan things.]

1. As a *suffix*: Added to proper names, as an appellation of books consisting of clever or witty sayings of deceased men of eminence, and anecdotes regarding them; some doubtless authentic, others as obviously mythic. This use of the term *ana* seems to have begun in France about the middle of the seventeenth century, whence it spread to other parts of the Continent, and to England. The Scallgerana, or Scallgeriana, appeared in two parts: the first ultimately called, however, *Scallgeriana Secunda*, first appeared in the year 1666; the former in 1699. Among other Continental *ana* the Menegena came forth in 1692, and the Poggiana in 1720. England has had its Walpoleana, its Addisoniana, its Johnsoniana, its Swiftiana, its Mooriana, &c.; and some works like Boswell's celebrated Life of Johnson, though not called *ana*, might with much propriety receive the name. Sometimes *ana* is made a suffix to the name of a place, as *Tunbrigiana* = the gossip or scandal of Tunbridge Wells.

"They were pleased to publish some *Tunbrigiana* this season, but such *ana*! I believe there never were so many vile little verses put together before."  
—*Wess to Gray*.

2. As an independent word, when it becomes a substantive pl. (See example under No. 1.)

**án-a-bái-na**, *s.* [Gr. *ávaβαίω* (*anabainō*) = to go up; *áva* (*ana*) = up, and *βαίω* (*baiō*) = to go.] A genus of plants belonging to the alliance Algae (Sea-weeds) and the order Confervaceae (Confervas). It is to the *A. or Sphaerocysta spiralis* that the green colour of the water in Ballydrain Lake is attributable. (*Lindley: Veg. Kingd.*, p. 16.)

**án-á-báp-tism**, *s.* [In Ger. *anabaptism*; Fr. *anabaptisme*; Sp. & Port. *anabaptismo*; Lat. *anabaptismus*; Gr. *ἀναβαπτισμα* (*anabaptisma*) = re-baptism, from *ávaβαπτίζω* (*anabaptizō*) = (1) to dip repeatedly; (2) to re-baptize; *áva* (*ana*) = in the sense of again, and *βαπτίζω* (*baptizō*) = (1) to dip in or under water, (2) to draw water, (3) (New Test.) to baptize.] (*Liddell & Scott*.)

1. The doctrine of the German Anabaptists of the sixteenth century.

† 2. The doctrine of the modern Baptists, looked at from the point of view of those who hold that baptism administered in infancy is valid, and consequently that if it be repeated to adult life there is a second baptism.

"Anabaptism is an heresy long since condemned both by the Greek and Latin Church."—*Featley: Dipperi's Dipt.*, p. 1.

"That would be Brownism and Anabaptism indeed."  
—*Milton: Reason of Ch. Gov.*, bk. 1.

**án-á-báp-tist**, *s.* [In Ger. *Anabaptist*; Fr. *anabaptiste*; Sp. *anabaptista*, *anabaptista*; Port. *anabaptista*; Ital. *anabaptista*.] [*ANABAPTISM*.]

**A. As a substantive. Church History:**

1. A member of a well-known fanatical sect which largely figured in the ecclesiastical and civil history of the sixteenth century. It began to attract notice within four years of the ever memorable 31st of October, 1517, on which Luther affixed his "theses" to the gate of the castle church of Wittenberg. The most eminent of its early leaders were Thomas Munzer, Mark Stubner, and Nicholas Storch. They had been disciples of Luther; but becoming dissatisfied with the moderate character of his reformation, they cast off his authority and attempted more sweeping changes than he was prepared to sanction. During his absence, they, in 1521, began to preach their doctrines at Wittenberg. Laying claim to supernatural powers, they saw visions, uttered prophecies, and made an immense number of proselytes. The ferment which the exciting religious events taking place in Central Europe had produced in men's minds,

had made them impatient of social or political as well as of spiritual despotism; and in 1525 the peasants of Swabia, Thuringia, and Franconia, who had been much oppressed by their feudal superiors, rose in arms, and commenced a sanguinary struggle, partly, no doubt, for religious reformation, but chiefly for political emancipation. The Anabaptists cast in their lot with the insurgent peasantry, and became their leaders in battle. After a truce the allied princes of the Empire, led by Philip, Landgrave of Hesse, put down the rebellion; and Munzer was defeated, captured, put to the torture, and ultimately beheaded. In 1532, some extreme Anabaptists from Holland, led by a baker called John Matthias, and a tailor, John Boccoldt, called also, from the place whence he came, John of Leyden, seized on the city of Münster, in Westphalia, with the view of setting up in it a spiritual kingdom, in which, at least nominally, Christ might reign. The name of Münster was changed to that of Mount Zion, and Matthias became its actual king. Having soon after lost his life in a mad warlike exploit, the sovereignty devolved on Boccoldt, who, among other fanatical freaks, once promanated the streets of his capital in a state of absolute nudity. On the 24th of June, 1535, the Bishop of Münster retook the city by force of arms, and Boccoldt was put to death in the most cruel manner that could be devised. The excesses of the Anabaptists were eagerly laid hold of by the Popish party to discredit the Reformation. It was in the year 1534, when Boccoldt was in the height of his glory in Münster, that Ignatius Loyola took the first step towards founding the order of the Jesuits, and the extension and rapid success of that celebrated fraternity are to be attributed in a very large measure to the reaction against Protestantism produced by the share which the Anabaptists took in the peasants' war, and the character of the spiritual sovereignty which they set up while Münster was in their hands.

† 2. One belonging to the modern Baptist church. The term is used only by those who believe in infant baptism, and is properly becoming obsolete, there being an unfairness in using an expression which suggests a connection between the turbulent fanatics of Münster and the quiet law-abiding English Baptists. [ANABAPTISM.]

"... rebels, schismaticks, Presbyterians, Independents, Anabaptists, Quakers, the blessed offspring of the late reforming times."—South: *Sermons*, v. 1. 83.

**B. As adjective:** Relating to the Anabaptist doctrine or sect.

"... the anabaptist anarchy."—Froude: *Hist. Eng.*, pt. 1, ch. 12.

**án-a-báp-tis-tic, \*án-a-báp-tis-tick, án-a-báp-tis-ti-cal, a.** [Eng. *anabaptist*; -ic or -ial.] Pertaining to Anabaptism, or to the sect holding the doctrine so characterized by its opponents.

"The excellent Bucer takes occasion severely to reprove these sour hypocrites of the *anabaptistick* sect in his time, who would not allow of any freer use of the good creatures of God, and would frown at any mirth in company, though never so innocent."—*Ips. Bull's Works*, ii. 67.

"... anabaptistical, antinomian, heretical, ethistical epithets."—Milton: *Colastion*.

† **án-a-báp-tis-trý, s.** [Eng. *anabaptist*; -try.] The Anabaptist doctrine, worship, or dominion.

"Thus died this imaginary king; and *anabaptistry* was suppressed in Münster."—Paynt: *Heresiography*.

\* **án-a-báp-ti-ze, v. t.** [Gr. *ἀναβαπτίζω* (*anabaptizō*) = to baptize a second time.]

"Though some call their profound ignorance new lights, they were better *anabaptized* into the application of extinguishers."—Whitelock: *Manners of the English*, p. 160.

\* **án-a-báp-ti-zíng, pr. par. & a.** [ANABAPTIZE.]

**As substantive:** Re-baptizing.

"... the *anabaptizing* of infants, &c."—Fell: *Life of Hammond*, § 1.

**án-a-bás, s.** [Gr. *ἀναβαΐνω* (*anabainō*) = to go up; *ἀνά* (*ana*) = up, and *βαΐνω* (*baínō*) = to go.] A genus of fishes of the order Acanthoptera, and the family Anabatis. The species the *A. testudineus*, of Southern India and Java, ordinarily live in rivers and fresh-water ponds, emerging, however, at times, and working their way, by means of their serrated opercula and the spines in their fins, along the ground, and, according to some observers, even up trees. In Tamil, the name given to them is *Panciri* = Tree-climbers.

**an-áb-a-sis, s.** [Gr. *ἀνάβασις* (*anabasis*) = (1) a going up, as on horseback; (2) a journey, an expedition; *ἀναβαΐνω* (*anabainō*) = to go up; *ἀνά* (*ana*) = up; *βαΐνω* (*baínō*) = to go.]

1. Spec.: The name given by Xenophon to his celebrated work describing the expedition of Cyrus the younger against his brother Artaxerxes Mnemon, king of Persia. Arrian also calls the expedition of Alexander the Great to Asia an *anabasis*.

2. Gen.: Any similar expedition, as that of Napoleon I. to Moscow. (*De Quincy*.)

**án-a-bá-th-rím, s. Lat.,** from Gr. *ἀναβαθρον* (*anabathron*) = a seat upon steps, a professor's chair.] A pulpit, desk, or high seat.

**án-a-bát-ý-dæ, a. pl.** [From *anabas*, the typical genus (q.v.).] A family of fishes belonging to the order Acanthoptera. Cuvier formerly placed them under his family with labyrinthiform pharyngeals.

\* **án-a-bíb-a-zón, s.** [From Gr. *ἀναβιβάζω* (*anabibazō*) = to make to go up; *ἀνά* (*ana*) = up, and *βιβάζω* (*bibazō*) = to make to mount.]

**Astronomy:** "The Dragon's head, or the northern node of the moon." (*Glossogr. Nova*.)

**án-a-bléps, s.** [Gr. *ἀνά* (*ana*) = up, and *βλέπω* (*blepō*) = to look.] A genus of abdominal fleas, of the order Malacopterygii Abdominales, belonging to the family Cyprinidae (Carpis). Their eyes greatly project, and moreover seem, but only seem, as if divided into two; hence the species is called *A. tetraphthalmus*. It is found in the rivers of Guiana.

**án-a-brō-chi-s-mis, s.** [From Gr. *ἀναβροχισμός* (*anabrochismos*); *ἀναβροχίζω* (*anabrochizō*) = to draw out by a loop; *ἀνά* (*ana*) = up, and *βρόχος* (*brochos*) = a noose or slip-knot.]

**Old Med.:** "A way of drawing out the inverted pricking hairs of the eyelid." (*Glossogr. Nova*.)

**án-a-brō-sis, s.** [From Gr. *ἀνάβρωσις* (*anabrosis*), from *βρῶσις* (*brōsis*) = an eating up; (1) weat; (2) an eating; *βιβρώσκω* (*bibrōskō*) = to eat, fut. *βιβρώσμαι* (*bibrōsmat*).] A wasting away of the body.

"*Anabrosis* is a consumption of the body by sharp humours."—*Glossogr. Nova*.

**án-a-cámp-tér-ý-a, a. pl.** [From Gr. *ἀνακαμπτήριον* (*anakaamphtērion*) = a place to walk backwards and forwards in.] Lodgings of those who fled to religious houses for sanctuary.

**án-a-cámp-tic, \*án-a-cámp-tick, a.** [From Gr. *ἀνακαμπτώ* (*anakaamphtō*) = to bend back; *ἀνά* (*ana*) = back, and *κάμπτω* (*kamphtō*) = to bend.] Pertaining to anacampctica (q.v.).

"*Anacampctic* (Gr.) signifies reflecting."—*Gloss. Nova*.

**anacampctic sounds, s.** Reflected sounds, such as those of echoes; sounds falling from acute to grave.

**án-a-cámp-tic-al-ly, adv.** [Eng. *anacampctic*; -ly.] By reflection. (*Hutton*.)

**án-a-cámp-tics, s. pl.** [ANACAMPTE.]

1. **Anciently:** The science of reflected light, now called *catoptrics*.

2. The science of reflected sounds.

**án-a-cámp-tis, s.** [From Gr. *ἀνακαμπτός* (*anakaamphtōs*) = to bend back; *ἀνά* (*ana*) = back, and *κάμπτω* (*kamphtō*) = to bend. So called apparently from the reflexed edges of the pollen masses.] Richard's name for a genus of Orchidaceæ containing the pyramidal orchis, *A. pyramidalis*, the *O. pyramidalis* of Linnaeus, and many modern writers. It is British.

**án-a-cánth-in-í, a. pl.** [Gr. *ἀν*, priv., and *ἀκανθῆ* (*akanthē*) = thorny; from *ἀκανθα* (*akantha*) = a thorn; *ἀκμή* (*akmē*) = a point.]

**Zool.:** In Müller's classification of Fishes, the second sub-order of the order Teleostea. It is equivalent to the Malacopterygii of Cuvier and other writers. It is distinguished from the Acanthoptera (the same as the old Acanthopterygii) by the absence of spines in the rays of the fins. There are four families: the Ammodytidae (Sand-eels), the Ophidiidae, the Gadidae (Cods), and the Pleuronectidae (Flat-fishes). The last-mentioned family has fossil representatives.

**án-a-cánth-ús, s.** [Gr. *ἀν*, priv., and *ἐπι*, and *ἀκανθα* (*akantha*) = a thorn.] A genus of fishes of the Ray family.

**án-a-car-dí-a-gé-sæ, a. pl.** [From *anacardium*, the typical genus.]

*Anacardi* or *Terebinths*: An order of exogenous plants, placed by Lindley under his Rutales, or Rutal alliance. They have usually unisexual flowers. The stamens are equal in number to the petals, or twice as many, or even more; the ovary is generally single; the fruit most commonly drupaceous; the seed, solitary. The leaves are without dots. The order consists of trees or shrubs, with a resinous gummy caustic, or even milky juice. They occur in the tropics of both worlds. In 1846, Lindley estimated the known species at ninety-five. Among these may be noted the Cashew-nut, the Pistacia-nut, and the Mango-fruit. Plants of the order furnish various varnishes, lac, lacquer, and mastic. *Rhus toxicodendron* and *R. radicans* are exceedingly poisonous.

**án-a-car-dí-um, s.** [In Sp. *anacardio*; Port. *anacardo*; Gr. *ἀνά* (*ana*) = resemblance, and *καρδία* (*kardia*) = heart. So called from the form of the nut.] A genus of plants, the type of the order Anacardiaceæ (Anacardi). It contains the Cashew-nut of commerce (*A. occidentale*), the clammy juice of which is used in India for varnishing. The varnish is first white, but afterwards becomes black. It is all but poisonous; so is the fruit, which acts upon the brain. (*Lindley: Veg. Kingd.*, p. 466.) The tree itself is an elegant one, with panded corymbs of sweet-smelling flowers.

**án-a-ca-thar-sis, s.** [Gr. = a clearing away; *ἀνά* (*ana*) = up, and *καθαίρω* (*kathairō*) = cleansing; *καθαίρω* (*kathairō*) = to make pure. Cleansing by an upward action; expectoration or vomiting. (*Parr*.)]

† **án-a-ca-thar-tic, a. & s.** [Gr. *ἀνακαθαρτικός* (*anacathartikos*).]

1. **As adj.:** Promoting (a) expectoration, or (b) vomiting. (*Glossogr. Nova*.)

2. **As subst.:** A medicine fitted to excite expectoration or vomiting.

**án-a-géph-al-sæ-ō-sis, s.** [From Gr. *ἀνακεφαλαίωσις* (*anakephalaíōsis*) = a summary; *ἀνά* (*ana*), and *κεφαλαίωσις* (*kephalaíōsis*) = (1) a comprehension of several notions in a general term; (2) summary treatment; *κεφαλή* (*kephalē*) = the head.]

**Rhet.:** The recapitulation of the heads of a discourse. (*Glossogr. Nova*.)

**a-nách-ar-is, s.** [From Gr. *ἀνά* (*ana*), in the sense of a repetition of, and *χαρίς* (*charis*) = a contraction for *Hydrocharis*. A repetition of

ANACHARIS ALSINISTRUM.

1. Portion of a plant of *Anacharis alsinistrum*.
2. End of a branch, showing female flower.
3. Female flower enlarged.
4. Main stem, showing branching and sori.
5. A leaf enlarged.

the *Hydrocharis*, or Frog-bit.] A genus of plants belonging to the order Hydrocharidaceæ, or Hydrocharis. The *A. alsinistrum*, or Long-flowered *Anacharis*, an American plant, is now naturalised in ponds, canals, &c., in Britain.

\* **a-nách-ór-ét, \*a-nách-ór-ite, s.** (See ANCHORITE.)

fáte, fát, fáre, amidst, whát, fáll, fáther; wé, wét, hère, camél, hër, thère; pine, píť, síre, sír, maríne; gó, pót, or, wóre, wólf, wórk, whò, sòn; míte, cúb, cüre, únite, cür, rúle, füll; trý, Síryan. æ, œ = é. ey = á. ew = ú.

\*ā-nā-chōr-ēt-ŷ-ōal, a. [O. Eng. anachoret = anchorite; suffix -ēal. In Fr. anachoretique; Sp. anacoretico; Port. anachoretico.] Pertaining to an anchorite or anchirite.

"Those severe anachoretical and philosophical persons, who live nearly as a sheep, and in the vicinity as the Baptist."—Sp. Taylor: Sermons at Golden Grove.

ā-nā-chrōn-īc, a. [Gr. ἀνά (ana) = backward; χρονικός (chronikos) = of time; χρόνος (chronos) = time.] Involving an anachronism. (Coleridge. Worcester.)

an-āch-rōn-īsm, \*an-āc-rōn-īsm, s. [In Ger. anachronismus; Fr. anachronismes; Sp. and Ital. anacronismo; Port. anacronismo; all from Gr. ἀναχρονισμός (anachronismos): ἀνά (ana), and χρονισμός (chronismos) = (1) a long duration, (2) a coming late; χρονίζω (chronizō) = to touch; χρόνος (chronos) = time.] The placing of an historic event, or manners and customs, &c., at a wrong chronological date. The term is especially used when anything is dated too early. Thus, it would be a very great anachronism were a modern poet to introduce cannon at the siege of Troy.

"This leads me to the defence of the famous anachronism, in making Æneas and Dido contemporaries; for it is certain that the hero lived almost two hundred years before the building of Carthage."—Dryden.

"The statement, therefore, which represented the Roman envoys in the year after the first accession as obtaining curru from Dionysius the elder, resembles the anachronism which makes Numa the disciple of Pythagoras, or that which describes the colloquy between Solon and Croesus."—Lewis: Early Roman Hist., ix. xii, pt. ii, § 12.

ā-nā-chrōn-īc-īc, a. [From Eng. anachronism(s); -īc, Gr. from Gr. ἀνά (ana) = back; χρονιστής (chronistēs) = tarrying, delaying. [ANACHRONISM.] Pertaining to or involving an anachronism; wrongly dated.

"Among the anachronistic improprieties which this poem contains, the most conspicuous is the fiction of Hector's spearhead."—Watson: Hist. E. P., ii, § 5.

ā-nā-clā-sīs, a. [Gr. ἀνάκλασις (anaklasis) = a bending back and breaking; ἀνακλάω (anaklāō) = (1) to fracture, to bend back, (2) to break short off; ἀνά (ana) = back, and κλάω (klāō) = to break.]

Surgery: The bending back of any part.

ā-nā-clās-tīc, a. [Gr. ἀνάκλαστος (anaklastos) = bent back.] Bent back; refracted.

anaclastic glasses, s. [Called in Ger. verrier gläser, i. e., vexing glasses, from the disturbance produced by their resilience.] A kind of sonorous flat-bellied phials, shaped like inverted funnels, with bottoms extremely thin, and slightly convex. When alternately filled with air, and exhausted by the mouth, they emit a considerable sound, produced by their thin bottoms assuming first a convex and then a concave form. They are made chiefly in Germany.

ā-nā-clās-tīcs, a pl. [ANACLASTIC.] The science of dioptrics; the science which treats of refracted light.

ā-nā-clī-sīs, s. [Gr. ἀνάκλισις (anaklisis) = a lying or leaning back; ἀνά (back), and κλίσις (klisis) = a bending, inclination; κλίνω (klīno) = to make, to bend.]

Med.: A term used by Hippocrates to describe the reclining posture of the sick; also a couch or sick-bed.

ā-nā-foe-nō-sīs, s. [Gr. ἀναφοίσις (anaphōisis) = an arrangement, a communication; ἀναφοίσις (anaphōisis) = to communicate or impart; or ἀνά, intensive, and φοίσις (phōisis) = a making common; κοινός (koīnos) = to make common; κοιός (koīnos) = common.]

Rhet.: A figure by which a speaker applies to his opponents for their opinion on some point in dispute between him and them.

ā-nā-cōl-ū-thōn, s. [In Fr. anacoluthie. From Gr. ἀνακόλουθος (anacolouthos) = want of sequence; ἀν, priv., and ἀκόλουθος (akolouthos) = following; ἀκολούθειω (akolouthēō) = to follow.]

Rhet. & Gram.: Want of sequence in a sentence. Such a change in the structure of a sentence as to render it ungrammatical.

ā-nā-cōn-dā, s. [Ceylonese name.] A large snake, the Eunectus marinus, which occurs in the island of Ceylon.

ān-a-cōs-ta, s. [Dut.] A woollen diaper made in Holland for the Spanish market.

ān-āc-rō-ōn-tīc, a & s, & āc-rō-ōn-tīc, s. [In Fr. Anacronétique; Sp., Port., and Ital. Anacronitico. From Anacron, a celebrated Greek lyric poet, who flourished about 540 B.C. His writings were elegant in diction, and melodious in cadence, but liable to censure for a moral point of view, his unvarying themes being wanton love and wine.]

A. As adjective: Pertaining to Anacron, or to erotic poetry.

Prosody. Anacronitic verse: A kind of verse much used by Anacron. It consists of three feet and a half, usually spondee and iambuses, though sometimes anapaests occur in it.

"It is, indeed, a memorable fact to be recorded of a boy, that, before completing his fifteenth year, he had translated the Greek Hymn of Synesius into English Anacronitic verse."—De Quincy's Works (ed. 1863), vol. ii, pp. 71, 72.

B. As substantive:

1. A verse composed in the metre called Anacronitic. [ANACRONITIC VERSE.]

2. An erotic poem; a poem treating on Anacron's favourite subjects, love and wine.

"To the miscellaneous [of Cowley] succeed the anacronitic, or paraphrastic translations of some little poems, which pass, however justly, under the name of Anacron."—Johnson: Life of Cowley.

ANACRONITIC.

"Freed of my soul: this goblet slip, 'Twill chase that pensive tear: 'Tis not so sweet as woman's lip. But, oh! 'tis more sincere Like her delusive beam. 'Twill steal away thy mind: But like affection's dream, It leaves no sting behind!"—Moore.

\*ān-a-crī-sīs, s. [Gr. ἀνακρίσις (anakrīsis) = an examination, an inquiry; ἀνά (ana) = again, and κρίσις (krisis) = a separating; κρίνω (krīno) = to separate.]

Among old Civilians: Interrogation of witnesses, especially by torture.

ān-a-cyc-lū-s, s. [In Fr. anacyclo; Sp., Port., & Ital. anaciclo; Gr. ἀνακύκλω (anakuklēō) = to turn round again; ἀνά (ana) = again, and κύκλω (kuklēō) = to move round; κύκλος = a ring or circle. So called because there are rows of ovaries without flowers, placed in a circle round the disk.] A genus of plants belonging to the order Asteraceae, or Composites. The A. radiatus was brought to the south of Ireland in ballast, but is not a genuine British plant. The Pellitory of Spain (A. pyrethrum) has a fleshy root, which, when fresh, produces on the hands of those who gather it first a sensation of great cold, and then one of burning heat. In rheumatic affections of the mouth it is employed as a masticatory. In other diseases it is used as a powerful rubefacient and stimulant. (Lindley: Veg. Kingd., p. 707.)

ān-a-dēm, ān-a-dō-me, s. [Lat. anademā; Gr. ἀνάδημα (anadēma), for ἀναδέσμα (anadesma) = a band for women's hair.] A garland or fillet. A chaplet or crown of flowers.

"In anadems for whom they curiously dispose The red, the daisy white, the goodly damask rose."—Dryden: Polyolb., Song 15.

"The self-lov'd will of man or woman should not rule in them, But each with other wear the anadema."

B. Jonson: Masq. at Court.

"At the end of [this song], Crece was seen upon the rock, quaintly attired, her hair loose about her shoulders, an anadem of flowers on her head, with a wand in her hand."—W. Brown: Inner Temple Masque.

"Sit light in wreaths and anadems." Tompion: The Palace of Art.

ān-ā-dī-a, s. [Etyim. doubtful.] A genus of snakes containing the A. ocellata, or Eyed Anadis, believed to be from India.

ān-ā-dī-a-dā, s. pl. [From the typical genus Anadis (q.v.)] A family of Ophidians.

ān-ā-dī-plē-sīs, a. [Lat. anadiplosis, from Gr. ἀναδίπλωσις (anadiplosis) = a doubling back. In rhet. = a repetition; in gram. = a reduplication; ἀνά (ana) = again, and δίπλωσις (diplosis) = a compounding of words; διπλῶς (diplos) = to double; διπλῶς (diplos) = double.]

Rhet.: The reduplication of a word by the repetition at the commencement of a new clause of the word by which the former one was terminated. (Glossogr. Nova.)

"... as, he retained his virtues amidst all his misfortunes, misfortunes which only his virtues brought upon him."—Johnson.

ān-a-drōm, s. [For etym. see ANADROMOUS.] Any fish which ascends rivers: the eel, for instance.

ān-ādrōm-ōus, a. [Gr. ἀνάδρομος (anadromos) = running up, as a fish "running up" a river: ἀνά (ana) = up, and δρόμος (dromos) = a course, or running; δρασκεῖν (draskein), pr. infin., and δρόμονα (dromona), 2 perf. of τρέχω (trechō) = to run.] Pertaining to such fishes as at certain seasons ascend rivers.

ā-næ-mī-a, s. [Gr. ἀναμία (anaimia) = want of blood; ἀν (an), priv., and αἷμα (haima) = blood.] Bloodlessness; a morbid state of the system produced by loss of blood, by deprivation of light and air in coal-mines, or causes more obscure. The patient is characterised by great paleness, and blood-vessels, easily traceable at other times, become unseen after great hæmorrhage, or in cases of anæmia. (Todd & Bowman: Physiol. Anat., ii. 205.)

ān-æ-mīc, a. [Gr. ἀναίμιος (anaimios) = bloodless; Eng. suffix -īc.] Relating to the disease called Anæmia (q.v.)

"If the brain be anæmic, the quantity of circulating fluid will be large."—Todd & Bowman: Physiol. Anat., vol. i, p. 295.

ān-æ-mōt-rōph-ŷ, s. [Gr. ἀναίμιος (anaimios) = bloodless, and τροφή (trophē) = nourishment.] Want of nourishment; its cause being deficiency of blood.

ān-æs-thē-sī-a, s. [Gr. ἀνασθησία (anasthēsia) = want of perception, or of feeling; ἀν (an), priv., and αἰσθησις (aisthēsis) = perception by the senses; αἰσθάνομαι (aisthanomai), fut. αἰσθήσομαι (aisthēsomai) = to perceive.] Loss of feeling; insensibility.

ān-æs-thēt-īc, ān-æs-thō-tīc, a. & s. [Gr. ἀν (an), priv., and αἰσθητικός (aisthētikos) = perceptive.]

A. As adj.: Pertaining to an anæsthetic; deadening or destroying consciousness. [B.]

B. As substantive (Pl.): A class of medicines which, when inhaled in the form of vapour, destroy consciousness for a time, and with it the sense of pain. Ether makes anæsthetics the third order of his sub-class, defined as medicines acting especially upon the brain proper, but probably also upon other portions of the central nervous system. Among the uses to which they are put are the alleviation of pain and spasm, the production of unconsciousness during surgical operations or parturition, and the procuring of sleep in delirium. The best known are chloroform, ether, and nitrous oxide.

"Since the introduction of ether and chloroform as anæsthetics in the practice of surgery."—Todd & Bowman: Physiol. Anat., vol. ii, p. 405.

ān-æs-thē-tīc, v. t. [ANÆSTHESIA.] To render insensible by an anæsthetic. (Jour. Med. Soc., ix. 216.)

ān-æs-thīc, v. t. [ANÆSTHESIA.] To anæsthesise (Daily Telegraph, April 8, 1886, p. 5.)

ān-a-gāl-līs, s. [In Sp. anagallide; Ital. anagallide; Lat. anagallis; Gr. ἀναγάλλης (anagallis); ἀνά (ana) = again, and ἀγάλλω (agalō) = to make glorious, to adore.]

Bot.: A genus of Primulaceæ (Primulaceæ). Two species occur in Britain, the Anagallis arvensis, the Scarlet Pimpernel, and the A. tenella, or Bog Pimpernel. The former is a well-known plant, easily recognised by its pretty rotund flowers, generally crimson, though more rarely blue, flesh-white, coloured or white, with a purple eye. Greeting in sunlight, and closing when the beams of the luminary are withheld, it is sometimes called the Poor Man's Weather-glass. It flowers from May to November. Loudon says that in our latitude it opens about 7 or 8 a.m., and closes about 2 or 3 p.m. A very poisonous extract can be formed from it; nevertheless, the plant has been used in cases of madness, epilepsy, and dropsy.

ān-a-glyph, s. [Gr. ἀναγλυφή (anaglyphē) = a work in low relief: ἀνά (ana) = up, and γλυφή (glyphē) = carving; γλύφω (glyphō) = to hollow out, to engrave.]

Sculpture: A figure cut in low relief on a plane or smooth surface, as in the case of a cameo.

ān-a-glyph-īc, a. [Gr. ἀναγλυφός (anaglyphos)] The same as ANAGLYPTIC (q.v.)

Anaglyphick Art: "The art of carving and engraving." (Glossogr. Nova.)

bōil, bōy; pōut, jōwl; cat, cēil, chorus, chin, bench; ge, gem; thin, thīn; sin, s; expect, Xenophon, exist. -īng. -tion, -ston, -tioun, -cioun = shūn; -tion, -gion = zhūn. -tions, -sions, -cions = shūs. -ble, &c. = bēl. -tīque = tīk.

án-a-glýp-tíc, a & s. [Lat. *anaglyptus*; Gr. ἀναγλυπτός (*anaglyptos*).]

1. As *adj.*: Wrought in low relief, embossed, engraved, or encased in low relief. When the design is produced by the engraving or indentation, as in the case of seals, it is then termed *diaglyptic*, or *intaglio*.

2. As *substantive*: Anything wrought in low relief, in the manner described under the adjective.

"They rather concern the statuary art; though we might yet safely, I think, admit some of the Greek *anaglypticks*."—*Evangel: Sculptura*, p. 16.

án-a-glýp-tō-gráph, s. [Gr. ἀναγλυφή (*anaglyphē*) = a work in low relief; γραφή (*graphē*) = a drawing; γράφω (*graphō*) = to scratch, to scrape, to grave.]

Nat. Phil.: A machine for producing drawings or etchings in relief, from models, coins, medals, &c. One sent by Mr. George Hogarth Makins to the Kensington Loan Collection is described in the Report (1877), p. 478.

án-a-glýp-tō-gráph-ic, a. [Eng. *anaglyptograph*; -ic.] Pertaining to the art of producing drawings or etchings in relief, or to the anaglyptograph (q.v.).

án-a-glýp-tōg-raph-ý, s. [Lat. *anaglyptus*; Gr. ἀναγλυπτός (*anaglyptos*) = wrought in low relief, embossed; γραφή (*graphē*) = delineation; γράφω (*graphō*) = to grave, scrape, or scratch.] The art of copying works in relief. (*Edinburgh Review*, Worcester.)

án-ag-nōr-ý-sis, s. [Gr. ἀναγνώρισις (*anagnōrisis*) = recognition: ἀνά (*ana*) = again, and γνώρισις (*gnōrisis*) = acquaintance (with each other); γνωρίζω (*gnōrizō*) = to make known.] Recognition; the *dénouement* in a drama. (*Bigin*.)

án-ag-nō-sis, s. [Gr. ἀναγνώσις (*anagnōsis*) = a knowing again: ἀνά (*ana*) = again, and γνώσις (*gnōsis*) = an inquiry, judgment; γινώσκω (*gnōskō*), infin. of γινώσκω (*ginōskō*) = to know.] Recognition. The same as ANAGNORISIS (q.v.).

án-a-gō-gē, án-a-gō-ēý, s. [In Fr. *anagogie*; Sp. *anagoge*, *anagogia*; Port. & Ital. *anagogia*; Gr. ἀναγωγή (*anagōgē*) = a leading up: ἀνά (*ana*) = up, and ἀγωγή (*agōgē*) = a leading; ἀγώ (*agō*) = to lead.]

Thool.: Elevation of the mind to spiritual objects.

¶ The form *anagogy* is in Dyche's Dict. (1758).

Exegetics: The pointing out of a spiritual sense under the literal words of portions of Scripture; the indication of a reference to New Testament doctrine in the prophecies, types, and symbols of the Old. [ANAGOGICAL.]

Med.: The return of humours or the rejection of matter upward by means of the month.

án-a-gō-gēt-ý-cal, a. [Formed as if from Gr. ἀναγωγίτικος (*anagōgētikos*), from ἀναγωγή (*anagōgē*) (q.v.).] Pertaining to anagoge. The same as ANAGOGICAL (q.v.). (*Bailey*.)

án-a-gōg-ý-cal, a. [In Fr. *anagogique*; Gr. ἀναγωγικός (*anagōgikos*) = raising the mind to heavenly things, mystical.] Pertaining to anagoge; mysterious, elevated, spiritual. (Applied specially to one of the four chief methods of interpreting Scripture, the other three being the *literal*, the *allegorical*, and the *tropological* methods.)

"Anagogical. Mysterious, or which hath an elevated, raised, and uncommon signification."—*Blount*.

"Which is an anagogical trope or hyper speaking of my lord above by compass."—*Bale: Yet a Course at the Romyshe Foxe*, fol. 36.

"From the former of these two have been drawn certain senses and expositions of Scriptures, which had need be contained within the bounds of sobriety: the one anagogical, and the other philosophical."—*Bacon: Advancement of Learn.*, bk. ii.

"We cannot apply them [prophecies] to him, but by a mystical anagogical explication."—*South: Sermon*, viii. 161.

án-a-gōg-ý-cal-ly, adv. [Eng. *anagogical*; -ly.] Mysteriously, with spiritual elevation; in a spiritual sense. (*Johnson*.)

án-a-gōg-ics, \* án-a-gōg-icks, s. pl. [Gr. ἀναγωγικός (*anagōgikos*) = mystical.] The study of mystical subjects.

"The notes upon that constitution say, that the Mishá Torah was composed out of the cabalistics and anagogics of the Jews, or some allegorical interpretations pretended to be derived from Moses."—*L. Addison: State of the Jews*, p. 248.

án-a-grám, s. [In Sw. *anagram*; Ger. *anagramm*; Fr. *anagramme*; Sp. *anagrama*; Port. & Ital. *anagramma*. From Gr. ἀνά (*ana*) = backwards, and γράμμα (*gramma*) = that which is drawn or written, a letter: γράφω (*graphō*) = to grave, to write.]

†1. The letters of any word read backwards. Thus in a satire on the Whig government under Lord Melbourne, which appeared in a provincial Tory paper, the political leader was described as Enrubmled, which was simply Melbourne spelled backwards.

2. The letters of any word or words transposed in their order so as to make another word, or more generally a short sentence. Thus the letters in the name of *William Nay*, Attorney-General to Charles I., who toiled hard in his vocation, become, when transposed, *I moyl in law*. Similarly *Galen* becomes by transposition *angel*, and *Mary*, *army*. The practice was not much in vogue among the Greeks and Romans, but it was common among the Jewish cabalists. Among European nations it first began to be extensively employed in the sixteenth century. Sometimes writers put not their own name but its anagram on their works; thus, Calvin put not Calvinus, but its anagram, Alcinus, on the edition of his *Institutes* published at Strasburg in 1539. In certain cases mathematicians who had made discoveries for which they wished to claim priority without communicating their secret, gave forth its anagram instead of itself. This was done by Galileo, Huyghens, and Sir Isaac Newton. Sometimes these anagrams were intentionally so obscurely worded, and of such a length, as to render their solution almost impossible. Thus Galileo announced his observations on Saturn:—*Smaismrilmle poeta leumi bone nugtavrivas = altissimum planetam tergeminum observavi* (I have observed that the most distant planet is triple-formed). Huyghens also announced his discovery of Saturn's ring in the following anagram:—*aaaaaaaa ccccc d eeeee iiiiiii llll mm nnnnnnnn ooooo p q r r s tttt uuuuu = annulo cingitur, tenui, plano nusquam coherente, ad eclipticam inclinato* (it is surrounded by a slender ring, nowhere coherent, inclined to the ecliptic).

"Though all her parts be not in th' usual place, She hath vet the anagrams of a good face; If we might put the letters but one way, In that lean death of words, what could we say?"—*Dante's Poems*, p. 70.

"Thy genius calls thee not to purchase fame In keen lambicks, but mild anagram."—*Dryden: Mac Flecknoe*, v. 204.

† án-a-grám, v. t. [From the substantive.] To construct an anagram by transposing the letters of any particular word. (*Warburton*, Worcester.)

án-a-gram-mát-ic, án-a-gram-mát-ý-cal, a. [From Gr. ἀνά (*ana*), and γραμμάτικός (*grammatikos*); Gr. ἀναγραμμα (*anagramma*) = an anagram.] Containing an anagram

"For whom was devised Pallás's defensive shield, With *Georga's* head thereon, with this *anagrammatical* word."—*Camden*.

"Some [places] have continued *anagrammatical* appellations, from half their own and their wives' names joined together."—*Swift: On Barb. Denom. in Ireland*.

án-a-gram-mát-ý-cal-ly, adv. [Eng. *anagrammatical*; -ly.] After the manner of an anagram.

"Please to cast your eye *anagrammatically* upon the name of the balsamum; you will find, 'Convenient rebus nomina sepe sult'."—*Dayton: Notes on Don Quix.*, iii. 2.

án-a-grám-mat-ism, s. [Gr. ἀναγραμματισμός (*anagrammatismos*).] The art or practice of making anagrams.

"The only quintessence that hitherto the alchemy of wit could draw out of names is *anagrammatism*, or *metagrammatism*, which is a dissolution of a name truly written into its letters as its elements, and a new connection of it by artificial transposition, without addition, subtraction, or change of any letter into different words, making some perfect sense applicable to the person named."—*Camden*.

án-a-grám-mat-ist, s. [From Gr. ἀνά (*ana*), and γραμματιστής (*grammatistēs*).] One who makes anagrams.

"To his lo. fr. Mr. W. Aubrey, an ingenious *anagrammatist*, late tamed minister."—*Amange: Epigrams*, Ep. 13.

án-a-grám-mat-ize, v. t. [In Fr. *anagrammatiser*; Port. *anagrammatizar*; Ital. *anagrammatizzare*; Gr. ἀναγραμματίζω (*anagrammatizō*).] To make anagrams.

"Others suppose that by the word *Sophyra*, which is *Opbyr anagrammatized*, mentioned in the seventy-two interpreters, is intended or meant *Sofia* or *Sophura*."—*Sir T. Herbert: Trav.*, p. 350.

"Others, in Latin, *anagrammatica* it [the name of Eve] from *Evā into Vā*; because, they say, she was the cause of woe."—*Austin: Isaac Homo*, p. 182.

án-a-gráph, s. [Gr. ἀναγραφή (*anagrapḗ*) = (a writing up, a record; ἀναγράφω (*anagrapḗō*) = to write up: ἀνά (*ana*) = up, and γράφω (*graphō*) = to write.]

- 1. An inventory; a register
- 2. A commentary.

a-na-grōs, s. [Sp.] A Spanish measure for grain used chiefly in Seville, and containing about two bushels.

án-a-gý-ris, s. [In Port. *anagyro*; Ital. *anagride*; Lat. *anagyros*; Gr. ἀνάγυρις (*anaguris*) and ἀνάγυρος (*anagyros*): ἀνά (*ana*) = backwards; γύρος (*gyros*) = a circle.] A genus of papilionaceous plants, one of the Clatropical Eupodiales. The *A. fetida*, a bush with trifoliate leaves and yellow racemose flowers, has purgative properties, and its seeds are narcotic.

án-aí-ma, a. [Gr. ἀ = without, and αιμα (*haima*) = blood; ἀναιμία (*anaimía*) = want of blood.] A zoological term used by Aristotle, and signifying *without blood*. It need scarcely be added that Aristotle's idea of the bloodless character belonging to certain animals was wholly erroneous. [ANÆMIA.]

á-nal, a. [From Lat. *anus* = the anus.] Pertaining to the anus.

*Ichthyol.*: The *anal fin* is the fin placed on the lower part of a fish's body, and so far behind as to be near the anus.

"... the first rays of the dorsal and anal fins."—*Orfish's Courier*, vol. x., p. 7.

án-ál-çite, án-ál-çimo, s. [In Ger. *Analchim*; Gr. ἀναλκίς (*analkis*) = weak; ἀ, priv., and ἀλκή (*alkē*) = strength. So called because by rubbing it becomes weakly electric.] A mineral classed by Dana as the type of his Analcite group. It occurs isometric, in trapezohedrons, and massive granular. Its hardness is 5 to 5.5, its sp. gr. 2.22 to 2.29 or 2.278, the lustre vitreous, the colour white tinged with other hues. It varies from transparent to opaque. It is brittle. It consists of silica 51 to 55.12, alumina 22.23 to 24.18, lime 0.27 to 5.82, soda 6.45 to 14.65, potassium 0.55 to 4.46, and water 7.68 to 9.75. It is found in Scotland in the Kilpatrick and Campsie Hills, at Bowling, in Glen Farg, on the Caltoun Hill near Edinburgh, and at Kilmalcolm; in Ireland in Antrim; in the Faroe Isles; in various other parts of Europe; in Nova Scotia, Canada, and the United States.

¶ Dana considers Picranalcite probably to be analcite altered by the magnesium process, and Cluthalite also to be changed analcite.

analcite carnea, s. [Lat. *carnea* = fleshy; from *caro*, genit. *carnis* = flesh.] The old name for SARCOLITE (q.v.).

analcite group, s. A group of minerals placed by Dana as the third in order under the Zeolite section of his Hydrus Silicates.

án-a-léc-ta, s. pl. [ANALECTS.]

án-a-léc-tíc, a. [From Gr. ἀναλεκτικός (*analektikos*).] Pertaining to analects; as, an *analectic* magazine—i. e., one containing essays or selections. (*Webster*.)

án-a-léctas, án-a-léc-ta, s. pl. [In Ger. *Analekten*; Fr. *analectes*; Sp. *analectos*. From Gr. ἀνάλεκτα (*analekta*), neut. pl. of ἀνάλεκτος (*analektos*) = choice, select.]

- \*1. Crumbs which fall from the table; "the remains or fragments taken off the table." (*Dyche*, 1753.)
- 2. A collection of short literary productions, as essays or jottings; "certain parts or portions selected out of different authors." (*Dyche*.)

án-a-lém-ma, s. [In Ger. & Lat. *analemma*. From Gr. ἀνάλημμα (*analemma*) = that which is used for repaling or supporting anything; ἀναλαμβάνω (*analambanō*) = to take up; ἀνά (*ana*) = up, and λαμβάνω (*lambanō*) = to take.]

- 1. *Geom.*: A projection of the sphere on the plane of the meridian orthographically made by a straight line and ellipses, the eye being supposed at an infinite distance, and in the east or west point of the horizon.

fâte, fát, fárc, amidst, whât, fáll, father; wē, wēt, hère, camēl, hēr, thère; pine, pít, síre, sír, marine; gō, pót, or, wóre, wqf, wörk, whò, sòn; mûte, cúb, cüre, unite, cür, rûle, füll; trý, Sýrian. æ, œ = ē. ey = â. qu = kw.

2. Mech.: An instrument made of brass or wood on which the projection now mentioned is drawn, with an horizon or cursor fitted to it, in which the solstitial colure and all circles parallel to it will be represented as concentric, all circles oblique to the eye as ellipses, and all the planes of which pass through the eye as straight lines. The analemma now described is used for illustrating, at least with an approach to accuracy, the various astronomical problems.

ăn-a-lêp-sis, ăn-a-lêp-sỹ, ăn-a-lêp-si-a, s. [Gr. ἀνάληψις (analepsis) = a taking up, restoration; ἀναλαμβάνω (analambanō), fut. ἀναλήψομαι (analepsomai) = to take up, to restore to health; ἀνά (ana), and λαμβάνω (lambanō), fut. λήψομαι (lepsomai) = to take.]

1. The augmentation or nutrition of an emaciated body; recovery of strength after disease. (Quincy, &c.)
2. The name given by Johannes Anglicus and Riverius to a kind of epilepsy which is said to proceed from disorder of the stomach. It is sometimes used in a more extended sense for epilepsy in general. (Parr.)

ăn-a-lêp-tic, \*ăn-a-lêp-tick, a. & s. [In Fr. analeptique; from Gr. ἀναληπτικός (analeptikos).]

1. As adjective: Restorative.
"Analeptic medicines cherish the nerves and renew the spirits and strength."—Quincy.
Analeptic Tonics: In Garrod's classification of medicines, the same as blood topics or blood restoratives (q.v.).
2. As subst.: A medicine designed to impart tone to the system, restoring flesh, strength, and cheerfulness after sickness or weakness from whatever cause; a restorative.

ăn-ăl-gô-si-ă, s.
Pathol.: Incurability to pain; inability to feel pain.

\*ăn-ă-lie, \*anallize (ă-nă-lî-yî), v.t. [ALIENE.] To alienate.
"Will ye me to have analized, sold and disposed, as I by these presents analize . . . to the said B . . ."—Spottiswoode: Style of Writs. (Boucher.)

\*ă-nă-l-ô-gă-l, a. [Eng. analog(y); -al.] The same as ANALOGOUS.

ăn-a-lôg-y-cal, a. [In Fr. analogique; Sp., Port., & Ital. analogico; Lat. analogicus; Gr. ἀναλογικός (analogikos) = proportional, analogous.]

1. Analogous.
"There is placed the minerals between the inanimate and vegetable provinces, participating something analogical to either."—Bate: Origin of Mankind.
Dr. Johnson draws the following distinction between the words analogous and analogical: "Analogous signifies having relation, and analogical having the quality of representing relation."

2. Logic and Ordinary Lang.: Pertaining to analogy; pertaining to resemblances of any kind, on which may be founded reasoning falling short of the conclusiveness possessed by induction. [ANALOGY, INDUCTION.]

"The cases in which analogical evidences afford in itself any very high degree of probability are, as we have just observed, only those in which the resemblance is very close and extensive."—John Stuart Mill: Logic, 2d ed. (1846), vol. II, ch. xx, p. 104.

3. Biol.: Pertaining to two animals, two plants, or even an animal and a plant, which in certain respects resemble each other; the similarity, however, being one of analogy only, and not of affinity. [ANALOGY, AFFINITY.]

"All analogical resemblances, as of a whale to a fish."—Darwin: Descent of Man, vol. I, pt. I, ch. vii, p. 230.

ăn-a-lôg-y-cal-ly, adv. [Eng. analogical; -ly.] In an analogical manner.

" . . . we are often obliged to use these words analogically to express other powers of the mind which are of a very different nature."—Reid: Inquiry into the Human Mind, c. 7.

ăn-a-lôg-y-cal-nôss, s. [Eng. analogical; -ness.] The quality of being analogical; fitness to be applied for the illustration of some analogy.

\*ăn-ăl-ôg-îe, s. [ANALOGY.]

ăn-ăl-ôg-îsm, s. [In Ger. analogism; Fr. analogisme; Port. analogismo. From Gr. ἀναλογισμός (analogismos) = fresh calculation, reconsideration, a course or line of reasoning, proportionate calculation; from ἀναλογίζομαι

(analogizomai) = to count up again; ἀνά (ana) = again, and λογίζομαι (logizomai) = to count.]

1. An argument from the cause to the effect. (Johnson.)

2. Investigation of things by the analogy which they bear to each other. (Crabb.)

ăn-ăl-ôg-îst, s. [Eng. analog(y); -ist.] One who on a particular occasion, or habitually, reasons from analogy. (Webster.)

†ăn-ăl-ôg-îze, v.t. [Eng. analog(y); -ize. Gr. ἀναλογίζομαι (analogizomai).] [ANALOGISM.] To reason from analogy; to explain by means of analogy.

"We have systems of material bodies diversely figured and situated, if separately considered; they represent the object of the desire which is analogized by attraction or gravitation."—Cheyne: On Regimen; Natural Analogy, § 6.

†ăn-ăl-ôg-îzed, pa. par. [ANALOGIZE.]

†ă-nă-l-ô-gôn, s. [Neut. of Gr. adj. ἀνάλογος (analogos) = proportionate, analogous to.] That which is analogous to something else.

ăn-ăl-ôg-ôus, a. [In Sp., Port., & Ital. analogo; Lat. analogus; Gr. ἀνάλογος (analogos) = proportionate to.]

1. Logic & Ord. Lang.: Presenting some analogy or resemblance to; parallel to in some respect; similar, like.

"The language is analogous, wherever a thing, power, or principle in a higher dignity is expressed by the same thing, power, or principle in a lower but more known form."—Cotteridge: Aids to Reflection (1839), p. 149.

" . . . the artificial instruments which we ourselves plan with foresight and calculation for analogous uses."—Owen: Classif. of the Mammalia, p. 82.

¶ It is followed by to of the thing to which the resemblance is perceived.

" . . . that the particular parts principally objected against in the whole dispensation are analogous to what is experienced in the constitution and course of Nature or Providence."—Butler: Analogy, Intro.

2. Grammar. Nouns are sometimes divided into univocal, equivocal, and analogous. (Whately: Logic, bk. II., ch. v., § 1.)

3. Pyro-electricity. Analogous pole is the name given to the end of a crystal which shows positive electricity when the temperature is rising. It is opposed to antilogous pole (q.v.). (Atkinson: Ganot's Physics, § 637.)

4. Biology:
(a) Having a relation of analogy, but not one of affinity.
"The pigeons in one order [the Ravores], and the Edentates in the other [Ungulata], follow next; let us therefore see how far these groups are analogous."—Swainson: Birds, vol. III. (1837), p. 160.

(b) Having a relation of analogy combined with one of affinity.
"The two owls, the two tyrant fly-catchers (Pyrocephalus), and the dove, are also smaller than the analogous but distinct species."—Darwin: Voyage round the World, ch. xvii.

Analogous variation: Variations of a similar character in different species, genera, &c.

"Many of these resemblances are more probably due to analogous variation, which follows, as I have elsewhere attempted to show, from co-descended organisms having a similar constitution, and having been acted on by similar causes inducing variability."—Darwin: Descent of Man, vol. I, pt. I, ch. vi, p. 194.

ăn-ăl-ôg-ôus-ly, adv. [Eng. analogous; -ly.] In an analoguous manner.

"Can you, then, demonstrate from his unity, or omniscience, which you conceive but analogously and imperfectly. . . ."—Skilton: Deism Rev. Dial. & . . . the same word may be employed either univocally, equivocally, or analogously."—Whately: Logic, bk. II., ch. v., § 1.

ăn-a-lôgue, s. [Fr. analogue = analogous; Gr. ἀνάλογος (analogos) = proportionate to: ἀνά (ana) = up to; λόγος (logos) = reason. According to reason; analogous to.] That which resembles something else in one or more respects.

Specialty:
1. Philol.: A word in one language corresponding to a word in another.

"B. (Sanskrit) ap. water, the analogous of the Latin aqua."—Key: Philological Essays (1868), p. 258.

2. Biol.: A part of an animal or plant which has the same function as another part in a second animal or plant differently organised. [HOMOLOGUE.]

3. Geol.: Any body which corresponds with, or bears great resemblance to, another body. (Especially used by geologists in comparing fossil remains with living specimens.)

" . . . the great abundance in the colliette ocean of fishes, whose nearest living analogue is the Port Jackson shark (Cestracion)."—Owen: British Fossil Mammals and Birds (1846), p. xiv.

ăn-ăl-ôg-ý, \*ăn-ăl-ôg-ýe, s. [In Sw. & Dan. analogia; Ger. & Fr. analogie; Sp., Port., Ital., & Lat. analogia; all from Gr. ἀναλογία (analogia) = (1) equality of ratios, proportion; (2) analogy; ἀνά (ana), and λόγος (logos) . . . = a ratio, &c.; λέγω (legō) = to count.]

A. Ord. Lang.: Similitude of relations between one thing and other (see B., Logic, No. 1.), or such resemblances as are described under Logic, No. 2. (The thing to which the other is compared is preceded by to or with.)

"The Analogy of Religion, Natural and Revealed, to the Constitution and Course of Nature." By Joseph Butler, LL.D., late Lord Bishop of Durham.

¶ When both are mentioned together they are connected by the word between.

" . . . if a real analogy between the vegetable world and the intellectual and moral system were presumed to exist. . . ."—Isaac Taylor: Elements of Thought, 8th ed. (1846), p. 31.

B. Technically:
I. Logic:

1. Resemblance of relations, a meaning given to the word first by the mathematicians, and adopted by Ferguson, Whately, and, as one of various senses, by John Stuart Mill. To call a country like England, which has sent out various colonies, the mother country, implies that there is an analogy between the relation in which it stands to its colonies and that which another holds to her children. (Mill's Logic. (See B., II., Math.))

2. More usually: Resemblance of any kind on which an argument falling short of induction may be founded. Under this meaning the element of relation is not specially distinguished from others. "Analogical reasoning, in this second sense, may be reduced to the following formula: Two things resemble each other in one or more respects; a certain proposition is true of the one, therefore it is true of the other." If an invariable conjunction is made out between a property in the one case and a property in the other, the argument rises above analogy, and becomes an induction on a limited basis; but if no such conjunction has been made out, then the argument is one of analogy merely. According to the number of qualities in one body which agree with those in another, may it be reasoned with confidence that as the yet unexamined qualities of the two bodies will also be found to correspond. (Mill's Logic, pp. 98—107.) Metaphor and allegory address the imagination, whilst analogy appeals to the reason. The former are founded on similarity of appearances, of effects, or of incidental circumstances; the latter is built up on more essential resemblances, which afford a proper basis for reasoning.

II. Math.: Proportion; the similitude of ratios. (Euclid, Bk. V., Def. 8.)

III. Grammar: Conformity with the structure or the genius of a language.

IV. Biol.: The relation between parts which agree in function, as the wing of a bird and that of a butterfly, the tail of a whale and that of a fish. (Huxley's Classif. of Animals, 1869, Gloss.) Relations of analogy were made very prominent in the system of the now extinct Quinary School of zoologists. They are to be carefully distinguished from those of affinity. [AFFINITY.]

" . . . the analogy of the hawk to the shrike, or eagle to the lion."—Swainson: Classif. of Birds, I. 845.

"The analogy between the swan and the ostrich is one degree, that between the ostrich and the giraffe is another, while the analogy between the bee and the weaving birds (Piceonæ) is another."—Ibid.

†ăn-a-lýs-a-ble, a. [ANALYZABLE.]

†ăn-a-lýse, v.t. [ANALYZE.]

ăn-a-lýs-er, s. [ANALYZER.]

ăn-ăl-ýs-îs, s. [In Sw. analys; Dan. analysis; Ger. analyse (Logio), analysis (Math.); Fr. & Port. analyse; Sp. analisis; Ital. analist. From Gr. ἀναλύσις (analusis) = (1) a loosing, releasing; (2) a dissolving, the resolution of a whole into its parts, analysis opposed to genesis or synthesis; in Logic, the reduction of the imperfect figures into the perfect one; (3) the solution of a problem, &c.: ἀνάλω (analuō) = to unloose; ἀνά (ana) = backward, and λύνω (lyō) = to loose.]

A. Ordinary Language:

1. Gen.: The act of analysing; the state of being analysed; the result of such investigation. The separation of anything physical, mental, or a mere conception into its constituent elements. (A scientific word which

bêl, bôy; pôit, jôwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aş; expect, Xenophon, exist. ph = f. -tion, -sion, -cioun = shün; -tjon, -sion = zhün. -tions, -sious, -ciouns = shüs. -ble, -dle, &c. = bël, dël.

has partially established itself in ordinary speech.) [ANALYZE, s.]

"We cannot know any thing of nature, but by an analysis of its true initial causes; till we know the first springs of natural motions, we are still but ignorant."—*Stannite*.

Used specially—

(1.) In some of the senses given under B. (q. v.)

"... but the subsequent translation of the shock of the ætheral waves into consciousness eludes the analysis of science."—*Tyndall: Frag. of Science* (3rd ed.) VIII., p. 177.

(2.) A syllabus, conspectus, or exhibition of the heads of a discourse; a synopsis, a brief abstract of a subject to enable a reader more readily to comprehend it when it is treated at length. Thus Lindley, in his *Vegetable Kingdom*, presents a conspectus of the several orders of plants under the heading "Artificial Analysis of the Natural Orders."

B. Technically:

I. *Math.*: The term *analysis*, signifying an unclinging, as contradistinguished from *synthesis*—a putting together, was first employed by the old Greek geometers to characterize one of the two processes of investigation which they pursued. The *Analytical Method* of inquiry has been defined as the art or method of finding out the truth of a proposition by first supposing the thing done, and then reasoning back step by step till one arrives at some admitted truth. It is called also the *Method of Invention or Resolution*. Analysis in Mathematics may be exercised on finite or on infinite magnitudes or numbers. The analysis of finite quantities is the same as *Specious arithmetic or algebra*. That of infinites, called also the *new analysis*, is particularly used in fluxions or the differential calculus. But analysis could be employed also in geometry, though Euclid preferred to make his immortal work synthetic; it is therefore a departure from correct language to use the word analysis, as many on the Continent do, as the antithesis of geometry; it is opposed, as already mentioned, to synthesis, and to that alone.

"Calculations of this nature require a very high analysis for their successful performance, such as is far beyond the scope and ability of this work to attempt."—*Herschel: Astron.*, 5th ed. (1858), § 404.

II. *Chem.*: The examination of bodies with the view of ascertaining of what substances they are composed, and in what proportion these substances are contained in them. The former is called *qualitative* and the latter *quantitative* analysis.

"The following method may be adopted for this kind of quantitative analysis."—*Toad & Bowman: Physiol. Anat.*, vol. II., p. 308.

Chemical analysis is classified into *Blowpipe*, *Qualitative*, *Gravimetric*, and *Volumetric* analysis; and the *Proximate* and the *Ultimate* analysis of organic bodies.

1. *Blowpipe Analysis*: The substances examined by the blowpipe are (1) heated alone on charcoal; (2) heated on a platinum wire with borax (q. v.); (3) with microcosmic salt,  $\text{NaH}(\text{NH}_4)\text{PO}_4 + 4\text{H}_2\text{O}$ ; (4) with sodium carbonate; (5) on a piece of charcoal which has been moistened with a few drops of nitrate of cobalt; (6) fused with potassium nitrate. The reactions are given under the respective metals (q. v.). (Consult Plattner on the Blowpipe.)

2. *Qualitative Analysis* is employed to find out the composition and properties of any unknown substance, and to separate different substances from each other. It is performed in the following manner:—The substance is dissolved in distilled water; if not soluble in water, then in hydrochloric acid or in aqua regia; if insoluble in these, it is fused with sodium carbonate. The commoner bases and acids contained in the solution are tested for as follows:—

Add hydrochloric acid. A *white precipitate* is either  $\text{AgCl}$  (argentic chloride),  $\text{Hg}_2\text{Cl}_2$  (mercurous chloride), or  $\text{PbCl}_2$  (plumbic chloride).

Filter; pass  $\text{H}_2\text{S}$  (sulphuretted hydrogen gas) through the filtrate. A *black precipitate* is either  $\text{PbS}$  (plumbic sulphide),  $\text{CuS}$  (cupric sulphide),  $\text{HgS}$  (mercuric sulphide), or  $\text{Bi}_2\text{S}_3$  (sulphide of bismuth). A *yellow precipitate* is either  $\text{CdS}$  (cadmium sulphide),  $\text{As}_2\text{S}_3$  or  $\text{As}_2\text{S}_5$  (sulphides of arsenic), or  $\text{SnS}_2$  (stannic sulphide). A *brown precipitate* is  $\text{SnS}$  (stannous sulphide). An *orange precipitate* is  $\text{Sb}_2\text{S}_3$  (antimonic sulphide).

Filter; boil the filtrate to expel  $\text{H}_2\text{S}$ , add a few drops of nitric acid, and boil to oxidize the iron; then add chloride of ammonium and ammonia. A *red precipitate* is  $\text{Fe}_2\text{O}_3$  (ferric

oxide). A *bluish-green precipitate* is  $\text{Cr}_2\text{O}_3$  (chromic oxide). A *white precipitate* is  $\text{Al}_2\text{O}_3$  (aluminic oxide), or phosphates, borates, and oxalates.

Filter; to the filtrate add sulphide of ammonium. A *black precipitate* is either  $\text{CoS}$  (sulphide of cobalt), or  $\text{NiS}$  (sulphide of nickel). A *pink precipitate* turning brown is  $\text{MnS}$  (sulphide of manganese). A *white precipitate* is  $\text{ZnS}$  (sulphide of zinc).

Filter; to the filtrate add ammonium carbonate. A *white precipitate* is either  $\text{BaCO}_3$ ,  $\text{SrCO}_3$ , or  $\text{CaCO}_3$  (carbonates of barium, strontium, or calcium).

Filter; divide the filtrate into two parts. To one part add  $\text{Na}_2\text{H}_2\text{PO}_4$  (sodium phosphate). A *white precipitate* is  $\text{Mg}(\text{NH}_4)\text{PO}_4 + 6\text{H}_2\text{O}$ , indicating the presence of magnesium. The other part is evaporated to dryness, heated strongly to drive off the ammoniacal salts, and if there is a residue it is tested for potash and soda.

Ammoniacal salts are tested for in the original solution by adding caustic potash, which liberates ammonia,  $\text{NH}_3$ , which is recognised by its smell, and by its turning red litmus paper blue.

The sulphides of arsenic, antimony, and tin are soluble in sulphide of ammonium, and are re-precipitated by  $\text{HCl}$ .

The tests for the other rarer metals and acids, and the confirmatory tests for the above, are given under their respective names (q. v.).

Acids may be tested for as follows:—Carbonic, hydrosulphuric, hydrocyanic acids are liberated by stronger acids with effervescence. Carbonic, arsenous, arsenic, chromic, boracic, phosphoric, oxalic, hydrofluoric, and silicic acids give from a neutral solution a *white precipitate*, with  $\text{BaCl}_2$  (barium chloride), which dissolves in hydrochloric acid; but sulphuric acid gives a *white precipitate* insoluble in acids.

Tartaric and citric acids are recognised by the precipitate charring when heated, and emitting fumes of peculiar odour.

Chloride of calcium, with phosphoric and boracic acids, gives a *white precipitate*, which is soluble in acetic acid; also with oxalic and hydrofluoric acids, a *white precipitate*, insoluble in acetic acid.

Nitrate of silver ( $\text{AgNO}_3$ ) gives a *black precipitate* with hydrosulphuric acid, a *yellow precipitate* with arsenious, phosphoric, and silicic acid; a *red precipitate* with chromic and arsenic acid; and a *white precipitate* with boracic and oxalic acids. All these precipitates are soluble in nitric acid.

Nitrate of silver ( $\text{AgNO}_3$ ) gives a precipitate insoluble in nitric acid with hydrochloric, hydrocyanic, hydrobromic, and hydriodic acids.

Ferric chloride ( $\text{Fe}_2\text{Cl}_6$ ) gives a *red colour* with acetic acid and sulphocyanic acid; a *black precipitate* with gallic and tannic acids; a *blue precipitate* with ferrocyanides.

Nitric acid ( $\text{HNO}_3$ ) and chloric acid ( $\text{HClO}_3$ ) are not precipitated by any reagent. Their salts deflagrate on ignited charcoal.

For confirmatory tests for acids, see under their respective names. (See Fresenius', Galloy's, or Will's *Qualitative Analysis*.)

3. *Gravimetric Analysis*, or quantitative analysis by weight, is the method of separating out of a weighed quantity of a compound its constituents, either in a pure state or in the form of some new substance of known composition, and accurately weighing the products; from the results of these operations the percentage of the constituents contained in the substance can be determined. (For methods see Fresenius' *Quantitative Analysis*.)

4. *Volumetric Analysis*, or quantitative analysis by measure, determines the amount of the constituents contained in a given solution by—

(a) Neutralisation of a measured quantity of the liquid by a certain volume of a standard solution of acid or alkali.

(b) By the quantity of a standard solution of an oxidising or reducing agent required to oxidise or reduce a measured quantity of the liquid to be tested.

(c) By observing when no further precipitation takes place on adding the standard solution of the reagent to a known volume of the liquid to be tested. (See Sutton's *Volumetric Analysis* and Mohr's *Titrirmethode*.)

5. By *Proximate Analysis* we determine the amount of sugar, fat, resin, alkaloid, &c., contained in an organic compound, each of these

being removed and separated by different solvents, &c.

6. By *Ultimate Analysis* of an organic substance we determine the percentage of carbon, hydrogen, oxygen, nitrogen, sulphur, and phosphorus contained in it. Thus the amount of carbon and hydrogen is determined by burning a weighed quantity of the substance in a combustion tube along with oxide of copper; and collecting the water produced in a weighed U tube filled with chloride of calcium, and the carbonic acid gas in weighed bulbs filled with caustic potash. (See Fresenius' *Quantitative Logic*.)

III. *Other sciences, Logic, Metaphysics, Philology, &c.*: The separation of anything which becomes the object of scientific inquiry into its constituent elements; also the result thus obtained.

"Analysis consists in making experiments and observations, and in drawing general conclusions from them by induction, and admitting of no objections but such as are taken from experiments, or other certain truths."—*Nessey: Opticks*.

"By anatomico-physiological analysis we separate the solids and fluids of the body into their various kinds, and classify and arrange them according to their characters and properties."—*Toad & Bowman: Physiol. Anat.*, vol. I., introd., p. 84.

"By prismatic analysis Sir William Herschel separated the luminous from the non-luminous rays of the sun, and he also sought to render the obscure rays visible by concentration."—*Tyndall: Frag. of Science*, 3rd ed., VIII., p. 188.

"... it will be seen that synthesis, or putting together, is the keynote of the ancient languages, as analysis, or dissolving, is of the moderns."—*Beames: Cooper. Gram., Arsenic Lect., of Analysis*, vol. I., p. 113.

"... this first step in the analysis of the subject of belief."—*J. & Mill: Logic*, 2nd ed. (1848), p. 24.

ân-a-lÿst, a. [In Fr. *analytique*; Port. *analítico*.] One who analyses; one who practices or understands analysis.

"I beg leave to repeat and insist that I consider the geometrical analysis as a logical, i. e. so far forth as he reasons and argues."—*Berkeley: The Analyst*, § 20.

ân-a-lÿt-ic, ân-a-lÿt-ic-al, a. [In Fr. *analytique*; Sp. & Ital. *analítico*; Port. *analítico*. From Gr. ἀναλυτικός (*analytikos*)] Pertaining to analysis; resolving anything, of whatever character, into its constituent parts. (It is opposed to *synthetical*.) [ANALYTICS.]

"It, however, Logic be divided into the *Analytic* branch and the *Synthetic*, he [Bentham] has left behind him traces of his labours in both departments."—*Bowring: Bentham's Works*, vol. I., p. 81.

ân-a-lÿt-ic-al-ly, adv. [Eng. *analytical*; -ly.] In an analytical manner.

"If this were *analytically* and carefully done..."—*Boyle: Works*, vol. II., p. 188.

ân-a-lÿt-ics, \*ân-a-lÿt-ic-ly, s. [From Eng. *analytic* (q. v.). In Ger. *analytisch*; Fr. *analytique*.]

*Logic*: The department of logic which treats of analysis.

† The form *analytisch* is in *Glossogr. Nova*.

"Towards the composition and structure of which form it is incident to handle the parts thereof which are propositions, and the parts of propositions which are simple words, and this or that part of logic which is comprehended in the *analytica*."—*Euclid*.

ân-a-lÿz-a-ble, a. [Eng. *analyze*; -able.] Capable of being analyzed.

"... the mental processes into which they enter are more readily *analyzable*."—*Herbert Spencer: Psychol.*, 2nd ed., vol. II., p. 25, § 267.

ân-a-lÿz-a-ble-ness, s. [Eng. *analyze*; -able; -ness.] The state of being analyzable. (*Webster*.)

ân-a-lÿz-a-tion, s. [Eng. *analyze*; -ation.] The act of analyzing. (*Genl. Mag. Worcester*.)

ân-a-lÿze, ân-a-lÿse, v. t. [In Sw. *analysera*; Dan. *analysere*; Ger. *analysiren*; Fr. *analyser*; Port. *analisar*.] [ANALYSIS.] To resolve anything, of whatever character, into its constituent elements.

"... if we analyze language, that is to say, if we trace words back to their most primitive elements, we arrive not at letters, but at roots."—*Max Müller: Sch. of Lang.*, 6th ed., vol. II. (1871), p. 80.

"No one, I presume, can analyze the sensations of pleasure or pain."—*Darwin: Descent of Man*, vol. I., pt. I., ch. III.

ân-a-lÿze, s. [Gr. ἀνάλυσις (*analysis*)] Analysis. [ANALYSIS.]

"The analysis of it [a little tractate] may be spared, since it is in many hands."—*Hacket: Life of Archbishop Williams*, vol. II., p. 104. (*Trachet: On Some Def. in our Eng. Dict.*, p. 14.)

ân-a-lÿzed, ân-a-lÿsed, pa. par. [ANALYZE, ANALYSE, v.]

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, camel, hër, thère; pine, pît, sire, sir, marine; gô, pôt, or, wôre, wôlf, wôrk, whô, sôn; mûte, eûb, eûre, unite, eûr, râle, fûll; trÿ, Sÿrian. æ, œ = ê; ð = ô. qu = kw.

an-a-lyz-er, an-a-lyz-er, s. [Eng. analyzer or analyse; -er.]

1. Gen.: One who or that which analyses.

2. Optics: The name given to a crystal mirror or other instrument used to exhibit the fact of light having undergone polarisation.

"Every instrument for investigating the properties of polarised light consists essentially of two parts, one for polarising the light, the other for ascertaining the fact of light having undergone polarisation. The former part is called the polarizer, the latter the analyzer." - Atkinson: Cuvier's Physics, 3rd ed., p. 182.

"Our incipient blue cloud is a virtual Nicol's prism, and between it and the real prism we can produce all the effects obtainable between the polariser and analyzer of a polariscope." - Tyndall: Frag. of Science, 3rd ed., p. 214.

an-a-lyz-ing, an-a-lyz-ing, pr. par. [ANALYZE, ANALYSE, v.]

\*an-am-ayl, v.t. [ENAMEL]

an-a-mir't-a, s. [Etym. doubtful.]

Bot.: A genus of plants belonging to the order Menispermaceae, or Menispermata. The *A. ocellus* produces the seed called *Cocculus Indicus*, which is poisonous, but yields a fatty oil on being crushed.

an-am-ne'-sis, s. [Gr. ἀνάμνησις (anamnēsis) = recollection, from ἀναμνήσκω (anamnēskō) = to remind one of anything; ἀνά (ana) = again, and μνήσκω (mnēskō) = to remind.]

Rhet.: A figure calling to mind anything which has been forgotten. (Glossogr. Nova.)

an-am-nest'-io, a. & s. [Gr. ἀναμνηστικός (anamnēstikos) = able to recall to mind.]

1. As adj.: Pertaining to amnesia; acting as a remembrancer.

2. As substantive: A medicine believed to restore the memory. (Glossogr. Nova.)

an-am-ni'-a-ta, an-am-ni'-ō-ta, or less correctly an-am-ni'-ō-na-ta, s. pl. Vertebrates that have no amnion.

an-a-morph'-ism, s. Same as ANAMORPHOSIA.

an-a-morph'-ō-sis, an-a-morph'-ō-sis, s. [In Ger., Fr., & Port. anamorphose. From Gr. ἀναμόρφωσις (anamorphōsis) = a forming anew; ἀνά (ana) = again, and μόρφωσις (morphōsis) = (1) shaping, moulding; (2) from μορφή (morphē) = to give form to; μορφή (morphē) = form.]

Perspective: A projection of any object in such a way, that if looked at from one point of view it will appear deformed; whilst from another it is properly proportioned. Sometimes the object is so projected that to the naked eye it appears deformed, whilst a mirror of a particular shape will at once present it in its proper aspect.

an-amp'-sis, s. [Altered from Gr. ἀνακαμπής (anakampēs) = a turning round or back; return.] A genus of fishes of the family Labridae (Wrasses). They are from the Indian Ocean. [Cuvier, &c., spell this word anampes.]

an-ā'-na, an-ā'-nas, an-ā'-nās'-sa, s. [In Dan., Ger., Fr., Sp., & Ital. ananas; Port. ananas or ananas. From *nanas*, the Guiana name.]

1. Ord. Lang. (Of the forms *anana*, *ananas*, and *anansassa*.) The pine-apple.

"Witness, thou best *anāna*, thou, the pride Of vegetable life, beyond what'er The poets imag'd in the golden age." - Thomson: Seasons; Summer.

2. A fruit of the same family—the *Bromelia Pinguin*, called in the West India *Penquin*; but, of course, not to be confounded with the well-known bird of the same name.

II. Technically. (Of the form *anansassa* only.)

Botany: A genus of Bromeliaceae (Bromelworts), to which the pine-apple, *A. sativa*, belongs. [PINE-APPLE.]

an-an-chy'-tēs, s. [From Gr. ἀ, priv.; ἄγχω (angchō) = to press tight, to strangle. "Not pressed." (Owen.)] A genus of Echinoderms occurring in Cretaceous strata.

an-an-dri'-a, s. [See ANANDROUS.] A genus of plants belonging to the order Asteraceae (Compositae). The *A. discoides* has medicinal, and other leaves. (Lindley: Veget. Kingd., p. 708.)

an-an-drou's, a. [Gr. ἀνάνδρος (anandros) = without a husband; ἀνήρ (anēr), genit. ἀνδρός (andros) = a man, . . . s husband.]

Bot.: Pertaining to a flower which is destitute of stamens; as are the females of all

ANANDROUC FLOWERS. 1. Mulberry. 2. Common Birch. 3. Barush. 4. Hop. 5. Bottle Sedge.

monocious and dioecious plants; for example, the willows.

\*an-ang'-er, v.t. [ANGER.] To anger, to incense.

" . . . and when the emperour herde this, he was greatly annoyed and sore angered." - Virgilius (ed. Thom.)

an-ang'-u-lar, a. [Gr. ἄν (an), priv., and Eng. angular (q.v.).] Not angular.

\*an-an'-tres, conj. [ENAUINTER.]

an-a-pēst, an-a-pēst, s. [In Ger. anapest; Fr. anapeste; Sp. & Port. anapesto; Lat. anapestus. From Gr. ἀναπαιστος (anapaisstos), as substantive = anapest; as adj. = struck back; ἀναπαίω (anapaiō) = to strike again or back; ἀνά (ana) = again; παίω (paiō) = to strike.]

Prosody: A foot consisting of three syllables: the first two short, and the third long. It may, from one point of view, be considered the reverse of a dactyl, which has the first syllable long, and the second and third short. To Latin, *Hellenē* is an anapest. In English it is difficult to find single words, each constituting an anapest; the tendency in our language being to pronounce trisyllables as dactyls. Overflow and various other words beginning with *over* may be made anapests; thus, *ō vēr | fōw, ō | vēr | rēach*, though they might also be made amphimacers, *ō | vēr | fōw, ō | vēr | rēach*. The following is an anapestic line:—

To your homes | cried the lēa | dēr ōf Is | rā - ē's hōst.

"An anapest is all their music's song, Whose first two feet are short, and third is long." - Sir J. Davies: Orchestra, st. 70.

an-a-pēs'-tio, † an-a-pēs'-tio, \* an-a-pēs'-tick, a. & s. [In Fr. anapestique; Lat. anapesticus; Gr. ἀναπαιστικός (anapaisitikos).]

1. As adjective: Pertaining to an anapest.

Anapestic Verse: A verse consisting mainly of anapests. [ANAPÆST.]

" . . . our common burlesque Alexandrine or anapestic verse." - Percy on the Met. of P. Plowman's Visions.

2. As substantive: An anapestic line or verse.

" . . . several seeming examples, where an anapestic is terminated with a trochee, or a tribrachy, or a cretick." - Bentley: Phal. III.

an-a-pēst'-i-cal, † an-a-pēs'-tic-al, a. [Eng. anapestic, anapestic; -al.] The same as ANAPÆSTIC, adj. ( Worcester.)

an-a-pēst'-i-cal-ly, † an-a-pēs'-tic-ly, adv. [Eng. anapestical, anapestical; -ly.] After the manner of an anapest, or an anapestic verse. (Christian Observer. Worcester.)

\*a-nā'pes, s. [See def.] A corruption of "of Naples," used to describe a kind of fustian formerly made to that city. (N. E. D.) "A waist toward the band of fustian anapes." - Laneham: Letter 38.

an-aph'-ōr-a, s. [In Ger. anapher; Fr. anaphore; Port. & Lat. anaphora. From Gr. ἀναφορά (anaphora) = a bringing up, a raising; ἀναφέρω (anapherō) = to bring or carry up; ἀνά (ana) = up, and φέρω (pherō) = to carry.]

Rhetoric: The commencement of successive sentences or of successive verses with the same word or words, as—

Where is the wise? Where is the scribe? Where is the disputer of this world?

an-aph-rōd'-is'-i-a, s. [Gr. ἀναφροδισία (anaphrodisia); ἀν (an), priv., & ἀφροδισία (aphrodisia), neut. pl. of ἀφροδιστός (aphroditos) = belonging to venery; Ἀφροδίτη (Aphroditē) = Venus.] Sexual impotence.

an-aph-rō-dis'-y-ac, s. [Eng. anaphrodisia(a); -ac.]

Pharm.: A medicine intended to diminish sexual feeling. Garrod divides remedies of this kind into direct and indirect; the former acting as sedatives on the spinal cord; the latter lowering the tone of the general system.

an-a-plēr-ōt'-ic, \* an-a-plēr-ōt'-ick, a. & s. [Lat. anapleroticus; Gr. ἀναπληρωσις (anaplerōsis); ἀν (an), priv., & ἀπλήρωσις (aplerōsis) = to fill up; ἀνά (ana) = up, and πλήρωσις (plērōsis) = to fill; πλήρης (plērēs) = full.]

1. As adjective: Which fills up; especially used of "filling up" flesh in an emaciated body.

"Anaplerotic medicines are such as fill up ulcers with flesh." - Glossographia Nova.

2. As substantive: A medicine fitted to "fill up" flesh in an emaciated body.

an-a-pōph'-y-sis, s. [Gr. ἀν (an), priv. = not, and ἀπόφυσις (apophusis) = (1) an offshoot; (2) Anat., the process of a bone; the prominence to which a tendon is attached.]

Anat.: A process connected with the neural arch, which projects more or less backwards, and is generally rather slender or styliiform. (See Flower's Osteology of the Mammalia, 1870, pp. 15, 16.)

an'-arch, s. [Gr. ἀναρχος (anarchos), adj. = without head or chief.] One who is the author of anarchy; one who plots or effects the overthrow of legitimate government.

"Thus Satan: and him thus the Anarch old, With faltering speech and visage uncomposed, Answered." - Milton: P. L., ll. 988.

an-arch'-ic, \* an-arch'-ick, an-arch'-i-cal, a. [Eng. anarch; -ic; -ical.] Pertaining to anarchy, tending to subvert legitimate government.

"Which they regarded as anarchic and revolutionary." - Froese: Hist. Eng., pt. I., vol. ii., p. 401.

an-arch'-i-cal-ly, adv. [Eng. anarchical; -ly.] In an anarchical manner; in opposition to established authority; lawlessly.

an-arch'-ism, s. [Eng. anarch; -ism.] Anarchy; the principles or practices of anarchists. "It will prove the mother of absolute anarchism." - Mr. E. Dering: Speeches, p. 153.

an'-arch-ist, s. [As if from Gr. ἀναρχιστής (anarchistēs).] One who aims at or succeeds in producing anarchy; one who opposes.

"There is no pretence at all to suspect that the Egyptians were universally atheists and anarchists." - Cairns: Intellectual System, bk. i., c. 4.

an'-arch-ly, s. [Fr. anarchie; from Gr. ἀναρχία (anarchia), ἀναρχος (anarchos) = without a head or chief; ἀν (an), priv., and ἀρχός (archos) = leader.]

1. Absence or insufficiency of government; social and political confusion owing to the want of strong controlling power.

"That a community should be hurried into errors alternately by fear of tyranny and by fear of anarchy is doubtless a great evil." - Macaulay: Hist. Eng., ch. xv.

2. A social theory which would do away with all authority except that sanctioned by conviction, and which is intended to secure individual liberty against the encroachments of the state. [SOCIALISM.]

3. Disorder, confusion. "Where oftest Night And Chaos, ancestors of Nature, bold Eternal anarchy." - Milton: P. L., ll. 888.

bol, boy, pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; ain, ay; expect, Xenophon, exist. -ing -tion, -sion, -tioun, -cioun = shun; -tion, -sion = zhun. -tions, -sions, -ciouns = shūs. -ble, &c. = bel. -tre = tēr.

**an-ar'-rich-as**, s. [Gr. ἀναρρίχασμαι (anarrichasmai) = to scramble up.] A genus of fishes of the order Acanthopterygii, and family Gobiidae. It contains the Wolf-fish; in Scotland, the Sea-wolf or Sea-cat; and in the Orkneys, the Swine-fish. It is more common in the north than in the south of Britain. In our latitudes it attains the length of six or seven feet. It has a cat-like head, wolf-like voracity, and a by no means prepossessing appearance.

**an-arth'-rouis**, s. [Gr. ἀναρθρος (anarthros) = without joints; ἀν (an), priv., ἄρθρον (arthron) = a joint, . . . the article; ἀραρίσκω (arariskō) = to join.] It is the reduplicated form of ἄρως (arōs), which occurs only as a root.  
 1. Entom. : Without joints.  
 2. Grammar : Without the article.

**ā-nās**, s. [Lat. *anas*, genit. *anātis* = a duck.] The typical genus of the Anatidae, a family of wading birds, and of the Anatinae, one of its sub-familiae. It contains the most characteristic of the ducks. The wild duck is the *Anas boschas* of naturalists. (*Boschas* is the Greek βοσκός (*boskos*) = a kind of duck.) [WILD DUCK.] Most, if not all, the species of the genus breed in the cold regions, and migrate to our own or similar temperate countries at the approach of winter.

**ān-a-sar'-ca**, s. [In Fr. *anasarque*; Port. *anasarca*; Gr. ἀνά (ana) = up, and σάρξ (sarx), genit. σαρκόσ (sarkōs) = flesh.]  
 Med. : A disease characterised by a dropsical effusion of serum into the cellular tissue. It may be acute or chronic, local or general. The dropsical effusion which often appears in children after acariatina, and that which after heart disease in old age creeps up from the lower limbs till it terminates life, with other dropsical effusions, are all ranked under *anasarca*. *Anasarca* may either generally or locally attend upon organic disease of any part of the body.  
 " . . . the dropsical effusion which is commonly called *Anasarca*."—Todd & Bowman : *Phys. Anat.*, i. 33.

**ān-a-sar'-couis**, a. [Eng. *anasarca*; -ous.] Pertaining to *anasarca*.  
 "This *anasarcous* swelling is commonly observed first in the face."—Dr. J. Darwelle : *Cyclo. Pract. Med.*, vol. i., p. 73.

**ān-a-stāl'-tic**, a. [Gr. ἀνασταλτικός (*anastaltikos*) = fitted for checking; ἀναστέλλω (*anastellō*) = (1) to send or raise up; (2) to draw back, to restrain; ἀνά (*ana*) = again, and στέλλω (*stellō*) = to set in order, to send.]  
 Old Med. : Astringent.

**ān-ās'-ta-tis**, s. [Gr. ἀνάστασις (*anastasis*) = (1) a making to stand up, (2) a renewal, (3) a or the resurrection; ἀνίστημι (*anistēmi*) = to make to stand up, to raise from sleep or from death; ἀνά (*ana*) = up or again; and ἵστημι (*histēmi*) = to cause to stand, to raise.]  
 \* 1. Old Med. : Hippocrates used the word in various senses, as for (a) a migration of humours, and (b) a rising up or recovery from sickness.  
 2. Theol. : The resurrection. In the Greek of Matt. xxii. 28 and many other parts of the New Testament. (Sometimes a work on the resurrection is called *Anastasia*.)

**ān-a-stāt'-ic**, a. [Gr. ἀνάστατος (*anastatos*)] Pertaining to the raising up of any person or thing.  
**anastatic printing**, s. A method of zincography invented by Wood in 1841, designed to reproduce drawings, engravings, printed matter, &c., whether recent or old. If, for instance, it be sought to obtain the *fac-simile* of an old newspaper, the paper is first wetted with dilute phosphoric acid, and then placed between sheets of blotting paper to remove the superfluous moisture. It is then found that the acid has corroded the blanks, but has not affected the printed letters. The sheet is next placed in contact with a plate, and pressure applied, which makes a *fac-simile* of the letters in reverse order on the plate. Gum is next applied, and more ink, then a little acid, and finally agate ink, when the printing stands out as clear and distinct as in the original.

**ān-a-stāt'-y-ca**, s. [Gr. ἀνάστατος (*anastatos*) = made to stand up; from ἀνάστασις (*anastasis*) (q.v.)] A genus of plants belonging

to the order Brassicaceae, or Crucifers. The *A. hircocientina* is the celebrated "Rose of Jericho." It is an annual, inhabiting the Egyptian desert. It is so highly hygrometric that when fully developed it contracts its rigid branches, so as to constitute a ball. Exposed then to the action of the wind, it is driven hither and thither. If, however, it be brought in contact with water, the ball-form vanishes, and the branches again acquire their natural expansion. Superstitious tales about this so-called rose are afloat in the East. It is said to have first bloomed on Christmas Eve, and continued in flower till Easter; at its birth heralding the advent of the Redeemer, and immediately before its departure honouring his resurrection. It is almost unnecessary to add, that for these fancies there is no foundation whatever in fact. (*Gardener's Chronicle*, 1842, p. 363. *Lindley : Veg. Kingd.*, 1847, p. 354.)

**ān-a-stōm-ōt'-ic**, a. & s. [Gr. ἀνά (*ana*) = through, and στόμα (*stoma*) = the mouth.]  
 1. As adjective : Having the quality of opening vessels, or of removing obstructions.  
 2. As substantive : A medicine having the quality of opening the mouths of the vessels of the body and removing obstructions. Examples : doobstruents, cathartics, and sudorifics. (*Glossogr. Nova*.)

**a-nās'-tō-mōse**, a **a-nās'-tō-mize**, v. t. [In French *anastomoser*; Port. *anastomosarse*. From Gr. ἀναστόμω (*anastomōō*) = to furnish with a mouth; ἀνά (*ana*) = throughout, and στόμω (*stomōō*) = to stop the mouth of; στόμα (*stoma*) = mouth.]  
 Nat. Science : To blend together mouth to mouth. (Used of vessels or cells which, retaining their distinction throughout a great part of their extent, still either really or apparently blend together at their mouths; to inosculate.)

"Anastomosing (*anastomosans*): the ramifications of anything which are united at the points where they come in contact are said to *anastomose*. The term is confined to veins."—*Lindley : Introd. to Bot.*, p. 466.  
 "The capillaries are very fine, their meshes large, and they *anastomose* throughout."—Todd & Bowman : *Physiol. Anat.*, vol. ii. (1856), p. 274.

**a-nās'-tō-mōs-īng**, pr. par. & a. [ANASTOMOSE.]  
 " . . . the branching or *anastomosing* character of its fibrilla."—Todd & Bowman : *Physiol. Anat.*, i. 74.  
 " . . . the length of the transverse *anastomosing* capillaries."—*Ibid.*, vol. i., p. 166.

**a-nās'-tō-mō'-sis**, s. [In Fr. & Port. *anastomose*; Gr. ἀναστόμωσις (*anastomōsis*) = an opening, an outlet, a discharge.] [ANASTOMOSE.]

1. A uniting by the mouths of vessels distinct during the greater part of their course. (Used especially of the veins and arteries in the human or animal body, and of the veins in plants.)  
 "One of the most simple of these *anastomoses* is found in the union of two arteries, originating from different trunks, to form one."—Todd & Bowman : *Physiol. Anat.*, vol. ii., p. 223.

2. An interlacing, as of any branched system; a network.  
 "The *anastomosis* of nerves thus formed differs from the more correctly named *anastomosis* of blood-vessels; for in the latter case the canals of the *anastomosing* vessels communicate, and their contents are mingled; but in the former the nerve-tubes simply lie in juxtaposition, without any coalescence of their walls, or any admixture of the material contained within them."—Todd & Bowman : *Physiol. Anat.*, vol. ii., p. 218.

**ān-a-stōm-ōt'-ic**, a. & s. [Gr. ἀναστομωτικός (*anastomōtikos*) = fit for opening.]  
 1. As adjective : Pertaining to *anastomosis*.  
 "An *anastomotic* branch."—Todd & Bowman : *Physiol. Anat.*, vol. ii., p. 118.  
 2. As substantive. Old Med. : A medicine designed to open the mouths of the extreme blood-vessels. (See Parr's *London Med. Dict.*, 1809, vol. i., p. 107.)

**an-ās-trōph-ē**, **an-ās-trōph-ē**, s. [In Ger., Fr., & Sp. *anastrophe*. From Gr. ἀναστροφή (*anastrophē*) = a turning back or wheeling round; ἀναστρέφω (*anastrophōō*) = to turn upside down, to turn back; ἀνά (*ana*) = back, and στρέφω (*strophōō*) = to twist, to turn.]  
 Rhet. & Gram. : A figure by which the natural order of the words in a sentence or in a clause is reversed. (*Glossogr. Nov.*)

**ān-a-tāse**, s. [Gr. ἀνάτασις (*anatalisis*) = extension; ἀνατείνω (*anateinōō*) = to stretch up; ἀνά (*ana*) = up, and τείνω (*teinōō*) = to stretch.]

Named *anatalisis* = extension, from the length of its crystals as compared with their breadth, they are, however, minute in size.] A mineral, called also Octahedrite (q.v.).

**an-āth-ēm-a**, † **ān-a-thēme**, \* **ān-āth-ēm**, s. [In Ger. *anathem*; Sp. & Ital. *anatema*; Port. & Lat. *anathema*. In Greek there were two similar words, one ἀνάθημα (*anathēma*), and the other ἀνάθεμα (*anathēma*). Both in Latin became *anathēma*. In Greek the first signified a votive offering set up in a temple to be preserved; the second, ultimately at least, a similar offering devoted to destruction. It is from the latter that the English word *anathema* comes. Both are from ἀνατίθημι (*anatihēmi*) = to lay upon, to set up as a votive gift; ἀνά (*ana*) = up, and τίθημι (*tithēmi*) = to put, to place.]  
 I. In the New Testament :  
 1. The act of pronouncing "accursed," the solemn giving over of a person to God for utter destruction, corresponding to what is called in Hebrew עֲרִירָה (*chhērem*), or עֲרִירָה (*chhērem*), 1 Kings xx. 42. (See Trench's *Synonyms of the New Testament*, pp. 17—22.)  
 2. The object of such a curse.  
 "If any man love not the Lord Jesus Christ, let him be *anathema*."—1 Cor. xvi. 22.

II. Church History :  
 1. Excommunication and denunciation by a pope, a council, or a bishop, of a real or reputed offender. This was called the *judiciary anathema*. Scott thus describes it :—  
 "At length, resolved in tone and brow,  
 Sternly he question'd him—'And thou,  
 Unhappy! what hast thou to plead,  
 Why I denounce thee not on thy deed?  
 That awful doom which canons tell  
 Shuts paradise and opens hell;  
 Anathema of power so dread,  
 It blends the living with the dead,  
 Bids each good angel soar away,  
 And every ill one claim his prey;  
 Expels thee from the church's care,  
 And defies Heaven against thy prayer;  
 Arms every hand against thy life,  
 Bans all who aid thee in the strife—  
 Nay, each whose succour, cold and scant,  
 With meanness aims to reach thy want;  
 Haunts thee while living—and, when dead,  
 Dwells on thy yet devoted head,  
 Rend's Honour's scutcheon from thy hearse,  
 Stills or thy liver the holy verse,  
 And spurns thy corpse from hallow'd ground.  
 Flung like vile carrion to the hound;  
 Such is the dire and desperate doom  
 For sacrilege, decreed by Rome."  
 Scott : *Lord of the Isles*, ll. 28.

"Her bare *anathemas* tall but like so many brutus fulminea upon the schismatical."—South. *Sermons*.  
 " . . . the Apostle, who hath denounced an *anathema* . . . him."—Sheldon : *Miracles of Antichrist* (1616), p. 8.  
 "Your holy father of Rome hath smitten with his thunderbolt of excommunications and *anathemas*, at one time or other, most of the orthodox churches of the world."—*Ibid.*, p. 129.

2. The *abjuration* anathema pronounced by a convert in renouncing his "errors" or "heresies."

**an-āth-ēm-āt'-i-cal**, a. [Gr. ἀναθεματικός (*anathematikos*)] Relating to an *anathema*; containing an *anathema*. (*Johnson*.)

**an-āth-ēm-āt'-i-cal-ly**, adv. [Eng. *anathematical*; -ly.] In an *anathematical* manner. (*Johnson*.)

**an-āth-ēm-at-izm**, s. [In Port. *anathematismo*; Gr. ἀναθεματισμός (*anathematismos*)] An excommunication, a cursing.  
 "sundry civil effects—excommunication and *anathematism* by law do work."—Dr. Tooker : *Of the Fabrique of the Church* (1604).

**an-āth-ēm-at-i-zā-tion**, s. [In Fr. *anathematization*; Port. *anathematização*.] The act of *anathematizing*, an excommunication, an accursing.  
 "Anathematization, excommunication, and accursing are synonymous."—*Compend of the Laws of the Church of Scotland* (1830), 222v.

**an-āth-ēm-at-ize**, v. t. [In Fr. *anathematizer*; Sp. *anatematizar*; Port. *anathematizar*; Ital. *anatemizzatore*; Lat. *anathematizo*; Gr. ἀναθεματίζω (*anathematizō*)]  
 1. Lit. : To excommunicate, to accurse, to put under a ban.  
 "The pope once every year (on Maunday Thursday) excommunicates and *anathematizes* all heretics."—*Sp. Barlow : Remains*, p. 220.

2. Fig. : Publicly to denounce.  
 "That venality was denounced on the hustings, *anathematized* from the pulpit, and burlesqued on the stage."—Macaulay : *Hist. Eng.*, ch. xv.

**an-āth-ēm-at-ized**, pa. par. & a. [ANATHEMATIZE.]

an-ath-em-at-i-z-er, s. [Eng. anathematize; -er.] One who excommunicates, curses, or denounces.

an-a-tom-y-cal-ly, adv. [Eng. anatomical; -ly.] In an anatomical manner; on the recognised principles of anatomy; in the way required by anatomy; by anatomical research.

"How many famous churches have been most unjustly thunderstruck with direful censures of excommunications, upon pretence of this crime, which have been less guilty than their anathematizers!"—Ep. Hall: Cases of Conscience.

"The presence of nerves, and their mode of subdivision, have not as yet been satisfactorily demonstrated anatomically."—Todd & Bowman: Physiol. Anat., vol. i., p. 70.

an-ath-em-at-i-z-ing, pr. par. [ANATHEMATIZE.]

"... it ceases to be anatomically recognisable."—Ibid., vol. i., p. 168.

† an-'a-thème, s. [ANATHEMA.]

an-ät-öm-ist, s. [In Sw. anatomist; Fr. anatomiste; Sp., Port., & Ital. anatomista.]

an-ath-er-um, s. [Gr. άν (an) = without, and άθηρ (athēr) = the beard or spike of an ear of corn; awn. Awnless.] A genus of plants belonging to the order Gramineae, or Grasses.

1. Lit.: One who dissects the bodies of men or animals to ascertain their internal organization. One who dissects plants with a similar object in view is never simply called an anatomist; he is denominated a vegetable anatomist. Adjectives are prefixed to the noun to indicate the departments of animal anatomy which a cultivator of the science specially studies; as—

Comparative anatomist: One versed in comparative anatomy.

"Pursuing the comparison through the complexities of the bony framework, the comparative anatomist would first glance at the more obvious characters."—Owen: Classification of the Mammalia, pp. 77, 78.

Morbid anatomist: One whose special department of the science is morbid anatomy. [ANATOMY.]

"... the researches of the morbid anatomist."—Todd & Bowman: Physiol. Anat., 1. 316.

¶ The chief names in antiquity which have come down to our time as anatomists are those of the second Hippocrates, who was born B.C. 460, and died about 377; Ariatolis, who made his chief anatomical investigations between B.C. 334 and 327; Herophilus and Erasistratus of Alexandria, in the third century B.C. (?); Celsus, A.D. 3 to 5 (?); and the most illustrious, in this respect, of all, Galen of Pergamus, who was born in A.D. 131, and died about the beginning of the third century. In modern times the revival of anatomical study began in Italy, and quite a crowd of illustrious inquirers flourished in that country before much was done in this department of science in the other parts of Europe. The first was Mondini of Bologna, who flourished about A.D. 1315. Of the rest may be mentioned Eustachius, about 1495 or 1500, after whom a tube in the ear is called, and a valvular membrane in the heart [EUSTACHIAN]; Fallopio, or Fallopius, who was born about 1523, and died in 1562, and who gave a name to the Fallopiian tubes of the uterus; Cæsalpini, after whom the Cæsalpina genus of plants is called; and finally, Malpighi, born in 1628, and died 1694, after whom the Malpighia genus of plants and a gland are named. Of the early English anatomists, the most illustrious was Harvey, who was born in 1578, published his immortal work, in which the circulation of the blood is intimated, in 1628, and died in 1657. The later anatomists who have rendered good service to the science are too numerous to be mentioned here.

2. Fig.: One who examines the internal structure of anything; one who keenly dissects anything submitted to his scrutiny.

ANATHERUM NARDUS: ROOT, STEM, AND FLOWER. (One-sixth natural size.)

The A. muricatum is said to be acrid, aromatic, stimulating, and diaphoretic; while the A. nardus possesses similar qualities to such an extent, that it is called the Ginger-grass. (Lindley: Veg. Kingd., p. 113.)

an-ät-'i-dæ, s. [From Lat. anas = the Duck genus.] A family of birds, the last of the Natatorial, or Swimming order. They have a flattened bill covered with a soft skin, and furnished at the edges with a series of lamellæ, with which they sift the mud in which they seek their food. The family contains geese and swans as well as ducks, and has been divided into the following sub-families: Anatinae (True ducks); Fuligulinae (Pochards); Mergulinae (Mergansers); Cynaginae (Swans); Anserinae (Geese); and Phœnicopteriae (Flamingoes), the last-named sub-family connecting the family Anatidae and the order Natatores, or Swimming, with the Grallatores, or Wading Birds.

\* an-at-if-'er-ous, a. [Mod. Lat. anas, and fero = to bear.] Producing ducks or geese, &c., barnacles. [BARNACLE, 2.]

"If there be anathiferous trees whose corruption breaks forth into barnacles, yet if they corrupt they degenerate into maggots, which produce not them again."—Browne: Vulgar Errors, bk. iii., ch. xii.

an-a-ti-næ, s. [Lat. anatinus = pertaining to a duck.] The typical sub-family of the Anatidae. [ANAS, ANATIDÆ.]

† an-ät-ö-pism, s. [In Fr. anatocisme; Sp. anatocismo; Lat. anatocismus; Gr. ανατοκισμός (anatokismos) = compound interest: άνά (ana) = again, and τόκος (tokos) = (1) a bringing forth, (2) offspring, (3) interest of money; rixus (tikti) = to bring forth.] Compound interest. (Glossogr. Nov.)

† an-a-töm-ic, an-a-töm-i-cal, a. [Fr. anatomique; Sp., Port., & Ital. anatomico = anatomical; Lat. anatomicos = an anatomist; Gr. ανατομικός (anatomikos) = skilled in anatomy.] Relating or pertaining to anatomy. [ANATOMY.]

1. Spec.: Used for the purpose of anatomy. "An anatomical knife."—Watts: Logic.

2. Proceeding on the principles of anatomy; as exhibited by anatomy.

"... the various tissues, the anatomical character of which will be discussed in subsequent pages."—Todd & Bowman: Physiol. Anat., vol. i., p. 46.

"... the anatomical evidence by which they may be supported."—Ibid., vol. ii., p. 47.

3. Separated into minute portions, as if by the knife of an anatomist.

"The continuation of solidity is apt to be confounded with, and, if we look into the minute anatomical parts of matter, is little different from, hardness."—Locke.

an-ä-töm-i-zä-tion, s. [Eng. anatomize; -ation.] The act or process of anatomizing. (Webster.)

an-ät-öm-ize, v.t. [In Sw. anatomisera; Fr. anatomiser; Sp. & Port. anatomisar; Ital. anatomizzare.]

1. Lit.: To dissect an animal with the view of ascertaining its internal structure. Similarly, to dissect a plant.

"Our industry must even anatomize every particle of that body which we are to uphold."—Hooker.

2. Mentally to dissect or separate into minute portions, with the view of thoroughly understanding it, any object presented to the senses, or any idea suggested to the mind.

"... his psychological dissection went no farther than the extremities of the subject he had laid out for anatomizing."—Bovering: Bentham's Works (1848), vol. i., p. 11.

"I think it will be most useful to begin, as it were, by dissecting the dead body of language, by anatomizing its phonetic structure."—Max Müller: Science of Lang. (6th ed.), vol. ii. (1877), p. 80.

an-ät-öm-ized, pa. par. [ANATOMIZE.]

an-ät-öm-iz-ing, pr. par. [ANATOMIZE.]

an-ät-öm-y, \* an-ät-öm-ie, s. [In Sw. & Dsn. anatomi; Ger. & Fr. anatomie; Sp. & Ital. anatomia; Latin anatomia, anatomica, anatomice. From Gr. ανατομή (anatomē) = a

cutting up, a dissection; ανατομή (anatomē) = to cut up; άνά (ana) = up, and τέμνω (temnō) = to cut.]

A. Ordinary Language:

1. Literally: 1. The act or process of dissecting the body of a man or an animal, with the view of ascertaining its internal organization, its development, and the changes which its structures undergo in disease. The act or process of similarly treating a plant. (In this first sense anatomy is an art.)

2. The knowledge of the internal structure of human or animal bodies, or of plants, acquired by such dissections. (In this second sense anatomy is a science.)

II. Figuratively:

1. A skeleton.

"Oh that my tongue were in the thunder's mouth, Then with a passion I would shake the world, And rouse from sleep the fell anatomy Which cannot hear a feeble lady's voice."—Shakesp.: A. John, iii. 1.

2. The body.

"... Oh, tell me, friar, tell me, In what vile part of this anatomy Doth my name lodge? tell me, that I may sack The hateful mansion."—Shakesp.: Romeo and Juliet, iii. 5.

3. In ridicule: A thin, meagre-looking person. "They brought one Finch, a hungry lean-faced villain, A mere anatomy, a mountebank, A threepenny juggler, and a fortune-teller, A needy, hollow-eyed sharp-looking wretch, A living dead man."—Shakesp.: Com. of Errors, v. 1.

4. Such elaborate division and subdivision of anything as remind one of dissections by an anatomist.

"It is therefore in the anatomy of the mind as in that of the body; more good will accrue to mankind by attending to the large, open, and perceptible parts, than by studying too much such finer nerves and vessels as will for ever escape our observation."—Pope.

B. Technically:

1. Science: The knowledge of the structure of organised bodies obtained by their dissection. (See A., I. 1, 2.) It is naturally divided into (1) Animal Anatomy, generally called by way of eminence simply Anatomy, and (2) Vegetable Anatomy.

1. Animal Anatomy. To this the name of Zootomy is sometimes applied. It is naturally subdivided into (a) Human and (b) Comparative Anatomy.

(a) Human Anatomy, or the anatomy of the human subject. It is sometimes called Anthropotomy (q.v.). The prejudice against allowing the body of a relative, or even a corpse of any kind, to be dissected, long retarded the progress of this highly important and useful department of human knowledge, the ancients, and many moderns too, being obliged to limit their dissections to the dead bodies of the lower animals, drawing analogies thence to the human frame instead of directly studying the corpses of mankind. Happily this difficulty has now been in large measure overcome in all civilised countries. Human anatomy is generally divided into three subdivisions, Descriptive, General, and Pathological or Morbid Anatomy. The first investigates the various organs of the human body as they are in health, and the third as they are in disease; whilst the second inquires into the tissues, structures, or characteristics which are common to several organs. Sometimes Descriptive Anatomy, as distinguished from that which is General, is called Particular or Special. Sometimes, again, a new category is added, Surgical Anatomy, which treats of the position of the several organs with the view to possible surgical operations.

(b) Comparative Anatomy: The science which compares the structure of man with that of the inferior animals, and also that of the several classes, orders, &c., of the animal kingdom among each other, to ascertain the resemblances and dissimilarities in their analogous structures and organs. The knowledge thus acquired is then used for purposes of classification and for the study of development. This is the science of Cuvier, Owen, and Huxley.

"There is no just ground to fear that the time required to gain the requisite elementary knowledge of Comparative Anatomy will detract from the time which ought to have been exclusively occupied in the study of human anatomy and surgery."—Owen: Lectures on the Comparative Anatomy and Physiology of the Invertebrate Animals (1843), p. 5.

¶ Akin to Comparative Anatomy are Physiological Anatomy, defined by Todd and Bowman (Anat., vol. i., p. 28) as "that kind of anatomy which investigates structure, with a special view to function," &c.; Transcendental

Anatomy, which inquires into the plan or model on which the animal structure and its several parts have been framed.

2. Vegetable Anatomy: The similar dissection of a plant, or any part of it, to ascertain its structure. It is sometimes called also Phytotomy (q.v.).

"... little was known of vegetable physiology, nothing of vegetable anatomy."—Lindley: Introd. to Bot. (3rd ed., 1859), Pref.

II. Art:

1. The art described under A., I. 1 (q.v.).

2. Artificial anatomy: The art of making models in wax, or some similar material, of the several parts of the frame in health and disease.

án-a-trép-tíc, a. [Gr. ἀνατρεπτικός (anatreptikos) = turning over, overthrowing; ἀνατρέπω (anatrepō) = to turn up or over, to overthrow; ἀνά (ana) = up, and τρέπω (trépō) = to turn.] Overturning, overthrowing. (Briffeld.)

\* a-ná-trón, \* a-ná-trám, s. [Gr. νίτρον (nitron) = natron, not saltpetre, but potassa, soda, or both. Lat. nitrum; Ital. natrum.] Old names for NATRON (q.v.).

án-át-róp-oús, a. [Gr. ἀνατρέπων (anatrepōn) = to turn up or over.]

Bot.: The term applied to the position of an ovule of which the whole inside has been so reversed that the apex of the nucleus, and consequently the foramen, corresponds with the base of the ovule, with which, however, it maintains a connection by means of a vascular cord called the raphe. Examples: the almond, the apple, the ranunculus, &c. (Lindley: Introd. to Bot.)

án-áux-íte, s. [Gr. ἀναυξής (anauxēs) = not increasing; ἀν (an), priv., and αἰξω (auxō) = αἰξίνα (auxina) = to cause to increase.] A mineral, according to the British Museum Catalogue, a variety of clay, but placed by Dana under the same name as Comolite. It is translucent, is of greenish-white colour and pearly lustre, and contains about 55.7 parts of silica, a large percentage of alumina, 11.5 of water, a little magnesia, and protoxide of iron. It occurs at Bilin, in Bohemia.

án-būr-ý, án-bēr-rý, ám-būr-ý, s. [A.S. ampre, ampre = a crooked swelling vein.]

1. A soft wart on a horse's neck.

\*2. The disease called "fingers and toes" in turnips. The roots of turnips grown in too wet soil or otherwise unfavourable conditions, rot, and send forth an offensive smell. Insects are then attracted to the decaying structure, and deposit their eggs, which in due time generate larvae, whose effice it is to consume the putrid bulb. One of the species most commonly found is the Trichocera hiemalis, or Winter Gus.

† ánce, adv. [ONCE.] Once. (Stooh.) "... the pair Colonel was only out once."—Scott: Waverley, ch. LXII.

-ance, or -án-çý. An English suffix, corresponding to and derived from the Lat. -antia; as Eng. abundance, Lat. abundantia. It is = the state of: as abundance = the state of abounding; temperance = the state of being temperate.

\* án-çéll'e, s. [From Lat. ancilla.] A handmaid.

"Glorias virgin, mayden, moder off God, Daughter and ancelle, which milkest with-all The some of God with thy hrestes brod."—The Romans of Parthenay (ed. Skeet), 4, 455-7.

án-çést-ór, \* áun-çést-ór, \* án-çés-tre, \* án-çés-soiure, s. [Fr. ancêtre; O. Fr. accessour; Sp. & Port. (pl.) antecesores; Ital. antecessori. From Lat. antecessor = he who goes before; antecedo = to go before.] One from whom a person is descended, whether on the father or mother's side. It is distinguished from predecessor, one who previously held the office to which one has now succeeded.

¶ The Old English term which ancestors displaced when it came into the language was Fore-elders. (Barnes: Early Eng., p. 104.)

"But I will for their sakes remember the covenant of their ancestors, whom I brought forth out of the land of Egypt."—Lev. xxvi. 45.

án-çés-tór-ý-al, a. [Eng. ancestor; -ial.] Ancestral.

"... they wish to adhere to their ancestral form of a royal government."—Lewis: Early Roman Hist., ch. XI., § 1.

án-çés-tral, án-çés-trel, a. [Formed as from Lat. antecessorialis.] Pertaining to ancestors; derived from or possessed by ancestors.

"He generally vegetated as quietly as the elms of the avenue which led to his ancestral grange."—Macaulay: Hist. Eng., ch. viii.

án-çés-tress, a. [O. Eng. ancestre; -ess.] A female ancestor. (More usually ancestor is used in a feminine sense.)

án-çés-trý, \* án-çés-trie, \* áun-çés-trie, \* áun-çés-trýe, s. [O. Eng. ancestre; -y.]

1. The whole series or succession of persons, the last pair of whom were one's father and mother; the man and women who lived in one's country before he was born, and came of the same race as he now is.

"Many precious rites And customs of our rural ancestry Are gone or stealing from us."

2. High birth, aristocratic or otherwise honourable lineage.

"Who so will seek, by right desert, t'attaine, Unto the type of true nobility; And not by painted shewes, and titles vaine, Derived farre from famous ancestry."

"Heirs to their labours, like all high-born heirs, Vain of our ancestry as they of theirs."—Byron: Opening of Drury Lane Theatre, 1812.

\* áneh-ént-rý, s. [ANCIENTRY.]

\* án-çhé-çouin, s. [ENCHESON.]

ánch-ý-é-ta, s. [Named after P. Anchiteta, a Brazilian writer on plants.] A genus of plants belonging to the order Violaceae, or Violet-worts. A. salutaris, a creeping bush, smelling

ANCHIETA SALUTARIS: BRANCH, FLOWER, AND SEED. (One-fourth natural size.)

like cabbage, is a native of Brazil, and is considered by the inhabitants of that country as useful in skin diseases. It is also a purgative. (Lindley: Veg. Kingd., p. 339.)

ánch-ý-lóps, s. [Gr. ἀγχίλωψ (anchilops) = a sore at the inner corner of the eye; άνχί (anchi) = near; λ, euphonic; and ὤψ (ops) = the eye.] Same meaning as the Greek word.

ánch-ý-thér-ý-üm, s. [Gr. άνχί (anchi) = near; θήριον (thērion) = a beast, especially a wild beast hunted.] A fossil mammal belonging to the family Palæotheriidae. It has been called also Hipparitherium, suggesting an affinity to the horse in the neighbouring family of Equidae. The A. Aurelianense occurs in Miocene rocks in Spain, France, Germany, and in Nebraska, but has not hitherto been found in Britain.

\* The second and fourth toes may be subsequently developed as in the rhinoceros; or they may be represented only by mere splint-like rudiments of their metacarpals, as in the horse. All intermediate conditions are met with in various extinct forms, as Palæotherium, Anchitherium, and Hipparion.—"Flower: Outlet of the Mammalia (1870), p. 265.

án-chō-ýc-ác-ýd, s. [From Gr. άγχιν (anchin) = to throttle, with reference to its suffocating fumes.]

Chemistry: Lepargylic acid, C<sub>6</sub>H<sub>10</sub>O<sub>4</sub> = (C<sub>7</sub>H<sub>11</sub>)'(CO'.OH)'. A dibasic acid obtained by the action of nitric acid on Chinese wax or the fatty acids of cocoa-nut oil.

ánch-ór (1), \*án-cre, \*án-kre, \*án-kér, s. [A.S. ancra, ancor, ancor. In Sw. ankar, ankare; Dan., Dut., & Ger. anker; Irish ancaire, ancoir, ingid; Gael. acuir; Cornish

ankar; Arin. ancor; Fr. ancre; Sp. ancla, ancora; Port. and Ital. ancora; Lat. ancora, less properly anchora; Gr. άγκυρα (ankura); Russ. якор; Pers. anghar. All from a root anc or ang = a bend. In Sansc. ak, ankam, aks = to bend; ankas = a bend or curve.]

A. Ordinary Language:

1. Lit.: The well-known instrument for mooring a ship. (Described at length under B. 1.)

¶ Of the several nautical phrases arranged under B. 1, some have made their way into ordinary English. Specially—

To cast anchor:

(a) Lit.: To drop the anchor into the sea with the design of mooring the vessel.

"Regularly at that season several English ships cast anchor in the bay."—Macaulay: Hist. Eng., ch. xxiii.

(b) Fig.: To fix itself firmly in a rock, as a tree does on a mountain side.

"Aloft the ash and warrior oak, Cast anchor in the rifled rock."

Scott: Lady of the Lake, I. xii.

To drop the anchor, or to drop anchor: To let it run down into the sea. The same as cast anchor.

"Entering with the tide, He dropp'd his anchors and his oars he ply'd, For'd every sail, and drawing down the mast, His vessel moor'd, and made with haulers fast."

Dryden.

To lie at anchor: To remain steady in the water without drifting; being held to a nearly fixed spot by the anchor.

To ride at anchor: The same as to lie at anchor, but employing more motion.

"Far from your capital my ship resides At Reithrus, and secure at anchor rides."—Pope.

To weigh anchor: To heave or raise the anchor from the ground to which it is fastened.

2. Fig. Scripture, &c.: That which gives stability and security to hope or faith or the affections.

"Which hope we have as an anchor of the soul, both sure and steadfast, and which entereth into that which the vaif."—Heb. vi. 19.

B. Technically:

1. Mech. & Navt.: A well-known instrument for preventing a ship from drifting, by mooring her to the bottom of the sea, provided that the water is shallow enough to permit of this being done. Its invention was at a very early period. Those of the early Greeks were simply large stones, sacks filled with sand, or logs of wood loaded with lead. Then the Tuscans, or Midas king of Phrygia, introduced a tooth, or fluke, which was ultimately exchanged for two. The modern anchor consists of a long bar or shank of iron (c), branching out

ANCHOR.

at the lower extremity into two arms (a) ending in flukes (a), barbed at their extremity, and with a stock of oak or wood (d) at the upper one, while it terminates in a ring, to which a rope or chain is affixed. The arms or flukes are designed to penetrate and fix themselves in the sea-bottom. They consist of a blade, a palm, and a bill. The one end of the shank is made square to receive and hold the stock steadily in its place without turning. To keep the stock also from shifting along the shank, there are raised on it from the solid iron, or welded on it, two square tenon-like projections, called nuts. The end of the shank next the stock is called the small round. The other extremity, where the arms and the shank unite, is called the crown; and the points of the angle between the arms and the shank,

the throat. A distance equal to that between the throat of one arm and its bill [BILL] is marked on the shank from the place where it joins the arms, and is called the trend. The use of the shank is to present an attachment for the cable. [CABLE, SHACKLE, GANGLER.] That of the stook is to make the anchor fall in such a way as to enable one of the flukes easily to infix itself in the ground. Large vessels have more anchors than one, which are stowed in different parts of the ship. The best bower to the starboard, the small bower [BOWER] to the port-head, with the flukes on the bill-board, the sheet anchor on the after part of the fore-channels on the starboard side, and the spare anchor on the port side. [For other anchors, see STREAM, KEDGE, GRAPNEL, MUSHROOM, FLOATING, MOORING.]

2. Naut. Some technical phrases which have found their way into English literature have already been given. [A. 1.] Others are the following:—

An anchor is said to come home when it is wrenched out of the ground and dragged forward by the violence of the wind or the sea, or by the strength of a current. It is foul if it become entangled with the cable; a-wash, when the stock is hoisted up to the surface of the water; a-peak, when the cable is so drawn as to bring the ship directly over it; a-cockbill [A-COCKBILL], when hanging vertically; a-tip, when drawn out of the ground in a perpendicular direction; and a-weight, when it has been drawn just out of the ground and hangs vertically.

At anchor is the same as anchored.

To back an anchor is to lay down a small anchor ahead of the one by which the ship rides, with the cable fastened to the crown of the principal one to aid in preventing its "coming home."

To cat the anchor: To draw the anchor to the cathead by means of a machine called the "cat."

To fish the anchor: To employ a machine called a "fish" to hoist the flukes of an anchor to the top of the bow.

To steer the ship to her anchor: To steer the ship to the spot where the anchor lies while the cable is being heaved on board the ship.

To shoe the anchor: To cover the flukes of it with a triangular plank of wood to enable it to fix itself more tenaciously in a soft bottom.

To sweep the anchor: To dredge at the bottom of the anchoring ground for a lost anchor.

To throw the anchor. The same as Cast the anchor (A. 1).

3. Art: The shape of a buckle, the latter being usually described as having a tongue and an anchor. [Todd's Johnson.]

4. Arch: A kind of carving somewhat resembling an anchor. It is generally used as part of the enrichment of the bottoms of capitals in the Tuscan, Doric, and Ionic orders, or as that of the boltings of bed-mouldings in Doric, Ionic, and Corinthian cornices, anchors and eggs being carved alternately throughout the whole building.

5. Her.: An anchor is an emblem of hope.

C. In composition, anchor is a substantive.

anchor-ground, s. Ground suitable for anchoring. It should not be too deep, or too shallow, or rocky. [ANCHORAGE.]

anchor-hold, s.

1. Lit.: The hold or fastness of the anchor.

2. Fig.: Security.

"... as the one and only assurance and fast anchor-hold of our souls' health."—Camden.

anchor-ice, s. Ice formed on and incrusting the bottom of a stream or body of water.

anchor-lining, s. [BILL-BOARDS.]

anchor-smith, s. A smith who forges anchors.

anchor-stock, s. The transverse beam of wood or bar of iron near the ring of an anchor.

ānch'ōr, \*ān'-cre, \*ān'-kre, v. t. & i. [From the substantive. In Sw. ankra; Dan. ankre; Dat. ankren; Ger. ankern; Fr. ancrer; Sp. anclar, ancorar; Port. ancorar; Ital. ancorarsi.]

A. Transitive:

1. Naut.: To moor by means of an anchor.

2. Fig.: To fix firmly, to cause to rest.

"... and great Pompey would stand, and make his eyes grow in my brow; There would be anchor his aspect, and die With looking on his life."

Shakespeare: Antony and Cleopatra, l. 5.

"Stars countless, each in his appointed place, Fast anchored in the deep abyss of space."

Cooper: Retirement.

B. Intransitive:

1. Naut.: To come to an anchor.

"Hoarse o'er her side the rustling cable rings; The calls are loud; and anchoring round she swings."

Byron: Corsair, l. 5.

2. Fig.: To fix (the eye) upon.

"Posthumus anchors upon Imogen; And she, like harmless lightning, throws her eye On him."

Shakespeare: Cymbeline, v. 5.

\* ānch'ōr (2), s. [ANCHORITE.]

\* ānch'ōr (3), s. [ANKER.]

ānch'ōr-a-ble, a. [Eng. anchor, -able.] Able to be used as a place of anchorage.

"... and the sea everywhere twenty leagues from land anchorable."—Sir T. Herbert's Travels, p. 40.

ānch'ōr-a-car-pā-cē-a, s. pl. [From Gr. ἄγκυρα (ankura) = (1) an anchor, (2) a hook; and καρπός (karpos) = the wrist, the carpus.]

Zool.: The name given by Milne-Edwards to a tribe of Entomostracans, belonging to the order Lerneade. They attach themselves to their prey by means of long, arm-shaped appendages springing from the thorax, united to each other at the tip, and terminating in a horny button in the centre. It contains two families represented in Britain—the Lerneopadidae and the Anchorelladae.

ānch'ōr-a-cēr-ā-cē-a, s. pl. [From Gr. ἄγκυρα (ankura) = (1) an anchor, (2) a hook; and κέρας (keras) = a horn.]

Zool.: The name given by Milne-Edwards to a tribe of Entomostracans, belonging to the order Lerneade. They attach themselves to their prey by means of the head itself, which is furnished with one or more pairs of horn-shaped appendages, projecting laterally. It contains two families, represented in Britain—the Penelladae and the Lerneoceradae.

ānch'ōr-age (age = īg), s. [Eng. anchor; -age. In Fr. ancrage; Sp. anclorage.]

\* 1. The hold of the sea-bottom by the anchor.

"Let me resolve whether there be indeed such efficacy in arture and first production, for if that supposal should fail us, all our anchorage were loose, and we should but wander in a wild sea."—Wotton.

2. The set of anchors belonging to a vessel.

"The bark that hath discharged her freight Returns with precious lading to the bay From whence at first she weighed her anchorage."

Shakespeare: Titus Andronicus, l. 2.

3. Duty paid at a port for permission to anchor.

"This corporation, otherwise a poor one, holds also the anchorage in the harbour, and lusselage of inestimable commodities, as conis, salt, &c., in the town of Fowey."—Carew: Survey of Cornwall.

4. A place suitable for anchoring in—that is, a place in which the water is of convenient depth, and the bottom such as will permit the anchor to hold. (This meaning, which is not in Johnson, as if it were unknown in his time, is now the almost exclusive signification of the word anchorage.)

"... the water was so deep that no anchorage could be found."—Darwin: Voyage round the World, ch. xl.

ānch'ōr-a-stōm-ā-cē-a, s. pl. [From Gr. ἄγκυρα (ankura) = (1) an anchor, (2) a hook; and στόμα (stoma) = mouth.] The name given by Milne-Edwards to a tribe of Entomostracans belonging to the order Lerneade. They attach themselves to their prey by means of their stout foot-jaws, which are armed with strong hooks. It contains one British family, the Chondraesanthidae.

ānch'ōr-ed, pa. par. & a. [ANCHOR, v.]

As adjective:

1. Held by an anchor.

"In the anchor'd bark."

Byron: Corsair, l. 7.

2. Shaped like an anchor; forked. [Used of a serpent's tongue.]

"Shooting her anchor'd tongue, Threat'ning her venom'd teeth."

Mary: Song of the Sout, II. li. 52.

3. Her.: An anchored cross is one the

four extremities of which resemble the flukes of an anchor, as shown in the illustration. It is called also anchry or ancre. It is designed to be emblematic of hope through the cross of Christ. Cf. Heb. vi. 19, "Which hope we have as an anchor of the soul, both sure and stedfast."

ANCHORED CROSS.

ānch'ōr-ēl-la, s. [Dimin. of Lat. anchora or ancora = little anchor.] A genus of Entomostracans, the typical one of the family Anchorelladae. The A. uncinata is parasitic on the cod and the haddock. The A. rigosa was taken upon a cod.

ānch'ōr-ēl-la-dæ, s. pl. [From anchorella (q.v.)] A family of Entomostracans, belonging to the order Lerneade and the tribe Anchorelladae. It contains only one British genus, Anchorella (q.v.).

ān'-chōr-ēs, \*ān'-crēs, s. [Eng. anchor = anchorite; -ēs, to mark the feminine gender.] A female anchorite.

"Anchorites that dwell Mewed up in walls."—Fairfax: Tasso.

"To this secluded spot, now famous more Than any grove, mount, plain had been before, By retire, vision, luxury, or hirt, Of anchorites or hermits."

Brown: Brit. Pastoral, II. 4.

ānch'ōr-ēt-ic, ānch'ōr-ēt-ic-al, a.

[Eng. anchoret, -ic, -ical. In Fr. anchorétique; Sp. anacoretico; Port. anachoretico; Gr. ἀναχωρητικός (anachōrētikos).] Pertaining to an anchorite; after the manner of a hermit.

ānch'ōr-ēt-ish, a. [Eng. anchoret; -ish.] Resembling an anchorite in some way.

ānch'ōr-ēt-ism, s. [Eng. anchoret; -ism.] The state, condition, or mode of life of an anchorite.

ānch'ōr-ing, pa. par. [ANCHOR, v.]

ānch'ōr-ite, ānch'ōr-ēt, †an-āch'ōr-ēt, \*an-āch'ōr-ite, \*ānch'ōr, \*ān-

kēr, s. [A.S. ancort; Fr. anachorète; Sp. & Ital. anacoreta; Port. & Lat. anachoreta; Gr. ἀναχωρητής (anachōrētēs), from ἀναχωρέω (anachōrēō) = to go back, to retire; ἀνά (ana) = backwards, and χωρέω (chōrēō) = to make room for another, to retire; χωρῶς (chōrōs) = space, room.]

1. Church History: Any person who, from religious motives, has renounced the world, and retired from it into seclusion. (For the distinction between the various kind of Ascetics, see that word. See also EREMITES.) The peculiarity of the anchorites, properly so called, was, that though they had retired for solitude to the wilderness, yet they lived there in fixed abodes (generally caves or hovels) in place of wandering about. When they did travel they slept wherever night overtook them, so that visitors might not know where to find them. They were most numerous in the Egyptian desert, where they lived on roots and plants, believing that to afflict the body was the best method of spiritually benefiting the soul. Most of them were laymen; there were also female anchorites. They first arose, it is said, about the middle of the third century, and in the seventh the Church extended its control over them, and ultimately threw difficulties in the way of any one who wished to adopt such a mode of life. [ASCETIC, EREMITA, MONASTICISM, MONK, &c.] [Mosism: Church Hist., Cent. iv., pt. ii., ch. iii., § 15.]

2. In a general sense: Any person of similar habits to those of the old anchorites now described. The mistaken desire to retreat from the "world" to the wilderness is not distinctively Christian: it tends to manifest itself to a greater or less extent in all religions and in all ages. Anchorites of various Hindu ascetic sects are at present to be found among the jungles and hills of India, and they were much more numerous when the dominant faith to that land was Buddhism.

"To desperation turn my trust and hope! An anchor's cheer in prison be my soope."

Shakespeare: Hamlet, III. 3.

"Yet lies not love dead here, but here doth sit, Voted to this trench, like an anchorite."

Donne

bēl, boy; pōut, jōwl; eat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -īng. -cian = shan. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -sious = shūs. -ble = bēl. -cre, -kre = kēr. -tre = tēr.

**án-chòv-ý, án-chò-vý, s.** [In Sw. *anjovis*; Dan. *ansjovis*; Dut. *ansjovis*; Ger. *anschovje*; Fr. *anchois*; Sp. *anchova, anchova*; Port. *anchova*; Ital. *accuga*; Lat. *aphya, apua*; Gr. *ápñu* (*aphu*), usually translated an anchovy or sardine, but according to Yarrell and Adams, the mackerel-midge (*Motella glauca*).] (*Liddell & Scott*.) A fish, the *Engraulis encrasicolus* of Fleming; the *E. vulgaris* of Cuvier. It belongs to the Clupeidae, or Herring family. In general, its length is from four to five inches; but specimens have been found seven and a-half inches

ANCHOVY (ENGRAULIS ENCRASICOLUS)

long. It is common in the Mediterranean and parts of the ocean. It occurs also, though not very commonly, on the shores of Britain. Shoals of anchovies annually enter the Mediterranean, and various fisheries exist along its northern shores, the most celebrated being at Gorgona, a small island west of Leghorn. Sometimes another species, the *E. meletta*, is either mixed with, or substituted for the genuine fish. There is a large importation of anchovies into London.

**anchovy-pear, s.** The English name of the genus *Grias*, which is placed by Lindley doubtfully under the order *Barringtoniaceae* (*Barringtoniads*). *Grias cauliflora*, the stem-flowering anchovy-pear, is an elegant tree, with large leaves, which grows in the West Indies. The fruit, which is eaten, tastes like that of the mango, and is pickled in the same way.

**anchovy-sauce, s.** A sauce made of the fish called anchovy.

**án-chū-sa, s.** [In Ital. *ancusa*; Sp. & Lat. *anchusa*. From Gr. *ἀγκούρα* (*anchoussa*) = alkanet; *ἀγκή* (*angcho*) = to press tight, to strangle; so called from a ridiculous notion entertained by Dioscorides that one might kill a viper if he irritated its throat by spitting into its mouth after having chewed the leaves of alkanet.] A genus of plants belonging to the order *Boraginaceae* (*Borage-worts*). Two species are generally inserted in the British flora, but both are doubtfully native. They are the *A. officinalis*, the Common, and the *A. sempervirens*, the Evergreen Alkanet. *Lycopsis arvensis* is sometimes called *Anchusa arvensis*. The real alkanet, once termed *Anchusa tinctoria*, now figures as *Alkanna tinctoria*. [*ALKANNA, ALKANET*.] A beautiful species, sometimes cultivated in flower-borders, is *Anchusa paniculata* or *italica*.

**án-chū-síc, a.** [Mod. Lat. *anchusa*]; Eng. suff. -ic.] Derived from or contained in a plant or plants of the genus *Anchusa* (q.v.)

**anohusic-acid, s.** [*ANCHUSINE*.]

**ánch-ñ-şine, s.** [Eng. *anchusa*; -ine.] A red colouring matter obtained from the plant formerly called *Anchusa tinctoria*, but now *Alkanna tinctoria*.

**ánch-ý-lòç-ër-ás, s.** [Gr. *ἀγκύλος* (*angkylos*) = crooked, and *κέρας* (*keras*) = horn.] A shell belonging to the class *Cephalopoda*. The *A. Calloviensis* occurs in the Kelloway rock.

**ánch-ý-loçe, ánk-ý-loçe, \*áño-ý-loçe, v. t. & i.** [Gr. *ἀγκυλώω* (*angkyloō*), 1 fut. *ἀγκυλώσω* (*angkyλώσω*) = to crook, hook, or bend; *ἀγκύλη* (*angkylē*) = the bend of the arm; *ἀγκος* (*angkos*) = a bend or hollow.]

**A. Trans.:** To stiffen by consolidating the surfaces of (as of two bones). More frequently used in the passive.

"They [the teeth] are always lodged in sockets; and never *anchylosed* with the substance of the jaw."—*Osborn's Classification of Mammalia*, pp. 11, 12.

**B. Intrans.:** To grow stiff (as a joint); to grow together (as the surfaces of two bones).

**ánch-ý-lòçed, ánk-ý-lòçed, ánk-ý-lòçed, pa. par. or a.** [*ANCHYLOSE*.]

1. Grown together (as two bones), stiffened (as a joint).

"Contracted and *anchylosed* epiphysees."—*Misart's The Cat*, p. 45.

2. Cramped, rigid.

**ánch-ý-lò-şis, ánk-ý-lò-şis, ánc-ý-lò-şis, s.** [Gr. *ἀγκύλωσις* (*angkyλώσις*) = a stiffening of the joints or of the eyelids.] [*ANCHYLOSED*.]

**Anat.:** The coalescence of two bones, so as to prevent motion between them. If anything keep a joint motionless for a long time, the bones which constitute it have a tendency to become anchylosed, in which case all flexibility is lost. In other cases, when anchylosis is the lesser of two evils, the bones which nature is about to weld together should be kept in the positions in which they will be of the greatest use when the union between them takes place.

"Had immobility been the object to be attained, that might have been more effectually accomplished by the fusion of the extremities of the segments together, as in *anchylosis*."—*Todd & Bowman's Physiol. Anat.*, vol. 1, p. 133.

**ánch-ý-lòt-íc, ánk-ý-lòt-íc, ánc-ý-lòt-íc, a.** [From Eng. *anchylosis*.] Pertaining to anchylosis.

**\*án-cien-çý, s.** [Eng. *ancient*]; -cy. In Fr. *ancien*.] Antiquity. [*ANCIENTY*.]

"... And the rest of the bishops follow him, in their due precedence, according to the dignity and *ancienties* of their respective sees."—*Jura Cleri*, p. 42.

**án-cient, a. & s.** [Fr. *ancien*; Sp. *anciano*; Ital. *anziano*, from *anzi* = before. Cognate with Lat. *antiquus* = old, ancient; *anticus* = in front, foremost; and *ante* = before.]

**A. As adjective:**

**I. Ordinary Language.**

† **1.** Old, estimated tacitly or explicitly by the standard of human life.

(a) Pertaining to persons advanced in years. (Opposed to *young*.)

"... Then they began at the *ancient* men which were before the house."—*Ezek.* ix. 6.

(b) Pertaining to things which have existed for some considerable time in one's history. (Opposed to *recent*.)

"But they, upon their *ancient* malice, will Forget with the least cause, those his new honours."—*Shakesp.*—*Coriolanus*, ll. 1.

**2.** Old, estimated by the average duration of that to which the term *ancient* is applied.

"... some far-spreading wood Of *ancient* growth."—*Cooper's Task*, bk. 1.

"... an *ancient* castle overgrown with weeds and ivy."—*Macaulay's Hist. Eng.*, ch. xvi.

**3.** Old, estimated by the historic standard of time.

(a) Opposed to modern, and especially referring, at the present day, to the centuries anterior to the fall of the Roman Empire. (In this sense, which is the most common use of the word, it is opposed to *modern*.)

"The whole history of *ancient* and of modern times records no other such triumph of statesmanship."—*Macaulay's Hist. Eng.*, ch. ix.

(b) In the mouth of one who lived at an early period of the world's history, it meant an age prior to his own.

"Is this your joyous city, whose antiquity is of *ancient* days?"—*Isa.* xxiii. 7.

**4.** Old, estimated by the geological standard of duration.

"Processes now going on in nature on a small scale, or imitated artificially by man, may enable us to comprehend imperfectly in what manner some of these infinitely grander *ancient* metamorphoses were effected."—*Murchison's Siluria*, ch. 1.

**5.** From eternity.

"Thales affirms that God comprehended all things, and that God was of all things the most *ancient*, because he never had any beginning."—*Raleigh*.

† The words *ancient* and *old* are akin in meaning, and it is not easy to draw an absolutely precise line between their respective significations. *Old*, being opposed to *new*, is especially used of anything which is fresh when new, but has a tendency to wear out when old, or has nearly reached its proper term of existence, as an *old* hat; but it is also used when the lapse of time has increased instead of diminished the value of an article, as *old* wine. So also we speak of the *old* masters, meaning those who lived long ago, not those who are advanced in years. Finally, *old* generally indicates a lesser amount of duration than *ancient*. [*OLD*.]

**II. Technically:**

**In Law:**

(a) *Ancient demesnes* or *ancient domains*: Such manors as, after the survey the results of which were recorded in Domesday book, were found to belong to the Crown. (*Cowel*.)

(b) *Ancient sergeant*: The eldest of the Queen's sergeants. (*Wharton*.)

(c) *Ancient tenure*: The tenure by which the manors which belonged to the Crown in the times of Edward the Confessor and William the Conqueror were held. (*Cowel*.)

(d) *Ancient writings*: Legal documents more than thirty years old. (*Wharton*.)

**B. As substantive:**

**I. Ordinary Language:**

† **1.** An old man, especially when invested with important office in the community.

"The Lord will enter into judgment with the *ancient* of his people, and the princes thereof."—*Isa.* lii. 14.

"The *ancient* and honourable, he is the head; and the prophet that teacheth lies, he is the tail."—*Ibid.* ix. 15.

\* **2.** A predecessor in anything.

"He toucheth it as a special pre-eminence of Junias and Andronicus, that in Christianity they were his *ancients*."—*Hooker*.

† The reference is to Paul's statement, "Andronicus and Junia, my kinsmen and my fellow-prisoners, who also were in Christ before me." (Rom. xvi. 7.)

**3.** (*Plur.*) Those who lived long ago. To us in general this means before the fall of the Roman empire, the relapse into semi-barbarism which followed its overthrow making a great gap in time between the civilisation of what may be called the old world and that now existing. In this sense, *ancients* is opposed to *moderns*. This is the common use of the word. Sir G. Cornwall Lewis employs it thus in the title of his book, *The Astronomy of the Ancients*.

"Some by old words to fame have made pretence, *Ancients* in phrase, mere moderns in their sense."—*Pope's Essay on Criticism*, 323, 325.

† To those who lived in the early ages of the world, of course the term signified men of a considerably prior date.

"As saith the proverb of the *ancients* . . ."—*1 Sam.* xxiv. 13.

**4.** The Being existent from eternity.

"I beheld till the thrones were cast down, and the *Ancient* of days did sit."—*Dan.* vii. 9 (see also verse 13, 22).

**B. Technically.** In the Inns of Court. \* (a) *In the Middle Temple*, those who had passed their readings. (b) *In Gray's Inn*, the oldest barristers, the society consisting of benchers, *ancients*, barristers, and students under the bar. (c) In the Inns of the Chancery, the division is into *ancients* and *student*, or clerks. (*Wharton's Law Lexicon*, ed. Will.)

\* **án-cient, \*án-shent, s.** [A corruption of Fr. *enseigne*, from Low Lat. *insignia*, Lat. *insigne* = s standard.] [*ENSIGN*.]

**I. Of things:**

**1.** A flag, ensign, or streamer of a ship, and formerly the flag or ensign also of a regiment.

"... ten times more disabourable ragged than an old-faced *ancient*."—*Shakesp.*—*1 Hen. IV.*, iv. 2.

"It was a spectacle extremely delightful to behold the jacks, the pendants, and the *ancients* sporting in the wind."—*Don Quixote* (ed. 1687), p. 569. (*Bowdler*.)

**2. Heraldry:** (a) In the form *ancient* = the guidon used at funerals. (b) A small flag ending in a point. (*Gloss of Heraldry*.)

**II. Of persons:** The bearer of a flag, a flag-bearer, an ensign-bearer, an ensign in a regiment.

"This is Othello's *ancient*, as I take it.—The same indeed, a very valiant fellow."—*Shakesp.*—*Othello*, v. 1.

"This one lingo, *ancient* to the general."—*Ibid.*, ll. 4.

"... *ancient* Pistol."—*Shakesp.*—*2 Hen. IV.*, ii. 4.

"... and now my whole charge consists of *ancients*, corporals, lieutenants, gentlemen of companies."—*Shakesp.*—*1 Hen. IV.*, iv. 2.

**án-cient-ly, adv.** [Eng. *ancient*; -ly.] In *ancient* times; in times long gone by; the antiquity being estimated in any of the ways mentioned under *ANCIENT* (q.v.)

"The colowr is not an enemy, though that were *anciently* received, to the vine only, but to any other plant, because it draweth strongly the fattest juice of the earth."—*Bacon*.

"... for new varieties are still occasionally produced by our most *anciently* domesticated productions."—*Darwin's Origin of Species*, ch. xiv.

**án-cient-ness, s.** [Eng. *ancient*; -ness.] The state of having existed from *ancient* or old times; antiquity.

"The *Pescenine* and *Saturian* were the same; they were called *Saturian* from their *ancientness*, when Saturn reigned in Italy."—*Dryden*.

† **án-cient-ry, \*án-çent-ry, s.** [Eng. *ancient*; -ry. In Fr. *ancien*; Ital. *ancianita*.]

fát, fát, fare, amidst, whát, fáll, father; wē, wēt, here, camēl, hēr, thère; pine, pít, síre, sír, marine; gō, pót, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, uníte, cūr, rūle, fūll; trý, Sýrian. æ, œ = ē. ey = ā. ew = ū.

1. The honour or dignity of having ancestry capable of being traced a long way back.

"Wherefore, most foolishly do the Irish think to ennoble themselves by wresting their ancestry from the Spaniard, who is unable to derive himself from any in certain."—Spenser: On Ireland.

2. The people of ancient lineage taken collectively.

"... wronging the ancientry."—Shakesp.: Winter's Tale, III. 1.

3. Antiquity, or imitation of it.

"Heralds may here take notice of the antiquity of their art; and, for their greater credit, blazon abroad this precious piece of ancientry; for before the time of Semiramis we hear no news of coats or crests!"—Gregory's Pastimes, p. 236.

"You think the ten or twelve first lines the best; now I am for the fourteen last; add, that they contain not one word of ancientry."—West to Gray, Lett. 5, 13.

\* **án-cient-ý, s.** [Eng. ancient; -y.] Age; antiquity. [ANCIENTRY.]

"Is not the forgotten council of ancienty above a thousand years ago?"—Martin: Marriage of Priests, sign. I, il. b.

**án-çí-lé, s.** [Lat.] A shield said to have fallen from heaven during the reign of Nums Pompilius. It was believed to be the shield of Mars; and as the prosperity of Rome was supposed to depend upon its preservation, eleven others were made like it, that any one wishing to steal it might not know which to take. (Could it have been originally a lump of meteoric iron?)

"Recorded to have been sent from heaven in a more celestial manner than the ancile of ancient Rome."—Pater: On the Number 666, p. 113.

"The Trojans secured their palladium; the Romans their ancile; and now the Roman Catholics have so great care of their images."—Brentin: Saul & Samuel at Endor, p. 385.

**án-çil-lár-ý-s, s.** [Lat. ancilla = a maid-servant.] A genus of shells belonging to the family Buccinidae. Both the shell and the animal resembles those of Oliva. Recent—twenty-three species from the Red Sea, India, Madagascar, Australia, and the Pacific Ocean. Fossil, twenty-one. Eocene—Britain, France, &c. (Woodward, 1851.)

\* **án-çil-lar-ý, \* án-çil-lar-ý, a.** [Lat. ancillaris = pertaining to female servants.]

1. Lit. Pertaining to female servants, or their occupation; subservient.

2. Auxiliary, siding.

"It is beneath the dignity of the king's courts to be merely ancillary to other inferior jurisdictions."—Blackstone.

**án-çil-lé, s.** [Lat. ancilla.] A maid-servant. (Chaucer.)

**án-çip-ý-tal, án-çip-ý-toús, a.** [Lat. ancip, genit. ancipitis = (1) two-headed; (2) having two sides, double.]

Bot.: (The translation of the Latin ancipis.) Two-edged, compressed, with two sharp edges, as the stem of an iris.

**án-çis-tró-clá-dé-ús, s. pl.** [From Ancistrocladus (q.v.).] A new order of plants proposed by Planchon for the reception of a solitary and anomalous genus Ancistrocladus. The inflorescence is in panicles, with ten stamens in one row, five shorter than the others. The ovary is one-celled, with a single ovule. The fruit is a nut, crowned by the persistent calyx. Its nearest affinity is with the Dipterocarpaceæ. (Treas. of Bot.)

**án-çis-tró-clá-dús, s.** [Gr. ἀκιστρον (ankistron) = a fish-hook; άγκλος (anghlos) = a bend or hollow; κλάδος (klados) = a slip or shoot of a tree; κλάω (klaō) = to break, to break off.] A genus of East Indian climbing plants, the type of Planchon's order Ancistrocladaceæ (q.v.).

**ánç-le, s.** [ANKLE.]

\* **ánç-óme, \* ónc-óme, \* ýnc-óme, s.** [A.S.] A kind of boil, sore, or foul swelling in the fleshy parts. (Kersey's Dict.)

"Swall bigger and bigger till it has come to an ançme."—Marston: Eastward Ho!, III. 1.

**ánç-ón, s.** [Lat. ancon, genit. anconis; Gr. άγκών (anghōn) = the bend or hollow of the arm, the elbow.]

1. Anatomy: The apex of the elbow.

2. Architecture (plural ancones): (1) Ornaments on the keystones of arches, or on the sides of door-cases; (2) the corners of walls or beams.

3. Zool. & Agric.: A name for a breed of sheep, now extinct. It originated from a misformed lamb with short crooked legs, so that it and its progeny in which this peculiarity was perpetuated were unable to leap fences. (Used also adjectively.)

"This is known to have been the case with the ancon sheep."—Darwin: Origin of Species, ch. 1.

**án-có-né-al, a.** [Eng. ancon; -eal.] Pertaining to the ancon or apex of the elbow.

"Serving as the point of attachment to the extensor muscles of the fore-arm, called the olecranon or anconal process."—Floer: Catalogue of the Mammalia (1870), p. 245.

**án-có-né-ús, \* án-ó-nc-ús, a.** [Lat. ancon; Gr. άγκών (anghōn) = the elbow.]

Anat.: A muscle used in distending the fore-arm or cubit. (Glossographia Nova, &c.)

**án-cón-oid, a.** [Gr. άγκών (anghōn) = elbow, and είδος (eidos) = form, appearance.] Elbow-shaped, angular.

**án-cón-ý, s.** [Gr. άγκών (anghōn) = the elbow (?).]

Iron manufacture: A bloom wrought into the figure of a flat iron bar, about three feet long, with two square round knobs, one at each end. (Chambers.) [BLOOM.]

\* **án-cre, s.** [ANCHOR.]

\* **án-cred, pa. par. & a.** [ANCHORED.]

\* **án-crés, s.** [ANCHORES.]

**án-çýl-ód-ón, s.** [Gr. άγκυλος (angkylos) = bent, crooked, and δούς (dous), genit. δόωντος = a tooth.] A genus of fishes of the family Sciænidæ.

**ánç-ý-ló-çed, pa. par. & a.** [ANCHYLOSED.]

**ánç-ý-ló-sis, s.** [ANCHYLOSIS.]

**ánç-ý-lót-óm-ús, s.** [Gr. άγκυλή (angkylē) = (1) a bend in the arm; (2) a joint bent or stiffened by disease; (3) a loop, a thong: τέμνω (temnō) = to cut.]

Surgery: (1.) A crooked knife or bistoury. (2.) A knife for dividing the frenum linguæ in tongue-tied persons. (Hooper's Lexic. Med.)

**án-çýl-ús, a.** [Gr. άγκυλος (angkylos), adj. = crooked, curved, rounded.] A genus of fluviatile shells belonging to the family Linnæidæ. They have limpet-like shells, and are called river-limpets. In 1875 Tsit estimated the recent species at forty-nine, and the fossil at eleven; the latter from the Eocene. Two, *A. fluviatilis* and *A. oblongus*, occur recent in Britain.

**ánd, \* ánde, conj. & s.** [A.S. and; Dat. en; Ger. und. The English and and an = if, are essentially the same word, and were of old used almost interchangeably.] [AN.]

**A. As conjunction:**

1. As expressing contingency.

"And thou wilt grieve us any good."—Pierce the Plowman's Creed (1394, ed. Skeet), 593.

(a) As standing for *if, though, or although.*

"It is the nature of extreme self-lovers, as they will set an house on fire, and it were but to roast their eggs."—Bacon.

(b) As joined to *if*, and therefore redundant.

"I pray thee, Launce, an' V thou seeest my boy, Bid him make haste."—Shakesp.: Two Gent. of Verona, III. 1.

2. As a simple connecting particle, conjoining words with words, clauses with clauses, or sentences with sentences. This is now the normal use of the word *and*.

"Shem, and Ham, and Japheth."—Gen. vii. 13.

"Be fruitful, and multiply, and fill the waters in the seas, and let fowl multiply in the earth."—Gen. I. 22.

"And be put them altogether into ward three days. And Joseph said unto them the third day, This day, and live: for I fear God."—Gen. xlii. 17, 18.

**B. As substantive:**

"Thou earnest me, I ween, wifles and with andes."—Sir T. More: Works, p. 54.

¶ In Gen. iii. 16. "Thy sorrow and thy conception" = the sorrow of thy conception. In this respect the English simply copies the Hebrew. A similar idiom exists in Latin. Virgil speaks of hurling "molem et montes" (a mass and mountains) = a mass of mountains.

\* **ánd as a suffix.**

Old English dialects: The present participle termination in northern dialects, now superseded by the southern -ing.

"His glitterand armour shined far away."—Spenser: F. Q., I. vii. 23.

**ánd-a, s.** [? Natives name.]

Bot.: A genus of plants belonging to the order Euphorbiaceæ (Spurge-worts). Habitat, Brazil. The *Anda* is remarkable for the purgative properties of its seeds, in this respect resembling the not remotely allied plant, the well-known castor-oil. The Brazilians use them in indigestion, liver-complaints, jaundice, and dropsy. They are called *Purga da Paulista*. Their rind roasted on the fire is used in diarrhœa brought on by cold. If steeped when fresh in water, they render the liquid so narcotic that it is sufficient to stupefy fish. The oil is well adapted for the purposes of the painter. The fruit is eatable. (Lindley: Nat. Syst. of Bot., 1836, p. 114.)

† **ánd-áb-a-tiam, s.** [From Lat. *andabata* = a gladiator whose helmet was without any opening for the eyes.] Uncertainty.

"To state the question, that we might not fall to *andabatism*, we are to understand, that as there be two kinds of perfection, one of our way, the other of our country to which we are travelling; so there are two kinds also of fulfilling God's law, one of this life, the other of the next."—Shelford: Learned Discourses (1650), p. 121.

**ánd-a-lús-íte, s. & a.** [From *Andalusia*, in Spain, where it was first found; and -ite = λίθος (lithos) = stone.]

**A. As substantive:** A mineral classed by Dana with his Sulphates. It is orthorhombic. The hardness in typical specimens is 7-6, but in some opaque kinds only 3-4. Its sp. gr. 3.1 to 3.2, 3.05 to 3.35; its lustre vitreous; its colour whitish-red, flesh-red, violet, pearl-gray, reddish-brown, or olive-green. There is strong double refraction. The composition is silica, 33 to 40.17; alumina, 50.96 to 61.9; sesquioxide of iron, 0.30 to 5.71; sesquioxide of manganese, 0.53 to 0.83; magnesia, 0.17 to 1.14; lime, 0.21 to 4.12; soda, 0.10; potassa, 0.30 to 1.50; water, 0.25 to 2.60. Dana divides *andalusite* into "Var. 1, Ordinary; 2, Chiasolite (maçle)." *Andalusite* is found in argillaceous schist, in gneiss, in mica-schist, and rarely in serpentine. It is sometimes allied to kaolin, to mica, or to cyanite. It occurs at Andalus in Spain, in Germany, Austria, France, and Russia; at Killiney Bay, near Dublin, in Ireland; near Ballachulish, in Scotland; and at Cumberland in England. Myelin has the composition of cyanite and *andalusite*.

**B. As adjective:** *Dans* has an *Andalusite* group of minerals defined as anisometric, containing only sesquioxides. It includes *sedalusite*, *fibrolite*, *kyanite*, and *topaz*.

**ánd-dán-té, s. & adv.** [Ital. *andante* = going, the pr. par. of *andare* = to go.] [WEND.]

1. **As substantive:** A moderately slow movement between *largo* and *allegro*. It is the third in order of the five kinds of musical movement.

"... and gives to prayer

The *adagio* and *andante* it demands."

Cowper: Task, bk. II.

2. **As adverb:** In the time described above.

**ánd-dán-tí-nó, adv., a., & s.** [Ital.] A movement quicker than *andante*, of which the word *andantino* is a diminutive. It is intermediated between *andante* and *allegretto*.

**ánd-dar-ác, s.** [SANDARAC.] Red orpiment.

**ánd-dá-téy, s.** [Celtic.] A goddess or female power worshipped in Britain in pagan times.

"And to *Andates*, female power; who gave (For so they fauled) glorious victory."—Wordsworth: *Excursion*, bk. IX.

**ánd-dé-an, a.** [See def.] Pertaining to, living in, or found on the Andes, a mountain-chain extending along the Pacific coast of South America.

**ánd-é-íte, s.** [In Ger. *andesin*. From the Andes mountains, in which it occurs.] A trichlinic mineral classed by Dana in his thirteenth, or Felspar group of Unisilicates. The hardness is 5-6; the sp. gr. 2.61 to 2.74; the colour white, gray, greenish, yellowish, or flesh red; the lustre sub-vitreous, inclining to pearly. It consists of silica, 57.15 to 60.29; alumina, 17.62 to 26.78; sesquioxides of iron, 0.30 to 3.35; magnesia, 0.05 to 1.85; lime, 2.24 to 9.25; soda, 3.91 to 7.99; potassa, 0.05 to 3.99; and water, 0.34 to 3.64. It is often, if not always, altered oligoclase, and itself it sometimes changes to kaolin. It occurs in the Andes, in Canada, in France, and Austria. Saccharite, a variety of it, is found in Silesia. [ANDESYTE.]

**ból, bóy; pót, jówl; cat, çell, chorus, çhin, bench; go, çem; 'hin, þis; sin, aç; expect, çenophon, exíst. ph = ç**  
**-tion, -ston = shún; -þion, -çion = zhún. -tious, -sious = shúo. -cien = shen, -cient = shent. -le = el; -cre = kpr.**

án-dé-sýte, s. [From andesite, but with yte in place of ite, to show that it is a rock, and not a mineral.] A syenite-like rock occurring in the Andes. One of its ingredients is the mineral Andesite (q.v.).

ánd-ir-á, s. [The Brazilian name.] A genus of plants belonging to the Papilionaceous sub-order. About twelve species are known, all tropical American trees of moderate height, with alternate equally pinnate leaves about a foot long, and axillary or terminal panicles of generally showy flowers. The fruit is one-seeded, drupeous, and in aspect like a plum. *A. ternstroemii* is the cabbage-tree of the West Indies. [CASSIA-TREE.] Its bark and that of *A. retusa* are anthelmintic. In small quantities it is drastic, emetic, purgative, and narcotic, while in larger doses it is actually poisonous. (Lindley: Veg. Kingd., p. 548.)

án-dir-a-gua'-ca, s. [A South American name of the Vampire Bat, *Phyllostoma spec-trum*.] [PHYLLOSTOMIDÆ, VAMPIRE.] (See Griffith's Cuvier, vol. v., p. 71.)

ánd-ir-ón, hánd-ir-ón, \*áwnd-ir-ón, \*áwynd-ýrne, \*áwynd-ér, s. [In A.S. *brand-isen* = a branding-iron or rod, a tripod (Bosworth), but this does not seem the origin of the English word. Sw. *brand-ferm*; Fr. & Arm. *landier*; Mediev. Lat. *andena* = an andiron. Skinner derives it (a) from *hand* and *irons*, or (b) from *and* and *irons*, or (c) from *brand* and *irons*. In Yorkshire the term *end-irons* (see b) is applied to two coarse iron plates used to contract the fire-place.

ANDIRONS.

These being movable may be placed at a distance from each other when a large fire is wanted, and nearer when what is needed is only a small one. Boucher thinks that *and* in *andirons* is the A.S. separable prep. *and*, Gr. *avri* (*anti*), implying opposition, and that *and-irons* are pieces of iron opposed to each other. Wedgwood believes the true etymology is the Flemish *wend-tijser*, from *wenden* = to turn; andiron would then be the rack in front of the kitchen dogs in which the spit turns.]

Generally in the plural: A pair of and-irons = fire-dogs. A utensil consisting of two upright and generally ornamented pillars at some distance from each other, with a horizontal bar connecting them together. It was originally designed, as it still is in America, to prop up the extremities of logs of wood whilst they were being burnt. Then it was used to support the ends of a spit.

" Her andirons (I had forgot them) were two winking Cupids." Shakespeare: *Cymbeline*, li. 4.

andiron brass, s. Lustrona brass, suitable to be used in the construction of andirona.

"And besides, I take it, andiron brass, which they call white brass, hath some mixture of tin to help the lustre." Bacon: *Physiol. Rem.*

án-drád-íte, s. [Named after the Portuguese mineralogist, D'Andrada, who first described it.] A mineral arranged by Dana as a sub-variety of garnet, and the variety chrome-garnet. He designates it "E. Lime Iron-garnet." It is the same as Allochroite. Its colors are various shades of yellow, green, brownish red, brown, and black. It is subdivided by Dana into—1. Simple Lime Iron-garnet: (a) Topazolite; (b) Colophonite; (c) Melsonite, including Pyrenelite; (d) Dark-green Garnet, including Jellefite. 2. Manganesian Lime Iron-garnet: (a) Rothoffite, including

Polyadelphite; (b) Aploma. 3. Yttriferous Lime Iron-garnet, or Ytter-garnet. Sub-division 1 seems to include Calderite, the place of which is not yet thoroughly determined.

án-dræ-a, s. [Called after J. C. R. André, a German botanist.] The typical genus of the Andraceæ (q.v.).

án-dræ-á-çé-se, s. pl. [From *Andræa* (q.v.).] Split-mosses. An order of acrogenous plants, placed by Lindley under his Muscales, or Muscal alliance. It contains only the aigue genia *Andrea*, which agrees with mosses in having a calyptra and operculum, and with Jungermanniaceæ in having a valvular theca. In 1846 Lindley estimated the known species at thirteen.

án-drán-át-óm-ý, s. [Gr. *ánhr* (*anér*), gen. *ánhrós* (*andros*) = a man as opposed to a woman; and *ánatomé* (*anatomé*) = dissection.] [ANATOMY.] The dissection of a human being, especially of the male sex.

án-dré-as-bérg-'ó-lite, s. [(1) Andreasberg, a bailiwick and town of the provinces of Hanover, in the Harz mountains, with mines of iron, cobalt, copper, and silver in the vicinity; (2) *lite*.] A mineral, the same as HARMOTOME (q.v.).

án-dré-n-a, s. [From Gr. *ánhrónh* (*anhrónh*) = a wasp.] A genus of bees—the typical one of the family Andrenidæ. The British species are numerous; all are small, solitary bees.

án-dré-n-ý-dæ, s. pl. [From *Andrena* (q.v.).] A family of bees, one of two constituting the sub-tribe Anthophila. They differ from the Apidæ, the other family, in having a short and blunt trunk, and in other respects. The species are all solitary in their habits.

án-dré-'ó-lite, s. [In Ger. *andreich*.] [ANDREASSBERGOLITE.] A mineral, the same as HARMOTOME (q.v.).

án-dré-'çé-úm, s. [Gr. *ánhr* (*anér*): genit. *ánhrós* (*andros*) = a man, as distinguished from a woman; and *oikos* (*oikos*) = a house.]

Bot.: Röper's name for the male system or apparatus of a plant; in other words, for the stamens. (Lindley: *Introd. to Botany*.)

án-dróg-'ra-phís, s. [Gr. *ánhr* (*anér*), genit. *ánhrós* (*andros*) = a man; *γραφίς* (*graphis*) = a style for writing.] A genus of plants belonging to the order Acanthaceæ. *A. paniculata*, called in India Kariyat, is a bitter tonic and stomachic, very similar to quassia. It is used in general debility, in convalescence after fever, and in an advanced stage of dysentery.

án-dróg-'ýn-al, a. [Formed as if from Lat. *androgynalis*.] [ANDROGYNE.] The same as ANDROGYNOUS (q.v.).

án-dróg-'ýn-al-ly, adv. [Eng. *androgynal*; -ly.] With the characteristics of hermaphrodites; at once male and female.

án-dróg-'ýn-é, s. [In Lat. *s. fem.* = a masculine, heroic woman; in Gr. feminine of *ánhrógyinos* (*androgynos*) = a hermaphrodite: from *ánhr* (*anér*), genit. *ánhrós* (*andros*) = a man, a male; and *γυνή* (*guné*) = a woman.] A hermaphrodite.

án-dróg-'ýn-óus, a. [Lat. *androgynus* = a hermaphrodite.] Presenting the characteristics of both sexes in the same individual; at once male and female; pertaining to a hermaphrodite.

Bot.: Producing both male and female organs on the same root, or in the same flower. (London: *Cyclo. of Plants*, 1829, Gloss.)

án-dróid, án-dróid-'é-g, s. [Gr. *ánhr* (*anér*), genit. *ánhrós* (*andros*) = a man, and *είδος* (*eidos*) = form, appearance.] The name given to any machine constructed to imitate some of the movements or actions of a man, as, for example, to an automaton flute-player.

án-dró-má-'ní-ác, s. [Gr. *ánhrós* (*andros*) = a man; *μανία* (*mania*) = madness.]

1. (See extract.)

"There is an element in the feminine world that is suffering from what I shall venture to call *andromania*. . . . *Andromania* is a passionate aping of everything that is masculine."—Dr. Parkhurst: *Ladies' Home Journal*, February, 1895.

2. The same as NYMPHOMANIA (q.v.).

án-dró-má-'ní-ác, s. A woman showing evidence of or suffering from *andromania*. [See ANDROMANIA.]

ÁN-dróm-'éd-a, s. [Lat. and Gr.]

1. *Class. Myth.*: A daughter of Cepheus, King of Ethiopia, and Cassiope. It was fabled that she was chained to a rock by order of Jupiter Ammon, and then exposed to the attacks of a monster. Perseus released, and afterwards married her. On her death she was changed into the constellation which bears her name. (Ovid: *Metam.*, iv. 670, &c.)

2. *Astron.*: A constellation, fancifully supposed to resemble a woman chained. It is in the northern hemisphere, and is surrounded by Cassiopeia, Lacerta, Pegasus, Pisces, Triangulum, and Perseus. It contains the bright stars Alnuch and Mirach, and Alpherat is on the boundary-line between it and Pegasus. There is in the girdle of Andromeda a fine elliptical nebula, visible to the naked eye, and continually mistaken by the uninitiated for a comet. (Herschel: *Astron.*, § 874.)

" from eastern point of Libra to the fleecy star that bears *Andromeda* far off Atlantic seas." Milton: *P. L.*, bk. III.

3. *Bot.*: A genus of plants belonging to the order Ericaceæ, or Heath-worts. A species (the *A. polifolia*, or Marsh Andromeda) occurs

MARSH ANDROMEDA (ONE-THIRD NATURAL SIZE).

in the bogs of Britain, the desolate character of the localities which it inhabits recalling to classical minds of fanciful tendency the barren rock to which Andromeda was chained (see No. 1). The Marsh Andromeda is an evergreen shrub, with beautiful rose-colored drooping flowers. Its shoots poison sheep, as do those of the *A. Mariana*, which grows in America; and the *A. ovalifolia*, of Nepal, acts with similar effect upon goats. *A. hypnoides*, which looks when its leaf like a moss, covers great tracts of ground in the Lapland Alps, and adorns them with its red flowers.

án-dró-pét-'ál-óus, a. [Gr. *ánhr* (*anér*) = a man, and *πέταλον* (*petalon*) = a leaf, but used by botanists for a petal.]

*Botany*: Having stamens transformed into petals, as sometimes takes place when a single flower is converted into a double one.

ÁN-dróph-'a-gí, s. pl. [Gr. *Ἀνδροφάγος* (*Androphagós*), the people described below; *ἀνδροφάγος* (*androphagos*) = eating human flesh; *ánhr* (*anér*) = a man, and *ζοορ. inf. φαγεῖν* (*phagein*) = to eat.] A race of cannibals, adjacent to Scythia, mentioned by Herodotus; hence cannibals generally.

ÁN-dróph-'ór-úm, s. [Gr. *ánhr* (*anér*) = a man, a male; and *φέρω* (*phérō*) = to bear.]

*Bot.*: Mirbel's name for the tribe formed by the union of the filaments in monadelphous plants. (Lindley: *Introd. to Bot.*)

án-dróp-'ó-gón, s. [In Sp., Port., & Ital. *andropogon*; from Gr. *ánhr* (*anér*) = a man, and *πίον* (*pión*) = a beard; there being on the flowers a beard-like tuft of hairs.] A genus of plants belonging to the order Gramineæ, or Grasses. The *A. sorghum*, better known as *Holcus sorghum*, is extensively cultivated in India as a cereal. It is the Jowaree or Jondia of that country, and is called in English Great Millet. Another species, also grown in the Deccan as a cereal, is the *A. saccharatus*, or Shalco. Other species are the *A. Schenanthus*, or Lemon-grass [LEMON-GRASS]; the *A. calamus*

án-te, fát, fáre, amidst, wát, fáll, fáther; wé, wét, hère, camél, hér, thère; píne, píť, síre, sír, maríne; gó, pót, or, wóre, wólf, wórk, wóh, sóm; múte, súb, cúre, únite, cūr, rúle, fúll; trý, Síryan. æ, œ = é. -gua = gwa.

aromaticus [CALAMUS]; and the A. Iswaran-cusa. The fragrant roots of the A. muricatus, called throughout India Khus, are used for making tatties [TATTY], or for similar purposes.

an-dro-sac-e, s. [Fr. androsacé. In Latin androsaces, Greek ἀνδρόσακες (androsakes), is not a plant, but a madrepore, from ἀνρίρ (anēr), genit. ἀνρίρος (anērōs) = man, and σάκος (sakos) = a shield, to which the large round hollow leaf of the most common species has a certain resemblance.] A genus of plants belonging to the order Primulaceae. Elegant mountain plants found on the continent of Europe. None are wild in Britain.

an-dro-sam-um, s. [Lat. androsæmon; Gr. ἀνδρόσαμον (androsaimon), lit. = man's blood; ἀνρίρ (anēr), genit. ἀνρίρος (andros) = a man, and αίμα (haima) = blood.]

\* 1. Ancient classic writers: A species of St. John's Wort, with blood-red juice; Hypericum androsæmon, montanum or ciliatum.

2. Modern Botany: A genus of plants belonging to the order Hypericaceae, or Tutsans. The A. officinale is tonic and astringent.

an-dro-sphin-x, s. [Gr. ἀνδρόσφινξ (androsphinx), from ἀνρίρ (anēr) = a man, and σφίγξ (sphinx) = A man-sphinx, that is, a sphinx with the bust of a man, and not, as is usually the case, with that of a woman.

an-drot-om-y, s. [Gr. ἀνδρότομος (androtomōs), lit. = to cut a man; ἀνρίρ (anēr) = a man, and τέμνω (temnō) = to cut.] Dissection of the human body, in contradistinction from zootomy, or dissection of the bodies belonging to the inferior animals. (Johnson.)

-an-drou-s, in compos. [Gr. ἀνρίρ (anēr) = a man, a male.]

Bot.: Pertaining to the stamina. It is used only in composition, as monandrous plants, those with one stamen; diandrous, those with two, &c.

\* and-swere, v. & s. [ANSWER.]

\* and-vile, s. [ANVIL.]

ane, a. [ONE.] One. (Scotch.)

"... one o' the Colonel's air ruffled sarks. . . -Sir Walter Scott: Waverley, ch. 222.

† ane, v.t. [Ger. einen = to agree.] To agree, to accord. (Scotch.)

"Say a bapnyde hym to ta the Kyng, And onyd for his rawnownyng." Wycloune, III. lit. 42.

† ane-a-bill, a. [O. Fr. anible = capable; Lat. inihabillis = unmarried.] Unmarried. (Scotch.)

"... oneabil or singill woman." -Reg. Maj., bk. II., c. 19, § 2. (Jamieson.)

\* a-ne-al. [ANEAL.]

a-ne-ar, adv. [Eng. a; -near.] Near.

"The lady shrieks, and, well a-near! Doth fall in travail with her fear." Shakesp.: Pericles, III. (Intro.)

a-ne-ath, prep. & adv. [A.S. beneothen = beneath.] Beneath. (Scotch.)

"See, yonder's the Rastick's Skerry-he he held his neb above the water in my day-hat he's sneath it now." -Scott: Antiquary, ch. vii.

an-ec-dō-tal, a. [Eng. anecdote; -al.] Pertaining to anecdotes. (Prof. Wilson.)

an-ec-dō-te, s. [In Sw. anekdot; Dan. & Ger. anekdote; Dut. & Fr. anecdote; Port. anekdota; Ital. aneddoti; Gr. ἀνεκδοτος (anekdotos) = something not published, but kept secret; ἀν (an), priv., and εκδοτος (ekdotos) = given out; ἀν (ek) = out, and δότος (dōtos) = granted; δίδωμι (didōmi) = to give.]

1. Originally something kept unpublished, secret history, or an ancient work not in fact published, though there was no intention of keeping its contents undivulged. The best collection of anecdotes, in this first sense of the word, is generally said to have been that of Morator, in A.D. 1709: but the thing, if not the name, must have been much older.

"Some modern anecdotes aver, He nodded in his elbow chair." Prior.

2. A short but generally striking narrative of some single event in a person's history, related generally with a view of exhibiting his characteristic peculiarities. Among the best collections of anecdotes, in the modern sense, are the "Percy Anecdotes," sent forth by George Beyerley and Joseph Clinton Robinson.

\* an-ec-dōt-ic, \* an-ec-dōt-ic-al, a. [Eng. anecdote, -ic, -ical. In Fr. anecdotique; Port. anecdotic.]

1. Pertaining to anecdotes.

"Particular anecdotal traditions, whose authority is unknown or suspicious." -Boilingbrooke to Pope.

2. In the habit of relating anecdotes.

an-ec-dōt-ist, s. [Eng. anecdote; -ist. In Port. anecdotista.] One who relates anecdotes by word of mouth or by the pen. (Ogilvie.)

\* an-ē-dīng, s. [AANDE, AIND, AYNDE.] Breathing. (Scotch.)

"All thar fishes of swate we was wete, As sic a stow train out of thair eben, Of anedding bath of horse and men." Barbour.

\* a-ne-fald, a. [AFAULD.] (Scotch.)

\* a-ne-hōde, s. [A.S. an, en = one; suffix had = Eng. hood or head; as in A.S. wuduwanhad = Eng. widowhood; mædenhad = Eng. maidenhead or maidenhood.] Oneness, union. "The a-nehōde of God with mannis soole." -Richard Rolle de Hampole, VII. (ed. Perry), p. 14.

\* an-eī-mī-a, an-ē-mī-a, s. [Gr. ἀνείμων (aneimōn) = without clothing; ἀ, priv., and είμα (eima) = dress, a garment; είνυμι (einnumi) = to dress. So called from the naked appearance of the spikes of inflorescence.] A genus of plants belonging to the order Poly-podiaceae, or Ferns. A. tomentosa smells like myrrh. (Lindley: Veg. Kingd., p. 79.)

\* an-ēl-āge, an-ēl-ā-qi-ō, s. [ANLACE.]

\* an-ēle (1), a-ne-al, \* an-nōyle, v.t. [A.S. et = oil.] To administer extremes unction to. "Hyt ys not gode to be helat, How a wyght sochal be un-ēlet." Instructions for Parish Priests (ed. Peacock), 1511-12.

\* a-nēle (2), v.t. [Derivation uncertain, probably from Lat. anhelō = to pant.] To atack, to worry. (R. Morris.) To approach. (Sir F. Madden.)

"Bothe wyth halles and berez and borez other quyte And etayner that hym an-ēlet, of the heghs felle." Sir Gawayne (ed. R. Morris), 722, 723.

\* an-ē-lēc-tric, a. & s. [Gr. ἀν (an), priv., and Eng. electric (q.v.).]

1. As adjective: Non-electric.

2. As substantive (plur.): A term formerly used to designate those bodies which were commonly believed to be incapable of becoming electrical by friction.

"... bodies were formerly divided into ideoelectric, or those which become electrical by friction, and anelectric, or those which do not possess this property." -Atkinson: Ganot's Physics, 2d ed. (1868), p. 585.

an-ē-lēc-trōde, s. [Gr. ἀνά (ana) = up; and Eng. electrode (q.v.).]

Elec.: The positive electrode or pole of a galvanic battery. (Faraday.) [ANODE.]

an-ē-lēc-trōt-ō-nūs, s. [Pref. an-, and Eng. &c. electrotonus (q.v.).] The condition of the nerve close to the positive pole. (Ganot: Physics (ed. Atkinson), p. 924.)

\* a-ne-lý, adv. [A.S. an = on; Eng. suff. -ly = like.] Only; alone.

"I fande them in desert, fastande in the monte, anely prayande." -Richard Rolle de Hampole.

\* an-ēl-ýe, v.t. [Lat. anhelō.] To aspire, to breathe. (Scotch.)

\* a-ne-lý-ness, s. [O. Eng. anely (q.v.); -ness = -ness.] Loughness.

"... lough in wantone loyenge, bot in hytter gretynges, noghte enaunge many, bot in anelynes." -Richard Rolle de Hampole, I. (ed. Perry), p. 5.

an-ēm-ōg-raph-y, s. [Gr. ἀνεμος (anemos) = the wind, and γραφή (graphē) = a description.] A description of the winds.

an-ēm-ōl-ōg-y, s. [Gr. ἀνεμος (anemos) = the wind, and λόγος (logos) = a discourse.] The science which treats of the winds.

an-ēm-ōm-ēt-ēr, s. [In Ger. anemometer; Fr. anémomètre; Port. anemometro; Gr. ἀνεμος (anemos) = the wind, and μέτρον (metron) = a measure.] An instrument designed to measure the velocity of the wind, on which its strength depends. Anemometers have been made of three kinds: 1st, those in which a windmill twists string round an axle against pressure; 2nd, those in which a defined surface, say of a foot square, is pressed

Fig. 1.

against a spring (Fig. 1); 3rd, those in which water or some other liquid is made to stand at a higher level in one leg of an inverted siphon than in the other (Fig. 2). The anemometer now most commonly in use is more akin to the first, which was also the earliest type of the instrument, than it is to the second or the third. Four light metallic hemispheres, called from Dr. Robinson, who first employed them, Robinson's cups (Fig. 3), are made to revolve like a vane or weather-cock, and are found to do so at the rate of exactly one-third the velocity of the wind. The result is then recorded in pencil marks by a self-registering apparatus.

Fig. 2.

Fig. 3.

an-ēm-ōm-ēt-ry, s. [In Fr. anémometrie; Port. anemometria. (For etym. see ANEMOMETER.)] A measurement of the velocity and strength of the wind. [ANEMOMETER.]

an-ēm-ōn-ē, an-ēm-ōn-y, s. [In Dan., Ger., Dut., Fr., Sp., Port., Ital., & Lat. anemone; in Port. also anemola. Gr. άνεμών (anemōn), lit. = wind-flower, from άνεμος (anemos) = the wind; because the flowers are easily moved by the wind.]

A. Ord. Lang. (Of the forms anemone and anemony.) Any wild or cultivated plant of the botanical genus Anemone. (See B., 1.)

"From the soft wing of vernal breezes shed, Anemones, arculas, enrich'd With shining meal o'er all their velvet leaves." Thomson: Spring, 536.

B. Technically. (Of the form anemone only.) 1. Bot.: A genus of plants belonging to the order Ranunculaceae, or Crowfoots. What to

ANEMONE. (ONE-THIRD NATURAL SIZE.)

the uninitiated seems a corolla is in reality a petaloid calyx highly developed. Two anemones are genuine natives of Britain: the A. nemorosa, or Wood, and the A. pulsatilla, or Pasque-flower Anemone. Two others, the A. Apennina and A. ranunculoides, are naturalised. A. coronaria and hortensis are common garden flowers.

SEA ANEMONES.

2. Zool.: A popular name for those marine radiated animals which present some

bell, boy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -ing. -cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -tious, -sious, -cious = shüa. -ble, -dle, &c. = bel, del.

resemblance to the anemone, but really look more like the Chrysanthemum or some others of the Compositae. The "anemone" meaning the Sea-anemone is *A. mesembryanthemum*, called also the Bendlet; the Snake-locked Anemone is the *Sagartia viduata*, and the Plumose Anemone is the *Actinoloba dianthus*.

**án-ém-ó-ní-a**, s. [ANEMONINE.]

† **án-ém-ón-íc**, a. [Eng. *anemone*; *ic*.] Pertaining to the anemone.

**án-ém-én-ine**, **án-ém-ón-in**, **án-ém-ó-ní-a**, s. A chemical substance obtained from various species of anemone. It burns like camphor.

**án-ém-ón-y**, s. [ANEMONE.]

**án-ém-ó-scope**, s. [In Fr. *anémoscope*; Sp. *anemoscopio*; from Gr. *áneos* (*anemos*) = the wind, and *skopeō* (*skopeō*) = to look at.] An instrument for rendering visible the direction of the wind. In that commonly used there is a vane exposed to the wind acting upon an index moving round a dial-plate on which the thirty-two points of the compass are engraved.

**án-én-phál-í-a**, s. [For etymology see ANENCEPHALUS.] Absence of the brain, or a portion of it.

**án-én-phál-íc**, a. [Eng. &c., *anencephalus* (q.v.); Eng. *-ic*.] Brainless; without a brain.

"In the *anencephalic* foetus in which all the encephalon, but part of the medulla oblongata is wanting by congenital defect . . ."—*Todd & Bowman: Phys. Anat.*, ii. 311.

**án-én-phál-óus**, a. [Eng. &c., *anencephalus* (q.v.), and Eng. suff. *-ous*.] Brainless; anencephalic.

" . . . an *anencephalic* foetus."—*Todd & Bowman: Physiol. Anat.*, vol. I., p. 217.

**án-én-phál-ús**, s. [Gr. *án* (*en*), priv., and *enképhalos* (*engkephalos*) = the brain; adj. = without brain.]

*Animal Physiol.*: A foetus born without the brain.

**\*an-end** (1), **\*an-ende** (1), **\*an-end-es**, **\*an-ent**, **\*an-ente**, **\*an-ent-is**, **\*an-ent-es**, **\*an-ens**, **\*an-empt-es**, **\*onence**, **\*an-ent**, **\*an-entat**, prep. [A contraction for *anefent* or *onefent*, representing the true form *anefen* or *onfen* = A.S. *on-fen* = even with, near, or an equality with.]

1. Opposite.  
"Bot a wounded full wyde and weete con wyse.  
*An-ende* hys hert through hyde Lorenze."  
*Alliterative Poems*; Pearl (ed. Morris), i. 134-5.  
2. Respecting, regarding, concerning, (Eng., in the forms *an ende* and *anente*; Scotch, in the form *anent*.)  
"*An-ende* tryght wys men, yet sayts a gume  
David in saner, if eny wy say lit."  
*Alliterative Poems*; Pearl (ed. Morris), 696-7.

**an-end** (2), **\*an-ende**, **on-end** (a or on = on, in, and end), adv.

I. *Ordinary Language*:  
1. On end, perpendicularly.  
2. Lastly.  
"*I drede on ende quat schulde by falle,  
Lest ho me e-chaped that I ther chos.*"  
*Alliterative Poems*; Pearl (ed. Morris), 186-7.  
II. *Naut.*: A term applied to the situation of any mast or boom when standing perpendicularly to the plane of the deck, to that of the tops, &c. Top-masts are also said to be *an-end* when they are hoisted up to their usual station at the head of the lower masts.

**án-épál-lác-ta**, s. pl. [Gr. *ánevállaktos* (*anepallaktos*) = not interchanging; *áv*, priv., *epállássō* (*epallassō*) = to change over, to interchange; *épi* (*epi*) = upon, or over, and *állássō* (*allassō*) = to change.] The term applied by Aristotle to those animals in which the upper and lower teeth do not interlock; namely, the herbivorous quadrupeds. (*Owen: Classif. of the Mammalia*, p. 2.)

**án-ér-ly**, a. Single, solitary. (*Scotch*.)

**án-ér-óid**, a. & s. [Gr. *á*, priv., and *νῆρος* (*nēros*) = wet, damp; from *vāo* (*vāō*) = to flow.]

**A.** As adjective: Not containing any liquid. (Used chiefly in the expression, "Aneroid barometer.")

**Aneroid Barometer**: A barometer not containing a liquid, but constructed on a totally different principle from a mercurial barometer.

ANEROID BAROMETER.

Various forms of the instrument exist. One of these consists of a cylindrical metal box exhausted of air, and having its lid of thin corrugated metal. As the pressure increases, the lid, which is highly elastic, and has a spring inside, is forced inwards; whilst, again, as it diminishes, it is forced outwards. Delicate multiplying levers then transmit these motions to an index which moves on a scale, and is graduated empirically by a mercurial barometer. It is wonderfully delicate, but is apt to get out of order, particularly when it has been exposed to great variations of pressure. From its portability it is much used for determining the heights of mountains. (*Ganot's Physics*, 3rd ed., 1868, pp. 130-1.)

**B.** As substantive: A barometer of the kind described under A.

**ánes** (often pronounced **éng**), adv. [A.S. *anes*, genit. m. and n. of *an*, *en* = (1) single, sole, another; *æne*, *æne* = once, at once.]

1. At one time, at once; once. (*Scotch*.)  
"I down take muckle stiller at *anes* . . ."—*Scott: Antiquary*, ch. xii.  
2. Only, solely.

**ánes ér-rand**, adv. [G. Eng. *anes* = sole; Eng. *errand*. *Lit.* = sole errand.] Of set purpose. (*Scotch*.)

" . . . if he was coming alive again *anes errand*."  
—*Scott: Redguntlet*, ch. x.

**án-és-ís**, s. [Gr. *ánesis* (*anesis*) = (1) a loosening, relaxing, (2) remission, abatement; *ánēmi* (*antēmi*) = to send up or forth, . . . to slacken, to relax; *áva* (*ana*) = up, and *ēmi* (*ēmi*) = to set a-going.]

*Med.*: The abatement of morbid symptoms.

**á-nēs-ó-rhiz-a**, s. [Gr. *ánēson* (*anēson*), or *ánēsson* (*anēsson*), the same as *ánēthon* (*anēthon*) = dill anise, and *ρίζα* (*rhiza*) = root.] A genus of plants of the Umbelliferous order, of which one species, the *A. capensis*, is used in Southern Africa as an esculent. (*Lindley: Veg. Kingd.*, p. 976.)

**á-nēth-ól**, s. [Lat. *anethum* = anise; *oleum* = oil.] [OIL OF ANISE.]

**á-nēth-úm**, s. [In Fr. *aneth*: Ital. *aneto*; Sp. *eneldo*; Port. *endro*. From Lat. *anethum*; Gr. *ánēthon* (*anēthon*) = anise or dill.]

*Bot.*: A genus of plants belonging to the order Apiaceæ, or Umbellifera. *A. graveolens* is the dill. Its fruit is aromatic and carminative.

**á-nē'ch** (h guttural), adv. [ENOUGH.] Enough. (*Scotch*.)

**án-eür-ísm**, † **án-eür-ýsm**, s. [In Fr. *anévrisme*, *anévrisme*; Sp. & Port. *aneurisma*; Gr. *áneúrrisma* (*aneurisma*), and *áneúrrismós* (*aneurismos*), from *áneúrrō* (*aneururō*) = to widen, to open; *éúrrōs* (*eururōs*) = to make wide or broad; *éúrrōs* (*eurus*) = wide, broad.]

*Med.*: A morbid dilatation of the aorta, or one of the other great arteries of the body. Four varieties of this malady have been described. In the first the whole circumference of the artery is dilated; in the second, or true aneurism, the dilatation is confined to one side of the artery, which then takes the form of a sac; in the third, or false aneurism,

the internal and middle coats of the artery are ulcerated or ruptured, while those which are external or cellular expand into a sac; in the fourth, or mixed variety, the false supervenes upon the true aneurism, or upon dilatation. (*Dr. J. Hope, Cyclo. Pract. Med.*, vol. I., p. 104.)

**án-eür-ísm-ál**, a. [Eng. *aneurism*; -al. In Fr. *anévrismal*, *anévrismal*; Port. *aneurismal*.] Pertaining to an aneurism; affected by an aneurism.

" . . . a rational treatment of aneurismal and wounded arteries."—*Todd & Bowman: Physiol. Anat.* vol. I., p. 29.

**a-new**, adv. [Eng. *a=on*; *new*. In Sw. *a nuo*.]

1. Another time; over again; afresh, again.  
" . . . when, lo! the North anew,  
With stormy nations black, on England pour'd  
Woe the sev. rest o'er a people fait."  
*Thomson: Liberty*, pt. iv.  
2. Newly, in a new manner, freshly.  
"He who begins late is obliged to form anew the whole disposition of his soul . . ."—*Rogers*.

**anfēt**, s. [ANVIL.]

**án-frác-tū-óse**, a. [From Lat. *anfractuosus* = winding, crooked.] [ANFRACUOSITY.] Anfractuous.

"Behind the drum are several vaults and anfractuous cavities in the ear-bone, so to intend the least sound imaginable, that the sense might be affected with it: as we see in subterraneous caves and vaults how the sound is redoubled."—*Ray*.

**án-frác-tū-ós-í-tý**, s. [Eng. *anfractuose*; -ity. In Fr. *anfractuosité*; Lat. *anfractus* = (1) a curving or bending, an orbit; (2) a tortuous route.] [ANFRACUOUS.] The quality or state of being anfractuous; tortuousness.

" . . . their surface is generally smooth: the anfractuosities, when present, are few and simple."—*Owen: Classif. of the Mammalia*, p. 24.

**án-frác-tū-óus**, a. [In Fr. *anfractuosus*; Port. *anfractoso*. From Lat. *anfractus*, adj. = broken, bent, round, winding, crooked; *an=* = ambi = around, and *fractus* = broken, pa. par. of *frango* = to break.]

**A.** *Ordinary Language*:  
1. *Lit.*: Winding, crooked, mazy; full of winding passages; spiral.  
" . . . with anfractuous spires and cochleary turnings about it."—*Fidler: Worthies*; London.  
2. *Fig.*: Tortuous.  
" . . . anfractuous and involved consequence."—*Bp. Taylor: Rule of Conscience*, bk. II., c. 4.  
**B.** *Technically*:  
*Botany*: Spiral, resembling in direction the spires of a corkscrew, or full of turnings and winding passages. (*Lindley*.)

**án-frác-tū-óus-nēs**, s. [Eng. *anfractuous*; -ness.] The quality of being anfractuous; anfractuousity, tortuousness. (*Bailey*.)

**\*an-gard-ly**, **\*an-gare-ly**, **\*an-gar-ly**, **\*an-gur-ly**, adv. Angrily. [ANGRY.]

**\*án-gár-ý-á-tion**, s. [In Fr. *angarie* = to follow after, to persecute; Ital. *angariare* = to force, to overcharge; *angariatore* = an oppressor; *angariare* = to compel, to oppress; *angheria* = force, compulsion; *Lat. angario*; *angheria* = force, compulsion (see *Mtt. v. 41*, in Gr.); to press one to serve, as an *ángaros* (*angaros*) (in Lat. *angarius*) a slight modification of a Persian word, *angaria* = a mounted courier; Gr. *ángareia* (*angareia*) = (1) *Spec.*, such service, (2) *Gen.*, service to a lord, villenage.] Compulsion, service forcibly exacted.

"But if in these earthly angariations one mile, according to our Saviour's counsel, may bring on another; yet, in spiritual evil ways, no compulsion can prevail upon a resolved spirit."—*Bp. Hall: Temptations Repelled*.

"This leading of God's Spirit must neither be a forced angariation (as if God would force grace and salvation upon us against our will), nor some sudden protrusion to good."—*Bp. Hall: Kem.*, p. 158.

"The earth yields us fruit, but it is only perhaps once a year, and that not without much cost and angariation, requiring both our labour and patience."—*Ibid.*, p. 43.

**án-gei-ól-ó-ý**, s. [Gr. *ángelos* (*angelos*) = a vessel; *lógos* (*logos*) = a discourse.] The doctrine of the vessels of the body. (*Brande*.)

**án-gei-ó-tén-íc**, a. [Gr. *ángelos* (*angelos*) = (1) a vessel, (2) a blood-vessel; *téino* (*teino*) fut. *teḗō* (*teḗō*) = to stretch, strain, extend.] *Lit.* = straining the blood-vessels. (See below.)

**angeiotenic fever**, s. A name of inflammatory fever. Pinel believed it seat to be in the organs of circulation. (*Dr. Tweedie: Cyclo. of Pract. Med.*, vol. ii., p. 162.)

fâte, fât, fâre, amidst, whât, fáll, father; wê, wêt, hère, camél, hêr, thêre; pine, pít, síre, sír, marine; gô, pôť, or, wôre, wôlf, wôrk, wôh, sôn; mûte, cûb, cûre, únite, cûr, rûle, fûll; trý, Sýrian. æ, œ = é. ey = ä. ew = ü.

án-gél-ét-óm-ý, s. [ANGIOTOMY.]

án-gél, \*án-gle (1), s. & a. [In A.S. engel, ange; Sw., Dan., Dut., & Ger. engel; Russ. angel; Irish angeal, angiol; Fr. ange; Sp. ange; Port. anjo; Ital. angelo; Lat. angelus. From Gr. ángelos (angelos) = (1) a messenger, (2) an angel, (3) the message brought; ángelos (angellos) = to bear a message, to announce.]

A. As substantive:

I. Ordinary Language:

1. Gen.: \* A messenger, one employed to carry a message, a locum tenens, a man of business. (In this sense it is masc. or fem.)

"Reigns his crown to angel Carwell's trust." Marvell: Britannia and Raleigh, 122.

Grosart, the editor of Marvell's works, considers that this is the true explanation of the very common "Angel Inn." (Andrew Marvell: Poems, ed. Grosart, vol. i., p. 335.)

2. Spec. Lit.: One of an order of spiritual beings superior to man in power and intelligence, vast in number, holy in character, and thoroughly devoted to the worship and service of God, who employs them as his heavenly messengers. Their existence is made known to us by Scripture, and is recognised also in the Parsee sacred books.

"... one man, one angel, one god."—Oricographic and Congratia of the Britan Tongue (ed. Westley). "And the angel answering said unto him, I am Gabriel, that stand in the presence of God."—Luke 1. 1.

"We find, as far as erudit is to be given to the celestial hierarchy of that supposed Dionysus, the senator of Athens, the first place or degree is given to the angels of love, which are termed Seraphim; the second to the angels of light, which are termed Cherubim; and the third, and so following places, to thrones, principalities, and the rest, which are all angels of power and ministry, so as the angels of knowledge and illumination are placed before the angels of office and domination."—Lord Bacon: Adv. of Learn., bk. 1.

"We learn from Scripture that many angels, originally holy like the rest, fell from their pristine purity, becoming so transformed in character that all their powers are now used for the purpose of doing evil instead of good. These are to be identified with the devils so frequently mentioned in holy writ.

"And the angels which kept not their first estate, but left their own habitation, he hath reserved in everlasting chains under darkness unto the judgment of the great day."—Jude 6.

"He cast upon them the fierceness of his anger, wrath, and indignation, and trouble, by sending evil angels among them."—Ps. lxxviii. 49.

3. Figuratively:

(a) Christ in angelic form or otherwise. (Compara Gen. xxxi. 11—13, with John 1. 18.)

(b) A spirit which has assumed the aspect of some human being. The reference probably is to the Jewish belief that each person has his or her guardian-angel.

"But she constantly affirmed that it was even so. Then said they, It is his angel."—Acts xii. 15.

(c) The representative of each of the seven Asiatic churches. "Unto the angel of the church of Ephesus write" (Rev. ii. 1); and "unto the angel of the church of Smyrna write," ver. 8. (See also ii. 12, 13; iii. 1, 7, 14.)

(d) An appellation given by an intimate friend, or especially by a lover, to the object of his or her affection.

"For Brutus, as you know, was Cæsar's angel: Judge, O you gods, how dearly Cæsar loved him!" Shakespeare: Julius Cæsar, iii. 2.

(e) A person of seeming innocence, purity, and benevolence.

"Oh, what may man within him hide, Though angel on the outward side!" Shakespeare: Measure for Measure, iii. 2.

4. The name of a beautiful fish, Pomacanthus ciliatus, which has large green scales, and the lamina above the gills armed with blue spines. It is one of the Chetodons, from the coast of Carolina, and is quite different from the British angel-fish (q.v.).

II. Technically:

Numis.: A gold coin, named from the fact that on one side of it was a representation

ANGEL OF EDWARD VI.

of the Archangel Michael in conflict with the Dragon (Rev. xii. 7). The reverse had a ship

with a large cross for the mast, the letter E on the right side, and a rose on the left; whilst against the ship was a shield with the usual arms. It was first struck in France in 1340, and was introduced into England by Edward IV. in 1465. Between his reign and that of Charles I. it varied in value from 6s. 8d. to 10s. It is not now current either in France or England. The last struck in England were in the reign of Charles I. (H. Noel Humphreys: Coins of England, 5th ed., 1848; and other authorities.)

"... shake the bags Of hoarding avarice; their imprisoned angels Set them at liberty."—Shakespeare: K. John, iii. 2.

"... and a counterfeit angel is made more like a true angel than if it were an angel coined of China gold."—Bacon: Inst. of Wat., ch. xl.

B. As adjective: Angelical.

"All angel now—yet little less than all, While still a pilgrim in our world below." Scott: Lord of the Isles (Conclusion).

C. In composition, Angel is generally a substantive, but sometimes it is an adjective.

angel-age, s. [Eng. angel; and age = time of life.] An age or period of life at which a certain character is possessed, or certain actions done. It is not the same as ANGELOAGE (q.v.).

"Why should you two, That, happily, have been as chaste as I am, Fairer, I think, by much (for yet your faces, Like ancient well-huilt piles, show worthy ruins), After that angel-age turn mortal devils?" Beaumont and Fl.: Valentinian, l. 2.

angel-bed, s. A bed without posts.

angel-choir, s. A choir of angels, especially that which sang when Christ's birth was announced to the shepherds at Bethlehem (Luke ii. 13, 14).

"God set the diadem upon his head, And angel-choirs attended." Cooper: The Task, bk. vi.

angel-fish, s. A fish of the Squalidae, or Shark family, the reverse of angelic in its look, but which derived its name from the fact that its extended pectoral fins present the appearance of wings. It is called also Monk-fish, Fiddle-fish, Shark-ray, and Kingston. It is

ANGEL-FISH.

the Squatina angelus of Duméril, the Squalus squatina of Linnæus. It has an affinity to the Rays, as well as to the Sharks. It lies close to the bottom of the sea, and feeds ravenously on flat-fishes. It sometimes attains the length of seven or eight feet. It is more common in the south than in the north of Britain, and is not uncommon on the coasts of the United States. (Tarrell: British Fishes, vol. ii., pp. 407 to 409.)

angel-form, s. A form deemed to be or resemble that of an angel.

"To weeping grottoe and prophetic glooms, Where angel-forms eth'wart the solemn dusk." Thomson: Seasons; Autumn.

angel-guest, s. An angel who has been received as a guest.

"To entertain our angel-guest." Milton: P. L., bk. v.

angel-hand, s. The hand of an angel.

"Fleeter than the starry brands Flung at night from angel-hands." Moore: Paradise and the Peri.

angel-head, s. The head of an angel cut in stone or other material.

"What, always dreaming over heavenly things, Like angel-heads in stone with pigeon-wings?" Cooper: Consecration.

angel-like, a. & adv. Like an angel; in an angelic manner.

"How angel-like he sings!" Shakespeare: Cymbeline, iv. 2.

angel-peopled, a. Peopled with angels. (Jeusbury.)

angel-quire, s. pl. A quire (choir) of angels.

"And join thy voice unto the angel-quire." Milton: The Morning of Christ's Nativity.

angel-seemling, a. Appearing as if they were angels.

"Than these same fullfaded angel-seemling sprights, Who thus in dreams, voluptuous, soft, and bland, Pour'd so th' Arabian heaven upon our nights." Thomson: Castle of Indolence, l. 65.

angel-trumpet, s. A trumpet used by angels.

"Where the bright seraphim, in burning row, Their loud uplifted angel-trumpets blow." Milton: At a Solemn Music.

angel-water, s. A scented water prepared in Portugal. It consists of rose, orange blossom, and myrtle water commingled together, and additionally perfumed with musk and ambergris.

angel-welcome, s. A welcome by angels. (Bowering.)

angel-wing, s. The wing of an angel. "subjected to his service, angel-wings And flaming ministers, to watch and tend Their earthly charge."—Milton: P. L., bk. ix.

angel-winged, a. Possessed of wings resembling those of angels.

Fig.: Rising to a high and serene atmosphere.

"She [philosophy] all angel-winged The heights of science and of virtue gains, Where all is calm and clear." Thomson: Spring.

angel-worship, s. The worshipping of angels.

Angel-worship is plainly forbidden in the text of St. Paul, which I am now considering (Col. ii. 18, 20), as also in Rev. xix. 10, xxii. 9.—Troppe: Popery truly stated, pt. ii.

\*án-gél (2), \*án-géll, s. [A.S. angel = a hook, a fishing-hook.] A hook. (Scottish.)

angel-hede, s. The hooked or barbed head of an arrow.

"An angel-hede to the hawks he drew." Wallace, iv. 554. (Jameson.)

án-gél (3), s. [Apparently a corruption of Eng. angle (q.v.). In Fr. ange = chain-shot.]

angel-shot, s. Chain-shot; cannon-shot cut in halves, which are then connected together by means of a chain.

án-gél-áge, s. [Eng. angel; suffix -age.] The existence or the state of angels.

án-gél-ét, s. [Dimin. of angel.] An old English coin, in value equal to half an "angel." [ANGEL, s.]

án-gél-hood, s. [Eng. angel; aff. -hood.] Angelic nature or character; the state of being an angel. (E. B. Browning: Song for Ragged Schools.)

án-gél-ic (1), \*án-gél-ick, \*án-gél-ique, án-gél-ic-al, a. [In Dan. engeligt; Ger. engelika; Fr. angelique; Sp., Port., & Ital. angelico; Lat. angelicus, from Gr. ángelos (angelikos).] 1. Gen.: Pertaining to a messenger of any kind.

"Angelick Crom well, who out-wings the wind." Marvell: First Anniversary, 126.

2. Spec.: Pertaining to an angel, or the hierarchy of angels; resembling an angel; like what an angel might have done; of a nature like that of the angels; superhuman.

"The action of womanly tenderness and angelic patience."—Macaulay: Hist. Eng., ch. xiv.

"Angelick Doctor: A title given to St. Thomas Aquinas.

angelic-hymn, s. The hymn sung by angels to the shepherds. (Luke ii. 14.)

angelio-salutation, s. The Hail-Mary (q.v.).

án-gél-ic (2), a. [From Eng. &c., angelica (q.v.).] Pertaining to the Angelica plant.

angelic acid, s. Chem.: C<sub>5</sub>H<sub>6</sub>O<sub>2</sub> = C<sub>4</sub>H<sub>7</sub>.CO.OH. A monatomic acid belonging to the acrylic series, obtained by boiling the root of Angelica archangelica with lime and water, and distilling the concentrated liquid with dilute sulphuric acid. Angelic acid forms long needle crystals, which melt at 45°, and boil at 190°.

án-gél-i-ca, s. [In Ger. angelika; Dut. engelwortel; Fr. angelique; Sp. angelica; Dan., Port., & Ital. angelica. From Lat. angelus; Gr. ángelos (angelos) = an angel. So called from its medicinal qualities.] A genus of plants belonging to the order Apiceæ, or Umbellifera. It contains one species, the

báll, bóy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -tion, -sion, -tioun, -cioun = shún: -tion, -sion = zhún. -tious, -sious, -cious = shüs. -ble, &c. = bæl. -ique = icla.

A. sylvestris, or Wild Angelica, truly indigenous in Britain, and one, the A. archangelica, or Garden Angelica, naturalised. It

ANGELICA SYLVESTRIS: BRANCH, FLOWER, AND SEED. (ONE-FIFTH NATURAL SIZE.)

is sometimes cultivated for its leaf-stalks, which are blanched and eaten as celery, or candied with sugar. It is regarded as stimulant and anti-pesitential.

"In his hand he carried, Angelica uprooted, With delicious fragrance Filling all the place." Longfellow: The Saga of King Olaf, ch. xvi.

angelica-root, s. The root of the Archangelica officinalis. It is fragrant, bitter, and pungent. When first tasted it is sweet, but leaves behind a glowing heat in the mouth. The Laplanders eat the stalks, roasted in hot ashes, for coughs, hoarseness, &c., and boil the tender flowers in milk to promote perspiration in catarrh attended with fever. In a candied state it is eaten as a sweetmeat. (Lindley: Veg. Kingd., v. 176.)

angelica-stalk, s. The stalk of an angelica plant.

"Now will I cooloff it. Better things are jewels Than angelica-stalks; are For a Queen to wear." Longfellow: The Saga of King Olaf, ch. xvi.

angelica-tree, s. Aralia spinosa. Its leaves are like those of the Angelica, whence its name. It is a small tree ornamental for lawns.

án-gél-i-cal, a. [ANGELIC.]

án-gél-i-cal-ly, adv. [Eng. angelical; -ly.] In an angelic manner; as an angel might be expected to do. (Webster.)

án-gél-i-cal-néss, s. [Eng. angelical; -ness.] The quality of being angelic. (Webster.)

án-gél-i-gi, a. pl. [Plural of Lat. angelicus = angelic.]

Church History: The name given to an old Christian sect who greatly venerated angels, if indeed they did not attribute to them even the creation of the world. They flourished about A.D. 180.

án-gél-i-fy, v. t. [Lat. angelus = an angel; facio = to make.] To render angelic. "The soul at this first resurrection must be spiritualised, reëdified, and angelified."—Farindon: Sermons (1847), p. 55.

án-gél-i-na, s. [A female name, from Lat. angelus = an angel.] An asteroid, the sixty-fourth found. It was discovered by Tempel, on the 6th of March, 1861.

án-gél-i-tes, a. pl. [In Ger. Angeliten. Named from Angelus, or Angelus, a part of Alexandria in which they used to meet.] An old Christian sect, a branch of the Sabellians, who flourished towards the termination of the fifth century. They believed that the persons of the Trinity were not the same or self-existent, but distinct gods, existing by participation in a deity common to them all. They were called also Severites and Theodosians, from Severus and Theodosius, who were successively their leaders.

án-gél-ól-óg-y, s. [Gr. áγγελος (angelos) = an angel, and λόγος (logos) = a discourse.] The department of theology which treats of angelic beings.

"... the manner in which the interpreter constantly treats of angelology and demonology."—Strauss: Life of Jesus (Martineau's transl.), vol. 1, § 17.

án-gél-ó-ni-a, s. [Sp. angelon; from Lat. angelus = Gr. áγγελος (angelos) = an angel.] A genus of plants belonging to the order Scrophulariaceæ (Fig-worts). A. salicicæfolia, or Violet Angelonia, is a herbaceous stove-plant, with fine large light-blue flowers.

án-gél-oph-án-y, s. [Gr. áγγελος (angelos) = an angel; φαίνω (phainō) = to bring to light; to make to appear.] The appearance or manifestations of angels.

"... the Theophany and Angelophany of the Old and New Testament."—Strauss: Life of Jesus (Martineau's transl.), vol. 1, § 14, p. 57.

án-gél-ót, s. [Fr.]

1. Numism.: An ancient French coin struck at Paris whilst that capital was temporarily in English occupation. It was so called from having on it the figure of an angel supporting the escutcheon of England and France.

2. A small cheese made in Normandy.

3. Music: A musical instrument somewhat resembling a lute. (In this sense it is probably derived from the Fr. anche, the reed of a wind instrument. (Johnson.)

án-gél-ús, s. [Lat. = angel.] A prayer to the Virgin, instituted by Pope Urban II., offered in Roman Catholic countries in the morning, at noon, and in the evening, at the sound of a bell called the Angelus. It is so called because it begins with the words "Angelus Domini nuntiavit Mariæ" (the Angel of the Lord announced to Mary). (HALL-MARY.)

"Sweetly over the village bell of the Angelus sounded." Longfellow: Evangeline, l. 4.

áng-ér, s. [A.S. ange = straitened, sorrowful, troubled, from Icel. angr = grief, sorrow. Ang in compos. = trouble. It implies narrowness, constraint, or difficulty; as angsum, angustum = difficult, narrow; angbreost = an asthma, a difficulty of breathing (ANQUISH). Cognate with enge = narrow, confined. Mediæv. Lat. angaria = vexation, troubles, distress, anxiety; Lat. angō; Greek άγχω (angchō) = to press tight.]

\* 1. Originally: Any vexation, distress, or uneasiness of mind having its origin—

(a) In bodily pain.

"I made the experiment, setting the moxa where the first violence of my pain began, and where the greatest anger and soreness still continued, notwithstanding the swelling of my foot."—Temple.

¶ Though the substantive has now lost this sense, the adjective still retains it; for we speak of "an angry wound."

(b) In any other cause. Spec., grief.

"She held hire hard in thralles wune, And dede hire forge and anger mine." Story of Gen. and Exod. (ed. Morris), 971-72.

2. Now: An emotion or passion of the human heart excited by the spectacle of wrongdoing, especially to one's self. When it arises, the heart beats more frequently, the blood circulates more rapidly, the voice becomes loud and menacing, all thought of personal danger passes away, and a desire is felt, if indeed it be not carried out, of punishing the offender. Essentially anger is a virtuous emotion, planted in the breast to intimidate and restrain wrong-doers; but, through human infirmity, it is almost sure to be abused in one of four ways. A person under its influence may be hasty, passionate, fretful, or revengeful.

"... anger is like A full-hot horse, who being allow'd his way, Self-mettle tires him."—Shaksp.: Henry VIII., l. 1.

"A slight flush Of moral anger previously had tinged The old man's cheek."—Wordsworth: Exc., bk. v.

¶ In Scripture it is frequently attributed to God.

"And the Lord's anger was kindled the same time, and he sware, saying, ..."—Numb., xxxii. 10.

"... let not thine anger burn against thy servant."—Gen. xlv. 16.

¶ In poetry anger has sometimes, though rarely, a plural. In this case it ceases to be an abstract word, because a concrete one = successive acts or states of indulgence of anger. "Delicious spites and darling angers."—Tennyson: Madeline.

áng-ér, v. t. & i. [From the substantive.]

A. Transitive:

\* 1. To render painful (used of the body); to trouble, to vex (used of the mind).

"He turneth the humours back, and maketh the wound bleed inwards, and angerech maligna ulcers and pernicious imposthumations."—Bacon.

2. To inspire with anger, to provoke.

Used—

(a) Of man:

"By them that are no people, and by a foolish nation, I will anger you."—Romans x. 19.

(b) Of God:

"They angered him also at the waters of strife."—Ps. cvl. 32.

B. Intransitive: To become angry. (Scott.)

"When neebors anger at a plea." Burns: Scotch Drink.

áng-óred, pa. par. & a. [ANGER, v.]

"The flush of anger'd shame O'erflows thy calmer glances." Tennyson: Madeline, 3.

áng-ér-fúl, a. [Eng. anger; -ful(l).] Angry. (Sylvester: The Arke, 205.)

áng-ér-ing, pr. par., a., & s. [ANGER, v.]

áng-ér-less, a. [Eng. anger; -less.] Calm; without anger. (Sylvester: The Arke, 222.)

† áng-ér-ly, \* áng-ér-lich, adv. [Eng. anger, -ly; A.S. lito = like.] Angriily; like an angry person.

"And angerlich y wandrode the Austyne to prove." Pierce the Plowman's Crede (ed. Skeat), 205.

"Why, how now, Heate! you look angerly." Shaksp.: Macbeth, iii. 5.

\* áng-ér-néss, s. [Eng. anger; -ness.] The state of being angry.

"Hail, innocent of angerness!" MS. cited by Warren, Hist. Eng. Poetry, l. 515.

án-gi-én-chy-ma, s. [Gr. άγγειον (angelion) = a vessel, and έγχυμα (engchuma) = an infusion; έγχω (engchō) = to pour in; εν (en) = in, and χέω (chéō) = to pour.]

Bot.: Professor Morren's name for vascular tissue. It is his fourth division of tissue, and comprehends (1) Pleurenchyma, or woody tissue; (2) Trachenchyma, or spiral vessels; (3) Modified trachenchyma, or ducts; (4) Cinenchyma, or laticiferous vessels.

án-gi-na, s. [In Fr. angine; Port. & Lat. angina = the quinsy. From Lat. angō, Gr. άγχω (angchō) = to press tight, especially the throat; to strangle.]

Medicine:

\* 1. A quinsy or other inflammatory disease of the throat.

"Angina... It is an inflammation on the parts of the throat, subsequent to respiration, speech, and deglutition; it is called a strangulation of the fauces, more properly an inflammation of the internal fauces."—Parr: Med. Dict. (1809), l. 115.

2. The angina pectoris (q. v.).

"Angina occurs in both sexes."—Dr. John Forbes: Cycl. Pract. Med., vol. 1, p. 83.

angina pectoris, s. [Lat. = angina of the breast.] The name first given by Dr. Heberden in 1768, and since then universally adopted as the designation of a very painful disease, called by him also a disorder of the breast; by some others "spasm of the chest," or "heart-stroke," and popularly "breast-pang." It is characterised by intense pain in the præcordial region, attended by a feeling of suffocation and a fearful sense of impending death. These symptoms may continue for a few minutes, half an hour, or even an hour or more. During the paroxysm the pulse is low, with the body cold, and often covered with clammy perspiration. Death does not often result from the first seizure, but the malady tends to return at more or less remote intervals, generally proving fatal at last. There are several varieties of it: an organic and a functional form; and again a pure or idiopathic and a complex or sympathetic one have been recognised. Angina is produced by disease of the heart. It specially attacks elderly persons of plethoric habits, men oftener than women, generally coming on when they are walking, and yet more if they are running up-stairs or exerting great effort on ascending a hill. Stimulants should be administered during the continuance of a paroxysm; but it requires a radical improvement of the general health to produce a permanent effect on the disorder.

án-gi-nose, a. [Lat. anginosus, fem. anginosa.] Pertaining to angina (q. v.).

anginose scarlatina, s. [Lat. scarlatina anginosa.] A variety of scarlatina, more severe than Scarlatina simplex, and less dangerous than Scarlatina maligna. [SCARLATINA.] (Tanner: Manual of Medicine.)

án-gi-nous, a. [Lat. anginosus; Fr. angineux.] Pertaining to the Angina pectoris.

"... the anginous symptoms being either feebly manifested."—Cyclo. Pract. Med., vol. 1, p. 67.

fát, fát, fáre, amidst, wát, fáll, father; wê, wêt, hère, camêl, hêr, thêre; pine, pít, síre, sír, maríne; gô, pôt, or, wôrc, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, uníte, cûr, rûle, fûll; trý, Síryan. æ, œ = é. ey = ä. qu = kw.

án-gi-ō-carp-ī-an̄s, s. pl. [ANGIOCARPOUS.] Bot.: Mirr.'s second class of fruits. The fruit is sewed in envelope not forming part of the calyx. It is opposed to Gymnocarpians (q.v.). (Lindley: *Introd. to Bot.*, p. 232.)

án-gi-ō-carp-ōūs, a. [Gr. ἀγγεῖον (angēion) = a vessel, a pail, a receptacle; from ἄγγος (angōs) = a vessel, a jar, and κάρπός (karpōs) = fruit.] Bot.: With fruit seated in an envelope not constituting part of the calyx.

án-gi-ōg-rāph-ŷ, s. [In Fr. *angiographie*. From Gr. ἀγγεῖον (angēion) = a vessel (of the human body), and γραφή (graphē) = a drawing, a writing, a description.] Anat.: A description of the vessels of the human body, arteries, veins, lymphatics, &c.

án-gi-ōl-ō-ŷ, s. [In Fr. *angiologie*; Sp. & Port. *angiología*. From Gr. ἀγγεῖον (angēion) = a vessel, and λόγος (lógos) = a discourse.] Anat.: The science which treats of the arteries, veins, and other vessels in the human body.

án-gi-ō-mōn-ō-spērm-ōūs, a. [Gr. ἀγγεῖον (angēion) = a vessel; μόνος (monos) = alone; and σπέρμα (sperma) = seed.] Bot.: Producing one seed only, and that not naked, but in a seed-vessel.

án-gi-ōp-tēr-īs, s. [Gr. ἀγγεῖον (angēion) = a vessel; πτερίς (ptēris) = a kind of fern.] A genus of plants belonging to the alliance Filicales (Ferns), and the order Danaeaceae (Daneworts). The *A. erecta* is used with a fern of another genus in the South Sea Islands in preparing cocoa-nut oil. (Lindley: *Veget. Kingd.*, p. 79.)

án-gi-ō-scōpe, s. [Gr. ἀγγεῖον (angēion) = a vessel, and σκοπέω (skopēō) = to look at, to contemplate.] An instrument designed to be employed in the study of the capillary vessels of an organised body.

án-gi-ō-spērm, a. [Gr. ἀγγεῖον (angēion) = a vessel, and σπέρμα (sperma) = seed.] Bot.: A plant presenting the characters of Linnaeus's order Angiospermia (q.v.).

án-gi-ō-spērm-ī-a, s. pl. [Gr. ἀγγεῖον (angēion) = a vessel, and σπέρμα (sperma) = seed.] Bot.: In the artificial classification of Linnaeus the second order of the class Didynamia. It includes those didynamous plants which have their seeds inclosed in a seed-vessel, as contradistinguished from those in which they are apparently "naked." [GYMNOSPERMIA.] Most of the Scrophulariaceae and their immediate allies fall under this Linnaean order.

án-gi-ō-spērm-ōūs, a. [ANGIOSPERMIA.] Bot.: Having the seeds inclosed in a pericarp. It is opposed to Gymnospermous (q.v.). [ANGIOSPERMIA.]

án-gi-ōs-pōr-ōūs, a. [Gr. ἀγγεῖον (angēion) = a vessel, and σπόρος (sporos) = a seed, a spore; σπείρω (spēirō) = to sow.] Botany: Having the spores enclosed in a hollow shell or bag: e.g., Lycoperdon.

án-gi-ōt-ōm-ŷ, s. [In Fr. *angiotomie*; Sp. and Port. *angiotomia*. From Gr. ἀγγεῖον (angēion) = a vessel of the body, and τομή (tomos) = a cut, from τέμνω (temnō) = to cut.] Med.: The cutting open of a vein, an artery, or some other vessel of the body.

áng-lar-ite, a. [From Anglar, one of the places where it is found.] A mineral, a massive variety of Vivianite (q.v.).

án-gle (1), a. [A.S. *angel*, *angil*, *angl* = a hook, a fishing hook; Dan. *angel*; Dut. *hengel*.] A fishing rod, with its attached line and hook. "They take up all of them with the angle, they catch them in their net, and gather them in their drag." —*Hob. l. 15.*

áng-gle, v. i. & t. [From the substantive. In Dan. *angle*; Dut. *hengelen*; Ger. *angeln*.]

áng-rod, s. A fishing rod. "The second bigness is used for *áng-rod*." —*Bacon. Nat. Hist.*, Cent. vii., § 466.

áng-rod, v. i. & t. [From the substantive. In Dan. *angle*; Dut. *hengelen*; Ger. *angeln*.]

áng-rod, v. i. & t. [From the substantive. In Dan. *angle*; Dut. *hengelen*; Ger. *angeln*.]

áng-rod, v. i. & t. [From the substantive. In Dan. *angle*; Dut. *hengelen*; Ger. *angeln*.]

áng-rod, v. i. & t. [From the substantive. In Dan. *angle*; Dut. *hengelen*; Ger. *angeln*.]

A. Intransitive:

1. Lit.: To fish with a rod, line, and hook. "The ladies *angling* in the crystal lake, Feast on the waters with the prey they take." —*Walter*. "But *angled* in the higher pool." —*Tennyson: The Miller's Daughter*.

2. Fig.: To attempt to gain human hearts by the use of tempting bait of one kind or other. "She *angled* her distance, and did *angle* for me, Madding my easiness with her restraint." —*Shakesp.: All's Well that Ends Well*, v. 1.

† B. Transitive:

1. To fish for (as with rod and line). "If he spake courteously, he *angled* the people's hearts: if he were silent, he *mused* upon some dangerous plot." —*Sidney*.

2. To allure, to draw. "You have *angled* me on with much pleasure to the Hatch'd House." —*Walter: Compl. Angler*, ch. 1.

án-gle (2), a. [In Fr. *angle*; Sp. and Port. *angulo*; Ital. *angolo*; from Lat. *angulus* = an angle, a corner; Gr. ἄγκυλος (angkylos) = crooked. In Wel. *angle* is an angle. Cognate with A.S. *angel*, *angil* = a hook (see ANGLE, No. 1); Teut. *ang* or *eng* = a narrow strip.]

A. Ordinary Language: The opening between two lines which meet one another; a corner, as of a room. "For, where the rock and wall Met in an *angle*, hung a tiny roof." —*Wordsworth: Excursion*, bk. II.

B. Technically: The inclination of two lines to one another.

1. Geometry. Angles may be ranked under two leading divisions, *plane* and *solid* angles. A *plane* angle is the inclination of two lines to one another in a plane, which two lines meet together, but are not in the same straight line. [PLANE.] A *solid* angle is that which is made by the meeting in one point of more than two plane angles, which, however, are not in the same plane. [SOLID.] Each of the leading divisions, *plane* and *solid* angles, may again be subdivided into *rectilinear*, *curvilinear*, and *mixed* angles. A *plane rectilinear angle* is the inclination to each other of two straight lines, which meet together, but are not in the same straight line (Fig. 1). A *curvilinear angle* is the inclination to each other of two curved lines, which meet in a point (Fig. 2). A *mixed angle* is one formed by the meeting of a curve and a straight line (Fig. 3).

Angles are measured by arcs (Fig. 4, M, N, P, Q), and it is immaterial with what radius the latter are described. The result is generally stated in degrees, minutes, and seconds, ° ' " ; thus—36° 14' 23" = 36 degrees, 14 minutes, and 23 seconds. When an angle is isolated from other angles, it may be named by a single letter, as A (Figs. 1 to 4); but when two or more angles meet at one point they are named by three letters, never by one or two. In such cases the letter at that point is always named in the middle.

Thus, in Fig. 5 there are two angles, the first of which may be named indifferently B C A or A C B, but not B A C; and the second D C A or A C D, but not C A D. The point at which the lines forming the angle meet is called the *angular point*, or the *vertex* of the angle, and the lines themselves the *sides* or *legs* of the angle. In Figs. 1, 2, and 3, A is the angular point of the respective angles, the legs or sides being unlettered. In Fig. 5, c is the angular point, and b c, A c, and c d, or c b, c A, and D c are the sides or legs.

Plane rectilinear angles are generally divided into *right* and *oblique*, or into *right*, *obtuse*, and *acute*. When a straight line standing upon another straight line makes the two adjacent angles (those on the right and left of it) equal to one another, each of them is called a *right* angle. An *oblique* angle is one which is not a right angle. An *obtuse* angle is that which is greater than one right angle, but less than two. An *acute* angle is that which is less than a right angle: both

are oblique. The angles marked A in Figs. 1 and 4 are acute angles. In Fig. 5, if A c make the adjacent angles A c B and A c D equal to each other, then each of them is a right angle. In Fig. 6, A c D is an obtuse angle, and A c B an acute angle. Analogous terms exist in the case of curvilinear and mixed angles. Thus, in Figs. 2 and 3, A is an acute angle. A *spherical angle* is one formed by the intersection of the meeting of two great circles of a sphere. Many other designations are applied to angles; thus, in Geometry there are *opposite*, *exterior*, *interior*, *alternate*, *vertical*, and other angles, also angles of *contact*, &c. (See the italicised words.)

2. Mech. In this science there are angles of *direction*, of *friction*, of *repose*, &c.

3. Optics has angles of *incidence*, of *reflection*, of *refraction*, of *deviation*, of *polarisation*, &c.

4. Astronomy has angles of *position*, of *altitude*, of *elevation*, *inclination*, *depression*, &c. (For these see the italicised words with which angle is combined.)

5. Fortification. *Dead Angle*: An angle so formed that a small plot of ground in front of it can neither be seen nor defended from the parapet.

6. Anatomy. The *angle of the jaw* is the point at which the vertical hinder edge of the ramus, descending from the condyle, meets the horizontal inferior border. (*Flower: Osteol. of the Mammalia*, 1870, p. 122.)

7. Facial Angle. [FACIAL.]

angle-bar, s.

Joinery: A vertical bar at one of the angles of a polygonally-shaped window.

angle-bead, s. A bead of wood or other material affixed vertically to the exterior angle of a room or similar erection, and placed in the same plane with the plaster. It is called also *staff-bead*.

angle-brace, angle-tie, s.

Carpentry: A piece of timber affixed to two adjacent sides of a quadrangular frame, so as

ANGLE-BRACE.

to make, with the angle to which it is opposite, a right-angled triangle. If the wood join the two opposite angles of the rectangle, then it is called the *diagonal brace* or *tie*.

angle-bracket, s. A bracket placed at the point where two straight lines containing an angle meet, but not at right angles to either of those sides.

angle-capital, s.

Architecture: A term used in describing Ionic capitals. It signifies such a capital on the flank column of a portico, having the volutes placed at an angle of 45° with the plane of the front and returning friezes.

angle-float, s.

Plastering: A float made of any internal angle of a room. [FLOAT.]

angle-iron, s. Plates of iron, angular in form, used for the edges of any structure.

angle-modillion, s. [MODILLION.]

angle-rafter, s.

Architecture: A rafter placed along the angle of a hipped roof.

angle-shades, s. A fine British moth, *Phlogophora metulicosa*, the generic name, which means *bearing flame*, alluding to the shape of the markings on the anterior wings.

bōil, bōy; wōut, jōwī; cat, gell, chorus, chin, bench; go, gem; thin, thir; sin, a; expect, Xenophon, exist. -ing. -tion, -sion = shūn; -fion, -sion = zhūn. -tious, -sious = abūs. -cien = shōn, -cient = shēnt. -hle = bēl; -gle = gēl.

The insect has long, slender ciliated antennae, the abdomen tufted, and the wings dentate. The upper wings are pale rosy white, clouded with olive brown, each with a large triangular purplish mark in the centre, and beyond it a white band. The hinder wings are whitish, with a dusky central crescent, and two or three faint transverse-waved dusky lines. The expansion of the wings is nearly two inches. The caterpillar is green, with a row of oblong white spots on the back, and a continuous white line on each side. It feeds on culinary vegetables and various field plants. The moth is common in England, and is found also in Scotland; it is met with most plentifully in April, June, and September, there being apparently three broods in the season. (*Jardine: Naturalist's Library*, vol. xi., 235, 236.)

**angle-staff**, *s.* A vertical head of wood or other material affixed to the exterior angle of a building, in line with the plaster.

**angle-tie**, *s.* [ANGLE-BRACE.]

**Äng-gled**, *a.* [Eng. *angle* (2); -*ed*.] Furnished with angles. (Used chiefly in composition.)

"... fifty-angled custards."  
"... *E. Jonson: Masques, Nept. Triumph*.  
"The thrice three-angled beech-out shell."  
*Sp. Hall: Sat.* iii. 1.

**Äng-gle-mö-tör**, *s.* [Lat. *angulus*, and Gr. *metron* (*metron*) = a measure.] An instrument used by geologists to measure the dip of strata, the angle of joint-planes, &c. (*Brande*.)

**Äng-lör**, *s.* [Eng. *angle*; -*er*. In Ger. *angler*; Dut. *hengelaar*.]

1. *Gen.*: One who angles; one who fishes with a rod.

"Five or six years after the Revolution, an indefatigable angler published an account of Scotland."—*Macaulay: Hist. of Eng.*, ch. xiii.

2. *Spec.*: A fish called also Sea-Devil, Frog, or Frog-fish; and in Scotland, Wide-gab, signifying wide month. It is the *Lophius piscatorius* of Linnaeus, and is placed under the order Acanthopterygii, and the family which has the pectoral fins feet-like. It has an enormous head, on which are placed two elongated ap-

THE ANGLER-FISH.

pendages or filaments, the first of them broad and flattened at the end. These, being movable, are manœuvred as if they were bait; and when small fishes approach to examine them, the angler, hidden amid mud and sand, which it has stirred up by means of its pectoral and ventral fins, seizes them at once; hence its name. It occurs along the British coasts, and is three, or occasionally five feet long. (*Yarrell: Brit. Fishes*.)

**Äng-gle-sey Mör-ris**, *s.* [From *Anglesey*, or *Anglesea*, the island, and Mr. William Morris, its discoverer.] The name given by Pennant to a supposed distinct genus and species, *Leptocephalus morrisii*, of the family Muræidae, or Eels. This form is now known to be only an arrested stage in the development of the conger-eel.

**Äng-lös-ite**, *s.* [Named from the isle of Anglesea, in which it was first found.] A mineral classed by Dana under the Celestite group of Anhydrous Sulphates, Chromates, and Tellurates. Anglesite has been called also "Lead mineralised by vitriolic acid and iron," "Lead Vitriol," and "Sulphate of Lead." It is orthorhombic. The hardness is 2.75–3; the sp. gr. 6.12 to 6.39. The lustre is resinous, vitreous, or adamantine; the colour white, tinged with yellow, gray, green, or hinc. Anglesite varies from transparent to opaque. It is very brittle. The composition is sulphuric acid, 26.4; oxide of lead, 73.6 = 100. In addition to Anglesea, it is found in Cornwall, Derbyshire, Cumberland, in Scotland at Leadhills, in Australia, America, and elsewhere. A variety of it is called Sardinian (*q.v.*).

**Cupreous Anglesite**: A mineral, the same as LINARITE (*q.v.*).

**Äng-lj-cän**, † **Äng-lj-c**, *a. & s.* [In Dat. *Anglicanisch*; Ger. *Anglicaner* (*s.*); Fr. *Anglican*; Sp., Port., & Ital. *Anglicano*; Lat. *Anglicanus*. From *Anglia*, a Latin name of Britain, which at a yet unascertained date superseded that of *Britannia*, which had been formerly employed. The Lat. *Anglia* is from A.S. or O.S. *Anglen*, now *Angeln*, a district in the south-east of Schleswig, extending from the river Schiel, in the south, to the Fleusburg Hills on the north, with an area of about 330 square miles, and a population at present amounting to about 60,000. *Angeln* comes from A.S. *ange*, *enge* = narrow.]

**A.** *As adjective*:

1. Pertaining to England; English.

"... the sober principles and old establishment of the Anglican church."—*Fell: Life of Hammond*, §1.

2. Pertaining to one holding the religious views described under B., 1 or 2. *Spec.*, pertaining to one holding high church views or to high churchism.

**B.** *As substantive*:

1. In the sixteenth century: One who held Roman Catholic doctrine, but preferred the rule of the English king or parliament to that of the Papacy.

"Secondly" [the reference is to A.D. 1589], "there were the *Anglicans*, strictly orthodox in the speculative system of the faith, content to separate from Rome, but only that they might bear Italian fruit more profusely and luxuriantly when rooted in their own soil."—*Froude: Hist. Eng.*, pt. i., vol. iii., ch. xvi.

2. *Now*:

(a) A member of the Church of England belonging to the High Church party.

(b) An English churchman, whether high, low, or broad.

"The old persecutors, whether Pagan or Christian, whether Arian or Orthodox, whether Catholics, *Anglicans*, or Calvinists, actually were, or at least they had the decorum to pretend to be, strong Dogmatists."—*Burke: Letter to E. Burke*.

**Äng-lj-cän-ism**, *s.* [Eng. *Anglican*; -*ism*. In Fr. *Anglicanisme*.]

1. The Anglican system of doctrine or adherence to it.

2. Admiration of England leading to efforts to copy its institutions.

**Äng-lj-cö**, *adv.* [Lat.]

1. In English. (Used of language or idiom.)

2. After the manner of the English. (Used of manners or customs.)

¶ This word is frequently written thus—*Anglice*.

**Äng-lj-qi-fy**, *v.t.* [*Anglicet*, genit. sing. of nomin. pl. of Lat. *Anglicus*; suff. -*fy*, from *facio* = to make.] To make English; to Anglicise.

**Äng-lj-qi-sm**, *s.* [In Ger. *Anglicism*; Fr. *anglicisme*; Port. & Ital. *Anglicismo*.] The English idiom, such as Englishmen are almost sure to introduce when they attempt to speak or write an ancient classic or a modern Continental tongue.

"They corrupt their style with untutored *Anglicisms*."—*Milton*.

**Äng-lj-qi-ze**, *v.t.* [Eng. *Anglic*; -*ize*. In Ger. *Anglicisiren*.] To make English; to assimilate to the English language in idiom, or to the English people in pronunciation, manners, customs, or sympathy.

"He [the letter U] pleaded, that the same place and powers, which X had in the Greek language, he stood fully entitled to in the English; and that therefore of right he ought to be possessed of the place of Y even in all Greek words *Anglicised*, as system, hypocrite, &c."—*Edwards: Can. Crit.*, p. 375.

"The glaring affectation of *Anglicising* Latin words."—*Warton: Hist. Eng. Poetry*, li. 292.

**Äng-lj-qi-zed**, *pa. par. & a.* [ANGLICIZE.]

**Äng-lj-qi-zing**, *pr. par.* [ANGLICIZE.]

**Äng-lj-cüs sü-dör**, *s.* [Lat. = the English sweat; the English perspiration.]

*Med.*: A term applied to the sweating sickness of the Middle Ages. [SWEATING SICKNESS.]

**Äng-lj-fic-ä-tion**, *s.* [Lat. *Anglus* = English; *facio* = to make.] The act or process of rendering English.

**Äng-lj-fied**, *pa. par. & a.* [ANGLIFY.]

**Äng-lj-fy**, *v.t.* [Lat. *Anglus* = English; -*fy*, from Lat. *facio* = to make.] To make English. It is used (1) of people who, born in another country than England, yet settle here, or copy English manners, or approximate more or less to a correct English pronunciation. It may be also employed of a place thronged by English, or modified in the direction of English manners by an influx of tourists or settlers from this country.

"... indeed, I should think that Calais or Boulogne was much more *Anglicised*."—*Darwin: Voyage round the World*, ch. xxi.

(2) Of an English idiom occurring in speech or composition in another language.

**Äng-lj-fy-ing**, *pr. par.* [ANGLIFY.]

**Äng-lj-ing**, *pr. par., a., & s.* [ANGLIE, *v.*]

**A.** *As present participle*: In senses corresponding to those of the verb.

**B.** *As adjective*:

1. Fishing with an angle.

2. Designed to be used in fishing.

**C.** *As substantive*: Fishing with a rod and tackle. This may be done at the bottom of the water, midway between the bottom and the surface, or with the fly on the surface itself.

"Then did Decealion first the art invent Of *angling*."—*Davors: Secrets of Angling*, b. 1.

**angling-rod**, *s.* A fishing-rod.

**Äng-lize**, *v.t.* [ANGLICIZE.]

**Äng-glö**, *In compos.* = English, but properly implying that the word combined with it is the more emphatic one, though this rule is not always observed. Among the numerous compounds which it forms are the following:—

**Anglo-American**, *a. & s.*  
**A.** *As adj.*: Pertaining to an American, whose more or less remote ancestors were English.  
**B.** *As subst.*: An American more or less remotely of English descent.

**Anglo-Catholic**, *a. & s.*  
**A.** *As adj.*: Regarded as being at once English and Catholic.  
**B.** *As substantive*:

1. In the sixteenth century: An Englishman who, though a Roman Catholic, leaned more to his country than to the Papacy.

"... and the *Anglo-Catholics* did not intend to repeat the blunder of showing a leaning towards the Romanists."—*Froude: Hist. Eng.*, ch. xvii., vol. iii., p. 617.

2. *Now*: A member of the English Church who contends for its Catholic character.

*Anglo-Catholic Church*: Any church modelled on the English Reformation. (*Hook*.)

**Anglo-Danish**, *a.* Pertaining at once to the Danes and the English.

"His excellent and large collection of Anglo-Saxon and Anglo-Danish coins."—*Wotton: View of Bickel's Treasury*, p. 82.

**Anglo-German**, *a.* Pertaining at once to the Germans and the English.

"... if the *Anglo-German* league assumed an organised form."—*Froude: Hist. Eng.*, pt. 1., vol. iii., ch. xvii.

**Anglo-Imperial**, *a.* Pertaining at once to an empire (not the British one), and to England or the English.

"... would put a final end to *Anglo-Imperial* trifling."—*Froude: Hist. of England*, pt. 1., vol. iii., ch. xvii.

**Anglo-Indian**, *a. & s.*

**A.** *As adj.*: Pertaining at once to India and to England.

"Every *Anglo-Indian* official . . ."—*Times of India*, July 19, 1878.

**B.** *As subst.*: A native of England or of the British Isles resident in India.

"There is no doubt of its permanent popularity among *Anglo-Indians*."—*Times of India*, July 19, 1878.

**Anglo-Irish**, *a. & s.*

**A.** *As adj.*: Pertaining at once to the Irish and the English, or to one who has relations with both.

**B.** *As subst.*: A settler in Ireland, who was of English origin, and, unlike the native Irish, was regarded as within the "Pale."

"The *Anglo-Irish* of the Pale and the Coists of the provinces."—*Froude: Hist. Eng.*, pt. 1., ch. xviii., vol. iv.

**Anglo-mania**. [ANGLOMANIA.]

**Mite**, **fät**, **färe**, amidst, **whät**, **fäll**, father; **wē**, **wēt**, here, camel, **hēr**, there; **pine**, **pit**, sire, sir, marine; **gō**, **pōt**, or, **wöre**, **wölf**, **wörk**, **whō**, **sōn**; **müte**, **cüb**, **cüre**, unite, **cür**, **räic**, **fäll**; **try**, **Syrian**. **æ**, **œ** = **ē**. **ey** = **ä**. **qu** = **kw**.

Anglo-Norman, a. & s.
A. As adj.: Pertaining to the Anglo-Norman.

Unable to encounter the shock of the Anglo-Norman cavalry.—Scott: The Norman Horse-Shoe. (Note)
B. As substantives: A Norman, and yet an Englishman. (Used specially of the Normans who came over with William the Conqueror, and, not returning to the Continent, became, and still are, an important element in the composite English nation.)

Anglo-Saxon, a. & s.

A. As adjective:
1. Pertaining to the Anglo-Saxons.

"Anglo-Saxon monasteries."—Macaulay: Hist. Eng., ch. 1.
2. Pertaining to the Anglo-Saxon tongue.

"It is estimated that in English there are about 35,000 words. Of these, 25,000, or more than two-thirds, are of Anglo-Saxon origin."—Bosworth: Anglo-Saxon and Eng. Dict. (pref.)

B. As substantive:

1. One of the Anglo-Saxon races—that is, of the mingled Anglo-Saxons and other Teutonic tribes from whom the English, the Lowland Scotch, a great proportion of the present inhabitants of Ulster, and the mass of the population in the United States and various British colonies sprung.

"Thus it appears that one Jute, three Saxon, and four Angle, altogether eight kindreds, were established in Britain by the year 566, and that the Angles and Saxons bore the leading and chief part in the expeditions; they, therefore, when settled in this country, were collectively called 'Anglo-Saxons.'"—Bosworth: Anglo-Saxon and Eng. Dict. (pref.)

2. The language originally spoken by the race or races mentioned under No. 1.

"Anglo-Saxon, that is Angle, Engle, or English Saxon, is the language of the Platt, Low, Flat, or North part of Germany, brought into this country by the Jutes, the Angles, and Saxons, and modified and written in England. Those who remained in their old locality on the Continent had the name of Old Saxons, and their language Old Saxon; but those settled in Britain were properly designated Anglo-Saxons, and their language, perfected and written in England, was called Anglo-Saxon."—Bosworth: Anglo-Saxon and Eng. Dict. (pref.)

¶ The Anglo-Saxon tongue did not pass directly into the English. The Norman conquest, as was inevitable, introduced a new element into the language, and produced temporary confusion. When this began to pass away, and it became evident that the tongue of the conquered rather than that of the conquerors was destined ultimately to prevail, it was not the old Anglo-Saxon pure and simple which remained. There came in place of it various dialects, especially a Midland, a Northern, and a Southern one. It was a mixed dialect, mainly Midland, but also slightly Southern, which with Chaucer, in the fourteenth century, became the standard language; and at last, by a series of insensible changes, developed into the modern English tongue. [ENGLISH.] (See the several volumes published by the Early English Text Society.)

Anglo-Saxonism, s. [A word or idiom belonging to or borrowed from the Anglo-Saxon tongue.]

Anglō-mā-nī-a, s. [In Fr. anglomania; Port. anglomania.] A passion on the part of a person or persons belonging to another country to imitate whatever is English. Such a tendency manifested itself in Germany in the seventeenth century, and it has sometimes appeared, though to a less extent, in France.

Anglō-mā-nī-āc, s. [ANGLOMANIA.] One possessed by Anglomania (q.v.).

Anglō-phō-bī-a, s. Hatred, fear or dislike of England or of whatever is English.

Anglō-phob'e, s. One affected with Anglo-phobia.

Angō-la, s. The native name of a country on the west coast of Africa, between lat. 8° 20' and 9° 20' S.

Angola-pea, s. A papilionaceous plant, belonging to the genus Cajanus (q.v.). It is called also Pigeon Pea.

Angōn, s. [In Fr. angon.] A barbed spear used by the Anglo-Saxons, the Franks, and many other Teutonic nations.

Angōr, s. [Lat. = (1) a compression of the neck, suffocation, the quinsy; (2) anguish, torment, vexation; from angō = to suffocate, to strangle.]

1. Pain.

2. Anxiety and constriction in the pre-cordial region. (Mays.)

\* Angor Pectoris. [Lat. = intense pain in the breast.] The name used by Franche, in 1813, for the disease called Angina pectoris. [ANGINA.]

Angōr-s, s. [The name of a vilayet in Asiatic Turkey.] A stuff made from the wool of the Angora-goat.

Angora-goat, s. A goat reared in the vilayet of Angora, famed for its wool.

Angōs-tūr-a, Angūs-tūr-a, s. [The old name of a city in Venezuela, in South America, now called Ciudad-Bolívar.]

Angostura bark: A bark, very valuable as a febrifuge, in possession of the Capuchin friars belonging to the missions on the river Carony, in South America. It is a Rutaceous plant of the genus Galipes, but whether it is the G. cusparia (Bonplandia trifoliata), or the G. officinalis, has not yet been completely determined. (Lindley: Veg. Kings., p. 471.) In Loudon's Encyclopædia of Plants it is said to be the Cusparia febrifuga.

Angōs-tūr-in, s. [ANOSTURA.] A principle extracted from the Angostura bark.

Ang-red (red as ērd), pa. par. [ANGERED.]

Ang-rī-lý, adv. [Eng. angry; -ly.] In an angry manner; under the influence of anger.

"Let me not angrily declare  
No pain was ever sharp like mine."  
Cowper: Olney Hymns, xlid., Prayer for Patience.

Ang-rý, \* an-grē, a. [From Eng. anger; -y.]

A. Ordinary Language:

\* I. Of things inanimate: Bitter.

"The clay that elenges ther-y ar coryes strong.  
As alum and alkanar, that angre arn bothe."  
Alliterative Poems; Cleanesse (ed. Morris), 1,084-5.

II. Of the body: Inflamed, painful. (Used of a wound or sore.)

III. Of the mind or heart.

1. Temporarily under the emotion of anger.

(a) Followed generally by with of the person regarded with anger.

"... Now therefore be not grieved nor angry with yourselves that ye said me hither."—Gen. xiv. 5.

(b) \* Formerly it was occasionally followed by at of the person.

"... are ye angry at me because I have made a man every whit whole on the sabbath day?"—John vii. 23.

(c) Followed by at or for of the thing exciting anger.

"... wherefore should God be angry at thy voice."  
"... wherefore then be ye angry for this matter?"—2 Sam. xix. 42.

¶ It may be used of the inferior animals; and (with the inappropriateness of all human language employed of the Divine Being) of God.

"An angry Waspe th' one in a vial had."  
Spenser: F. Q., III. xii. 18.

"And the Lord was angry with Solomon, because his heart was turned from the Lord God of Israel, which had appeared unto him twice."—1 Kings xi. 9.

2. Habitually under the dominion of anger.

"It is better to dwell in the wilderness than with a contentious and an angry woman."—Prov. xxi. 19.

3. Exhibiting the marks of anger, proceeding from anger, sounding angrily.

"The north wind drieth away rain; so doth an angry countenance a backbiting tongue."—Prov. xxv. 23.

¶ Sometimes the term angry is applied to a whole group of passions, in place of a single emotion or its manifestations.

"He had always been more than sufficiently prone to the angry passions."—Macaulay: Hist. Eng., ch. vii.

4. Fig.: Of such a character, that if it proceeded from a being capable of emotion, it would be regarded as a manifestation of anger.

"So that wildest of waves in their angriest mood,  
Scarcely break on the bounds of the land for a rood."  
Byron: The Siege of Corinth, ver. 13.

B. Technically:

Hist.: Angry boys was the designation assumed by gangs of uproarious youths, who rendered the London streets unsafe during the Elizabethan age, like the Mohawks of a subsequent time. (See Nares' Gloss.: Boys.)

"Get thee another oose, that will be pulled Off, by the angry boys, for thy conversion."  
Beaumont and Fletcher: Scornful Lady, iv. 1.

Ang-sa-na, Ang-sa-va, s. [Name given in some Indian languages.] A red gum resembling that called dragon's blood. It is brought from the East Indies.]

Ang-u, s. [West Indian name.] Bread made from the Cassava (Jatropha manihot), a Euphorbiaceous plant growing in the West Indies.

Ang-gui-fer, s. [Lat. anguifer; from anguis = a snake, and fero = to bear.]

Astron.: Another name for the northern constellation Ophiuchus, which has been called also Serpentarius.

Ang-guil-la, s. [Lat. = an eel. In Fr. anguille; Sp. anguila; Ital. anguilla.] A genus of fishes of the order Apodalmalacopterygii, and the family Muraenidae (Eels). At least three species occur in the British fauna—A. acutirostris (Yarrell), the Sharp-nosed Eel; A. latirostris (Yarrell), the Broad-nosed Eel; and A. mediotrostris (Yarrell), the Snig. [EEL.]

Ang-guil-li-form, a. [Lat. anguilla = an eel; and forma = form, shape.] Eel-shaped. (Todd's Johnson.)

Ang-guil-li-form-ēs, s. pl. [From Lat. anguis = a snake, and forma = form.] According to Cuvier, the only family of fishes included under the order Malacopterygii Apodes. It is now more commonly called Muraenidae.

Ang-guil-ly-la, s. [Dimin. of Lat. anguilla = an eel.] The typical genus of the family Anguillulidae (q.v.). The "eels" in vinegar are A. aceti; the similar animals in blighted wheat, A. tritici; and those in sour paste, A. glutinosus.

Ang-guil-lū-li-dæ, s. pl. [From the typical genus Anguillula.]

Zool.: A family of annulose animals belonging to the class Nematelmia, and the order Nematodea. It consists of non-parasitic nematoid worms, and nearly corresponds to Dujardin's family of Enopliidae. Typical genus, Anguillula (q.v.).

Ang-guin-ār-ī-a, s. [From Lat. anguineus = pertaining to a snake.] A genus of Zoophytes belonging to the family Eucratida. There is a British species, the A. spatulata. (Johnston's British Zoophytes, 1847.)

Ang-guine, a. [Lat. anguinus, from anguis = a snake.] Pertaining to the genus Anguis, or to snakes in general.

Anguine Lizard (Chamaesaura anguina): A lizard with four rudimentary feet. It is very snake-like. It inhabits the Cape of Good Hope.

Ang-guin-ē-al, a. [Lat. anguineus.] Pertaining to a snake, snake; resembling a snake.

Ang-guin-ī-dæ, s. pl. [ANGUINÆ.] A family of serpent-like lizards. Typical genus, Anguis. It is sometimes reduced to a sub-family, Anguinæ, or made altogether to disappear in the family Scincidae.

Ang-guin-ī-næ, s. pl. [ANGUINIDÆ.]

Ang-guis, s. [Lat. anguis = a snake.] A genus of lizards of the family Scincidae. It contains the Anguis fragilis, or Slow-worm, which is so snake-like, from its being entirely destitute of limbs, that until lately it was ranked with the Ophidians. Though called the Blind-worm, it is not blind, but has perfectly visible though small eyes. The popular belief that it is venomous is quite erroneous.

Ang-guish, \* Ang-guých, s. [A.S. ange = vexation, trouble, sorrow, affliction, anguish; ange = vexed, troubled, sorrowful, troublesome, vexatious; angsum = difficult, narrow. In Sw. ångslän, ångest; Dan. ångest, ångste; Dut. & Ger. angst, angüste; Sp. ansia, angustia; Port. angustia; Ital. angoscia, angosciamiento = anguish, vexation; angustia = distress, scarcity. From Lat. angustus = a strait, a defile, generally in the plur., angustie = straits; angustus = narrow; angō = to press tight. (ANGEN.) Properly, such present fear and anxiety for the immediate future as arise when one has got squeezed into too narrow a place and cannot extricate himself.]

1. Excessive pain or distress.

(a) Excessive pain of body.

"... the anguish as of her that bringeth forth her first child."  
—Jer. lv. 51.

(b) Excessive distress of mind.

"For when threescore of anguish, wats hid in my sawle."  
Alliterative Poems; Patience (ed. Morris), 925.

"... we saw the anguish of his soul when he besought us, and we would not hear."—Gen. xlii. 21.

2. The expression in the countenance of intense bodily pain or mental distress.

"She spoke: and, furious, with distracted pace,  
Fears in her heart and anguish in her face,  
Flies through the dome (the maids her steps pursue),  
And mounts the walls."  
*Pope: Homer's Iliad, bk. xxii, 492-505.*

3. Anything fitted to excite intense bodily pain or mental distress.

"Seeing myself engaged, yea and engulfed in so many anguishes and perplexities."—*Trans. of Boccazzini (1626), p. 57.*

\* **ân-guish**, *v. t.* [From the substantive.] To cause anguish to; to inflict excessive bodily pain or mental distress on.

"Socrates was seen and observed to be much anguished, grieved, and perplexed; still seeming to feel some grief of mind."—*Trans. of Boccazzini (1626), p. 108.*

**ân-guished**, *pa. par. & a.* [ANGLISH, *v.*]

"A strong emotion shakes my anguished breast."  
*Pope: Homer's Odyssey, bk. xix, 42.*

**ân-g-u-lar**, *a.* [In Fr. *angulaire*; Sp. & Port. *angular*; Ital. *angolare*. From Lat. *angularis* = having angles or corners; *angulus* = a corner, an angle.]

**A. Ordinary Language:**

1. *Lit.*: Having angles or corners, cornered; so shaped as that the sides are united to each other by angles; containing an angle; aiding to constitute an angle; situated at the point where an angle is formed.

"As for the figure of crystal, it is for the most part hexagonal or six-cornered, being built upon a confused matter; from whence, as it were from a rock, angular figures arise, even as in the amethyst and basaltic."—*Brown: Vulgar Errors.*

[See also B., I, 1, &c.]

2. *Fig. Of persons*: Too little disposed to make concessions to others, and therefore exciting or tending to excite opposition to itself which a more conciliatory course of conduct would have prevented from arising.

**B. Technically:**

**I. Mathematics:**

1. The *angular point* in an angle is that at which the two lines inclined to each other meet. (Used also in natural philosophy and other sciences.)

"The distance of the edges of the knives from one another, at the distance of four inches from the angular point where the edges of the knives meet, was the eighth part of an inch."—*Newton: Opticks.*

2. *Angular section* is the section or division of an angle into any number of equal parts.

*Angular sections*: The branch of mathematical analysis which investigates the properties of circular functions.

**II. Mechanics:**

1. *Angular motion* is the motion of any body around a fixed point, whether it revolves like a planet or vibrates backwards or forwards like a pendulum.

*Angle of angular motion* or *Angle of rotation*: The angle made by the two directions before and after the turning of a line perpendicular to an axis. (See III. I.)

2. *Angular velocity* is the absolute velocity of a body moving round a fixed axis at a certain unit of distance. (See III. 2.)

**III. Astronomy:**

1. *Angular intervals*: Area of the equator intercepted between circles of declination passing through the heavenly bodies observed.

2. *Angular motion*:

(a) *Angular motion of the sun* is a calculated movement of the luminary through space, which in 1783 made Sir William Herschel propound the hypothesis that the luminary was in progress towards the star  $\lambda$  Herculis.

(b) The *angular motion of the stars* is a minute deviation from their relative places of several "fixed" stars, as the two stars of 61 Cygni,  $\epsilon$  Indi,  $\mu$  Cassiopeæ, and many others. (Herschel: *Astron.*, §§ 852-4.)

3. *Angular velocity*. The *angular velocity of the sun's apparent motion* is in the inverse proportion of the square of the distance: thus, to compare the daily motion of the sun in longitude at one point, A, of its path, and at another B, the formula used is: The square of the line connecting the earth and sun, when the latter is at B, is to the square of that connecting them when he is at A, as the daily motion at A is to the daily motion at B. (Herschel: *Astron.*, § 850.)

¶ The expression is used in a similar sense of the planets.

IV. *Perspective*: A kind of perspective in which the two sides of the leading object represented are not parallel to the plane of the picture, and in which, therefore, the horizontal

lines are so drawn as to meet each other at a vanishing point. It is called also *oblique perspective*.

**V. Anatomy:**

1. *Angular Artery*: The terminal part of the facial artery, which insinuates at the inner side of the orbit with a terminal branch of the ophthalmic artery. (Quain: *Anat.*, 1876, vol. I., p. 865.)

2. *Angular vein*: The vein formed by the junction of the supra-orbital and frontal veins. It is perceptible beneath the skin, as it runs obliquely downwards, near the inner margin of the orbit, resting against the side of the nose at its root. (*Ibid.*, p. 476.)

**VI. Botany:**

1. *Of the general form*: Having projecting longitudinal angles. (Sometimes the terms "acute angled" and "obtuse angled" are used.)

2. *Spec. Of the margin of a leaf or other organ*: Having several salient angles on the margin, as the leaf of *Datura stramonium*. (Lindley.)

**ân-g-u-lâr-i-tÿ**, *s.* [From Lat. *angularis* = having angles.] The quality of being angular, i. e., having corners. The *Glossographia Nova* defines it: "Squareness; also an s bounding in nooks and corners."

"What body ever yet could figure show  
Perfectly perfect, as rotundity  
Exactly round, or blamless angularity?"  
*Shelton: Song of the Soul, III. II. 88.*

**ân-g-u-lâr-ly**, *adv.* [Eng. *angular*; *ly*.] In an angular manner; with angles, with corners.

"... a labyrinthine face, now angularly, now circularly, every way aspected."—*B. Jonson: Cynthia's Revels.*

"Another part of the same solution afforded us an ice angularly figured."—*Boyle.*

† **ân-g-u-lâr-nêss**, *s.* [Eng. *angular*; *-ness*.] The quality of being angular; angularity. (Johnson's *Dict.*)

**ân-g-u-lâte**, **ân-g-u-lâ-têd**, *a.* [Lat. *angulatus*, from *angulo* = to make angular, *angulus* = an angle.] Angular; having angles.

"Topazes, amethysts, or emeralds, which grow in the fountains, are ordinarily crystallized or shot into angular figures; whereas in the strata, they are found in rude lumps like yellow, purple, and green pebbles."—*Woodward.*

**ân-g-u-lô**, *in compos.* Having an angle.

**angulo-dentate**, *a.*

*Botany*: Angular and toothed, angularly toothed. (Loudon: *Cyclo. of Plants*, 1829, Gloss.)

† **ân-g-u-lôm-ê-t-êr**, *s.* [Lat. *angulus* = an angle, and Gr. *μετρον* (*metron*) = measure.] An instrument for measuring angles. The more common term is ANGLEMETER, and in the case of crystals, in mineralogy, GONIOMETER is employed. [See these words.]

**ân-g-u-lôs-i-tÿ**, *s.* [From Lat. *angulosus* = full of corners.] Nearly the same as *angularity*; but perhaps, as its etymology suggests, a stronger word. (Johnson's *Dict.*)

\* **ân-g-u-lôus**, *a.* [In Fr. *anguleux*.] Angular, hooked.

"Nor can it be a difference, that the parts of solid bodies are held together by hooks and *angulous* involutions, since the coherence of the parts of these will be of as difficult a conception."—*Gianvitta.*

\* **ân-gûst**, *a.* [In Ital. *angusto*; Lat. *angustus*, from *ango* = to press tightly.] Narrow, strait, contracted. (Glossogr. *Nov.*, 2nd ed., 1719.)

**ân-gûs-tâte**, *a.* [Lat. *angustatus*, *pa. par.* of *angusto* = to make narrow.]

*Botany, &c.*: Narrow at the base, but dilated above.

**ân-gûs-tâ-tion**, *s.* [From Lat. *angustus* = narrow.] The act of making narrow, the state of being made narrow; straitening.

"The cause may be referred either to the grumousness of the blood, or to obstruction of the vein somewhere in its passage, by some *angustation* upon it by part of the tumour."—*Wisseron.*

**ân-gûs-ti-clâve**, *a.* [In Fr. *angusticlave*; Lat. *angusticlavius*, from *angustus* = narrow, and *clavus* = a nail, . . . a purple stripe on the tunic.]

*In old Rome*: Wearing a narrow purple stripe on the tunic. This was done by the Equites, or Knights, and by the plebeian tribunes, whilst the senators had a broad purple stripe.

**ân-gûs-ti-fô-lî-âte**, **ân-gûst-i-fô-lî-ôus**, *a.* [From Lat. *angustus* = narrow, and *folium* = a leaf.]

*Bot.*: Having the leaves narrow.

**ân-gûs-tûr-a**, *s.* [ANOSTURA.]

\* **ân-hâng**, *v. t.* [A. S. *hangian* = to hang.] To hang up; to hang.

"The remnant were *anhanged*, more and less, That were consented to this cursedness."  
*Chaucer: C. T.*, 13, 690, 13, 691.

\* **ân-hânged**, *pa. par.* [ANHANG.]

**ân-har-môn-ic**, *a.* [In Fr. *anharmonique*; Gr. *ân*, priv., and *ἀρμόνιος* (*harmonios*) = producing harmony.] Not harmonic. [HARMONIC.]

**anharmonic ratio or proportion**, *s.*  
*Geom.*: The term used by Prof. Charles, when four points, a, b, c, d, being in a straight line, the ratio or proportion is  $\frac{ac}{ad} = \frac{bc}{bd}$ . Or when A, B, C, D meeting in the same point,  $\sin(A:C) = \sin(B:C)$  [HARMONIC.] (Chastel: *Géométrie Supérieure*, 1852, p. xix.)

**ân-hê-ale**, *v. i.* [Lat. *anhelo*.] To pant. (Latimer: *Works*, I. 51.)

**ân-hê-lâ-tion**, *s.* [Lat. *anhelatio* = difficulty of breathing, panting, from *anhelo* = to pant; *halo* = (1) to breathe, (2) to exhale.] The act of panting; the state of being short of breath, difficult respiration.

"Those unknown tendencies and *anhelations* of divine souls after the adorable object of their love."—*Giamli: Serm.* (1851), p. 313.

**ân-hê-lô-gê**, *a.* [In Sw. *aandelos*. From Lat. *anhelus* = (1) panting; (2) causing shortness of breath.] Out of breath, panting. (Johnson.)

**ân-him-a**, *s.* [Brazilian name.] The name of a bird, the Horned Screamer (*Palamedea cornuta*, Linn.). It is a wading bird, and

THE ANHIMA (PALAMEDEA CORNUTA).

the type of the family Palamedeidae of Mr. G. R. Gray. It is blackish, with a red spot on the shoulder. The top of the head bears a long, horny, slender, and mobile stem, and the wing is armed with two triangular spurs. It lives in the marshy parts of South America, and has a powerful voice, heard at a great distance. The sexes manifest much fidelity to each other.

† **ân-hûn-grÿ**, *a.* [A-HUNGRY.] Hungry. (Shakesp.: *Coriolanus*, I. 1.)

\* **ân-hÿ**, *adv.* [Old Eng. *an = on*; *hÿ = high*.] On high.

"... beseechth god *ân-hÿ*."  
*Romans of Parthenay* (ed. Ekert), 2, 701.

**ân-hÿ-drîde**, *s.* [From Gr. *ἀνύδρια* (*anudria*) = want of water; *ἀνύδρος* (*anudros*) = wanting water; *ân* (*ân*), priv., and *ὑδρῶν* (*hudrôn*) = water.] An anhydride or an anhydrous acid is a chemical substance formed by the substitution of an acid radical for the whole of the hydrogen in one or two molecules of water. (Trahan: *Chem.*, 2nd ed., vol. II., p. 542.) By the action of water they are converted into acids. Anhydrides do not act on litmus or other vegetable colours.

**ân-hÿ-drite**, *s.* [Io Ger. *anhÿrit*; Gr. *ἀνύδρος* (*anudros*) = without water; referring to the fact that it contains no water of crystallization.]

*Min.*: A mineral classed by Dana under his Celestite group. Its crystals are orthorhombic

**âte**, **fât**, **fâre**, **amidst**, **whât**, **fâll**, **father**; **wê**, **wêt**, **hêre**, **camêl**, **hêr**, **thêre**; **pine**, **pît**, **sîre**, **sîr**, **marine**; **gô**, **pôt**.  
**er**, **wôre**, **wôlf**, **wôrk**, **whôl**, **sôn**; **mûte**, **cûb**, **cûre**, **unite**, **cûr**, **rûle**, **fûll**; **trÿ**, **Sÿrian**. **æ**, **œ** = **ê**. **ey** = **a**. **gu** = **gw**.

The hardness is 3-3.5; the sp. gr. 2.899-2.983; the lustre vitreous, or somewhat pearly; the colour white, or brick-red. Composition: Sulphuric acid, 55-60 to 59.78; lime, 40.21 to 43.06, with smaller portions of silica, sesquioxide of iron, and water. It is altered, by the absorption of moisture, into gypsum. It is divided by Dana into Var. 1. Ordinary. (a) Crystalline; (b) Fibrous; (c) Fine granular; (d) Scaly granular, under which is ranked Vulpinite (q.v.). Var. 2. Pseudomorphous. It occurs in various parts of the Continent, and in North America.

an-ll-me, s. [from anil (q.v.)] = amido-benzene = amido-benzol = phenylamine =

Chem.: Aniline was first obtained by distilling indigo with caustic potash. It occurs in the heavy oils from coal-tar. It is prepared from benzene, C6H6, which is converted into nitrobenzene, C6H5(NO2), by the action of strong nitric acid. The nitrobenzene is reduced to aniline by the action of acetic acid and iron filings, or by sulphide of ammonium. Aniline is the basis of most of the coal-tar colours. It is an oily, colourless, refractive, volatile liquid, boiling at 182°. Its sp. gr. at 0° is 1.036. It solidifies at -8° to a crystalline mass; when exposed to the air and light, it becomes brown. It is nearly insoluble in water, but dissolves in ether, alcohol, and benzene. It forms crystalline salts with acids. It does not turn red litmus paper blue. A slight trace of aniline gives a deep purple colour with a solution of bleaching powder. Aniline combines with the iodides of alcohol radicals like amines. The atoms of H united to N in aniline can be replaced by alcohol radicals, as ethyl aniline—

The H in the benzol ring (C6H6) can also be replaced by radicals forming substitution compounds of aniline, of which, when one atom of H is replaced by an atom of Cl or a radical, there can be always three modifications: thus, three modifications of nitro-aniline (C6H4(NO2)(NH2)) and bromaniline, C6H4(Br)(NH2). [See Kekulé's Organic Chem.] M. Langerolle has found that the putrefaction and decomposition of animal matter can be prevented, even when it is exposed to the air, and in an elevated temperature, by the use of small quantities of aniline. (Medical Press and Circular, quoted in the Times, May 7, 1873.)

aniline black, s. A dye produced by a mixture of aniline, potassium chlorate, and cupric sulphate or a vanadium salt. It is used in calico printing.

aniline blue, s. Obtained by heating rosaniline with excess of aniline at 150°-160°. A hydrochloride of triphenyl-roosaniline, C20H16(C6H5)3N3.

aniline green, s. The aldehyde green is obtained from aldehyde, magenta, and sulphuric acid heated together, and then poured into a boiling solution of sodium thiosulphate. The dye is precipitated by sodium acetate. The iodine green is obtained by heating aniline violet with iodide of methyl.

aniline orange, s. A salt of dinitro-paracresol.

aniline purple, or mauve, is prepared by adding to aniline sulphate a dilute solution of potassium bichromate. It contains a base called mauveine, C27H24N4.

aniline red [see ROBANILINE], called also MAGENTA. Obtained by heating crude aniline with arsenic acid to 140°. The presence of toluidine is necessary for its formation.

aniline violet, s. Obtained by heating rosaniline with ethyl iodide, a hydroiodide of triethyl-roosaniline, C20H16(C2H5)3N3.

aniline yellow. [See CHRYSANILINE.]

an-ll'-i-tý, s. [Lat. anilitas, from anilis = pertaining to an old woman, old womanish; anus = an old woman; Celtic hen = old.] The state of being an old woman. The state of entertaining such views and feelings as are natural to women well advanced in life.

"Since the day in which the Reformation was begun, by how many strange and critical turns has it been perfected and handed down, if not entirely without spot or wrinkle, at least without blotches or marks of anility."—Sterne: Sermon on the Inauguration of K. George III.

¶ Todd says: "Anility is not confined to the feminine character, as Dr. Johnson would imply. It means dotage in general, in our older dictionaries."

an-ím-a-ble, a. [From Lat. animo = to fill with breath or air, to animate.] Capable of being animated. (Johnson's Dict.)

an-ím-ad-vér'-sal, a. & s. [From Lat. animadversum, supine of animadverto.] [ANIMADVERT.]

1. As adjective: Having the faculty of perception, or the power of perceiving.

2. As substantive: That which has the faculty of perception; and the soul.

"That lively inward animadversio: it is the soul itself; for I cannot conceive the body both animadversio: when as objects, plainly exposed to the sight, are not discovered till the soul takes notice of them."—Mort: Song of the Soul, Notes, p. 21.

an-ím-ad-vér'-sion, s. [In Fr. animadversion. From Lat. animadversio = (1) the perception of an object, attention; (2) censure, punishment.]

I. Ordinary Language:

1. The act of perceiving an object; attention.

"The soul is the sole percipient which hath animadversion and sense, properly so called."—Glanville.

2. As close attention to any one's conduct is pretty sure to detect serious imperfections in it, the word acquired the secondary signification of severe censure, reproof, serious blame. This is now almost its sole meaning.

"He dismissed their commissioners with severe and sharp animadversions."—Clarendon.

3. Punishment. [See II.]

"When a bill is debating in Parliament, it is usual to have this controversy handled by pamphlets on both sides, without the least animadversion upon the authors."—Swift.

II. Technically:

Mediæv. Eccles. Law: The infliction by the civil power, at the instigation of the church, of punishment on offenders against ecclesiastical law.

"An ecclesiastical censure and an ecclesiastical animadversion are different things: for a censure has a relation to a spiritual punishment, but an animadversion has only a respect to a temporal one, as degradation, and the delivering the person over to the secular court."—Aylife Parergon.

an-ím-ad-vér'-sive, a. [From Lat. animadversum, supine of animadverto.] [ANIMADVERT.] Having the power of perception.

"The representation of objects to the soul, the only animadversive principle, is conveyed by motions made on the immediate organs of sense."—Glanville.

an-ím-ad-vér'-sive-ness, s. [Eng. animadversive; -ness.] The quality or state of perceiving; perception. (Johnson.)

an-ím-ad-vért', v.t. [Lat. animadverto = (1) to turn the mind to, (2) to notice, (3) to censure or punish; animus = the mind; ad-vertō = to turn to; ad = to, and verto = to turn.]

1. To turn the mind to any person or thing; to notice.

2. To blame, to censure, to make objurgatory remarks upon.

"Certain questionable people . . . were animadverted upon [in an Act of Parliament]."—Froude: Hist. Eng., vol. II, p. 434.

3. To punish.

"If the Author of the universe animadverts upon men here below, how much more will it become Him to do it upon their entrance into a higher state of being?"—Grew.

¶ Animadvert is followed by upon or on. (See the foregoing examples. Very rarely against is also used.)

"Your Grace very justly animadverts against the too great disposition of finding faults . . ."—Pope: Letter to the Duke of Buckingham 1718.

an-ím-ad-vér'-tér, s. [Eng. animadvert; -er.] One who censures or punishes.

"God is a strict observer of, and a severe animadverter upon, such as presume to partake of those mysteries without such a preparation."—South.

an-ím-ad-vér'-ting, pr. par. [ANIMADVERT.]

an-ím-ad-vér'-tise, v.t. [ANIMADVERT.] To inform. (Nashé: Lenten Stufe.)

an-ím-ál, s. & a. [Lat. animal = an animal; animal = neut. of adj. animalis = possessing life.] [ANIMATE.]

A. As substantive:

I. Ordinary Language:

1. A beast, as contradistinguished from a man.

"Comparativeness is the natural disposition which men and animals feel in various degrees to quarrel and fight."—Perry Cyc., xviii, 16.

2. In contempt: A man of no intellect, or of bestial propensities. (Johnson.)

3. In the same sense as No. II. (Zool.) This signification of the word includes man.

án, bóy, pót, jówl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist; -ing-tion, -sion, -tion = shún; -tion, -sion = zhún. -tious, -sious, -cious, -ceous = shúa. -ble, -die, &c. = bël, del.

... though defenceless. Man can arm himself with every variety of weapon, and become the most terribly destructive of animals."—Owen: *Classif. of the Mammalia*, p. 54.

II. Technically:

Zool.: An organic being, rising above a vegetable in various respects, especially in possessing sensibility, will, and the power of voluntary motion. Professor Owen defines an animal as an organism which can move, which receives nutritive matter by a mouth, which inhales oxygen and exhales carbonic acid, and, finally, which develops tissues, the proximate principles of which are quaternary compounds of carbon, hydrogen, oxygen, and nitrogen. (Owen: *Paleont.*, 1860, p. 4.) Though, practically speaking, there is in general no difficulty in distinguishing an animal from a vegetable, yet the animals and plants of humble organisation closely approach each other in structure, and it is not always easy to say whether a particular organism belongs to the one kingdom or the other. By his bodily organisation man is an animal, though his mental and moral qualities give him an immeasurable superiority over all the other members of the animal kingdom. (For the classification of animals, see ANIMAL KINGDOM.)

B. As adjective:

1. Pertaining to an animal as opposed to a vegetable, or to an animal as distinguished from the more general term, an organised being, as *Animal Functions* (q.v.).

"The animal membranes exercise the property." . . . Todd and Bowman: *Physiol. Anat.*, vol. I., p. 54.

2. Pertaining to the inferior sentient beings as opposed to man; brutal.

"The immortal Aristotle, in his system of the animal world, excludes man from his scheme."—Swainson: *Classic of Quadrupeds*, § 15.

3. Pertaining to those parts of our complex nature which we have in common with the inferior sentient beings, as contradistinguished from those mental, moral, and spiritual capabilities in which man on the earth stands alone.

"There are things in the world of spirits, wherein our ideas are very dark and confused; such as their union with animal nature, the way of their acting on material beings, and their converse with each other."—Watts: *Logic*.

animal charcoal, s. [CHARCOAL.]

animal economy, s. The natural laws on which the welfare of the animal world depends, and to which, within certain limits, instinct teaches the several species to conform.

animal electricity, s. [GALVANISM.]

animal flower, s. A name often given to those radiated animals which have their tentacles in rows around their mouths, not unlike the petals of a double flower. The term has been applied especially to various species of the genus *Actinia*, which have been called, from their fancied resemblance to particular flowers, Sea Anemones, or fixed Sea-nettles. (Griffith's *Cuvier*, vol. xii., p. 572.) The other radiated animals which have been called animal flowers belong to the genera *Holothuria*, *Tubularia*, *Sertularia*, *Hydra*, and *Alegonia*. [ACTINIA.]

animal food, s.

1. Food consisting of the flesh or other portions of animals.

2. Food designed for animals.

animal functions, s. pl. Functions exercised by animals. They are divided into two classes. (1) Those peculiar to and characteristic of animals, as distinguished from organic functions, which are common to them and vegetables. The animal functions of this first category are sensibility, or innervation, and voluntary motion, or locomotion. (2) The merely vital or vegetative functions, which are common to animals and vegetables. These are nutrition and generation. [ORGANIC FUNCTIONS.] (See Todd and Bowman's *Physiol. Anat.*, vol. I., p. 25.)

animal heat, s. The heat possessed by the higher animals, and which, so long as they retain life, they maintain, whatever the surrounding temperature may be. It is highest in birds, and lowest in reptiles and fishes.

animal kingdom, s. One of the three great kingdoms of visible Nature, the other two being the Vegetable and the Mineral Kingdoms. Cuvier divided the Animal Kingdom into four great sub-kingdoms—1, Vertebrata; 2, Mollusca; 3, Articulata; and 4, Radiata. Professor Owen, in his *Paleontology*, adopts the following classification:—Kingdom I. Pro-

tozoa. Kingdom II. Animalia. Sub-kingdom 1. Juvvertebrata: Province 1, Radiata; 2, Articulata; 3, Mollusca. Sub-kingdom II. Vertebrata. (See his *Paleontology*, 1860.) Professor Huxley divided the Animal Kingdom into eight distinct groups:—Vertebrata, Mollusca, Molluscoida, Cœlenterata, Annulosa, Annuloids, Infusoria, Protozoa. It is now generally admitted that no exact line can be drawn between the lowest animals and the lowest plants; and classifications of animals are based on the principle of descent from a common ancestor, the term *phylum* being used instead of *Order*. Scarcely any two authorities agree as to the number of these *phyla* or tribes; but the following is a good working division: PROTOZOA (forming one phylum); METAZOA: Phylum 1, Cœlenterata; 2, Echinodermata; 3, Vermes; 4, Arthropoda; 5, Molluscoidea; 6, Mollusca; 7, Vertebrata.

animal magnetism, s. A science, or art, so called because it was believed that it taught the method of producing on persons of susceptible organisation effects somewhat similar to those which a magnet exerts upon iron. It is now generally denominated Mesmerism (q.v.).

animal mechanics, s. [MECHANICS.]

animal oat, s. An oat (*Avena sterilis*), which has a beard so hygrometric that, when the seeds fall off, it twists itself and moves spontaneously, when certain alterations in the weather occur. At such times it resembles a strangely-shaped insect crawling on the ground, whence its English name of Animal Oat. It is sometimes grown as an object of curiosity.

animal painter, s. A painter whose special taste and skill lie in the representation of animals.

animal painting, s. The department of painting which treats of the representation of animals.

animal spirits, s. pl. Nervous or vital energy, the galeity and capability for action which arise from the possession of a sanguine temperament and a healthy physical organisation.

animal strength, s. [STRENGTH.]

ân-im-âl'-ou-lâ, s. pl. [The neut. pl. of Lat. *animalculum*, but not classic; compounded of *animal*, and the termination *culum*, signifying little.] Minute animals.

¶ Sometimes the word *animalcula* is mistaken by incorrect writers for a Latin noun of the first declension, and receives at their hands a plural *animalculæ*. Such an error should be carefully avoided. [ANIMALCULE.]

ân-im-âl'-cu-lar, a. [Ensa, &c., *animalcula*; -ar.] Pertaining or relating to animalcula.

"It rendered at once evident to the senses why air filtered through cotton-wool is incompetent to generate animalcular life."—Tyndall: *Frag. of Science*, 3rd ed., xl. 324.

ân-im-âl'-cû-le, s. [Fr., from Lat. *animalcula* (q.v.). In Port. *animalculo*.] An animal so minute as to be visible only by means of the microscope. The term is applied especially to members of the classes Infusoria and Rotifera; the former called Infusorial, and the latter Wheel-animalcules. [INFUSORIA, ROTIFERA.]

"... Infusorial Animalcules."—Owen: *Comparat. Anat. of the Invertebrata* (1843), p. 17.

"... the Rotifera, or Wheel-animalcules."—Huxley: *Introduct. to the Classif. of Animals* (1869), p. 47.

† ân-im-âl'-cû-line, a. [Eng., &c., *animalcule*; -ine.] Pertaining or relating to animalcula.

¶ Not so common a term as ANIMALCULAR (q.v.).

"Animalculine putrefaction is the immediate cause of those diseases."—Dr. Dwight: *Trans. in New Eng.*, &c., vol. I., p. 436.

ân-im-âl'-cû-list, s. [Eng., &c., *animalcule*; -ist.] One who makes animalcules a special study.

ân-im-âl'-ish, a. [Eng. *animal*; -ish.] Like an animal.

ân-im-âl'-ism, s. [Eng. *animal*; -ism.] The series of qualities which characterise a mere animal in contradistinction to a man.

ân-im-âl'-i-tÿ, s. [In Ger. *animalität*; Fr. *animalité*; Ital. *animalità*.] Conformity to the animal type of structure.

"It is evident that such characters must be derived from the animal functions of sensation and action, for these not only constitute and create an animal, but also by their greater or less capacity may be said in some measure to establish the degree of its animality."—Griffith's *Cuvier*, vol. I., p. 59.

ân-im-âl'-i-zâ-tion, s. [Eng. *animalize*; -ation. In Fr. *animalisation*; Port. *animalisação*.] The act of making into an animal, or into animal matter; the state of being made into an animal, or into animal matter.

ân-im-âl'-ize, v. l. [Eng. *animal*; -ize. In Fr. *animaliser*; Port. *animalisar*.]

1. To make into an animal; to impart animal life to.

2. To convert into animal matter.

ân-im-âl'-ized, pa. par. & a. [ANIMALIZE.] As adjective:

"But they eat, I observe, a very large proportion of fat, which is of a less animalised nature."—Darwin: *Voyage round the World*, ch. vi., p. 117.

ân-im-âl'-iz-ing, pr. par. & a. [ANIMALIZE.] As adjective:

"... the unconscious irony of the Epicurean poet on the animating tendency of his own philosophy."—Coleridge: *Aids to Reflection* (1839), p. 37.

† ân-im-âl'-ness, s. [Eng. *animal*; -ness.] The quality or state of being an animal; animal existence.

ân-im-âte, v. t. & i. [In Fr. *animar*; Sp. & Port. *animar*; Ital. *animare*. From Lat. *animo* = to fill with breath or air, to make alive. To endow with *anima* = air, a soul.] [ANIMAL.]

A. Transitive:

I. Literally: To endow with natural life; to impart life at first, or preserve it when imparted.

"Where searching sunbeams scarce can find a way Earth animated heaves." Thomson: *Summer*, 264.

II. Figuratively:

1. Of inanimate things: To impart the semblance of life to; to give power to; to heighten the effect of.

"Heroes in animated marble frown." Pope: *Temple of Fame*, 78.

2. Of persons:

(a) To inspire with courage or ardour, to enliven, to stimulate.

"Thine arm'd, he animates his drooping bands." Pope: *Homer; Iliad*, v. 604.

(b) To imbue or inspire with; to cause to be actuated by.

"They would come up to Westminster animated by the spirit of 1640."—Macaulay: *Hist. Eng.*, ch. viii.

B. Intrans.: To become lively, to revive. (Mad. D'Arbly: *Cecilia*, bk. I., ch. iv.)

ân-im-âte, a. The same as the participial adj. ANIMATED (q.v.).

"... the admirable structure of animate bodies."—Bentley.

ân-im-â-téd, pa. par. & a. [ANIMATE, v.]

As adjective:

"... the same animated descriptions. . ."—Lewis: *Early Rom. Hist.*, ch. xiii., pt. I., § 1

"... on the report there was an animated debate."—Macaulay: *Hist. Eng.*, ch. xxiv.

Animated Nature: That portion of Nature in which there is life, in contradistinction to that from which life is absent.

"Nature inanimate employs sweet sounds, But animated Nature sweeter still," To soothe and satisfy the human ear." Cooper: *Task*, bk. I.

† ân-im-âte-nëss, s. [Eng. *animate*; -ness.] The state of being animated. (Johnson.)

ân-im-â-ting, pr. par. & a. [ANIMATE, v.]

As adjective:

"... to the sun allied, From him they draw their animating fire." Thomson: *Seasons; Summer*.

"As from a lethargy at once they rise, And urge their chief with animating cries." Pope: *Homer's Odyssey*, bk. x., 855, 859.

Animating Principle: An English term corresponding to the Greek ψυχή (*psychê*), which means (1) breath, life; (2) soul; (3) reason; (4) a living spirit, supposed to go through all the earth and the ocean. It was called by the Romans *anima mundi*. In the plural, animating principles correspond to the Greek ψυχαι (*psychai*). The hypothesis of Aristotle on the subject was that there were an infinite number of distinct animating principles, no two precisely identical with each other in qualities. Each of these necessarily had its corresponding body, which accounted

fâte, fât, färe, amidst, whät, fáll, father; wë, wët, hère, camël, hër, thère; pine, pít, sire, sír, marine; gö, pôť, er, wöre, wölf, wörk, whò, sòn; müte, cüb, cüre, unite, cür, rüle, füll; trÿ, Sÿrian. æ, œ = é; ð = é. qu = kw.

for the great diversities among the species of animated beings existing in the world. All, however, acted under the direction of the supreme animating principle or ψυχή (psychē) = (1) growth, (2) outward form, (3) nature. The immortal Harvey held a somewhat similar belief, and the "materia vitæ" (material of life) of John Hunter, the "organic force" of Müller, and the "organic agents" of Dr. Prout are all akin to the ψυχή (psychē), or animating principle of Aristotle. (See Todd and Bowman's Physiol. Anat., vol. i., pp. 16, 17.)

ăn-ím-ā-tíng-lý, adv. [Eng. animating; -ly.] In a manner to produce animation.

ăn-ím-ā-tion, s. [In Fr. animation; Sp. animación; Port. animação; Ital. animazione; Lat. animatio, from animo = to fill with breath or life; anima = air, life.] The act of animating; the state of being animated.

Specialty: 1. Lit.: The act or process of making to breathe or live for the first time, or after vital action has been suspended; also the state of having life thus imparted or revived.

"The body is one mach more by the animation of the same soul quickening the whole frame." - Bishop Taylor: Of Repentance, c. vi., § 2.

"Animation [Lat.] is the informing an animal body with a soul." - Glossog. Nov.

Suspended animation is a term used in the case of persons all but drowned, in whom the vital actions have temporarily ceased, and will probably do so permanently unless means be adopted for their immediate restoration.

2. Figuratively: (a) Of men or other conscious beings, singly or in combination: The act or process of inspiring life-like energy or ardour; also the state of having such energy or ardour imparted.

"... the faction which had been prostrated and stunned began to give signs of returning animation." - Macaulay: Hist. Eng., ch. xvi.

(b) Of things inanimate: The act or process of making painted or sculptured figures so life-like that they appear to the imagination as if actually alive.

ăn-ím-ā-tive, a. [Eng. animate; -ive.] Having the power to impart life or spirit.

ăn-ím-ā-tor, s. [Lat.] One who or that which animates or imparts life or spirit.

"... these bodies conform themselves to situations wherein they best unite unto their animator." - Browne: Vulgar Errors, bk. II, ch. 2.

ăn-ím-ā, a. [Fr. animé = animated.] Her.: A term used when wild animals are represented with fire proceeding from their mouth and ears. It is called also incensed. (Gloss. of Heraldry.)

ăn-íme, s. [In Ger., Sp., &c., anime.] A resin procured from the Hymenæa Courbaril, a plant of the Papilionaceæ sub-order. It is of a transparent amber colour, an agreeable smell, and little taste. The Brazilians use it in fumigations for pains and aches arising from cold.

ăn-ím-ét-ta, s. [Ital. = the part of a cuirass which covers the body in front.] Eccles. Ritualism: The cloth with which the cup in the eucharist is covered.

ăn-ím-ine, s. [Lat. anim(a); Eng. suff. -ine.] Chem.: An organic base obtained from bone oil. It has not been prepared pure.

ăn-ím-ism, s. [From Lat. anima = the principle of animal life.] [ANIMUS.] The doctrine that the phenomena of life in animals is caused by the presence of a soul or spirit; and that the functions of plants are carried out by the principle of life, and not by any chemical or material causes. (Webster.)

ăn-ím-ist, s. One who holds the doctrines of Animism (q.v.). (Webster.)

ăn-ím-ō-für-ăn-dī (used in Eng. as adv.) [Lat.] With the mind or intention to steal.

• ăn-ím-ō-se, a. [In Sp. animoso; Lat. animosus.] Full of life and spirit; spirited.

• ăn-ím-ō-se-ness, s. [Eng. animose; -ness.] The quality of being spirited. (Johnson.)

ăn-ím-ōs-ý-tý, s. [In Fr. animosité; Port. animosidade; Ital. animosità, animosità, animosità; Lat. animositas = (1) boldness, (2) impetuosity, (3) hatred; animosus = full

of courage, spirited; anima = (1) wind, (2) the air, (3) breath, life. Gr. άνεμος (anemos) = wind; Sansc. animi, anas = wind, air: an = to breathe.]

\* I. Spirit, courage, boldness, without implying the presence of the malignant element. (See ex. from Plutarch's Morals in Trench's Select Gloss., p. 6.)

2. Irrepressible anger or hatred against one, prompting the individual who entertains it to open endeavours to injure the person against whom his spirit is so violently excited.

"Animosity [Lat.] stoutness, stomachfulness: Animositus, quarrel, contentions." - Glossog. Nov.

"To the evils arising from the mutual animosity of factions were added other evils arising from the mutual animosity of sects." - Macaulay: Hist. Eng., ch. xi.

ăn-ím-ús, s. [Lat. = the spiritual and rational soul in man; opposed to anima = (1) the principle of animal life, (2) the will, purpose, (3) the affections, the inclinations, the passions.] Intention; purpose, especially of a hostile character found on the presence of animosity in the heart.

"The lightest of these charges were symptoms of an animus which the Crown prosecutors would regard as treasonable." - Proudé: Hist. Eng., vol. III, ch. xiv.

"During the last eighteen months there had been a curious animus in certain quarters against the subject race of the Ports." - Mr. Trevelyan, M.P.: Times, Feb. 2, 1872.

ăn-ím-ga, s. [W. Indian name.] The designation given in the West Indies to several plants, most of them Aroids. One species, if not even more than one, was formerly used in sugar refining.

ăn-ím-ôn, s. [Gr. άνιων (anion), pr. par. of άνεμι (anemi) = to go up; άνά (ana) = up, and ίων (ion), pr. par. of ίμι (emi) = to go.] Electrolysis: Faraday's name for that element in a body decomposed by voltaic electricity which appears at the anode [ANODE], or positive electrode of the battery. It is opposed to CATION (q.v.).

ăn-ím-ál, s. [From Eng., &c., anise.] A chemical substance called also anisic aldehyde and hydride of anisyl. (Fownes: Chemistry.)

ăn-ím-sán-thous, a. [Gr. ανισος (anisos) = unequal, and άνθος (anthos) = a flower.] Bot.: Having perianths of different forms.

ăn-ím-sate, a. & s. [ANISE.] A. As adj.: Resembling anise.

B. As subst.: A salt of anisic acid.

ăn-ím-se, s. [In Sw., Dan., Ger., Fr., Sp., & Port., anis; Dut. anys; Lat. anisum; Gr. άνισιον (anision) and άνιθον (anithon), also Ionic άνισιον (anision), άνισιον (anision); poetic άνισιον (anision), άνισιον (anision); later Attic, Doric, & Æolic άνισιον (anision), άνισιον (anision) = dill or anise. Arab. ainison.] [ANETHUM.]

I. The anise proper: An umbelliferous plant, the Pimpinella anisum. It is cultivated in Malta and Spain for the sake of the seeds,

ANISE (PIMPINELLA ANISUM). One-sixth natural size; plant, flower, and ripe fruit enlarged.

which are imported into this and other countries. They are aromatic and carminative. Its scent tends to neutralise other smells. It is sometimes sown here for its leaves, which are used like fennel as a seasoning or garnish.

2. The anise of Scripture: In Gr. τό άνιθον [to the] anithon, should, it is believed, have been translated "dill," Anethum graveolens. (DILL.) It also is of the Umbelliferous order.

"... for ye say title of mist and anise and cummin." - Matt. xxiii. 23.

Oil of anise: A solution of anise camphor, or anethol, C<sub>10</sub>H<sub>12</sub>O, in an oil like turpentine; it solidifies at 10°. It is the essential oil of Pimpinella anisum. The camphor is obtained pure from alcohol by pressure and crystallisation. In pharmacy it is used as a stimulant, aromatic, and carminative; it relieves flatulency, and diminishes the griping of purgative medicines. (Garrod.)

anise-camphor, s. [ANETHOL.] Chem.: A white crystalline substance; sp. gr. 1.014. It melts at 18°, and boils at 222°.

ăn-ím-seed, s. [Eng. anise; seed.] The seed of the anise (q.v.).

aniseed-tree, s. [Anise-seed tree, so called because the leaves and capsules have a strong smell of anise-seed.] The English name of Illicium, a genus of Magnoliaceæ, or Magnoliads. The best known species are I. jordanum and I. parviflorum, from Florida.

ăn-ím-sét-té de Bourdeaux (Bôr-dô), s. [Fr.] A liquor consisting of anise macerated in eau-de-vie.

ăn-ím-ýo, a. [Eng. anise, and suff. -ic.] Pertaining to anise or anise-seed.

Anisic acid = Methyl-paroxybenzoic acid = hydrate of anise; dracoic acid, C<sub>8</sub>H<sub>6</sub>O<sub>2</sub>. A monobasic aromatic acid, obtained by the oxidation of anisic aldehyde. It crystallises in colourless prisms which melt at 175°. It is soluble in hot water, alcohol, and ether. By distillation with lime it yields CO<sub>2</sub> and anisol.

Anisic alcohol: C<sub>8</sub>H<sub>10</sub>O<sub>2</sub>. An aromatic alcohol obtained by treating anisic aldehyde with alcoholic potash. It boils at 250°. It crystallises in hard white needles, which melt at 23°.

Anisic aldehyde = Anisal = Hydride of Anisyl: C<sub>8</sub>H<sub>8</sub>O<sub>2</sub>. An aromatic yellow liquid obtained by oxidising anisic alcohol. It is oxidised into anisic acid, and by nascent H converted into anisic alcohol; it forms crystalline compounds with alkaline sulphites. Also obtained by the action of dilute HNO<sub>3</sub> and anise-camphor. It boils at 255°.

ăn-ím-ý-dí-ne, s. [From Eng., &c., anise.] Chem.: N. C<sub>7</sub>H<sub>7</sub>O. H<sub>2</sub> = methylphenidine, an organic base formed by the action of sulphide of ammonium on nitranisol; it combines with acids forming salts.

ăn-ím-sô-dác'-týl-ég, s. pl. [Gr. άνισος (anisos) = unequal; άν (an), priv., and ίσος (isos) = equal; (2) δάκτυλος (daktulos) = a finger or a toe.] Zool.: Temminck's name for those insessorial birds which have toes of unequal length.

ăn-ím-sô-dýn'-g-mouás, a. [Gr. (1) άνισος (anisos) = unequal; άν (an), priv., and ίσος (isos) = equal; (2) δύναμις (dynamis) = power, strength; δυναμαι (dunamai) = to be able.] Bot.: Of unequal strength. (Used of monocotyledonous plants which, when they germinate, grow with greater force on one side of their axis than on the other.)

ăn-ím-sô-ýo áç-íd, s. [From anise (q.v.).] Chem.: C<sub>10</sub>H<sub>12</sub>O<sub>8</sub>. A product of the oxidation of oil of star anise.

ăn-ím-ól, s. [Lat. anisum = anise, and oleum = oil.] Chemistry: C<sub>7</sub>H<sub>8</sub>O = C<sub>6</sub>H<sub>7</sub>(CH<sub>3</sub>).OH. An aromatic alcohol (also called methyl phenol, methyl carboic acid, or dracoil) obtained by heating potassium phenate, C<sub>6</sub>H<sub>5</sub>.OK, with methyl iodide, CH<sub>3</sub>.I; also by the dry distillation of methyl salicylate, or by distilling anisic acid with excess of caustic baryta. Anisol is a colourless liquid, boiling at 152°. It dissolves in H<sub>2</sub>SO<sub>4</sub>, forming sulphuric acid, C<sub>7</sub>H<sub>7</sub>SO<sub>4</sub>. By fuming HNO<sub>3</sub> there are one, two, or three atoms of H replaced by (NO<sub>2</sub>), forming mono-, di-, or tri-nitranisol, which by reducing agents give corresponding basic amido-compounds; as C<sub>7</sub>H<sub>7</sub>(NO<sub>2</sub>)O, nitranisol, gives C<sub>7</sub>H<sub>7</sub>(NH<sub>2</sub>)O, nitranisidine. (See Watts's Dict. Chem.)

ăn-ím-sô-mét'-ric, a. [Gr. ανισομετρος (anisosmetros) = of unequal measure by: άν (an), priv.; ίσος (isos) = equal to; μέτρον (metron) = a measure.]

Min.: Of unequal measurement.

"Il. Titanite Group. Anisometric."—Dana: Min.: 5th ed., p. 362.

"Mesotype Group. Anisometric."—Ibid., p. 421.

án-i-só-nó-má, s. [Gr. άνισος (ánisos) = unequal; and νημα (nēma) = a thread.]

Zool.: A genus of Infusoria belonging to the family Thecamonadina.

án-i-sóp-ll-a, s. [Gr. άνισος (ánisos) = unequal, and όπλον (hoplon) = a tool, an implement, a weapon.] A genus of lamellicorn beetles. One species, A. hortícola (Garden Chafer or May-bug), which may be recognised by its green body and tawny elytra, is common in England from May to June, destroying thorn hedges, roses in gardens, corn in fields, &c. Another, A. agricola (Field Chafer), green in colour, is similarly hurtful in France and Germany.

án-i-só-scól-ý-dæ, s. pl. [Gr. άνισος (ánisos) = unequal; and σκόλος (skolos) = the leg, including the foot.] A family of bugs. The Diactor bilineatus has enormous expansions on the hindmost pair of legs.

án-i-só-spér-má, s. [Gr. άνισος (ánisos) = unequal, and σπέρμα (sperma) = seed.] A genus of plants belonging to the order Cucurbitaceæ (Cucurbits). The seeds of A. passiflora contain a bitter oil mixed with a bland sebaceous matter and resin. Taken in small doses they are stomachic, but swallowed in larger quantities they act as purgatives. (Lindley: Veg. Kingd., p. 315.)

án-i-só-stém-ón-óus, a. [Gr. άνισος (ánisos) = unequal, and στῆμων (stēmōn) = a thread.]

Bot.: Having the stamens in number unequal to the petals. (Lindley.)

†án-i-sós-tóm-óus, a. [Gr. άνισος (ánisos) = unequal, and στόμα (stoma) = mouth.]

Bot.: "Having unequal mouths." (Uacod of a calyx or corolla divided unequally.)

án-ý-sýl, s. [From Eng., &c., anise.] Chem.: C<sub>8</sub>H<sub>7</sub>O<sub>2</sub>. An organic radical contained in anisic acid, anisyl hydride, &c.

án-ýth-ér, a. A Scotch form of ANOTHER (q.v.).

án-kór (1), s. [In Dut., Ger., & Dan., anker; Sw. ankare.]

1. A Dutch liquid measure containing about 104 imperial gallons.

2. An English liquid measure for spirits, wine, &c., containing about 8½ imperial gallons. "Ankers of brandy."—Macaulay: Hist. Eng., ch. xii.

\*án-kór (2), s. [ANCHORITE.]

\*ánk-ér-as, s. Old spelling of ANCHORESS.

\*ánk-ère, s. Old spelling of ANCHOR (q.v.).

án-kór-íte, s. [In Ger. ankerit. Named after Prof. Anker, of Styria.] A mineral classed by Dana under his Calcite group of Anhydrous Carbonates. Its crystals are rhombohedral; it occurs also massive, granular, or compact. The hardness is 3.5 to 4; the sp. grav. 2.95 to 3.1; the lustre vitreous to pearly; the colour white, gray, or reddish. It is translucent, or nearly so. Its composition is carbonate of lime, 46.40 to 56.45; carbonate of magnesia, 11.86 to 36.95; protoxide of iron carbonate, 13.28 to 35.31; protoxide of manganese carbonate, 0.34 to 10.09. It is found in Styria, in Nova Scotia, &c.

án-kís-tró-dés-mús, s. [Gr. άνκιστρον (anklistron) = a fish-hook; δεσμός (desmos) = a bond.]

Bot.: A genus of Desmidiaceæ. Character: Cells elongated, attenuated entire, aggregated into faggot-like bundles.

án-kle, án-cle, s. [A.S. ancle, ancleo; Sw. & Dan. ankel; Ger. ankel; Dnt. enkel.] The joint by which the foot is united to the leg.

"... and he brought me through the waters; and the waters were to the ankles."—Ezek. xlvii. 5.

"For still, the mors he works, the more Do his weak ankles swell."

Wordsworth: Simon Lee.

ankle-bone, ancle-bone, s. The bone of the ankle.

"... immediately his feet and ancle-bones received strength."—Acts iii. 7.

ankle-deep, a. Sunk in some semi-liquid or liquid substance as deep as the ankles.

"Hence, ankle-deep in moss and flowery thyme, We mount again."—Cowper: Task, bk. i.

ankle-joint, s. The joint of the ankle.

"... the backward position of the ankle-joint surface presented by the astragalus to the tibia."—Owen: Classif. of the Mammalia, p. 67.

án-kled, a. [Eng. ankle; suffix -ed.] Pertaining to the ankles. (Chiefly in composition.)

"Well ankled, two good confident calves."—Beaumont & Fletcher: Wit at Several Weapons.

ánk-lét, s. [Dimin. of Eng. ankle.]

†1. A little ankle.

2. An ornament placed on the ankle as a bracelet is on the wrist. It is much worn in the East.

\*án-kre, s. [ANCHOR.]

\*ánk-röss, s. Old spelling of ANCHORESS.

ánk-ý-lósed, a. [ANCHYLOSED.]

ánk-ý-ló-sis, s. [ANCHYLOSIS.]

ánk-ý-lót-ýc, a. [ANCHYLOTIC.]

án-láge, án-lás, a. [In Mediæv. Lat. anelactum. From Wel. anlas = a sword.] A falchion, a wood-knife, a dagger.

"An anlas and a gipser all of silk"

"Hang at his gerdul, whit as morne mylk." Chaucer: C. T., 359, 360.

"Bot Arthur with an anlas eagerly smyttez, And hittes ever in the hulke up to the hiltes." Morris: Arthur's Tale, p. 144-45.

"And by his side an anlas hung."

Scott: Robby, v. 15.

ánn, s. [ANNAT.] (Scotch.)

án-na, s. [Maharatta anna; Bengali and Sansc. ana.] An imaginary coin used in calculations in India. It is the sixteenth part of a rupee, is in value about 1¼d. sterling, and is estimated to contain four pice.

án-na-bór-gite, s. [From Annaberg, in Saxony, where it occurs.] A mineral placed by Dana in his Vivianite group. It is monoclinic, has capillary crystals, and is besidea massive and disseminated. The colour is a fine apple-green; the streak greenish-white. Composition: Arsenic acid, 36.8 to 38.90; protoxide of nickel, 35 to 37.35; oxide of cobalt, from a mere trace to 2.5; water, 23.91 to 25.5. Besides Annaberg, it is found in Dauphiny, in Connecticut, and other places.

án-nal, s. [In Fr. annal is = annual (used specially of plants). From Lat. annalis = belonging to a year; annus = a year.]

A. Singular (Annal).

1. Generally: The singular of the word ANNALS (q.v.). [ANNAL-WRITING.]

2. Technically. In the Roman Catholic Church: A mass said for an individual every day in the year, or annually on a particular day of each year. (Du Cange.)

B. Plural (Annals). [In Sw. & Dan. annaler; Ger. annalen; Fr. annales; Sp. analess; Ital. annali. From Lat. annales (pl.); rarely annalis (sing.) = year-books, yearly records, from annus = a year.]

1. Properly: The record of historical events arranged chronologically, and divided into yearly portions. In this sense the record of the important events in the Roman State, said to have been made annually for the first six centuries of its existence by those who successively filled the high office of Pontifex Maximus, wera annals.

"Their model was the official annals of the year kept by the Pontifex Maximus."—Lewis: Early Rom. Hist., ch. ii., § 8.

2. More loosely: Records of historical events, or even of less important incidents, although they may not be formally divided into yearly portions. There has been considerable dispute regarding the precise difference between annals and history. [See a dissertation on the subject by Niebuhr in the Philological Museum, vol. ii. (Cambridge, 1833), pp. 661-670.] Broadly speaking, annals are simple records or chronicles of events, in yearly portions or otherwise, without any effort to trace occurrences to their causes, to investigate the characters and motives of the chief actors, or to intercalate philosophical generalisations. When these elements are

superadded to the bare chronicle of incidents then annals become history.

"Nor Grandeur hear with a disdainful smile The short and simple annals of the poor." Gray: Elegy.

annal-book, s. A history. (Tennyson: Coming of Arthur, 116.)

annal-writing, s. Writing of annals.

"... the distinction we have stated between history-writing and annal-writing."—Fenny Cycle, vol. ii., p. 41.

án-nal-ist, s. [Eng. annal; suffix -ist. In Ger. annalist; Fr. annaliste; Sp. analista; Port. & Ital. annalista.] One who writes annals.

"The native historians of Rome, who were prior to Sallust, Dionysius, and Livy, have been sometimes grouped together under the common designation of annalists."—Lewis: Early Rom. Hist., ch. iii., § 11.

"The records of an annalist may be jejune."—Ibid., ch. xiii., pt. i., § 1.

"... confirmed in every page of the Celtic annalists."—Froude: Hist. Eng., ch. viii., vol. ii., p. 254.

án-nal-ist-ýc, a. [Eng. annalist; suffix -ic.] Pertaining to annalists.

"Now the annalistic style is marked by brevity and dryness."—Lewis: Early Rom. Hist., ch. xiii., pt. i., § 1.

"... the dry annalistic style of the early Roman historians."—Ibid., ch. ii., § 2.

án-nal-ize, v. t. [Eng. annal; suffix -ize.] To note down as annals.

"Observe the miracle, deserving a Baronius to annalize it."—Sheldon: Mir. of Antich. (1616), p. 332.

án-nal-s, s. pl. [ANNAL.]

án-nat (Eng. & Scotch), \*án (Scotch), s. Often in the plural, án-nats, án-nates. [In Ger. annaten; Fr. & Ital. annate; Sp. anata; Port. annata. From Lat. annus = a year.]

I. "Primitiæ" (First-fruits):

1. When the Papal power was dominant: The first year's revenue of a benefice which each new incumbent was required to remit to the papal treasury. Cowel says that first-fruits were called annates because paid after one year's profit of a living had been obtained. The original imposition of annates is generally attributed to John XXII. in the fourteenth century, but they existed before his time. Valuations of them were made in England in A.D. 1254 and in 1292. (See Noshelm's Church Hist., cent. xv., pt. ii., ch. ii., § 6, Murdoch's note; also Cent. xv., pt. ii., ch. ii., § 532.)

"Though the Council of Basil damned the payment of annats, yet they were paid here till Henry VIII. annexed them for ever to the crown."—Sp. Barlow: Remains, p. 172.

2. Since the Reformation:

(a) In England: The first-fruits exacted by Henry VIII. in England, at the Reformation, were the annates of the bishoprics, which the king had dissevered from the Pope. They were valued in A.D. 1555, the result being recorded in what was generally called Liber Regis (the King's Book). By this valuation the clergy still are rated. During the reign of Queen Anne, the annates were given up to form a fund for the augmentation of poor livings. [QUEEN ANNE'S BOUNTY.]

"... which annates, or first-fruits, were first suffered to be taken within the realm, for the only defence of Christian people against the Infidels."—Acts of Parl., 33 ann. Hen. VIII., 81.

"No annates would be sent any longer to Rome."—Froude: Hist. Eng., ch. vii., vol. ii., p. 194.

(b) In Ireland: Before the passing of the first Reform Bill the annates were applied primarily to the repair of ecclesiastical buildings, and then to the augmentation of poor livings; but about a year after that event the annates were abolished, their place being supplied by a graduated tax on the higher clerical incomes.

(c) In Scotland, the annat is declared by Car. II., Parl. Sess. 3, cap. 13, to be due to the executors of a deceased minister, and to be half a year's stipend in addition to what he had earned by his official services up to the time of his death. [For details see Compend of the Laws of the Church of Scotland (1830), p. 326.]

II. In the modern Church of Rome: Masses said for a year either for the soul of a person deceased, or for that of a person living. (See Ayliffe's Parergon.)

án-né'al, v. t. [A.S. ancelan = (1) to kindle, to inflame, to light; (2) to anneal. From celan = to kindle, light, set on fire, also to bake; æl = fire.]

ánte, fát, fáre, amidst, whát, fáll, fáther; wó, wét, hère, camel, hér, thère; pine, píit, síre, sír, maríne; só, pót, or, wóre, wólf, wórk, whó, sòn; müte, cúb, círe, únite, cür, rúle, füll; trý, Síryan. á, á = é. ey = ä. qu = kw.

I. Literally:

1. To heat a metal with the view of regulating its elasticity, or glass to render it less brittle, or to fix colours in it. When a metal is to be annealed it is raised to a temperature lower than the one necessary to temper it, and then allowed to cool slowly. The elasticity of the metal is thus diminished. Springs have thus imparted to them the precise measure of elasticity which is deemed the most suitable. Glass is similarly annealed. It is first heated, and then allowed to cool slowly. (See Ganot's Physics, 3rd ed., 1868, p. 63.)

"But when thou dost anneal in glass thy story, Then the light and glory More rev'rend grows, and more doth win. Which else shows waterish, bleak, and thin." Herbert.

"Beneath these chambers of the Sun, Some smil'd of gems anneal'd In upper fires." Moore's Paradise and the Peri.

† 2. To temper by cold. (Shenstone.) 3. To bake. (Used of tiles.)

II. Figuratively: To temper the character by the heat of snuffing or trial, so as to enable it to endure more without being shattered.

"The mind to strengthen and anneal," While on the stilly glow the steel." Scott: Rokeby, l. 51.

an-nē-aled, pa. par. & a. [ANNEAL.] "Both the poles, you find, attract both ends of the needle. Replace the needle by a bit of annealed iron wire, the same effects ensue." Tyndall: Frag. of Science, 3rd ed., xliii, 381.

an-nē-al-īng, a-nē-al-īng, pr. par., a., & s. [Sometimes corrupted into NEALING.] As substantive: The process of first heating and then cooling a metal, with the view of regulating its elasticity or tempering it. The process of similarly treating glass to render it less brittle or fix colours in it.

"Enameling and annealing." Sprat: Hist. of the Royal Soc. p. 286.

an-nē-o-tant, a. [From Lat. *annectens*, genit. *annectentis*, pr. par. of *annecto* = to tie to, to annex; *ad* = to, and *necto* = to bind, to tie.] Annexing, connecting. (Webster.)

an-nē-īd, an-nē-īde, \*an-ē-īdo, an-nē-ī-dan, s. [ANNELIDA.] An animal belonging to the class Annelids. (Huxley, etc.)

an-nē-ī-ds, a. pl. [Lat. *annellus*, or *annulus* = a little ring, dimin. of *annulus*, or *annulus* = a ring.] A class of animals belonging to the sub-kingdom Articulata, the Annulosa of some naturalists. They are sometimes called Red-blooded Worms, being the only invertebrate animals possessing this character. They are soft-bodied animals, mostly living in the water, sometimes in moist earth, but never parasitically within the bodies of other animals; the higher ones possessing limbs, though of a rudimentary character, which make them resemble centipedes; whilst the lower ones, like the leeches, are wholly destitute of these appendages. The respiration is effected by external branches, by internal vesicles, or by the skin itself. Contractile vessels supply the place of a heart. The nervous system consists of a single or double ventral cord, furnished with ganglia at intervals, and surrounding the oesophagus above. Currier divided them into three orders—Tubicolis, Dorsibranchia, and Abranchia; Milne-Edwards into Suctoria, Terricolis, Tubicolis, and Errantes; Professor Huxley into Chaetophora and Discophora; and Griffith and Hensley into Turbellaria, Suctoria (Apoda), and Chaetopoda (Setigera). [ANNELATA.]

an-nē-ī-dan, s. [ANNELID.]

an-nē-lā-tā, an-ē-lā-tā, s. pl. [Lat. *annellus*, dimin. of *annulus*, or *annulus* = a little ring.] A name sometimes given to the class of animals called by Cuvier Annelida. It is thus used in the first edition of Owen's *Comparat. Anat. of the Invertebrate Animals* (1843), but in the second edition (1855) *Annulata* is the term used.

an-nē-t, s. [See def.] A provincial name for the Kittiwake gull, *Larus tridactylus*.

an-nēx, v. t. [In Fr. *annexer*; Sp. *anexar*; Port. *anexar*. From Lat. *annexus*, supine of *annecto* = to tie on or to; *ad* = to, and *necto* = to bind to, to add to the end of anything.]

I. Ordinary Language: 1. Properly: To tie to the end of; to append. 2. To add something of lesser size or importance to anything else of greater size or

importance existing previously. (It is often used for the addition of another kingdom or province to an empire.)

"He wished to bumble the United Provinces, and to annex Belgium, Franche Compté, and Lorraine to his dominions." Macaulay: Hist. Eng., chap. ii.

"The great fiefs which, three hundred years before, had been, in all but name, independent principalities, had been annexed to the crown."—*Ibid.*

3. To connect something with another by the relation of sequence to it, as a penalty to a crime.

"... some fatal curse annex'd, Deprives them of their outward liberty; Their inward lost." Milton: P. L., bk. xii.

II. Technically: 1. English Law: To appropriate church lands to the Crown.

1. Scots Law: In the same sense; also to transfer church lands lying at a distance from the church to which they belong to another one to which they are more contiguous. [ANNEXATION.]

an-nēx, s. [From the verb. In Fr. *annexer*; Port. *anexar*.] Anything annexed, appended, or added.

I. Of writings: "Hocce did in other annexes of the law."—Jeremy Taylor: Of the Doctrine, Works (ed. 1839), vol. iii., p. 48.

† An additional stipulation to the Anglo-Turkish convention of 1878 was called an annex.

2. Of buildings: A subsidiary building added on to a main building, as in the case of the machinery annexes of the Exhibition of 1862. In this sense it is generally spelt *annexe*, as in French.

an-nēx-ār-y, s. [Eng. *annex*; suff. *-ary*.] Something appended; an addition.

"... of these societies, ... into which sundry of them are no other than annexaries and appurtenances."—Sir E. Stanley: State of Belgium.

an-nēx-ā-tion, s. [Eng. *annex*; suff. *-ation*.] The act of annexing; the state of being annexed; anything annexed.

I. Ordinary Language: 1. The addition of any document or writing to the end of one which is already in existence. The joining of something smaller to something greater, or something less to something more important. (Used especially of the addition of a kingdom or province to an empire, that of a fief, a bishopric, or any right or privilege formerly in the hands of subjects to the Crown.)

"On the other hand, the proposed annexations in Asia, which had an injurious bearing upon the interests of Great Britain, are not likely to excite any serious opposition on the part of the other European Powers."—*Marquis of Salisbury to Lord Odo Russell*, June 8, 1878.

2. The addition of one thing to another, the thing added being joined to its predecessor by the bond of logical or other sequence.

"If we can return to that charity and peaceable mindedness which Christ so vehemently recommends to us, we have his own promise that the whole body will be full of light, *Mat. vi.*, that all other Christian virtues will, by way of concomitance or annexation, attend them."—*Diamond*.

II. Technically: (a) Eng. Law: The appropriation of church lands to the Crown; also the vesting of a privilege, patronage for example, in one holding a certain office.

"How annexations of benefices first came into the Church, whether by the prince's authority, or the pope's licence, is a very great dispute."—*Ayliffe: Paragon*.

"The Dean of Windsor, by an ancient annexation, is patron thereof."—*Sp. Hall: Spectacles of his Life*, p. 27.

(b) Scots Law: In the same senses; also the appropriation of lands lying at a distance from the church to which they belong to another one to which they are more contiguous.

an-nēx-ed, pa. par. & a. [ANNEX, v.]

an-nēx-īng, pr. par., a., & s. [ANNEX, v.]

† an-nēx-ion (xion = kshūn), s. [In Fr. *annexion*; Sp. *anexion*.] Annexation; addition.

"It is necessary to engage the fears of men, by the annexation of such penalties as will overbalance temporal pleasure."—*Rogers*.

"With the annexions of fair gems enrich'd And deep-brain'd sonnets, that did amplify Each stone's dear nature, worth, and quality." Shakespeare: A Lover's Complaint.

an-nēx-ion-ist, a. [Eng. *annexion*; *-ist*.] Tending to annexation.

"... with the mysterious neutrality of Germany on one, and the annexationist inclinations of Italy on the other side."—*Times*, Nov. 13, 1875.

an-nēx-mēt, s. [Eng. *annex*; suff. *-ment*.] The act of annexing, the state of being annexed; the thing annexed.

"When it falls, Each small *annexment*, petty consequence, Attends the bold's ruin." Shakespeare: Hamlet, III. 1.

an-nī-cūt, an-ī-cūt, s. [Native term. Canarese *annekattie*, *annekattie*.]

"One of the principal *annexes* has given way, and the waters have swept down into the plain, doing enormous damage to the crops."—*Times*, 10th Sept., 1874.

In India: A dam or mole built across a river to raise the level of the water for the purposes of irrigation, and, to a certain extent, also with the view of facilitating navigation. Such an ancient was some years ago constructed near the mouth of the Godavari River.

an-nī-hīl-a-ble (h silent), a. [Eng. *annihilate*; *-able*.] Capable of being annihilated.

an-nī-hīl-āte (h silent), v. t. [In Fr. *annihiler*; Sp. *aniquilar*; Port. *aniquillar*; Ital. *annichilare*. From Lat. *annihilō*: *ad* = to, and *nihil* = nothing.]

1. To reduce to non-existence in the literal sense of the word.

"There is nothing more certain in nature than that it is impossible for any body to be utterly annihilated; but that as it was the work of the omnipotency of God to make somewhat of nothing, so it requires the like omnipotency to turn somewhat into nothing."—*Lord Bacon: Nat. Hist.*, Cent. I., § 100.

2. To reduce anything to non-existence by dissolving it into its constituent elements, and thus destroying its distinctive character. Thus an army is annihilated if some soldiers belonging to it are slain, some taken prisoners, and the remainder so demoralised that they have scattered in all directions with no intention of again repairing to their standards.

"He proposed, he said, first to annihilate the army of Vandemont."—*Macaulay: Hist. Eng.*, chap. xxi.

3. To annul, to abolish, to destroy the force of.

"There is no reason that any one commonwealth should annihilate that whereupon the whole world has agreed."—*Hooker*.

4. Fig.: To make one feel as if blotted out of existence, as by severe rebuke, the refusal of an important request, &c. (For ex. see ANNihilATING as adj.)

an-nī-hīl-ē (h silent), a. [ANNIHILATE, v.] Reduced to nothing; null and void.

"... then you do repute the same as vain, and annihilate."—*Oath to the Statute of Succession*, A.D. 1534.

an-nī-hīl-ā-tēd (h silent), pa. par. & a. [ANNIHILATE, v.]

"Annihilated sonnets—Roman, too, With all thy vices, for thou didst lay down With an atony amille a more than earthly crown." Byron: Child's Harold, iv. 53.

an-nī-hīl-ā-tīng, pr. par., a., & s. [ANNIHILATE, v.]

A. & B. As present participle & adjective: In senses corresponding to those of the verb.

"If they must mourn, or may rejoice In that annihilating voice." Byron: The Siege of Corinth, 24.

C. As substantive: The act of blotting out of existence, either by reducing to nothingness, or by resolving into its constituent parts; the state of being thus blotted out.

"... for spirits that live throughout Vital in every part, not as frail man In entrails, heart or head, liver or reins, Cannot but by annihilating die." Milton: P. L., bk. vi.

an-nī-hīl-ā-tion (h silent), s. [Lat. *annihilation*; In Fr. *annihilation*; Sp. *aniquilacion*; Port. *aniquilacao*; Ital. *annichilazione*.]

I. The act of blotting out of existence— (1) By reducing to nothingness—

"The tempest cometh: Heaven and Earth unite For the annihilation of all life. Unequal is the strife Between our strength and the Eternal Might!" Byron: Heaven and Earth, l. 5.

Or (2) by resolving into its constituent elements, and rendering needless for the purpose to effect which these were combined.

II. The state of being thus blotted out of existence.

"God hath his influence into the very essence of things, without which their niter annihilation could not chauce but follow."—*Hooker*.

† Blank annihilation = complete annihilation. "... which presents not the too fugitive glimpses of past power, but its blank annihilation."—*De Quincey: Works* (ed. 1888), vol. ii., p. 118.

bōl, bōy, pōut, jōwl; eat, cōll, chor-us, chīn, bench; go, gēm; thīn, thīs; sīn, aḡ; expect, Xēnophon, exīst. -īng. -tion, -sion = shūn; -tion, -gion = zhūn. -tious, -cious = shūs. -ble, -dle, &c. = bēl, dēl. -ole, -kle = kēl. -kre = kēr.

án-ní-híl-á-tion-ism, s. [ANNIHILATION.]

*Eccles.*: The doctrine that the wicked will be annihilated after death.

án-ní-híl-á-tion-ist, s. [ANNIHILATIONISM.]

*Eccles.*: One who believes in annihilationism. (Used also adjectively.)

án-ní-híl-á-tive, a. [Eng. annihilate; *ive.*]

That causes annihilation.

án-ní-híl-á-tór (h silent), s. [Eng. annihilate; suffix *-or.*]

One who, or that which annihilates. (In the latter sense chiefly in composition, as *smoke-annihilator.*)

án-ní-te, s. [Named from Cape Ann, in North America.]

A mineral classed by Dana in his Mica group. Its hardness is 3; sp. gr., 3.169; colour, black; streak, dark green. Composition: Silica, 37.89 to 39.55; alumina, 16.66 to 16.73; sesquioxide of iron, 12.07 to 13.74; protoxide of iron, 17.43 to 19.03; potassa, 10.20 to 10.66, with smaller proportions of sesquioxide of manganese, magnesia, &c. At Cape Ann it occurs in granite.

án-ní-vér-sar-í-lý, adv. [Eng. anniversary; suffix *-ly.*]

At the return of the same period of the year; annually.

"A day was appointed by public authority to be kept anniversaryly sacred unto the memory of that deliverance and victory."—*Sp. Hist. Sem.*, p. 612.

án-ní-vér-sar-ý, a. & s. [In Fr. anniversary; Sp. aniversario; Port. & Ital. anniversario.]

From Lat. *anniversarius* = yearly, annual; *anni* = of the year, genit. of *annus* = the year, and *versum*, supine of *verto* = to turn.]

A. As adjective:

- \* 1. Performed in a year.

"The heave whirled about with admirable celerity, most constantly finishing its anniversary vicissitudes."—*Rag.*

- 2. Recurring once a year at a stated time; annual, yearly.

*Anniversary services*: Services held on annually recurring days to commemorate certain occurrences which happened on those days, or are associated with them. Most congregations of recent origin have an anniversary service to commemorate the day on which their church was opened. The name is less frequently applied to Good Friday, Christmas Day, and similar Christian festivals.

B. As substantive:

I. Ordinary Language:

1. An annually recurring day on which some notable event in ecclesiastical, in national, in local, or in personal history took place, or is wont to be celebrated.

"... the memory of the rout at Allis, kept alive by a solemn anniversary, was fresh in the minds of the people."—*Lewis: Early Rom. Hist.*, ch. xiii., p. 1, § 13.

"That day was the anniversary both of William's birth and of his marriage."—*Macaulay: Hist. Eng.*, ch. 1.

"It was near nine in the evening before the House rose. The following day was the 30th of January, the anniversary of the death of Charles I."—*Ibid.*, ch. 2.

2. The celebration which takes place at such annually recurring periods.

"Doane had never seen Mrs. Drury, whom he has made immortal in his admirable *anniversaries*."—*Brady.*

II. Technically. In the Church of Rome: An office for the souls of certain deceased persons, which is celebrated once a year, but which, it is held, ought to be so daily. (*Ayliffe: Parergon.*)

án-ní-verse, s. [Lat. *anni*, genit. of *annus* = a year, and *versus* = turning; *verto* = to turn. The turning of a year.]

An anniversary.

"... shall an anniversary be kept with ostentation to rehearse A mortal prince's birthday, or repeat An eighty-eight, or powder plot's defeat."—*Hale on Christmas Day.*

án-nív-ite, s. [Named from the Anniver in the Valais.]

A mineral, a variety of Tetrahedrite.

án-nó, s. [Lat. Ablative of *annus* = a year.]

**Anno Domini.** In the year of the Lord, *i. e.*, our Lord Jesus Christ. The time is fixed by the calculations of Dionysius Exiguus, which are erroneous, it is thought, by about four years. [DIONYSIAN ERA.] (Usually written A. D.)

Anno Mundi. In the year of the world.

(Usually written A. M.)

¶ Since Geology has proved the earth to have existed infinitely longer than was once believed, the expression *Anno Mundi*, in the old sense, has become obsolete. The datea which it furnishes are now known not to have even approximated to the truth.

án-nó-dá-téd, a. [NODE.]

*Heraldry*: Bowed, embowed or bent like the letter S. (*Gloss. of Heraldry.*)

án-nó-dón, s. [ANODON.]

\* án-nóis-ánc, s. [NUISANCE.]

án-nóm-ý-náte, v. t. [As if from a Lat. *annominor.*] To name. (*Southey: The Doctor*, ch. viii.)

án-nóm-ýn-á-tion, s. [In Fr. *annominatio.*] From Lat. *annominatio*, *agnominatio*; *ad* = to, and *nomino* = a naming; *nomino* = to name; *nomen* = a name.]

- 1. Alliteration. The use of several words beginning with the same letter.

"Giraldu Cambrensis speaks of *annominatio*, which he describes to be what we call alliteration."—*Tyrolitz: Ess. on the Lang. of Chaucer*, § 1, n.

2. *Rhet.*: A paronomasia, a pun. The using of two words alike or nearly alike in sound, but widely different in meaning.

án-nó-na, s. [LAT.]

- 1. The year's produce; hence the necessaries of life, grain.

"L. Minucius was appointed prefect of the *annonæ*, with the special duty of providing supplies of corn."—*Lewis: Early Rom. Hist.* (1855), ch. xii., p. 1 v., § 62.

- 2. Bot. [ANONIA.]

án-nó-táte, v. t. [In Fr. *annoter*; Port. *anotar*; Ital. *annotare*.]

From Lat. *annoto* = to write down, to comment upon.] To make notes or comments upon a book or manuscript or other composition. (Used also as *v. t.*)

"Give me leave to *annotate* on the words thus."—*Rice: Orator*, p. 28.

án-nó-tá-tion, s. [In Fr. *annotation*; Sp. *anotacion*; Port. *anotacao*; Ital. *annotazione*.]

From Lat. *annotatio* = a noting down, annotation; *ad* = to, and *notatio* = a marking, a noting; *nota* = to distinguish by a mark; *nota* = a mark.]

- 1. The act of noting anything down.

2. The thing noted down. Generally in the plural, signifying notes, comments, or scholia on a published work or a manuscript writing, of which the annotator is not the author.

"It might appear very improper to publish *annotations* without the text itself whereunto they relate."—*Boyle.*

*Med.*: The first symptoms of a fever, or attack of a paroxysm.

án-nó-tá-tion-ist, s. [Eng. *annotation*; *-ist.*]

One who annotates; an annotator.

"Mr. Mede hath with far more clearness shewn, than the *annotators* of the new way have discovered."—*Worthington: Miscell.*, p. 65.

án-nó-tá-tór, s. [Lat. *annotator* = an observer, remarker, overseer. In Fr. *annotateur*; Sp. *anotador*; Port. *anotador*; Ital. *annotatore*.]

One who makes annotations; a schollast, a commentator.

"I have not that respect for the *annotators* which they generally meet with in the world."—*Fellon: On the Classics.*

án-nó-tá-tór-ý, a. [Eng. *annotator*, and suff. *-y.*]

Containing annotations. (*Webster.*)

án-nót-ý-noús, a. [Lat. *annotivus* = of a year old; from *annus* = a year.]

Bot.: Yearly, annual, having the growth of a year.

án-nót-tó, án-nót-tá. [ARNOTTO.]

án-nóu'nc, v. t. [Fr. *annoncer* = to proclaim; *nonce* = a nuntio; Sp. *anunciar*; Port. *anunciar*; Ital. *annunciare*.]

From Lat. *annuncio* or *annuntio* = to announce, to proclaim; *ad* = to, and *nuntio* = to proclaim; *nuntius* = a messenger.] [NUNTIVUS.]

1. To proclaim, to publish as news, to make publicly known. (Followed by the objective case of the intelligence made known, or by a clause of a sentence introduced by *that*.)

"Of the Messiah I have heard foretold By all the prophets; of thy birth at length Announced by Gabriel with the first I knew."—*Milton: P. R.*, bk. iv.

"The peal of a musket from a particular half moon was the signal which announced to the friends of the House of Stuart that another of their emissaries had got safe up the rock."—*Macaulay: Hist. Eng.*, ch. xiii.

† 2. To give forth a judicial decision.

"Those, mighty Jove, meantime, thy glorious cars, Who model nations, publish laws, announce Or life or death."—*Prior.*

án-nóu'ncd, pa. par. & a. [ANNOUNCE.]

án-nóu'nc-mént, s. [Eng. *announce*; *-ment.*]

The act of announcing; the state of being announced; the news proclaimed, published, made known, or declared.

¶ Of modern introduction into the language, *announcing* having been the term formerly employed. (See *Tod*.)

"As soon as Lewis was again at Marli, he repeated to the Court assembled there the *announcement* which he had made at Saint Germaine."—*Macaulay: Hist. Eng.*, ch. xxv.

án-nóu'nc-ér, s. [Eng. *announce*; *-er.*]

In Fr. *annonceur*.] One who announces. (*Cotgrave.*)

án-nóu'nc-íng, pr. par. [ANNOUNCE.]

án-nóy', \* a-nóy'e, \* a-nó'le, v. t. [Norm. *annoyer*, from *nuire* or *nuire* = to hurt; Fr. *annoyer* = to weary; *nuire* = to damage, to hurt; Ital. *annoiare* = to weary, to tire; *nuocere* = to hurt. From Lat. *noceo* = to harm or hurt.]

[NUISANCE, NOXIOUS.]

- 1. Lit. Of persons or other conscious beings: To tease, to molest, to put to inconvenience, to trouble, to inflict vexation upon.

"None sventure, for wich the knyghts were Annoyd all at the abiding there."—*Levenet of the Laik* (ed. Skeat), bk. 1, 350, 351.

"His falous-ship aboyt of that thing, And als therof annoy was the king."—*Ibid.*, bk. ii., 2, 343, 2, 344.

"... he determined not yet to dismiss them, but merely to humble and annoy them."—*Macaulay: Hist. Eng.*, ch. iv.

- 2. Fig. Of unconscious existence:

(a) To drive or toss hither and thither.

"His limbs would toss about him with delight, Like branches when strong winds the trees annoy."—*Wordsworth.*

(b) To harm, to injure.

"Salomon saith, that right as motthes in shepces fees annoyeth the clothes, and the snale wormes to the tre, right so annoyeth sorwe to the herte."—*Chaucer.*

\* án-nóy', \* án-nóy'e, a. [From the substantive.]

Annoyances. (Obsolete, except in poetry.)

"Council or help; and therof telleth me Al your annoy, for it schal be secret."—*Chaucer: C. T.*, 14, 540, 14, 541.

"And, in the shepe of that young boy, He wrought the castle mark annoy."—*Scott: The Lay of the Last Minstrel*, lll. 2.

án-nóy'ánc, a. [Eng. *annoy*; *-ance.*]

- 1. The act of annoying, molesting, or teasing.

"For the further annoyances and terour of any beyled places, they would throw into it dead bodies."—*Wilkins.*

- 2. The state of being annoyed, molested, or teased.

"... a government which has generally caused more annoyance to its allies than to its enemies."—*Macaulay: Hist. Eng.*, ch. xx.

- 3. That which annoys, molests, or teases.

"Prud. Can you remember by what means you find your annoyances, at times, as if they were vanquished?"—*Bunyan: P. F.*, pl. 1.

\* án-nóy'e, s. [ANNOY.]

án-nóy'ed, pa. par. & a. [ANNOY, v.]

án-nóy-ér, s. [Eng. *annoy*; *-er.*]

One who annoys. (*Johnson.*)

\* án-nóy'-fúl, \* a-nó'f-ful, a. [Eng. *annoy*; *full.*]

Eminently capable of inflicting annoyance.

"For al be it so, that al taryng be annoyful, sighter it is not to repreve in geivyng of judgement, ne in vengeance taking, when it is sufficient and reasonable."—*Chaucer: Melibeu.*

\* án-nóy'-íng, pr. par. & a. [ANNOY, v.]

\* án-nóy'nte, v. t. [ANNOY.]

\* án-nóy'-oús, \* a-nóy'-oús, a. [Eng. *annoy*; *-ous.*]

Troublesome, fitted to produce annoyance.

"I han cleped to your counsel a gret multitude of people, ful charged and ful annoyous for to here."—*Chaucer: Melibeu.*

án-nū-ál, a. & s. [In Fr. *annuel*; Sp. *anual*; Port. *anual*; Ital. *annuale*.]

From Lat. *annuus* = a year old; *annus* = a year.

áte, fát, fáre, amidst, whát, fáll, father; wé, wét, hère, camél, hër, thère; pine, pit, síre, sír, maríne; gó, pót, or, wóre, wólf, wórk, whò, sòn; müte, cüb, cüre, ünite, cür, rüle, füll; trý, Sýrian. æ, œ = ē. ey = ā. qu = kw.

"Annus was synonymous with annulus, and originally meant a ring or circle, like circus and circulus." (Lewis: Astron. of the Ancients, ch. i., § 3.) The old form of annus was annuus, as in solemnis. (Key: Philol. Essays, 1868, p. 260.)

A. As adjective:

I. Ordinary Language:

1. Requiring just a year to finish; performed exactly in a year.

"That waits thy throne, as through thy vast domain, Annual, along the bright celestial road." Thomson: Seasons: Summer.

2. Occurring or returning every year.

"To Castile came the annual galleons laden with the treasures of America." Macaulay: Hist. Eng., ch. xxiii.

3. Fulfilling its function and running its course; or being born, living and dying within a period often falling short of, but in no case exceeding, a year. (See II. 3, and B. 1.)

"Every tree may, in some sense, be said to be an annual plant, both leaf, flower, and fruit proceeding from the coat that was superinduced over the wood the last year." Ray.

¶ The Old English word which annual partly displaced when it came into the language was yearly. (Barnes: Early English, p. 104.)

II. Technically:

1. Astronomy:

Annual Equation. [EQUATION.]

Annual Parallax. [PARALLAX.]

Annual Variation. [VARIATION.]

2. Scots Law. Annual rent: Rent annually paid by a proprietor of lands or houses to a creditor as interest of his debt, and ceasing if the debt be paid.

3. Botany and Gardening:

(a) Annual leaves, called also deciduous leaves, are those which fall in the autumn, as those of most of our common trees. (Lindley.)

(b) Annual rings: Concentric rings or circles seen when exogenous stems are cut across transversely. Though generally indicating annual additions to the woody growth, yet there are rare and abnormal cases in which a tree may produce two of them in a year.

(c) Annual plants. [B. 1.]

B. As substantive:

1. Ord. Lang. Botany & Gardening: A plant which is sown, grows up, flowers, sheds its seeds, and dies, all within the compass of one year, or, more probably, of the portion of the year extending from spring to autumn.

"Now is the time to procure and sow (under glass) the seeds of all the choicest annuals. . . . Aster of varieties, balsams, zinnias, and stocks are quite indispensable." Hort. Record, March 1, 1877.

2. A book published only once a year, and probably about Christmas.

¶ See also ANNUAL.

an-nū'-ī-tŷ, s. [Fr. annuité; Ger. annuität, from Lat. annuus = a year.]

A. Ordinary Language: A fixed sum of money paid yearly.

Specially:

1. A yearly allowance.

"He was generally known to be the son of one earl, and brother to another, who supplied his expense beyond what his annuity from his father would bear." Clarendon.

2. In the same sense as B., Arithmetic, Law, &c. (For example, see ANNUANT.)

B. Technically:

1. Arithmetic, Law, &c.: A sum of money which, according to the etymology, should be paid annually, but is more frequently settled half-yearly or quarterly, given to one as a superannuation or other allowance for services rendered, in which case it is synonymous with a pension, or to consideration of its value in money paid beforehand. Under the Roman law annuities were sometimes granted by will, the obligation of paying them being imposed upon the heir. Borrowers in the Middle Ages were frequently obliged to grant annuities, in lieu of interest, the exaction of which by creditors was forbidden as usury; and the practice received the Papal sanction in the fifteenth century.

Annuities may be primarily divided into annuities certain and life annuities.

An annuity certain is one in which the annual payment does not depend upon any contingent event, but is to be made certain either in perpetuity or during a period named. A perpetual annuity, or perpetuity, differs from interest in this respect, that the purchaser of the former cannot demand back the principal, whilst if he has put his money out at interest he can. He may, however, sell his annuity to some one else, which is tantamount to obtaining the principal back. The other original party to the transaction can, as a rule, at any time terminate the obligation to pay the annuity by giving back the principal.

A life annuity, often called simply an annuity, is one payable during the lifetime of the annuitant or annuitants. An immediate annuity is one commencing at once, and payable whenever the stipulated period for the handing over of the first instalment arrives. A deferred or reversionary annuity is one of which the payments are not to commence till after the lapse of a considerable period. A man of forty, for example, may make provision for his declining years by purchasing an annuity not to commence till he is sixty, if he live so long. A temporary or terminable annuity is one which will cease at a certain stipulated time, say in twenty years, or at the death of an individual. The term or period for which it is to continue is generally called its status. An annuity not to commence till after a certain period, and then to continue for ever, is called a deferred perpetuity. Under the English system of finance all Government annuities on the lives of individuals are terminable annuities; whilst the interest of the national debt, which is also called an annuity, is a perpetual one. It does not cease till that portion of the principal is paid off. An annuity in possession is one which has already commenced. A joint annuity on two lives is one payable only till one of the parties die. Sometimes, again, an annuity is purchased which it is stipulated shall continue till two persons who are to receive it are both dead. The holder of an annuity is called an annuitant; the person on whose life the annuity depends, the nominee; and the annual sum paid, the rent or the magnitude of the annuity.

The calculation of annuities falls under the province of arithmetic. A perpetual annuity is easily calculated, the yearly payments of which it consists being simply interest on the principal given for its purchase. To calculate a life annuity it is useful to ascertain the probability of life in one of the age and sex of the applicant for an annuity. [PROBABILITY, EXPECTATION, LIFE, MORTALITY.] The other element is what compound interest the sum paid for the purchase of the annuity would fetch during the number of years that the life is likely to continue.

The principles on which the value of annuities certain is calculated, are applicable also to the case of leasehold property.

The subjoined table shows the value of an annuity of £1 per annum, estimated on the life of a male or of a female, at the several

ages given below, it being supposed that at the time of calculation interest is 3 per cent. annually. The purchase money is stated in pounds sterling and decimals of a pound:—

Table with columns: Age last Birthday, Male, Female. Rows from 0 to 100.

In England, government annuities are now granted for sums not exceeding £50 annually at the several local Post Offices, whilst those above £50 may be procured at the National Debt Office. No similar system exists in the United States.

"These duties were to be kept in the Exchequer separate from all other receipts, and were to form a fund on the credit of which a million was to be raised by the annuities." Macaulay: Hist. Eng., ch. xix.

"The difference between a rent and an annuity are, that every rent is going out of land; but an annuity charges only the grantor, or his heirs, that have assets by descent. The second difference is, that for the recovery of an annuity no action lies, but only the writ of annuity against the grantor, his heirs, or successors; but of a rent the same actions lie as do of land. The third difference is, that an annuity is never taken for assets, because it is no freehold in law; nor shall be put in execution upon a statute merchant, statute staple, or elegit, as a rent may." Cowell.

an-nū', v.t. [In Fr. annuler; Sp. anular; Port. annular; Ital. annullare; Eccles. Lat. annullo; from ad = to, and nullum, secus sent. of nullus = none.]

\* 1. To reduce to nothing. (Used of persons as well as things.)

"Truly the like y' han might to do good, and dona it oot, y' crowa of worship shall be take from hem, with shame shall they be annulled." Chaucer: Troil. & Cr., bk. iii.

"Light, the prime work of God, to me is extinct, And all her various objects of delight Annul'd, which might in part my grief have eased." Milton: Samson Agonistes.

2. To abrogate, to make void, repeal, nullify, or abolish a law, a legal decision, an obligation, arrangement, or a custom deriving its validity from constituted authority; also to nullify a gift, grant, or promise by whomsoever made.

" . . . that he should assume the power of annulling some judgments and some statutes." Macaulay: Hist. Eng., ch. xlii.

"How in an hour the power which gave annuls His gifts, transferring fame as fleeting too." Byron: Ch. Har., ill. 18.

" . . . all subsisting debts shall be forthwith annulled, and all insolvent debtors, reduced to slavery by their creditors, shall be liberated." Lewis: Early Rom. Hist., ch. xii., pt. 1, § 18.

an-nū-lar, a. [Fr. annulaire; from Lat. annularis or annularis = pertaining to a signet ring; annulus or annulus = a ring.] In the form of a ring; ringed; wearing a ring, as annular finger. (Beaumont: Psyche, 60.)

1. Min. An annular crystal is a hexagonal prism with six, or an octagonal prism with eight, marginal faces disposed in a ring about its base, or one or other of these prisms truncated on all its terminal edges.

2. Astron. An annular eclipse of the sun is an eclipse in which the whole of the moon is seen upon the sun's disc. The moon, however, in certain positions being too small to cover the disc, the sun appears in a form more or less resembling a ring. At other times the moon is so situated as to be able to produce a total eclipse of the greater luminary. (Herschel: Astron., 5th ed., 1858, § 425.) An annular nebula is a nebula of a form suggestive of a ring. Such nebula exist, but are among the rarest objects in the heavens. A nebula of this character, situated between the stars β and γ Lyrae, has been resolved by Lord Rosse's powerful telescope into a multitude of minute stars, with filaments of stars adhering to the edges. (Ibid., 10th ed., § 875.)

ANNULAR ECLIPSE.

3. Anat.: Noting any part of the human frame which approaches the form of a ring.

"That they might not in bending the arm or leg rise up, he has tied them to the bones by annular ligaments.—*Cheyne.*

**Annular protuberance:** The same as the Pons Varolii. It is called also the Isthmus encephali, and the Nodus encephali. (*Todd & Bowman: Physiol. Anat.*, vol. I., pp. 273, 274.)

4. **Arch. Annular vault:** A vaulted roof supported on circular walls.

**án-nū-lar-ly**, *adv.* [Eng. annular; -ly.] In the form of a ring.

**án-nū-lar-y**, *a.* [Lat. *annularis, annularius.*] In the form of a ring or rings.

"Because continual respiration is necessary, the windpipe is made with annular cartilages, that the sides of it may not flag and fall together.—*Aug.*

**án-nū-lá-ta**, *s. pl.* [From Lat. *annulatus, or annelatus* = furnished with a ring; *annulus* or *annulus* = a ring.] A class of annulose animals—the same which was called by Cuvier the Annelida. [ANNELEIDA.]

**án-nū-lá-te, án-nū-lá-téd**, *a.* [See ANNULATA.]

I. **Ord. Lang.:** Furnished with rings, or made of a series of rings; marked with ring-like furrows or depressions.

"This group [of antelopes] is distinguished by having heavy, thick, annulated horns.—*Penny Cycl.*, II. 89.

II. **Technically:**

1. **Zool.:** Pertaining to the class Annulata, Cuvier's Annelida, or, like them, having the body formed of a series of rings.

2. **Bot.:** Ringed, surrounded by elevated or depressed bands; as the roots of some plants or the cupule of several oaks. (*Lindley.*)

3. **Her.:** Having a ring or annulet. (Used specially of a cross with its extremities thus fretted.)

**án-nū-lá-tion**, *s.* [From Lat. *annulatus* = ringed.]

**Bot., &c.:** A ring or circle. (*Loudon: Cycl. of Bot.*)

**án-nū-lét**, *s.* [In Fr. *annelet*; Ital. *anneletto*; from Lat. *annulus* or *annulus* = a ring.]

I. **Architecture:**

1. A small fillet, one of several encircling the capital of a Doric column, just under its ovolo or echinus, as shown in the illustration. They are also called fillets and listels. Their number varied, being three, four, or five, according to the taste of the architect.

ANNULET.

2. A narrow flat moulding common to other parts of the column which it encircles.

II. **Her.:** A ring borne on (in heraldic descriptions the colour of the annulet must always be expressed.)

(a) Formerly it stood as the symbol of nobility and jurisdiction, being the gage of the royal favour and protection. [See ANNULUM ET BACULUM.]

ANNULET.

(b) Now it is the mark of distinction which the fifth son in a family bears on his coat of arms.

**án-nū-lét-tý**, *a.* [Eng. *annulet*; -y.] Pertaining to an annulet; annulated, or ringed. (*Gloss. of Arch.*)

**án-nū-la-ble**, *a.* [Eng. *annul*; -able.] Capable of being annulled, repealed, or abrogated. (*S. T. Coleridge.*)

**án-nū-ment**, *s.* [Eng. *annul*; -ment.] The set of annulling. (*Todd.*)

**án-nū-lól-dá**, *s. pl.* [Lat. *annulus* or *annulus* = a ring; and *éidos* (*eidos*) = form, appearance.] In Professor Huxley's classification, one of the eight primary groups into which he divides the Animal Kingdom. He places it between the Annulosa and the Infusoria. He includes under it (1) the Trematoda, or Flukes; (2) the Teniada, or Tape-worms and Bladder-worms; (3) the Turbellaria; (4) the Acanthocephala; (5) the Nematoidea, or Thread-worms; and (6) the Rotifera, or Wheel Animalcules. But he thinks it not improbable

that the Annuloida will require ultimately to be merged in the Mollusca. (*Huxley: Introd. to the Classif. of Animals*, 1869, pp. 81—85, 127, 128.)

**án-nū-lól-sa**, *s. pl.* [Lat. *annulus* or *annulus* = a ring.] A sub-kingdom of the Animal Kingdom, corresponding with Cuvier's Articulata. The word *Articulata*, signifying jointed, is not a sufficiently distinctive term, for the Vertebrate animals are also jointed. *Annulosa*, signifying ringed, is decidedly better, for the animals ranked under this sub-kingdom have their skeleton, which is external, composed of a series of rings. Prof. Huxley divides them into Chetognatha, Annelida, Crustacea, Arachnida, Myriapoda, and Insecta, these classes being ranged in an ascending order. The last four are further grouped together under the designation Arthropoda (q. v.).

**án-nū-lól-sang**, *s. pl.* [ANNULOSA.] An English term corresponding to the Latin *Annulosa* (q. v.).

**án-nū-lól-se**, *a.* [ANNULOSA.]

I. **Gen.:** Ringed.

2. **Spec.:** Pertaining to animals of the sub-kingdom Annulosa.

"The body is always divided into rings or transverse joints; from which circumstance naturalists have agreed to call them annulose or ringed animals.—*Swainson & Shuckard: Hist. and Classif. of Insects* (1840), p. 1.

**án-nū-lúm ét háč-u-lúm**, *accus. sing. of two Lat. substantives with copulative et.* They are in the accusative because the preposition *per* is understood. [Lat. = (by means of) a ring and a staff or crozier.] [ANNULUS.] A ring and pastoral staff or crozier formerly delivered by kings to bishops on their election. These were designed, it was said, to confer the temporalities annexed to the spiritual office; but Pope Gregory VII. and his successors contended that the symbols adopted were not those of secular, but of sacred office. The papal views on the subject ultimately prevailed; and the Emperor Henry V., with the other European sovereigns, agreed to confer investitures not *per annulum et baculum*, but *per sceptrum*, by the sceptre, the undoubted symbol of temporal authority.

**án-nū-lús** (plur. **án-nū-lí**), *s.* [Lat. = a ring.]

I. **Bot.:** (1) The thickened longitudinal ring which partially surrounds the sporangia of ferns. (*Lindley.*) (2) The elastic external ring with which the brim of the sporangium in mosses is furnished. (*Ibid.*) (3) That part of the veil in fungi which, remaining next to the stipes, surrounds it like a loose collar. (*Ibid.*)

II. **Anatomy:**

1. **Gen.:** Anything resembling a ring.

"They [the horns of the Nyl-ghau (*Arctiopo picta*)] are perfectly smooth and without annuli.—*Penny Cycl.*, II. 75.

2. **Technically.** *Annulus ovalis:* A thick fleshy ring nearly surrounding the *fossa ovalis*, a depression on the middle of the septum in the right auricle of the heart. (*Todd and Bowman: Physiol. Anat.*, vol. ii., p. 335.)

III. **Astron.:** The "ring" of light left during a solar eclipse, when the sun's disc is almost covered by the dark body of the moon. [ANNULAR, 2.]

"... an annular eclipse, a phenomenon to which much interest is attached by reason of some curious optical phenomena first observed by Mr. Baily at the moments of the forming and breaking of the annulus, like beads of light alternating with black threadly elongations of the insect's limbs known by the name of 'Baily's beads.'—*Herschel: Astron.*, 10th ed. (1869), § 425.

**án-nū-mēr-áte**, *v. t.* [Lat. *annumero* = to count out, to pay; *ad* = to, and *numero* = to number.] To add a number to a former one. (*Johnson.*)

**án-nū-mēr-á-tion**, *s.* [Lat. *annumeratio* or *adnumeratio*, from *annumero*.] Addition to a former number. (*Johnson.*)

**ÁN-nūn-čí-áde**, *s.* [Fr. *Annonciade*.]

**Church Hist.:** A religious order of women founded by Queen Jane of France, wife of Lewis XII., and confirmed by the Pope in 1501 and 1517. It was called also the order of the ten virtues or delights of the Virgin Mary, and was designed to honour these specially by reciting the rosary. (*Hook.*)

**† án-nūn-čí-áte, † án-nūn-tí-áte** (ti as shí), *v. t.* [In Sp. *anunciar*. From Lat. *annuntio, annuncia*; *ad* = to, and *nuntio* = to announce; *nuntius* = a messenger.]

1. **Gen.:** To announce; to proclaim tidings of an important character.

"Let my death be thus announced and shewn forth till I come to judgement.—*Bp. Bull: Corrupt. of the Church of Rome.*

2. **Spec.:** To announce, as the angel did to the Virgin Mary that she was about to become the mother of the long-promised Messiah.

"There should he see his blessed Saviour's conception, announced by the angel, March 25.—*Bp. Hall; Rem.*, p. 83.

"... they who did announce unto the blessed Virgin the conception of the Saviour of the world...—*Pearson on the Creed*, Art. 9.

**† án-nūn-čí-á-téd, † án-nūn-tí-á-téd.** \* **ÁN-nūn-čí-áte** (ti as shí), *pa. par. & a.* [ANNUNTIATE.]

"Lo Sampson, whiche that was announced By thangel, long er his nativite."—*Chaucer: C. T.*, 15,501-2.

**án-nūn-čí-á-tion**, *s.* [In Fr. *annunciation*; Sp. *anunciación*; Ital. *annunziatione*. From Lat. *annuntiatio, annunciatio*.]

I. **Gen.:** Announcement; promulgation of important tidings.

"The annunciation of the Gospel.—*Sammond's Sermons*, p. 573.

II. **Specially:**

1. The announcement by the angel to the Virgin that she was about to become the mother of the Divine Saviour.

"Upon the day of the annunciation, or Lady-day, meditate on the incarnation of our blessed Saviour, and so upon all the festivals of the year."—*Bp. Taylor.*

"The most prevalent of these was the year commencing on the festival of the Annunciation of the Virgin, or Lady-day, March 25, which was generally used in England from the 18th century till the abolition of the old style in 1752.—*Lewis: Astron. of the Ancients*, chap. 1, § 6.

2. An appellation given by the Jews to a portion of the Passover ceremonies.

**Annunciation-day**, *s.* The 25th of March, the day on which the Churches of England, Rome, &c., celebrate the angel's annunciation of the Saviour's approaching birth to the Virgin Mary. It is called also Lady-day.

**án-nūn-čí-á-tór**, *a.* [In Ital. *annunciatore*; from Lat. *annuntiator*.]

1. **Gen.:** One who announces.

"... appeal to Moses and the prophets as announciators of the death of Jesus."—*Strauss: Life of Jesus* (Transl. 1846), § 107.

2. Used attributively to denote an apparatus for announcing a call from one place to another, as *annunciator drop, annunciator clock, annunciator needle, &c.*

**án-nūn-čí-á-tór-y**, *a.* [Eng. *annunciator*; -y.] Containing an announcement; giving intelligence. (*Worcester.*)

**án-nūs**, *s.* [Lat.] A year. The ablative *anno* occurs in such expressions as *Anno Mundi*, contracted *A.M.* = in the year of the world; *Anno Domini*, contracted *A.D.* = in the year of our Lord.

**Scotch Law.** *Annus deliberandi* (a year for deliberating): A year allowed an heir to deliberate whether or not he will enter on possession.

**a-nō-a**, *s.* [A name found in the MSS. of Governor Loten.] A sub-genus of ruminating animals provisionally placed by Col. Hamilton Smith under Antelope. The typical species is the *A. depressicornis*, a quadruped resembling a small buffalo, found gregariously in the mountains of the island of Célèbes.

**a-nō-bí-úm**, *s.* [Gr. *άνω* (*anō*) = up, upward, aloft; *βίω* (*biō*) = to live.] A genus of beetles belonging to the family Ptilinidae. It contains the well-known Death-watch insects, *A. striatum, A. tessellatum, &c.*

**án-ō-čá-thar-tic**, *a.* [Gr. *άνω* (*anō*) = up, upwards, and *καθαρτικός* (*kathartikos*) = (1) fit for cleansing, (2) purgative; *καθαίρω* (*kathairō*) = to purify, to cleanse; *καθαρός* (*katharós*) = clean, pure.] Purging upwards; emetic. (*Casle: Lexicon Pharmaceuticum*, 2nd ed. (1827), p. 273.)

\* **án-ō-čýs-tí**, *s. pl.* [Gr. *άνω* (*anō*) = up, upwards, and *κύστις* (*kustis*) = bladder.] An old division of Echinidea, comprising those.

species which have the vent on the dorsal surface. The others were Pleurocyati, with the vent marginal; and Calocyati, with the vent on the under surface. Fleming divided the Anocysti into two sections: (1) Vent ventral, in the axis of the body; genera, Cidara, Echinus, Clippens. (2) Vent lateral, above the margin; genera, Cassidula and Nudacotiles.

an-ode, s. [Gr. ἀνοδος (anodos) = a way up; ἀνά (ana) = up, and ὁδός (hodos) = a way, a road.]

Electrolysis: The name given by Faraday to what is called by Daniell the zincode, and by various other writers the positive pole of an electric battery; or, more precisely, the "way" or path by which the electric current passes out and enters the electrolytes on its way to the other pole. It is a platinum plate occupying the same place in the decomposing cell that a zinc plate does in an ordinary cell of a battery. The other plate corresponding to the second platinum one in an ordinary cell is called by Faraday the cathode or kathode, by Daniell the platinumode, and by many other writers the negative pole. At the positive pole appears one element of the decomposed body called anion, and at the negative the other element termed cation. [KATHODE.]

an-ō-dōn, f. an-ō-dōn-ta, s. [Gr. ἀνόδων (anodōn), neut. sing., and ἀνόδοις (anodōis), neut. plur. of ἀνόδωτος (anodōtos) = toothless; ἀν (an), priv., and ὀδούς (odous), genit. ὀδόντος (odontos) = a tooth.]

1. A genus of fresh-water molluscs belonging to the family Unionidae, or Naides. The ordinary English name of them is Swan-mussel. Woodward, in 1851, estimated the known recent species at fifty, and those found in a fossil state at five, the latter from the Eocene formation. Tate raises the former number to 100, and the latter to eight. A. cygneus is the river-mussel.

2. A genus of arapets destitute of teeth. They belong to the family Dasyptelidae. One species, the Dasyptelis scabra, or Rough Anodon, feeds on eggs, which it sucks. It is found in Southern Africa. (Wood: Nat. Hist., 1863, p. 135.)

an-ō-dyne, s. & a. [Fr. anodin; Sp., Port., & Ital. anodino. From Gr. ἀνόδωτος (anodōtos) = free from pain; ἀν (an), priv., and ὀδών (odōn) = grief, pain.]

A. As substantive: 1. Med.: A medicine which alleviates pain, though, if given in too large doses, it induces stupor.

Garrod arranges anodynes with narcotics and soporifica together thus:—Class II. Medicines whose principal effects are upon the nervous system. Sub-class I.—Medicines acting especially upon the brain proper; but probably also upon other portions of the central nervous system. Order 1. Exhilarants. Order 2. Narcotics, Anodynes, and Soporifics. Order 3. Anesthetics. Opium is soporific and anodyne; whilst belladonna is anodyne and anti-spasmodic.

2. Fig.: Anything designed to mitigate the pain produced by the consciousness of guilt; an opiate for the conscience.

"He had at his command an immense dispensary of anodynes for wounded consciences."—Macaulay: Hist. Eng., chap. vi.

B. As adjective: Mitigating or assuaging pain. "... whilst anodyne, emollient, or gently laxative enemata should be administered."—Dr. Joseph Brown: Cyclop. Pract. Med., vol. II, p. 223.

an-ō-dyn-ōus, u. [Gr. ἀνόδωνος (anōdōnos) = (1) free from pain; (2) mitigating pain.] Having the qualities of an anodyne; mitigating pain of body, or stilling inquietude of mind. (Coles.)

ā-nōg, a. [A.S. genog, genoh = sufficiently, abundantly, enough.] [ENOUGH.] "It adds listed longe anog."—Story of Gen. and Exod. (ed. Skeat), 600.

a-nōl'e, v.t. [ANNOV, v.]

a-nōl'e, s. [ANNOV, s.]

a-nōl'-fūl, a. [ANNOYFUL.]

a-nō-ine, a. [ANNOIA.] Pertaining to the Anoa (q.v.). In Griffith's Cuvier the last subdivision of Antelope is called the Anoiné group. (Griffith's Cuvier, vol. IV, p. 292.)

an-ōint, \*an-ōynto, \*an-nōynto, v.t. [Fr. oindre, pa. par. oint. In Sp. & Port. unguir, untar; Ital. unguere. From Lat. ungo or unguo.]

I. Literally: 1. To pour oil upon. This may be— (1.) For purposes not specially sacred.

"But thou, when thou fastest, anoint thine head, and wash thy face."—Matt. vi. 17.

(2.) For sacred purposes, and specially for consecration of a person, place, or thing. Under the Old Testament economy this was done in the case—

(a) Of Jewish priests.

"Thou shalt then take the anointing oil, and pour it upon his [Aaron's] head, and anoint him."—Exod. xxix. 7.

(b) Of Jewish and other kings.

"Samuel also said unto Saul, The Lord sent me to anoint thee to be king over his people, over Israel."—1 Sam. xvi. 1.

"... and when thou comest, anoint Hazael to be king over Syria."—1 Kings xix. 15.

(c) Of Jewish prophets.

"... and Elisha the son of Shaphat of Abelmeholah shalt thou anoint to be prophet in thy room."—1 Kings xix. 16.

(d) Of the tabernacle and its utensils. (For the anointing of the tabernacle, see Exod. xl. 9; for that of the altar of burnt-offering, see ver. 10; and for that of the laver and its foot, see vers II.)

2. To smear with some more or less viscous substance, which need not be oil.

(1.) For purposes not specially sacred.

"... he anointed the eyes of the blind man with the clay."—John ix. 6.

"Anointed let me be with deadly venom; And die, ere men can say—God save the Queen!"—Shaksp.: Richard III., iv. 1.

(2.) For sacred purposes.

"That had been blessed before with hischops handes, and with besten blood busily anointed."—Alliterative Poems: Cleanness (ed. Morris), l. 445-6.

II. Figuratively: 1. Very seriously:

(1.) To set solemnly apart to sacred office, even when oil was not actually poured upon the head.

"... thy holy child Jesus, whom thou hast anointed."—Acts iv. 27.

(2.) To adopt the means of obtaining spiritual discernment.

"... and anoint thine eyes with eye-salve, that thou mayest see."—Rev. iii. 18.

\* 2. Jocosely: To give a good beating to.

"Then they put hym hout, the kynge away fy, Which so well was anoynted iudede, That no sleue ne pane had he hole of brede."—The Romans of Parthenay (ed. Skeat), 5, 652-4.

an-ōint-ōd, \*an-ōynt-ōd, \*an-nōynt-ōd, pa. par., a., & s. [ANOINT.]

A. & B. As past participle and adjective: In senses corresponding to those of the verb.

"Thou [Tyre] art the anointed cherub..."—Ezek. xxviii. 14.

C. As substantive: 1. An anointed king. Used—

1. Literally:

(a) Of any Jewish king [ANOINT, I. 1, (2), (b)], the customary phrase being "the anointed of the Lord," or "the Lord's anointed."

"The breath of our nostrils, the anointed of the Lord, was taken in their pits."—Lam. iv. 20.

"And David said unto him, How wast thou not afraid to stretch forth thine hand to destroy the Lord's anointed?"—2 Sam. i. 14.

(b) Of an English or other sovereign. In this sense the term is applied with latent sarcasm to those despotic rulers who have largely exercised what has been termed "the right divine of kings to govern wrong."

"Still harder was the lot of those Protestant clergy-men who continued to cling, with desperate fidelity, to the cause of the Lord's anointed."—Macaulay: Hist. Eng., chap. xii.

2. Figuratively:

(a) Cyrus, as executing the Divine commissions of conquering Babylon and releasing the Jews from captivity.

"Thus saith the Lord to his anointed, to Cyrus, whose right hand I have holden, to subdue nations before him."—Isa. xiv. 1.

(b) Christ, the Messiah, the former appellation being from Greek, and the latter from Hebrew; both signifying Anointed. (John i. 41.)

"But let us wait; thus far He hath perform'd, Sent His Anointed."—Milton: P. R., bk. II.

† II. An anointed prophet. (Lit. & Ag.) [ANOINT, I. 1, (2), (c).]

"Saying, Touch not mine anointed, and do my prophets no harm."—1 Chron. xvi. 22; Ps. cv. 15.

an-ōint-ōr, s. [Eng. unoint; -er.] One who at the moment is engaged in anointing, or whose office is to anoint.

1. In a general sense.

"... and the stiner also an anointer."—Strauss: Life of Jesus (Transl. 1846), § 90.

2. Church Hist. (See the example.)

"At Watlington, in Oxfordshire, there was a sect called Anointers, from their anointing people before they admitted them into their communion."—Dr. Plot's Oxfordshire, ch. xxxviii. (Grey: Notes on Hudibras, III. 2.)

an-ōint'-ing, pr. par., a., & s. [ANOINT.]

A. As present participle: In senses corresponding to those of the verb.

B. As adjective. Used—

1. Of the person applying the oil.

"... the anointing woman..."—Strauss: Life of Jesus (Transl. 1846), § 90.

2. Of the oil applied.

"... spices for anointing oil..."—Exod. xxv. 6.

"... This shall be an holy anointing oil unto me throughout your generations."—Ibid., xxx. 31.

C. As substantive:

1. Lit.: The act of anointing; the state of being anointed for ordinary or for sacred purposes.

"Their bathings and anointings before their feasts, their perfumes and sweet odours in diverse kinds at their feasts."—Bacon: Apology, p. 300.

"... for their anointing shall endure by an everlasting priesthood throughout their generations."—Exod. xl. 15.

2. Fig.: The reception of spiritual benefit, even when no actual application of oil has taken place.

"But the anointing which ye have received of him abideth in you, and ye need not that any man teach you: but as the same anointing teacheth you of all things, and is truth, and is no lie, and ever as it hath taught you, ye shall abide in him."—1 John II. 27.

an-ōint-ment, s. [Eng. anoint; -ment.]

The act of anointing; the state of being anointed. (Lit. & fig.)

"... of his holy anointment from God the Father, which made him supreme bishop of our souls..."—Milton: Animad. Bern. Def.

an-ōl'-is, s. [From Anoli, or Analli, the name given to the Anolis in the Antilles.] The same as the Anolis of Cuvier. A genus of Scorpions, belonging to the family Iguanidae. Various species exist, some of which have been removed to other genera. All are from America. Two of the best known are the Green Carolina Anolis (A. principalis), and the Red-throated Anolis, a native of the American continent and the West India islands.

† an-ōm'-al, s. [Fr. anomal = anomalous.]

An anomalous verb or other word. (Ogilvie.)

an-ōm'-a-lī-pēd, an-ōm'-a-lī-pōde, a. & s. [In Ger. anomalpedisch. From Gr. ἀνωμαλία (anōmalia) = anomaly, and Lat. pedis, or Gr. πούς (pous), genit. ποδός (podos) = foot.]

A. As adjective: Having an anomalous foot; having the middle toe united to the exterior by three phalanges, and to the interior by a single phalanx only (said of birds).

B. As substantive: A bird with toes thus constituted.

\* an-ōm'-al-ism, s. [Formed by analogy, as if from a Greek ἀνωμαλισμός (anōmalismos).] [ANOMALOUS.] An irregularity, an anomaly. (Johnson.)

an-ōm-al-is'-tic, an-ōm-al-is'-ti-cal, a. [In Ger. anomalistisch; Fr. anomalistique; Port. anomalístico.] Pertaining to what is anomalous or irregular.

Astronomy:

Anomalistic Period: "The time of revolution of a planet in reference to its line of apses." In the case of the Earth, the period is called the anomalistic year. (G. F. Chambers: Astron., ed. 1867, Gloss.)

Anomalistic year: A year consisting of 365 days, 6 hrs., 13 min., 49.3 secs. It exceeds the sidereal year by 4 min., 39.7 secs., because owing to a slow motion which the longer axis of the earth's ellipse makes of 11.8 seconds yearly in advance, our planet is the number of minutes and seconds mentioned above in travelling from perihelion to perihelion. (Herschel: Astron., 10th ed., § 884.)

bōil, bōy, pōut, jōwī; cat, cōll, choros, ghin, bēnch; go, gēm; thin, thīs; sin, aš; expect, Xēnophon, exist. -īng. -tion, -sion, -tionn, -cionn = shūn; -fion, -gion = zhūn. -tious, -sious, -cious = shūs. -ble, -dle, &c. = bēl, dēl.

an-om-al-is-tic-al-ly, adv. [Eng. anomalistical; -ly.] In an anomalous way; in an abnormal way; irregularly.

an-om-al-ous, a. [In Fr. anomal; Sp., Port., & Ital. anomalo; Lat. anomalos. From Gr. ἀνόματος (anómalos) = uneven, irregular; deviating from a general rule: ἀν (an), priv., and ὁμαλός (homalos) = even, level smooth; ὁμός (homos) = one and the same, in common; Wel. hama; Irish amháil = similar.] Deviating from rule; irregular, abnormal.

"And how long was the anomalous government planned by the genius of Sancerot to last."—Macaulay: Hist. Eng., ch. x.

an-om-al-ous-ly, adv. [Eng. anomalously; -ly.] In an anomalous manner.

"Eve was not solemnly begotten, but suddenly framed and anomalously proceeded from Adam."—Browne: Vulgar Errors, bk. v., ch. v.

an-om-a-ly, s. [In Ger. & Fr. anomalie; Sp. anomalía, anomalidad. From Gr. ἀνομία (anómia) = unevenness, irregularity, deviation from rule; ἀνόματος (anómalos) = uneven, irregular; ἀν, priv., and ὁμαλός (homalos) = even, smooth; ὁμός (homos) = one and the same.] [ANOMALOUS.]

A. Ordinary Language:

Gen.: Deviation from rule; irregularity.

"As Professor Owen has remarked, there is no greater anomaly in nature than a bird that cannot fly."—Darwin: Origin of Species, ch. v.

"The truth is that the dispensing power was a great anomaly in politics."—Macaulay: Hist. Eng., ch. ii.

B. Technically:

1. Astron.: The deviation in a planet's course from the aphelion or apogee. It is of two kinds, the true and the mean anomaly. The true is that which actually takes place. The mean is the angular motion which would have been performed had the motion in angle been uniform instead of the motion in area. (Herschel: Astron., 5th ed., § 499.)

Astron. Eccentric Anomaly: "An auxiliary angle employed to abridge the calculations connected with the motion of a planet or comet in an elliptic orbit. If a circle be drawn, having its centre coincident with that of the ellipse, and a diameter equal to the transverse (major) axis of the latter; and if from this axis a perpendicular be drawn through the true place of the body in the ellipse to meet the circumference of the circle, then the eccentric anomaly will be the angle formed by a line drawn from the point where the perpendicular meets the circle, to the centre, with the longer diameter of the ellipse." (Hind.)

Describe the circle A B C D, so that its centre L shall coincide with that of the ellipse, A E C F, in which the planet P moves, and its diameter A C be = the longer axis of the

ECCENTRIC ANOMALY.

ellipse. Let s be the position of the sun in one of the foci of the ellipse, then A is that of the planet when in perihelion, and c that which it occupies when in aphelion. Join P s, then the angle P s L is the true anomaly. Proximity to the sun made the planet travel more quickly at A than at c. If the rate had been uniform, it would not have reached P. Let it be supposed that it would have been only at e, then A s e is its mean anomaly. Let fall P R a perpendicular to A c from P; produce it in the other direction to B in the circumference of the circle; join B L, then A L B is the eccentric anomaly. In calculating the motion of the moon, the earth is supposed to be at s, as it is also held to be when inquiry is made into the apparent course of the sun through the ecliptic.

2. Music: A small deviation from a perfect interval, in tuning instruments with fixed notes; a temperament.

an-ō-mē'-ans, an-ō-mōs'-ans, s. pl. [Gr. ἀνόμοιος (anómios) = unlike: ἀν (an), priv., and ὁμοίος (homíios) = like.]

Church Hist.: A sect who are reported to have held that Christ was a created being, and possessed of a nature unlike that of God. Their leader was Eunomius, secretary to Aëtius. He was made Bishop of Cyzicum in A.D. 360, and died about 394. The Anomeans were considered extreme Arians. They were condemned by the Semi-Arians at the Council of Seleucia in A.D. 359, but they soon afterward retaliated at the Council or Synod of Constantinople.

an-ō-mī'-a, s. [Gr. ἀνόμοιος (anómios) = unlike (Woodward); ἀνομία (anómia) = lawlessness (Owen).] A genus of molluscs belonging to the Ostreida, or Oyster family. They are found attached to oyster and other shells, and frequently acquire the form of the surface with which they are in contact. They are not eatable. In 1875 Tate estimated the known recent species at twenty, and the fossil thirty-six, the latter from the Oolite upwards. The A. Ephyppium is the saddle-shell. It is a beautifully thin and elegantly waved shell. It inhabits the British seas.

an-ō-mī'-i-dæ, s. pl. [From the typical genus Anomia (q.v.).] A family of Conchiferous Molluscs, recently separated from Ostreidae. Tata includes under it the genera Anomia, Placunomia, Placuna, Carolia, Placunopsis, and Placenta.

an-ō-mīte, s. [From Eng. anomia (q.v.), and -ite.] A fossil anomia.

an-ōm-ō-dōn'-tī'-a, s. pl. [Gr. ἀνόμος (anómōs) = irregular: ἀν, priv., νόμος (nomos) = law, and ὀδούς (odous), genit. ὀδόντος (odontos) = a tooth.]

Paleont.: In Professor Owen's classification, the fifth order of the class Reptilia, or Reptiles. He includes under it two families, Dicynodontia and Cryptodontia.

an-ō-mōs'-ans. [ANOMEANS.]

an-ōm-ūr'-a, s. pl. [Gr. ἀνόμος (anómōs) = without law; οὐρά (oura) = tail.]

Zool.: A sub-order of Decapod Crustaceans, intermediate between Macrura and Brachyura, differing from the former in the absence of an abdominal fan-shaped fin, as also of natatory feet; and from the latter in general possessing appendages attached to the penultimate segment of their abdomen. The sub-order is divided into the families Paguridae, Hippidae, Raninidae, Homolidae, and Dromiidae (q.v.). Its best known representatives are the Hermit Crabs (Paguridae).

an-ōm-ūr'-al, an-ōm-ūr'-ous, a. [Mod. Lat. anomur(a); -al, -ous.] Belonging to, characteristic of, or resembling the Anomura (q.v.).

an-ōm-ý, s. [Gr. ἀνομία (anomia) = lawlessness; ἀν, priv., and νόμος (nomos) = law.] Breach or violation of law; lawlessness.

"If sin be good, and just, and lawful, it is no more evil, it is no sin, no anomy."—Bramhall against Hobbes.

a-nōn, 'a-nōn, adv. [A.S. on = in; an = one. Junius, Horne Tooke, &c., supply minute, and make anon mean primarily "in one minute." Webster believes it should be in continuation, in extension, applied first to extension in measure, and then by analogy to time. He quotes the Saxon Chronicle, A.D. 1022, where it is stated that a fire "weax on lengthe up an on to tham wolcne," which he freely renders, "increased in continuation to the clouds." See also, he adds, A.D. 1127. Morris brings anon from A.S. anane, onane = in one moment. (Alliterative Poems, Gloss.) In Bosworth's A.S. Dict. anon is = singly, and on-an = in one, once for all, continually.]

1. Quickly, speedily, at once, in a short time.

"And hastily for the Provost they sent. He came anon, without saying."

Chaucer: C. T., 15, 927-28.

¶ Anon, sir = Immediately, presently, sir; or as the phrase now is, "Coming, sir," was the customary answer of waiters in the Elizabethan age, when called to attend on a guest. (Nares.)

"Like a call without Anon, sir. Or a question without an answer." Witts Recreations, sign. T. 7.

2. At other times. (Opposed to sometimes.)

"Full forty days he pass'd, whether on hill. Sometimes anon in shady vale, each night, Or harbour'd in one cave, is not reveal'd." Milton: P. E., bk. 1.

Ever and anon: Every now and then.

\*anon-right, adv. Immediately, at once.

a-nō'-na, s. [Corrupted from the Malay manoa, pronounced, in the Banda Islands, menona.]

Bot.: The typical genus of the order of plants called Anonaceæ, or Anonads. It contains the Custard Apple (A. squamosa), the Sour-app (A. muricata), the Bullock's Heart (A. reticulata), and the Cherimolla (A. cherimolla), &c. The seat of the genus is properly the warmer parts of America, but the species

ANONA SQUAMOSA (CUSTARD APPLE).

now named are cultivated in India, where the Custard Apple is called Sactaphul (that is, Sactas fruit), and the Bullock's Heart, Ranupul, that is, Ramas fruit. A. palustris is the cork-wood of Jamaica. A species of Anona grew in Britain during the Eocene period, its seeds being found fossil in the London clay of Sheppey. The seeds of A. squamosa are highly acrid and poisonous. Powdered and mixed with flour made from grain (Cicer arcticum), they are used by the natives of India for washing their hair. In Brazil corks are made from the root of A. palustris, and the light white wood of A. sylvatica is employed by turners; whilst the fruit of the last-named species is eaten at desserts.

an-ō-nā'-ōē'-es (Mod. Lat.), a-nō'-nāds

(Eng.), s. pl. [From the typical genus Anona (q.v.).] An order of exogenous plants classed by Lindley under his Ranaleæ, or Ranal Alliance. They have six petals, hypogynous stamina generally indefinite in number, numerous ovaries, and a many-carpelled, succulent, or dry fruit, and alternate simple leaves without stipules. They are trees or shrubs occurring in the tropics of both hemispheres. In 1846 Lindley estimated the known species at 300. Most have a powerful aromatic taste and smell, and the flowers of some are highly fragrant. Some have a succulent and eatable fruit. [ANONA.]

an-ō-nā'-ceous, a. [ANONACEÆ.] Pertaining to, characteristic of, or closely resembling the Anonaceæ (q.v.).

\*an-ōn'-dēr (Eng. & Scotch), \*an-ōn'-ēr, \*an-ūnd'-ēr (Scotch), prep. [A.S. an = in; onder = Eng. under.] Under.

"Ther nis non betere onder same." King Horn (F. E. T.), 567.

"Then the Bible under his arm took he." Hogg: Mountain Bard, p. 19.

\*a-nōnt', \*an-ōnd'e, \*ōn-ōnd'e, \*an-ōnd'e, prep. [ANEND.] Opposite to, level with. "Here thyn ost a-nont' thy breast, In a box that ys honeste." Instructions for Parish Priests (ed. Peacock), 1, 362.

an-ō-ným, s. [ANONYMOUS.]

- 1. One who remains anonymous.
- 2. A pseudonym.

an-ōn'-ým-al, a. [ANONYMOUS.]

an-ōn-ým'-i-ty, s. [In Dan. anonymitet.] [ANONYMOUS.] The state of being anonymous; anonymity.

† an-ōn-ý-mōs'-i-ty, s. [From Gr. ἀνόνομος (anónomos); Eng. suffix -ity, from Lat. -itas.] The state of being anonymous; anonymity.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt or, wōre, wōlf, wōrk, whō, sōn: mūte, cūh, cūre, ūnite, cūr, rūle, fūll; trý, Sýrian. æ, œ = ē. ey = ā. qu = kw.

an-ōn-ŷ-mōus, a. [In Sw. *anonym*; Fr. *anonyme*; Sp. & Ital. *anonimo*; Port. *anónimo*. From Gr. ἀνώνυμος (*anōnymos*): *án* (*an*), priv., and *ónoma* (*ónoma*) = name.]

\* 1. Which has not received a name, implying, however, that one will yet be attached to it. "These animalcules serve also for food to another anonymous insect of the waters."—*Ray*.

2. Intentionally nameless. *Used—* (a) Of the authorship of verbal statements, writings, publications, &c. " . . . anonymous letters."—*Macaulay: Hist. Eng.*, ch. xii.

(b) Of writers not appending their names to their literary productions; of benevolent men withholding their names when they give charity.

"The combatants on both sides were generally anonymous."—*Macaulay: Hist. Eng.*, ch. xxiii. "Nearly a hundred years have passed since an anonymous benefactor founded in France a prize for virtue."—*Daily News*, 3rd August, 1878.

an-ōn-ŷ-mōus-lŷ, adv. [Eng. *anonymously*; -ly.] With no name attached to it. " . . . the edition published anonymously . . ."—*Scott: William and Helen*.

an-ōn-ŷ-mōus-nēss, s. [Eng. *anonymousness*; -ness.] The state of being anonymous; anonymity, anonymity.

\* a-nō-on, adv. [ANON.]

án-ōp-lō-thēr, s. [ANOPLOTHERIUM.] The English name—

(1.) *Spec.*: Of the *Anoplotherium commune*. " . . . the aquatic cloven-footed animal which Cuvier has called *Anoplotherium*."—*Owen: Brit. Foss. Mammals and Birds* (1846), p. xviii. (2.) *Gen.*: Of any fossil mammal belonging to the same family.

*Cervine Anoplothera: Dichobune Cervinum.* [DICHOBUNE, ANOPLOTHERE.]

án-ōp-lō-thēr-ŷ-dēs, s. pl. [ANOPLOTHERIUM.] A family of mammals belonging to the order Pachydermata. All are extinct. [ANOPLOTHERIUM.]

án-ōp-lō-thēr-ŷ-ūm, s. [From Gr. *án* (*an*), priv., *ὄπλον* (*oplon*) = a weapon, and *θηρίον* (*thērion*) = beast. "Unarmed beast." The name refers to the absence of such natural weapons as tusks, long and sharp canine teeth, horns or claws.] The appellation given by Cuvier to a genus of hoofed quadrupeds found in the middle Eocene gypsum of the Paris basin. It is the type of the family Anoplotheridae (q.v.). A curious peculiarity of the

SKELTON OF ANOPLOTHERIUM.

Anoplotherium genus, shared only by man, is that the incisors and canine teeth were so equally developed that they formed one unbroken series with the premolars and true molars. The *A. commune* was about four and a-half feet long, or with the tail, eight feet. It is found not merely in the vicinity of Paris, but also in the contemporary Eocene strata of Hampshire and the Isle of Wight. [ANOPLOTHERE.] (*Owen: Brit. Foss. Mamm. & Birds*, pp. 432-439.)

án-ōp-lō-thēr-ōid, a. & s. [From Eng. &c., *anoplotherium* (q.v.), and Gr. *είδος* (*eidos*) = form.]

1. *As adjective* (*Palæont.*): Resembling the Anoplotherium. 2. *As substantive* (*Palæont.*): An animal resembling the Anoplotherium.

án-ōp-lūr-a, s. pl. [Gr. *án* (*an*), priv.; *ὄπλον* (*oplon*) = a tool, . . . a weapon, arms; *οὐρά* (*oura*) = tail. Having unarmed tails.]

*Zool.*: An aberrant order of insects, sometimes termed from their parasitic habits Parasitica or Epizoa. They have six legs, no wings, and either two simple eyes or none. They undergo no proper metamorphosis, though there is a certain semi-transformation

when they shed their skins. They are parasitic upon mammals and birds, and are generally termed lice. There are two sub-orders: (1) Hausteliata, or Rhynchota, having a mouth with a tubular, very short fleshy lanstellum, and (2) Mandibulata, or Mallophaga, in which the mouth is provided with two horny mandibles.

án-ōp-sŷ, s. [Gr. *án* (*an*), priv., and *ὄψ* (*ops*) = the eye.]

*Med.*: Absence of sight, want of vision; blindness.

án-ō-rēx-ŷ, s. [In Fr. *anorexie*; Port. *anorexia*; Gr. ἀνορεξία (*anorexia*): *án* (*an*), priv., and *ὄρεξις* (*orexis*) = a longing or yearning after anything; *ὄρεγν* (*oregō*) = to reach, to stretch out.]

*Med.*: Want of appetite.

† a-nor-mal, a. [In Fr. *anormal*.] [ABNORMAL.]

\* an-or-ne, \* an-ōur-ne, v.t. [Lat. *adorno*.] To adorn. (*Scotch*). "Thar lyie illumant and anorit cler."—*Douglas: Virgil*, 188, 34.

án-orth-ŷc, a. [Gr. *án* (*an*), priv., and *ὀρθός* (*orthos*) = straight . . . right, as a right angle.] Irregular; abnormal.

*Crystallogr.*: A term applied to all crystals which do not belong to the more regular systems, i.e., which do not fall under the cubical, the pyramidal, the rhombohedral, the prismatic, or the oblique systems. (*Phillips: Min.*, ed. 1852, p. 9.) The Anorthic is called also the Triclinic, the Doubly Oblique, and the Tetarto-prismatic system. [TRICLINIC.] (See Dana's *Min.*, 5th ed. 1875, p. xxvi.)

án-orth-ŷte, s. [In Ger. *anorthit*. From Gr. *án* (*an*), priv., and *ὀρθός* (*orthos*) = direct, straight; suff. -ite. So named in 1823 by Rose from its "anorthic," or what would now be called triclinic, crystals.] [ANORTHIC.] A mineral placed by Dana under his Felspar group of Unisilicates. Anorthite occurs crystallised or massive. Its hardness is 6-7; sp. gr. 2.66-2.78; lustre of ordinary faces vitreous, of cleavage planes inclining to pearly colour, white, grayish, or reddish. It is transparent or translucent, has a conchoidal fracture, and is brittle. Composition: Silica, 41.78 to 47.63; alumina, 28.63 to 37.5; lime, 8.28 to 19.11; magnesia, 0.29 to 5.87; sesquioxide of iron, .07 to 4.0; potassa 0.25 to 6.58; soda, 0.27 to 3.35; and water, 0.31 to 5.08. The varieties recognised by Dana are (1) Anorthite proper, which occurs in Italy among the old lavas of Monte Somma, at Mount Vesuvius, and on the isle of Procida. It has been called also Christianite and Biotine. Thorsite is the same species from the plain of Thiorsa, near Hecla, in Iceland. (2) Indianite, from India. (3) Amphodelite, from Finland and Sweden, called also Lepolite. It includes Labradorite, from Labrador, and apparently Taankite from Norway. Besides these, Linseite and Sundvikite are altered Anorthite. Dana numbers Cyclopite, Barsowite, and Bytownite as if they too were not properly distinct from Anorthite.

án-orth-ō-soōpe, s. [Gr. *án* (*an*), priv.; *ὀρθός* (*orthos*) = straight; *σκοπέω* (*skopeō*) = to look at.]

*Optics*: An instrument for producing a particular kind of optical illusion by means of two opposite disks rotating rapidly. The hinder disk, which is transparent, has certain distorted figures painted upon it. The other one, which is in front of that now described, is opaque, but is pierced with a number of narrow slits, through which the figures on the disk behind it may be viewed.

án-ōg-mí-a, s. [From Gr. *án* (*an*), priv., and *ὄσμη* (*osmē*) = smell.]

*Med.*: Absence of the sense of smell. When it exists, which is but rarely, it is a congenital defect, or arises from disease or from the subtraction of the olfactory to strong stimuli.

† án-ōs-tóm-ō-sis, s. [ANASTOMOSIS.]

án-ōs-tóm-ūs, s. [From Gr. *ánwa* (*anō*) = above, and *στόμα* (*stoma*) = the mouth.] A genus of fishes belonging to the Salmon family.

án-ōth-ēr (Eng.), án-ŷth-ēr (Scotch), a. & adv. [Eng. *an*, other; A.S. *an* = one, and other.] [OTHER.]

A. *As adjective*:

- 1. Not the same; different. "But my servant Caleb, because he had another spirit with him . . ."—*Numb.* xiv. 24. "When the soul is beaten from its station, and the mounds of virtue are broken down, it becomes quite another thing from what it was before."—*South*.
- 2. One in addition; one more. "Have ye another brother?"—*Gen.* xliii. 7.
- 3. Any other. "Discover not a secret to another."—*Prov.* xxv. 9.
- 4. Not one's self. "Let another man praise thee, and not thine own mouth."—*Prov.* xxvii. 2.

5. It is sometimes used when the two entities compared belong to different categories, whereas in its more normal sense another implies that they are of the same kind. "I am the Lord: that is my name; and my glory will I not give to another, neither my praise to given images."—*Isa.* xliii. 8.

\* B. *As adv.*: Otherwise. "Bl Mery," quoth the menfolk, "me thynt lit another."—*Sir Gawayne* (ed. Morris), 1, 268.

† (1) *One to another, or one another* (Eng.) = *one another* (Scotch), is used reciprocally. "This is my commandment, That ye love one another."—*John* xv. 12. "There has been mony a blythe birling—for death and drink-draining are near neighbours to ane another."—*Scott: Bride of Lammermoor*, ch. xxiii.

(2) *You're another*: The *tu quoque* of the uneducated classes. Davies gives an example from Udai: *Roister Doister*, iii. 5.

\* another-gaines, a. Of another kind. "If my father had not plaid the hasty fool, I might have had another-gaines husband than Demetras."—*Sidney*.

\* another-gates, s. Of another kind. [OTHER-GATES.]

"And his bringing ap another-gates marriage than such a mainco."—*Lily: Mother Bombie*, l. "A good report maketh the bones fat, saith Solomon; and that, I wien, is another-gates manner, than to make the face shine."—*Sp. Sermons: Sermons*. "Hadibra, about to enter Upon another-gates adventure."—*Butler: Hudib.*, iii. 423.

\* another-guess, a. (Corrupted from *another-guise*.) [Eng. *another*, and Fr. *guise* = manner, way, corresponding in meaning to the Eng. & A.S. *wise* appended to a word, as *like-wise*.] Of another kind. (*Vulgar*.)

"Oh Hocus! where art thou! It used to go in another-guess manner in thy time."—*Arbutnot*.

another-guise, a. [ANOTHER-GUESS.]

a-nōt-ta, s. [ARNOTTO.]

\* án-ō-ven, adv. [A.S. *an* = on, and *ufan* = up, above, high.] Above. "And sette hit on his swerde, Anouen at than orde."—*King Horn* (E. E. T. S.), 634-4.

\* a-nōur-ne-ment, s. [ANORNE.] Ornament. "The hous and the anourmentes he hyghted togedr."—*Alliterative Poems: Cleanthes* (ed. Morris), 1, 290.

\* a-nōye, v.t. [Old form of ANNOY (q.v.).] To hurt.

"Who badde foure spirites of tempest That power han to noyen land and see, Bothe north and south, and also west and est, Anoyen neyther londe, see, ne tree!"—*Chaucer: C. T.*, 4, 973-14.

án-sē, s. pl. [The pl. of Lat. *ansa* = a handle, a haft.]

*Astron.* *Ansa of Saturn's ring*: The projections or arms of the ring on each side of the globe of the planet. (*Hind.*) They were so

THE ANSÆ OF SATURN'S RING.

called by Galileo and other early astronomers from their resembling to the eye of one looking at them through the imperfectly-constructed telescopes of that period, the handles of a pot or other utensil.

An-sar, An-sār-i-an, s. [Arab.] A helper, an auxiliary; *spec.*, one of the inhabitants of

Mecca who befriended Mahomet when he fled thither from Mecca, A.D. 622.

"His bravest disciples . . . assembled round his person; and the equal, though various, merit of the Moslems was distinguished by the names of Mohazarians and Anvars: the fugitives of Mecca and the auxiliaries of Medina."—Gibbon: Decline & Fall, ch. 1.

**án-sáte, án-sá-téd, a.** [Lat. *ansatus* = having a handle; from *ansa* = a handle.] Furnished with a handle or handles.

ANSATED CROSS.

**ansated cross** (*crux ansata*), *s.* The handled Tau cross, uniformly found in the hands of the old Egyptian deities, being regarded as the symbol of life. It was called in Coptic *ankh* = life. (Cooper: *Archaic Dict.*)

**ánse, s.** [Lat. *ansa* = a handle.] One of the handles of a cannon.

**án-sér, s.** [Lat. *anser*; Ger. *gans*; O. H. Ger. *kans*; Eng. *gander, goose*; Gr. *χην* (*chên*); Sansc. *hansu*.]

1. *Zool.*: A genus of Natatorial or Swimming birds, the typical one of the sub-family Anserinae. It contains the geese. Several species are found in the United States continuously or as winter visitors. [GOOSE.]

† 2. *Astron.*: A portion of the constellation called by Hevelius *Vulpæula et Anser* (the Fox and Goose). It belongs to the northern hemisphere, is placed over the Eagle, immediately under the star Alhéro, or β Cygni, with a little one called the Arrow between. It is rarely met with in modern star-maps.

**án-sér-á-téd, a.** [Lat. *anser* = goose; Eng. *-ated*.]

*Heruláry.* An *ansated cross* is one with its extremities shaped like the heads of lions, eagles, or similar animals.

**án-sér-és, s. pl.** [The pl. of Lat. *anser* = a goose.] The third of Linneus's six orders of Birds. The species are characterised by smooth beaks, broadest at the point, covered with smooth skin, and denticulated. The toes are web-footed. The tibiae are short and compressed. It includes the birds now called Natatores, or Swimmers. [NATATORES.]

**án-sér-f-nø, s. pl.** [ANSER.] A sub-family of Anatidae (Ducks), containing the Geese.

**án-sér-ine, a.** [Lat. *anserinus*.] Pertaining to the Anseres, or Geese; resembling a goose; framed on the model of a goose; after the manner of a goose.

" . . . a flattened beak like that of a duck, which is used in the *anserin* manner to extract insects and worms from the mud."—Owen: *Classic of the Marine Mollus* (1859), p. 27.

\* **án-seýne, s.** [ENSEINYIE.]

\* **án-sláight** (*gh* silent), *s.* [ONSLAUGHT.] An onslaught, an attack, an affray.

"No to remember yet that *anslaight*, thou wast beaten, And fledst before the butler." Beaumont & Fletcher: *Mons. Thomas*, II. 2.

**an-swēr (w** silent), \* **an-swēre, \* an-swir** (*swēr-en, \* and-swēre* (Eng.), \* **án-swír** (Scotch), (*w* silent), *v. t. & i.* [A.S. *answarian, andswarian, andswarian* = to answer; and, in separate prep. like Gr. *ánri* (*anti*), denoting opposition in reply, in *ávri*; and *swarian* = to answer, cognate with *swarian* = to swear. [SWEAR.] In Sw. *svara*, and in Dan. *svare* and *ansvare* = to answer.]

**A. Transitive:**

**I. Literally:**

1. To reply to a question formally put to one. (In this and some of the following senses *answer* may be followed by an objective of the person replied to, by an objective of the communication made, or by both together.)

"And he him *answered* modí and hóid." *Story of Gen. and Exod.* (ed. Morris), 2, 728.

"The baptism of John, was it from heaven or of man? *answer* me."—Mark xi. 30.

"But he *answered* her not a word."—Matt. xv. 23.

(See also the example under No. 3.)

¶ In the authorised version of Scripture the expression occurs, "answered him and said."

"And Peter *answered* him and said, . . ."—Matt. xiv. 28.

2. To reply to a statement of facts, or an argument, whether given forth verbally, in

writing, or by means of the press. *Spec.*, to attempt in whole or in part to refute it.

"This reasoning was not and could not be *answered*."—Macaulay: *Hist. Eng.*, ch. xiv.

3. To reply to an accusation; to endeavour to rebut it.

"And the high priest arose and said unto him, *Answerest* thou nothing? What is it which these witness against thee?"—Matt. xxvi. 62.

4. To sing in alternata parts, or in any other way to alternate with another person in what he or she is saying or doing.

"And the women *answered* one another as they played, and said, Saul hath slain his thousands, and David his ten thousands."—1 Sam. xviii. 7.

(Apparently one choir sang "Saul hath slain his thousands," and a second one finished the sentence by adding "And David his ten thousands.")

"With piercing shrieks his bitter fate she moans, While the sad father *answers* groans with groans."—Pope: *Homers Iliad*, bk. xxii., 514, 515.

"So spake the mournful dame; her matrons hear, Sigh back her sighs, and *answer* tear with tear."—*Ibid.*, 665, 666.

5. To solve an arithmetical, mathematical, or other question or problem proposed to one.

**II. Figuratively:**

1. To make a suitable return for anything said or done. Thus, to answer a prayer or petition is, if it be deemed right, to grant what it solicits; to answer the door-bell is to go and ascertain who has rung it, and what his object is in visiting the house; to answer a legitimate claim on one's purse is to pay it; to answer an evil doer or evil deeds is to punish him or them; to answer an enemy's fire in battle is to fire back at him.

"Thou calledst in trouble, and I delivered thee; I *answered* thee in the secret place of thunder."—Ps. lxxxii. 7.

"I the Lord will *answer* him by myself. And I will set my face against that man, and will make him a sign and a proverb, and will cut him off from the midst of my people."—Ezek. xiv. 7, 8.

2. To stand accountable for; to incur the penalty of.

"Shall he that contendeth with the Almighty instruct him? he that reproveheth God, let him *answer* it."—Job xl. 2.

"In thine own person *answer* thy abuse."—*Shakespeare*: 3 *Henry VI.*, II. 1.

To *answer* all the debt he owes unto you a whole."—*Shakespeare*: 1 *Henry IV.*, I. 1.

"Let his neck *answer* for it, if there is any martial law in the world."—*Ibid.*, *Henry V.*

3. To be suitable for; to be capable of being employed for; to serve for.

" . . . moosey *answereth* all things."—Ecc. x. 16.

4. To correspond to or with.

"Weapons must needs be dangerous things if they *answered* the bulk of so prodigious a person."—*Swift*: *Gulliver's Travels*.

"Still follow Seneca, of every art the soul, Parts *answering* parts, shall all slide into a whole."—*Pope*: *Moral Essays*, Epistle IV., 65, 66.

5. To be opposed to, to face.

"Fire *answers* fire; and, by their paly beams, Each battles sees the other's ember'd face."—*Shakespeare*: *Henry V.*, Chorus.

**B. Intransitive:**

**I. Literally:**

1. To reply verbally, or in writing, to a question, a call, a summons, a judicial charge, a petition, or a prayer.

"And he said unto him, Thou hast *answered* right."—*Luke* x. 28.

"The Lord called Samuel, and he *answered*, Here am I."—1 Sam. iii. 4.

"Then Paul stretched forth the hand, and *answered* for himself."—Acts xxvi. 1.

"But there was no voice, nor any that *answered*."—1 Kings xviii. 26.

¶ In the English Bible the expression "answered and said" is common.

"But he *answered* and said unto him that told him, Who is my mother? and who are my brethren?"—Matt. xii. 48.

Once it is used anomalously, in the sense of *made a statement*, no question having preceded it: "The king *answered* and said unto Daniel" (Dan. ii. 26). Daniel had not previously to this addressed the king. (See also Acts v. 8.)

**II. Figuratively:**

1. To reply to any of the words by deeds rather than words.

" . . . and the God that *answered* by fire, let him be God."—1 Kings xviii. 24.

2. To speak for, to vindicate, to witness for.

"So shall my righteousness *answer* for me in time to come."—Gen. xxx. 23.

"I have ever been of opinion, that, if a book can't *answer* for itself to the public, 'tis to no sort of purpose for its author to do it."—*Pope*: *Letter to the Hon. J. C.* (1711).

3. To be held responsible for, to be liable for, to be accountable for; to satisfy any demands which justice may make concerning (one's actions).

"Those many had not dared to do evil. If the first man that did it edict infirings, Had *answered* for his deed."—*Shakespeare*: *Mecca for Mecca*, II. 2.

4. To be suitable for, to serve for, to succeed

" . . . the trial to great quantities doth not *answer* the trial in small; and so deceiveth many."—*Bacon*.

"Jason followed her counsel, whereof, when the event had *answered*, he again demanded the fleece."—*Raleigh*.

5. To correspond to or with.

"Do! Hear me, good madam: Your loss is as yourself, great; and you bear it As *answering* to the weight."—*Shakespeare*: *Antony and Cleopatra*, v. 2.

"As in water face *answereth* to face, so the heart of man to man."—*Prov.* xxvii. 19.

6. To sound in return, as in the case of the response from an echo.

"The woods shall *answer*, and their echo ring."—*Pope*: *Pastorals*; *Summer*, 18.

7. To vibrate to the touch, or otherwise act reciprocally to.

"Say, dost thou yet the Roman harp command! Do the strings *answer* to thy noble hand!"—*Dryden*.

**an-swēr, \* an-swēre, \* an-swār, \* and-swēre** (or silent), *s.* [A.S. *andswara*. In Sw. & Dao. *svar*.]

**A. Ordinary Language:**

**I. Literally:**

1. *Gen.*: A reply to a question, command, call, entreaty, address, or argument.

"Eft[er] this *andswere*, ben of gon, Moyes forth and Aaron."—*Story of Gen. and Exod.* (ed. Morris), 3, 061, 3, 062.

"So wáth al anen her *answar* socht."—*Alliterative Poems*; *Pearl* (ed. Morris), 517.

"Now advise, and see what *answer* I shall return to him that sent me."—3 Sam. xxiv. 13.

2. *Specialty*:

(a) A reply to a legal accusation against one. (B. *Law*.)

"At my first *answer* no man stood with me, but all men forsook me."—2 Tim. iv. 16.

(b) A reply in an oral debate to the allegations of an opponent, or a publication in reply to another publication.

(c) The solution of an arithmetical question or a geometrical problem, the former at least being generally proposed in the form of a question.

**II. Figuratively:**

1. A return for anything said or done.

" . . . the *answer* was given by a volley of muckety."—*Darwin*: *Voyage round the World*, ch. iv.

2. One thing produced by another; an effect viewed as proceeding from a certain specified cause.

"Contraction is an *answer* to stimulus."—*Todd & Bowman*: *Physiol. Anat.*, vol. 1, p. 174.

3. Account to be rendered to justice.

"He'll call you to so hot an *answer* for it, That you shall chide your trespass."—*Shakespeare*: *Henry V.*, II. 4.

4. The reverberated sound of an echo.

**B. Technically (Law)**: The formal defence made by an accused person against the charge brought against him, or the formal reply of one side in a lawsuit to the allegations of the other. Also the appearance for such defence. (*Ayliffe's Parergon, and other authorities*.)

† **answer-jobber, s.** One who makes a business of writing answers.

"What disgusts me from having any thing to do with *answer-jobbers* is, that they have no conscience."—*Swift*.

**an-swēr-á-ble** (*w* silent), *a.* [Eng. *answer*; *-able*.]

1. That to which a more or less satisfactory answer can be given.

2. Responsible, liable to be called to account for, liable for.

"For the treaty of Dover the king himself is chiefly *answerable*."—*Macaulay*: *Hist. Eng.*, ch. ii.

3. Correspondent, similar, like.

"It was but such a likeness as an imperfect glass doth give; *answerable* enough in some features and colours, but erring in others."—*Sidney*.

4. Proportionate to, commensurate to or with.

" . . . and twenty cubits was the length, and the height in the breadth was five cubits, *answerable* to the hangings of the court."—*Exod.* xxviii. 18.

5. Suitable.

" . . . it was a violent commencement, and thou shalt see an *answerable* sequestration."—*Shakespeare*: *Othello*, I. 1.

**fáte, fát, fáre, amidst, whát, fáll, father; wē, wēt, hère, camél, hēr, thére; pine, pít, eíre, sír, marine; gó, pót, or, wóre, wólf, wórk, whó, sòn; müte, cúb, cüre, ünre, cüre, ráile, füll; trý, Síryan. se, ce = á. ey = á. qu = kw.**

"If answerable style I can obtain  
Of my select patroness." Milton.

6. Equal, sufficient to meet.

"There be no kings whose means are answerable  
unto other men's desires." Raleigh.

**an-swēr-a-ble-nēss** (*w* silent), *s.* [Eng. *answerable*; *-ness*.] The quality of being answerable.

"To shew therefore the correspondency and answerableness which is between this bridegroom and his spouse," &c.—*Horner: Transl. of Beta*, p. 196.

**an-swēr-a-ble-y** (*w* silent), *adv.* [Eng. *answerable*; *-ly*.] Proportionally, correspondingly.

"It bears light sorts into the atmosphere to a greater or lesser height, answerably to the greater or lesser interestness of the heat."—Woodward.

**an-swēr-ed** (*w* silent), *pa. par. & a.* [See ANSWER, *v.*]

**an-swēr-ēr** (*w* silent), *s.* [Eng. *answer*; *-er*.] One who answers to a question, or who replies in a controversial manner to a writing or publication.

"I know your mind, and I will satisfy it: neither will I do it like a pigardly answerer, going no further than the bounds of the question."—*Steuart*.

"It is very unfair in any writer to employ ignorance and malice together, because it gives his answerer double work."—*Swift*.

**an-swēr-īng, an-swēr-īng** (*w* silent), *pr. par., a., & s.* [ANSWER, *v.*]

"Discreet ache was in answering alway."

*Chaucer: G. T.*, l. 13, 608.

"... while all the Greeks around  
With answering sighs return'd the plaintive sound."  
*Pope: Homer's Iliad*, bk. iv., l. 184, 185.

"... for an answering sign,  
That the good Cross doth hold its lofty place  
Within Valencia still."  
*Hemans: Begs of Valencia*.

**an-swēr-less** (*w* silent), *a.* [Eng. *answer*; suffix *-less*.] Without an answer, either as not yet having been replied to, or as not capable of being answered. (*Byron*.)

**ant, \*ānt, \*ānt, \*ām-ēt, \*ēm-ēt,**

**ēm-mēt, s.** [According to Junius, the Eng. word *ant* is derived from Eng. *emmet*, A.S. *emette*; Trench considering the successive steps of the process to have been *ammet*, *emet*, *amet*, *amt*, and *ant*. (*Trench: Eng. Past and Present*, pp. 198 to 200.) A.S. *emete*, *emette*, *ametta*, *amytta*, *emete*, *emette*; Ger. *ameise*.]

1. *Ord. Lang. & Entom.*: The name given to certain small, but singularly intelligent and industrious insects well known in this and other lands. They are classed by naturalists under Heterogyna, the first tribe of aculeated Hymenoptera. Ants live in society like the more common species of wasps and bees. Like them also, their polity consists of three kinds of individuals, males, females, and neuters, the last-named being probably abortively-formed females. The males are winged during the whole course of their existence, the females only during the pairing season, and the neuters not at all. The males and females meet not on the ground, but in the air. Soon afterwards the males, which cannot do much for themselves, having neither stings nor eye mandibles, perish of cold or other hardships. The females, on the contrary, immediately after meeting with the other sex in the air, lose or actually pull off their wings, are found by neuters, and become the object of their tender care. The neuters are the most numerous class of ants, and do nearly the whole work of the community. Specially, they carry the eggs, the larvae, and the cocoons from place to place in the nest, as the temperature and moisture vary; they feed the larvae with liquid disgorged from the stomach, and besides open the cocoons for them when they are ready to emerge as perfect insects. Hence the neuters are sometimes called workers or *nurse-ants*. Sir John Lubbock says that ants can distinguish colors, being particularly sensitive to violet. They have very delicate smell, but apparently no hearing. The different species present curious analogies to the earlier stages of human progress—the hunting and pastoral, and even the agricultural—as has been noted by several authorities. There are various genera and species of ants, differing in habits and methods of operation. Some, like *Formica sanguinaria* and *F. cespitum*, have been called Mining-ants; others, as *F. sava*, produce a kind of masonry; while *F. rufa*, the Wood-ant, similarly addresses itself to carpentry. Finally, some ants keep aphides as

graziers do milch cows, on account of a secretion which they yield; and others hold slaves, the eggs, larvae, and pupae of which they have captured in war. Of these the most notable is the Amazon-ant. [AMAZON; No. 4. See also HETEROGYNA, FORMICA, MYRMICA ATTA, &c.]

¶ The ant of Scripture, Heb. נִמְלֵךְ (*nemalāh*), Sept. μύρμηξ (*murmēz*), Vulg. *formica*, seems correctly translated.

"Go to the ant, thou sluggard; consider her ways, and be wise."—*Prov.* vi. 6.

"The ants are a people not strong, . . ."—*Prov.* xxx. 25.

2. *Popularly*: The White Ant [TERMITES], which is not a genuine ant at all, but a neuropterous insect. [ANTHILL.]

**ant-bear, s.** The name generally given in Demerara to the Great Ant-eater, *Myrmecophaga jubata*. [ANT-EATER, MYRMECOPHAGA.]

**ant-eater, s.**

1. The English name of the animals belonging to the genus *Myrmecophaga* of Linnaeus. [Gr. μύρμηξ (*murmēz*) = an ant, and φαγῆν (*phagēn*) = a gizzard; φαγεῖν (*phagein*) = to eat.] They have a lengthened muzzle terminated by a small, toothless mouth, from

THE ANT-EATER.

which they protrude a long, thread-like tongue, covered with viscous saliva. This they thrust into the nests of termites or those of ants proper, sucking the animals which adhere to it up into their mouths. Their claws are strong, and are used for tearing to pieces the structures erected by the Termites. Among the species may be enumerated the *M. jubata*, the Great or Maned Ant-eater, which has four toes before and five behind, and the *M. ditadactyla*, the Little or Two-toed Ant-eater. Both are South American.

The *Scaly Ant-eaters* are of an allied genus, *Manis*. They derive their English name from the fact that they are covered with thick scales, which give them the superficial appearance of reptiles. The Short-tailed *Manis*, *M. pentadactyla*, Linn., is found in Beagal and the Indian Archipelago, and *M. tetradactyla* in Africa. The proper and Scaly Ant-eaters belong to the mammalian order of Edentata, or toothless animals. To the same order belong the Cape Ant-eaters (*Orycteropus Capensis*). [AARD-VARK.] Prof. Owen considers it remarkable that "not a trace of a Scaly Ant-eater, recent or extinct, has been discovered in South America, where the Edentate order is so richly represented by other generic and specific forms." (*Owen: British Fossil Mammals and Birds*, 1846, p. xxxix.)

The Porcupine Ant-eater, or *Aculeated Ant-eater* (*Echidna Hystrix*), is not closely allied to the species now mentioned, but is one of the Monotremata. [ECHIDNA.]

2. *The King of the Ant-eaters*: A bird, the *Turdus rex* of Gmelin, and *Corvus grallarius* of Shaw, now *Grallaria rex*. [ANT-CATCHER, ANT-THRUSHES.]

**ant-eggs, ants' eggs, s. pl.**

1. *Accurately*: The eggs of ants. They are of different sizes and in small parcels, so that they can be moved from place to place.

2. *Popularly, but erroneously*: The elongated egg-looking bodies which ants when disturbed seem so anxious to carry off. They are not eggs, but cocoons. They have been recommended as food for the nightingale and other birds, and have been extensively used for feeding pheasants and partridges.

**ant-hill, s. & a.** [In A.S. *emete-hyll*, *emette-hyll*.]

**A. As substantivo:**

1. The mounds or hillocks raised by some species of ants proper. There are many in the mountains of Pennsylvania, in the Eastern States, and elsewhere.

"Put blue flowers into an ant-hill, they will be stained with red; because the ants drop upon them their stinging liquor, which hath the effect of oil of vitriol."—*Ray*.

2. The much more remarkable erections made by different species of termites (white ants). In most cases the descriptions of unscientific travellers refer to these rather than to the constructions of the ants proper. The nest of the African *Termes bellicosus* is described by Sparrmann as rising ten or twelve feet above the surface of the earth. Its shape is that of a sugar-loaf. Externally it is covered with a broad cap, whilst inside it is divided into a multitude of chambers. The *T. atrox* and the *T. mordax* build nests two feet high with conical roofs, called turretted nests. [WHITE ANT AND TERMES.]

**B. As adjective:** In various respects presenting the characteristics of an ant-hill like those just described; small, petty.

"... all things that do pass,  
Upon this ant-hill earth!"  
*Thomson: Castle of Indolence*, l. 49.

**ant-hillock, s.** Nearly the same as ANTHILL (q. v.), but smaller.

"Those who have seen ant-hillocks . . ."—*Addison*.

**ant-like, a.** Like an ant.

**ant-lion, s.** The English name of a genus of insects. [MYRMELION.] It belongs to the order Neuroptera, and has gauzy wings like a dragon-fly, from which, however, it may be at

THE ANT-LION.

a. Perfect Insect. δ. Larva.

once distinguished by having longer antennae. The species are called Ant-lions from the extraordinary habits of their larva, which construct a funnel-shaped pitfall in the sandy or dusty ground, at the bottom of which they bury themselves all but their antennae. When ants or other insects are hurrying along they are apt to miss their balance and tumble into the pitfalls, where they are at once devoured. It is said that when they do not quite lose their equilibrium on the brink of the abyss, they are helped into the jaws of death by a shower of sand or dust flung up from below. Ant-lions occur in the south of Europe, in India, &c.

**ant-thrushes, † ant-catchers, ant-eaters, s. pl.** Names given to the several species of birds placed by Illiger under his genus *Myiothera*, and some of its immediate allies. They belong to the family Turdidae, and the sub-family Formicariæ, called *Myiotherinæ* by Swainson. They live on insects, especially on ants. They are found in both continents, but those of the Old World have the more brilliant plumage. The Common Dipper (*Cinclus aquaticus*), a British bird, is arranged in the same sub-family. The names Ant-thrushes or Ant-catchers are preferable to that of Ant-eaters, used in Griffith's *Cuvier*, vol. vi., 399, as the latter designation has long been pre-occupied for various mammalian animals.

\* **ant, conj.** [AND.] And.

"Twin-wing ant twin-manslaughter"  
*Story of Genesis and Exodus* (ed. Morris), 485.

**ant, conj.** A contraction for *and it*, or *and if*; as "an't please you" = if it please you. (*Johnson*.)

**ān-tā (l.) s.** [Lat.] The sing. of ANTE (q. v.)

**ān-tā (2) s.** The Brazilian name of the American Tapir (*Tapirus Americanus*).

**ānt-āc-īd, \*ānt'-ī-āc-īd, a. & s.** [Gr. *antī* (*anti*) = in opposition to, and Eng. *acid* (q. v.).]

1. *As adjective*: Diminishing acidity; alkaline.

*Pharm. Antacid or Alkaline Medicines*: Agents designed to diminish acidity in the frame by increasing its alkalinity. For instance, they relieve heartburn, which is produced by an over-acid state of the alimentary

canal, increase the alkalinity of the blood, alter the urine and other secretions. In Garrod's classification *alkaline* or *antacid medicines* are the second order of his first class (medicines which act upon the blood); these again ranking under his first division (internal remedies). He divides Alkaline or Antacid Medicines into (1) Direct Alkaline Remedies; (2) Direct but not remote Antacids, at least upon the urine; and (3) Remote Alkaline Remedies. (Garrod: *Materia Medica*, 3rd ed., 1868, pp. 385—387.)

"All animal diet is alkalescent or *ant-acid*."—*Arbuthnot*.

**2. As substantive:** An antacid or alkaline remedy. (See the adjective.)

"Oils are *ant-acids*, so far as they blunt acrimony; but as they are hard of digestion, they produce acrimony."—*Arbuthnot*.

"It will be seen that a sub-division of these medicines is made into direct and remote *ant-acids*."—*Garrod: Materia Medica*, 3rd ed., p. 385.

\* **án-tác-rid**, a. [Gr. *ávri (anti)* = opposed to; *acrid* (q.v.).] Fitted to correct acrimony.

**án-tás**, s. pl. [Lat. In Ger. *antén*; Fr. *antes*; Sp. *antás*; Ital. *ante*.]

*Roman Architecture:* Pillars on either side of a door, or pilasters terminating the side walls of temples when they are prolonged beyond the faces of the end walls. [ANTES.]

**án-tág-ón-ísm**, s. [In Fr. *antagonisme*; Port. *antagonismo*. From Gr. *ántragonísma (antagonísma)* = a struggle with another.] [ANTAGONIZE.] Contest with; opposition to. (Often preceded by *in*, and followed by *to*.)

"Trustees have abandoned their old attitude of exclusiveness and *antagonism*."—*Times*, Sept. 17, 1878.

"... new wars, fresh *antagonisms*."—*Echo*, Sept. 16, 1878.

**án-tág-ón-íst**, s. & a. [In Fr. *antagoniste*; Sp., Port., & Ital. *antagonista*. From Gr. *ántragonístis (antagonístis)* = an adversary, opponent, rival.]

**A. As substantive:**

**I. Ordinary Language:**

1. A person who combats against one in a public contest or in battle.

"The cardinal of Shrewsbury had been bestowed, in the fifteenth century, on John Talbot, the *antagonist* of the Maid of Orleans."—*Macaulay: Hist. Eng.*, ch. viii.

2. A controversial opponent; a person encountering one on the field of public disputation.

"Mr. Locke was a philosopher; his *antagonist*, Stillington, Bishop of Worcester, was a man of learning."—*Goldsmith: The Bee*, No. viii.

**II. Technically:**

*Anatomy:* That which counteracts. (Used specially of muscles which, like the flexor and extensor muscles of the arm, operate in counteraction of each other, and, between them, produce the needful motions of the limb.)

"Muscles opposed in action are called *antagonists*."—*Todd & Bowman: Physiol. Anat.*, vol. I, p. 168.

**B. As adjective:** In conflict with; opposed to in nature or in action.

"... the nature of the two *antagonist* forces by which the productiveness of agricultural industry is determined."—*J. S. Mill: Political Economy* (1848), vol. I, bk. I, ch. xiii, § 3 p. 224.

"... the *antagonist* schools of philosophy."—*Herbert Spencer: Psychol.*, 2nd ed., vol. II, § 417, p. 389.

**án-tág-ón-ís-tíc**, \* **án-tág-ón-ís-tíc-al**, a. [Eng. *antagonist*; -ic, -ical.]

1. In personal conflict or contention with.

"It may be too, if the ordinance of nature; Their valours are not yet so combatant, Or truly *antagonistic*, as to fight, But may admit to hear of some divisions Of fortitude, may put 'em off their quarrel."—*B. Jonson: Magn. Lady*.

2. Opposed in action to.

"... the action of the external and internal internal must be *antagonistic*."—*Todd & Bowman: Physiol. Anat.*, vol. II, p. 309.

**án-tág-ón-íze**, v. t. [Gr. *ántragonízomai (antagonízomai)* = to struggle against; *ávri (anti)* = against, and *ágónízomai (agónízomai)* = to contend for a prize.] [AGONIZE.] To contend against in combat or in controversy; to oppose in action.

"... the brain and spinal cord are surrounded by fluid, the pressure of which, probably, *antagonizes* that which must be exerted through the blood-vessels."—*Todd & Bowman: Physiol. Anat.*, vol. I, p. 297.

**án-tág-ón-ízed**, **án-tág-ón-ísed**, pa. par. [ANTAGONIZE.]

**án-tág-ón-íz-íng**, **án-tág-ón-í-í-íng**, pr. par. [ANTAGONIZE.]

"... there is some *antagonizing* principle at work capable for a time of making head against the law."—*J. S. Mill: Pol. Econ.*, bk. I, ch. xii, § 14.

"... but the *antagonizing* agency."—*Ibid.*

**án-tág-ón-ý**, s. [Gr. *ántragonýia (antagonýia)*.] A struggling against in combat; contest or controversy with; opposition to.

"... the incommunicable *antagoný* that is between Christ and Belshazzar."—*Milton: Doct. and Discip. of Divorce*, l. 8.

\* **án-tál-ýic**, a. & s. [Gr. *ávri (anti)* = opposed to; *álgos (algos)* = pain.]

**A. As adjective:** Fitted to alleviate pain; anodyne.

**B. As substantive:** A medicine fitted to alleviate pain; an anodyne. (Johnson.)

\* **án-tál-kal-ý**, s. [Gr. *ávri (anti)* = opposed to; Eng., &c., *alkali*.] A chemical agent which has the property of neutralising an alkali. Nearly all the acids can do so.

\* **án-tál-kal-íne**, s. [Gr. *ávri (anti)* = opposed to; Eng., &c., *alkali*; -ine.]

*Med.:* A remedy designed to neutralise an alkali, or counteract an alkalescent tendency in the system. The same as ANTALKALI (q.v.).

\* **án-tá-nác-la-sis**, s. [In Ger. *antanaclasis*. From Gr. *ántranáklasis (antanaclasis)* = (1) a reflection of light, of heat, or of sound; (2) the use of a word in a different sense: *ávri (anti)* = against; *ána (ana)* = . . . again, and *klásis (klasis)* = a breaking; *kláw (klaō)* = to break off.]

*Rhetoric:*

1. A figure by which a word is repeated in a sentence, but in a different, if not even in a contrary, sense from that in which it was used on the first occasion. As, *In thy youth learn some craft, that in old age thou mayest get thy living without craft.* In the first clause it may be observed that *craft* means handicraft or business, and in the second, *trickery*. (Glossog. Nova.)

2. The returning, after a parenthesis, to the same words which were previously employed. By doing so the structure of the sentence is made more clear.

\* **án-tán-a-gō-gō**, s. [In Ger. *antagonoge*. From Gr. *ántránagō (antagonogē)* = to lead up against; or *ávri (anti)* = against, and *ántragonogē (anagōgē)* = a leading up.] [ANAGOGÉ.]

*Rhet.:* A figure by which, when the ascension of one's adversary is felt to be unanswerable, he is declared to have done the same thing which he charges against one, or at least to have acted quite as badly.

\* **án-táph-rō-dít-ý-ác**, a. & s. [Gr. *ávri (anti)* = against and *áphrodisiakós (aphrodisiakos)* = belonging to venery; *áphrodisios (aphrodisios)* = belonging to love or venery.] [APHRODISIAC.]

**A. As adjective:** Fitted to lessen or extinguish venereal desire. The same as ANAPHRODISIAC (q.v.).

**B. As substantive:** A medicine fitted to lessen or extinguish venereal desire.

\* **án-táph-rō-dít-ý-á-cal**, a. [Eng. *antaphrodisiac*; -al.] The same as ANTAPHRODISIAC, adj. (q.v.).

\* **án-táph-rō-dít-ýc**, \* **án-táph-rō-dít-ýck**, a. & s. [Gr. *ávri (anti)* = against, and *áphroditē (aphroditē)* = Venus; *áphros (aphros)* = foam, whence she was fabled to have sprung.]

**A. As adjective:**

1. Fitted to lessen or extinguish venereal desire. [ANAPHRODISIAC.] (Johnson.)

2. Suitable to be employed against the venereal disease. (Glossog. Nova.)

**B. As substantive:**

1. A medicine fitted to lessen or extinguish venereal desire. (Johnson.)

2. A medicine suitable to be employed against the venereal disease.

\* **án-táp-ó-pléc-tic**, a. [Gr. *ávri (anti)* = against, and *ápoplēxia (apoplexia)* = apoplexy.] Suitable to be employed in apoplexy. (Johnson.)

\* **án-tá'rch-ísm**, s. [Gr. *ávri (anti)*, and *árchē (archē)* = . . . sovereignty.] Opposition to government in general. (Webster.)

\* **án-tá'rch-ýst**, s. [ANTARCHISM.] One who opposes all government, and fancies he may possibly better his condition if anarchy arise.

\* **án-tá'rch-ís-tíc**, \* **án-tá'rch-ís-tíc-al**, a. [Eng. *antarchist*, -ic, -ical.] Opposed to government in general. (Webster.)

\* **án-tá'ro-tíc**, a. [In Fr. *antarctique*; Sp. & Ital. *antartico*; Port. *antartico*. From Gr. *ántrarktikós (antartikios)*; *ávri (anti)* = over against, opposite to, and *árrktikós (arctikos)* = near the Bear, northern; *árrktos (arctos)* = (1) a bear, (2) the constellation of the Great Bear.] [ARCTIC.]

**A. As adjective:** Opposed to arctic; the opposite of arctic.

*Antarctic Circle:* A small circle of the earth described around the Southern pole at a distance from it of 23° 28'. Sometimes, however, the term was more loosely applied to the South polar regions in general.

† *Antarctic Pole:* The Southern pole, whether of the earth or of the heavens. (Glossog. Nova.)

\* *Antarctic Tropic:* The tropic of Capricorn. "Query, whether in the coast of Florida, or Brazil, the east wind be not the warmest, and the west the coldest, and so beyond the antarctic tropic, the southern wind the coldest."—*Bacon: De Calore et Frigore*.

**B. As substantive:** The antarctic circle, or the zone which it encloses.

"It advances far into the deep, Towards the antarctic."—*Cooper: Task*, l. 690.

**án-tár-ég**, s. [Gr. *ávri (anti)* = opposed to, in the sense of rivalling; *Áρης (Arēs)*, Ares, the Greek name of Mars. "Rivalling Mars" in its red colour.] A fixed star of the first magnitude, called also a Scorpions, and Cor Scorpions = heart of the Scorpion.

\* **án-tá'r-thrít-ýc**, \* **án-ar-thrít-ýck**, a. & s. [Gr. *ávri (anti)* = against, and *árrhrítis (arthritís)* = gout.]

**A. As adjective:** Suitable to be employed in gout. (Glossog. Nova.)

**B. As substantive:** A medicine believed to be of use in the gout.

\* **án-tásth-mát-ýc**, a. & s. [Gr. *ávri (anti)* = against, and *ásthma (asthma)*.]

1. **As adjective:** Suitable to be employed in asthma.

2. **As substantive:** A medicine suitable to be employed in asthma. (Glossog. Nova.)

† **án-tá-tróph-ýc**, a. & s. [Gr. *ávri (anti)* = against; *átróphia (atrophía)* = atrophy.]

**I. As adjective:** Tending to check atrophy.

2. **As substantive:** A medicine given to check atrophy. (Nuttall.)

**án-té**, s. [ANTÆ.]

**án-té**, **én-té**, a. [Fr. *anté*, or *enté* = engraved.]

*Her.:* "Engraffed," or joined into each other in any way, as by dovetails, swallow-tails, or rounds.

**án-té**, *in compos.* [Lat. *ante*, prep., adv., or more rarely adj. = before. In Fr. *ante*, in compos.; Sp. *ante*, prep. and in compos.; Port. *ante*, in compos.; Ital. *anzi* = before, *ante*, *anzi*, in compos.; Ger. *ant*, in compos.; A.S. & Goth. *and*, in compos. Cognate with Gr. *ávri (anti)* (ANTI), *áva (antía)* = over against; *ávritēn (antēn)* = against, over against; Sansc. *ati* = above or beyond.] Before, in place or in time, as *ante-chamber* = a chamber before or in front of another; *antedate* = to date before the true time. (Very few compounds of *ante* retain the hyphen.)

**ante-historical**, a. Prior to the time when so-called "history" becomes worthy of the name.

"The second and third books seem likewise to have turned upon the legendary and *ante-historical* period of the Italian cities."—*Lewis: Early Rom. Hist.*, ch. iii, § 8.

**án-té-áct**, a. [Lat. *ante*, and Eng. *act*.] A previous act. (Johnson.)

**án-té-al**, a. [Lat. *ante*, and Eng. suffix *-al*.] Pertaining to what is before or in front. (Fleming.)

táte, fát, fáre, amidst, whát, fáll, fáther; wē, wét, hère, camél, hēr, thère; pine, pít, síre, sír, maríne; gō, pót, or, wóre, wólf, wórk, whò, sòn; müte, cüb, cüre, nite, cür, rále, füll; trý, Síryan. œ, ø = é; ê = é. qu = kw.

án-tě-ám-bū-lá-tion, s. [Lat. ante, and ambulatio = walking about; ambulo = to walk about.] The act of going before one to clear the way, as a forerunner does. (Johnson.)

án-tě-béll'-um, s. [Lat. ante = before, and bellum = war.] Of or pertaining to the times before the war, specifically (U. S.) before the Civil War. Used attributively.

án-tě-cám-ér-ə. [ANTI-CAMERA.]

án-tě-cē-dá-né-ous, a. [Lat. antecedo = to go before.] Antecedent in point of time; preceding another event.

"Admit that, which as capable of antecedentness proof may be presupposed." -Barrow: Sermons, II. 407.

án-tě-cē-de, v.t. [In Sp. anteceder. From Lat. antecedo = to go before; ante = before, and cedo = to go.] To precede in point of time.

"It seems convenient to reason that the fabric of the world did not long antecede its motion." -Hale.

án-tě-cē-dence, án-tě-cē-den-cy, s. [From Lat. antecedenſia = a going before; antecedens, pr. par. of antecedo = to go before.] A going before in point of time.

Astron. \* In antecedence [Lat. in antecedenſia]: A term formerly used in describing what is now called the retrograde motion of a planet, that is, its motion from east to west. (Glossogr. Nova.)

án-tě-cē-dent, a. & s. [In Fr. antécédent; Sp., Port., & Ital. antecedente. From Lat. antecedo = going before, pr. par. of antecedo = to go before.]

A. As adjective: Preceding in point of time; prior to.

"... derived their doctrines from antecedent writers." -Duke of Somerset: Christian Theology and Modern Socieſm, xxx. 131.

"Prud. I ask, then, if there was ever anything that had a being antecedent to or before God?" -Bunyan: Pilgrim's Progress, pt. II.

B. As substantive: 1. Ordinary Language:

1. (Sing.) Gen.: That which goes before in point of time.

"A duty of so mighty an influence that it is indeed the necessary antecedent, if not also the direct cause, of a sinner's return to God." -South.

2. (Plur.) Spec.: The events of a person's bygone history sought out to test his present character or pretensions, and afford assistance in forecasting his future action. (Used sometimes also of public events instead of persons.)

"... and it was truly necessary to act in the matter with entire openness, owing to so many questionable antecedents." -Froude: Hist. Eng., vol. IV., p. 133.

II. Technically:

1. Grammar. An antecedent is a word going before a relative pronoun, and to which that relative points back. In the connected clauses, "Then Saul, who also is called Paul," Saul is the antecedent to the relative who.

"Which is likewise used for restrictive purposes, or to limit or explain its antecedent." -Bain: Eng. Gram. (1868), p. 23.

2. Logic: That part of a conditional proposition on which the other depends. (Whately.) The other part is called the consequent. In the sentence, "If thou faint in the day of adversity thy strength is small," the words "If thou faint in the day of adversity" are the antecedent, whilst those which remain, viz., "thy strength is small," are the consequent.

-13. Mathematics:

(a) Gen.: "That term or quantity which the mind considers first in comparing it with another." (Glossogr. Nova.)

(b) Specially (Plur.): The first and third terms in a series of four proportionals. The second and fourth are consequents. Thus, if A : B :: C : D, then A and C are antecedents, and B and D consequents. (See Euclid, BK. V., Def. 12.)

4. Med. Antecedent signs: The signs or symptoms which precede the attack of any particular disease.

án-tě-cē-dent-al, a. [Eng. antecedent; -al.] Pertaining to what is antecedent, or goes before.

Math. Antecedent method: A method of investigating universal comparison and general geometrical proportion, published by Mr. James Gleſie in 1798. It is derived from an examination of the antecedents of fractions

having given consequents, and a given standard of comparison in the various degrees of augmentation and diminution which they undergo by composition and decomposition. (Rees.)

\* án-tě-cē-děn-tia (tia as shí-ə), s. [Lat., but not classic.] Antecedence.

\* In antecedencia. In antecedence. [ANTECEDENCE.]

án-tě-cē-dent-ly, adv. [Eng. antecedent; -ly.] Previously; before, in point of time.

"... an agrarian law which, antecedently to a division, dispossessed patrician squatters." -Lewis: Early Rom. Hist. (1855), chap. XII., pt. IV., § 68, p. 295.

\* án-tě-cēs-sór, \* án-tě-cēs-soúr, (Eng.), \* án-tý-cēs-sór, \* án-tě-cēs-soúr, \* án-tě-cēs-tre (Scotch), s. [In Sp. antecesor; Ital. antecessor. From Lat. antecessor = one who goes before; ante = before; cedo = to go.] One who goes before another. Specially-

1. An ancestor.

"For in Charlemain time antecessor had she, When Charlemain had conquered truly The holy eridome and contre by werre myghty." The Romans of Partenay (ed. Skcat), 6,356-61.

2. A predecessor in an office or estate.

"And his cruel antecessors also, By whom to greivous torment put we be." The Romans of Partenay (ed. Skcat), 4,768-7.

"The successor seldom preceding his antecessor's device." -Sir E. Sneyde: State of Religion.

án-tě-chám-bér, \* án-tí-chám-bér, s. [In Fr. antichambre; Ital. anticamera.]

1. Lit.: An outer chamber or room in which people wait before being admitted to the inner or chief apartment.

"When the host was elevated there was a strange confusion in the ante-chamber." -Macaulay: Hist. Eng., chap. IV.

2. Fig.: The mouth, viewed as the entrance to some of the interior parts of the physical frame.

"... the mouth, the ante-chamber to the digestive canal." -Todd & Bowman: Physiol. Anat., vol. I., p. 484.

"The express has the ante-chambers past, And this way moves with a disorder'd haste." Dryden: Aurungzebe, II. 1.

án-tě-cháp-el, s. [Eng. ante (from Lat.), in compos. = before; and Eog. chapel.] The part of a chapel which lies between the western wall and the quire-screen. (Gloss. of Arch.)

"... the ante-chapel of Trinity College chapel." -Warton: Life of Bathurst, p. 150.

án-tě-ciáns, s. pl. [In Fr. antécien; Sp. antecios; Lat. pl. anteci. From Gr. ἀντικίος (antíkios) = living in an opposite latitude; αντί (antí) = opposite to, and οἶκος (oíkos) = to dwell; οἶκος (oíkos) = a house.]

Geog. & Astron.: A term applied to two persons or two communities living the one north, the other south of the equator, on the same meridian of longitude and the same parallel of latitude. Taking the whole course of the year, both parties have the same length of day; only it is winter with the one while it is summer with the other. [ANTICIAN.]

án-tě-cól-úm-bí-an, a. [Eng. ante (from Lat.), in compos. = before; Eng. Columbian, from Christopher Columbus, the navigator.] Previous to the time of Columbus; before the discovery of America.

án-tě-cúr-sór, s. [Lat. ante = before, and cursor = a runner; from currum, supine of curro = to run. (1) A forerunner; a precursor; one whose arrival presages the coming of some other person, or person. (2) One of the advanced guard or pioneers in front of an army.] A forerunner. (Johnson.)

án-tě-dá-te, s. [Eng. ante (from Lat.), in compos. = before; and date, a. In Fr. antedate; Sp. antedata.] A date preceding another date; a prior date.

"Why hath not my soul these apprehensions, these presages, these changes, those antedates, those jealousies, those suspicions of a sin, as well as my body of a sickness!" -Donne: Devotions, p. 10.

án-tě-dá-te, v.t. [Eog. ante (from Lat.), in compos. = before; and date, v. In Ger. antidatiren; Fr. antedatir; Sp. antedatar; Ital. antedatire.]

1. To date a document earlier than the time at which it was actually written for fraudulent or other purposes.

"As the error antedates the event by twenty years, ..." -Lewis: Early Rom. Hist., chap. XII., pt. IV., § 62.

2. To cause an event to come at an earlier date than it otherwise would have done, by removing the hindrances which postpone its arrival.

"But for the long contest with France, the most beneficent domestic legislation of our time might have been antedated by perhaps half a century." -Times, November 24, 1878.

3. To anticipate the arrival of an event before its actual coming, and feel and act as if it were already passing.

"Control, decides, insults thee every hour, And antedates the hatred due to Pow'r." Pope: Satire, 1,740.

án-tě-dá-téd, pa. par. & a. [ANTEDATE, v.]

án-tě-dá-tíng, pr. par. [ANTEDATE, v.]

án-tě-dí-lú-vi-ál, a. [ANTEDELUVIAN.] The same as ANTEDELUVIAN, a. (q.v.).

án-tě-dí-lú-vi-an, a. & s. [In Ger. antediluvianisch; Fr. antediluvien; Port. antediluviano; Ital. antediluviano. From Lat. ante = before, and diluvium = a or the deluge.]

A. As adjective:

1. Lit.: Before the deluge; relating to the persons, the events, or the period before the Noachian deluge.

"The text intends only the line of Seth, conducing into the genealogy of our Saviour and the antediluvian chronology." -Browne: Vulgar Errors.

"These huge reptiles, surrounded by the black lava, the leafless shrubs, and large cacti, seemed to my fancy like some antediluvian animals." -Darwin: Voyage round the World, ch. xviii.

2. Fig.: Rude and primitive, such as may be supposed to have existed before the deluge, in the infancy of manufactures and other departments of civilisation.

"... above all, the whole system of travelling accommodations was barbarous and antiquated for the requisitions of the pampered south." -De Quincy's Works (ed. 1853), vol. II., pp. 162, 163.

B. As substantive: One who lived before the deluge.

"We are so far from repining at Ood, that he hath not extended the period of our lives to the longevity of the antediluvians, that we give him thanks for contracting the days of our trial." -Bentley.

\* án-tě-fáct, s. [Lat. ante = before; factum = something done.] Something done before another. (Opposed to postfact.)

"Some have published that there is a proper sacrifice in the Lord's Supper to exhibit Christ's death in the postfact, as there was a sacrifice to prefigure in the old law the antefact." -Copie of the Proceedings of some Divines (1641), p. 2.

án-tě-fix-és, án-tě-fix-és, s. pl. [In Fr. antefixes; Ital. antefisse; Lat. antefixæ.]

Arch.: Ornamental tiles, placed on the cornices and eaves of ancient buildings, where each ridge of tiling terminated. They were designed to conceal the ends of the ordinary tiles. (Gloss. of Arch.)

án-tě-góth-ic, a. [Lat. ante = before; Eng. Gothic.] Previous to the rise of the Gothic architecture.

"... the style which belongs to the Roman or Anti-Gothic architecture, ..." -Longfellow: Introd., Skeleton in Armour.

án-tě-lópe, s. [In Dut. & Port. antelope; Dan., Ger., & Fr. antilope. From Gr. ἀνθόλοψ (anthólōps) = a species of antelope (a word used by Eustathius, who wrote about A.D. 1160); ἀνθος (anthos) = a flower, ... brightness; λ (l), euphonic (γ); ὄψ (ops) = the eye. "Brightness of eye." [ANTILOPE.]

A. Ordinary Language:

1. Lit.: The English equivalent of the large zoological genus Antelope, or sub-family Antilopina. For its scientific characters see the former of these two words. Most antelopes are deer-like animals of great elegance. They have large lustrous eyes; are swift of foot, and take enormous leaps, when flying from a foe, when wishing to clear a bush or other obstacle in their path, or in the exuberance of their activity, apparently for very wantonness. The species referred to by Moore in the examples quoted is the common Indian antelope (Antelope cervicapra, Fallas), common in the Deccan and other parts of the Indian empire. [SASIN.]

"Our sands are bare, but down their slope The silver-footed antelope As gracefully and gaily springs As o'er the marble courts of kings." Moore: L. E.; Light of the Haram.

2. Fig. Comparison of a person beloved to an antelope are common in the erotic poetry connected with the East.

B. Technically:

Her. The heraldic antelope: An antelope drawn in a conventional way to gratify heraldic taste. It is distinguished from the natural antelope, which is one in which the artist has aimed at a genuine imitation of nature.

án-tě-lū'-cān, a. [Lat. antelucanus = before daybreak; ante = before, and lux, genit. lucis = light.] Held before daylight. A term specially applied to the religious services held in the early ages of Christianity before daylight, to shield the worshippers from persecution, or to afford convenience to those who were not their own masters, and could not attend a congregation during working hours. There was a fascination to some minds about such meetings, which were continued after the necessity which had first brought them into existence had passed away.

"There the Jupiter of exemplary honour and magnificence, there the Phosphorus of piety and antelucan devotion."—Dr. Hunt; Rem., p. 44.

"All manner of antelucan labourers, who make provision for the flesh, make the flesh their provision."—Gayton; Notes on Don Quix., iii. 6.

† ánt-ém-blět'-íc, a. [Gr. ἀντεβάλλω (anteballō) = to make an inroad in turn, to attack in turn; ávri (anti) = corresponding to; ἐμβάλλω (emballō) = to throw in; ἐν (en) = in; βάλλω (ballō) = to throw.] Bestowed in reparation of a loss.

"Office against antemblemic trust."—Boswell; Bentham's Principles of Morals and Legislation, ch. xviii., Note 4, § 1 v.

án-tě-měr-íd'-i-ān, a. [Lat. ante, and Eng. meridian.] Before the time at which the sun comes to the meridian, that is, before noon.

¶ It is usually contracted into a.m. or A.M.

án-těm-ět'-íc, a. & s. [Gr. ávri (anti) = against, and Eng. emetic (q.v.).]

1. As adjective: Fitted to act in a manner opposite to that in which an emetic does; in other words, fitted to check, instead of produce, vomiting. (Quincey.) The same as ANTI-EMETIC, adj. (q.v.).

2. As substantive: A medicine fitted to check vomiting. The same as ANTI-EMETIC, s. (q.v.).

án-tě-mō-šā'-íc, a. [Lat. ante = before, and Eng. Mosaic.] Before the time of Moses.

án-tě-mūn'-dānc, a. [Lat. ante, and Eng. mundane.] Before the creation of the world.

án-tě-mū-r'-al, a. [In Sp. antemural, antemurala, antemuro; Ital. antemurale. From Lat. ante = before, and murus = a wall.] A barbican consisting of a high and strong wall with turrets built in front of the gateway in old castles, and designed for its defence.

án-tě-nā'-tal, a. [Lat. ante, and Eng. natal.] Happening before birth.

"My spirit's antenatal home." Kingeley; Saint's Tragedy.

án-tě-nāt'-ēd, a. [Lat. ante = before; and natus, pa. par. of nascor = to be born.] Before the proper time. (Hacket; Life of Williams, ii. 48.)

án-tě-Nī-šēne, a. [Lat. ante, and Eng. Nicene.] Before the meeting of the first Christian council which took place at Nice in A.D. 325. (The term is applied to the first three Christian centuries, but not to any period of greater antiquity.)

án-tě-n'-nō, s. pl. [Lat. pl. of antenna = a sail-yard; Fr. sing. antenne; Port. pl. antenas; Ital. sing. antenna.]

Zool.: The organs of insects, placed nearly in the same position as horns in ruminating quadrupeds. The antennae are two in number, and are perhaps always present, though in some few genera they are so inconspicuous that these have been considered acerous [ACEROUS], or "without horns," whilst to the great mass of insects the term dicerous [DICEROUS], "two-horned," has been applied. The antennae vary greatly in length, in form, in texture, and in the number of joints which they possess. They are organs of touch and probably of hearing. The term is applied to similar organs in other arthropod animals.

án-tě-n'-nāl, a. [Lat. antenna; Eng. -al.] Pertaining to the antennae of an insect, or an animal of similar organisation.

"... the antenatal nerve . . ."—Owen; Invertebrata (1846), Lect. xvi., p. 211.

án-tě-nār'-i-g, s. [Lat. antenna = (1) a sail-yard; (2) one of the two horn-like appendages to the head of an insect. The Antennaria genus of plants is so called from the resemblance which the hairs of the pappus in the sterile florets bear to the antenna of an insect.]

Botany:

1. Everlasting, a genus of plants belonging to the order Asteraceae, or Composites. The A. dioica, Mountain Everlasting, or Cat's Foot, is indigenous to, and the A. margaritacea, or Pearly Everlasting of North America, naturalised in, Britain. The former, which is abundant on mountain heaths, has cottony stems and white or rose-coloured flowers. The latter, called in France and elsewhere immortelles, are often made on the Continent into wreaths to be laid on the graves of deceased relatives. Here they may be often seen either in their natural hue, or dyed of bright colours, as ornaments in rooms.

2. A fungus of the tribe Physomyces. The species may be seen hanging from the roof of wine vaults and enveloping the casks and bottles below.

án-tě-nār'-i-ūs, s. [Lat. antenna = a sail-yard.]

Zool.: A genus of spiny-finned fishes akin to the Fishing Frogs (Lophius). The Walking-fish (A. hispidus) is an exceedingly grotesque-looking animal. It is a native of the Indian seas.

án-tě-nif'-ēr-ōūs, a. [Lat. antenna = a sail-yard; fero = to bear.] Bearing antennae.

án-tě-ni'-form, a. [Lat. antenna = a sail-yard; forma = form, shape.] Shaped like the antenna of an insect.

án-tě-nū-lār'-i-g, s. [Lat. antenna, the dimin. -ul, and the suff. -aria.] A genus of Zoophytes belonging to the family Sertulariadae. Two species, the A. antennina and the A. ramosa, occur in the British seas.

án-tě-nūm-bēr, s. [Lat. ante, and Eng. number. In Sp. antenombre.] A number preceding another one.

"Whatever virtue is in numbers for conducing to content of notes, is rather to be ascribed to the ante-number than to the entire number, as that the sound returneth after six or after twelve, not that the seventh or thirteenth is not the matter, but the sixth or the twelfth."—Bacon.

án-tě-nūp'-tial, a. [Lat. antenuptialis.] Before marriage.

án-tě-pāg'-mēt (Eng.), án-tě-pāg-mēn'-tium (Lat.), s. [Lat. antepagamentum = the jamb of a door: ante = before, in front of, and pagamentum = a joining together; pag, root of pango = to fasten or fix.]

Architecture:

1. One of the jambs of a door.

ANTEPAGAMENT.

2. The ornamented architrave of a doorway.

¶ The plural may be antepagments, or antepagments. The latter is the more common.

án-tě-pās'-chāl, a. [Lat. ante = before, and paschalis = pertaining to the passover or to Easter; from pascha, in Gr. πάσχα (pascha) = the passover; Heb. פֶּסַח (pesach) = indulgence, immunity from punishment, but more frequently (1) the paschal lamb, (2) the festival of the passover; פֶּסַח (pasach) = to pass over (Exod. xii. 27).]

1. Before the passover.

2. Before Easter, which nearly coincided in time with the passover.

"The dispute was very early in the Church concerning the observance of Easter; one point whereof was, concerning the ending of the antepaschal fast, which both sides determined upon the day they kept the festival."—Nelson; Fasts and Festivals.

án-tě-pāst, s. [In Ital. antipasto. Lat. ante = before, and pastus, pa. par. of pasco, pavi, pasium = to feed.] A foretaste.

án-tě-pén'-di-ūm (Lat.), án-tě-pénd, án-ti-pénd (Scottish), s. [Mediæv. Lat. antependium.] The frontal of an altar [FRONTAL]; a veil or screen for covering the front of an altar. It is used in some Roman Catholic churches, especially on festival days.

"Item, an antepend of black velvet."—Coll. Inventories (1542), (Jamieson.)

án-tě-pén-ūt' (pl. án-tě-pén-ūt'-tī-ma), s. [In Fr. antepenultime; Sp., Port., & Ital. antepenultimo; Lat. ante = before, and penultimus or penultimate, (s.) the penult, (a.) the last but one; poene or pene = almost, and ultimus = the last.] The syllable before the penultimate one. As the penultimate one is next to the last, the antepenultimate is two from the last, as cin in vaccination. The word is really only a shortened form of the following.

án-tě-pén-ūt'-tīm-āte, a. & s. [In Fr. antepenultime.]

A. As adj.: Pertaining to the last syllable but two. (Crabb.)

B. As subst.: The last syllable but two.

án-těp-ī-ēp'-tic, án-těp-i-lēp'-tī-cal, a. & s. [In Ger. antiepileptisch. From Gr. ávri (anti) = against, and ἐπιληψία (epilepsia) = (1) a taking hold of; (2) epilepsy, falling sickness; ἐπιλαμβάνω (epilambanō) = to take besides, to lay hold of; ἐπί (epi) = on, upon, and λαμβάνω (lambanō) = to take.]

1. As adjective: Deemed of use against epilepsy (falling sickness).

"That besor is antidotal, lapis judicatus diureticus, coral antiepilepticus, we will not deny."—Browne; Vulgar Errors.

2. As substantive: A medicine deemed of use against epilepsy.

án-tě-pōne, v. t. [In Sp. anteponer; Ital. anteporre = to prefer. From Lat. antepone; ante = before, and pono = to put or place.] To place one thing before another; to prefer one thing before another. (Bailey.)

án-tě-pōrt, s. [Lat. ante = before, and porta, accus. of porta = a city gate, a gate.] A gate in advance of a gate; namely, an outer gate. (Todd.)

án-tě-pōš'-i-tion, s. [In Ital. anteposizione. From Lat. ante, and Eng. position = a placing.]

Grammar: The placing a word before another, the natural position of which would be after it. (Ash.)

án-tě-prān'-dī-al, a. [Lat. ante = before; Eng. prandial (q.v.).] Before breakfast. (Quart. Review.)

† án-tě-prē-dic'-a-mēt, s. [Lat. ante, and Eng. predicament.] [PREDICAMENT.]

Logic: Anything in logic proper to be studied before the subject of the predicament.

án-tě-prōs'-tāte, s. [Pref. ante, and Eng. prostate.]

Anat.: Anteprostatic (q.v.).

án-tě-prōs-tāt'-ic, a. [Eng. anteprostat(e)-ic.]

Anat.: Situated in front of the prostate gland.

\* án-tēr, s. [AUNTER.]

án-tēr'-i-dēs, a. pl. [Lat. anterides = buttresses; Gr. ἀντήριδες (antērides), plur. of ἀντήρις (antēris), genit. ἀντήριδος (antēridos) = a prop. Anterides, in Greek, are beams to stay the outer timbers of a ship's bow in case of their receiving a shock: ἀντήρις (antēris) = set against, opposite; ἀντήρι (antēri) = against, over against; ávri (anti) = against.]

Architecture: Buttresses for the support or strengthening of a wall.

án-tēr'-i-ōr, \* án-tēr-i-ōur, a. [Lat. anterior = before, preceding. In Fr. antérieur; Sp. & Port. anterior; Ital. anteriore.]

I. Ordinary Language:

1. Situated before anything in place. (In this and the second signification it is opposed to posterior.) (For example, see No. 11.)

2. Preceding in time.

II. Technically: Used chiefly in sense No. I., in Anatomy, Zoology, Botany, and Science generally.

"Hence, if after the anterior face has received the heat from one radiating source, a second source, which we may call the compensating source, be permitted to radiate against the posterior face . . ."—Tyndall; Frag. of Science (3rd ed.), viii. 4, p. 151.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, oūb, oūre, unīte, cūr, rīle, fūll; trēy, Sŷrian. a, o = ē. ey = ā. qu = kw.

an-ter-i-or-i-ty, s. [Eng. anterior; -ity. In Fr. anteriorité; Sp. anterioridad; Port. anterioridade; Ital. anteriorità.] The state of being before in place or in time.

"Our poet could not have seen the prophecy of Isaiah, because he lived 100 or 150 years before that prophet; and this anteriority of time makes this passage the more observable."—Fops: Misc, xix., note, p. 93.

an-ter-i-or-ly, adv. [Eng. anterior; -ly.] In an anterior situation.

"Anteriorly the prephenoid narrows to a sharp vertical edge."—Flewer: Geol. of the Mammalia, (1870), p. 123.

an-ter-o, in compos. [From Lat. anterior = which is before; ante = before.]

antero-lateral, a. That which is anterior, and also lateral; that is, to the side.

"All that is anterior to the posterior horn [of the gray crescent belonging to the apical cord] is called the antero-lateral column."—Todd & Bowman: Physiol. Anat., vol. 1., p. 256.

antero-parietal, a. Belonging or pertaining to the front of the parietal bones of the skull.

antero-posterior, a. Commencing in the anterior part of an organic structure and continued through it, so as to appear also on the posterior part, or in a direction from behind forward.

"When the medulla oblongata is divided vertically along the median plane, a series of fibres is seen to form a septum between its right and left half. These fibres take a direction from before backwards and appear to connect themselves with the posterior olivary fibres. They are limited inferiorly by the descending fibres. Cruveilhier proposes for them the name antero-posterior fibres. They appear to belong to the same system as the arciform fibres."—Todd & Bowman: Physiol. Anat., vol. 1., p. 260.

an-ter-oom, s. [Eng. ante (from Lat.), in compos. = before, and Eng. room.] A room before or in front of another one.

"An ante-room in the Duke's palace." Shakesp.: Two Gent. of Ver., Stage Dir.

an-ter-og, s. [Gr. ἀντέρος (antēros) or Αντερός] = return-love, love for love. (Personified.) (1) A "god" who avenged alighted love; (2) a "god" who struggled against Eros, the personification of love. In Latin anteros signified a kind of amethyst (Pliny). A being poetically imagined to struggle against love. "He who from out their fountain dwellings raised Eros and Anteros, at Gadara." Byron: Manfred, ll. 1.

\* an-ter-ous, a. [ANTEROUS.]

an-tēs, s. pl. [Lat., plur. = rows or ranks of anything. In Port. antes; Sp. antas.]

ANTES AT HERCULANEUM.

Arch.: Pillars of large dimensions supporting the front of a building.

an-tē-stāt-ūre, s. [Fr.] Fort.: An entrenchment formed of gabions.

an-tē-stōm-ach, s. [Eng. ante (from Lat.), in compos. = before, and stomach.] An anterior cavity leading into the stomach. It occurs in birds which feed on fishes.

"In bird there is no mastication or comminution of the meat in the mouth, but it is immediately swallowed into a kind of ante-stomach, which I have observed in piscivorous birds."—Ray.

an-tē-tē-mp-le, s. [Eng. ante (from Lat.), in compos. = before, and temple.] The portico of a temple or of a church.

"The 'parthex' or ante-temple, where the penitents and catechumens stood."—Christian Antiquities, l. 290.

\* an-tē-tē-me, \* an-tē-tē-me, s. [First element doubtful], second Gr. θέμα (thēma).] [THEME.] The text or theme of a sermon or discourse. (N. E. D.)

\* an-tē-vert, vt. [Lat. anteverto = to take one's turn before another; ante = before, and verto = to turn.] To prevent.

"To antevert some great danger to the publick to ourselves, to our friend, we may and must disclose our knowledges of a close wickedness."—Bp. Hall: Cases of Conscience, Add C. a.

an-tē-vert-ing, pr. par. & s. [ANTEVERT.] As substantive: Preventing, prevention.

"It is high time to mourn for the anteverting of a threatened vengeance."—Bp. Hall: Ser., p. 157.

an-tē-vert-ing-ly, a. [Gr. ἀντί (anti) = against; Eng. Virgilian = pertaining to the poet Virgil.]

Agric.: Noting a method of husbandry or horse-hoeing introduced by Tull. (Webster.)

an-tē-mor-rhāg-ic, a. [Gr. ἀντί (anti) = against, and αιμορραγικός (haimorrhagikos) = pertaining to hemorrhage; αιμορραγία (haimorrhagia) = hemorrhage; αἷμα (haima) = blood, and ῥήγνμι (rhēgnumi) = to break or break through; 2 ser. ῥήγνν (errhagēn).] Pharm.: Deemed of use against hemorrhage, meaning a flux of blood.

an-thē-n-ia, s. [Gr. ἀνθήμιος (anthēmiōs) = a later form of ἀνθίσιος (anthīsiōs) = opposite to the sun; but it is now used for instead of the sun: ἀντί (anti) = instead of, and ἥλιος (hēlios) = the sun.] A mock sun; the representation, by an optical deception, of one or more pseudo-suns in the sky besides the actual one. It is a polar phenomenon, occasionally seen in the north of Scotland, but not often in England.

an-thē-n-ix, s. [Gr. ἀντί (anti) = opposite to, and ἥλις (hēlix) = anything apical; ἥλιξ (hēlix) = twisted, curved; ἑλίσσειν (hēlissēin) = to turn round or about; εἶλω (eīlō), εἶλω (eīlō) = to roll up.] Anat.: The curved elevation within the helix or rim of the external portion of the ear. It surrounds the concha or central cup. Above it bifurcates so as to include a fossa. (Todd & Bowman: Physiol. Anat., vol. II., p. 66.)

an-thē-m-in-tic, a. & s. [In Fr. anthelmintique; Port. anthelmintico; Gr. ἀντί (anti) = against, and ἑλμινς (hēlmīns), genit. ἑλμινθος (hēlmīnthos) = a worm, especially a tapeworm.] 1. As adjective: Capable, or believed to be capable, of killing and expelling intestinal worms from the human frame.

2. As substantive: A medicine given against intestinal worms. The chief intestinal worms found in the human body are the Long Thread Worm (Trichocephalus dispar) in the upper part of the large intestines; the Common Tape-worm (Tænia solium), the Broad Tape-worm (Bothriocephalus latus), and the Large Round Worm (Ascaris lumbricoles), in the small intestines; and the Maw or Thread Worm (Oxyuris or Ascaris vermicularis), in the rectum. Of these the most frequent in Britain are the common tape-worm, the large round worm, and the maw or thread worm. Garrod makes anthelmintics, defined as substances which have the power of destroying the life of entozoa in the alimentary canal, the fourth order of his Class IV., Sub-class I., and subdivides it into Direct Anthelmintics, or Vermicides; Indirect Anthelmintics, or Vermifuges; and Worm Preventives. Among direct anthelmintics may be enumerated oil of male fern, oil of turpentine, kousso, kamela, and bark of pomegranate root; of vermifuges, calomel, scammony, jalap, gamboge, and castor-oil; and of worm preventives, sulphate of iron or other ferruginous salts, quassia, and nux vomica. (Garrod: Mat. Med.)

an-them, \* an-thē-me, \* an-tēm, s. [In A.S. antefen = a hymn sung in alternate parts, an anthem; O. Fr. anthème, antene, antienne, antevens; Prov. antifene, antifona; Sp. & Ital. antifona; Low Lat. antiphona; from Gr. ἀντιφωνον (antiphōnon) = an antiphon, an anthem; ἀντιφώνος (antiphōnos) = sounding contrary, . . . responsive to; ἀντί (anti) = opposite to, contrary to; φωνή (phōnē) = a sound, a tone.]

\* 1. Originally: A hymn sung "against" another hymn; in other words, a hymn in alternate parts, the one sung by one side of the choir, the other by the other.

"Anthem, a divine song sung alternately by two opposite choirs and choruses."—Glossog. Nov., 2nd ed. (1715).

[See also example under ANTHEM-WISE.] 2. Now: A portion of Scripture or of the Liturgy, set to music, and sung or chanted.

There are three kinds of anthems: (1) A versa anthem, which in general has only one voice to a part; (2) a full anthem with verse, the latter performed by single voice, the former by all the choir; (3) a full anthem, performed by all the choir. Anthems were introduced into the English Church service in the time of Queen Elizabeth, and among those who have distinguished themselves in this kind of composition may be mentioned Tallis, Farrant, Orlando Gibbons, Blow, Purcell, Michael Wise, Jeremiah Clark, Croft, Greene, Boyce, Nares, as well as many modern writers.

" . . . the thanksgiving sermons and thanksgiving anthems."—Macaulay: Hist. Eng., chap. xxiii.

anthem-wise, adv. After the manner of an anthem.

"Several quires placed one over another, and taking this voice by catches, anthem-wise, give great pleasure."—Bacon: Essays, Civ. and Mor., ch. xxxvii.

an-them-is, s. [In Fr. anthemis; Lat. anthemis; and Gr. ἀνθεμίς (anthēmis) = chamomile; ἀνθεώ (anthēō) = to blossom; ἀνθος (anthos) = a blossom, a flower. The anthemis is so called apparently from the copiousness of its bloom.] A genus of plants belonging to the order Asteroceæ, or Compositæ. It contains the Common Chamomile (A. nobilis), which grows wild near London. The flower-buds constitute the chamomile of the shops. Cattle eat it with avidity. As a medicine it is tonic and stimulating. A warm infusion of it excites vomiting. The true chamomile plant has a fine smell, in this differing from another common species of anthemis, the A. cotula, or "Stinking Chamomile." The latter plant, moreover, is erect, whereas the former is prostrate. A third species, the A. arvensis, or Corn Chamomile, is local. Two others, the A. tinctoria, or Ox-eye Chamomile, often cultivated in consequence of its having medicinal qualities like the common species, and the A. Anglica, or Sea-chamomile, are doubtfully native. A brilliant yellow dye, derived from the first of these plants, is used in France.

"The anthemis, a small but glorious flower. Scarce rears his head; yet has a giant's tower." Tate's Couey.

an-thēr, s. [In Fr. anthere; Lat. anthera = a medicine composed of flowers; Gr. ἀνθήρος (anthēros) = flowery, blooming; ἀνθεώ (anthēō) = to blossom, to bloom; ἀνθος (anthos) = a blossom, a flower.]

Bot.: An organised body constituting part of a stamen, and generally attached to the apex of the filament. As a rule, it is composed

ANTHERA. 1. Geranium lucidum. 2. Lime. 3. Lily.

of two parallel lobes or cells; sometimes, however, there are four, and sometimes only one. The cells are united by the connective, and contain pollen. When the time for shedding it arrives, the anthers burst generally by a longitudinal fissure from the base to the apex, but in some plants in other ways. The anther is the theca of Grew, the capsula of Malpighi, the apex of Ray, the testiculum or testis of Vaillant, the capitulum of Jungius, and the spermatocystidium of Hedwig. (Lindley: Intro. to Bot.)

Anther-dust: The pollen from an anther. It constitutes a yellow dust, which, when it falls from the atmosphere, has often been mistaken for a shower of sulphur. It is very copious in the Conifere.

an-thēr-al, a. [Eng. anther; -al.] Pertaining to a single anther of a plant, or to the anthers collectively.

an-thēr-ō-g, s. [From Lat. anthera.] [ANTHER.] A genus of moths of the family Bombycidae. The A. Paphia is the Tusser or Tussock of the Bengalee, which furnishes a

kind of silk used by the natives of India in the manufacture of cloth for dresses, and even imported into England.

**ân-thër-ÿ-cùm**, s. [In Dut. *anthericum*; Fr. *antheric*; Sp., Port., & Ital. *antherico*, *antherias*; Gr. *ἀνθηρίκος* (*antherikos*).] A genus of plants belonging to the order Liliaceae, or Lilyworts. The *A. ramosum* is considered to be diuretic.

**ân-thër-ÿ-dî-âl**, a. [Mod. Lat. *antherid(um)* (q.v.); -al.]

*Bot.*: Pertaining to, or bearing antheridia.

**ân-thër-ÿ-d-ÿ-üm** (plur. **ân-thër-ÿ-d-ÿ-â**), s. [Lat. *anthera*, and dimin. -idium.]

*Bot.*: A term used by some cryptogamic botanists in describing certain obscure organs in the Mosses, Jungermanniaceae, and Hepaticæ. In mosses the antheridia are cylindrical, articulated, clavate membranous bodies opening by an irregular perforation at the apex, and discharging a mucous granular fluid. Some contain spermatic elements endowed with power of motion. Organs somewhat similar are found in Jungermanniaceae and Hepaticæ in the axilla of the perichætal leaves.

**ân-thër-ÿ-ër-öüs**, a. [Lat. *anthera*; and *fero* = to bear.] Bearing anthers.

**ân-thër-öğ-ën-öüs**, a. [Eng. *anther*, and Gr. *γεννομαι* (*geninomial*) = to be engendered.] Engendered from anthers. Applied to such double flowers as have anthers transformed on the principles of morphology into petals.

**ân-thër-öid**, a. [Eng. *anther*, and Gr. *εἶδος* (*eidos*) = appearance.] Presenting the appearance of an anther.

**ân-thër-ë-zö-ÿd**, **ân-thër-ë-zö-öid**, s. [Gr. *ἀνθηρός* (*antheros*) = flowery, blooming; *ζῶον* (*zōon*) = a living being, an animal; *εἶδος* (*eidos*) = appearance.]

*Bot.*: One of the minute bodies like slender spiral threads, produced in the antheridia of cryptogamic plants, serving to fertilise the female organs.

... and with the Algae, &c., by the locomotive power of the *antherozoid*.—Darwin: *Descent of Man*, pt. II., chap. viii.

**ân-thës-ÿs**, s. [Gr. *ἀνθησις* (*anthesis*), the same as *ἀνθῆ* (*anthê*) = a blossom.]

*Botany*: The time when a flower opens. (*Lindley: Introd. to Bot.*)

**ân-thës-tër-ÿ-ön**, s. [Gr. *Ἀνθηστηρίων* (*Anthesierion*).] The sixth month of the Athenian year. It was so called because within it there occurred the three days' festival of Dionysos (Bacchus), which was called Anthesteria. The month consisted of twenty-nine days, and corresponded to the latter part of November and the first part of December.

**ân-thî-a**, s. [From Lat. *anthias*.] [ANTHIAS.] A genus of large predatory beetles belonging to the family Brachinidæ. The *A. sulcata* is a native of Senegal.

**ân-thî-as**, s. [Lat. *anthias*; Gr. *ἀνθίας* (*anthias*) = a fish (*Labrus* or *Serranus* *anthias*).] A genus of spiny-finned fishes belonging to the Percidæ, or Perch family.

**ân-thîd-ë**, s. pl. [ANTHUS.] In the arrangements of Yarrell and others, a family of Dentirostræ Birds. [ANTHUS.]

**ân-thî-stîr-ÿ-a**, s. [Gr. *ἀνθίστημι* (*anthistemi*) = to stand against. Nained from its very stiff stubble.] A genus of plants belonging to the order Gramineæ, or Grasses. The *A. australis* is the Kangaroo-grass of Australia. It is used for fodder, as is the *A. ciliata* in India. (*Lindley: Veg. Kingd.*)

**ân-thö-bî-an**, s. [Gr. *άνθος* (*anthos*) = a blossom, a flower, and *βίος* (*bios*) = course of life.] An animal passing its existence on flowers.

**ân-thö-car-pî**, s. pl. [Gr. *άνθος* (*anthos*) = a blossom, a flower, and *καρπός* (*karpos*) = fruit.] Lindley's fourth class of fruits. He calls them also Collective Fruits, and defines them as those of which the principal characters are derived from the thickened floral envelopes. They are divided into *single* and *aggregated*; the former including the fruits called Diclecium and Sphærocarpium, and the latter those termed Syconus, Strobilus, and Sorosis. (*Lindley: Introd. to Bot.*)

**ân-thö-car-p-öüs**, a. [ANTHOCARPI.] Pertaining to the order of fruits called Anthocarpî.

**ân-thöç-ër-ös**, s. [Gr. *άνθος* (*anthos*) = a flower; *κέρας* (*keras*), genit. *κέρατος* (*keratos*) = horn.]

*Botany*: The typical genus of the family Anthocerotæ (q.v.). *A. lavis* is found in wet places in this country.

**ân-thö-cër-öt-ë-së**, s. pl. [ANTHOCEROS.]

*Botany*: A tribe of Hepaticæ.

**ân-thö-chër-a**, s. [Gr. *άνθος* (*anthos*), and *χαίρω* (*chairo*) = to rejoice; rejoicing in flowers.] The name given by Vigors to a genus of insectivorous birds belonging to the family Meliphagidæ, or Honey-eaters. The *A. carunculata* of Australia, called by the natives Goo-gwar-ruck, in imitation of its harsh note, and by the settlers Wattle-eater or Brush Wattle-bird, frequents the Banksias when they are in flower.

**ân-thö-çÿ-a-në**, **ân-thö-çÿ-an-ine**, **ân-thö-ky-an**, **ân-thö-gÿ-an-in**, s. [Gr. *άνθος* (*anthos*), and *κυανός* (*kuanos*), adj. = dark-blue; *κυανός* (*kuanos*), a. = a dark-blue substance.]

*Bot.*: A blue matter, which Macquart considers to be produced from chlorophyll by the abstraction of water. It is an extractive matter, soluble in water, but not in alcohol. It is stained red by acids, and green by alkalies. It forms the bases of all blue, violet, red, brown, and many orange flowers. (*Lindley: Introd. to Bot.*)

**ân-thö-dî-üm**, s. [Gr. *ανθηδής* (*anthedês*) = like flowers, flowery, from *άνθος* (*anthos*) = a blossom, a flower, and *εἶδος* (*eidos*) = appearance.]

*Bot.*: The inflorescence seen in the Compositæ. It is the *cephalanthium* of Richard, the *calathis* of Mirbel, and the *calathium* of Nees von Esenbeck. (*Lindley: Introd. to Bot.*)

**ân-thö-leü-cin**, s. [Gr. *άνθος* (*anthos*) = a flower, and *λευκός* (*leukos*) = bright, . . . white.] The white colouring matter in plants.

**ân-thö-lite**, s. [Gr. *άνθος* (*anthos*) = a blossom, a flower, and *λίθος* (*lithos*) = a stone.] A mineral—a variety of Amphibole (q.v.). Dana enums up its constituent elements in calling it Magnesia-Iron Amphibole. It graduates into kuppferite, under which Dana places part of the German *antholith*, assigning another portion of it to anthophyllite.

**ân-thö-lög-ÿ-cal**, a. [Eng. *anthology*; -ical.] Pertaining to anthology. (*Todd's Johnson*.)

**ân-thöi-ë-gÿ** (1), s. [In Sw. *anthologi*; Dan., Ger., & Fr. *anthologie*; Sp. *antologia*; Port. *antologia*; Gr. *ἀνθολογία* (*anthologia*) = (1) a flower-gathering, (2) a collection of poems: *άνθος* (*anthos*) = a flower, and *λέγω* (*lego*) = . . . to gather.]

1. *Gen.*: A gathering of flowers in a metaphorical sense; a collection or gathering together of passages of flower-like beauty from Greek, Roman, or indeed from any classic authors. Though some of these might be in prose, yet the great majority were, as was natural, in poetry, which might be grave or gay, it mattered not: what, above all, was needful was, that whatever the subject treated of, some one prominent thought should be expressed in terse and felicitous language. [EPIGRAM.]

"They are very different from the simple sepulchral inscriptions of the ancients, of which that of Meleager on his wife, in the Greek *antology*, is a model and master-piece."—Dr. Warton: *Essay on Pope*, ii. 472.

2. *Spec.* In the Greek Church: A collection of devotional pieces.

**ân-thöi-ög-ÿ** (2), s. [From Gr. *άνθος* (*anthos*) = a flower; *λόγος* (*logos*) = a discourse.] A discourse about flowers; a dissertation on flowers.

"*Anthology* (Gr.) a discourse or treatise of flowers."—Glossog. Nova, 2nd ed.

**ân-thöi-ÿz-a**, s. [In Dut. *antholyza*; Fr. *antholie*.] From Gr. *άνθος* (*anthos*) = a blossom, a flower, and *ύσσα* (*ussa*) = rage, madness. The flower remotely resembles the mouth of an animal which may be supposed full of rage and about to bite. A genus of plants belonging to the order Iridaceæ, or Irids. The *A.*

*æthiopia*, or Flag-leaved Antholyza, has been introduced into Britain.

**ân-thö-mä-nî-a**, s. [Gr. *άνθος* (*anthos*) = a flower, and *μανία* (*mania*) = mania; *μαινομαι* (*mainomai*) = to rage.] A mania for flowers.

**ân-thö-mÿ-ÿ-a**, s. [Gr. *άνθος* (*anthos*) = a blossom, a flower, and *μυία* (*myia*) = a fly.] A genus of flies, of which one of the best known is the *Anthomyia Brassicæ* (Cabbage-Fly). Its larvæ feed on the roots of cabbages, turnips, &c. In the adult state the male and female are so unlike that they might be mistaken for different insects. Another species, the *A. trimaculata*, the Three-spotted Anthomyia, when in the larva state, also feeds on the roots of turnips; so likewise does the *A. radicum*, or Root Turnip-Fly; whilst the *A. tuberosa* attacks the tubers of potatoes. (*Curtis*.) Many species of the genus occur in Britain. [ANTHOMYZA.]

**ân-thö-mÿz-a**, s. [Gr. *άνθος* (*anthos*) = a flower, and *μυζω* (*myzō*) = (1) to murmur with closed lips, (2) to suck.] The name given by some entomologists to the dipterous genus more commonly called Anthomyia (q.v.).

**ân-thö-mÿ-zî-dæ**, s. pl. [ANTHOMYZA.] A family of Dipterous insects, of which Anthomyia is the typical genus.

**ân-thö-nî-anç** (h silent), s. pl. [From the monk Anthony.]

*Church Hist.*: An order of monks said to have been founded by St. Anthony about A.D. 324. (*Glossog. Nova*.)

**ân-thön-ÿ's fire** (A silent), s. [SAIN-ANTHONY'S FIRE, ERYSIPELAS.]

**ân-thöph-ÿl-a**, s. pl. [Gr. *άνθος* (*anthos*) = a blossom, a flower, and *φίλος* (*philos*) = a. = (1) beloved; (2) poet, loving, fond; s., a friend.] "Flower lovers." A division of Hymenopterous insects established by Latreille, and still recognised. It contains the Bees. [BEE.] It is divided into two families, Apidæ and Andrenidæ.

**ân-thöph-ör-a**, s. [Gr. *άνθος* (*anthos*) = a flower, and *φορέω* (*phoreō*) = to bear or carry.] A genus of Bees, family Apidæ. *A. reuska* is the Mason-bee (q.v.).

**ân-thö-phöre** (Eng.), **ân-thöph-ör-üm** (Mod. Lat.), s. [From Gr. *ἀνθοφόρος* (*anthophoros*) = bearing flowers; *άνθος* (*anthos*) = a flower, and *φορέω* (*phoreō*) = to bear.]

*Botany*: The name given by De Caudolle to the lengthened internode below the receptacle in Caryophyllæ which bears the petals and stamina at its summit. (*Lindley: Introd. to Botany*.)

**ân-thöph-ÿl-lite**, s. [In Dan. & Sw. *anthophyllit*. Schumacher, as quoted by Dana, says that it was derived from Lat. *anthophyllum* = the clove, and so named from its clove-brown colour.] A mineral placed by Dana under his Amphibole group and sub-group of Bisilicates. It is orthorhombic, and usually lamellar or fibrous massive; the hardness is 5.5; the sp. gr., 3.1 - 3.22; the lustre, pearly; colour, brownish-gray, yellowish-brown, or brownish-green. It is translucent, or nearly so, brittle, and possesses double refraction. Composition: Silica, 56 to 56.74; alumina, 2.65 to 3; protoxide of iron, 13 to 14.13; protoxide of manganese, 0.91 to 4.0; magnesia, 23 to 24.35; lime, 1.51 to 2; and water, 1.67 to 2.38. Occurs in mica schist in Norway.

*Igdarous anthophyllite*: According to Dana, an altered asbestiform tremolite, from New York Island. The British Museum Catalogue makes it a variety of Hornblende.

**ân-thöph-ÿl-lit-ÿc**, a. [Eng. *anthophyllite*; -ic.] Pertaining to anthophyllite; containing more or less of it in composition with some other substances.

**ân-thor-ÿsm** (Eng.), **ân-thor-ÿs-müs**, s. [Gr. *ἀνθορασμός* (*anthorismos*) = a counter-definition: *ἀντι* (*anti*) = against, and *ῥασμός* (*horismos*) = (1) a marking out by boundaries; (2) the definition of a word: from *ῥαίω* (*horaiō*) = to divide or separate.]

*Logic & Rhetoric*: A counter definition; a definition different from, and counter to, that made by one's adversary.

fâte, fâre, amidst, whât, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pîne, pît, sire, sîr, marine; gô, pôt, or, wôre, wôlf, wôrck, whô, sôn; müte, cûb, cûre, unite, cûr, râle, fûll; trÿ, Sÿrian. æ, œ = ê. ey = â. qu = kw.

án-thō-síd-ér-íte, s. [From Gr. άνθος (anthos) = a blossom, a flower; σίδηρος (sídēros) = iron.] A mineral placed by Dana in the Appendix to his Bivalucites. It occurs in fibrous tufts, or feathery-looking flowers. The hardness is 6½; the sp. gr., 3; the lustre, silky; the colour, yellow, yellowish-brown, or white. Composition in one specimen: Silica, 60.3; sesquioxide of iron, 35.7; and water, 4. Found in the province of Minas Geraes, in Brazil.

án-thō-sō-má, s. [Gr. άνθος (anthos) = . . . a flower σῶμα (sōma) = a body.] A genus of Entomostracans. [ANTHOSOMADÆ.]

án-thō-sō-má-dæ, s. pl. [ANTHOSOMA.] A family of Entomostracans, of the order Siphonotomata, and the tribe Pschycephala. It has only one British genus, Anthosoma. The A. Smithii was found sticking to a shark.

án-thō-spér-mō-æ, s. pl. [Gr. άνθος (anthos) = . . . flower, and σπέρμα (sperma) = seed.] A section of the Cinchonaceæ order of plants.

án-thō-spér-mūm, s. [In Fr. anthosperme; Sp. Porf., and Ital. antospermo; Gr. άνθος (anthos) = a flower, and σπέρμα (sperma) = seed.] A genus of plants belonging to the order Cinchonaceæ, or Cinchonads. A. ethiopicum is the Ethiopian amber-tree. [AMBERTREE.]

án-thō-táx-ís, s. [Gr. άνθος (anthos) = a flower, and τάξις (taxis) = an arranging; τάσσω (tássō) = to arrange.] Botany: The arrangement of flowers in the several kinds of inflorescence.

án-thō-týpe, s. [Gr. άνθος (anthos) = a blossom, a flower, and τύπος (typos) = a blow, the mark of a blow, . . . a type, &c.] [TYPE.] A generic term for papers impregnated with the coloured juices of flowers, used for photographic purposes. (Ogilvie.)

án-thō-xán-thine, s. [Gr. άνθος (anthos) = a flower, and ξανθός (xanthos) = yellow.] The yellow colouring matter in plants. It is an extractive resinous substance, soluble partly in water and partly in alcohol or ether. Treated with sulphuric acid it becomes blue. [ANTHOCYANE.] (Lindley: Introđ. to Bot.)

án-thō-xán-thūm, s. [In Sp. & Ital. an-zanto; Gr. άνθος (anthos) = a flower, and ξανθός (xanthos) = yellow, because the flower-spikes are yellowish, especially when old.] A genus of plants belonging to the order Gramineæ, or Grasses. It has but two stamens, whereas three is all but the universal number among grasses. The A. odoratum, or Sweet-scented Vernal Grass, is very common in Britain, flowering in May and June. The sweet scent is more conspicuous when the plant is dying than when it is fresh. It has been attributed to benzoic acid.

án-thō-zō-a, s. pl. [Gr. άνθος (anthos) = a flower, and ζῶον (zōon) = a living being, an animal.] A class of Zoophytes now more commonly called Actinozoa (q.v.). Johnston divides his Zoophytes into Anthozoa and Polyzoa, the former again subdivided into Hydroida, Asteroida, and Heliandthoida. (Johnston: Brit. Zoophytes, 1867.) Another classification places under the Anthozoa the eight following families: Actinisiadæ, Zoanthidæ, Xenidiæ, Alcyoniadæ, Pennatulidæ, Tubiporidæ, Caryophyllidæ, and Gorgoniadæ.

án-thra-gēno, s. [Gr. άνθραξ (ánthrax) = coal; άνθρακος (ánthrakos) = coal.] Chemistry: C<sub>14</sub>H<sub>10</sub> = C<sub>6</sub>H<sub>4</sub> <math>\begin{matrix} \text{CH} \\ / \quad \backslash \\ \text{C} \\ / \quad \backslash \\ \text{CH} \end{matrix}> \text{C}\_6\text{H}\_4

Obtained by the fractional distillation of the coal tar boiling above 360°. It crystallises in monoclinic plates; it is slightly soluble in alcohol, but dissolves readily in benzene; it melts at 213°, and boils at 362°. It can be formed along with benzyl-toluene by heating in sealed tubes to 180° a mixture of benzyl chloride and water.

án-thrác-ý-dæ, s. pl. [ANTHRAX.] A family of dipterous insects belonging to the section Tanytomata, but having shorter probosces than its immediate allies. The British genera are Anthrax and Lomatia.

án-thra-gíte, s. [From Gr. άνθρακίτης (ánthrakítēs) = resembling, or of the nature of coal; άνθραξ (ánthrax), genit. άνθρακος (án-

thrakos) = coal.] In Dana the first variety of Mineral coal. Called also Glance coal. Hardness 2 to 2½; sp. gr. 1.32 to 1.7; lustre sub-metallic, iron-black, often iridescent. It contains from 80 to 94 per cent. of carbon, and burns with a pale feeble flame. Found in extensive deposits in the State of Pennsylvania.

Free-burning anthracite: A variety of anthracite intermediate between the typical kind and bituminous coal.

án-thra-cít-íc, a. [Eng. anthracite; suff. -íc.] Pertaining to anthracite; composed in whole or in part of anthracite.

án-thrác-ít-óus, a. [Eng. anthracite; -ous.] The same as ANTHRACITIC (q.v.). (Edin. Rev.)

án-thrác-ón-íte, s. [From Gr. άνθραξ (ánthrax) = coal.] A mineral, a variety of Calcite. The name has been specially applied to—

1. Black marble; or marble coloured by the carbonaceous matter arising from the remains of the animal and vegetable organisms inhabiting the old sea from which the carbonate of lime forming the calcite was derived. Marbles of this type are called also Lucullan and Lucullite (q.v.).

2. Black bituminous fetid limestone. From their odour they have been named also Swinestones and Stinkstones.

án-thra-cō-thēr-ý-lím, s. [Gr. άνθραξ (ánthrax), genit. άνθρακος (ánthrakos) = coal or charcoal; and θηρίον (thērion) = a beast, especially one of the kinds hunted; properly dimin. from θήρ (thēr) = a wild beast, a beast of prey.] A fossil mammal of the Pachydermatous order, named from the fact that it was first found in tertiary lignite or brown coal.

"The Dicotylerium and Narrow-toothed Mastodon, for example, diminish the distance between the Lophodon and Elephant; the Anthracotherium and Hippopotamus that between Coelocetus and Hippopotamus."—Owen: British Fossil Mammals and Birds (1846), pp. xxi., xxii.

án-thrác-ō-xén-íte, án-thrác-ō-xēno, s. [In Ger. anthracoxen; Gr. άνθραξ (ánthrax) = coal; ξένος (xenos) = foreign, a foreigner; suff. -ίτε = Gr. ἴτις (ítēs) = of the nature of.] A mineral classed by Dana in his sixth, a yet unnamed group of Oxygenated Hydrocarbons. It is obtained as a black powder from a resinlike mineral between layers of coal in Bohemia. Its composition is, carbon 75.274, hydrogen 6.187, and oxygen 18.539. It is insoluble in ether.

án-thrán-ý-íc, a. [Gr. άνθραξ (ánthrax) = coal; Eng., &c., αντί = a plant.] [ANIL.]

anthranilic acid. [CARBANILIC ACID.]

án-thra-quin-ōne = oxyanthracene, s.

Chemistry: C<sub>14</sub>H<sub>8</sub>O<sub>2</sub> = C<sub>6</sub>H<sub>4</sub> <math>\begin{matrix} \text{CO} \\ / \quad \backslash \\ \text{C} \\ / \quad \backslash \\ \text{CO} \end{matrix}> \text{C}\_6\text{H}\_4

Obtained by boiling anthracene with dilute H<sub>2</sub>SO<sub>4</sub> and potassium dichromate. It crystallises from hot nitric acid in pale yellow needles, melting at 273°.

án-thráx, s. [In Fr. anthrax; Port. anthraz; Gr. άνθραξ (ánthrax) = coal or charcoal, . . . a carbuncle.]

\*1. Old Med.: A carbuncle.

2. Entom.: A genus of dipterous insects, the type of the family Anthracidæ (q.v.).

án-thrís-cūs, s. [Lat. anthriscus (Pliny); Gr. άνθρίσκος (ánthriskos) = the southern chervil (Scandix australis).] A genus of plants belonging to the order Apiaceæ (Umbellifera). Two species are common in Britain, the A. sylvestris, or Wild Beaked Parsley, and A. vulgare, or Common Beaked Parsley. The former has smooth and the latter mucronated fruit. The A. ceribolium, Garden Beaked Parsley or chervil, is occasionally found outside cultivated ground, but is not a true native of Britain. Its roots are eatable, and it was formerly used as a potherb, whereas the two indigenous species of the genus are aemulpoisonous.

án-thrōc-ēr-a, s. [Gr. άνθραξ (ánthrax) = coal; κέρα (keras) = a horn.] A genus of hawk moths, Sphingidea, the typical one of the family Anthroceridæ.

án-thrō-cēr-ý-dæ, s. pl. [ANTHROCERA.] A family of Sphingidea. The species fly by day, and are brightly and beautifully coloured. The Burnet Moths and the Green Forester belong to the family. It is called also Zygenidæ.

án-thrōp-ío, a. [Gr. άνθρωπικός (ánthrōpikós).] Man-like, resembling man; human.

"In the same degree they impress that anthropic feature upon the face of the living gorilla."—Owen: Classif. of the Mammalia, p. 52.

án-thrōp-ý-dæ, s. pl. [Gr. άνθρωπος (ánthrōpos) = a man.] In Professor Huxley's classification the first family of the order Primates, which stand at the head of the class Mammalia. There is but one species, the Homo sapiens, or Man. The definition is as follows: Incisors,  $\frac{2-2}{2-2}$ ; canines,  $\frac{1-1}{1-1}$ ; premolars,  $\frac{2-2}{2-2}$ ; molars,  $\frac{3-3}{3-3}$  = 32. In the Simiada there is sometimes the same dentition, though in other cases the premolars are  $\frac{3-3}{3-3}$  in place of  $\frac{2-2}{2-2}$ . The hallux is nearly as long as the second toe, and is susceptible of being moved both backward and forward only to a very limited extent, whereas in the Simiadae it is much more mobile. In Man the arms are shorter than the legs, whilst in the Simiadae they may be either longer or shorter. After birth in Man the legs grow faster than the rest of the body, whilst in the Simiadae they do not. Man's stature is erect, whilst the natural attitude of the apes and monkeys is on all fours. (Professor Huxley's Classification of Animals, p. 99.) Man has a higher facial angle and a brain of greater volume than the monkeys, and his mental and moral powers are infinitely greater.

án-thrōp-ó-giōt (Eng.), án-thrōp-ó-giōt-tūs (Mod. Lat.), s. [Gr. άνθρωπογλωσσος (ánthrōpoglossos), in Attic άνθροπύγλωσσος (ánthrōpoglossos) = speaking man's language; άνθροπος (ánthrōpos) = man, and γλώσσα (glōssa), in Attic γλωττα (glōtta) = the tongue.] An animal possessing a tongue, i.e., speech remotely resembling man's. Example, the imitative species of the Parrot family of Birds.

án-thrōp-ó-raph-ý, s. [Gr. άνθρωπος (ánthrōpos) = man, and γραφή (graphē) = . . . a description; γράφω (graphō) = to write. A writing about man; a description of man.] A science which investigates the geographical distribution of mankind, noting the physical character, the languages, the customs, and the religious tenets and observances of the several races distributed over the globe. When the historic element receives prominence, anthropology becomes ethnography or ethnology. It is a branch of the great science of Anthropology (q.v.).

án-thrōp-óid, a. [Gr. άνθρωποειδής (ánthrōpoeidēs) = in the shape of a man; άνθροπος (ánthrōpos) = a man; and εἶδος (eidos) = . . . form; in εἶδος (eidos) = to see.] Resembling man; a term applied especially to the apes, which approach the human species in the following order: 1st (most remote), the gibbons; 2nd, the orangs; 3rd, the chimpanzees; and 4th (nearest), the gorilla. (Owen: Classif. of Mammalia, 1859, p. 84.)

" . . . only in the very highest and most anthropoid, viz., the gorilla and the chimpanzee."—Owen: Classif. of the Mammalia, p. 78.

án-thrōp-óid-ēs, s. [ANTHROPOID.] A genus of wading birds, belonging to the sub-family Gruinae. A. virgo is the Numidian Crane.

án-thrōp-ó-lite, s. [Gr. άνθρωπος (ánthrōpos) = man; and λίτε (lithē) = a stone.] Man petrified, as in the Guadeloupe specimen now in the British Museum.

án-thrōp-ó-lōg-ý-cal, a. [In Ger. anthropologisch; from Gr. άνθρωπολόγος (ánthrōpologos) = speaking or treating of man.] (For an extended investigation of the etymology, see Prof. Turner in Brit. Assoc. Rep. for 1871, Pt. II., pp. 144-146.) Pertaining to the science of anthropology; formed for the study of anthropology, as the Anthropological Society of London, a society formally inaugurated on the 22nd of January, 1873, and now known as the London Anthropological Institute. In 1868 was formed an anthropological "Department of the Biological Section" of the British Association. [ANTHROPOLOGY.]

án-thrōp-ó-lōg-íst, a. [In Ger. anthropolog.] One who cultivates the science of anthropology.

" . . . the comparative study of the arts of different races in different conditions of culture, must continue to hold a prominent place amongst the researches of anthropologists."—Col. Lane Fox: Brit. Assoc. Rep. for 1872, Pt. II., p. 171.

bēll, bōy; pōut, jōwī; cat, cēll, chorus, chíin, bēnch; go, gēm; thín, thís; sín, aš; expect, Xēnophon, exist. ph = l -cian, -tian = shān. -tion, -sion = shūn; -fion, -sion = zhūn. -tious, -cious, -clous = shūs. -ble, -dle, &c. = bēl, dēl.

án-thrō-pól-ō-gý, s. [In Ger. & Fr. anthropologie; Port. anthropologia. From Gr. άνθρωπος (ánthrōpos) = man; and λόγος (logos) = discourse.]

I. Natural Science:

1. Gen.: The science of man in the widest sense of the term. The word anthropology figures in Johnson's Dictionary with the signification, "The doctrine of anatomy; the doctrines of the form and structure of the body of man." The Glossographia Noxa, 2nd ed., explains it to be "a discourse or description of a man or of a man's body." Kant gave a much wider range than this to the subject in his Anthropologie, published about the year 1788, as he had previously done orally in his university lectures. Finally, the Anthropological Society of London defined its aim to be "to study man in all his leading aspects, physical, mental, and historical, to investigate the laws of his origin and progress, to ascertain his place in nature, and his relation to the inferior forms of life." In this sense ethnology is a department of anthropology.

"The science of Man, therefore, or, as it is sometimes called, Anthropology, must form the crown of all the natural sciences."—Max Müller: Science of Language, vol. II. (4th ed., 1871), p. 7.

2. Spec.: The science which investigates the relation in which man stands to the inferior animals. In this sense ethnology is a cognate science to anthropology. Dr. Latham uses the word in this limited sense.

án-thrō-pō-mán-gý, s. [Gr. άνθρωπος (ánthrōpos) = a man, and μαντεία (manteia) = power or mode of divination; μαντεύομαι (manteuomai) = to divine; μάντις (mantis) = one who divines, a seer.] Fancied divination by inspecting the entrails of a human being. (Webster.)

án-thrō-pōm-ēt-rý, s. [Gr. άνθρωπος (ánthrōpos) = man, and μέτρον (metron) = a measure.] The measuring or measurement of the human body; the science which deals with the proportions of the human body.

án-thrō-pō-morph-ic, a. [Gr. άνθρωπόμορφος (ánthrōpomorphos) = of human form; άνθρωπος (ánthrōpos) = man, and μορφή (morphē) = form.] Pertaining to anthropomorphism.

"From some quarter or other the anthropomorphia force came in."—Gladstone.

án-thrō-pō-morph-ism, s. [In Ger. anthropomorphism; Fr. anthropomorphisme; Port. anthropomorfismo; Gr. άνθρωπομορφία (ánthrōpomorfia) = human form; άνθρωπος (ánthrōpos) = man, and μορφή (morphē) = form, shape.]

Properly: The attributing of a human form to God. When this is really done it is a gross degradation of the divinity, and is condemned in Scripture. But when the only anthropomorphism is the use of metaphorical phrases, such as the arm of the Lord (Ps. lxxvii. 15), or his eyes (Ps. xi. 4), or his ears (Ps. xxxiv. 15), to make abstract ideas more readily conceivable, the practice has the countenance of Scripture itself. There are thus in this sense a legitimate and an illegitimate anthropomorphism.

"Anthropomorphism is always connected with anthropopathism."—Smith & Wace: Dict. Christ. Biog., vol. I., p. 112.

án-thrō-pō-morph-ist, s. [In Ger. anthropomorphist.] One who really or apparently attributes to God the human form, or thoughts, emotions, or passions like our own.

án-thrō-pō-morph-ite, s. & a. [In Fr. anthropomorphite; Port. anthropomorfista; Gr. άνθρωπομορφος (ánthrōpomorphos) = of human form.]

A. As substantive:

I. Ordinary Language: One who attributes to God the human form, or thoughts, emotions, and passions like our own.

"... though few profess themselves anthropomorphites, yet we may find many amongst the ignorant of that opinion."—Locke.

II. Technically:

1. Church Hist. (pl.): A sect which arose in Egypt in A. D. 395, and became prominent in the fifth century. They were a sub-division of the Acephali, who again sprung from the Monophysites or Eutychians. They held anthropomorphism in a gross form. Many individuals also in the Church catholic, and in the sects which had sprung from it, entertained a

similar belief. (Mosheim: Ch. Hist., Cent. V., pt. II., ch. v., § 20.)

"The Anthropomorphites who swarmed among the monks of Egypt and the Catholics of Africa . . ."—Gibbon: Decline and Fall, ch. xlvii.

2. (Plur.) A party (they had scarcely the coherence of a sect) which existed in Italy and elsewhere in the tenth century; they supposed that God possesses a human form, and sits upon a golden throne.

B. As adjective: Attributing to God human form, thoughts, or emotions.

"Multitudes could swallow the dull and coarse anthropomorphite doctrines."—Glanville: Præcitus of Souls, ch. iv.

án-thrō-pō-morph-it-ic, án-thrō-pō-morph-it-i-cal, a. [Eng. anthropomorphite; -ic, -ical.] Pertaining to anthropomorphism, or to the Anthropomorphites.

án-thrō-pō-morph-it-ism, s. [Eng. anthropomorphite; -ism.] The system of doctrines characteristic of the Anthropomorphites; an thropomorphism. [ANTHROPOMORPHISM.]

án-thrō-pō-morph-ōse, v. t. [Gr. άνθρωπος (ánthrōpos) = a man, and μορφή (morphē) = to form, to give shape to.] One would expect this verb to mean to change into the form of a man; but Davies gives an example from Howell (Parley of Beasts, p. 3), in which it evidently = to change from the form of a man into that of a beast.

án-thrō-pō-morph-ōus, a. [In Fr. anthropomorphe; From Gr. άνθρωπομορφος (ánthrōpomorphos).] Possessed of a form resembling that of man.

"Mr. Lyell, however, in 1820, had remarked that the evidence of the total absence of the Anthropomorphous tribe [the Quadrumana], was inconclusive."—Owen: Brit. Faun. Mammalia and Birds, p. 2.

án-thrō-pō-páth-ic, án-thrō-pō-páth-i-cal, a. [Gr. άνθρωποπάθης (ánthrōpopathēs) = with human feelings.] Pertaining to human feelings; having human feelings. (Smith and Wace.)

án-thrō-pō-páth-i-cal-ly, adv. [Eng. anthropopathical; -ly.] In a manner to show the possession of human feelings.

án-thrō-pōp-a-thism, s. [Eng. anthropopathy; -ism.] The same as ANTHROPOPATHY (q. v.). (See example under ANTHROPOMORPHISM.)

án-thrō-pōp-a-thý, \* án-thrō-pōp-a-thie, s. [In Ger. anthropopathie. From Gr. άνθρωποπάθεια (ánthrōpopatheia) = humanity; άνθρωπος (ánthrōpos) = a man, and πάθη (páthē) = a passive state, or πάθος (páthos) = anything that befalls one, . . . suffering, emotion; παθίω, aor. inf. of πάσχω (paschō) = to receive an impression.]

1. Human feeling, humanity.

"Two ways then may the Spirit of God be said to be grieved, in Himself, in his saints, in Himself, by a sympathetic; the former is by way of allusion to human passion and carriage."—Ep. Hall: Rem., p. 106.

2. Theol.: The attributing of human thoughts, emotions, or passions to God. As in the case of anthropomorphism, this may be legitimate or illegitimate. It is the former if done only figuratively; it is the latter if done really.

(a) Figuratively: "And it repented the Lord that he had made man on the earth, and it grieved him at his heart" (Gen. vi. 6).

(b) Really: "Thou thoughtest that I was altogether such an one as thyself" (Ps. l. 21).

án-thrō-pōph-a-gi, a pl. [Plural of Lat. anthropophagus; Gr. άνθρωποφάγος (ánthrōpophagos) = a man-eater; άνθρωπος (ánthrōpos) = man, and φαγεῖν (phagein), from φαγῶ (phagō), now made 2 aor. inf. of ἐσθίω (esthio) = to eat. In Fr. anthropophage.] Man-eaters. Cannibals, people feeding on human flesh.

"Histories make mention of a people called anthropophagi, men-eaters."—B. Guipin: Sermon before King Edward VI. (1562).

án-thrō-pō-phág-i-cal, a. [Eng. anthropophagy; -ical.] In Fr. anthropophage; Port. anthropophago.] Pertaining to anthropophagy; eating human flesh.

án-thrō-pōph-a-gin-i-an, s. [From Lat. anthropophagus (ANTHROPOPHAGI), and the dignified suff. -inian; Shakespeare's design being to frame in ridicule a word "of learned length and thundering sound."] A cannibal.

"Go knock and call, he'll speak like an anthropophagians unto thee; knock, I say."—Shakspear: Merry Wives, iv. 6.

án-thrō-pōph-a-goús, a. [In Fr. anthropophage. From Gr. άνθρωποφάγος (ánthrōpophagos).] Man-eating, cannibal.

án-thrō-pōph-a-gý, s. [In Fr. anthropophagie. From Gr. άνθρωποφαγία (ánthrōpophagia).] Man-eating, cannibalism.

"Upon slender foundations was raised the anthropophagy of Diomedes his horse."—Brounne: Vulgar Errors.

án-thrō-pōs-ōp-ý, a. [Gr. άνθρωπος (ánthrōpos) = man, and σκοπία (skopia) = . . . a looking out; σκοπεῖν (skopeō) = to look at or after.] An attempt to discover the mental and moral tendencies of any one by studying his bodily characteristics.

án-thrō-pōs-ō-phý, s. [Gr. άνθρωπος (ánthrōpos) = man, and σοφία (sophia) = skill, higher knowledge, wisdom.] The knowledge of man; the acquisition of wisdom (if such a thing is possible) by the study of mankind.

án-thrō-pōt-ōm-ist, s. [Gr. άνθρωπος (ánthrōpos) = man, and τομία (tomia), or τομή (tomē) = one who cuts.] One who cuts up or dissects a man; an anatomist.

"... the large mass of transverse white fibres called 'corpus callosum' by the anthropometrist."—Owen: Classif. of the Mammalia, p. 22.

án-thrō-pōt-ōm-ý, a. [Gr. άνθρωπος (ánthrōpos) = man, and τομή (tomē) = . . . a cutting; τέμνω (temnō) = to cut.] The anatomy of man; i. e., the dissection of the human body.

án-thrō-pūr-gic, n. [Gr. άνθρωποουργός (ánthrōpourgōs) = making man; but intended by Bentham to signify operated on by man; άνθρωπος (ánthrōpos) = man; \* έργον (ergō) = to do work.] (For def. see example.)

"Thus Natural History and Natural Philosophy are respectively represented by Physiologic Somatology and Anthropogenic Somatology; the one signifying the science of bodies, in so far as operated upon in the course of nature, without the intervention of man; the other, the science of bodies so far as man, by his knowledge of the convertible powers of nature, is able to operate upon them."—Boswing: Bentham's Works, Introd., § 6, vol. I., p. 16.

án-thús, s. [Lat. anthus; Gr. άνθος (anthos), masc. = a small bird like a bunting (not άνθος (anthos) = a flower, which is neut.)]

Zool.: A genus of birds, the typical one of the family Anthide, in the Dendrostris tribe, but with affinity, shown by their lengthened hind toe, to the genus Alauda (Lark) in the Corvicolinae order. Some place the genus Anthus under the Motacillinae, a sub-family of Sylvidae, or Warblers. The species are called in English Titlarks or Pipits. Four occur in Britain; the A. arboreus, or Tree Pipit; the A. pratensis, or Meadow Pipit; the A. petrosus, or Rock Pipit; and the A. trivialis, or Richard's Pipit.

án-thýl-lis, s. [In Fr. anthyllide; Sp. & Ital. antillide; Gr. άνθος (anthos) = a flower, and ίουλος (ioulos) = (1) first growth of the beard, (2) down on plants. So called from its downy calyces.] A genus belonging to the

ANTHYLLUS VULNERARIA.

Papilionaceous sub-order of the Fabaceae, or Leguminous plants. It contains one British species, the A. vulneraria, or Common Kidney Vetch, called also Lady's Fingers. It grows chiefly in the vicinity of the sea. It has from 5 to 9 leaflets and crowded heads of generally red flowers. The roots of a foreign species, the A. Hermannia, are diuretic.

án-thýp-nōt-ic, a. & a. [ANTI-HYPNOTIC.]

fáte, fát, fáre, amidst, whát, fáll, father; wē, wēt, hère, camél, hēr, thère; píne, pít, síre, sír, maríne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, únite, cūr, rúle, fúll; trý, Sýrian. æ, œ = é. ey = á. qu = kw.

ant-hyp-ō-chōn'-dri-ac, a. & s. [ANTI-HYPOCHONDIAC.]
ant-hy-dōph'-ōr-a, s. [ANTI-HYPOPHORA.]
ant-hys-tēr'-ic, a. & s. [ANTI-HYSTERIC.]
an-ti, prefix. [See def.]

A. [From Gr. avti (anti), prep., original meaning = over against . . . ; hence = opposed to. In Greek compos. = (1) over against, opposite to, (2) against, in opposition to; (3) one against another, mutually; (4) in return; (5) instead; (6) equal to, like; (7) corresponding to, counter. (Liddell & Scott's Greek Lexicon.) The Greek avti (anti) = over against, against, is essentially the same word as the Latin ante = before: hence there are in Lat. anticipo (B.); in Ital. anticamera = a forerunner, antichita = antedate, anticamera = satechamber; in Sp. Antehristo; in Fr. Antehrist, antedate, antichambre; and in Eng. anticipate (B.); see also ANTE. The root is anti; Sansc. anti = opposite, facing.]

1. The opposite of, as anticlimax.
2. Opposed to: as Antichrist, antidote.
(a) Compound words having as one of their elements the Greek prefix avti (anti) are infinite in number. We do not profess or indeed desire to give a complete list. Those which are still loosely compacted together, being generally spelt with a hyphen, follow as compounds under anti; whilst those in which the union has become more complete, the hyphen being generally dropped, are arranged as primary words. In the case of the former, the usage of authors or printers (it is uncertain which) with regard to the employment of capital letters varies in three ways:—

(1) There may be one capital commencing the word Anti, as Anti-arminian. (Bishop Barlow.)
(2) There may be one, but beginning the second of the two words in the compound, as anti-Realism, anti-Realistic (Herbert Spencer); anti-Gallican (De Quincey); anti-English (Froude); anti-Republican (Times newspaper). Or (3) each of the words united may begin with a capital, as Anti-Judaic (Milman); Anti-Laudism (Carlyle).
(b) With in the word withstand, and gain in gainways, are equivalents in signification, though not in etymology, to the Greek avti (anti).

B. [From Lat. ante = before, as anticipate, in Lat. anticipo = to take beforehand; ante = before, and capio = to take.] Before, beforehand, as anticipate. (See etymology of B.)

anti-abolitionist, s. One opposed to a party in the United States which, when slavery existed there, sought its abolition; or, more generally, one opposed to the abolition of slavery in any country where it still lingers.

anti-American, a. Opposed to the American people or their aims.

anti-anarchy, a. Opposed to anarchy or disorder. (Carlyle: Fr. Rev., III. iv. 2.)

anti-apostle, s. One opposed to the apostles.
"The cardinals of Rome are those persons which may be fitly styled anti-apostles in the Romish hierarchy.—Pottier: On the Numbr. 666, p. 92.

anti-Arminian, s. One opposed to the Arminian tenets.
". . . and many bad characters cast on good men, especially on the anti-Arminians . . .—Sp. Barlow: Reprints, p. 181.

anti-attrition, s. Gen., that which opposes attrition. Spec., a mixture of plumbago with some oily substance, or any similar composition used for lubricating machinery to diminish the effects of friction. (Webster.)

anti-centenarianism, s. [Or avti (anti), and Eng. centenarianism, from Lat. centum = a hundred, and annus = a year.] Opposition to the assertion that the persons from time to time reported to have died aged a century or more, had really attained to that age.
"Anti-centenarianism."—Heading of a paragraph in the Times, Thursday, 8th January, 1874.

anti-chamber. [ANTE-CHAMBER.]

anti-corn-law, s. [Gr. avti (anti) = against, and Eng. Corn Law.] Opposition to the Corn Law or laws. The Anti-Corn-Law

League was formed in Manchester on the 18th of September, 1838, and ultimately became a most powerful organisation, carrying agitation everywhere. The Corn Laws having been abolished on June 26th, 1846, the reason for the continued existence of the League ceased, and it dissolved itself on the 2nd of July of the same year.

anti-docete, a. Opposed to the Docete, a Gnostic sect (Docete), or to their religious tenets. (See example under anti-Gnostic.)

anti-dynastic, a. Opposed to the reigning dynasty in any particular country.
". . . but the leaders of the popular movement belong to the anti-dynastic fraction of the Opposition."—Daily Telegraph, 8th October, 1877: Vienna Correspondent.

anti-English, a. Opposed to the English or their aims.
"The anti-English party were in the ascendant."—Froude: Hist. Eng., ch. xix., vol. iv., p. 168.

anti-Gallican, a. Opposed to the "Gallican," i.e., the French aims or aspirations.
"One of the cardinals, he [Coleridge] tells us, warned him, by the Pope's wish, of some plot, set on foot by Bonaparte, for seizing him as an anti-Gallican writer."—De Quincey's Works (ed. 1843), vol. ii., p. 92.

anti-Gnostic, a. Opposed to Gnosticism or to the Gnostics.
". . . the anti-Gnostic, or more strictly, the anti-docetic tendency which has been ascribed to the gospel."—Strauss: Life of Jesus, Transl. (1848), § 107.

anti-Jacobin, s. One opposed to the principles and procedure of the Jacobins in the first French Revolution.
"Then grew a hearty anti-Jacobin."—Byron: Vision of Judgment, 97.

The word is best known as the title of a famous satirical Tory periodical (1798-1821), the principal contributors to which were Gifford, Hookham Frere, and Canning.

anti-Judaic, a. Opposed to what is Jewish.
". . . the anti-Judaic party in Alexandria, of which Apion was no doubt a worthy representative."—Milman: Hist. of Jews, 3rd ed., vol. i., note to p. 79.

anti-Laudism, s. Opposition on the part of the Puritans to the doctrine and discipline of Archbishop Laud.
". . . Anti-Laudisms, Westminster Confession."—Carlyle: Heroes and Hero-Worship, Lect. VI.

anti-national, a. Opposed to the aims, the procedure, or what are believed to be the interests of one's nation.
". . . could have attended the most ultra profession of anti-national politics."—De Quincey's Works (ed. 1843), vol. ii., p. 178.

anti-principle, s. A principle opposed to another principle which has been previously specified.
". . . That besides one great cause and source of good, there was an anti-principle of evil, of as great force and activity in the world."—Spencer: On Progress, p. 168.

anti-prophet, s. An opponent of prophets or of prophetic revelation.
"Will therefore might St. John, when he saw so many anti-prophets spring up, say, 'Hereby we know that this is the last time.'"—Mead: Apostasy of the Later Times, p. 88.

anti-Realism, s. Metaphys.: The system of speculative belief opposed to that of realism; nominalism.
"And thus is Realism negatively justified: any hypothetical uncertainty it may have is incomparably less than that of Anti-Realism."—Herbert Spencer: Psychol., 2nd ed., vol. ii., p. 491.

anti-Realistic, a. Metaphys.: Opposed to what is realistic; nominalistic, nominalist.
". . . that contradiction which the anti-Realistic conception everywhere presents."—Herbert Spencer: Psychol., 2nd ed., vol. ii., p. 486.

". . . we proceeded to value by it the Realistic and Anti-Realistic conclusions."—Ibid., p. 491.

anti-Republican, a. Opposed to Republican institutions and their advocates or defenders.
"For the simple reason that he and the Duc de Broglie and the anti-Republican party are determined not to resign the power which they accidentally hold."—Times, November 16th, 1877.

anti-Roman, a. Opposed to Roman aims.
"But at this crisis the anti-Roman policy was arrested in its course by another movement."—J. A. Froude: Hist. Eng., ch. vi., vol. ii., p. 12.

anti-Socialist, a. Opposed to the Socialists.

"The debate on the anti-Socialist Bill commenced in to-day's sitting of the German Parliament."—Times, Sept. 17, 1878.

anti-Tribonian, s. A person opposed to the great jurist Tribonian.
Plural: A sect, the distinctive peculiarity of which was this opposition.

an-ti-āç'-īd, a. & s. [ANTACID.]

an-ti-a-dēs, s. pl. [The plur. of Gr. avtiās (antias), genit. avtiādos (antiados) = one of the glands of the throat when swollen; avrios (antios) = opposite to; from avri (anti).]
Anatomy: The tonsils.

an-ti-a-dī-tīs, s. [Gr. avtiās (antias); and suff. -itis (itis) = inflammation.] [ANTIADIES.]
Med.: Inflammation of the tonsils.

an-ti-āph-rō-diç'-ī-āç, an-ti-āph-rō-diç'-ī-a-çal, a. [ANTAPHERODISIAIC.]

an'-ti-ār, or ant'-jār, s. [ANTIARIS.] A poison made from the upas-tree of Java, Antiaris toxicaria.

an-ti-ār'-ine, s. [ANTIARIS.] The active principle in the poison of the upas-tree. [ANTIARIS.] It is obtained from the inspissated juice of the plant in shining whitish crystals, soluble in water.

an-ti-ār'-is, s. [Latinised from Japanese antiar (q. v.).] A genus of plants belonging to the order Artocarpaceæ, or Artocarpads. The

ANTIARIS TOXICARIA.
A. toxicaria is the famous upas-tree of Java. [UPAS.] The antiar poison is made from it. Its exceedingly deleterious properties arise from its containing strychnine. A shirt made from the fibre, if insufficiently prepared, excites much itching.

an-ti-ar-thrit'-īo, a. & s. [ANTARTHRITIC.]

an-ti-āsth-māt'-ic, s. [Gr. avti (anti) = against; Eng. asthmatic.] A medicine used against asthma. [ASTHMATIC.]
"Anti-asthmatics (Gr.) are medicines against the shortness of breath."—Glossogr. Nova.

an-ti-bāo-chi'-ūs, s. [In Fr. antibacchique; Sp. antibacquo; Port. antibacchio; Ger. & Lat. antibacchius. From Gr. avtiBaxxeios (antibakcheios).]
Prosody: A reversed Bacchius, that is, s foot like the Bacchius of three syllables, but differing from it in this respect, that whereas the Bacchius has the first syllable short and the last two long, as in dē | ā | tē, the Antibacchius has the first and second syllables long and the third short, as in aū | dī | rē.

an-ti-bar'-bar-ōūs, a. [Gr. avti (anti) = against, and Eng. barbarous.] Against what is barbarous. Used—

(a) Of books like those of Erasmus, Nizolus, and Cellarius, directed against the use of barbarisms in the Latin or in other tongues.

(b) Of the use of an unknown tongue in divine service. Peter de Moulin employed it in this sense. (Rees.)

an-ti-bāç-ī-lī-can, a. [(1) Or. avti (anti) = against, opposed to; and Lat. basilica = a building in the forum with double colonnades, used as a court of justice and as an exchange. (2) A cathedral: Gr. βασιλική (basilikē), same meaning; βασιλικός (basilikós), adj. = kingly, royal; βασιλεύς (basileus) = king.] Opposed to royal or ecclesiastical pomp or splendour.

an-ti-bīb-ī-ōl'-a-trý, s. [Gr. avti (anti), and Eng. bibliolatory.] Opposition to bibliolatory (q. v.).

ōl, ōy, ōut, jōw; cat, çell, chorus, çhin, bench; go, çem; thin, this; sin, a; expect, Xenophon, exist. -iag. -tion, -sion, -tioun = shün. -çion, -çion = zhün. -tious, -sious, -çious, -çous = shüs. -ble, -dle, &c. = bel, del.

"At a period in which Dr. Marsh and Wordsworth have by the zealous of one side been charged with Popish principles on account of their anti-bibliolatory . . . —Coleridge: *Aids to Reflection*, p. 115, note.

**án-ti-bíb'-lōs**, s. [Gr. *ávri (anti)* = in return; and *βίβλος (biblos)* = (1) the inner bark of the papyrus, (2) paper, a book.]

*Civil Law*: An instrument by which a defendant admits that he has received a "libel," or a copy of it, and notes the date when it was served upon him.

**án-ti-bíl'-i-ōūs**, a. [Gr. *ávri (anti)* and Eng. *bilious*.]

*Pharm.*: Opposed to biliousness; counteracting biliousness.

**án-ti-bír'-míng-hám**, s. [Gr. *ávri (anti)*; Eng. *Birmingham*.]

*Phar.*: One of the numerous appellations given to those who sided with Charles II. in refusing to exclude his brother James from the succession.

"Opponents of the Court were called Birminghamers. Those who took the king's side were *Anti-birminghamers* . . . —Macaulay: *Hist. Eng.*, chap. II.

**án-ti-bráçh'-i-ál** (ch guttural), a. [Lat. *antibrachialis*.] [ANTIBRACHIUM.] Pertaining to the forearm.

" . . . the peculiar length of arm in those 'long-armed apes' is chiefly due to the excessive length of the antibrachial bones."—Owen: *Classif. of Mammalia*, p. 72.

**án-ti-bráçh'-i-üm** (ch guttural), s. [From Lat. *ante* = before; and *brachium*, Gr. *βραχίον (brachion)* = the arm, especially the forearm, from the hand to the elbow.] The forearm.

" . . . the forearm, or antibrachium."—Foster: *Outlet of the Mammalia* (1870), p. 214.

**án-ti-búr'-ghérs** (h silent), s. pl. [Gr. *ávri (anti)* = against, and Eng. *burghers*.]

*Church History*: A Scottish sect which arose in 1747. A certain oath having been instituted in Edinburgh, Glasgow, and Perth, to be taken as a criterion of burghership, many members of the Associate Synod, or Secession Church, considered its terms to be such that they could not conscientiously take it. Others declared that they could. The Secession in consequence split into distinct bodies—the "Burghers," who took the oath, and the "Anti-burghers," who refused it. Another schism ultimately followed, owing to the conflict between progressive and conservative ideas; and thus there were produced four distinct denominations—viz., the Old Light Burghers, the New Light Burghers, the Old Light Anti-burghers, and the New Light Anti-burghers. Most of these are now merged in the United Presbyterian Church, and their old denominations are becoming obsolete. (Burton: *Hist. Scotland*.)

**án-tic**, **án-ticke**, **án-tike**, a. & s.

[In Sw. *antik*, adj. = (1) antique, ancient, (2) antic; subst. = (1) an antique, (2) an antic; Dan. *antik*, adj. = (1) antique, (2) antic; Fr. *antique* = (1) ancient, (2) antiquated; Sp. *antiguo* = (1) antique, ancient, (2) antic; Port. *antigo*, adj. = antique, ancient; subst. = an antique; Ital. *antico* = antique, ancient; Lat. *antiquus* = antique, ancient. The English *antique* was originally the same word as ANTICQUE (q. v.).]

**A. As adjective:**  
1. Antique, ancient; old.

"At the nether ends were two broad arches upon three antique pillars all of gold . . ."—Hall: *Hon. VIII.*, an. 18. (Trench.)

2. Old-fashioned, antiquated; out of date, and therefore grotesque.

"A foule deform'd, a brutish curs'd crew, In body like to antique work devised Of monstrous shape, and of an ugly heu."—*Macrae*. (Ware.)

3. Grotesque, odd, ludicrous, without any reference to antiquity.

"With frolic quaint their antic jests expose, And tease the grumbling rustic as he goes."—Byron: *Hours of Idleness*; *Childish Recollections*.

"The prize was to be conferred upon the whistler that could go through his tune without laughing, though provoked by the antic postures of a merry andrew, who was to play tricks."—Addison.

"Of all our antic sights and pageantry, Which English idlers run in crowds to see."—Dryden.

(See Trench on the Study of Words, p. 156; *English, Past and Present*, p. 151.)

**B. As substantive:**

**I. Of persons:**

1. A person or being of boar antiquity, out

of harmony with modern manners, and left by people in society as much as possible to himself.

" . . . within the hollow crown That rounds the mortal temples of a king Keeps Death his court; and there the antic sits."—Shakespeare: *Rich. II.*, iii. 2.

2. A merry-andrew, a buffoon; one who dresses up fancifully, adopts odd postures, and says what he deems smart things, with the object of eliciting halfpence from those who behold his tricks.

"Fear not, my lord, we can contain ourselves, Were he the veriest antic in the world."—Shakespeare: *Taming of the Shrew*, Ind.

**II. Of things. Generally in the plural:**

1. Works of art, specially architecture, sculpture, or painting produced by the ancients; antiques. [ANTIQUE.]

2. Grotesque representations, odd imagery or devices. [ANTI-MASK.]

"A work of rich entail and curious mold, Woven with antiques and wild imagery."—Spenser: *F. Q.*, II. vii. 4.

"For 'e'en at first reflection, she espies Such toys, such antiques, and such vanities."—Davies.

3. Odd tricks.

"And fraught with antics as the Indian herd, That writes and chatters in her wily cage."—Wordsworth: *Excursion*, bk. vi.

**án-tic**, **án-tick**, v. t. [From the substantive.] To cause to assume the appearance of an antic.

"Mine own tongue Spits what it speaks; the wild disguise hath almost antick'd us all."—Shakespeare: *Ant. and Cleop.*, ii. 7.

**án-ti-cá-chéc-tic**, **án-ti-chá-chéc-tics** (h silent), a. & s. [Gr. *ávri (anti)* = against, and *καχέτις (cachectis)* = having a bad habit of body; *κακός (kakos)* = bad, and *ἔξις (hexis)* = a having possession; *ἔξω (hexō)*, fut. of *ἔχω (echō)* = to have.]

1. *As adjective*: Deemed of use against a cachectic state of the constitution.

2. *As substantive*: A medicine designed to counteract a cachectic state of the constitution.

"*Anti-cachectics* (Gr.). Remedies that correct the ill disposition of the blood."—Glossogr. Nova.

**\*án-ti-cál**, s. [Ital. *anticaglia* = (1) antiquity; (2) monuments of old.] An antique. (Scotch.)

"When they are digging into old ruins for anticaglia."—Sir A. Balfour: *Letters*, p. 129.

**án-ti-cál'-vín-íst**, s. [Gr. *ávri (anti)*; Eng. *Calvinist*.]

*Church Hist.*: One opposed to the Calvinists or their religious tenets.

**án-ti-cál'-vín-ís-tic**, a. [Gr. *ávri (anti)*; Eng. *Calvinistic*.]

*Church Hist. & Theol.*: Opposed to the Calvinistic tenets.

**án-ti-cám'-ér-a**, **án-té-cám'-ér-a**, s. [Sp. *antecamara*; Ital. *anticamera* = ante-chamber; from *camera* = a chamber.] An antechamber.

" . . . whereof you must foresee, that one of them be for an infirm; if the prince or any special person should be sick, with chambers, bedchambers, antechamber, and recamara, joining to it."—Bacon: *Essays, Civ. and Mor.*, ch. xiv.

**án-ti-car-dí-üm**, s. [Gr. *ἀντικαρδίον (antikardion)*.]

*Anat.*: The pit of the stomach, the *scrobiculus cordis*.

**án-ti-car-nív'-ór-ōūs**, a. [Gr. *ávri (anti)*, and Eng. *carnivorous*.] Opposed to the use of flesh as an article of food; vegetarian.

**án-ti-ca-tar-rhál** (h silent), a. & s. [Gr. *ávri (anti)* = against, and *κατάρρως (catarrhos)* = a flowing down. A catarrh.] [CATARRH.]

1. *As adjective*: Deemed of use against catarrh, *i. e.*, a cold.

2. *As substantive*: A medicine given as a remedy against catarrh.

**án-ti-cáu-sót'-ic**, a. & s. [Gr. *ávri (anti)* = against, and *καύσις (kausis)* = (1) burning heat; (2) bilious, remittent fever; *καύσω*, later fut. of *καίω (kaiō)* = (1) to light, (2) to burn.]

1. *As adjective*: Used against a burning fever of whatever kind.

2. *As substantive*: A medicine used against burning fevers. (Juncker.)

**án-ti-çhám-bér**. ANTE-CHAMBER.]

**án-ti-çheir**, s. [Gr. *ἀντίχειρ (anticheir)* = the thumb; from *ávri (anti)* = opposed to, and *χείρ (cheir)* = the hand.]

*Anat.*: The thumb; so called from being opposed to the rest of the hand.

**án-ti-çhré'-sís**, s. [Gr. *ἀντιχρησις (antichresis)* = reciprocal usage. *ávri (anti)* = in return, and *χρησις (chresis)* = a using, an employment; *χράμαί (chromai)* = to consult or use an oracle, to use; *χράω (chraō)* = to furnish what is needful.]

*Old Law*: A mortgage.

**án-ti-çhríst**, **án-ti-çhríst**, s. [In A.S. *Antecrist*, *Anticrist*; Sw., Dan., Dut., & Ger. *Antichrist*; Fr. *Antechrist*; Sp. & Port. *Antichristo*; Ital. *Anticristo*; Lat. *Antichristus*, From Gr. *ἀντιχριστός (Antichristos)*; *ávri (anti)* = instead of, or = against (see Trench's *Synonyms of the New Testament*, pp. 115—120); *Χριστός (Christos)* = Christ.]

1. *Gen.*: Any one who denies the Father and the Son; or who will not confess that Jesus Christ is come in the flesh; or who, leaving the Church, pretends to be the Christ (or Messiah), and thus becomes a rival and enemy of Jesus, the true Christ, as in the following examples.

"He is *antichrist*, that denieth the Father and the Son."—1 John ii. 22.

"For many deceivers are entered into the world, who confess not that Jesus Christ is come in the flesh. This is a deceiver and an *antichrist*."—2 John 7.

"Little children, it is the last time; and as ye have heard that *antichrist* shall come, even now are there many *antichrists*; whereby we know that it is the last time. They went out from us, but they were not of us."—1 John ii. 18, 19; compare with Math. xxiv. 1—5, Mark xiii. 1—5, Luke xli. 5—8.

2. *Spec.*: One who should pre-eminently stand forth as the antagonist of Christ, and should be a sufficiently prominent personage to become the theme of prophecy; or if *ávri (anti)* be held to mean *instead of* (see etymology), then the characteristic of Antichrist will be a supersession of Christ, not an avowed antagonism to him. If, when St. John says, "Ye have heard that antichrist shall come," he refers to the rival and opponent of God described by St. Paul in 2 Theas. ii., then Antichrist is to be identified as the "man of sin," "the son of perdition, and that Wicked," of verses 8, 9. Many Protestant controversial writers, from Luther downwards, have applied the name Antichrist in this specific sense to the Papacy. (See the example from Bishop Hall, as a specimen of a multitude more scattered over the whole extent of English and Scotch theological literature.)

"*Antichrist*, which was conceived in the primitive times, saw the light in Boniface the Third, and was grown to his stature and *ἀκμή* in Gregory the Seventh."—Bp. Hall: *Hon. of the Marr. Clergy*, § 2.

**án-ti-çhríst'-i-án**, a. & s. [Gr. *ávri (anti)* = against; Eng. *Christian*. In Fr. *antichrétien*; Port. *antichristiao*; Ital. *antichristiano*.]

1. *As adjective*: Opposed to Christianity, or pertaining to the Antichrist of New Testament prophecy.

"That despised, object, oppressed sort of men, the ministers, whom the world would make antichristian, and so deprive them of heaven."—South.

2. *As substantive*: One opposed to Christianity, or a follower of the prophetic Antichrist.

"A new heresy, as the antichristians and priests of the headen God, would persuade and make their credulous company to believe."—Rogers: *On the Creed*, Pref.

"To call them Christian Deists is a great abuse of language; unless Christians were to be distributed into two sorts, Christians and No-Christians, or Christians and *Anti-Christians*."—Waterland: *Ch.*, p. 62.

**án-ti-çhríst'-i-án-í-gm**, s. [Eng. *antichristian*; -ism. In Fr. *antichristianisme*.] Opposition to Christianity in an individual, a party, or a speculative tenet.

"Have we not seen many whose opinions have fastened upon one another the brands of antichristianism?"—More: *Decay of Piety*.

**án-ti-çhríst-i-án'-i-tý**, s. [Gr. *ávri (anti)* = against; Eng. *Christianity*.] Opposition or contrariety to Christianity in an individual, a party, or a speculative tenet. (In use identical with the previous word.)

"They breed grief of mind in a number that are godly-minded, and have antichristianity in such detestation, that their minds are mortured by the very sight of them in the Church."—Hooker: *Ecc. Pol.*, bk. iv. § 4.

fáte, fát, fáre, amidst, whát, fáll, father; wé, wét, hère, camel, hër, thére; pine, pít, síre, sír, marine; gó, pót, or, wóre, wólf, wórk, whó, sòn; müte, cúb, cüre, unite, öür, rüle, füll; trý, Sýrian. æ, œ = é. ey = ä. au = kw.

án-tí-christ-í-ga-ize, v.t. [Eng. antichristian; -ize.] To turn from Christianity those who previously accepted its doctrines.

án-tí-chrón-í-cal, a. [Gr. ávri (anti) = against, and χρονομός (chronikós) = pertaining to time; χρόνος (chronos) = time.] Opposed to or out of the proper chronological date.

án-tí-chrón-í-cal-ly, adv. [Eng. antichronical; -ly.] In an antichronical manner. In a manner characterised by opposition to, or neglect of, proper chronology. (Webster.)

án-tích-í-rò-nísm, s. [In Ger. antichronism.] Deviation from proper chronology; the placing events in wrong order of time.

"Our chronologies are by transcribing, interpolation, misprinting, and creeping in of antichronisms, now and then strangely disordered."—Solden: On Dryton's Polyb., Song 4.

án-tích-thón, s. [Gr. ávri (anti) = on the opposite side of, and χθών (chthón) = country.] One of the Antipodes. (Bp. Hall: Works, v. 478.)

án-tíc-í-pant, a. [Lat. anticipans, pr. par. of anticipo = to take beforehand, and anticipata.] [ANTICIPATE.] Anticipating, in anticipation of.

Med.: A term used of periodic fevers or other diseases in which the paroxysms arrive earlier than their normal period, the successive intervals of respite diminishing from day to day. (Parr.)

án-tíc-í-páte, v.t. & t. [In Ger. tanticipiren; Fr. anticiper; Sp. anticipar; Port. anticipar; Ital. anticipare. From Lat. anticipo = to take beforehand; ante = before, and capio = to take, from the root cap.]

A. Transitive:

1. To take before another person has had time to do so, and thus preclude his gaining possession at all. Or to perform a work before he has had time to execute it, and thus render his services in the matter needless; to be beforehand with one.

"... he would probably have died by the hand of the executioner, if indeed the executioner had not been anticipated by the populace."—Macaulay: Hist. Eng., ch. xx.

"Anticipated rents, and bills unpaid, Force many a shining youth into the shade."—Cowper: Retirement.

2. To say or do something before the appropriate, or at least the normal, time for it has come.

(a) In a speech or literary composition, to say or write anything before the time or place at which it should appropriately be introduced.

(b) To carry out an expected command before it is given, or conjectured wishes before they are uttered in speech.

"The dinner served, Charles takes his usual stand, Watches your eye, anticipates command."—Cowper: Truck.

"... would have done wisely as well as rightly by anticipating the wishes of the country."—Macaulay: Hist. Eng., ch. xxi.

3. To realise a future event, and feel as one would if it had already arrived; or simply to expect a future event to happen.

"Timid men were anticipating another civil war."—Macaulay: Hist. Eng., ch. xviii.

"Now, it looks as if this important and anticipated result has been established."—Times, April 20, 1875; Transit of Venus.

B. Intransitive: To say or write anything before the time or place at which it should appropriately be introduced into a speech or literary composition.

"I find I have anticipated already, and taken up from Boccaccio before I come to him; but I am of the temper of kings, who are for present money, no matter how they pay it."—Dryden.

án-tíc-í-pá-téd, pa. par. & a. [ANTICIPATE.]

án-tíc-í-pá-te-ly, adv. [Eng. anticipate; -ly.] By anticipation.

"It may well be deemed a singular mark of favour that our Lord did intend to bestow upon all pastors, that he did anticipately promise to Peter."—Barrow: On the Pope's Supremacy.

án-tíc-í-pá-tíng, pr. par. & a. "... an active and anticipating intelligence."—Owen: Classif. of Mammalia, p. 62.

án-tíc-í-pá-tion, s. [In Fr. anticipation; Sp. anticipacion; Port. anticipacao, anticipacao; Ital. anticipazione. From Lat. anticipatio = (1) a preconception, an innate idea;

(2) the first movements of the body in infancy; (3) Rhel., occupation, prolepsis: from anticipo = to anticipate.]

A. Ord. Lang.: The set of anticipation; the thing anticipated.

Specialty:

1. The act of forming a preconceived notion of any Being, person, or thing; the formation of an opinion before the grounds on which it can be safely based are known; the thing thus preconceived, a prejudice.

"What nation is there, that, without any teaching, have not a kind of anticipation, or pre-conceived notion of a Deity?"—Denham.

"Of the great error of inquiring knowledge in anticipations. That I call anticipations, the voluntary collections that the mind makes of knowledge, which is every man's reason."—Bacon: Interpr. of Nature, ch. xv.

2. The act of saying, writing, or doing something before the natural time for giving attention to it has arrived.

"The golden number gives the new moon four days too late by reason of the aforesaid anticipation, and our neglect of it."—Holder.

3. The act of realising a future event, and feeling or acting as one would do if it had actually arrived. The act of foreseeing, or at least of expecting a future event, or providing for a future necessity.

"If we really live under the hope of future happiness, we shall taste it by way of anticipation and forethought; an image of it will meet our minds often, and stay there, as all pleasing expectations do."—Atterbury.

"But whose achievements, marvellous as they be, Are faint anticipations of a glory About to be revealed."—Robert Browning: Paracelsus.

B. Technically:

1. Med.: The attack of a fever before its usual time. (Coze.)

2. Painting: The expression of an expected action.

3. Logic: A presumption, prejudice, or preconceived opinion. It is called also preconception, presentation, or instinct.

4. Epicurean Philosophy: The first idea or definition of anything.

5. Rhetoric: A figure, called also Prolepsis (q. v.).

6. Music: The obtrusion of a chord upon a synopated note to which it forms a discord. (Busby.)

án-tíc-í-pá-tive, a. [Eng. anticipate; -ive.] Anticipating, containing an anticipation. (S. T. Coleridge.)

án-tíc-í-pá-tör, s. [Lat. anticipator; Ital. anticipatore.] One who anticipates. (Webster.)

án-tíc-í-pá-tör-y, a. [Eng. anticipator; -y.] Anticipating, foreseeing, forecasting; containing or implying an anticipation of some future event.

"... and this distinguished geologist concluded by the remarkable anticipatory observation that ..."—Owen: British Fossil Mammalia and Birds (1846), p. 2.

\* án-tíc-k, s. [ANTIC.]

án-tí-clí-max, s. [Gr. ávri (anti) = opposite to, or the opposite of; and κλίμαξ (klímax) = a ladder or staircase. . . . (Rhet.), a climax.]

Rhet.: The opposite of a climax. As in a climax the ideas increase in grandeur as the sentence advances, so in the anti-climax they sink lower and lower as the sentence proceeds. The effect in the former case is sublime; in the latter, ridiculous. The example of an anti-climax most frequently given (and there could scarcely be a better one) is the following:—

"Next comes Dalhousie, the great god of war, Lieutenant-colonel to the earl of Mar."

"A certain figure, which was unknown to the ancients, is called by some an anti-climax."—Addison.

"... more tolerant of avowed indifference towards his own writings, and, finally (if the reader will pardon so violent an anti-climax), much more ready to volunteer his assistance in carrying a lady's reticule or parasol."—De Quincey's Works (ed. 1868), vol. II, p. 292.

án-tí-clí-nal, a. & s. [Gr. ávτικλίω (antiklinō) = to lean on again; ávri (anti) = against, and κλίω (klinō) = to make to bend or slant.]

A. As adjective:

1. Geol.: So situated that the strata dip from it in opposite directions.

"... in a rapid anticlinal flexure."—Murchison. Bithuria, ch. vi.

"... one of the anticlinal ridges of the Jura."—Lyell: Manual of Geol., ch. v.

Anticlinal axis or anticlinal line: An imaginary line on the two sides of which the strata dip in opposite directions. The two sloping sides of the roof of a house resembles strata in an anticlinal position, and the ridge running lengthwise along the roof is like an anticlinal axis or line. Anticlinal is contrasted with synclinal (q. v.). In the majority

SECTION OF ANTICLINAL STRATA.

of cases an anticlinal axis forms a ridge, and a synclinal one a valley; but there are exceptions to this rule. (Lyell: Manual of Geol., ch. v.)

2. Anat.: Presenting a certain remote resemblance to a geological anticlinal axis.

Anticlinal vertebra: A vertebra which has an upright spine towards which the others are directed. (Flower: Osteol. of the Mammalia, 1876, p. 47.)

B. As substantive: The same as an anticlinal axis or line (q. v.).

"The Silurian and Devonian rocks are thrown up into a number of narrow anticlinals."—Duke of Argyll: Q. J. Geol. Soc., vol. xxiv., p. lxx.

án-tí-clín-í-c, án-tí-clín-í-c-a, a. [ANTICLINAL.] The same as ANTICLINAL.

án-tíc-ly, \* án-tíc-ly, adv. [Eng. antic; -ly.] Like an antic, after the manner of an antic.

"Scrambling, out-facing, fashion-mongring boys, That lie, and cog, and flout, deprave and slander, Go antickly, and shew an outward hideousness, And speak of half-a-dozen dangerous words."—Shakespeare: Much Ado About Nothing, v. 1.

\* án-tíc-mask, Another spelling of ANTIMASK, as if from Eng. ANTIC (q. v.).

án-tíc-né-mí-ón, s. [Gr. ávτινήμιον (antínēmion) = the shin, the leg; ávri (anti) = against, and νήμη (nēmē) = the part of the leg between the knee and ankle; & leg.]

Anatomy: The bone of the shin.

\* án-tíc-néss, \* án-tíc-néss, s. [Eng. antic; -ness.] The state or quality of being "antic." [ANTIC, a.]

"Rom. And 'tis believ'd how practice quickly fashioned, A port of humorous antickness in carriage, Discourse, demeanour, gestures."—Ford: Fancies, lv. 2. (Richardson.)

án-tí-cól-í-c, a. [Gr. ávτι (anti) = against, κωλικός (kolikos) = suffering in the κώλον (kōlon), having the colic.] Deemed of use against colic.

án-tí-cón-stí-tú-tion-ál, a. [Gr. ávri (anti) = against; Eng. constitution; -al. In Fr. anticonstitutionnel.] Opposed to the constitution of the country, or to sound constitutional principles.

"Nothing can be more easy than the creation of an anti-constitutional dependency of the two Houses of Parliament on the Crown will be in that case."—Boisbrooke: On Parties, Lett. 19.

án-tí-cón-stí-tú-tion-ál-íst, s. [Gr. ávri (anti) = against; Eng. constitutional, -ist.]

1. One opposed to the constitution of the country, or opposed to sound constitutional principles. (Webster.)

2. One opposed to the political party calling themselves the constitutionalists.

án-tí-cón-tá-í-ón-íst, s. [Gr. ávri (anti) = against; Eng. contagion, -ist.] One who opposes the view that any particular disease, generally believed to be transmitted by contact with those suffering from it, is really contagious. (Webster.)

án-tí-cón-tá-í-óus, a. [Gr. ávri (anti) = against; and Eng. contagious.] Believed to have the property of neutralising contagion.

an-ti-côn-vül'-sive, a. [Gr. avri (anti) = against; and Eng. convulsive (in Fr. convulsif).] Deemed of use against convulsions.

"Whatsoever produces an inflammatory disposition in the blood, produces the asthma, as anti-convulsives medicines."—Floyer.

an-ti-cor, s. [Gr. avri (anti) = opposite to; and Fr. cœur, Lat. cor = the heart.] (For def. see example.)

"A preternatural swelling of a round figure occasioned by a sanguine and bilious humour, and appearing in a horse's breast, opposite to his heart. An avitor may kill a horse, unless it be brought to a suppuration by good remedies."—Furrier's Dict.

an-ti-côg-mêt-ic, \*an-ti-côg-mêt-ick, a. & s. [Gr. avri (anti) = against, and κοσμητικός (kosmētikos) = skilled in decorating; κοσμέω (kosmeō) = to adorn; κόσμος (kosmos) = order . . . decoration.]

I. As adjective: Destructive of or detrimental to beauty.

"I would have him apply his anti-cosmetic wash to the paluted face of female beauty."—Lytton.

2. As substantive: A preparation which destroys beauty.

\*an-ti-côurt, a. [Gr. avri (anti) = against; and Eng. court.] Opposed to the court.

"The anti-court party courted him at such a rate, that he feared it might create a jealousy elsewhere."—Rereby: Mem. p. 188.

an-ti-côurt-i-ër, s. [Gr. avri (anti) = against; and Eng. courtier.] One opposed to the courtiers, or to the political party then in favour at court. (Ash.)

†an-ti-côus, a. [Lat. anticus = in front, foremost; ante = before.]

Botany: Turned towards the axis to which it appertains. Brown applies to those anthers which have their line of dehiscence towards the pistil the term antice; other botanists call them intorse, meaning = turned towards. (Lindley.)

an-ti-crë-ä-tör, s. [Gr. avri (anti) = against; and Eng. creator.]

1. One who has the implety and folly to oppose the Creator.

2. One who is the opposites of the creator of anything.

"Let him ask the author of those toothless astires, who was the maker, or rather the anti-creator of that universal foolery."—Milton: Apol. for Simocym.

an-ti-cy-clöne, s. [Gr. avri (anti) = marking opposition, and Eng. cyclone (q.v.).] A meteorological phenomenon consisting of a high barometric pressure over a limited region—with the pressure highest in the centre—and having light winds with a rotary outward flow. In the summer it is accompanied with hot and in the winter with cold weather.

an-ti-dëm-ö-crät-ic, an-ti-dëm-ö-crät-i-cal, a. [Gr. avri (anti) = against; Eng. democratic, -ical.] Opposed to democratic government or to the democracy themselves. (Webster.)

an-ti-dës-mä, s. [In Fr. antidesme; Gr. avri (anti) = instead of, and δεσμός (desmos) = a bond, a fetter. So named because its bark is used in making ropes.] A genus of plants belonging to the order Stilaginaceæ, or Antidesmads. It consists of trees or shrubs with the inflorescence in spikes, and the leaves, which are alternate, simple and entire. About thirty species have been described; they are found in India, Africa, Australia, and the parts adjacent. The currant-like drupe of A. pubescens, as mentioned by Roxburgh, are eaten by the natives of India. The leaves of A. alexiteria have been named as one of the multifarious Eastern remedies for snake-bite, but there is no reason to believe them effective. It is a middle-sized evergreen tree, with leaves like those of the lemon, and the fruit, which is red and acid like the barberry, in racemes.

an-ti-dës-mädz, s. pl. [ANTIDESMA.] The English name given by Dr. Lindley to the order of plants called in Latin Stilaginaceæ. It contains the genera Stilago and Antidesma. [STILAGINACEÆ.]

an-ti-di-kö-mar-i-an-i-tæ (Lat.), An-ti-di-kö-mar-i-an-itez (Eng.), s. pl. [Gr. Αντιδικωμάριαντας (Antidikomarianτας) = adversaries of Mary.]

Church History: The name given to those

Arshians who, in the 4th century, held with Bonosus and Helvidius that the brethren of Jesus (see Matt. xiii. 55; 1 Cor. ix. 5, &c.) were real brothers of His, born to Joseph and Mary after His miraculous nativity.

an-ti-dö-çê-tic, a. [Gr. avri (anti) = against, and Eng. Doetic.] Against the Doetic doctrines; against the doctrines of the Doctææ (q.v.).

"... the anti-Doetic, or, more strictly, the anti-Doetic tendency which has been ascribed to the gospel [of John]."—Strauss: Life of Jesus (Translation 1836), § 107.

†an-ti-dî-nick, s. [Gr. avri (anti) = against, and δίνος (dinos) = (1) a whirl, an eddy; (2) vertigo, dizziness.] A medicine given to counteract dizziness. (Glossogr. Nova, 2nd ed.)

an-ti-dö-tal, a. [Eng. antidote; -al.] Pertaining to an antidote; considered as fitted to neutralise the effects of poison.

"That bezoar is antidotal, we shall not deny."—Browne.

"Animals that can innocuously digest these poisons, become antidotal to the poison digested."—Browne: Vulgar Errors.

an-ti-dö-tal-ly, adv. [Eng. antidotal; -ly.] In the manner of an antidote; by way of antidote.

"The Africans, men best experienced in poisons, affirm whoever bath eaten basil, although he be stung with a scorpion, shall feel no pain thereby; which is a very different effect, and rather antidotaly destroying than generally promoting its production."—Burton: Anat. of Melancholy, vol. II., ch. 7.

an-ti-dö-tar-y, a. & s. [Low Lat. antidotarius = pertaining to an antidote, from antidotum; Gr. ἀντιδοτωρ (antidotom).]

A. As adjective: Antidotary.

B. As substantive. [In Sp. antidotario = a dispensary; Mediæv. Lat. antidotarium.]

1. A book giving directions as to the preparation of the several medicines.

"Ant. Galenarius in his antidotary bath many such."—Burton: Anat. of Melancholy, p. 36.

2. A dispensary, a place where medicines are dispensed.

an-ti-döte (Eng.), \*an-ti-dö-tüm (Lat.).

[In Fr. antidote; Sp., Port., & Ital. antidoto; Lat. antidotum. From Gr. ἀντιδοτωρ (antidotom) = a remedy, an antidote, properly the neut. of adj. ἀντιδοτος (antidototos) = given as a remedy; avri (anti) = against, and δότης (dotes) = given; διδομι (didōmi) to give.]

I. Ordinary Language:

1. Lit.: In the same sense as II. (Med.)

"... to find the antidotum for this disease is impossible."—Report on the State of Ireland, 1818. (State Papers, vol. II., p. 18.)

"And the antidotes for poisons." Longfellow: The Song of Hiawatha, xv.

2. Fig.: Whatever acta or is designed for the counteraction of any evil.

"Mac . . . can't thou With some sweet oblivious antidote Cleanse the stuff'd bosom of that perilous stuff That weighs upon the heart?" Shakespeare: Macbeth, v. 1.

"To quid time comes an antidote Against six poison'd uostrum." Burns: The Holy Fair.

II. Technically:

Med.: A medicine designed to counteract the influence of poison introduced by any means into the system. In Garrod's classification, Antidotes figure as Order I of his Division III. He discriminates them into direct and indirect antidotes; the former neutralising or destroying the poison against which they are prescribed on meeting it in the system; the latter counteracting its injurious physiological effects. He gives a classified list of the more common poisons, with their respective antidotes. It commences with "(a) Acids counteracted by magnesia, chalk, and dilute solutions of alkaline carbonates; (b) Alkalies and Alkaline earths, to which the antidotes are first vinegar and water, or second, oil; (c) alkaloids, against which should be administered finely divided animal charcoal." (See Garrod's Materia Medica, 3rd ed., 1863, pp. 420, 421.)

†an-ti-döte, v. t. [From the substantive.] To give as a remedy against poison (lit. & fig.). It may be followed—

(a) by an objective of the person to whom the remedy is administered:

"... antidote thyself against the idolatrous infection of that strange woman's breath, whose lips yet drop as an honey-comb."—Mora: Against Idolatry, ch. x.

Or (b) by an objective of the poison administered, or the thing containing the poison.

"Either they were first unhappily planted in some place of ill and vicious education, where the devil and his agents infused such diabolical fith and poison into their hearts, that no discipline or advice, no sermons or sacraments, could ever after antidote or work it out."—South: Serm., vi. 867.

"Fill us with great ideas, full of heaven, And antidote the pestilential earth." Young: Night Thoughts, 6.

an-ti-dö-tic-al, a. [Eng. antidote; -ic.] Pertaining to an antidote, suitable for an antidote, used as an antidote. (Webster.)

an-ti-dö-tic-al-ly, adv. [Eng. antidotal; -ly.] After the manner of an antidote. By way of antidote. (Browne, quoted by Webster.)

an-ti-dö-tüm, s. [ANTIDOTE.]

an-tid-róm-al, a. [Gr. ἀντιδρομέω (antidromēō) = to run against; or avri (anti) = against, and δρόμος (dromos) = a course, running; δραμεῖν (dramein), 2 aor. = to run.] Pertaining to that which runs against another.

Bot.: A term used of the cyme in monocotyledonous plants when the direction of the spike is the reverse of that on the central stem. (Lindley: Intro. to Botany.)

an-ti-dys-ën-tër-ic, \*an-ti-dys-ën-tër-ick, s. [Gr. avri (anti) = against, and Eng. dysenteric.] A medicine given against dysentery. (Glossogr. Nova, 2nd ed.)

an-ti-dys-ür-ic, a. [Gr. avri (anti) = against, and δυσουρία (dysouria) = dysury, retention of urine.] Deemed of use against dysury.

an-ti-dë-rite, s. [In Ger. antiedrit; Gr. avri (anti) = over against; εἶσα (heira) = a seat . . . a base, and suff. -ite.] A mineral, called also Edingtonite (q.v.).

an-ti-ëm-ët-ic, \*an-ti-ëm-ët-icks, a. & s. [Gr. avri (anti) = against, and ἐμετικός (emetikos) = provoking sickness, emetic.]

1. As adjective: Opposed to the action produced by an emetic—namely, vomiting; given to allay vomiting.

2. As substantive: A remedy employed to check vomiting. (Glossogr. Nova, 2nd ed.)

an-ti-ën-në-ä-hë-dral, a. [Gr. avri (anti) = against; έννεά (ennea) = nine, and εἶσα (heira) = a sitting place, a seat . . . a base.]

Crystallography: Having nine faces on two opposite parts of the crystal. (Cleveland.)

\*an-tient. [ANCIENT.]

an-ti-ën-thü-çi-äs-tic, \*an-ti-ën-thü-çi-äs-tick, a. [Gr. avri (anti) = against, and Eng. enthusiastic.] Opposed to anything enthusiastic; resisting enthusiasm.

"According to the anti-enthusiastick poet's method."—Shaftesbury.

\*an-tient-ry, s. The same as ANCIENTRY (q.v.).

†an-ti-ëph-i-äl-tic, a. [Gr. avri (anti) = against, and ἐπιάλτης (epialtēs) = one who leaps upon, . . . the nightmare.] Used against the nightmare. (Casle: Lexic. Pharmacœut., 2nd ed., 1827.)

an-ti-ëp-il-ëp-tic, \*an-ti-ëp-il-ëp-tick, a. & s. [Gr. avri (anti) = against, and ἐπιληπτικός (epileptikos) = epileptic. [ANTEPILEPTIC.]

1. As adjective: Deemed of use against epilepsy.

2. As substantive: A remedy administered in cases of epilepsy. (Glossogr. Nova, 2nd ed.)

an-ti-ëp-is-cöp-al, a. [Gr. avri (anti) = against, and Eng. episcopal. In Fr. antiépiscopal.] Opposed to episcopacy.

"Had I gratified their anti-episcopal faction at first, in this point, with my consent, and sacrificed the ecclesiastical government and revenues to the fury of their covetousness, ambition, and revenge. . . ."—K. Charles I.: Eik. Bas., ch. ix.

"As for their principles, take them as I find them laid down by the anti-episcopal writers."—Dr. Hicke: 30th Jan. Serm., p. 17.

an-ti-ë-vän-gël-ic-al, a. [Gr. avri (anti) = against, and Eng. evangelical. In Fr. anti-évangélique.] Opposed to evangelical doctrine.

fäte, fät, färe, amidst, whät, fäll, father; wë, wët, hère, camël, hër, thère; pine, pît, sire, sir, marine; gö, pöt, or, wöre, wöf, wörk, whö, sön; müte, cüb, ciure, unite, cür, räp, füll; trÿ, Sÿrian, æ, œ = ë. ey = ä. qu = kw.

án-tí-fá-cé, s. [Gr. ávri (anti) = opposed to, and Eng. face.] The face with characteristics exactly the opposite of those possessed by another one.

"The third is your soldier's face, a menacing and astounding face, that looks broad and big; the grace of this face consists in a beard. The opposite to this is your lawyer's face, a contracted, subtle, and intricate face, &c.—B. Jonson: Cynth. Res.

án-tí-fán-át-íc, \* án-tí-fán-át-í-ék, s. [Gr. ávri (anti) = against, and Eng. fanatic.] One opposed to fanatics or to fanaticism.

"What fanatic, against whom he so often inveighs, could more presume proudly affirm whom the comforter hath empowered, than this anti-fanatic, as he would be thought?"—Milton: Notes on Griffith's Sermon.

án-tí-fé-brí-le, a. & s. [From Gr. ávri (anti) = against, and Eng. febrile. Or from Fr. anti-febrile; Lat. febrilis = producing fever; febris = a fever.]

A. As adjective: Deemed of use against fever. (Webster.)

"Anti-febrile medicines check the ebullition."—Floyer.

B. As substantive: A medicine deemed of use against fever; a febrifuge.

án-tí-féd-ér-ál, a. [Gr. ávri (anti) = against, and Eng. federal; -ism.] Opposed to Federalism. (Webster.)

1. Opposed to federation or its advocates. At the formation of the United States on a federal basis, opposing that constitution for the new nation. (Webster.)

2. In the American War of 1861-5: Opposed to the Federalists.

án-tí-féd-ér-ál-í-sm, s. [Gr. ávri (anti) = against, and Eng. federation.] Opposed to Federalism. (Webster.)

án-tí-féd-ér-ál-íst, s. [Gr. ávri (anti) = against, and Eng. Federalist.]

1. At the formation of the constitution of the United States: One opposed to Federalism or its advocates. (Webster.)

2. In the American War of 1861-5: Opposed to the Federalists.

án-tí-flát-tér-íng, a. [Gr. ávri (anti) = against, and Eng. flattering.] Opposed to the practice of flattering people; also who or which in fact does not flatter, but the reverse.

"Satire is a kind of anti-flattering glass, which shows us nothing but deformities in the objects we contemplate in it."—Delany: Observ. on Ed. Orerry, p. 144.

án-tí-flát-ú-lent, a. [Gr. ávri (anti) = against, and Eng. stultent.] Deemed of use against stulteness. (Webster.)

án-tí-gal-ác-tíc, s. [Gr. ávri (anti) = against, and γαλακτικός (galaktikos) = milky; from γάλα (gála), genit. γαλακτός (galaktos) = milk.] A medicinal substance fitted to diminish the secretion of milk. (Webster.)

án-tíg-ón-ō, s. [Gr. Ἀντίγονη (Antigone), a feminine proper name.]

1. Classical Mythology:

(a) The daughter of Oedipus, king of Thebes, who was most dutiful to her blind father.

(b) A daughter of Laomedon, king of Troy. Presuming to set herself up as a rival in beauty to Juno, she was changed into a stork.

(c) A play on this subject by Sophocles.

(d) A musical setting of a verson of the play by Mendelssohn.

2. Astronomy: An asteroid, No. 129. It was discovered by Peters, February 5th, 1873.

án-tíg-ór-í-te, s. [From Antigor Valley, in Piedmont, where it is found.] A mineral, a variety of lamellar Serpentine, of a brownish-green colour by reflected, and a leek-green by transmitted light.

án-tí-grá-ph, s. [Gr. αντίγραφη (antigraphē) = (1) a reply in writing; (2) an answer in law; (3) a copy.] A transcript; a copy.

án-tí-gúg-glér, s. [Gr. ávri (anti) = against, and Eng. gurgler, from guggle, the same as gurgle.] A bent tube, one end of which is introduced into a bottle to enable the liquor to be drawn off without the gurgling sound usually heard on such occasions. (Webster.)

án-tí-héc-tíc, \* án-tí-héc-tí-ék, a. & s. [Gr. ávri (anti) = against, and ἑκτικός (hektikos) = . . . hectic, consumptive.]

A. As adjective: Deemed of use against hectic fever.

B. As substantive: A medicine used against hectic fever. (Glossog. Nov., 2nd ed.)

án-tí-hē-lí-x, s. Another form of ANTHELIX.

án-tí-hý-drō-phōb-íc, a. & s. [Gr. ávri (anti) = against, and δειροφοβικός (deirophobikos) = pertaining to or seized with hydrophobia.]

A. As adjective: Used to counteract hydrophobia.

B. As substantive: A medicine given to counteract hydrophobia.

án-tí-hý-drōp-íc, a. & s. [Gr. ávri (anti) = against, and Eng. hydropic.]

A. As adjective: Used to counteract dropsy.

B. As substantive: A medicine given to counteract dropsy.

án-tí-hýp-nót-íc, án-thýp-nót-íc, \* án-tí-hýp-nót-í-ék, a. & s. [Gr. ávri (anti) = against, and Eng. hypnotic.]

A. As adjective: Tending to prevent sleep.

B. As substantive: A medicine given in cases when it is needful to prevent sleep.

án-tí-hýp-ō-chōn-dri-ác, án-thýp-ō-chōn-dri-ác, a. & s. [Gr. ávri (anti) = against, and Eng. hypochondriac; from Gr. ὑποχονδριακός (hypochondriakos) = affected in the hypochondria (q.v.).]

A. As adjective: Deemed of use against hypochondria. (Webster.)

B. As substantive: A medicine given against hypochondria. (Glossog. Nova, 2nd ed.)

án-tí-hý-pōph-ō-r-a, án-thý-pōph-ō-r-a, s. [Gr. ἀντιποφά (antipophora) = an objection; ἀντιποφά (antipophora) = to urge by way of objection against.]

Rhet.: A figure by which an objection is refuted by a contrary inference occurring in some sentence or other. (Johnson.)

án-tí-hýs-tér-íc, án-thýs-tér-íc, \* án-tí-hýs-tér-í-ék, a. & s. [Eng. hysteric, from Gr. ávri (anti) = against, and ὑστερικός (husterikos) = hysterical.] (HYSTERIC.)

A. As adjective: Deemed of use against hysteria. (Webster.)

B. As substantive: [In Fr. antihystérique; Port. antihysterico.] A medicine used against hysteria.

"It raises the spirits, and is an excellent anti-hysteric, not less innocent than potent."—Sp. Berkeley: Siria, 90.

"Anti-hysterics are undoubtedly serviceable in madness arising from some sort of spasmodic disorders."—Battie: On Madness.

án-tí-lō-gōm-ē-n-a, s. pl. [Gr. ἀντιλογόμενα (antilogomena) = disputed, contradicted, pr. par. pass. of ἀντιλέγω (antilegō) = to speak against; ávri (anti) = against, and λέγω (legō) = . . . to speak.]

Biblical Criticism: A term borrowed from Eusebius, and still in use for those books of Scripture which were not at first universally received throughout the Churches. The Antilegomena were the Epistle to the Hebrews, James, 2 Peter, 2 and 3 John, Jude, and Revelation. The term is opposed to HOMOLOGOUМЕНΑ (q.v.).

án-tí-lith-íc, a. & s. [Gr. ávri (anti) = against, and λίθος (lithos) = pertaining to stones; λίθος (lithos) = a stone.]

A. As adjective: Tending to check the deposition of calculi in the bladder, or destroy them when formed. (Webster.)

B. As substantive: A medicine designed to check the deposition of calculi in the bladder, or destroy them when formed; a lithontrypic. (Webster.)

Plural. Antilithics: The medicines just described.

án-tí-lith-ō-tríp-tíst, s. [Gr. ávri (anti) = against; λίθος (lithos) = a stone, and τρίψω (triphō) = one who rubs, from τριβω (tribō) = to rub.] One opposed to lithotripsy; one who does not approve of the practice of attempting to remove a calculus from the bladder by the process of trituration. (Webster.)

án-tí-lō-bí-úm, s. [Mediæv. Lat. antilobium, from Gr. ávri (anti) = opposite to, and λοβός (lobos) = the lobe or lower part of the ear.]

Anat.: The part opposed to the lobe of the ear; the tragus.

án-tí-lōg-ar-íthm, s. [Gr. ávri (anti) = against, and Eng. logarithm.]

1. The complement of the logarithm of a sine, tangent, or secant, i. e., the difference of that logarithm from the logarithm of 90°.

2. The number to a logarithm; thus, on Briggs's system, since 3 is the logarithm of 1,000, 1,000 is the antilogarithm of 3.

án-tí-lōg-íc-ál, a. [Gr. ávri (anti) = against, and Eng. logical.] Contrary to logic, illogical. (Cotteridge.)

án-tíl-ōg-ōús, a. [Gr. αντίλογος (antilogos) = contradictory; ávri (anti) = against, and λόγος (logos) = proportion.] Reverse.

Fyvo-electricity. Antilopous pole: The end of a crystal which shows negative electricity when heated, and positive when cooled. It is opposed to the analogous pole (q.v.).

án-tíl-ō-gý, s. [In Fr. antilogie; Sp. & Port. antilogía. From Gr. αντίλογία (antilogía) = controversy, disputation; ávri (anti) = against, and λόγος (logos) = a word, a thought, reason.] Contradiction between different passages in the same author. (Glossog. Nova, 2nd ed.)

án-tí-lōl-míc, \* án-tí-lōl-mí-ék, s. [Gr. ávri (anti) = against, and λοιμικός (loimikos) = pestilential, from λοιμός (loimos) = the plague.] A medicine given against the plague.

Antiloinics (plur.): Medicines of the kind now described: such as chlorine, nitric acid, muriatic acid, &c. (Glossog. Nova, 2nd ed.)

án-tíl-ō-pē, s. [For etym. see ANTELOPE.] A genus of ruminating animals belonging to the family Bovidae. They have more or less cylindrical horns, often annulated, and, in some cases, sub-orbital sinuses and inguinal pores. Linnaeus placed the few species known to him partly under his genus Capra (Goats), and partly under Cervus (Stags), and they have a certain affinity with both those genera of animals. They make an approach also to oxen and sheep. The size of the genus has caused it to be broken up into numerous sections or sub-genera. Col. Hamilton Smith has Dicanocerinae, Aigocerine, Orygine, Gazelline, Antilopine, Redoncline, Oreotragine, Traguline, Raphicerine, Tetracerine, Cephalophine, Neotragine, Tragelaphine, Nemorolædine, Rupicaprine, Alpoocerine, and Amoine groups of Antelopes—seventeen in all. (Griffith's Cuvier, iv., 162 to 294. In vol. v., 322 to 355, the Oreotragine group being suppressed, the remaining sixteen become sub-genera Dicanocerus, Aigocerus, Oryx, Gazella, &c.) Some, again, have made Antelope not a genus, but a sub-family Antilopinae, or even a family Antilopidae or Antelopidae, and have elevated the sections or sub-genera into genera quite distinct from each other. The great metropolis of the extended genus Antelope is Southern Africa. Of sixty-nine species recorded by Professor Wagner, twenty-five occur in that locality, and twenty-nine in other parts of Africa, making fifty-four from the whole of that continent. Among the species found in Southern Africa are the Ourebi or Oribi (A. scoparia, Schreber); the Steenbok (A. tragulus, Lichtenstein); the Klipspringer (A. oreotragus, Forster; Oreotragus saltator, Smith); the Koodoo (A. streptoceros, Pallas; Streptoceros koodoo, Smith); the Boschbok (A. sylvatica, Sparrmann); the Rieebok (A. capreolus, Licht.); the Duikerbok (A. mergens, Blainville); the Kleenbok (A. perpusilla, Smith); the Springbok (A. euechore, Forster); the Biesbok (A. pygarga, Pallas); the Gemsbok (A. oryx, Pallas); the Blaibok (A. leucophaea, Pallas); the Canna, the so-called Eland = Eik of the Cape Dutch (A. orcas, Pallas); the Caama or Hartbeest (A. caama, Cuv.); the Gnu or Gnoo (A. gnu, Gmelin; Capibepes gnu, Smith); the Brindled Gnu (A. gorgon, Smith). Pringle alludes to several of these species, but "the gazelle" of which he speaks is not that of North-Eastern Africa.

"By valleys remote where the oribi plays, Where the gnu, the gazelle, and the hartbeest graze, And the gemsbok and eland unbent recline, By the skirts of grey forests orbung with wild vine."—Pringle: Ajar in the Desert.

Among the antelopes from other parts of Africa may be mentioned the Madooq (A. Salliana, Blainville), a dwarf species from Abyssinia; the Gazelle (A. dorcas, Pallas), (Gazella dorcas) from Egypt and Barbary; the Addax (A. addax, Lichtenstein; Oryx addax, Smith), widely spread; the Abu-harte (A. leucorx, Pallas) [UNICORN], in Senaar and Kordofan; the Bek-el-Wash (A. bubalus,

ból, boy, pout, jówl; cat, cell, chorna, chin, bench; go, gem; thin, this; sin, as; expect. Xenophon, exist. -íng. -tion, -sion = shún; -tion, -sion = zhún. -tious, -sious, -cious = shús. -ble, -dle, &c. = bpl, dpl. -tient = shént.

Pallas), from Barbary; and the Bush Antelope (*A. silvicultrix*, Afzelius; *Cephalophus sylvicultrix*, Smith), from Sierra Leone. Next to Africa, Asia, including the Eastern Archipelago, is the most important habitat of the genus. The Sasin or Common Antelope of India is *A. cervicapra*, Pallas; and in the same country the Nyghan (*A. picta*, Pallas; *Portax picta*, Smith); the Chickara (*A. quadricornis*, Blainville; *Tetracerus chickara*, Leach), &c. Other species are in Western Asia, Thibet, Sumatra, but none appear to exist in Australia or Madagascar. In Europe there is a typical one—the Saiga (*A. colus*, Smith), found in Roumania, Poland, and Russia, and one of a more aberrant character, with affinities to the goats—the Chamoia (*A. rupicapra*, Pallas; *Rupicapra vulgaris*, Smith), in the Alps, Pyrenees, Carpathians, and the mountains of Greece. The New World has only two undisputed species—the Rocky Mountain sheep or goat (*Haplocerus laniger*), a true antelope; and the Prongbuck, called goat by the fur-traders. It is *Antelope* or *Dicranus furcifer* (Smith), and is found in the western part of North America.

¶ Some of the above species of antelope have other designations than those now given. The Springbok is now frequently called *Gazella eucore*; the Blessbok, *Gazella albifrons*; the Blaubok (blue antelope), *Gazella leucophaea*; the Eland, *Boselaphus orcas* or *Oreas canna*; the Brindled Gnu (bastard wild beast), *Catoblepas gorgon*; the Addax, *Addax nasomaculata*; the Chickara, *Tetracerus quadricornis*; the Saiga, *Colus saiga* or *Antilocapra saiga*; and the Chamois, *Rupicapra tragus*.

**ăn-ti-lôp-i-dæ, ăn-têl-ôp-i-dæ, s. pl.** [From *Antilope* (q.v.), and *Antelope* (q.v.).] *Zool.*: In some classifications a family of ruminants, with its type *Antilope* (q.v.).

**ăn-ti-lô-pi-næ, s. pl.** [ANTILOPE.] A sub-family of Bovidae. If the various sub-genera of the old genus *Antilope* be raised to the rank of independent genera, then it becomes needful to point out their affinity for each other by grouping them into a sub-family, naturally designated *Antilopinæ*. [ANTILOPE, GAZELLE, &c.]

**ăn-ti-lô-pi-ne, a.** [From *antilope* (q.v.).] Pertaining to an antelope.

¶ We have here another instance of wool on the skin of an antilopine species.—*Griffith's Cuvier*, vol. iv., p. 187.

\* **ăn-ti-lô-quist, s.** [Gr. *ἀντι* (*anti*) = against and *Lat. loquor* = to speak.] A person who speaks against or contradicts any person or statement. (*Bailey*.)

\* **ăn-ti-lô-quy, s.** [Gr. *ἀντι* (*anti*) = (1) against, (2) over against; and *Lat. loquor* = to speak.]

1. Contradiction. *Spec.*, contradiction between two passages in the same author; an antilogy (q.v.). (*Cockeram*.)

\* 2. A preface. (*Webster*.)

\* **ăn-ti-lýs-sôg, s.** [Gr. *ἀντι* (*anti*) = against, and *λύσσα* (*lyssa*) = rage, fury, as of warriors; of rabid dogs, &c.] Any medicine alleged to be of use in cases of madness in dogs or hydrophobia in men.

**ăn-ti-mă-că-s-sar, s.** [Gr. *ἀντι* (*anti*) = against, and *Eng. macassar* = oil (q.v.).] An ornamental covering thrown over chairs, sofas, &c., to prevent their being soiled by the hair.

**ăn-ti-măg-ic, a.** [Gr. *ἀντι* (*anti*) = against, and *Eng. magic*.] Opposed to magic, fitted to remove the delusive effects of so-called magic. (*Thomson*: *Castle of Indolence*, li. 65.)

\* **ăn-ti-măg-ist-ri-cal, a.** [Gr. *ἀντι* (*anti*), and *Eng. magisterial*.] Opposed to magistracy. (*South*: *Sermons*, v. 261.)

**ăn-ti-mă-ni-ăc, ăn-ti-mă-ni-ă-căl, a.** [Gr. *ἀντι* (*anti*) = against, and *Eng. maniac, maniacal*.] Suitable to be employed in cases of mania. (*Battie*: *On Madness*.)

\* **ăn-ti-mask, \* ăn-ti-masque, s.** [Pref. *anti* (B.), and *mask*, in *Fr. masque*.] A secondary mask, or masque, designed as a contrast to the principal one; a ridiculous interlude dividing the parts of the more serious one. (*Nares*.)

¶ Let *anti-masks* not be long; they have been commonly of fools, satyrs, belousos, wild men, antics, beasts, spirits, witches, echiopes, pignates, turquois, nymphs, rustics, cupids, statues, moving and the like. As for angels, it is not comical enough to put them in *anti-masks*. . . —*Bacon*: *Essays*, *Cic. and Mor.*, ch. xxxvii.

¶ On the scene he thrusts out first an *anti-masque* of bugbears. —*Milton*: *Ans. to Kirk. Bas.*, ll.

**ăn-ti-mă-sôn, s.** [Eng. *anti*, *mason*.] One opposed to Freemasonry. (*Webster*.)

**ăn-ti-mă-sôn-ic, \* ăn-ti-mă-sôn-ic-ăl, a.** [From Gr. *ἀντι* (*anti*) = against, and *Eng. masonic*.] Opposed to Freemasonry. (*Webster*.)

**ăn-ti-mă-sôn-rý, s.** [Gr. *ἀντι* (*anti*) = against, and *Eng. masonry*.] Opposition to Freemasonry. (*Webster*.) In New York State, in 1826, a man called Morgan was carried off and not again seen. As he was believed to be writing a book disclosing the secrets of Freemasons, they were suspected of his abduction, and anti-masonry, for some years afterwards, was the badge of a party polling many votes at elections.

\* **ăn-ti-masque, s.** [ANTIMASK.]

**ăn-ti-măt-ri-mô-ni-ăl, a.** [Gr. *ἀντι* (*anti*) = against, and *Eng. matrimonial*.] Opposed to matrimony. (*Webster*.)

**ăn-ti-măt-ri-mô-ni-ăl-ist, s.** [Eng. *anti-matrimonial*; *-ist*.] A person opposed to matrimony. (*Richardson*: *Clarissa*, iv. 144.)

**ăn-ti-mêl-ăn-chôl-ic, s.** [Gr. *ἀντι* (*anti*) = against, and *μελαγχολία* (*melancholia*) = (1) a depraved state of the bile, in which it grows very dark; (2) melancholy madness.] A medicine administered in cases of melancholy madness. (*Webster*.)

**ăn-ti-mê-tăb-ô-lê, s.** [Lat. from Gr. *ἀντιμεταβολή* (*antimetabolê*) = an interchange, a transformation, a revolution; from Gr. *ἀντι* (*anti*) = against, and *μεταβολή* (*metabolê*) = a change; *μεταβάλλω* (*metaballô*) = to throw in a different position, to turn quickly; *μετά* (*meta*), *in comp.*, implying change, and *βάλλω* (*ballô*) = to throw.]

*Rhet.*: The shifting or transferring of two things over against each other. It occurs twice in the following sentence: "Allowing the performance of an honourable action to be attended with labour, the labour is soon over, but the honour is immortal; whereas should even pleasure wait on the commission of what is dishonourable, the pleasure is soon over, but the dishonour is eternal." (*Rees*.)

**ăn-ti-mê-tăth-ês-is, s.** [In Ger. *anti-metathese*. From Gr. *ἀντιμετάθεσις* (*antimetathesis*) = a counter change; *ἀντι* (*anti*) = against, and *μετάθεσις* (*metathesis*) = transposition, change; *μετατίθημι* (*metatithêmi*) = (1) to place among, (2) to place differently, to alter; *μετά* (*meta*), implying change, and *τίθημι* (*tithêmi*) = to put, to place.]

*Rhet.*: The inversion of the parts or members of an antithesis, as "Compare this peace with that war." (*Rees*.)

**ăn-tim-êt-êr, s.** [In Ger. *antimeter*; Gr. *ἀντιμετρώ* (*antimetron*) = to measure out in turn, to recompense; or *ἀντι* (*anti*) = opposite to, and *μέτρον* (*metron*) = a measure.] An optical instrument for measuring angles with greater accuracy than can be done by the quadrant or sextant. (*Rees*.)

**ăn-ti-mêt-ri-căl, a.** [Gr. *ἀντι* (*anti*) = against, and *Eng. metrical*.] Opposed to or in contrariety to what is metrical. (*Bailey*.)

**ăn-ti-min-is-têr-i-ăl, a.** [Gr. *ἀντι* (*anti*) = against, and *Eng. ministerial*. In Ger. *antiministeriell*.] Opposed to the ministry, for the time being, in political power.

¶ If I say anything *anti-ministerial*, you will tell me you know the reason. —*Gray's Letters*.

**ăn-ti-min-is-têr-i-ăl-ist, s.** [Gr. *ἀντι* (*anti*) = against, and *Eng. ministerial*.] One opposed to the ministry. (*Ash*.)

**ăn-ti-môn-ar-chic, \* ăn-ti-môn-arch-ic-ăl, \* ăn-ti-môn-arch-i-ăl, a.** [Gr. *ἀντι* (*anti*) = against, and *Eng. monarchic, monarchical; monarchy*; *suff. -al*. In *Fr. antimonarchique*.] Opposed to monarchical government. (*Glossog. Nova*, 2nd ed.)

**ăn-ti-môn-arch-ic-ăl-ness, s.** [Eng. *anti-monarch*.] The quality of being opposed to monarchy. (*Johnson*.)

**ăn-ti-môn-arch-ist, s.** [Gr. *ἀντι* (*anti*) = against, and *Eng. monarchist*.] One opposed to monarchy.

¶ Deakin Bond, a great Oliverian and *anti-monarchist*, died on that day; . . . —*Life of A. Wood*, p. 114.

**ăn-tim-ôn-ăte, s.** [Eng. *antimonic*]; *-ate*.] A salt of antimonic acid. [ANTIMONIATE.]

*Min.*: Dana has as the third division of his "Ternary Oxygen Compounds," "Phosphates, Arsenates, Antimonates, Nitrates," the first sub-division of which is headed "Phosphates, Arsenates, Antimonates, . . ." For its actions see PHOSPHATES.

**antimonate of lead, s.** A mineral, called also BINDBHEIMITE (q.v.).

**ăn-tim-ôn-êt-têd, a.** [ANTIMONIURETTED.]

**ăn-ti-mô-ni-ăl, a. & s.** [In *Fr.*, *Sp.*, & *Port.* *antimonial*; *Ital. antimoniale*.]

*A.* As adjective: Pertaining to antimony; made of antimony, consisting of antimony; containing more or less of antimony.

¶ Though *antimonial* cups prepar'd with art, Their force to wine through ages should impart; This dissipation, this profuse expence, Nor shrinks their size, nor wastes their stores immense. —*Blackmore*.

¶ They were got out of the reach of *antimonial fumes*. —*Grew*.

*B.* As substantive: A medicine in which antimony is a leading ingredient.

**antimonial arsenic, s.**

*Min.*: A mineral containing above ninety per cent. of arsenic; the other element in its composition being antimony. It is found in radiated reniform masses in California.

**antimonial copper, s.**

*Min.*: A mineral, called also Chalcostilbite (q.v.).

**antimonial copper glance, s.**

*Min.*: A mineral, called also Bournonite (q.v.).

**antimonial nickel, s.**

*Min.*: A mineral, called also Breithauptite (q.v.).

\* **antimonial ochre, s.**

*Min.*: An obsolete name for two minerals, Cervantite and Stibiconite (q.v.).

**antimonial powder, s.**

*Pharm.* A medicine consisting of oxide of antimony one ounce, and phosphate of lime two ounces. It is used as a substitute for James's powder.

**antimonial silver, s.**

*Min.*: A mineral, called also Dyscrasite (q.v.).

**antimonial silver blende, s.**

*Min.*: A mineral, called also Pyrrargyrite (q.v.).

**antimonial wine, s.**

*Pharm.*: A wine consisting of forty grains of tartarated antimony (tartar emetic) dissolved in twenty ounces of sherry wine. (Cups used to be made of antimony, and the liquid became medicinal.) (See *Jermyn Street Museum Catalogue*.)

**ăn-ti-mô-ni-ăte, s.** [Eng. *antimonic*; *-ate*.]

*Chem.*: A salt of antimonic acid. [ANTIMONIATE.]

**ăn-ti-mô-ni-ă-têd, a.** [Eng. *antimonic*; *suff. -ated*.] Tinctured naturally or prepared artificially with antimony.

*Antimontated galena*: A variety of galena occurring in the Dufton mines in the north of England.

**ăn-ti-môn-ic, a.** [Eng. *antimonic*; *-ic*.]

Pertaining to antimony or containing antimony.

*Antimonic chloride*, or *antimony pentachloride*, SbCl<sub>5</sub>, is obtained as a colourless volatile fuming liquid by passing excess of chlorine over the metal or the trichloride. On distillation it decomposes into SbCl<sub>3</sub> and Cl<sub>2</sub>.

*Antimonic tetroxide*, or *antimonoso-antimonic oxide*, Sb<sub>2</sub>O<sub>4</sub> or Sb<sub>2</sub>O<sub>3</sub>.Sb<sub>2</sub>O<sub>5</sub>, obtained

âte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hêre, camêl, hêr, thêre; pînc, pît, sîre, sîr, marine; gô, pôt, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, ûnite, cûr, rûle, fûll; trý, Sýrian. æ, œ = ê; ð = ô. qu = kw.

by heating the metal or trioxide. It is a yellow infusible non-volatile powder, insoluble in acids, but dissolves in alkalis.

**Antimonic oxide, Sb<sub>2</sub>O<sub>5</sub>.** Obtained by the action of HNO<sub>3</sub> on the metal. It is a yellow insoluble powder, which by heat is converted into the tetroxide. Its hydrate forms salts called *antimonates*; those formed from the hydrates of the trioxide are called *antimonites*. By adding water to antimonic chloride, SbCl<sub>5</sub>, a hydrate is precipitated called *metantimoniac acid*, H<sub>2</sub>SbO<sub>7</sub>. The acid *sodium metantimonate*, Na<sub>2</sub>H<sub>2</sub>SbO<sub>7</sub> + 6H<sub>2</sub>O, is insoluble in water.

**án-tí-món-ide, s.** [Eng. *antimony*; snff. -ide.]

**Chemistry:** A compound of antimony and some other element or metal.

**án-tí-món-if-ór-ous, a.** [Mediæv. Lat. *antimonium*, and Class. Lat. *fero* = to bear.] Bearing antimony; antimoniated (q.v.)

**án-tí-mó-ni-ous, a.** [Eng. *antimony*; -ous.] Containing as one of its ingredients antimony.

**Antimonious chloride, or antimony trichloride, SbCl<sub>3</sub>,** called also *butter of antimony*. By dissolving the metal or the sulphide in strong HCl, and distilling the liquid, SbCl<sub>3</sub> volatilises and forms a white crystalline mass.

**Antimonious oxide, or antimony trioxide, Sb<sub>2</sub>O<sub>3</sub>.** Obtained by decomposing SbCl<sub>3</sub> with an alkaline carbonate. It is a colourless powder, crystallising in octohedra; it becomes yellow when heated, melts at red heat, and volatilises in a close vessel, but absorbs oxygen from the air, and becomes Sb<sub>2</sub>O<sub>4</sub>. Antimonious oxide dissolves in cream of tartar, forming tartar emetic, or potassium antimony tartarate, 2(C<sub>2</sub>H<sub>4</sub>K(SbO<sub>2</sub>O<sub>6</sub>) + H<sub>2</sub>O.

**Antimontous sulphide, Sb<sub>2</sub>S<sub>3</sub>,** occurs native as a lead-grey, shining, crystalline, brittle mineral; sp. gr. 4.6; easily fusible, and a good conductor of electricity. It is used in horse medicine and in Bengal lights. When precipitated by H<sub>2</sub>S it is an orange-red powder, which is soluble in ammonium sulphide. **Kermes mineral** is a mixture of Sb<sub>2</sub>S<sub>3</sub> and Sb<sub>2</sub>O<sub>3</sub>. **Sulph-antimonites** are compounds of Sb<sub>2</sub>S<sub>3</sub> with basic sulphides.

**Antimony pentasulphide, or antimonic sulphide, Sb<sub>2</sub>S<sub>5</sub>,** is a yellow-red powder obtained by decomposing sodium sulphantimoniate, Na<sub>3</sub>SbS<sub>4</sub>, a crystalline substance.

**án-tí-món-ite, s.** [Eng. *antimony*, and suff. -ite (q.v.). In Ger. *antimonit*.] A mineral, the same as STIBNITE (q.v.)

**án-tí-mō-ni-um, s.** [Latin, but not classical.] Antimony.

**án-tí-mō-ni-ur-ét-téd, án-tí-mō-n-ét-téd, a.** [Eng. *antimony*; suff. -retted, -téd (q.v.).] Mingled with antimony fumes. (Applied to gaseous antimony in combination with another gas.)

**Antimonturetted hydrogen, or antimontous hydride, or stibine, SbH<sub>3</sub>.** Obtained by the action of HCl on zinc, in the presence of an antimony salt. It is a colourless gas, burning with a white flame, liberating Sb<sub>2</sub>O<sub>3</sub>. At red heat it deposits metallic antimony; passed through a solution of AgNO<sub>3</sub>, it deposits a black precipitate of SbAg<sub>3</sub>.

**án-tí-mō-n-ō-phyl-lite, s.** [Ger. *antimon*; Gr. φύλλον (*phullon*) = leaf, and snff. -ite.] A mineral occurring in thin angular six-sided prisms. Its precise locality is unknown. It was originally named by Breithaupt. Dana considers that it is probably the same as VALENTINITE (q.v.)

**án-tí-mō-n-ý, s.** [In Ger. *antimon*, *antimonium*; Sw. & Mediæv. Lat. *antimonium*; Fr. *antimoine*, wrongly said to be made up of *anti* = against, and *moine* = monk. This form is said to have arisen from the fact that the celebrated alchemist Basil Valentine, who was a German monk, having observed that hogs fattened on antimony, administered some of it to render a similar service to his fellow monks, but found the well-meant prescription attended by fatal results. The narrative is evidently mythic. Hence Morin derives it from Gr. *avri* (*anti*) = against, and *μόνος* (*monos*) = alone, because it is not found alone; an improbable etymology. The word is probably of Arabic origin. In Class. Lat. *stibium* or *stibim*, Gr. *στιβίμη* (*stibimí*), is antimony, or rather sesquisulphuret of antimony.]

**I Chemistry:** Antimony is a triad metallic element, but in some less stable compounds it appears to be pentad. Symbol, Sb; atomic weight, 122; sp. gr., 6.8; melting-point, 450°. It can be distilled, but takes fire when strongly heated in the air, forming Sb<sub>2</sub>O<sub>3</sub>. Antimony is a bright bluish-white, brittle, easily pulverised metal, which occurs as Sb<sub>2</sub>S<sub>3</sub>, and as *cervanite*, Sb<sub>2</sub>O<sub>4</sub>; also as *valentinite* and *senarmonite*, Sb<sub>2</sub>O<sub>3</sub>. The metal is obtained by heating the sulphide with half its weight of metallic iron, or with potassium carbonate. It is oxidised by nitric acid, forming Sb<sub>2</sub>O<sub>3</sub>. Type metal is an alloy of lead with twenty per cent. of antimony. Finely powdered antimony takes fire when thrown into chlorine gas. It forms three oxides: (1) Antimonic Trioxide, or Antimonious Oxide; (2) Antimonic Tetroxide, or Antimonoso-antimonic oxide; and (3) Antimonic Oxide. (See these words.) Antimony also forms bases with alcohol radicles, as *Trimethylstibine*, Sb(CH<sub>3</sub>)<sub>3</sub>. Salts of antimony are used in medicine; in large doses they are poisonous. Antimony is detected by the properties of its sulphide, chloride, and of SbH<sub>3</sub>. It is precipitated by metallic zinc and iron from its solutions as a black powder. Copper is covered by a metallic film. Antimony salts, when fused on charcoal with Na<sub>2</sub>CO<sub>3</sub>, give a white incrustation and a brittle metallic bead, converted by nitric acid into a white oxide soluble in a boiling solution of cream of tartar. Antimony is precipitated by hydric sulphide, H<sub>2</sub>S (see ANALYSES), as an orange-red powder, sulphide of antimony, SbS<sub>3</sub>, which is soluble in sulphide of ammonium, again precipitated by hydrochloric acid. With potash the solution of trichloride of antimony gives a white precipitate of the trioxide, soluble in large excess. Ammonia gives the same precipitate, which is insoluble in large excess; but if tartaric acid is present these precipitates dissolve easily. A liquid containing antimony salts, treated by zinc and dilute sulphuric acid, yields antimoniuretted hydrogen, SbH<sub>3</sub>, which burns with a bluish tinge. A deposit of antimony takes place on a cold porcelain plate held in the flame. This metallic film may be destroyed from arsenic by dissolving it in *aqua regia*, and the solution treated with H<sub>2</sub>S, which gives the characteristic orange sulphide. Or moisten the metallic film with nitric acid, evaporate the acid without boiling, a white deposit of trioxide of antimony remains, which gives a black spot with ammonium nitrate of silver. A film of arsenic treated in the same way gives either a yellow precipitate of arsenite or a red-brown precipitate of arseniate of silver.

**II Mineralogy:** Antimony occurs native, occasionally alloyed with a minute portion of silver, iron, or arsenic. Its crystals are rhombohedral; hardness, 3-3.5; sp. gr., 6.62 to 6.72; its lustre is metallic; its colour and streaks tin white. It is very brittle. It occurs in Sweden, Germany, Austria, France, Borneo, Chili, Mexico, Canada, and New Brunswick.

**Arsenical Antimony:** A mineral, called also Allamontite (q.v.)

**Butter of Antimony:** A name formerly given to the trichloride, or Antimonious Chloride, the formula of which is SbCl<sub>3</sub>. It is a white highly crystalline mass, very deliquescent. It is used as a caustic for foot-rot in sheep.

**Female Antimony.** [Male Antimony.]  
**Glass of Antimony:** An impure oxide of antimony fused.

**Gray Antimony:** A mineral, called also Stibnite (q.v.)

**Male Antimony:** A trivial name sometimes given to a specimen of antimony ore in which veins of a red or golden colour occur, whilst one in which they are wanting is denominated Female Antimony.

**Native Antimony:** A mineral more usually called simply Antimony (q.v.)

**Oxide of Antimony, Oxid of Antimony.** [ANTIMONY OXIDE.]

**Plumose Ore of Antimony, Plumose Antimonial Ore:** (1) A mineral, called also Jamezonite. [FEATHER ORE.] (2) Stibnite (q.v.)

**Red Antimony:** A mineral, called also Kermesite (q.v.)

**Saffron of Antimony:** A compound of oxide and sulphide of antimony. Its formula is Sb<sub>2</sub>S<sub>3</sub>. It occurs also as a mineral, and is then called *Red Antimony Ore*.

**Sulphid of Antimony, Sulphuret of Antimony:** A mineral, called also Stibnite (q.v.)

**White Antimony:** A mineral, called also Valentinite (q.v.)

**III. Pharmacy:**

**Black Antimony** consists of natives sulphide of antimony fused and afterwards powdered. It is not itself used as a drug, but is employed in preparing tartar emetic, sulphurated antimony, and terechloride of antimony. It is given to horses as an alterative powder: 2 parts of sulphur, 1 of saltpetre, and one of black antimony. It is used in the preparation of Bengal signal lights: 6 parts of saltpetre, 2 of sulphur, and 1 of black antimony.

**Chloride of Antimony:** SbCl<sub>3</sub>. A solution of it is used as a caustic and escharotic; it is never given internally.

**Sulphurated Antimony** consists of sulphide of antimony with a small admixture of oxide of antimony. It enters into the composition of compound calomel pills.

**Tartarated Antimony.** [TARTAR EMETIC.]

**antimony blende, antimony bloom, s.** A mineral. The same as VALENTINITE (q.v.)

**antimony glance, s.** A mineral, called also Stibnite (q.v.)

**antimony ochre, s.** A mineral, in part Cervantite and in part Volgerite. [See these words.]

**antimony oxide, oxide of antimony, oxyd of antimony, s.** A mineral, made by Dana the same as Valentinite, and by the Brit. Mus. Cat. synonymous with White Antimony, Senarmonite, Valentinite, Cervantite, and Kermesite (q.v.)

**antimony sulphide, s.** A mineral, called also Stibnite (q.v.)

**án-tí-mór'-al-ísm, s.** [Gr. *avri* (*anti*) = against, and Eng. *moralism*.] Opposition to morals. (Coleridge.)

**án-tí-mór'-al-íst, s.** [Gr. *avri* (*anti*) = against, and Eng. *moralist*.] An opposer of moralists or of morality, or one alleged to be so. (Warburton: *On Prodiges*, p. 26.)

**án-tí-mū'-sío-al, a.** [Gr. *avri* (*anti*) = against, and Eng. *musical*.] Opposed to music, through inability to appreciate it, from want of ear, of early training, or both. (*American Review*.)

**án-tí-ná'-tion-al, a.** [Gr. *avri* (*anti*) = against, and Eng. *national*.] Unpatriotic. (Merivale.)

**án-tí-néph-rít-íc, a. & s.** [Gr. *avri* (*anti*) = against, and *νεφρός* (*nephros*) = a kidney.]

**A. As adjective:** Deemed of use against diseases of the kidneys. (Coxe.)

**B. As substantive:** A medicine given in diseases of the kidneys. (*Glossog. Nova*, 2nd ed.)

**\* án-tín'-óm-a-óy, s.** [Gr. *avri* (*anti*) = instead of, and *νόμος* (*nomos*) = name.]

**Gram.:** A figure in which an appellative is used for a proper name. (*Gloss. Nova*, 2nd ed.)

**ÁN-tí-nō-mí-an, a. & s.** [In Ger. *Antinomier*; Gr. *avri* (*anti*) = against, and *νόμος* (*nomos*) = law, from *νέμω* (*nemō*) = to deal out, to distribute.]

**A. As adjective:** Opposed to the law. Pertaining to the Antinomian sect or to their doctrine. (See the substantive.)

"It is a mad conceit of our Antinomian heretics, that God sees no sin in his elect; whereas he notes and takes, more tenderly, their offences than any other."—*Bp. Hall*: *Rem.*, p. 233.

**B. As substantive.** [In Ger. *Antinomier*; a term first introduced by Luther.]

1. Gen.: One who holds tenets opposed to the authority of the moral law or ten commandments revealed in Scripture. From the apostolic times downward individuals misunderstanding the doctrine of justification by faith "without the deeds of the law" (Rom. lii. 21, 28), have tended to Antinomianism (Rom. vi. 15).

"That doctrine that holds that the covenant of grace is not established upon conditions, and that nothing of performance is required on man's part to give him an interest in it, but only to believe that he is justified; this certainly subverts all the motives of a good life. But this is the doctrine of the Antinomians."—*South*: *Serm.*, vii. 195.

**Spec. (pl.):** A sect which originated with John Agricola, a companion of Luther, about the year 1538. He is said to have held that

bél, bóy; pout, fowl; cat, cell, ohorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -tious, -sious, -cious = shüs. -ble, &c. = bel. -que = k.

as the church is not now under the law, but under the gospel, the ten commandments should not be taught to the people. Enemies said that he or his followers considered that a believer might sin at his pleasure, but this is a believer that has been a calumny. (Mosehm: Church Hist., Cent. xvii, sect. iii, pt. ii. 26.)

¶ Views like those of Agricola were held by some Presbyterians in England during the seventeenth century. (Mosehm: Ch. Hist., Cent. xvii, sect. ii, pt. ii. 22, and note.)

**Ān-ti-nō-mi-an-ism**, s. [Eng. antinomian, and suffix -ism.] The system of doctrine held by the Antinomians.

"Antinomianism began in one minister of this diocese [Norwich], and how much it is spread, I had rather lament than speak."—*Sp. Hall: Rem.*, p. 189.

**Ān-tin-ōm-ist**, s. [Eng. antinom(y); -ist.] An Antinomian.

"Great offenders this way are the libertines and Antinomians, who quite cancel the whole law of God, under the pretence of Christian Liberty."—*Sp. Sanderson: Serm.*, p. 810.

**Ān-tin-ōm-y**, s. [In Fr. antinomie; Sp. & Port. antinomia; Gr. ἀντινομία (antinomia) = an ambiguity in the law: ἀντι (anti) = against, and νόμος (nomos) = law.]

**I. Law:**

1. Gen.: A contradiction between two laws of any kind, or two portions of the same law.

"Antinomies are almost unavoidable in such variety of opinions and answers."—*Baker*.

2. Spec.: A contradiction between the Code and Pandects of Justinian.

"... and the antinomies or contradictions of the Code and Pandects, still exercise the patience and subtlety of modern civilians."—*Gibbon: Decline and Fall*, ch. xlii.

"The antinomies or opposite laws of the Code and Pandects are sometimes the cause, and often the excuse, of the glorious uncertainty of the civil law."—*Ibid.*, Note.

**II. Phil.:** In the Critical Philosophy of Kant, the self-contradiction into which, as he believes, reason falls when it attempts to conceive the complex external phenomena of nature as a cosmos or world.

**Ān-tin-ō-ūs**, s. [Lat. Antinous; Gr. Ἀντινοῦς (Antinoos).] (See Def. I.)

**I. Classical Mythology & History:**

1. One of the suitors of Penelope, Ulysses' queen.

2. A beautiful Bithynian youth, a favourite of the Emperor Adrian. He was drowned in the Nile.

**II. Astronomy:** An old constellation called after the second of these untalities. It was one of the forty-eight recognised by the ancients, and is the only one of all that number which has been degraded from its pristine rank. It is now included under the Northern constellation Aquila.

**Ān-ti-ō-chi-an** (1), a. [From Antiochia, now Antakia, a celebrated city on the Orontes, in Syria, built by Antiochus or Seleucus.] Pertaining to Antioch, in Syria, or any other city of the same name. (Anciently there were several.)

**Chronol.:** The Antiochian epoch was the date of the bestowal of liberty on the city of Antioch, just after the battle of Pharsalia. The Syrians dated it from 1st of October, B.C. 48; the Greeks from September, B.C. 49.

**Ān-ti-ō-chi-an** (2), a. [From the philosopher Antiochus. See def.] Pertaining to Antiochus. The Antiochian Sect or Academy, sometimes called the fifth Academy, was a sect or academy founded by Antiochus, a philosopher, who was contemporary with Cicero. Though nominally an Academic, Antiochus was really a Stoic in his view.

**Ān-ti-ō-dōnt-āl-gic**, a. [Gr. ἀντι (anti) = against; ὀδονραλία (odontalgia) = the toothache; ὀδούς (odous), genit. ὀδόντος (odontos) = a tooth, and ἄλγος (algos) = pain.] Deemed of use against the toothache. (*Castle: Lexic. Pharm.*)

**Ān-ti-ō-pē**, s. [Lat. and Gr.]

1. **Class. Mythology:** The wife of Lycus, king of Thebes. Her history was wild and romantic.

2. **Astronomy:** An asteroid, the ninetyeth found. It was discovered by Luther on the 1st of October, 1866.

**Ān-ti-pō-dō-bāp-tist**, s. [(1) Gr. ἀντι (anti) = against, and (2) Eng. Pedobaptist, from Gr. πᾶσις (pasis), genit. παίδος (paidos) = a child, and βαπτίζω (baptizo) = to baptize.] Opposed to pedobaptists or their procedure in baptism. (*Stillingerlect.*)

**Ān-ti-pā-pal**, a. [Gr. ἀντι (anti) = against, and Eng. papal, from Lat. papa = (1) a father; (2) (in ecclesiastical writers), a bishop, or specially, the pope.] Opposed to the Pope or to Papal doctrine. (*Webster*.)

"... to turn the current, and conciliate the anti-Papal party."—*Froude: Hist. Eng.*, ch. xxi, vol. iv., p. 321.

† **Ān-ti-pā-pism**, s. [In Fr. antipapisme. From Gr. ἀντι (anti) = against, and Lat. papa = a father, . . . the pope.] Opposition to the Pope.

**Ān-ti-pa-pis-tic**, **Ān-ti-pa-pis-tic-al**, a. [Gr. ἀντι (anti) = against, and Eng. papistic, papistical. In Ger. antipapistisch.] Opposed to the Papists or to Papistical doctrine or procedure.

"It is pleasant to see how the most anti-papistical poets are inclined to canonize their friends."—*Jortin: On Mill. Lycaida*.

**Ān-ti-pār-al-lēl**, s. & a. [Gr. ἀντι (anti) = against, and Eng. parallel. In Ger. antiparallel.]

**A. As substantive:**

*In Geometry (plural):*

(a) Lines making equal angles with two other lines, but in the reverse order. If A B and A C be two lines, and F C and F E two others intersecting them in such a manner that the angle D B F is = D E A, and the angle C A D E or B D F, then B C and D E C are anti-parallel to A B and A C, and vice versa. In this case A B : A C :: A E : A D :: D B : E C, and F E : F C :: F B : F D :: D E : B C.

(b) Leibnitz called any two lines anti-parallel which out two parallels so that the external angle and the internal one are together = a right angle.

**B. As adjective:** Acting not in the same manner, but quite in the opposite direction; running in a contrary direction.

"The only way for us, the successors of these ignorant Gentiles, to repair those ruins, to renew the image of God in ourselves, which their idolatrous ignorance defaced, must be to take the opposite course, and to provide our remedy anti-parallel to their disease."—*Hammond: Serm.*, p. 446.

**Ān-ti-pār-a-lyt-ic**, a. & s. [Gr. ἀντι (anti) = against, and Eng. paralytic; Gr. παραλυτικός (paralytikos) = affected with paralysis (the palsy).] [PARALYSIS.]

**A. As adjective:** Deemed of use against the palsy. (*Castle: Lexic. Pharmaceut.*)

**B. As substantive:** A medicine given against the palsy.

**Ān-ti-pār-a-lyt-ic-al**, a. [Gr. ἀντι (anti) = against, and Eng. paralytic(al).] The same as ANTI-PARALYTIC, adj. (q.v.).

† **Ān-ti-pār-ās-ta-sis**, s. [Gr. ἀντι (anti) = opposite, and παράστασις (parastasis) = a putting aside or away; παρίστημι (paristēmi) = to place by or beside.]

**Rhet.:** The admission of one part of an opponent's argument coupled with a denial of the rest.

**Ān-ti-pa-thēt-ic**, \* **Ān-ti-pa-thēt-ic-al**, **Ān-ti-pa-thēt-ic-al**, a. [Gr. ἀντι (anti) = against, and Eng. pathetic(al).] Having an antipathy or contrariety to. (It is opposed to sympathetic.)

"[Being] try'd upon the sledge, a pleat and a protestant in front, two and two together, being two very desperate and antipathetic companions, was a very ridiculous scene of cruelty."—*Icon Libell.*, p. 110.

"The circumstances of moral, religious, sympathetic, and antipathetic sensibility, when closely considered, will appear to be included in some sort under that of beat of inclination."—*Bouring: Bentham's Works*, vol. I, p. 24.

"The soil is fat and luxurious, and antipathetical to all venomous creatures."—*Howell: Local Forest*.

**Ān-ti-pa-thēt-ic-al-ness**, s. [Eng. antipathetical; -ness.] The quality or state of

having a contrariety or antipathy to. (*Johnson*.)

**Ān-ti-pāth-ic**, a. [In Fr. antipathique; Sp. & Ital. antipatico; Port. antipático; Gr. ἀντιπαθής (antipathēs) = (1) in return for suffering, (2) of opposite feelings or properties.]

- 1. Gen.: Having opposite feelings.
- 2. Med.: The same as ALLOPATHIC (q.v.).

**Ān-tip-a-thicē**, v. t. [Eng. antipath(y); -tic.] To be opposed to. (Usually followed by against.) (*Adams: Works*, iii. 157.)

**Ān-tip-a-thite**, s. [Eng. antipath(y); -tic.] One who has an aversion to anything.

"An antipathite to virtue."—*Falcham: Resolves*, 56. [*Richardson*].

**Ān-tip-a-thous**, a. [Eng. antipath(y); -ous.] Having an aversion to; in contrariety to.

"As if she saw something antipathous Unto her virtuous life."—*Beaumont & Flit.: Queen of Corinth*, III. 2.

**Ān-tip-a-thy**, s. [In Dan. antipathi; Dut. Ger. & Fr. antipathie; Sp. & Ital. antipatia; Port. & Lat. antipathia, from Gr. ἀντιπαθεία (antipatheia) = an opposite feeling, aversion; ἀντιπαθεῖν (antipatheō) = to have an aversion; ἀντι (anti) = against, and παθεῖν (patheō), 2 aor. inf. of πάσχω (paschō) = to suffer; also πάθος (pathos) = suffering, feeling.]

**A. Ordinary Language:**

1. Of beings susceptible of emotion: The state of feeling exactly the contrary to what another feels; the opposite of sympathy. Antipathy may be strong or weak; it may be founded on contrariety of nature, and therefore be permanent; or it may arise from something local, conventional, or temporary, in which case it may pass away. The natural result of this pronounced contrariety of feeling is a drawing back from, an aversion to, a hatred of. Though really a distinct meaning from the former, the two are so closely connected that they are scarcely ever dissevered. Antipathy is used—

- (a) Of man to man. "Antipathy; ill will, viz. towards this or that particular individual."—*Bouring: Bentham's Works*, vol. I, p. 218. "Antipathy or resentment requires always to be regulated, to prevent its doing mischief."—*Ibid.*, vol. I, p. 11. "The personal sad perpetual antipathy he had for that family."—*Goldsmith: The Bee*, no. vii.
- (b) Of man to any of the inferior animals, or of them to him, or to each other. "Antipathies are odors. No foe to man Lurks in the serpent's bow: the wretched seer, And smiles to see, her infant's playful hand Stretch'd forth to daily with the crested worm, To stroke his azure neck, or to receive The lambent homage of his airy tongue."—*Cooper: Task*, bk. vi.

(c) Of man to an inanimate thing, or to what is abstract in place of concrete.

"A man may cry out against it, of policy; but he cannot abhor it but by virtue of a godly antipathy against it."—*Bunyan: The Pilgrim's Progress*, pt. I.

¶ Hatred is entertained against persons; antipathy is felt to persons or things; and repugnancy to actions which one is called on to perform.

2. Of inanimate things, or of abstractions: Mutual repulsion, as that of oil and water, or certain other chemical substances to each other, or figuratively, of good and evil.

"All concords and discords of music are, no doubt, sympathies and antipathies of sounds."—*Bacon: Nat. Hist.*, Cent. III., § 278.

"Another ill accident is, if the seed happen to have touched oil, or anything that is fat, for those substances have an antipathy with nourishment of water."—*Ibid.*, Cent. vii., § 663.

"Ask you what provocation I have had? The strong antipathy of good to bad. When truth or virtue an affront endures, Th' affront is mine, my friend, and should be yours."—*Pope: Epilogue to Satires*.

¶ Formerly antipathy might be followed by with; now to, against, or for is used. (See the examples already given.)

**B. Technically:**

1. Med.: Internal horror and distress on the perception of particular objects, with great restlessness or with fainting. (*Copland: Dict. Pract. Med.*, 1858.)

2. Painting: The mixing of incongruous colours, such as purple with yellow, or green with red, the result being that the brilliancy of the respective colours is destroyed and a very dark gray is produced.

**Ān-ti-pā-tri-ōt-ic**, a. [Gr. ἀντι (anti) = against, and Eng. patriotic.] Opposed to patriotic conduct. (*Webster*.)

fate, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hōr, thēre; pine, pīt, sire, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; try, Sŷrian. æ, œ = ē. ey = ā. qu = kw.

án-tí-pá-tri-ó-tism, s. [Gr. ávri (anti) = against, and Eng. patriotism.] Unpatriotic conduct. (Carlyle.)

án-tí-pē-dō-bāp-tíst, s. [ANTI-PÉDOBAPTIST.]

án-tí-pēr-i-ód'-lo, a. [Gr. ávri (anti) = against, and Eng. periodic.]

A. As adjective: Designed to counteract periodic fevers.

"... the anti-periodic remedies, such as quinine or arsenical solution."—Dr. Joseph Brown: Cycl. Pract. Med., vol. II, p. 224.

B. As substantive: A medicine designed to cure diseases like intermittent fever, which return at periodic times. They consist (a) of various remedies derived from the cinchona tree, viz., "bark," the salts of quinine, quinidine, cinchonine, and cinchonidine; (b) of arsenical solution; (c) of the sulphate of zinc; and (d) of various bitters and combinations of them, with aromatics. Garrod combines "anti-periodics" with "nervine tonics," and places them as the second order of his Class II., Sub-class 3.

"... and if the anti-periodic be employed in this cure."—Dr. Joseph Brown: Cycl. Pract. Med., vol. II, p. 227.

án-tí-pēr-y-stál'-sís, s. [Gr. ávri (anti) = against, and περυσταλτικός (peristaltikos) = clapping and compressing; περυστέλλω (peristello) = to dress, to clothe: wepl (peri) = around, and στέλλω (stello) = to set, to send.] Resistance to the peristaltic motion of the bowels. [PERISTALTIC.]

"But Dr. Brunton has very ably shown that there is no anti-peristalsis of the bowels under these circumstances."—Todd & Bowman: Physiol. Anat., vol. II, p. 237.

án-tí-pēr-y-stál'-tíe, a. [Gr. ávri (anti) = against, and Eng. peristaltic.] In Fr. peristaltique; Port. antiperistaltico. Opposed to peristaltic (q.v.), or pertaining to anti-peristalsis. [PERISTALTIC.]

"... an inverted direction of the action of the muscular tissue of the intestines (anti-peristaltic action)."—Todd & Bowman: Physiol. Anat., vol. II, p. 237.

án-tí-pēr-ís-tá-sís, s. [In Ger. antipertissis; Sp. antipertissias; Gr. ávriπερισσασ (antipertissias); ávri (anti) = against, and περισσασ (pertissas) = a standing round, . . . circumstances; περισσῆται (pertissētai) = to stand round: wepl (peri) = round about, and ἵστέται (hístētai) = to make to stand.] A term used by Aristotle and others to signify the heightening of any quality by the reaction produced in it by the action of its opposite. Thus in warm countries the influence of even hot air blowing on water in porous vessels is to cool the water. So also an unjust attack on one's character will often raise instead of impairing it.

"Bacon uses the Greek accusative. . . . which is that they term cold or hot per antipertissias, that is, envying by contraries."—Bacon: Works (ed. 1769), vol. I; Colours of Good and Evil, ch. vii, p. 441.

án-tí-pēr-i-stát'-íc, a. [Gr. ávri (anti) = against, and Eng. peristaltic.] Pertaining to antipertissias. (Ash.)

án-tí-pēs-tí-lén'-tial, a. [Gr. ávri (anti) = against, and Eng. pestilential. In Fr. antipestilential; Sp. antipestilenal.] Counteracting pestilential influences; checking contagion and infection.

"Perfumes correct the air before it is attracted by the lungs; or, rather, anti-pestilential, to antidote the nostrils with."—Harvey on the Plague.

án-tí-phár-ý-sá'-íc, a. [Gr. ávri (anti) = against, and Eng. pharisaic.] Against the Pharisees, their tenets or procedure.

"... the anti-pharisaic discourse, Matt. xxiii."—Strauss: Life of Jesus (transl. 1846), § 117.

án-tí-phí-l-ó-sóph'-ý-cal, a. [Gr. ávri (anti) = against, and Eng. philosophical. In Fr. antiphilosophique.] Opposed to philosophy.

án-tí-phló-gís-tí-an, s. [Gr. ávri (anti) = against, and φλόγιω (phlogiō) = to set on fire, to burn; φλόξ (phlox) = a flame.] One opposed to the old doctrine of Phlogiston (q.v.).

án-tí-phló-gís-tío, \*án-tí-phló-gís-tíck, a. & s. [Gr. ávri (anti) = against, and Eng. phlogistic.]

A. As adjective:

1. Med.: Tending to counteract burning heat; anti-febrile.

"I soon discovered . . . under what circumstances recourse was to be had to the lancet, and the antiphlogistic regimen."—Sir W. Ferriar, on the Marriatic Acid, p. 8.

"... and the antiphlogistic remedies alone persevered in."—Dr. Joseph Brown: Cycl. of Pract. Med., vol. II, p. 227.

2. Chem.: Opposed to the old doctrine of phlogiston. [PHLOGISTON.]

B. As substantive: A medicine designed to counteract phlogistic tendencies.

"It is both unctuous and penetrating, a powerful antiphlogistic, and preservative against eorrution and infection."—Bp. Berkeley: Sírta, 59.

\*án-tí-phón, s. [ANTIPHONY.]

án-tí-ph-ón-al, a. & s. [Eng. antiphon; -al.]

A. As adjective: Pertaining to antiphony. [ANTIPHONY, (2).]

"Antiphonal singing was first brought into the Church of Milan, in imitation of the custom of the Eastern churches."—Bingham: Christian Antiquities (ed. 1855), vol. v, p. 13.

"He [Calvin] thought that novelty was sure to succeed, that the practice of antiphonal chanting was superstitious."—Warton: Hist. Eng. Poet., II, 164.

B. As substantive: The same as ANTIPHONARY (q.v.).

"... to bring and deliver unto you all antiphonas, missals, gráyles, processions, &c."—Burnet: Hist. Reformed Records, pt. II, bk. I, 47.

án-tí-ph-ón-ar-ý, \*án-tí-ph-ón-óre, \*án-tí-ph-ón-ér, \*án-tí-ph-ón-ár (Mediev. Lat.), s. [In Fr. antiphonaire, antiphonier; from Gr. αντίφωνος (antiphōnos) = (1) an accord in the octave; (2) an antiphon, an anthem.] A service-book compiled by Pope Gregory the Great. It comprised all the inventories, responsories, collects, and whatever else was sung or said in the choir except the lessons. From the responses contained in it, it was sometimes called responsorium. Similar compilations, or books of anthems, also received the name of antiphonaries. In 1424 two antiphonaries bought for a small monastery in Norfolk cost £52 = at least £200 of modern English money. [ANTHEM.]

"He O alma redemptoris herde synges, As children learneth her antiphonere."—Chaucer: C. T., 14,980.

án-tí-ph-ón-ét'-íc, a. [Gr. ávri (anti) = opposite, and Eng. phonetic (q.v.).] Answering to, rhyming. (Barham: Ingoldsby Legends; Cynotaph.)

án-tí-ph-ón-ýc, án-tí-ph-ón-ýc-al, a. [Eng. antiphon; -ýc; -ýc-al. In Gr. αντίφωνος (antiphōnos).] Pertaining to antiphony.

"... they sung in an antiphonal way."—Whateley on the Common Prayer, p. 161.

án-tí-ph-ón-ý, án-tí-ph-ón, \*án-tí-ph-ón-ý, s. [In Ger. antiphonie; Ital. antiphona; Gr. αντίφωνη (antiphōnē) = to sound in answer; ávri (anti) = against, and φωνή (phōnē) = to sound; φωνή (phōnē) = a sound.]

1. Opposition or contrariety of sound.

"True it is that the harmony of music, whether it be in song or instrument, hath sympathy by antiphony (that is to say), the accord ariseth from discord, and of contrary notes is composed a sweet tune."—Holland: Plutarck, p. 186. (Richardson.)

2. The alternate chanting or singing in a cathedral, or similar service by the choir, divided into two parts for the purpose, and usually sitting upon opposite sides. It is sometimes used also when the parts are repeated instead of sung. Antiphony differs from symphony, for in the latter case the whole choir sing the same part. It also differs from responsorium, in which the verse is spoken or sung by only one person instead of many.

"In antiphons thus true we female plaints."—Old Play, vii, 497. (Nares.)

"These are the pretty responsories, these are the dear antiphonas, that so bewitched of late our prelates and their chaplains, with the goodly sobo they made."—Milton: Arop.

"Then came the epistla, prayers, antiphones, and a benediction."—Macaulay: Hist. Eng., chap. xiv.

"... when the antiphones are chanted, one party singing, with fury and gnashing of teeth."—De Quincey: Works (ed. 1859), vol. II, Note, pp. 180-1.

3. The words given out to be sung by alternate choirs.

"... this [alternate psalmody] for its division into two parts and its extreme antiquity, was commonly called antiphony."—Bingham: Christian Antiquities (ed. 1855), vol. v, p. 13.

4. A composition made of several verses taken from different psalms, the expressions of sentiment in which are appropriate to the occasion for which the antiphony is prepared.

án-tí-ph-rás-tíc, án-tí-ph-rás-tíc-al, a. [Gr. αντίφραστικός (antiphrastrtikos).] Pertaining to antiphraasis.

án-tí-ph-rás-tíc-al-ý, adv. [Eng. antiphrastrtical; -ý.] In an antiphrastrtical manner; in the form of speech called antiphraasis.

"The unreluctance of those men, and the virulence thereof, none hath more felt than myself, as well in his book of Attraction, as in his (antiphrastrtically so called) Sober Reckoning."—Bp. Merton's Discharge, p. 205.

án-tí-ph-thís-ýc, án-tí-ph-thís-ýc-al (ph silent), a. [Gr. ávri (anti) = against, and φθιστικός (phthistikos) = consumptive; φθίσις (phthisis) = consumption; φθίω (phthiō) = to decay.] Given against consumption. (Glossog. Nov., 2nd ed.)

án-tí-phýs-ýc-al, a. [Gr. ávri (anti) = against, and Eng. physical; from Gr. φυσικός (phusikos) = natural; φύσις (phusis) = nature.] Contrary to physics, that is, to Nature or to natural law. (Webster.)

án-tí-plēur-ít-ýc, \*án-tí-plēur-ít-ýc-al, s. [Gr. ávri (anti) = against, and Eng. pleuritic.] A medicine given against pleurisy (Glossog. Nov., 2nd ed.)

án-tí-pód-ág-ýc, a. & s. [Gr. ávri (anti) = against, and ποδάγικός (podagrikos) = gouty; ποδάγρα (podagra) = (1) a trap for the feet, (2) gout (Lat. podagra = gout; πούς (pous), genit. ποδός (podos) = a foot, and άγρα (agra) = hunting.]

A. As adjective: Deemed of use against the gout.

B. As substantive: A medicine given against the gout; an antarthritic. (Glossog. Nov., 2nd ed.)

án-típ-ód-al, a. & s. [Eng. antipode(s); -al. In Port. antipodal.]

A. As adjective: Pertaining to the antipodes, or the part of the world which they inhabit.

B. As substantive: One inhaling the other side of the world from that in which the speaker or writer is. [ANTIPODES.]

"The Americans are antipodals unto the Indians."—Broune.

†án-tí-póde, †án-tí-póde (sing.); án-típ-ó-deg, án-típ-ó-deg (plur.), s. [In Sw. & Dan. antipoder (pl.); Ger. antipoden (pl.); Fr. antipode (sing.), antipodes (pl.); Sp. & Port. antipoda (sing.); Ital. antipodi (pl.); Lat. antipodes (pl.); Gr. αντίποδες (antipodes), pl. of αντίπους (antipous) (a word first introduced by Plato) = with the feet opposite. From ávri (anti) = opposite to, and πούς (pous) = a foot; ποδός (podos) = feet.]

¶ Rare in the singular, common in the plural.

I. Lit. (Plur.): People who, from their situation on the globe, have their feet opposite to those of the speaker or writer who applies to them the term antipodes. For example, if Greenwich Observatory is in lat. 51° 28' N., and long. 0° E. or W., then the antipodes, if any exist, of the astronomers at Greenwich must be sought in lat. 51° 28' S. and long. 180° E. or W. That point falls in the ocean S.E. of New Zealand, near Antipodia Island. Those who are our antipodes have seasons exactly like those of our land, but reversed in time, their shortest day being our longest, their winter our summer, and vice versa.

II. Met.: Something exactly and completely opposed or opposite to another.

án-típ-ó-de-an, a. & s. [Eng. antipode(s); suff. -an.]

A. As adj.: Pertaining to the antipodes.

B. As subst.: One who lives at the antipodes

án-típ-ó-deg, s. pl. [ANTIPODES.]

ból, bóy; pout, jówl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -in-

-tion, -sion = shún; -tion, -sion = zhún. -tious, -sious, -cious = shús. -ble, -dle, &c. = bel, del. -tial = shal.

**án-tí-póí-son, s.** [Gr. *ávri* (*anti*) = against, and Eng. *poison*.] An antidote to poison of some kind or other.

**án-tí-pópe, s.** [Gr. *ávri* (*anti*) = against, and Eng. *pope*. In Fr. *antipape*; Sp. & Ital. *antipapa*.] One who usurps the popedom, in opposition to the individual elected in the normal way.

"This house is famous in history for the retreat of an *antipope*, who called himself Felix V."—*Addison*.

**án-tí-póp-u-lar, a.** [Gr. *ávri* (*anti*) = against, and Eng. *popular*.] Against the interests or opinions of the people.

"The last two tables are the work of the second decemviri, whose government was *anti-popular*."—*Lewis: Crad. Early Rom. Hist.*, ch. xli, pt. iii., § 54.

**án-tí-pórt, s.** [In Ital. *antiporta*, *antiporto*, from Gr. *ávri* (*anti*) = opposite to, and Lat. *porta* = a city gate, a gate.] An outer gate; an outer door.

"If a Christian or Jew should but lift up the *antipórt*, and set one step into it, he profaned it."—*Smith: Mann. of the Turks*, p. 78.

**án-tí-prác-tise, v. i.** [Gr. *ávri* (*anti*) = against, and Eng. *practise*.] To oppose. (*Hacket: Life of Williams*, i. 195.)

**án-tí-pré-lát-ic, \*án-tí-pré-lát-ick, \*án-tí-pré-lát-ic-al, a.** [Gr. *ávri* (*anti*) = against, and Eng. *prelate*; *-ic-al*.] Opposed to prelates or to prelaty.

"The rosters, the *anti-prelatich* party, declaim against us."—*Sir E. Dering: Speeches*, p. 161.

**án-tí-priést, s.** [Gr. *ávri* (*anti*) = against, and Eng. *priest*.] One opposed to priests.

"While they are afraid of being guided by priests, they consent to be governed by *anti-priests*."—*Waterland: Ch.*, p. 28.

**án-tí-priést-craft, s.** [Gr. *ávri* (*anti*) = against, and Eng. *priestcraft*.] Opposition to priestcraft.

"I hope she [the Church of England] is secure from lay bigotry and *anti-priestcraft*."—*Burke: Speech on the Claims of the Church*.

**án-tí-sor-ic, a.** [From Gr. *ávri* (*anti*) = against, and Eng. *psoric*. From Lat. *psora*, Gr. *ψώρα* (*psóra*) = the itch or the mange; *ψάω* (*psáo*), or *ψύω* (*psóō*) = to rub. In Fr. *antipsorique*.] Deemed of use against the itch. (*Webster*.)

**án-típ-tó-sis, s.** [In Fr. & Port. *antipérose*; Gr. *αντιπρωσις* (*antiprósis*) = (1) a falling against, (2) (*In Gram.*, see below); *αντιπρωσ* (*antiprósis*) = to fall against; *ávri* (*anti*) = against, and *πρωσ* (*prósis*) = to fall.]

*Grammar*: An interchange of one case for another. (*Glossog. Nov.*, 2nd ed.)

**án-tí-púr-í-tan, s. & a.** [Gr. *ávri* (*anti*) = against, and Eng. *puritan*.]

**A. As substantive**: One opposed to the Puritans or to Puritanism.

"... Dr. Samuel Parker, famous for his tergiversation with the times, now an *anti-puritan* in the extreme."—*Warton: Notes to Milton's Smaller Poems*, p. 501.

**B. As adjective**: Opposed to Puritanism.

"... the purification of our lighter literature from that foul taint which had been contracted during the *anti-puritan* reaction."—*Mooresley: Hist. Eng.*, chap. xiv.

**án-tí-púr-ét-ic, a. & s.** [Gr. *ávri* (*anti*) = against, and Eng. *pyretic*. From Gr. *πυρετός* (*pyretos*) = (1) fiery heat, (2) fever; *πύρ* (*pur*) = fire. In Port. *antipyretico*.]

**A. As adj.**: Deemed of use against fever.

**B. As substantive**: A medicine given against fever. (*Glossog. Nov.*, 2nd ed.)

**án-tí-púr-in, s.** A preventive of or remedy for fever; spec. dimethylxyloquinizin.

**án-tí-quár-í-an, a. & s.** [In Sw. *antiquarie*, s.; Dan. *antiquarist*, a., *antiquarius*, a.; Ger. *Antiquar*, a. From Lat. *antiquarius*, a. & s.]

**A. As adjective**: Pertaining to antiquarians or to antiquity; antique, old.

"The belief in an original year of ten months was prevalent among the *antiquarian* and historical writers of Rome."—*Lewis: Astron. of the Ancients*, chap. i., § 3.

**B. As substantive**:

1. An antiquary.

"Thus Cincius is described by Livy as being a diligent *antiquarian*, in relation to events prior to his own age."—*Lewis: Early Rom. Hist.*, chap. li., § 2.

2. A large kind of drawing paper.

**án-tí-quár-í-an-ism, s.** [Eng. *antiquarian*; *-ism*.] Love of antiquities or of antiquarian research.

"I used to despise him for his *antiquarianism*."—*Warburton, Letter 221*.

**\*án-tí-quár-í-sm, s.** [Eng. *antiquary*; *-ism*.] The same as ANTIQUARIANISM (q.v.).

"... a question above *antiquarianism*."—*Brown: Hydrorophtha*.

**án-tí-quar-ý, s. & a.** [In Ger. *antiquar*; Fr. *antiquaire*; Sp, Port., & Ital. *antiquario*; from Lat. *antiquarius*, s. & a.]

**A. As substantive**:

1. Originally: A keeper of the *antiquarium* or cabinet of antiquities. (Henry VIII. called John Leland his *antiquary*.)

2. A student of antiquity, or rather of the relics, such as inscriptions, old buildings, manuscripts, &c., which antiquity has left behind.

"With sharpen'd sight pale *antiquaries* pore, Th' inscription value, but the rust adore."—*Pope*.

**B. As adjective**: Antique, old.

"Here's Nestor,

Instructed by the *antiquary* times;

He must, he is, he cannot but be wise."

*Shakespeare: Troilus and Cressida*, ii. 2.

**án-tí-quáte, v. t.** [In Port. *antiquar*. From Lat. *antiquatus*, pa. par. of *antiquo* = to restore a thing to its former condition.] To render anything out of date, and therefore presumably less valuable than once it was. To render obsolete. When a law becomes antiquated it is rarely put in force, if indeed it is not swept from the statute-book.

"The growth of Christianity in this kingdom might reasonably introduce new laws, and *antiquate* or abrogate some old ones, that seemed less consistent with the Christian doctrine."—*Tate*.

¶ The verb is rarely used except in its past participle.

**án-tí-quá-téd, pa. par. & a.** [ANTIQUATE.]

**As adjective**:

1. Out of date, obsolete, of less value than formerly; superseded, abrogated.

"Almighty Latium, with her cities crown'd, Shall like an *antiquated* fable sound."—*Addison*.

2. Made to imitate antiquity.

"In reading a style judiciously *antiquated*, one finds a pleasure not unlike that of traveling on an old Roman way."—*Pope: Homer's Odyssey*, Postscript.

† 3. Old, but in no wise out of date.

"The *antiquated* earth, as one might say,"

*Wordsworth: Sonnet to a Friend* (1807).

**án-tí-quá-téd-néss, †án-tí-quáte-néss, s.** [Eng. *antiquated*, *-ness*; *antiquate*, *-ness*.] The quality or state of being out of date, obsolete, or superseded.

"... that no one may pretend *antiquateness* of the Old Testament."—*Appendix to Life of Mede*, xii.

**án-tí-quá-tion, s.** [Lat. *antiquatio* = an abrogating, an annulling; from *antiquo*, v. t.] The act or process of rendering obsolete; the state of being rendered obsolete. *Spec.*, used of the antiquation of a law, which is properly its repeal or abrogation, but is sometimes more loosely used for the refusal to pass it when it appears as a bill for discussion.

"You bring forth now, great queen, as you foresaw,

An *antiquation* of the *salutic law*."

*Chapman: The Queen*.

"Reason is a law

High and divine, engrav'd in every breast,

Which must no change nor *antiquation* know."

*Beaumont: Psyche*, xv. 164.

"... *antiquation*, which is the refusing to pass a law."—*Encyc. Lond.*

**án-tí-que, \*án-tí-que, a. & s.** [In Ger. *antik*, a., *antike*, s.; Fr. *antique*, a. & s.; Ital. *antico*, s. From Lat. *antiquus* = former, old, ancient; ante = before.]

**A. As adjective**:

1. Ancient, old, that has long existed. It may be used (a) in the geological sense = of an age measured by millions of years; or (b) historically = prior to the birth of Christ; or (c) mediæval; or (d) having been long in existence compared with others of its kind. [ANCIENT, ANTIQUITY.]

"... a rock very different in age from the *antique* and crystalline gneiss of Scotland and Scandinavia."—*Murchison: Siluria*, ch. xiv.

"The seals which we have remaining of Julius Cæsar, which we know to be *antique*, have the star of Venus over them."—*Dryden*.

"Huge convent domes with pinnacles and towers,

And *antique* castles seen through drizzling showers."

*Wordsworth: Descriptive Sketches*.

2. Old-fashioned, antiquated.

"The first, if I remember, is a sort of a buff waistcoat, made *antique* fashion. . . ."

*Goldsmith: The Bee*, No. 11.

3. Odd, antic. (See ANTIC, which was originally the same word as antique.)

"And sooner may a galling weather-spy, By drawing forth heav'n's scheme, tell certainly, Whil' fashion'd hats, or ruffs, or suits, next year Our giddy-headed *antique* youth will wear."

*Donne*.

**B. As substantive**, it is frequently used in the plural ANTIQUES = such busts, statues, vases, &c., as have come down from classic antiquity, and are prized for their value as works of genius and art no less than for the light they throw on the life of the old world.

"Misshapen monuments and maim'd *antiques*."

*Byron: Eng. Bards & Scotch Reviewers*.

**án-tí-que-lý, adv.** [Eng. *antique*; *-ly*.] In an antique manner; after the manner of antiquity. (*Webster*.)

**án-tí-que-néss, s.** [Eng. *antique*; *-ness*.] The quality of being antique.

"We may discover something venerable in the *antiqueness* of the work."—*Addison*.

**án-tí-ques, s. pl.** [ANTIQUE.]

**án-tí-que-ri-án (ui = wi), s.** [Eng. *antiquary*; *-arian*.] One who praisés bygone days; a mediævalist. (*Milton: Of Ref. in Eng.*, bk. i.)

**án-tí-que-ri-ty (ui = wi), s. pl.** [ANTIQUITY.]

**án-tí-que-ri-ty, \*án-tí-que-ri-ty (ui = wi), s.** [Fr. *antiquité*, from Lat. *antiquitas*, *antiquus* = ancient.]

**A. Singular**:

1. The state of having existed long ago; the state of being ancient.

1. *By the geological standard*: Vast and uncertain age.

"Inferiority in position is connected with the superior *antiquity* of granite."—*Lyell: Manual of Geol.*, 4th ed., ch. xxxiv.

*Antiquity of man*: The specific term applied to the hypothesis now generally accepted by geologists and other scientific investigators as correct, that man came into being not later than the glacial period, if indeed he did not exist in pre-glacial times. From the historic point of view this makes him very "antique," though by the geological standard the date of his birth is exceedingly modern. (*Lyell: Antiquity of Man*.)

2. *By the historic standard*:

(a) Ancient times, especially those from the earliest known period to the fall of the Roman empire.

"I mention Aristotle, Polybius, and Cicero, the greatest philosopher, the most impartial historian, and the most consummate statesman, all *antiquity*."—*Addison*.

(b) Sometimes the word in this sense is used much more vaguely.

"From a period of immemorial *antiquity* it had been the practice of every English government to contract debts."—*Mooresley: Hist. Eng.*, ch. iii.

3. *By the standard of human or other life or existence*. *Ludicrously*: Old age.

"Par. Hadst thou not the privilege of *antiquity* upon thee?"—*Shakespeare: All's Well*, ii. 3.

II. The ancients, the people who lived during the times mentioned under No. 2.

"Wherefore doth value *antiquitie* so vaunt?"

*Spenser: Sonnet on Scanderberg*.

**B. Plural**. Antiquities signify such coins, inscriptions, statues, weapons, sepulchral urns, ruined edifices, nay, even manuscripts, as have come down to us from the classical and other nations of antiquity, or from the early period of our own country's history. They are valued as confirming, checking, or enlarging the information given by historians, or in some cases as laying the basis for reconstructing the most outstanding events connected with nations or periods regarding which ordinary histories are silent.

"So of histories we may find three kinds: Memorials, Perfect Histories, and *Antiquities*; for memorials are history unfinished, or the first or rough draughts of history; and *antiquities* are history defaced, or some remnants of history which have casually escaped the shipwreck of time."—*Bacon: Adv. of Learn.*, bk. ii.

**án-tí-rhéo-a, s.** [Gr. *ávri* (*anti*) = against; *ρῆος* (*rhéos*) = to flow. Named from being used against hæmorrhage.] A genus of plants belonging to the order Cinchonoceæ (*Cinchonads*). The species are found in Mauritius and Bourbon. The root and bark of the *A. verticillata* are believed to be very astringent.

**án-tí-rhéu-mát-ío (h silent), a. & s.** [Gr. *ávri* (*anti*) = against, and Eng. *rheumatic*.]

1. **As adjective**: Deemed of use against rheumatism.

ábe, fát, fáre, amidst, whát, fáll, father; wé, wét, hère, camél, hër, thère; pine, píť, síre, sír, marine; gó, póť, or, wére, wólf, wórť, whó, són; müte, cüb, cüre, unite, cür, rüle, füll; trý, Sýrian. lýre. æ, œ = é. qu = kw.

2. As substantive: A medicine given against rheumatism.

án-tí-rév-ó-lú-tion-ar-ý, a. [Gr. ávri (anti) = against, and Eng. revolutionary. In Fr. antirévolutionnaire.] Opposed to political, and especially to sanguinary, revolution.

"... to disgorge their anti-revolutionary pelf." - Burke; Republic Peace.

án-tí-rév-ó-lú-tion-íst, s. [Gr. ávri (anti) = against, and Eng. revolutionary.] One opposed to revolution or to revolutionary parties.

"... the apartment called by the anti-revolutionists, the plotting parlour." - Guthrie; Eng.

án-tír-rhí-núm (h silent), s. [In Sp., Port., & Ital. antirrhino. From Lat. antirrhinum, a plant, Lychnis githago (?); Gr. ávtríppivov (antirrhinon) = snap-dragon; ávri (anti) = compared with; rís (rhís), genit. rívós (rhinos) = the nose. Nose-like.] Snap-dragon. A

ANTIRRHINUM MAJUS.

1 Upper portion of a plant of Antirrhinum majus (Snapdragon). 2 Corolla cut open, showing stamens. 3 Ripe fruit.

genus of plants belonging to the order Scrophulariaceae, or Fig-worts. The A. Orontium, or Lesser Snapdragon, is wild, and the A. majus, or Great Snapdragon, naturalized in Britain.

án-tí-rú'-mouír, v.t. [Gr. ávri (anti), and Eng. rumour.] To spread a report contrary to one generally current. (Fuller: Ch. Hist., III. viii., § 14.)

án-tí-sáb-ba-tà'r-i-an, s. [Gr. ávri (anti) = against, and Eng. Sabbatarian.] One who holds that the Jewish Sabbath was part of the ceremonial rather than of the moral law, and that, in its essential character, it is different from the "Lord's Day" of the New Testament.

"The anti-sabbatarians hold the sabbath day, or that which we call the Lord's day, to be no more a sabbath: in which they go about to violate all religion; for take away the sabbath, and farewell religion." - Pagn: Heterography, p. 119.

án-tí-sá'-hí-an, a. [Gr. ávri (anti) = against, and Eng. Sabian (q.v.).] Opposed to Sabianism, that is, to the worship of the heavenly bodies. (Faber.)

án-tí-sá'-ér-dó'-tal, a. [Gr. ávri (anti) = against, and Eng. sacerdotal.] Opposed to the priestly office or procedure.

"The charge of such sacerdotal craft hath often been unjustly laid by anti-sacerdotal pride or resentment." - Waterland; Ch., p. 68.

án-tí-schó-lás-tic, a. [Gr. ávri (anti) = against, and Eng. scholastic.] Opposed to what is scholastic. (S. T. Coleridge.)

án-ti-sc-í-an-s (so as sh), án-tis'-cí-i, s. pl. [In Fr. antiscien; Lat. anticis; Gr. ávtrískios (antískiot); ávri (anti) = opposite, and scia (scia) = a shadow.] [ANTYCI.]

Geog. & Astron.: Two acts of people, whose shadow at the same moment fall in opposite directions. The parties south of the tropic of Capricorn are always antiscian to those north of the tropic of Cancer, and vice versá.

án-tí-sc-or-bú-tic, \*án-tí-sc-or-bú-tick, a. & s. [Gr. ávri (anti) = against, and Eng. scorbutic; Ger. antiscorbutisch; Fr. antiscorbutique; Sp., Port. & Ital. antiscorbutico.]

A. As adjective: Deemed of use against scurvy. (Glossog. Nov., 2nd ed.)

B. As substantive: A medicine deemed of use against scurvy.

án-tí-sc-or-bú-tic-al, a. [Eng. antiscorbutic; -al.] [ANTISCORBUTIC.]

\*án-tí-script, s. [Gr. ávri (anti) = against, and Lat. scriptum = something written; scribo = . . . to write.] A writing directed against (any person or thing).

"His highness read the charges, and admired at the virulence; by the antiscrípits of the keeper, which were much commended." - Hacket: Life of Archbishop Williams (1699), p. 129.

án-tí-scrip-tú-ral, a. [Gr. ávri (anti) = against, and Eng. scriptural.] Opposed to Scripture. (Webster.)

án-tí-scrip-tú-rism, s. [Gr. ávri (anti) = against, and Eng. scripture; -ism.] Opposition to Scripture.

"New that anti-scripturism grows apace, and spreads so fast . . ." - Boyle on the Style of the H. S., p. 146.

án-tí-scrip-tú-ríst, s. [Gr. ávri (anti) = against, and Eng. scripturist (q.v.).] One opposed to Scripture.

"Not now to mention what is by atheists and anti-scripturists alleged to overthrow the truth and authority of the Scripture." - Boyle.

án-tí-scróf'-u-lóus, a. & s. [Gr. ávri (anti) = against, and Eng. scrofulous. In Fr. antiscrofuloux.]

A. As adjective: Deemed of use against scrofula.

B. As substantive: A medicine given against scrofula.

án-tí-sép'-tic, \*án-tí-sép'-tick, a. & s. [In Ger. antiseptisch; Fr. antiseptique; Port. antiseptico; Gr. ávri (anti) = against, and séptos (séptos) = putrid, decayed; séptō (séptō) = to make rotten or putrid.]

A. As adjective: Counteracting the tendency to putrefaction.

"... the gastric fluid itself, which, according to all observers, is remarkably antiseptic, being capable of checking the further progress of putrefaction in meat in which that process has already begun." - Todd & Bowman: Physiol. Anat., vol. II. (1856), p. 302.

B. As substantive: A substance which has the effect of counteracting the tendency to putrefaction. Garrod makes "Disinfectants and Antiseptics" the second order of his "Division III. Chemical agents used for other than their medicinal properties." Antiseptics prevent chemical change by destroying the activity of the infectious matter, the chemical composition of the body still in many cases remaining the same; while disinfectants decompose and remove the infectious matter itself. Antiseptics are called also COLYRICS (q.v.). Among them may be named carbolic acid, alcohol, sulphurous acid, chloride of sodium (common salt), corrosive sublimate, arsenic, &c.

án-tí-sép'-tic-al, a. [Eng. antiseptic; -al.] Pertaining to an antiseptic; counteracting the tendency to putrefaction.

án-tí-slá'-vēr-ý, a. & s. [Gr. ávri (anti) = against, and Eng. slavery.]

1. As adjective: Opposed to slavery.

2. As substantive: Opposition to slavery. (Webster.)

án-tí-só'-cial (cial = shal), a. [Gr. ávri (anti) = against, and Eng. social. In Fr. anti-social.]

1. Opposed to social intercourse, averse to society; loving solitude. (Webster.)

2. Opposed to the principle on which society is constituted. (Webster.)

án-tis'-pa-sis, s. [In Port. antipase; Gr. ávtrispasís (antispasís) = a drawing back of the humours of the body; ávtrispáō (antispáō) = to draw the contrary way; ávri (anti) = against, and páō (spáō) = to draw.]

Med.: The revulsion of any fluid in the body from one part to another.

án-tí-spás-mód-ic, \*án-tí-spás-mód-ick, a. & s. [From Gr. ávri (anti) = against, and Eng. spasmodic. In Fr. antispasmodique; Port. antispasmodico. From Gr. ávtrispasmos (antispasmos) = an anti-spasmodic; ávri (anti) = back, and spasmos (spasmos) = (1) a drawing, (2) a convulsion; páō (spáō) = to draw.]

A. As adjective: Deemed of use against spasms or convulsions.

B. As substantive: A medicine designed to counteract or allay spasm. Garrod makes anti-spasmodics the 1st order of his Sub-class 3. They are of two kinds; (1) Direct Antispasmodics, or Spinal Tonics, of which the chief are asafoetida, valerian, musk, castor,

various oils, camphor, &c.; (2) Indirect Antispasmodica, as conium, bromide of potassium, salts of silver, hydrocyanic acid, belladonna, atromonium, henbane, opium, chloroform, &c. (Garrod: Materia Medica.)

án-tí-spás, án-tí-spás'-tús, s. [Lat. antispastus; Gr. ávtrispastos (antispastos) = an antispast; from ávtrispáō (antispáō) = to draw the contrary way; ávri (anti), and páō (spáō) = to draw.]

Prosody: A foot consisting of four syllables, the first and fourth short, and the second and third long: as mē | dūl | lō | sūs.

án-tí-spás'-tic, \*án-tí-spás'-tick, a. & s. [From Gr. ávri (anti) = against, and Eng. spastic (q.v.); or from Gr. ávtrispastos (antispastos) = drawn in contrary directions.]

A. As adjective:

\* I. Medicine:

1. Pertaining to antispasla; believed to cause a revulsion of fluids from one part of the body to the other. (Johnson.)

2. Antispasmodic. (Webster.)

II. Prosody: Pertaining to an antispast.

B. As substantive:

1. A medicine believed to cause a revulsion of fluids from one part of the body to the other. (Glossog. Nova.)

2. An antispasmodic. (Webster.)

án-tí-splē-nēt'-ic, \*án-tí-splē-nēt'-ick, a. & s. [Gr. ávri (anti) = against, and Eng. splenetic.]

A. As adjective: Deemed of use against disease of the spleen.

B. As substantive: A medicine given against disease of the spleen.

"Antisplenetics open the obstructions of the spleen." - Flower.

án-tis'-ta-sis, s. [In Ger. antistase; Gr. ávtristasis (antistasis) = standing against, opposition; ávri (anti) = against, and stásis (stasis) = (1) a placing, (2) a standing; istámi (histēmi) = to make to stand.]

Rhetoric: A defence of any action on the ground that what was done was the lesser of two evils.

án-tis'-tēs (plural án-tis'-tí-tēs), s. [Lat.] (1) A president of any kind; (2) a high-priest.

"He tells what the Christians had wont to do in their several congregations, to read and expound, to pray and administer, all which he the *apostolus*, or *antistes*, did." - Milton: Of Prel. Episcopacy.

"Unless they had as many *antistes* as presbyters." - Ibid.

án-tis-tró-phē, án-tis-tró-phý, s. [In Ger. & Fr. antistrophe; Port. antistrophe, antistrophe. From Gr. ávtristrophē (antistrophē) = a turning about; ávtristrophō (antistrophō) = to turn to the opposite side; ávri (anti) = opposite to, and strophō (strophō) = to twist, to turn.]

I. Ancient Choruses and Dances:

1. The returning of the chorus, exactly answering to a previous atrophe, except that now they moved from left to right, instead of from right to left.

2. The lines of the poem or choral song sung during this movement.

"It was customary, on some occasions, to dance round the altar, whilst they sang the sacred hymns, which consisted of three stanzas or parts; the first of which, called *strophē*, was sung in turning from east to west; the other, named *antistrophē*, in returning from west to east; then they stood before the altar and sung the *epode*, which was the last part of the song." - Potter: Antiq. of Greece, bk. II. chap. 4.

III. Rhetoric: The figure of retortion.

III. Logic: Aristotle's designation for the conversion or transposition of the terms of a proposition.

IV. Grammar: An inverted construction.

V. Relation of one thing to another.

"The latter branch touching impression, hath not been collected into art, but hath been handled dispersedly; and it hath the same relation or antistrophe that the former hath." - Bacon: Adv. of Learn., bk. II.

án-tí-stróph'-ic, a. [Eng. antistrophe; -ic.] Pertaining to an antistrophe. (Webster.)

án-tis-tró-phōn, s. [Gr. ávtristrophos (antistrophos) = turned opposite ways.] The turning of an argument on the person who used it.

"That he may know what it is to be a child, and yet to meddle with edged tools, I turned his *antistrophon* upon his own head." - Milton: Apol. For Smeagmismus

**án-tí-strú-mát'-íc, a. & s.** [Gr. *ávρι* (*anti*) = against, and Lat. *struma* = a scrofulous tumour; *struma*.]

**A. As adjective:** Counteracting or mitigating the strumous, that is, the scrofulous constitution.

**B. As substantive:** A medicine believed to have some effect in counteracting or mitigating the strumous constitution.

"I prescribed him a distilled milk, with *antí-strumátick*, and purged him."—*Wise*man.

**án-tí-strú-mous, a.** [ANTISTRUMATIC.] The same as ANTISTRUMATIC (q.v.). (*Webster*.)

**án-tí-sýph-ý-lít'-ýo, e.** [Gr. *ávρι* (*anti*) = against, and Eng. *sýphilitic*. In Fr. *antisyphilitique*.] Believed to be of use against syphilis. (*Castle: Lexicon Pharm.*)

**án-tí-tác'-tæ, án-tí-tác'-tæs, s. pl.** [Latinised from Gr. *ávριόσω* (*antílasso*) = (1) to range in battle, (2) to counteract, to resist; *ávρι* (*anti*) = against, and *ράσω* (*tasso*) = to arrange.]

*Church Hist.*: A Gnostic sect who maintained that not God but a creature had created evil.

**án-tí-tar-tár'-ýo, a.** [Gr. *ávρι* (*anti*) = against, and Eng. *tartaric*.] Opposed to TARTARIC (q.v.).

**anti-tartaric acid.** An acid differing from tartaric acid in this remarkable respect, that whereas the latter turns the plane of polarisation to the right, this does it to the left. If the two be mixed together they lose all influence on polarised light. (*Graham: Chem., vol. ii., p. 478.*)

**án-tí-thé'-ísm, s.** [Gr. *ávρι* (*anti*) = against, and Eng. *theism*. Or from *ávριθεός* (*antitheos*), a., in the sense of opposed to God; for in Homer it means god-like, equal to the gods.] Opposition to God or to belief in His existence. (*Chalmers*.)

**án-tí-thé'-íst, s.** [Gr. *ávρι* (*anti*) = against, and Eng. *theist*.] One who opposes the belief in a God. The antitheist takes a more decided stand against them than the atheist does. (*Webster*.)

**án-tí-thé-íst'-íc-ál, a.** [Gr. *ávρι* (*anti*) = against, and Eng. *theist*, *ical*. Or Eng. *antitheist*; -*ical*.] Opposed to theism; contending against the belief in God. (*Webster*.)

**án-tí-thé-íst'-íc-ál-ý, adv.** [Eng. *antitheistical*; -*ly*.] After the manner of an antitheist; with active opposition to belief in God. (*Webster*.)

**án-títh'-én-ar, s.** [Gr. *ávρι* (*anti*) = against, and *éναρ* (*henar*) = the palm of the hand, the sole of the foot.]

*Anat.*: One of the muscles which extend the thumb. (*Glossog. Nova, 2nd ed.*)

**án-títh'-ð-sis** (pl. **án-títh'-ð-sés**), s. [In Sw. *antithes*; Dan. & Ger. *antithese*; Fr. *antithèse*; Sp. *antitesis*, *antiteto*; Port. *antithese*, *antithesis*; Ital. *antitesi*; Gr. *ávριθεσις* (*antithesis*) = opposition, from *ávριθήμι* (*antithēmi*) = to set against, oppose; *ávρι* (*anti*) = against, and *θήμι* (*thēmi*) = to set or place.]

*Rhet.*: Sharp opposition or contrast between word and word, clause and clause, sentence and sentence, or sentiment and sentiment, especially designed to impress the listener or reader.

¶ Macanley's writings are full of antitheses, of which the following may serve as examples: as "He had covertly shot at Cromwell, he now openly aimed at the Queen." (*Hist. Eng., ch. v.*) "But blood alone did not satisfy Jeffreys; he filled his coffers by the sale of pardons." (*Ibid., ch. xvii.*)

¶ *Antithesis* or opposition.—*Coleridge: Aids to Reflection* (1829), p. 129.

"... the habitual *antithesis* of prose and poetry, fact and fiction."—*Herbert Spencer, 2nd ed., vol. ii., p. 632, § 491.*

"Atheos, the man-goddess, born from the head of Zeus, without a mother, and without feminine sympathies, is the *antithesis* partly of Aphrodite."—*Grote: Hist. of Greece* (1846), vol. i., pt. 1, ch. 1, p. 74.

¶ The plural is still in the Greek form *antitheses*.

"I see a chief who leads my chosen sons, All arm'd with points, *antitheses*, and puns."—*Pope*.

**án-tí-thét', s.** [ANTITHETON.] An opposite statement or position. (*C. Kingsley: Two Years Ago, ch. xxvi.*)

**án-títh'-è-ta, s. pl.** The pl. of ANTITHETON (q.v.).

**án-tí-thét'-ýc, án-tí-thét'-ýc-ál, a.** [In Fr. *antithétique*; Sp. *antitético*. From Gr. *ávριθητικός* (*antithētikos*).]

**A. Ordinary Language:** Pertaining to or marked by the presence of an antithesis.

"The antithetical group of cases."—*Herbert Spencer: Psychology, 2nd ed., vol. ii., p. 64, § 293.*

**B. Technically:**

\* *Old Chem.* *Antithetic* or *polar formulæ* are formulæ written on two lines instead of one. In the upper line are placed all the negative constituents, and in the lower the positive.

**án-tí-thét'-ýc-ál-ý, adv.** [Eng. *antithetical*; -*ly*.] In an antithetical manner; with sharp contrast.

"Antithetically opposed divisions."—*Herbert Spencer: Psychology, 2nd ed., vol. ii., p. 811, § 387.*

**án-títh'-è-tón, s.** [Lat. and Gr. *ávριθετον* (*antitheton*).] An antithesis.

In the plural: Antitheta; in the *Instructions for Oratory* (1661) erroneously made *antithetas*. These are argued for and against.

"*Antitheta* are these argued *pro et contra*."—*Bacon: Adv. of Learn., ch. ii.*

**án-tí-tòx'-in, án-tí-tòx'-ine, s.** The serum of the blood of a horse that has been inoculated with diphtheritic material; used as a subcutaneous injection for the cure of diphtheria.

"The experiments with diphtheria antitoxine serum yield satisfactory results wherever the famous remedy is applied."—*N. Y. Herald, Jan. 19, 1895.*

**án-tít'-ra-gús, s.** [Gr. *ávρι* (*anti*) = opposite to, and Lat. *tragus*, Gr. *τράγος* (*tragos*).] [TRAGUS.] A portion of the external ear opposite the tragus and beneath the concha.

"Opposite this [the tragus], behind and below the concha, is the *antitragus*."—*Todd & Bowman: Physiol. Anat., vol. ii., p. 64.*

**án-tí-trín-ý-tár-ý-an, a. & s.** [Eng. *anti-trinity*; suffix *-arian*. In Ger. *antitrinitarisch*, a.; *antitrinitarier*, s.; Port. *antitrinitario*.]

1. *As adjective:* Opposed to the doctrine of the Trinity.

2. *As substantive:* One opposed to the doctrine of the Trinity.

"The *antitrinitarians* have renewed Arise's old heresy; and they are called *antitrinitarians*, because they blaspheme and violate the Holy Trinity."—*Pagitt: Heresiography, p. 116.*

**án-tí-trín-ý-tár-ý-an-ýsm, s.** [Gr. *ávρι* (*anti*) = against, and Eng. *trinitarianism*.] The system of doctrine of which the essential feature is a denial of the doctrine of the Trinity. (*Webster*.)

**án-tít'-rò-pal, án-tít'-rò-poús, a.** [Gr. *ávρι* (*anti*) = opposite to, and *ρόπος* (*tropos*) = a turn, direction; *τρέπω* (*trepō*) = to turn.]

*Bot.*: A term applied to an embryo which is inverted so as to have the radicle at the extremity of the seed most remote from the hilum. The sacs of the ovule are in no degree inverted, but have their common point of origin at the hilum, the raphe and chalazæ being necessarily invisibles. (*Lindley: Introd. to Bot.*)

**án-tí-týp'-al, a.** [Eng. *antitype*(s); -*al*.] Of the nature of an antitype (q.v.). (*C. Kingsley: Yeast, Epil.*)

**án-tí-týp'e, s.** [In Sp. *antitipo*; Gr. *ávριτύπος* (*antitupos*) = (1) repelled by a hard body; echoed, echoing; (2) corresponding as the stamp to the die; *ávρι* (*anti*) = opposite to, and *τύπος* (*tupos*) = (1) a blow, (2) that which is produced by a blow; *τύπος* (*tupos*) = to impress, to stamp; *τύπτω* (*typtō*) = to strike.]

1. *Gen.*: That which corresponds to something else, as a stamp does to the die by which it was struck off.

"... and the observant Friars, with their chain geroles and shirts of hair, were the *antitipes* of Parsons and Campion."—*Froude: Hist. Eng., vol. ii., p. 178.*

2. *Theol.*: He who or that which in the New Testament corresponded exactly to the types of the Old—namely, Christ or his atoning death.

"He brought forth bread and wine, and was the priest of the most high God; imitating the *antitype* or substance, Christ himself."—*Taylor*.

3. *Among the ancient Greek fathers, and in the Greek liturgy:* A term applied to the symbols of bread and wine in the sacrament.

**án-tí-týp'-ýc-ál, a.** [Gr. *ávρι* (*anti*) = against, and *τύπος*; or Eng. *antitype*, and -*ical*.] Pertaining to an antitype. (*Johnson*.)

**án-tí-týp'-ýc-ál-ý, adv.** [Eng. *antitypical*; -*ly*.] In an antitypical manner; by way of antitype. (*Webster*.)

**án-tí-tý'-pous, a.** [Eng. *antitype*; -*ous*.] The same as ANTIPTYPICAL.

**án-tí-vác-cín-á'-tion, s.** [Gr. *ávρι* (*anti*) = against, and Eng. *vaccination*.] Opposition to vaccination. (*Times, Oct. 29, 1878.*)

**án-tí-vác-cín-á'-tion-íst, s.** [Eng. *antivaccination*; -*ist*.]

1. One opposed to vaccination, as believing it to be injurious to the human frame.

"... to describe *antivaccinationists* as a 'school' is to push satire to the verge of cruelty."—*Times, Nov. 15th, 1876.*

2. One who, though deeming vaccination beneficial, is yet opposed to the law which renders it compulsory, as believing that such an enactment is inconsistent with proper civil liberty.

**án-tí-va-rí'-ól-ous, a.** [Gr. *ávρι* (*anti*) = against, and Eng. *variolous*, from *Mediæv. Lat. variola* = small-pox.] Deemed to be protective against the contagion of the small-pox. (*Med. Repos.*) (*Webster*.)

**án-tí-vén-è-r-è-ál, a.** [Gr. *ávρι* (*anti*) = against, and Eng. *venereal*. In Ger. *antivenereisch*; Fr. *antivénérien*; Port. & Ital. *antivenereo*.] Believed to counteract or resist venereal poison.

"... you will scarce cure your patient without exhibiting *antivenereal* remedies."—*Wise*man.

**ánt-jár, s.** [From *antiar* or *antschar*, its Javanite name.] A poison made from the upas tree of Java, *Antiaris toxicaria*. [ANTIRIAS.]

**ánt-lér, s.** [Fr. *andouiller* = a brow-antler.]

1. Properly the first branch, but now used for any ramification of the horns on the head of any animal of the deer family. The lowest furcation, that nearest the head, is called the *brow-antler*; and the branch next above it, the *bes-antler*.

"Huge stags with sixteen *antlers*."—*Macaulay: Hist. Eng., ch. vii.*

2. (Pl.) The solid deciduous horns of any animal of the deer family.

"Richardson figures a pair of *antlers* of the wild reindeer with twenty-nine points."—*Darwin: Descent of Man, pt. ii., ch. xvii.*

3. A moth, the *Choreax* or *Cerapteryx graminis*. It is of the family Noctuidæ. It is

ANTLER MOTH.

of a brown colour, with a white line on the upper wings, and a row of black marks at the apex of each. The caterpillar, which is brown with yellow streaks, feeds on grass. It occurs in England, but not abundantly.

**ánt-lòred, a.** [Eng. *antler*; -*ed*.] Furnished with antlers.

"The *antler's* monarch of the waste Springs from his heathery couch in haste."—*Scott: Lady of the Lake, l. 2.*

**ánt-ly-a, s.** [Lat. *antlia* = a machine for drawing water; a pump; Gr. *άντλία* (*antlia*) = (1) the hold of a ship, (2) bilge-water.]

*Entom.*: The spiral proboscis of the Lepidopterous order of insects. It "is formed by the

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pine, pít, síre, sír, marine; gô, pôt, er, wôre, wôlf, wôrk, whô, sôn; müte, cüb, cüre, unite, cür, rûle, füll; trý, Sýrian. æ, œ = é. ey = â. qu = kw.

elongated slender maxillae, still characterised by the minute palpi at their base. The inner margins of the maxillae are concave, and the edges of the channels are in close contact, or are confluent, so as to form a canal along which the juices of the flowers can be pumped up into the mouth. The large labial palpi defend the antlia when it is retracted and coiled up. (Owen: Comp. Anat. Invert. Animals.)

Ant-ll-s, s. [See preceding.]

Astron.: An abbreviation for Antlia Pneumatica (the Air-pump), one of the Southern constellations introduced by Lacaille.

Ant-li-ā-ta, s. pl. [Mod. Lat. = furnished with a sucker, like a pump.] The name given by Fabricius to the Dipterous order of insects; but as antlia is now confined to the spiral sucker of the Lepidoptera, Antliata, as a synonym for Diptera, would be misleading.

Ant'-līng, s. [Eng. ant; dimin. suff. -ling.] A young ant. (McCook: Agric. Ant of Texas, p. 20.)

Ant-ō-ē-gī (Lat.), Ant-ō-ē-gī-ans, Ant-ō-ē-gī-ans (Eng.), s. pl. [Gr. plur. of ἀντοικός (antōikos) = living in an opposite latitude; anti (anti) = opposite to, and οἰκίω (oikēō) = to inhabit, from οἶκος (oikos) = a house.] Persons living in the same latitude north and south of the equator, as well as in the same longitude. The identity of longitude makes them have exactly the same hours, but the difference of N. and S. in the latitude causes the seasons of the one to be opposite to those of the other, and the length of any day in the one to be exactly equal to the same night of the other. [ANTISCIANS.]

Ant-ōn-ō-mā-ā-gī-a (Lat.), Ant-ōn-ō-mā-ā-gī (Eng.), s. [Gr. antonomasia; Fr. antonomase; Lat. antonomasia; Gr. ἀντωνομασία (antonomasia) = (1) a different name; (2) see def.; ἀντωνομαζέω (antonomazéō) = to name instead; ἀντί (anti) = instead of, and ονομαζέω (onomazéō) = to name; ονομα (onoma) = name.] The designating of a person not by his actual surname, but by his office, rank, dignity, or even by his trade, his country, &c.; as Her Majesty, His Grace, the Hon. Member for Oxford University, the learned counsel, the great commander, the shameless mendicant, "a Daniel come to judgment."

Ant-ōn-ō-mās-tio-al-lý, adv. [From Lat., Gr., & Eng. antonomasia (q.v.).] In a way to involve the rhetorical figure antonomasia.

Ant-tō-ným, s. [Gr. αντί (anti) = against, opposite; ονομα (onoma) = a name, a word.] A word expressing the reverse of any other word; the opposite to a synonym: thus bad is an antonym of good.

Ant-ō-sī-ān-dri-an, s. [Gr. αντί (anti) = against, and Osiander.] One of a religious party opposed to Andrew Osiander, a theological professor at Künigsberg from 1548, who called that redemption which Luther regarded as justification, and that justification which the great German reformer denominated sanctification. The Antosiadrians were strongly Lutherans.

Ant-ō-zōne, s. & a. [Gr. αντί (anti) = against; and Eng., &c., ozone (q.v.).]

1. As substantive: In the opinion of Schönbein, a permanently positive variety of oxygen, opposed to ozone, which he holds to be a permanently negative one. Inactive oxygen he considers to be a produce of the union of the two. Meissner agrees with him, and states that ordinary oxygen is resolved by electrification into ozone and antozone; the former is absorbed by iodide of potassium, pyrogallic acid, &c., while the latter remains unabsorbed. Antozone has been found by Engler and Nasae to be nothing but hydrogen peroxide, H<sub>2</sub>O<sub>2</sub>. (Watts: Chem., Suppl. II.)

"The dark violet-blue fuzor of Welsendorf, Bavaria, afforded Schrötter 0.02 per cent. of ozone, which Schönbein showed to be antozone."—Dana: Min., 4th ed., p. 124.

2. As adjective: Pertaining to antozone, a (q.v.).

"Its strong antozone odour (that of Antozonite) is said often to produce headache and vomiting in the miners."—Dana: Min., 4th ed., p. 124.

Ant-ō-zōn-ite, s. [Eng. &c., antozone (q.v.), and suff. -ite.] A mineral, a variety of Fluorite or Fluor. Dana divides Fluor into (1) Ordinary; (2) Antozonite of Schönbein. The latter is a dark violet-blue mineral, found at Welsendorf, in Bavaria. [ANTOZONE.]

\*An-tre, s. [Fr. antre; Lat. antrum = a cave.] A cave, a cavern, a den.

"With all my travel's history, Wherein of antres vast, and deserts idle, It was my bent to speak." Shakespeare: Othello, I. 2.

An-trim-ō-lite, s. [Named from Antrim, in Ireland, where it is found; suffix -ite = Gr. λίθος (lithos) = a stone.] A variety of Mesolite. Its hardness is 3-5-4; its sp. gr., 2.006.

An-trūm, a. [Lat. = a cave.] 1. Anat.: A term used for several parts of the body which have a cave-like appearance. Thus antrum pylori is the great concavity of the stomach approaching the pylorus; antrum buccinosum is the cochlea of the ear, and antrum genae is the maxillary sinus. 2. Bot.: A name given by Mench to the kind of fruit called by Lindley Pomum, an apple or pome. (Lindley: Introduct. to Botany.)

A-nū, s. [Assyrian.] Assyrian Myth.: The first great deity of the upper Triad: Anu = Heaven; Elu or Bel = Earth; and Hea = Hades. The Accadians regarded him as the spirit or fetish of heaven; while the Assyrians elevated him to the high position of the Greek Zeus or the Latin Jupiter. (Boscawen: quoted in Mr. W. R. Cooper's Archaic Dict., 1876.)

A-nū-bis, s. [Old Coptic (?).] 1. An Egyptian god represented with the head of a dog, or rather of a jackal. Mr. Cooper describes him as the chief deity presiding over the mummied or other dead.

"The brutish gods of Nile as fast, Isis, and Orus, and the dog Anubis haste." Milton: Odes, I.

2. Zool. Anubis zerda, the Sabora of the Arabs, and the Megalotis famelicus of naturalists, is a fennec found in Kordofan, and believed by Professor Kretschmer to be the animal taken for a jackal on Egyptian temples and on the catacombs of Thebes. (Jardine: Naturalist's Library, vol. IV. (Dogs), p. 235.)

\*an-ūn-dēr, prep. [ANONDER.] Under. (Scotch.)

ā-nūs, s. [In Fr. anus; Lat., m.] The lower or posterior opening of the alimentary canal.

a-nū's-wā-ṛa, a-nū's-wār, s. [Sanskrit.] Philol.: A nasal sound given to certain letters in the Indian languages.

"Secondly, this anuvādra is in most languages pronounced as a distinct . . . nose intonation."—Beames: Compar. Gram. of the Aryan Lang. of India, vol. I. (1872), p. 296.

an-vil, \*ānd-vile, \*ān-vild, \*ān-vilt, s. [A.S. anfil, anfil. In Dan. amboit; Dut. anveeld, from aan = to, at, in, upon; and veeld = image, statue, figure. On this etymology an anvil is that on which things are built or fashioned. So in Latin, incus is from in-cudo = to forge with a hammer, to fabricate; in = upon, and cudo = to strike, beat, pound, or knock. An anvil, then, is that on which anything is fabricated by being struck.]

ANVIL

1. A mass of iron or other material, smooth above, on which a smith hammers into the required form the metal which has been previously softened by heating it in a furnace.

"So dreadfully he did the anvilite beat, That seem'd to dust he shortly would it drive." Spenser: F. Q., IV. v. 37.

2. Anything on which blows are laid.

"Here I slip The anvil of my sword, and do contest Hotly and nobly."—Shaksp.: Coriol., iv. 5. To be on the anvil, means to be contemplated, to be in process of preparation, to be in process of being hammered into presentable shape by public discussion or private conference. (It is used especially of measures sought to be carried into law.)

"Several members of our house, knowing what was upon the anvil, went to the clergy and desired their judgment."—Swift.

an'-vil, v. t. [From the substantive.] To fashion on an anvil.

¶ Used chiefly in the pa. par. (q.v.).

an'-villed, pa. par. Fashioned on an anvil. " . . . with all care put on The stearest armour anvil'd in the shop Of our present fortitude." Beaumont & Flot.: Lovers Progress, iv. 1.

†ān-x-ī-ō-tūde, s. [Late Lat. anxietudo = anxiety.] Anxiety (q.v.).

ān-x-ī-ō-ty, s. In Fr. anxiété; Port. anxiedade; Ital. ansietà; Lat. anxietas, from anxius.] [ANXIOUS.]

1. Ord. Lang.: Trouble, solicitude, or mental distress, on discerning the seeming approach of a future event which it is believed will, on its arrival, inflict on one loss, injury, or sorrow, and which one fails clearly to see any practicable means of averting.

"Another week of anxiety and agitation passed away."—Macaulay: Hist. Eng., ch. viii.

2. Med.: Lowness of spirits, restlessness, with uneasiness of the stomach.

"In anxieties which attend fevers, when the cold fit is over, a warmer regimen may be allowed; and because anxieties often happen by spasms from wind, spices are useful."—Arbuthnot.

anxious (ānk-shūs), adj. [In Fr. anxieux; Sp. & Itsl. ansioso; Port. ansioso; Lat. anxius, from ango = to press tightly, to strangle.] [ANXER.]

1. Very much troubled and solicitous about some future event of a nature likely to be painful to one, and which one knows no means of averting.

"Our days are number'd, let us spare Our anxious hearts a needless care." Cooper: Gulon's Love of God.

2. Inspiring anxiety; such as cannot be contemplated without some measure of doubt and fear.

"An anxious duty! which the lofty sate, Far from all public road or beaten way . . ." Wordsworth: Excursion, bk. v.

"And, reading here his sentence, how replete With anxious meaning, heavenward turn his eye!" Cooper: Bill of Mortality (1763).

3. Eagerly desirous (to do something).

"He smears alike at those who are anxious to preserve, and at those who are eager for reform."—Macaulay: Hist. Eng., ch. II.

¶ Anxious is followed by a verb in the infinitive, or by about, concerning, or for, of the noun designating the object of solicitude.

"No writings we need to be solicitous about the meaning of, but those that contain truths we are to believe, or laws we are to obey; we may be less anxious about the sense of other authors."—Locke.

¶ The phrase anxious of is rare or obsolete.

"Anxious of neglect, suspecting change."—Granville.

anxiously (ānk-shūs-lý), adv. [Eng. anxious; -ly.] In an anxious manner, solicitously.

" . . . and the members asked each other anxiously whether it was likely that the Abjuration and money bills would be passed before he died."—Macaulay: Hist. Eng., ch. xxv.

anxiousness (ānk-shūs-něss), s. [Eng. anxious; -ness.] The state or quality of being anxious.

" . . . her cards, to which she returns with no little anxiousness till two or three in the morning."—Addison: Spectator, No. 79.

any, \*anie, \*ani (ēn-ý), a. [A.S. ænig, æneg, ang = any, any one; from an = one, and suffix -ig = Eng. -ic = having. In Dut. eenig; Ger. einige.] At least one, if not even a few. Used—

1. As a singular:

(a) Of persons or living existences, not excluding the Supreme Being himself. (It is used in opposition to no or none.)

"And David said, Is there yet any that is left of the house of Saul, that I may shew him kindness for Jonathan's sake?"—2 Sam. ix. 1.

"Is there a God beside me? yes, there is no God; I know not any."—Isa. xlv. 8.

(b) Of things, in the most extensive sense; an amount small, but not precisely defined of anything; or some.

"The was of him fer ear hi-foun, Or awi wredles time boren." Story of Gen. and Exod. (ed. Morris), 47, 48. "They loved armes, and knighthood did ensue, Seeking adventures where they anie knew." Spenser: F. Q. IV. ii. 46. "There be many that say, Who will shew us any god?"—Ps. lv. 6.

2. As a plural: Any living beings, any persons, any things.

"If he found any of this way, whether they were men or women, he might bring them bound unto Jerusalem."—Acts ix. 2.

anybody (en'-y-bod-y), s. [Eng. any; body.] Any person.

"His Majesty could not keep any secret from anybody."—Macaulay: Hist. Eng., chap. xli.

¶ Whilist the expression "anybody," appelled as one word, is applied to persons, as in the foregoing example, "any body" standing as two distinct words, is used only of material things, as the human body, a planet, &c.

anyhow (en'-y-how), adv. [Eng. any; how.] At any rate, any way, some way or other, in any case. (Colloquial.)

anything, any-thing, any thing (en'-y-thing), s. [Eng. any; thing.]

1. Any thing; something or other.

"... or in any thing of a kind."—Lev. xlii. 57.

2. (Personified.)

"... also Mr. Smoothman, Mr. Facing-both-ways, Mr. Anything."—Bunyan: P. P., pt. 1.

anything-ar-i-an, (anything as en'-y-thing), s. [Eng. anything; -arian.] A person indifferent to all creeds. (C. Kingsley: Alton Locke, ch. xxii.)

anything-ar-i-an-ism (anything as en'-y-thing), s. [Eng. anythingarian; -ism.] Indifference to religious matters.

anywhere (en'-y-where), adv. [Eng. any; where.] In any place. (Locke.)

† any while, † any while (en'-y-while), adv. [Eng. any; while.] Any time; for any length of time.

"... and calling unto him the centurion, he asked him whether he had been any while dead."—Mark xv. 44.

† anywhither, † any-whither (en'-y-whith-er), adv. [Eng. any and whither.] To any place.

"This profit is the bait, by which you may inveigle most men any-whither."—Barrow: Works, i. 9.

† anywise, † any-wise, † any wise (en'-y-wise), adv. [Eng. any; wise.] In any way, in any manner, in any respect; to any extent.

"How can he be any-wise rich, who doth want all the best things, . . ."—Barrow: Works, i. 16.

¶ When any wise are made separate words the proposition in may be put before them.

"And if he that sanctified the field will in any wise redeem it . . ."—Lev. xxvii. 19.

A-ō-ni-an, a. [From Aonia: see definition.]

1. Lit.: Pertaining to the region of Aonia, in Bœotia, said to be inhabited by the Aones, descendants of a son of Neptune. It contained the mountains Helicon and Cithæron, sacred to the Muses, who from their supposed residence in the district were called Aonides.

2. Fig.: Pertaining to the Muses. "And they are sure of bread who swink and moil; But a fell tribe th' Aonian hive despoil." Thomson: Castle of Indolence, li. 2.

ā-or-ist, s. & a. [In Ger. aorist; Fr. aoriste; Sp., Port., & Ital., aoristo; Gr. aōριστος (aoristos) = an aorist: from adj. aōριστος (aoristos) = without boundaries, from ā, priv., and ὁρίζω (horizō) = to separate by a boundary; ὅρος (horos) = a boundary.]

A. As substantive (Greek Grammar): A tense expressing time of an indefinite date or character. In English the phrase "He went," is properly an aorist, as no information is given as to when the action spoken of was performed. Greek verbs have two aorists, a first and a second; but, as a rule, only one of them is generally used.

B. As adjective: Like an aorist; indefinite in time.

ā-or-is'-tic, ā-or-is'-tic-al, a. [In Ger. aoristisch; from Gr. aōριστικός (aoristikos) = pertaining to an aorist; indeterminate, like an aorist.]

1. Pertaining to an aorist.  
2. Like an aorist, indefinite in point of time.

a-or'-ta, s. [In Fr. aorte; Sp. & Port. aorta; Gr. ἀορτή (aortē) = (1) In pl., the lower extremities of the windpipe; (2) later & sing., the aorta (see def.). From ἀείρω (aierō) = to lift.] The largest artery in the human body, and the main trunk of the arterial system itself. It takes its departure from the upper part of the left ventricle of the heart, whence it runs upward and to the right, at that part of its progress being called the ascending aorta; then it turns to the left, passes the spinal column, and bending downwards forms the arch of the aorta. Continuing its course along to the left of the spine, it is called the descending aorta. Passing through the aperture in the diaphragm into the abdomen, it becomes the abdominal aorta. Finally, it bifurcates about the fourth pair of lumbar vertebrae, and forms the two primitive iliac arteries. Upwards from the heart the ramifications are numerous and exceedingly important. The aorta has three valves called the sigmoid or semi-lunar valves, to prevent the reflux of the blood into the heart.

a-or'-tal, a. [Eng. aorta; suff. -al.] Pertaining to the aorta; aortic. (Webster.)

a-or'-tic, a. [Eng. aorta; suff. -ic.] Pertaining to the aorta. (Cycl. Pract. Med., i. 110.)

Aortic arch, or Arch of the aorta: The name applied to that downward bend of the aorta which takes place just after that great artery has turned to the left, passing in front of the spinal column.

Aortic Bulb: The first portion of the ventricle whence an artery springs. It is dilated and surrounded by muscular fibres.

ā-or-ti'-tis, s. [Gr. ἀορτή (aortē) = the aorta; -itis (itis) = inflammation.]

Med.: A disease; inflammation of the aorta.

ā-ō-tēs, \* ā-ō-tūs (Humboldt), s. [Gr. ā, priv., and οὖς (ous), genit. ὠτός (ōtos) = the ear.] A genus of very short-eared monkeys belonging to the family Cebidæ, or American monkeys with prehensile tails. The A. forestigatus of Humboldt inhabits the thick forests adjacent to the Cassiquiare and the Upper Orinoco.

a-ōū-dād, s. [Native name.] The Ammotragus tragelaphus, a remarkable species of sheep, with certain affinities to the goats. It is of a reddish-brown colour, with much long hair hanging down from the front of the neck and the base of the fore legs. It has long powerful horns, and is fierce in character. It inhabits mountainous regions in Abyssinia and Barbary.

a-pā'ce, adv. [Eng. a = on, at, and pace.] With a pace, at a pace; that is, at a quick pace; speedily. (Applied to things in motion, actions done quickly, or events in a state of rapid progression.)

"Apace he shot, and yet he fled apace." Spenser: F. Q., II. st. 37. "Kings of armies did flee apace."—Ps. lxxvii. 12.

āp'-a-gō-gē, āp'-a-gō-gy, s. [In Ger., &c., apago. From Gr. ἀπαγωγή (apagōgē) = (1) a leading away; (2) a taking up or home; (3) payment; (4) bringing a delinquent taken in the act before the magistrate, also the process against him; (5) In Logic, see below.]

1. Logic: The Greek term for what is now called, from Latin, abduction, a kind of argument in which the greater extreme is unquestionably contained in the medium one, but the medium not so obviously contained in the lesser extreme as to render it unnecessary to establish this by proof. Thus, Whatever God has revealed is true. But God has revealed the doctrine of the incarnation: therefore it is a true doctrine.

2. Math.: A progress or passage from one proposition to another, by employing one previously demonstrated to establish the truth of others.

āp'-a-gōg'-ī-cal, a. [Eng. apago; -ical.] Pertaining to apago.

Math.: An apagogical demonstration is a demonstration of the truth of a proposition by

proving the absurdity in which one is landed who proceeds on the supposition of its being incorrect. Its more usual name is a reductio ad absurdum. (Dyche.)

āp'-a-gō-gy, s. [APAGOGE.]

ap-āg'-y-nōūs, a. [Gr. ἀνάξ (anax) = once, and γυνή (gunē) = a woman.]

Bot.: Fructifying but once; monocarpic.

\* a-pā'id, \* āp-pāyed, \* a-pāyed, \* a-pāyde, a-pāyd, pa. par. [APAY.] Satisfied, pleased, paid.

"... thy tolls, but ill apaid." Thomson: Castle of Indol., l. 66.

"... he was so well apayed." Chaucer: C. T., II. 852.

"When that our pot is broke, as I have ayde, Every man chyt, and halt him evel apayed." Ibid., C. T., II. 848-49.

"... they holde hem quont apayed, as saith the booke, of soden fleisch that was to hem offred, but they took by force the fleisch that is raw."—Ibid.: The Persones Tale.

"... and thou art well apayed." Shakesp.: Tarquin and Lucrece.

āp'-a-like, s. [American name.] A large fish of the Herring family, the Megalops Cyprinoides. It is called also Savalle. It is occasionally twelve feet long. The A. filamentum, an Asiatic species, is also sometimes termed Apalike.

\* a-pā'pled, pa. par. [APPALLED.]

āp'-an-āgo. [APPANAGE.]

āp-ān-thrōp'-y, s. [Gr. ἀνθρωπία (anthropia) (see def.): ἀπό (apo) = from; ἀνθρώπος (anthrōpos) = man.] A holding apart from man; dislike of the society of man; love of retirement. (Webster.)

a'-par, a'-par-a, s. [A South American name.] A name occasionally given to the three-banded Armadillo, Dasypus Apar. It is one of the digging Edentata, and lives in Brazil and Paraguay.

"The apar, commonly called mataco, is remarkable by having only three movable bands, the rest of its tessellated covering being nearly inflexible."—Darwin: Voyage round the World (ed. 1870), ch. v.

\* a-pār-alled, \* a-pār-al-īt, pa. par. & a. [APPALLED.]

a-pa-rē-jō (j as h), s. [Sp. = a pack-saddle.] A kind of Mexican pack-saddle, formed of leather cushions stuffed with hay. According to Bartlett (Dict. Americanisms) the word is chiefly used in those parts of the Union bordering on Mexico, where pack-saddles are used.

ap-ar'-gi-a, s. [Gr. ἀπαργία (apargia), probably a kind of anecory: ἀπό (apo) = from, and ἀργία (argia) = idleness; meaning that the weed, whatever it was, sprung up in consequence of the idleness of the husbandman. Had he been industrious, he would have cut short its existence at the outset.] A genus of plants belonging to the order Asteraceæ (Compositæ), and the sub-order Cichoraceæ. Two species of this family occur in Britain: the A. hispida, or Rough Hawkbit, and the A. autumnalis, or Autumnal Hawkbit. In some respects they have a remote resemblance to the Dandelion.

āp'-a-rith-mē-sis, s. [Gr. ἀριθμησις (arithmēsis) = a counting over: ἀπό (apo) = from, and ἀριθμησις (arithmēsis) = counting; or from ἀριθμῶ (arithmō) = to count over; ἀπό (apo) = from, and ἀριθμῶ (arithmō) = to count; ἀριθμῶ (arithmō) = a number.]

Rhet.: Enumeration. (Webster.)

a-pā'rt, adv. [From Fr. à part = to one side; apart (in drama) = aside; Sp. aparte; Port. á parte; Ital. da parte.]

1. In a state of physical separation from, at a greater or less distance in place removed from.

"And when he had sent the multitudes away, he went up into a mountain apart to pray."—Matt. xiv. 23.

"This seems to have actually taken place at about the same period in Southern Patagonia and Chili, though these places are a thousand miles apart."—Darwin: Voyage round the World (ed. 1870), ch. xv.

2. In a state of separation, mentally viewed; as two distinct ideas are separated in thought. Distinctly, separately.

"Wisdom and Goodness are twin-born, one heart Must hold both sisters, never seen apart." Cooper: Expedition.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sīre, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē. ey = ā. qu = kw.

"Yet we Europeans all know how difficult it is to distinguish apart the sounds in a foreign language."—Dorville: Voyage round the World (ed. 1870), ch. x., p. 206.

3. To the exclusion of, putting aside, omitting all reference to, not taking into account.

¶ Used with from: as, apart from all this.

4. In a state of moral separation.

"But know that the Lord hath set apart him that is godly for himself."—Ps. lv. 8.

ap-ar-thrō'-sis, s. [From Gr. ἀπαρθρόσις (aparthrosis) = to be jointed: ἀπό (apo) = from, and ἀρθρώ (arthro) = to fasten by a joint; ἀρθρον (arthron) = a joint.]

Anat.: An articulation which admits of free motion. It is called also abarticulation.

a-part'-ment, s. [Ger. appartement, from Fr. appartement, from a part = aside, apart, separately; Sp. apartamento; Port. apartamento = separation, division; apartar = to part, to separate; Ital. appartamento.] [PART.]

\* I. Originally: As its etymology, a-part-ment, importa, a partitioning out; a separation of a part of a house required for the accommodation of a family or an individual. (Though this sense is obsolete in English, it is still retained in many foreign languages.)

II. Now:

1. A suite of rooms separated from the rest for the same special purpose.

"The word apartment meaning, in effect, a compartment of a house, already includes, in its proper sense, a suite of rooms; and it is a mere vulgar error, arising out of the ambitious usage of lodging-house keepers, to talk of one family or one establishment occupying apartments, in the plural. The queen's apartment at St. James's or at Versailles, not the queen's apartments, is the correct expression."—De Quincey's Works (ed. 1868), vol. II., Note, p. 288.

2. A single room.

"The walls of the principal apartments were finely sculptured with fruit, foliage, and armorial bearings, and were hung with embroidered satin."—Macaulay: Hist. Eng., ch. III.

apartment-house, s. A house divided into apartments or suits of rooms for the use of different tenants, subject to certain restrictions. (See FLAT-HOUSE.)

a-pāt'-ēl-ite, s. [Gr. ἀπατηρός (apatēros) = elusive, deceitful.] A yellow mineral resembling Copiapite, found in small friable nodules or balls at Meudon and Anteuil. Composition: Sulphuric acid, 42.90; sesquioxide of iron, 55.80; water, 8.96 = 100.16.

ap-a-thēt'-ic, \*ap-a-thēt'-ick, ap-a-thēt'-ic-al, a. [From Gr. ἀ, priv., and παθητικός (pathētikos) = subject to feeling.] Destitute of feeling; not susceptible of deep emotion.

"I am not to be apathetic, like a statue."—Harris: Treatise of Happiness.

ap'-a-thist, s. [Eng. apath(y); -ist. In Ital. apatista.] A person destitute of feeling.

ap'-a-this'-tic-al, a. [Eng. apathist; -ical.] Pertaining to one destitute of feeling; apathetic.

"Fontenelle was of a good-humoured and apathetic disposition."—Sevardi: Anecdotes, v. 282.

ap'-a-thy, s. [In Dan. apathi; Ger. & Fr. apathie; Port. & Lat. apathia; Ital. apatia, from Gr. ἀπάθεια (apatheia) = want of passion or feeling; ἀπαθής (apatēs) = without suffering; ἀ, priv., and πάθος (pathos) = anything that befalls one; also suffering, feeling, passion; παθεῖν (pathein), 2 aor. infin. of πασχω (paschō) = to suffer.] Want of feeling, desindness of the emotions, a calm and unruffled temper, produced, not by the dominance of conscience or an iron will over violent emotions, but by the natural feebleness of the latter. Unruffled tranquillity of mind produced in such a way is not a virtue, but a defect.

"Of good and evil much they argued then Of happiness and final misery, Fassion and apathy, and glory and shame."—Milton: P. L., II. 684.

"The helpless apathy of Asia."—Macaulay: Hist. Eng., ch. xiv.

¶ Apathy may be produced in any mind temporarily by despair.

"Mammoth had passed from pusillanimous fear to the apathy of despair."—Macaulay: Hist. Eng., ch. v.

ap'-a-tite, s. [From Gr. ἀπατάω (apatāō) = to deceive, and suff. -ite. So called because it has often been mistaken for other minerals.]

An important mineral classed by Dana as the type of the "Apatite" group of his Anhydrous "Phosphates, Arsenates, Antimonates." The crystals are hexagonal and often hemihedral. The hardness is 5, or less frequently 4.5; the sp. gr. 2.92 to 3.25; the lustre vitreous; the streak white; the colour sea-green, violet, blue, white, gray, various reds, or brown. Apatite may be transparent, translucent, or opaque. Composition: Phosphate of lime, 91.13 to 92.31; chloride of calcium, .15 or less to 4.28; and fluoride of calcium, 4.59 to 7.69. It occurs chiefly in metamorphic crystalline rocks. It is found widely in the United States, and extensively in the province of Quebec, Canada. Dana divides it into—Var. 1. Ordinary: (a) Apatite Stone, with which is associated Moraxite, (b) Lasurapatite, (c) Francolite; 2. Fibrous Concretionary, Stalactitic, specially Phosphorite; 3. Earthy Apatite, specially Osteolite; 4. Fluor-apatite; 5. Chlor-apatite. In addition to these there is Pseudo-apatite. Akin to Apatite are (A.) Phosphatic Nodules, generally called from their origin Coprolite; (B.) Staffelite of Stein; (C.) Guano; (D.) Epiphosphorite; (E.) Talc-apatite; (F.) Hydro-apatite. (See these words.) (Dana: Min., 5th ed., 580-5.)

ap-a-tūr'-s, s. [Gr. ἀπάτη (apatē) = craft, deceit, and οὐρά (oura) = tail.] A genus of butterflies belonging to the family Nymphalidae. There is one British species, the A. iris.

APATURA IRIS.

called, from its colour and gorgeousness, the Purple Emperor. The male has dark-brown wings, changing in certain lights into very rich purple blue, whence the name iris = rainbow. Wilkes called it the "Purple High-flyer," from its mounting to a great elevation, in the sky. [EMPEROR.]

apaumé, apaumée, appaumée (pron. a-pâ-u-mé), a. [Fr.]

Her.: Appalmed. (Used of a hand open so as to exhibit the palm.)

a-pā-y, v.t. [Lat. pacare = to satisfy, to quiet.] To please, to satisfy. (Used chiefly in the past participle.) [APAID.]

"For that false Ladies love: past perils well apay."—Spenser: F. Q., IV. ix. 40.

\*a-pā-yd, \*a-pā-yde, \*a-pā-yed, pa. par. [APAID.]

A. P. C. N. [Lat. = anno post Christum natum = in the year after the birth of Christ.]

ape, s. [A.S. & Sw. apa; Icel. ape; O. Icel. ap; Dan. abe, abekai; Dut. aap, naaper; Ger. affe; O. H. Ger. affo; Gael. apa, apag; Wel. ab, epa; Malabar & Sansc. kepti or kefi, (a.) a monkey, (adj.) awift, active.]

I. Ordinary Language: A. Originally: Any member of the Quadrumanos or Monkey order.

"We shall lose our time, And all be turned to barnacles or to apes, With foreheads villanous low."—Shakespeare: Tempest, IV. 1.

¶ This extended sense is not yet extinct: thus the monkey (Pithecus inuus) brought to the rock of Gibraltar from Africa is called the Barbary "ape," though, scientifically viewed, it is not an ape at all.

II. Later: 1. Literally:

(a) Any monkey remarkable for its imitiveness or for antic manner.

(b) The Ape of Scripture (1 Kings x. 22; 2 Chron. ix. 21), Heb. הפק (qoph, pronounced koph), Sept. πίθηκος (pithēkos), Vulg. simia, is a species of tailed Indian monkey. The Heb. הפק (qoph), plur. הפקים (qophim), which occurs in the above passages, is simply the

Malabar and Sanscrit word kepti naturalised. (See the etymology.)

(c) A tailed monkey. (This sense of the word has come into use since the time of Ray.) (B. Zool.)

2. Fig.: A human being prone, like the monkey tribe, to imitation or mimicry.

"The apes of him who humbled once the proud."—Byron: Childe Harold, IV. 88.

¶ (a) To lead apes in hell is an expression applied occasionally in old writers to a woman who dies unmarried.

"But 'tis an old proverb, and you know it well, That women dying maids lead apes in hell."—Lond. Prodigal, I. 2. Wright: Dict. Obs. & Pro. Eng.]

(See also Shakesp., Taming of the Shrew, II. 1.) (b) To put an ape into one's hood or cap: To make a fool of one.

"The mock put in the man's hood an ape, And in his wyes eek, by saint Austyn."—Chaucer: C. T., 14,551-2.

B. Technically:

Zoology (Phur.): The highest, or anthropoid section of the order Quadrumana, or Monkeys—that which forms the connecting link between the lower animals and man. [ANTHROPOID, ANTHROPIDÆ.] They have the teeth of the same number and for a time of the same form as those of man, but when full maturity is reached the canines become almost extremely prominent, as may be perceived by examining specimens in Museums of Natural History. There is no tail; nor are there cheek-pouches. There may or may not be callosities on the hinder parts. They are four-handed rather than four-footed. They hobnob on the ground, but are splendid climbers of trees. The facial angle is about 65°, almost equal to that of some negroes; but the least intellectual of mankind are inconceivably before the highest of the monkey race. The apes are the only Simiideæ in which the hyoid

APE.

bone, the liver, and the cæcum exactly resemble those of man. They constitute the first section of the Simiideæ. The species are the gorilla and the chimpanzee from tropical Africa, and the ouran-ouang and the gibbons from the Asiatic islands of Sumatra, Borneo, and Java. [GORILLA, CHIMPANZEE, &c.]

Sea Ape: A species of Shark, the Alopias vulpes. Called also the Thresher (q.v.), the Fox-shark, and the Sea-fox.

ape-like, a. Like an ape.

ape-man, s. A hypothetical being (Homo dalus) intermediate between the anthropoid apes and man, conjectured by Hæckel to have been the progenitor of the human race.

ape, v.t. [From the substantive.] To imitate in a servile manner, as an ape mimics the outward actions of man.

"Profusion apes the noble part Of liberality of heart, And dulness of discretion."—Cowper: Friendship.

"Thus, while I ape the measure wild Of tales that charmed me yet a child."—Scott: Marmion, Introd. to Canto III.

a-pe'ak, \*a-pe'ck, adv. [Eng. a; peak. In Fr. pic = the peak of a mountain; à pic = vertically.] [PEAK.]

I. Ordinary Language: 1. In a position to pierce. 2. Formed with a point; pointed.

bēl, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, a; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shùn; -tion, -sion = zhùn. -tious, -sious, -cious = shüs. -ble, -dle, &c. = bel, del.

**IL Naut.** Perpendicular. Thus the anchor is said to be a-peak when the stem of the ship is brought directly over it by drawing in the cable.

\* **a-pē-gē**, s. [Eng. A B C.] The same as ANCE. (*Prompt. Parv.*)

\* **a-pē-ghē**, v. t. [APPEACH.]

**aped**, pa. par. [APE, v.]

**āpe-dōm**, s. [Eng. ape; -dom.] Apes collectively; the condition of being an ape. (*De Quincy: Autob. Sketches*, l. 87.)

\* **a-pē'ek**, adv. [APEAK.]

**a-pēl-ba**, s. [Brazilian name.] A genus of plants belonging to the order Tillaceae (Linden blooms). There are twelve species from the hotter parts of America. *Apēba Petoumo*, in Panama called *cortega*, is used for making cordage, and *A. Tibourou* is employed in the construction of the raft-boats called in Brazil *jangadas*. (*Treas. of Bot.*)

\* **a-pē'ire**, v. t. & i. [APPAIRE.]

\* **a-pē'le**, s. A peal. [PEAL, a.] (*Prompt. Parv.*)

**A-pēl-lites**, **A-pēl-lē-anz**, s. pl. [From *Apelles* (Gr. Ἀπελλῆς), a follower of the Gnostic Marcion.]

*Church History*: A sect in the second century who affirmed that Christ received from the four elements a body which he rendered back before his ascension.

**a-pēl-loŭs**, a. [Gr. ἄ, priv., and Lat. *pellis* = skin.] Destitute of skin. (*Brande.*)

\* **āp'ēn**, v. t. [OPEN.] (*Scotch.*)

**Āp'ēn-nine**, adj. Pertaining to the Apennines (q. v.).

**Āp'ēn-ninez**, s. pl. [Lat. *ad* = to; *pen-ninus*, connected with Celtic *pen* or *ben* = mountain-top.] The name of a chain of mountains extending through Italy

**a-pēp'sy**, \* **a-pēp'sie**, s. [In Fr. *apepsie*; Gr. ἀπεψία (*apepsia*) = indigestibility, indigestion, from ἀπεπτος (*apeptos*) = uncooked, not-digested; ἄ, priv.; πεπτός (*peptos*) = cooked; πέπτος (*peptos*), or πέσιον (*pesion*) = to soften, to boil, to cook.] Indigestion. (*Dyche.*)

**ā-pēr(1)**, s. [Eng. ape; -er. In Dut. *naaper*.] One who apes or mimics. (*Johnson.*)

**ā-pēr(2)**, s. [Lat. *aper* = a wild boar.] [CAEROS.]

\* **a-pēr-ans**, s. [APPEARANCE.]

\* **a-pēr-dōne**, v. t. [APPARDONE.] (*Scotch.*)

\* **a-pē're-mēt**, s. [APPAIRE.] An injury. (*Prompt. Parv.*)

**a-pēr'y-ent**, a. & s. [Lat. *aperiens* = opening, pr. par. of *aperio* = to open.]

**A. As adj.**: Opening the bowels to a slight extent in constipation; laxative, deobstruent.

**B. As subst.**: A medicine prescribed to laxate the bowels gently; a gentle purgative, a laxative, a deobstruent.

"By combining tonics with aperients."—*Cycl. Pract. Med.*, ii. 623.

**a-pēr'y-tivo**, a. & s. [In Fr. *apéritif*; Sp. *aperitivo*, from Lat. *aperio* = to open.]

**A. As adj.**: Opening the bowels; laxative, deobstruent. [APERIENT.]

**B. As subst.**: An aperient medicine. (*Richardson: Grandison*, iv. 311.)

\* **ā-pēr'n**, s. [APRON.]

**ā-pēr'n-ēr**, s. [O. Eng. *apern* = apron, and anfl. -er.] One who wears an apron; a drawer.

"We have no vice here, methinks; where's this aperner?"—*Chapman: May-day*, iii. 4.

\* **ā-pēr-sē**, a. [Lat. = A by itself.] Super-excellent.

"She was A woman, A per-se alone."—*Romans of Parthenay* (ed. Skeat), l. 148.

\* **a-pērs-mar**, \* **a-pērs-mart**, a. [Jamieson thinks it is from A.S. *afor*, *afors* = bitter, sharp, or from Icel. *apar* = bitter.] Crabbed, ill-humoured. (*Falcks of Honour*, iii. 77.)

\* **a-pērt'** (Eng. and Scotch), **ap-pērt'** (Scotch), a. [Lat. *apertus* = opened, pa. par. of *aperio* = to open.]

1. Open, un concealed, undisguised.

"... both pryvy and apert."—*Chaucer: C. T.*, 10, 944.

2. Pert, bold, forward. (*Skinner.*)  
"In *apert* is used adverbially, and means evidently, openly. (*Jamieson.*)

\* **āp-ēr-tē'yn**, v. i. [APPERTAIN.]

\* **ap-ēr'tion**, s. [Lat. *apertio*.]

1. & 2. The act of opening; the state of being opened.

"The plentitude of vessels, otherwise called the plethora, when it happens, causeth an extravasation of blood, either by rupture or apertion of them."—*Wiseman.*

3. An aperture made through anything; an opening, a gap.

"The next now in order are the apertions; under which term I do comprehend doors, windows, stair-cases, chimneys, or other conduits; in short, all inlets or outlets."—*Wotton.*

**āp-ēr't-ly**, \* **āp-ēr't-lye**, \* **a-pērt'-liche**, \* **a-pērt'e-liche** (ch guttural), adv. [Eng. *apert*; -ly.] Evidently, plainly.

"Eomen al of red blod romynge a-boute;—  
"Al priuiche his peyne a-pertiche he saith."  
—*Joseph of Arimathea* (ed. Skeat), 274, 278.

"... though be with wal apertly, that it is agens the reverence of God."—*Chaucer: Prioress Tale.*

**a-pērt'-ness**, s. [Eng. *apert*; -ness.] The quality of being open; openness, frankness.

"The freedom or apertness and vigour of pronouncing, and the clearness of writing and easiness of speaking, render the sound different."—*Baldar.*

† **ap-ēr't-ōr**, s. [Lat. = opener.]

*Anat.*: A term applied to the muscle which raises the upper eyelid. *Levator* is, however, the more common appellation which it receives. (*Quincy.*)

**āp'ēr-tūre**, s. [In Sp. & Port. *abertura*; Ital. *apertura*. From Lat. *apertura*.]

**A. Ordinary Language**:

I. & II. The act of opening; the state of being opened.

1. *In a literal sense*:  
"It is too much untwisted by the doctors, and, like philosophy, made intricate by explanations, and difficult by the aperture and dissolution of distinctions."—*Taylor.*

III. A thing or place opened; an opening, a hole.

1. *Literally*:  
2. *Figuratively*:  
"... and to him who treads Rome for the sake of news, Glory sheds Her light through thy sole aperture."—*Byron: Othello Harold*, iv. 144.

**B. Technically**:

1. *Anatomy, Zoology, Botany, &c.*:  
(a) The aperture of a univalve shell is the opening or mouth. In molluscs which feed on vegetable matter it is entire; while in those which are animal feeders it has a notch or canal. In some families it has an operculum or cover. The margin of the aperture is called the peristome. (*Woodward: Mollusca*, lat ed., 1851, p. 101.)

(b) Any other opening.

"... the back aperture of the nostrils."—*Owen: Classif. of Mammals*, p. 29.

2. *Optics*: The diameter of the object-glass of a refracting telescope, or the speculum or mirror of a reflector. The larger the aperture (i. e., the area of the surface through which the light is transmitted, or from which it is reflected), the greater is the power of the telescope to penetrate into space and consequently bear higher magnifying powers. The apertures of Sir W. Herschel's celebrated reflecting telescopes were 7, 12, 18, and 48 inches; while those of the Earl of Rosse are 3 and 6 feet. Very powerful refracting telescopes with large apertures have been recently constructed, that at the Lick Observatory being 36 inches, while still larger ones are projected. Within the last few years silvered-glass parabolic mirrors of the Newtonian form have been constructed with large apertures and short focal length, thus rendering these instruments exceedingly convenient for use. Sir W. Herschel's 18-inch metallic speculum, used for examining the nebulae and Milky Way, had a focal length of 20 feet; modern telescopes, with silvered-glass mirrors, have been constructed of the same aperture, but with a focal length of not more than 7 feet. Thus a larger aperture is now a more valuable feature in a telescope than great focal length, the unwieldy tubes formerly used being entirely dispensed with.

"'Aperture' always means the clear space which receives the light of the object; the diameter of the object-glass in astronomical, or the large speculum in reflectors, exclusive of its setting."—*Webb: Celestial Objects*, 3rd ed (1873), p. 1.

*Angular aperture* (in microscopes): The amount of light transmitted by the objective, and consequently the distinctness of the image afterwards magnified by the lensae forming the eye-piece. When an objective of the largest angular aperture is employed, the more delicate markings of the object under examination, invisible when objectives of less angular aperture are used, are seen with great distinctness. [OBJECTIVE.]

3. *Geom.*: The space between two right lines which meet in a point and form an angle.

**āp'ēr-y**, s. [Eng. *aper*; -y.] An aping; servile imitation. (*Coleridge.*)

**a-pēt'-al-ae**, s. pl. [In Fr. *apétale* (sing.), *apétèle* (sing.). From Gr. ἄ, priv., and πέταλον (*petalon*) = a leaf.] Plants without petals. A sub-class of Exogenous plants; the others being Polypetalae and Monopetalae. [APETALOUS EXOGENS.]

**a-pēt'-al-ōus**, † **ā-pēt'-al-ō-se**, a. [APETALOUS.]

*Botany*: Without petals.

*Apetalous or Incomplete Exogens*: In Dr. Lindley's earlier arrangement, the 2nd subclass of the great class Exogens. [APETALAE.] Besides the orders ranged under this sub-order, there is among flowering plants an absence of petals in various other exogenous genera and species, in all the class of Gymnosperms, and in important orders like Gramineae, not to speak of genera in that of Endogens.

**a-pēt'-al-ōus-ness**, s. [Eng. *apetalous*; -ness.] The state or quality of being destitute of petals. (*Johnson.*)

**ā-pēx** (plur. **ā-pī-çēs** or **ā-pēx-ēs**), s. [Lat. *apex* (pl. *apices*) = the top of anything.]

**A. Ordinary Language**: The tip, top, or summit of anything. (*Glossog. Nova*, 2nd ed.)

**B. Technically**:

I. *Geom.*: The angular point opposite to the base of a triangle, of a cone, &c.

II. *Nat. Science*: The top of anything.

*Specially*:

1. *Zool.*: The top of a shell.

2. *Botany*:  
(a) The tip of a leaf, the spot on the summit of a pericarp where the style was inserted, or any other part of a plant terminating in a point.

(b) A name given by the old botanists to what we now call a stamen. It was generally used in the plur. *apices*. (*Lindley.*)

(c) Ray's name for what is now called the anther of a stamen. (*Lindley.*)

\* **a-pēyre**, v. t. [Lat. *aperio* = to open.] To open. (*Wright: Dict. Obs. & Prov. Eng.*)

**āph**, prefix. [From Gr. ἀφ (*aph*), the preposition ἀπό (*apo*) = from, modified by an aspirate immediately following it, as ἀπόρρισμα (*aphorisma*) = aphorism, the derivation of which is ἀπό (*apo*) = from, and ὀρίζω (*horizō*) = to divide or separate from.]

**āph-ær'-i-sis**, **āph-ēr'-i-sis**, s. [In Fr. *aphérese*; Sp. *aféresis*; Port. *aphéresis*; Lat. *aphæresis*; Gr. ἀφαίρεσις (*aphairesis*), from ἀφαίρω (*aphairō*) = to take away; ἀπό (*apo*) = from, and αἰρέω (*hairō*) = to take away.]

*Gram.*: A figure which drops a letter or syllable at the commencement of a word, as 'tis, for it is; 'gan, for began. (*Glossog. Nova.*)

**āph-ān'-ē-site**, s. [In Fr. *aphanèse*, from Gr. ἀφανής (*aphanēs*) = unseen, unmanifest, and ενφ. -ίτε.] A mineral, called also Clinoclase (q. v.).

**āph-an-īp'-tēr-a**, s. pl. [Gr. (1) ἀφανής (*aphanēs*) = unseen, invisible; ἄ, priv., and φαίνω (*phainō*), 2 aor. infin. of φαίνομαι (*phainomai*) = to come to light, to appear; pass. of φαίνο (*phainō*) = to bring to light; and (2) πτερόν (*pteron*) = a feather, a wing.] An order of wingless insects, called by De Geer Suctoria, and by Leach Siphonaptera. They have a sucker of three pieces, and a true metamorphosis. The thorax is distinctly

separated from the abdomen, and two horny plates mark the spots where in the higher insects wings would be. It contains the Pulcicide, or Fleas. [FLEA, PULCIDAE, PULEX.]

† **aph-an-ís-tíc**, a. [Gr. ἀφανιστικός (aphanistikós) = destroying, putting out of sight; ἀφανίζω (aphanízō) = to make unseen; ἀφανής (aphanḗs) = unseen; ἀ, priv., and φαίνω (phainō) = to cause to appear.]

Min.: Indistinct, unmanifest. (Webster.)

**aph-an-íte**, s. [In Ger. *aphant*; from Gr. ἀφανής (aphanḗs) = unseen, invisible, unmanifest, obscure; ἀ, priv., and φαίνω (phainō) = to cause to appear. So called because the granulations of which it consists are not distinctly visible.]

Min. & Geol.: A rock, called also Corneine. The absence of distinct granulations distinguishes it from Diabase.

† **aph-a'-sia**, s. The impairment or loss of the power of using spoken or written language, independently of any disease of the vocal organs or failure of the intellect.

**aphō-n-ōn**, † **aphō-n-ām**, s. [In Fr. *aphélie*; Gr. ἀπό (apo) = from; and ἥλιος (hēlios) = the sun.]

Astronomy: Literally, away from the sun. As the planets move in elliptic orbits, and not in circles, they are necessarily at a greater distance from the sun at one part of their course than at another. When as far away from the sun as they can go, they are said to be in *aphelion*; and when as near to the luminary as possible, in *perihelion*. [See APOGEE, PERIGEE.]

**aph-en'-gō-scōpe**, s. [Gr. ἀφηνός (aphenós) = without light, and σκοπέω (skopēō) = to look at, to behold.] A modification of the magic lantern for exhibiting opaque objects, such as cartes-de-visite, movement of watches, coins, &c.

**aph-er-ēse**, s. [Fr. *aphérese*.] A mineral the same as LIBETHENITE (q.v.).

**aph-er-ē-sis**, s. [APHÆRESIS.]

**aph-ē-tā**, s. [Arabic (?).]

Astrlogy: The name of a planet which was imagined to be the giver or disposer of life in a nativity. (Johnson.)

**aph-ēt-ic-al**, a. [Eng. *Apheta*; -ical.] Pertaining or relating to the so-called planet Apheta (q.v.). (Johnson.)

**aph-i-dæ**, **aph-i-dæ**, s. pl. [APHIS.] Leach's name for the family of Homopterous insects, of which Aphid is the type. [APHIS.]

**aph-i-dæ**, **aph-i-dæ**, s. pl. The plural of APHIS (q.v.). Shuckard and Swainson made Aphidæ the third tribe of the order Hemiptera.

"... in the Aphidæ the male insects are unequal-vocal and numerous."—Owen: *Invertebr. Animals*.

**aph-id-ī-an**, a. & s. [Mod. Lat. *aphis*, genit. *aphidis* = a plant-louse.]

1. As adjective: Pertaining or relating to an aphid, or plant-louse.

2. As substantive: An insect of the tribe Aphidii, the family Aphidæ, or the genus Aphid.

**aph-id-ī-i**, s. pl. [Mod. Lat. *aphis*, genit. *aphidis*.] Cuvier's name for the family of Hemipterous (or Homopterous) Insects, of which Aphid constitutes the type. He made it the second family of the Homopterous Hemiptera, and the fourth of the whole order. He included under it Psylla, Thrips, and other genera, besides Aphid proper. [APHIS.]

**aph-id-ī-ph-ā-gi**, s. pl. [Mod. Lat. *aphis*, and Gr. φαγός (phagos) = a glutton; φαγεῖν (phageîn) = to eat.] The name given by Cuvier and others to a family of insects, ranked as the second of the Trimerous section of Beetles. The name is given because the appropriate food of the insects which it contains are aphides. Instead of Aphidiphagi, the family is now designated Coccinellidæ. It contains the "lady-birds."

**aph-id-ī-ūs**, s. [From Mod. Lat. *aphis*, genit. *aphidis*.] A genus of ichneumons, of which one species, *A. avena*, preys on the

aphis of the oat and other analogous species, while a second, *A. rapæ*, does so on that of the turnip.

**aph-id-iv-ōr-ōus**, a. [Mod. Lat. *aphides*, and Lat. *voro* = to swallow whole, to devour.] Devouring aphides.

"The larvae of the syrphid, or, as they have been called, aphidivorous worms."—*Ornithol.*: Cuvier, vol. xv., p. 160.

**aph-il-an-thrōp-ý**, s. [Gr. ἀ, priv., and φιλανθρωπία (philanthropía) = philanthropy.]

1. Want of love to mankind; and the opposite of philanthropy. (Johnson.)

2. Med.: The first stage of melancholy, when solitude is preferred to society.

**aph-ís**, **aph-ís** (plural **aph-í-dēs**, **aph-í-dēs**), s. [Mod. Lat.]

Entom.: Plant louse. A genus of insects, the typical one of the family Aphidæ. It contains those soft pulpy little animals, winged or wingless, and with long antennæ, which are seen beneath the leaves, or in curled-up leaves, or in the axils of many plants, or even on the roots of some. Sometimes, as in the case of the elm, their destructive operations upon a leaf raise a gall of considerable size. The species are very numerous, and are generally called after the plants on which they feed, as *A. roseæ*, the

APHIDES.

aphis of the rose; *A. fabæ*, the bean aphid; *A. brassicæ*, the cabbage fly; *A. humuli*, the hop fly. They are exceedingly prolific, but are kept within bounds by various insects, especially by the Coccinellidæ, or Lady-birds, of which they are the appropriate food. They drop a fluid called honey-dew (HONEY-DEW), which is so grateful to the ants, that the latter, to receive it, tend them like milk cows. The mode of propagating their race is the abnormal one described as ALTERNATION OF GENERATIONS, METAGENESIS, and PARTHENOGENESIS (q.v.). The winged aphides, confessedly perfect insects, bring forth a wingless race, apparently mere larvæ, and which, therefore, it might be thought, would be incapable, while thus immature, of bringing forth young. In certain cases they do it, however, and their offspring are winged, and as perfect as their grand-parents. This alternation of generations, or *metagenesis*, with its attendant parthenogenesis (or birth from virgins) in every second generation, goes on for nine or ten generations, by which time the season is over. The last aphides of the year are fully formed and winged, and deposit eggs, which are hatched in spring.

**aphis-sugar**, s. Honey-dew, the honey-like substance secreted by aphidæ. [APHIS, HONEY-DEW.]

"Honey-dew, or *aphis-sugar*, and the honey of the bee are intermediate between animal and vegetable organs."—*Penny Cyc.*, vol. xxiii., p. 225.

**aph-ō-gis-tíc**, **aph-ō-gis-tíc**, a. [Gr. ἀφλόγιστος (aphlogistos) = not inflammable; ἀ, priv., and φλογιστος (phlogistos) = set on fire, burnt; φλόγιος (phlogios) = to eat on fire; φλόξ (phlox), genit. φλόγος (phlogos) = flame; φλέγω (phlegō) = to burn.] Without flame.

*Aphlogistic lamp*, or *flameless lamp*: A lamp formed by winding a coil of fine platinum wire loosely round the lower part of the wick of a spirit lamp. When the flame is extinguished the coil will continue in a state of ignition till the spirit is consumed.

**aph-ō-ní-p**, **aph-ō-n-ý**, s. [In Fr. *aphonie*; Gr. ἀφωνία (aphonía); from ἀ, priv., and φωνέω (phōnéō) = to produce a sound; φωνή (phōnē) = a sound.]

Med.: Inability to speak, loss of voice, dumbness.

"In cases of *aphonia*, where the vocal chords cannot be made to vibrate freely."—*Jour. Med.*: Science of Language, 6th ed., vol. ii. (1871), p. 127.

"Aphony (Gr.), want of voice."—*Glossog.*, Nov., 2nd ed.

**aph-ōr-ī-a**, s. [Gr. ἀφορία (aphoria); from ἀφορος (aphoros) = not bearing; ἀ, priv., and φόρος (phoros) = bearing, . . . fruitful; φέρω (phērō) = to bear.] The absence of bearing, unfruitfulness; barrenness.

**aph-ōr-ism**, s. [In Ger. *aphorism*; Fr. *Aphorisme*; Sp. & Ital. *aforismo*; Port. *aphorismo*. From Gr. ἀφορισμός (aphorismos) = (1) a separation; (2) a definition, also an aphorism; ἀφορίζω (aphorízō) = to mark off by boundaries; ἀπό (apo) = from, and κρίω (kriō) = to separate from as a boundary; ὅρος (horos) = a boundary.] A short detached pithy sentence, containing a maxim or wise precept, deduced from the general experience of mankind. (See example under APHORIZE.)

"Solomon became enabled, not only to write those excellent parables or *aphorisms*, concerning divine and moral philosophy, but also . . ."—*Bacon*: *Advanc. of Learning*.

**aph-ōr-ís-māt-ic**, **aph-ōr-ís-míc**, a. [Eng. *aphorism*; -atic; -ic.] Pertaining to an aphorism or aphorisms; containing an aphorism. (Ogilvie.)

**aph-ōr-ís-mēr**, s. [Eng. *aphorism*; -er.] One who habitually quotes aphorisms.

"We may infallibly assure ourselves, that it will as well agree with monarchy, though all the tribe of *aphorismers* and politicians would persuade us there be secret and mysterious reasons against it."—*Milton*: *Of Ref. in England*, bk. 2.

\* **aph-ōr-ís-míng**, a. [Eng. *aphorism*; -ing.] Overbearing unduly by the use of aphorisms.

"There is no art that hath been more cankered in her principles, more solled and slobbered with *aphorisming* pedantry, than the art of policy."—*Milton*.

**aph-ōr-íst**, s. [Eng. *aphorist(m)*.] A compiler of aphorisms.

"He took this occasion of further clearing and justifying what he had written against the *aphorist*."—*Nelson*: *Life of Bp. Bull*, p. 248.

**aph-ōr-ís-tíc**, **aph-ōr-ís-tíc-al**, a. [Eng. *aphorist*, -ic, -ical; or *aphorist(m)*, -itic, -ical. In Fr. *aphoristique*; Port. *aphorístico*.] [APHORISM.] Pertaining to an aphorism; in the form of an aphorism; in short, detached sentences like an aphorism.

"... because the style of his conversation is less flowing and diffusive—less expansive—more apt to clothe itself in a keen, sparkling *aphoristic* form."—*De Quincy*: *Works* (ed. 1858), vol. ii., p. 232.

**aph-ōr-ís-tíc-al-ly**, adv. [Eng. *aphoristic*; -ly.] In the form of an aphorism.

"These being carried down seldom miss a cure, as Hippocrates doth likewise *aphoristically* tell us."—*Harvey*.

**aph-ōr-ís**, v. t. [Gr. ἀφορίζω (aphorízō) = (1) to mark out by boundaries; (2) to limit, to define.] To utter or write an aphorism.

"In order to get the full sense of a word, we should first present to our minds the visual image that forms its primary meaning. Draw lines of different colours round the different counties of England, and then cut out each separately, as in the common play-naps that children take to pieces and put together, so that each district can be contemplated apart from the rest, as a whole in itself. This twofold act of circumscribing and detaching, when it is excited by the mind on subjects of reflection and reason, is to *aphorize*, and the result an aphorism."—*Coleridge*: *Aids to Reflection* (ed. 1839), pp. 15, 17.

**aph-rite**, s. [Gr. ἀφρός (aphros) = foam, and suff. -ite (Min.) (q.v.).]

Min.: A variety of Calcite, sometimes called also Earth Foam, and by Kirwan Silvery Chalk. Dana considers that the harder and more sparry specimens approach argenticite, and the softer ones chalk.

**aph-rí-zite**, s. [In Ger. *aphrisit*; Gr. ἀφρίζω (aphrízō) = to foam; ἀφρός (aphros) = foam, and suff. -ite.] A variety of the mineral called Tourmaline. It is found in the Harz Mountains.

**aph-rō-dís-ī-ao**, \* **aph-rō-dís-ī-āclt**, a. & s. [In Port. *aphrodisiaco*; from Gr. ἀφροδίσια (aphrodisia) = venery; ἀφροδίσια (aphrodisia) = belonging to love or venery. From *Aphrodite* = Venus.] [APHRODITE.]

1. As adjective: Exciting or tending to excite venereal desire.

2. As substantive: A provocative to venery. Garrod makes Aphrodisiæ the 2nd order of his Division L, Sub-class 5. He divides them into *direct* and *indirect*. Among the former are nux vomica, strychnia, cantharides; and among the latter, blood tonics and nervine tonics. (Garrod: *Materia Medica*, 3rd ed., p. 415.)

āph-rō-dīs-ī-ae-al, †āph-rō-dīs-īo-al, a. [Eng. aphrodisiac, in full or contracted; suffix -al.] The same as APHRODISIAC, adj. (q.v.). (Glossog. Nova, 2nd ed.)

āph-rō-dīs-ī-an, a. [APHRODISIAC.] Pertaining to love or vengery. Davies gives an example from C. Reada (Cloister & Hearth, ch. 1v.).

āph-rō-dī-ta, †āph-rō-dī-tē, s. [Gr. Ἀφροδίτη (Aphrodītē), a name of Venus, given because it was believed that she sprung from the āphrōs (aphros), or foam of the sea.]

Zool.: A genus of Annelids, the typical one of the family Aphroditidae. The Sea-mouse is the Aphroditia aculata. The scales on its back are covered and concealed by a substance resembling tow, which arises from the sides. These also give rise to groups of strong spines, which pierce through the tow, and are not merely brilliant in hue, but vary that hue according as the light falls on them, so as to exhibit the various rainbow colours. From this exceeding brilliance, coupled with its connection with the sea, in the deep water of which it resides, it has come to be known by one of the epithets of Venus, while its oval form and tow-covered akin have led to its being denominated the Sea-mouse.

āph-rō-dite, s. [In Ger. aphrodīt, from Gr. ἀφρός (aphros) = foam, and suff. -ite, or from Ἀφροδίτη (Aphrodītē) = Venus, in allusion to her as foam-born.] A mineral placed by Dana in his Sapolite group of Bisulfates. It is a soft opaque mineral, of a milk-white colour. One specimen contained silica, 51.55; magnesia, 33.72; protoxide of manganese, 1.62; protoxide of iron, 0.39; alumina, 0.20; water, 13.52. It occurs in Sweden. [APHRODITA.]

āph-rō-dīt-ī-dēs, s. pl. [APHRODITA.] A family of Annelida; the second of the order Errantia. Their dorsal surface has on it a double row of large membranous scales attached to the alternate segments, between which appear the beautiful bristles of the feet. [APHRODITA.]

āph-rōph-ōr-ēs, s. [Gr. ἀφροφόρος (aphrophoros) = foam-bearing; āphrōs (aphros) = foam, and φέρω (pheros) = bearing; φέρω (phero) = to bear or carry.] A genus of insects belonging to the order Hemiptera, and the family Cercopidae. The Aphrophora spumaria (formerly called Tettigonia spumaria) is the Cuckoo-spit Frog-hopper, the insect the larva of which envelops itself in froth. There are other species, as the A. bifasciata, which is common in gardens. When come to maturity the Aphrophora leap well.

āph-rō-sid-ēr-ite, s. [From Gr. ἀφρός (aphros) = foam; σιδῆρος (sideros) = iron, and suff. -ite.] A doubtful mineral akin to Pyrochlorite. It is a soft ferruginous chlorite, of dark olive-green colour, found in Germany.

āph-tha (pl. āph-thēs), s. [In Fr. aphte; Port. apthia (sing.); Lat. apthæ (pl.); Gr. ἄφθα (apthā), sing.; ἀφθαί (apthai), plur., from ἄφθω (apthō) = to fasten . . . to kindle, to set on fire, to inflame.]

Med.: One of the numerous white-looking specks or vesicles which sometimes appear on the tongue and palate, whence they gradually diffuse themselves over the mouth and fauces. There are three varieties: (1) The Aphtha infantum, or milk-thrush; (2) the A. maligna; and (3) the A. chronica. The first variety is an idiopathic disorder, chiefly attacking infants brought up by hand; the second and third are symptomatic of other diseases. The apthæ which frequently appear in the mouth in advanced stages of consumption generally precede disaolution by about a week or a fortnight.

¶ The term apthæ anginosa is sometimes applied to a variety of sore throat.

āph-thāl-ōse, āph-thit-āl-ite, s. [Gr. ἀφθῆρος (apthēros) = undestroyed, unperishable; ἀ, priv., and φθίω (phthiō), or φθίω (phthiō) = to decay, with ἄς (als) = salt.] A mineral classed by Dana under his Celestite group. It is called also Arcanite, Glasserite, Vesuvian Salt, and Sulphate of Potash. One specimen was composed of potash, 54.1, and sulphuric acid, 45.9 = 100. It is a bluish-white or greenish-white mineral, with vitreous lustre, and a saline taste, found on Mount Vesuvius.

āph-thōng, s. [Gr. ἀφθόγγος (aphthongos) = voiceless; ἀ, priv., and φθόγγος (phthongos) = the voice; φθέγγομαι (phthengomai) = to speak loud or clear.] A letter or letters left unsounded when a word is pronounced.

āph-thōn-ite, s. [From Gr. ἀφθόνος (aphthōnos) = without envy, bounteous, plentiful; ἀ, priv., and φθόνος (phthōnos) = envy, and suff. -ite.] A mineral; a variety of Tetrahedrite. It is of a steel-gray colour, and is found in Sweden.

āph-thōus, a. [Eng. apth(a); -ous.]

- 1. Pertaining to apthæ.
- " . . . so long as the apthous specks retain their purely white colour, little danger need be apprehended." -Cyclo. Pract. Med.
- 2. Botany: Resembling something covered with little ulcers. (Loudon: Cycl. of Plants.)

a-phyl-lēs, s. pl. [Gr. ἀφύλλος (aphylos) = leafless; ἀ, priv.; φύλλον (phylon) = a leaf.] Bot.: Plants destitute of leaves. (A term sometimes applied to Thallozoans, from the absence in them of all proper leaves.)

a-phyl-loūs, a. [APHVLLÆ.] Bot.: Destitute of leaves.

ā-pī-ā-çē-ēs, s. pl. [UMBELLIFERS.]

ā-pī-ār-ī-an, a. [From Lat. apiarius = relating to bees, and suff. -an.] Relating to bees. (Jardine.)

ā-pī-ar-ist, s. [Lat. apiarius = a bee-keeper.] A bee-keeper; one who keeps heca. (Kirby.)

ā-pī-ar-ī, s. [Lat. apiarium = a bee-hive; apis = a bee.] A shed or stand for bee-hives.

"Those who are skilled in bees, when they see a foreign swarm approaching to plunder their hives, have a trick to divert them into some neighbouring apiary, there to make what havoc they please." -Swift.

ā-pī-cal, a. [From Lat. apex, genit. apicis = the tip or top.] Pertaining to the tip, top, or vertex of a cone, a triangle, a leaf, &c.

ā-pī-çēs, ā-pēç-ēs, s. pl. The Latin and English forms of the plural of APEX (q.v.).

\* a-pīck-pāck, adv. Astride on the back, as a child is sometimes carried. (Flora's Vagaries, 1670, quoted in Wright's Dict. Obs. and Prov. Eng.) [PICK-A-BACK.]

ā-pīç-ql-āte, ā-pīç-ql-ā-tēd, a. [Mod. Lat. apiculatus, dimin. of Class. Lat. apex.]

Bot.: Pointleted; terminating abruptly in a little point. It differs from mucronate in this respect, that the point constitutes a part of the limb, instead of arising wholly from a costa. (Lindley.)

ā-pī-cūl-tūre, a. [Lat. apis = a bee, and cultura = tilling, cultivating, tending.] The "culture" or tending of bees; bee-keeping.

"To those acquainted with German and American apiculture, it is a well-known fact that we are at least a century behind these nations in this important art." -Rev. George Baynor, in Times, October 1, 1875.

ā-pīç-ql-lūs, s. [In Lat., an unclassical dimin., from apex.]

In Bot.: A small point, used especially of cases in which the midrib projects beyond the leaf, so as to constitute a small point, or when a small point is suddenly and abruptly formed. (Loudon: Cycl. of Plants, 1829; Glossary.)

ā-pī-dēs, s. pl. [From Lat. apis = a bee.] A family of insects, the typical one of the Hymenopterous sub-tribe Anthophila, the tribe

Aculeata, and the order Hymenoptera itself. The Apidae have an elongated tongue; whilst the Andrenida, the other family of Anthophila, have the tongue short and blunt. It contains the social bees, Apis, Bombus, &c., with some of the solitary ones, as Xylocopa.

a-pī-çē, ā-pī-çē, adv. [Eng. a, and piece.] Each. To each.

"The golden spoons were twelve full of incense, weighing ten shekels apiece." -Numb. vii. 88.

\* a-pī-çēs, adv. [Pref. a = in, and Eng. pieces.] In pieces. (Baumont & Fletcher: Little French Lawyer, ii. 1.)

ā-pī-in, s. [Mod. Lat. api(um); suff. -in.] Chem.: A gelatinous substance deposited from water in which parsley (Aptium petroselinum) has been boiled.

ā-pī-ō-crīn-ī-tēs, s. [From Gr. ἄπιον (apion) = a pear, κρίνον (krinon) = a lily, and Eng. suff. -ite = Gr. λίθος (lithos) = stone. Literally, pear-shaped lilies of stone.] Pear-encrinites, a genus of Encrinites somewhat resembling a pear in form. Specimens of the A. rotundus are found at Bradford, with the stumps of their stems still standing on the great oolite in which they grew, though their articulations have been broken off, and now lie scattered through the stratum above, which is of clay. (Lyell: Manual of Geol., 4th ed., ch. xx.)

ā-pī-ōn, s. [Gr. ἄπιον (apion) = a pear, from the shape of the insects. A genus of Weevils (Curculionidae), the larvae of the several species of which are very injurious in clover fields. The A. apricans preys, when in the grub state, on the flowers of the purple clover (Trifolium pratense); the A. foveipes on those of the Dutch clover (T. repens); the A. assimile chiefly on the sulphur-trefoil (T. ochroleucum); and the A. pomonæ on the tare (Vicia sativa).

Ā-pīs (1), s. [Lat. Apis; Gr. Ἄπις (Apis), genit. Ἄπιος (Apīos).] An Egyptian deity, the same as Osiris. He was worshipped under the form of an ox, white in colour, with black spots.

"He flamed Dryden for sneering at the Hierophant of Apis." -Macaulay: Hist. Eng., chap. xiv.

ā-pīs (2), s. [Lat. apis or apes, genit. apicis = a bee.]

1. Entom.: The typical genus of the family Apidae, and the Hymenopterous tribe Anthophila. The workers have the first articulation of the posterior tarsi in a long square; it is moreover furnished at its internal face with silky down, divided into transverse bands. The A. mellifica, from Lat. mellifera, a = to make, is the Hive-bee. [BEE.]

2. Astron.: A small constellation in the Southern Hemisphere, first named by Halley. It is called also Musca, literally = the Fly, but in this case rendered "the Bee." [MUSCA.]

ā-pīsh, a. [Eng. ap(e); -ish. In Ger. apisch.]

1. Prone to imitate in a servile manner, as an ape might do; hence also foppish, affected. "Report of fashions in grand Italy. Whose manners still our tardy apish nation Limp after, in base imitation." -Shakespeare: Richard II., ii. 1.

2. Playful, wanton, like an ape; hence, also, silly, trifling, insignificant. "And apish folly, with her wild resort Of wit and jest, disturbs the solemn court." -Prior.

"And this is but apish sophistry . . ." -Glavinza.

ā-pīsh-lī, adv. [Eng. apish; -ly.] In an apish manner; with servile imitation; foppishly, conceitedly, playfully, with silly trifling.

ā-pīsh-nēs, s. [Eng. apish; -ness.] The quality of being apish. Mimicry, playfulness, insignificance. (Johnson.)

a-pīs-tēs, a-pīs-tōs, a-pīs-tūs, s. [Gr. ἀπίστος (apistos) = faithless, not to be trusted; ἀ, priv., and πιστός (pistos) = faithful. So called because a strong alborbital spine jutting out from the cheek of the fish so designated became a peridulous weapon.] A genus of apine-finned fishes belonging to the family Triglidae. They are of small size, and are somewhat allied to Blennius. They rise into the air like ordinary flying-fish. Ehrenberg seeing the abundance in the Red Sea of the A. Israeliorum, or Sea-loquat, supposed that it might be the Scriptural quail. [QUAIL.]

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sire, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unīte, cūr, rūle, fūll; trī, Sīrian. æ, œ = ē. ey = ā. qu = kw.

† a-pit'-pāt, adv. [Eng. a; pit; pat. A word the sound of which is designed to imitate the movement or action which it describes.] Palpitating, or palpitatingly; beating with more than average force. Applied to the heart; more usually in the form PIT-A-PAT.

"O there he comes.—Welcome, my bully, my buck! ... my heart has gone a-pit-pat for you."—Congress.

ā-pī-ūm, s. [In Sp. apio; Ital. apio; Lat. apium = parsley (?), or wild celery (?); Gr. ἀπιον (apion) = (1) a pear, (2) parsley; ap, ab, or av in various languages = water, as Punjab = the five waters.] Celery. A genus of plants, the typical one of the order Apiales, or Umbellifers. It contains one British species, the A. graveolens, Smallage, or Wild Celery,

APIUM GRAVEOLENS.

1. Part of the inflorescence. 2. Flower. 3. Root-leaf, and base of stem. 4. Ripe fruit.

which grows in marshy places, especially near the sea. It is the original of the garden celery. [CELEERY.] A. petroselinum is the well-known parsley. [PARSLEY.]

āp-jōhn-ite, s. [Named after Apjohn, who analysed it.] A mineral, placed by Dana under his Alum and Halotrichite groups. It occurs in white fibrous or asbestiform masses at Lagoa Bay, in South Africa. Composition: Sulphuric acid, 32.97; alumina, 10.65; sesquioxide of manganese, 7.33; water, 48.15; sulphate of magnesia, 1.03 = 100.

\* a-plā'ce, \* a-plā's, adv. [Eng. a; place.] In one's place, before all.

"Their men anon forth aplice hir brought, Fair meintes, eurydes the chapel." The Romans of Partenay (ed. Skeat), 292-3.

āp-lān-āt-ic, a. [From Gr. ā, priv., and πλανῶ (planō) = to cause to wander; from πλάνη (plānē) = wandering.] Not wandering; destitute of aberration.

Aplanatic lens: One which, could it be constructed, would so refract all the rays of light incident upon it, whether they entered it in a direction parallel to its axis, or converged to, or diverged from, a point in that axis, as to make them all ultimately meet in a single point or focus. More than one form of lens would be aplanatic could it be made with mathematical exactness, different media being employed to render it schromatic. Lenses can at present be made only approximately aplanatic, and tables are therefore constructed to show how, with a given refractive index, the aberration of the focus may be reduced to a minimum. [ABERRATION, ACHROMATIC.]

a-plās'-tic, a. [Gr. ἀπλαστος (aplastos) = unmoulded, unshapen.] [PLASTIC.] The opposite of plastic; not capable of being moulded, or at least being easily moulded into form. (Webster.)

\* a-pli'ght (gh silent), adv. [A.S. a = on; pliht = (1) a pledge, (2) danger, obligation.] As if bound by obligation; faithfully.

"Ho the hire boghte aplight For sesuiteh of golde hire wight." Floriz and Blanchefleur (ed. Lumby), 649-50.

a-plōc'-ēr-ine, a. [APLOCERUS.] Pertaining to the sub-genus Aplocerus. Col. Hamilton Smith makes the Aplocerine group one of the sub-divisions of the great genus Antelope (q. v.). (Griffith's Cuvier, vol. iv, p. 285.)

a-plōc'-ēr-ūs, s. [Gr. ἀπλός (haplos); from ἀπλός (haplos) = simple, and κέρως (keras) = horn.] A sub-genus of Antelope. The species are from America. In character they approach the goats.

āp-lō-me, s. [In Ger. opfome; from Gr. ἀπλός (haplos) = simple. The name was given by Haüy because a cube is simpler than a dodecahedron. (See def.)] A mineral; a variety of Manganesian Lime, Iron Garnet. It is usually of a deep brown or orange-brown colour. It is opaque. It is harder than quartz. Like the garnet, it is crystallised in the form of a dodecahedron, with rhomboidal planes; but these are striated parallel with the lesser diagonal, which, in Haüy's opinion, indicates that the primitive form of the crystal is a cube. Found on the banks of the Lena, in Siberia, also in Saxony.

āp-lō-nō-tūs (Latin), s. [Gr. ἀπλός (haplos) = simple, and νότος (nōtos) = the back.] A genus of lizards of the family Iguanidae. The Apionote, A. Ricard's, is of a blackish-brown colour, with spots of tawny brown. The back is without scales, but has small granules, and along its summit a shallow crest.

\* a-plūs'-tre, \* a-plūs'-tēr, s. [Lat. aplustre; Gr. ἀπλουστον (apluston).] An ornament affixed to the stern, or sometimes to the prow of ancient vessels. It was made of wood, and resembled the tail of a fish. A staff or pole rose from it with a riband or streamer at the top.

"The one holds a sword to her hand, to represent the Hind, as the other has an aplustre, to represent the Odyssey, or voyage of Ulysses."—Addison.

a-plūs'-trūm, s. [APLUSTRE.] A genus of shells of the family Bullidae. They have oval ventricose, highly-coloured shells, with their spire wide and depressed. In 1851, Woodward estimated the species at ten, none of them from Britain.

\* a-plŷ, v.t. [Old form of PLY (q. v.)] To ply; bend. [APPLY.]

"Which lightly he wold to bow he aplŷ." The Romans of Partenay (ed. Skeat), 4187.

a-plŷs'-ī-a, s. [Gr. ἀπλωσία (aplustia) = filthiness; ἀπλωσία (aplustia), pl.; Lat. aplysiā = a kind of sponge, so called from its dirty colour.] A genus of molluscs, the typical one of the family Aplysiidae. The species have an oblong convex flexible and translucent shell, with a posterior slightly incurved apex. The animals are oval, with four tentacles. They are called Sea-hares. They inhabit the laminarian zone of the sea, and when molested discharge a violet fluid. Täte, in 1875, estimated the known recent species at forty-two, with one or two more doubtfully identified from the Tertiary formation. Some of the former are British.

a-plŷ-sī-ī-dæ, s. pl. [APLYSIA.] A family of molluscous animals, the third of the Tectibranchiate section of the Gasteropodous order Opistho-branchiata. The shell is wanting or rudimentary, and the animal slug-like. It contains the genera Aplysia, Dolabella, &c.

a-pnoc'-a, s. [Gr. ἀπνοια (apnoia) = want of wind, a calm; ā, priv., and πνέω (pnēō) = to blow, to breathe.]

Med.: Absence or great feebleness of breath, as in the case of swoon. (Glossog. Nova.)

āp-ō, in composition. [Gr. ἀπό (apo) = Sansc. apa; Lat. ab or abs; Goth. af; Ger. ab; Eng. of, off.] A Greek prefix occurring in many English words originally from the Greek. It generally signifies from.

a-pōc'-a-lŷpse, \* a-pōc'-a-lŷpse, s. [In Ger. apokalypse; Fr. & Port. apocalypse; Sp. apocalipsis; Ital. apocalisse, apocalissi. From Lat. apocalypsis; Gr. ἀποκάλυψις (apokalypsis) = an uncovering, a revelation; ἀποκαλύπτω (apokaluptō) = to uncover; ἀπό (apo) = cessation from, and καλύπτω (kaluptō) = to cover.]

1. Gen.: An uncovering, disclosing, or revealing of what was before hid.

"The vates poet with his melodious apocalypse of Nature."—Corylle: Heros and Hero-worship, Lect. iii.

2. Specially: (a) The vision or visions recorded in the last book of the Bible.

"Oh, for that warning voice which he, who saw The apocalypse, heard cry in heaven aloud." Milton: P. L., bk. iv.

(b) The last book in the Bible, which receives both its Latin and its Greek name from the fact that its contents mainly consist of a revelation or apocalypse of future events previously hidden from mental cognizance. [REVELATION.]

† a-pōc'-a-lŷpt, s. [Gr. ἀποκαλύπτω (apokaluptō) = to uncover.] The author of the Apocalypse. (Coleridge.) (Reid.)

a-pōc'-a-lŷp'-tic, \* a-pōc'-a-lŷp'-tick, a. & s. [In Fr. apocalypstique; Sp. apocaliptico; Port. apocalypstico. From Gr. ἀποκαλυπτικός (apokaluptikos) = fitted for disclosure.]

1. As adjective: Pertaining to a revelation, or containing one. Especially belonging to the revelation made in the last book of the Bible.

"It was concluded by some, that Providence designed him the apocalypstic angel which should pour out one of the vials upon the beast."—Spenser on Prodiges, p. 314.

The Apocalyptic number, 666. (Rev. xiii. 18.)

2. As substantive: One who makes an apocalyptic communication.

"The divine apocalypstic, writing after Jerusalem was ruined, might teach them what the second Jerusalem must be; not on earth, but from heaven. Apoc. xxi. 2."—Lightfoot: Miscell., p. 107.

a-pōc'-a-lŷp'-tic-al, a. [Eng. apocalypstic; -al.] The same as APOCALYPTIC, a. (q. v.)

a-pōc'-a-lŷp'-tic-al-lŷ, adv. [Eng. apocalypstic; -ly.] In an apocalyptic manner, by revelation; with relation to the Apocalypse. (Webster.)

āp-ō-car'-pī, s. pl. [Gr. ἀπό (apo) = from, and καρπός (karpos) = fruit.]

Bot.: The last class in Dr. Lindley's classification of Fruits. The fruit is simple: that is, the ovaria are strictly simple; a single series only being produced by a single flower. Some are one or two seeded, viz., Utricularia, Achæmium, and Drupa; and the rest many-seeded, viz., Folluculus, Legumeo, and Lomentum. [APOCARPOUS.] (Lindley: Introd. to Bot.)

āp-ō-car'-poūs, a. [APOCARPI.]

Bot.: A term applied to the carpels of a compound pistil when they are either wholly or partly distinct. Example: Caltha. It is opposed to SYNCARPOUS (q. v.). (Lindley.)

āp-ō-cā-tās'-ta-sis, s. [Gr. ἀποκατάστασις (apokatastasis) = complete restoration; ἀποκαθίστημι (apokathistēmi) = to re-establish; ἀπό (apo), intensive, and καθίστημι (kathistēmi) = to set down; κατά (kata) = down, and ἵστημι (histēmi) = to make to stand, to set.]

1. Astron.: The period of a planet; the time which it takes to return to the same apparent place in the heavens.

2. Med.: The cessation or subsidence of morbid or other symptoms. (Parr.)

3. Theol.: Final restitution. [UNIVERSALISM.]

āp-ō-cha, s. [Gr. ἀποχή (apochē).] A receipt, a quitance. (Hacket: Life of Williams, i. 25.)

āp-ō-ca-thar'-sis, s. [Gr. ἀποκαθαρσις (apokatharsis) = a thorough cleansug.]

Med.: A purgation, a discharge downwards. Sometimes less properly applied to vomiting.

āp-ō-ca-thar'-tic, a. & s. [Gr. ἀπό (apo), here redundant; and cathartic (q. v.).]

A. As adjective: Cathartic.

B. As substantive: A cathartic (q. v.)

āp-ō-çen-ō-sis, s. [Gr. ἀποκένωσις (apokenōsis) = an emptying.]

Med.: A discharge. A term applied by Dr. Cullen to a discharge with blood. It is limited to hæmorrhægia, in contradistinction to those which are attended with fever. (Parr.)

āp-ō-çhrō-māt'-io, a. [Pref. apo-, and Eng. chromatic (q. v.).]

Optics: An epithet applied to object-glasses so corrected that the secondary residual spectrum is destroyed. This is effected by the use of fluorite and new kinds of optical glass, which allow chromatic correction to be made for three colours instead of two, and of spherical aberration for two colours instead of one.

āp-ō-çhrō-ma-tism, s. [APROCHROMATIC.] Achromatic condition or quality.

\* āp-ō-clāsm, s. [Gr. ἀπόκλασμα (apoklasma) = a breaking off.]

Med.: The breaking away of any part of the body. (Glossog. Nova.)

āp-ō-ōs'-dē-ine, s. [Gr. ἀπό (apo) = from, and Eng. codeine (q. v.).]

bōll, bōy; pōūt, jōwī; cat, çell, chorus, çhin, bench; go, çem; thin, this; sin, aç; expect, çonophon, exist. ph = f. -cian, -tian = çhan. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -sious, -cious = shūs. -ble, &c. = hel. -tre = tēr.

Chem.: C<sub>15</sub>H<sub>19</sub>NO<sub>3</sub>. An organic base obtained by heating a solution of codeine hydrochloride with ZnCl<sub>2</sub>. It is a mild emetic.

**a-pōc-ōp-āte**, v.t. [In Sp. *apocopat*. From Gr. ἀποκόπτω (*apokoptō*) = cut off; ἀποκόπτω (*apokoptō*) = to cut off; ἀπό (*apo*) = from, and κόπτω (*koptō*) = (1) to strike, (2) to cut off.] To cut off.

Spec. In Grammar: To cut off the last letter or syllable of a word. Often in the pa. par. (q. v.).

**a-pōc-ōp-āte**, **a-pōc-ōp-ā-tēd**, pa. par. & a. Cut off, as the last letter or last syllable of a word. Thus, in Heb. יָגֵל (*yigēl*) is the apocotate fut. for יָגַל (*yigēl*), the full form of the future of the Heb. verb גָּלַח (*galah*) = to uncover, to reveal. (Moses Stuart.)

**a-pōc-ōp-ā-tīng**, pr. par. [APOCOTATE, v.]

**a-pōc-ōp-ē**, **āp-ōc-ōp-ŷ**, s. [In Fr., Sp., & Lat. *apocope*; Gr. ἀποκοπή (*apokopē*) = a cutting off; ἀποκόπτω (*apokoptō*) = to cut off.] [APOCOTATE.]

1. Gram.: A figure by which the last letter or syllable of a word is cut away, as in Lat. *ingenit* for *ingenit*.

2. Surg.: The cutting away of any soft part of the body. (Parr.)

**a-pōc-rīš-ār-ī-ūs**, **a-pōc-rīš-ar-ŷ**, **āp-ō-cris-ī-ār-ī-ūs**, s. [Lat. *apocrisarius*, *apocrisarius*. From Gr. ἀποκρίσις (*apokrisis*) = (1) a separating, (2) an answer; ἀποκρίνω (*apokrinō*) = to separate, (middle) to answer; ἀπό (*apo*) = from, and κρίνω (*kri-nō*) = to separate.]

Eccles.: A delegate or deputy sent out by a high ecclesiastical dignitary, as a legate or a nuncio may be by the pope. (Spelman.)

**āp-ō-crūs-tic**, a. & s [Gr. ἀποκρουστικός (*apokroustikos*) = able to drive off; ἀποκρούω (*apokrouō*) = to beat off; ἀπό (*apo*) = from, and κρούω (*krouō*) = to strike, to smite. Or ἀπό (*apo*) = from, and κρουστικός (*kroustikos*) = fit for striking.]

A. As adjective (Med.): Repellent.  
B. As substantive (Med.): A repellent; a medicine operating with a repellent or astringent effect. (Quincy.)

**a-pōc-rŷ-phā**, \* **a-pōc-rī-phā**, s. [In Fr. *apocryphe*. Properly the neut. pl. of the Lat. adj. *apocryphus*; Gr. ἀποκρυφός (*apokryphos*) = hidden. Applied to books, it means (1) of unknown authorship; (2) fabulous, untrustworthy; from Gr. ἀποκρύπτω (*apokryptō*) = to hide from; ἀπό (*apo*) = from, and κρύπτω (*kryptō*) = to hide.]

A. In the Early Christian Church: (1.) Books published anonymously. (2.) Those suitable for private rather than public reading. (3.) Those written by an apostle or other inspired author, but not regarded as part of Scripture. (4.) The works of heretics.

B. In English now:  
I. Literally:  
1. Spec.: The following fourteen books: I. 1. *Esther*; II. 1. *Esther*; III. *Tobit*; IV. *Judith*; V. *Additional to Esther*; VI. *The Wisdom of Solomon*; VII. *Ecclesiastics*, called also the *Wisdom of Jesus*, the son of Sirach; VIII. *Buruch*; IX. *The Song of the Three Holy Children*; X. *The History of Susanna*; XI. *Bel and the Dragon*; XII. *The Prayer of Manasseh*, King of Judah; XIII. 1. *Maccabees*; and XIV. 2. *Maccabees*.

Most of the above-mentioned books were composed during the two centuries immediately preceding the birth of Christ, though some were penned, or at least interpolated, at a later period. They were written not in Hebrew or Aramean, but in Greek; and the Jews never accorded them a place in the Old Testament canon. They were inserted in the Septuagint, and thence passed to the Latin Vulgate. The Christian fathers were divided in sentiment as to their value and the relation they stood to the canonical Old Testament books; Jerome dealing with them in a free, enlightened, and discriminating manner; whilst Augustine and others were much less independent. The question whether or not they were inspired remained an open one till the Reformation. Wickliff, whose mind was cast in what we should now call a wonderfully Protestant mould, was against them; so was Luther: and yet more strongly, Calvin, with his followers. To uphold their waning authority, the Council of Trent, on the 8th of

April, 1546, placed them on an equal level with Scripture, anathematizing all who held the contrary opinion. Portions of them are in the New as well as in the Old Lectionary of the English Church; but the sixth of the Thirty-nine Articles explains that "the other Books" [the fourteen enumerated], "as Hierome saith, the Church doth read for example of life and instruction of manners, but yet doth it not apply them to establish any doctrine." The Westminster Confession of Faith regards them as simply human writings, and denies them all authority. The several apocryphal books are of unequal merit. 1st Maccabees is a highly valuable history; while Bel and the Dragon is a monstrous fable. Taking them as a whole, they throw much light on the religious opinions and the political state of the Jews before the advent of Christ, and explain not a little which else would be obscure in the New Testament.

"We hold out the Apocrypha for sacred, as we do the holy Scripture, but for human compositions."—Hooker.

2. Gen.: Any productions of similar character to the apocryphal books of the Old Testament. Writing regarding gospels of this nature, Strauss says—

"In several apocryphas . . ."—Strauss: *Life of Jesus* (Transl.), vol. I. (1846), p. 209.

II. Fig.: Untrustworthy statement, myth, fable.

"Every account of the habits of a wild animal obtained at second-hand from the reports of aborigines has its proportion of apocrypha."—Owen: *Classif. of Mammals*, p. 21.

**a-pōc-rŷ-phal**, a. & s. [Eng. *apocryphal*(a); -al. In Dan. *apocryphiale*; Dut. *apocryfe*; Ger. *apocryphisch*; Fr. *apocryphe*; Sp. & Ital. *apocryfo*; Port. *apocrypha*.]

A. As adjective:  
\* I. Formerly. In the Early Church: Anonymous, unpublished, uninspired, heretical. [APOCRYPHAL.]

"Jerom, who saith that all writings not canonical are apocryphal, uses not the title apocryphal as the rest of the Fathers ordinarily have done; whose custom is so to name, for the most part, only such as might not publicly be read or divulged."—Hooker.

II. Now:  
I. Pertaining to the fourteen books collectively denominated the Apocrypha.

" . . . the Apocryphal Books which are usually printed between the Old and New Testaments."—Hartwell Horns: *Introd. to Study of Scripture* (1825), vol. IV., 214, note.

¶ *Apocryphal Controversy*: A controversy which arose about 1821, as to whether the Bible Society were acting rightly in binding the Apocrypha between the two Testaments of the Bibles which they issued, this practice having been adopted in order to render the sacred volume more acceptable in Roman Catholic countries or districts. The anti-Apocryphal party ultimately prevailed over their opponents. About 1826 the Apocrypha was altogether excluded from the Society's Bible. [APOCRYPHAL.]

2. Of doubtful authority; mythic, fabulous.  
"The passages to which it refers, are however in part from apocryphal or fictitious works."—Lewis: *Early Rom. Hist.*, ch. III., § 2, vol. I., p. 73.

B. As substantive: One of the fourteen books named under APOCRYPHA, B., I. 1., or any literary production of similar pretensions and character.

"Nicephorus and Anastasius . . . upon this only account (as Usher thinks), because they were interpolated and corrupted, did rank these epistles in the number of apocryphals."—Hammer: *View of Antiquity*, p. 419.

**a-pōc-rŷ-phal-ist**, s. [Eng. *apocryphal*; -ist.] An admirer of the Apocrypha, a defender of the Apocrypha. (*Penny Cyclop.*)

**a-pōc-rŷ-phal-ly**, adv. [Eng. *apocryphal*; -ly.] With doubtful authority or authenticity; mythically. (*Johnson*.)

**a-pōc-rŷ-phal-ness**, s. [Eng. *apocryphal*; -ness.] The quality of being of doubtful authority, if not even indisputably fabulous.

† **a-pōc-rŷ-phic-al**, a. [Eng. *apocryphal*(a); -ical.] The same as APOCRYPHAL.

**a-pōc-rŷ-phŷ**, v.t. [Lat. *apocryphus*, and *sto* used as pass. of *facio* = to make.] To render doubtful. (*Davies: Paper Persecutors*, p. 80.)

**āp-ō-ōy-nā-cē-es**, s. pl. [APOCYNUM.] An order of plants, the English Dog-banes. Lindley places them under his Gentianial alliance, and the Asclepiadaceae, or Asclepiadae, under his Solanale, thus separating two orders which

in nature are closely akin. Both have monopetalous corollas, with five stamens, the fruit in follicles, and the juice milky; but they differ in the details of the sexual apparatus. In 1846, Lindley estimated the known species of Apocynaceae at 566, since increased to about 600. Of 100 known genera only one, *Vinea*, occurs in Britain; the rest inhabit warmer countries than ours.

**a-pōc-ŷ-nŷm**, s. [In Fr. *apocin*; Sp. & Ital. *apocino*; Gr. ἀπόκινον (*apokinson*), a plant, *Cynanthus erectus*; ἀπό (*apo*) = from, and κίνω (*kuōn*) = dog. Literally, *from dog*, or *dog away*; meaning, from which dogs must be kept away, since it is poisonous to them.] Dog's-bane. A genus of plants, the typical one

APOCYNUM ANDROSÆMIFOLIUM.  
1. Flower and leaves. 2. Flower (twice its natural size); showing how the fly is held by its feeler to the stamens of the flower.

of the family Apocynaceae. The species are not very beautiful. The North American Indians use the fibres of the bark of *A. cannabinum* and *hypericifolium* as a substitute for those of hemp in manufacturing cordage, linen cloth, &c. *A. androsæmifolium* is the fly-trap of North America. [FLV-TRAP.]

**āp-ōd-a**, s. pl. [Gr. ἀποδα (*apoda*), neut. pl. of ἀπους (*apous*), genit. ἀποδος (*apodos*) = without feet.]

\* I. Zool.: Aristotle's third section of Zootoka, or air-breathing vivipara. It included the Whales, which the Stagirate, with remarkable scientific accuracy, ranked with the warm-blooded quadrupeds. (See Owen: *Classif. of the Mammalia*, 1859, p. 2.)

2. The second order of the class Amphibia, or Batrachia. The body is like that of an earthworm, and is quite destitute of feet. The order contains but one family, the Cæciliadæ (q. v.).

3. According to Professor Müller, a group of fishes belonging to the sub-order Physostomata. It is so called because the ventral fins are wanting. It contains three families, the Murenidæ, or Eels, the Gymnotidæ, and the Symbranchidæ.

† **āp-ō-dæc-rŷt-ic**, \* **āp-ō-dæc-rŷs-tick**, s. [Gr. ἀποδακρυτικός (*apodakrutikos*) = calling forth tears; ἀποδακρῦω (*apodakruō*) = to shed many tears; ἀπό (*apo*), intensive, and δάκρυν (*dakruō*) = to weep; δάκρυ (*dakru*), or δάκρυν (*dakruon*) = a tear.]

Pharmacy: A medicine tending to produce tears.  
"Apodacryticks (Gr.). Medicines that provoke tears."—*Glossog. Nova*, 2nd ed.

**āp-ōd-al**, a. & s. [APODA.]

A. As adjective:  
1. Gen.: Without feet.

2. Ichthy.: Without ventral fins.

B. As substantive: Used specially in the second and third senses given under APODA (q. v.).

Plural: The English equivalent for APODA (q. v.).

**āp-ōd-an**, \* **āp-ōd-on**, s. [Eng. *apode*; -an.] An animal destitute (a) of feet, or (b) of ventral fins. [APODA.]

† **āp-ōde**, s. [APODA.] The same as APODAL (q. v.).

**āp-ōd-ēs**, s. pl. [Gr. ἀποδες (*apodes*), the pl. of ἀπους (*apous*), genit. ἀποδος (*apodos*) = without feet.]

1. Gen.: Animals without feet.

**fāte**, **fāt**, **fāre**, amidst, **whāt**, **fāll**, father; **wē**, **wēt**, here, camel, **hēr**, there; **pīt**, **sīre**, sir, marine; **gō**, **pēt**, or. **wōre**, **wōlf**, **wōrk**, **whō**, **sōn**; **mūte**, **cūh**, **cūre**, unite, **cūr**, **rāle**, **fūll**; **tŷrŷ**, **Sŷrian**. **œ**, **ø** = **ē**; **ē** = **ē**. **qu** = **kw**.

\* 2. Spec.: Linnaeus's first order of Fishes. He placed under it the genera destitute of ventral fins. The assemblage was not wholly a natural one.

ap-ō-dic-tic, \*ap-ō-dic-tick, ap-ō-dic-tic-al, a. [Lat. apodicticus; Gr. ἀποδεικτικός (apodeiktikós), ἀποδείκνυμι (apodeiknumi) = to point away from, . . . to demonstrate; ἀπό (apo) = from, or intensive; and δείκνυμι (deiknumi) = to bring to light, . . . to show, . . . to prove. Or ἀπό (apo), and δείκτικός (deiktikós) = able to show.] Demonstrative; capable of being established on demonstrative evidence. (The term was introduced by Aristotle, and has been used in modern times by Kant and others.)

"The argumentation is from a similitude, therefore not apodictic, or of evident demonstration."—Robinson: Eudæa, p. 25. "Holding an apodictic knowledge and an assured knowledge of it; verily, to persuade their apprehensions otherwise were to make an Euclid believe that there were more than one centre in a circle."—Brown: Vulgar Errors.

ap-ō-dic-tic-al-ly, adv. [Eng. apodictic; -ly.] With complete mathematical demonstration; irrefragably.

"Mr. Mede's synchronisms are apodictically true to any one that has but a competency of wit and patience to pursue them."—Dr. H. More: Myst. of Godd., p. 175.

a-pōd-i-dæ, s. pl. [APUS.] A family of Entomostracans of the order Phyllopora. The typical genus is Apus.

ap-ō-dī-ōx-īs, s. [Gr. ἀποδιώκω (apodiōkō), fut. ἀποδιώξομαι (apodiōxomai) = to chase away; ἀπό (apo) = from, away; διώκω (diōkō) = to make to run, to pursue.]

Rhet.: A figure in which a particular argument is rejected with indignation. (Glossog. Nova, 2nd ed.)

ap-ō-dix-īs, s. [Latin; from Gr. ἀποδείξις (apodeixis) = a showing forth, . . . demonstration; ἀποδείκνυμι (apodeiknumi) = to show forth.] [Apodictic.] Demonstration; the establishment of a proposition on absolutely irrefragable evidence. (Johnson.)

\* ap-ōd-ōn, s. [APODAN.]

ap-ō-dōg-yn-ōus, a. [Gr. ἄ, priv.; πούς (pous) = a foot; and γυνή (gunē) = woman.] Bot.: A name given by Richard to disks which do not adhere to the base of an ovary.

ap-ōd-ō-sis, s. [Lat. apodosis; Gr. ἀπόδοσις (apodosis) = a giving back. . . In Gram. (see def.); Gr. ἀπό (apo) = from, and δόσις (dosis) = a giving; from δίδωμι.]

Gram.: The chief clause in a conditional sentence, that intimating the consequence which will ensue if the condition expressed in the subordinate clause which preceded it, called the protasis, be realised. In the sentence, "If ye shall ask anything in my name, I will do it" (John xiv. 14), the protasis is, "If ye shall ask anything in my name," and the apodosis, "I will do it." Some grammarians extend the terms protasis and apodosis to antecedent and consequent clauses, even when the sentences to which they belong are not conditional.

It is observed by Jaspis that the Apodosis has put only two members of the comparison, when there should properly have been four, omitting one in the protasis and mother in the apodosis."—Bloomfield: Greek Test. (1841; Comment on Rom. vi. 4.

ap-ō-dy-tēr-ī-ūm, s. [Lat. apoditerium; Gr. ἀποδύτηριον (apodytērion): from ἀπόδυσις (apodysis) = to strip off; ἀπό (apo), priv., and δύω (duō) = to get into, to put on.]

1. Classical antiquity: A room where one stripped before going into the bath. 2. Now: Any room used for the purposes of robing and unrobing.

ap-ō-gēe, \*ap-ō-gē-ūm, \*ap-ō-gē-ūm, \*ap-ō-gē-ōn, \*ap-ō-gē-ōn, s. [In Fr. apogée; Sp., Port., & Ital. apogee. Apogeeum and apogeeum are properly the neut. of adj. apogaeus, and apogeeum and apogeeum are Latinised from the Gr. ἀπόγειον (apogeeion), neut. of adj. ἀπόγειος (apogeeios), also ἀπόγειος (apogeeios), and ἀπόγειος (apogeeios) = from land, or the earth; (Astron., in apogee: see def.); ἀπό (apo) = from, and γαίος (gaios) = on land; γαία (gaiá) = land: from γῆ (gē) = land, also the earth.]

1. Astron.: The point in the orbit of any planet at which it is the greatest distance from the earth. When a corresponding term was introduced by the ancients, they proceeded on the supposition that the earth was the centre of the solar system, and therefore measured from it. The sun, therefore, was at a certain time said to be in apogee. The term is still used, but in general it is more correctly stated, not that the sun is in apogee, but that the earth is in aphelion (APHELION); in other words, measurement is made from the sun as the centre, not from the earth. The moon, again, being the satellite of the earth, is appropriately said to be at a certain time in apogee. The lunar spogee circulates in about nine and a half years. "It is yet not agreed in what time, precisely, the apogeeum absolveth one degree."—Brown: Vulgar Errors. ". . . while on the other hand the sun is most remote (in apogee, or the earth in its aphelion)."—Herschel: Astron., § 208A. See also §§ 406 and 687. 2. Fig.: As high above one, or as far from a person or thing as it is possible to be. "Thy sin is in his apogeeum placed; And when it moveth next must needs descend."—Pierifax.

ap-ō-gēu-sis, s. [Gr. ἀπογεύσις (apogeusis); from ἀπογεύομαι (apogeomai) = to take a taste of anything; ἀπό (apo) = from, and γεύω (geuō) = to give a taste of. Or ἀπό (apo) = from, and γεύσις (geusis) = the sense of taste; from γεύω (geuō).] The same as APOESTIA (q.v.). (Parr.)

ap-ō-gī-a-tū-ra, ap-ō-gī-a-tū-ra, s. [APPOGIATURA.]

ap-ō-gōn, s. [Gr. ἀπόγων (apogōn) = beardless; ἄ, priv., and ὤγων (ogōn) = beard.] A genus of spiny-finned fishes of the Percidae, or Perch family. A Mediterranean species is called A. rex mullorum = the king of the mullets. It is red, with a black spot on each side of the tail. It is three inches long. Another species is the A. fasciatus, or Banded Mullet, of the Feejee Islands.

ap-ō-grāph, s. [Lat. apographon; Gr. ἀπογράφον (apographōn) = a copy; from ἀπογράφω (apographō) = to write off, to copy; ἀπό (apo) = from, and γράφω (graphō) = to write.] A transcript; a copy. (Blount.)

\* ap-ōg-ra-phal, a. [Eng. apograph; -al.] Pertaining to an apograph.

"Parallel places—nowhere else extant but in these apocryphal apographal pieces, either as citations out of, or allusions to, them."—Dr. Lee: Dissert. Theol. (1822), vol. I, p. 124.

† ap-ō-jove, s. [Gr. ἀπό (apo) = from, and Eng. Jove = Jupiter; from Lat. Jovis, genit. of Jupiter.]

Astron.: The point in the orbit of any one of Jupiter's satellites at which it is as far from the planet as it can go. A word framed on the model of APOOEE & APHELION (q.v.) It is opposed to PERJIOVE.

a-pō-lar, s. [Gr. ἄ, priv., and Eng. polar.] Not polar.

Anat.: Pertaining to nerve-cells which send out no fibre. Kölliker at first maintained their existence, but afterwards thought they might be unipolar cells, with the issuing fibre in some way hidden from view.

"Some writers still insist upon the existence of 'apolar' and 'unipolar' nerve-cells in many parts of the nervous system, although the results of observation positively prove the existence of two fibres in the case of cells which had previously been regarded as unipolar and apolar."—Beale: Bioplasm (1872), § 243.

"See also my paper on the structure of the so-called Apolar, Unipolar, and Bipolar Nerve Cells. Phil. Trans., 1893.—Ibid., § 273.

\* ap-ō-lēp-sy, \*ap-ō-lēp-sis, s. [Gr. ἀπολήψις (apolepsis) = (1) a taking back, a recovery; (2) an intercepting, a cutting off; from ἀπολαμβάνω (apolambanō) = fut. ἀπολήψομαι (apolepsomai) = to take or receive from; ἀπό (apo) = from, and λαμβάνω (lambanō) = to take. Or ἀπό (apo) = from, and λήψις (lēpsis) = a taking hold; from λαμβάνω (lambanō).]

Old Med.: An obstruction of the blood; a retention or suppression of urine or any other natural evacuation. (Parr, &c.)

"Apolepsus (Gr.). The interception of blood and animal spirits."—Glossog. Nov., 2nd ed.

A-pōl-lin-ār-i-an, a. [Lat. Apollinaris = pertaining to Apollo.] Pertaining to or connected with Apollo.

Apollinarian games. Certain games instituted among the Romans in the year 212

B.C., after the battle of Cannæ, and celebrated by means of scenic representation.

A-pōl-lin-ār-i-an-s, A-pōl-lin-ār-ī-sta, s. pl. [From Apollinaris the Younger, Bishop of Laodicea in the latter part of the fourth century.] The followers of the Apollinaris mentioned above, who contended for the divinity of Christ against the Arians, but taught that Christ assumed only a human body endowed with a sentient, but not an intellectual, soul. He believed that the divine nature in Christ supplied the place of a rational human soul. His views seem to have tended in the direction of those afterwards held by Eutyches. They were condemned by the Council of Constantinople in A.D. 381.

A-pōl-lō, s. [Lat. Apollo; Gr. Ἀπόλλων (Apollōn).]

Classic Myth: The god of poetry, music, medicine, archery, and surgery. He is usually represented as a handsome young man, beardless, and with long hair on his head, which, moreover, is crowned with laurel, and surrounded by rays of light. In his right hand he bears a bow and arrows, and in his left a harp.

"And all Apollo's animating fire."—Thomson: The Seasons; Winter.

The Apollo Belvedere: A celebrated statue of Apollo, so called from having been placed in the Belvedere of the Vatican by Pope Julius II. It was found in the ruins of ancient Antium, now Capo d'Anzo, about the end of the fifteenth or the beginning of the sixteenth century, and was sculptured probably about the time of Nero. Byron gives a beautiful description of this famous statue in Child's Harold, iv, THE APOLLO BELVEDERE, 141-163.

A-pōl-lōn-ī-ōn, s. [Lat. Apollō; Gr. Ἀπόλλων (Apollōn), the god of music, &c.; Gr. suffix -ων (ōn) = Eng. -ion.] The name given by Messrs. Flight & Robson, of St. Martin's Lane, to a very powerful chamber-organ, exhibited by them in 1817, and giving the combined effect of a complete orchestra. It was so constructed that it might be self-acting, or might be played upon in the usual manner by means of keys.

A-pōl-lō-ōn, s. & a. [Gr. Ἀπολλών (Apollōn), the pr. par. of ἀπόλλυμι (apollumi), or ἀπολλύω (apolluō) = to destroy utterly.]

A. As substantive: Destroyer. The Greek name applied in Rev. ix. 11 to the "angel of the bottomless pit," called in Hebrew Abaddon (q.v.). Bunyan introduces it into the Pilgrim's Progress as the name of a fiend.

B. As adjective: Destructive. "Bat he [Kant] had no instincts of creation or restoration within his Apollonian mind."—De Quincey's Works (ed. 1853), vol. II, p. 68.

A-pōl-lō-ōn-ī-st, s. [Eng., &c., Apollonyon; -ist.] One who follows a or is subject to Apollonyon. Spec., the "locuats" of Rev. ix. "The Locuater or Apollonyonts."—Phineas Fletcher: Poems (ed. Grosart), II, 68-107.

a-pōl-lō-ō-ōn-ī-c, \*a-pōl-lō-ō-ōn-ī-c, a-pōl-lō-ō-ōn-ī-c-al, a. [Fr. apologeticque; Port. & Ital. apologetico; Lat. apologeticus; Gr. ἀπολογητικός (apologētikos) = fit for a defence.]

† I. Spoken or written in defence of a person, a faith, an opinion, &c., and not intended to imply the smallest admission of error. [APOLOGETICS.]

"With the advance of theology, general Apologetics tends to disappear, and in its stead comes an apologetic introduction justifying each of the fundamental doctrines of dogmatics."—Ency. Brit., 7th ed., II, 169.

2. Acknowledging slight error which, passed over in silence, might give just offence.

"I speak in a subdued and apologetic tone."—Macaulay: Hist. Eng., ch. xviii. "I design to publish an essay, the greater part of which is apologetic, for one sort of chymists."—Boyle

bōil, bōy; pōut, jōwl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xophon, exist. -ing. -cian, -tian = shān. -tion, -sion = shūn; -tion, -sion = zhūn. -tions, -sions, -cions = shūs. -ble, -dle, &c. = bēl, cē.

**ap-ōl-ō-gēt-ic-al-lŷ, adv.** [Eng. *apologetical*; -ly.] In apologetical language, in an apologetical tone; by way of apology.

"... has been apologetically explained by the supposition."  
—*Schrauss: Life of Jesus* (ed. 1846), vol. II, § 67, p. 82.

**ap-ōl-ō-gēt-ics, s.** [In Ger. *apologetik*.] [APOLOGETIC.] The department of theology which treats of the establishment of the evidences and defence of the doctrines of a faith.  
*Christian apologetics*, generally called simply *apologetics*, treats of the evidences of Christianity, and seeks to establish the truth of the Bible and the doctrine deduced from it.

¶ North (*Examen*, p. 305) uses the rare singular form *apologetic*.

**ap-ō-lōg-ic-al, a.** [Eng. *apologue*]; -ical.] Of the nature of an apologue. (*Adams: Works*, II, 166.)

**ap-ōl-ō-gī-se, [APOLOGIZE.]**

**ap-ōl-ō-gīst, s.** [In Fr. *apologiste*; Sp. & Port. *apologista*.] One who defends a faith, an institution, a practice, a deed, &c. *Spec.*, one who defends Christianity, or the character and proceedings of its professors. (*Cowper: Erpistolation*.)

**ap-ōl-ō-gīze, ap-ōl-ō-gī-se, v. l. & i.** [Gr. ἀπολογίζομαι (*apologizomai*) = to reckon up, to give an account.]

\* I. *Transitive*: To defend.

II. *Intransitive*: To make an acknowledgment of a greater or smaller amount of error (generally the latter), as a moderate atonement for an injury done one. (It is sometimes followed by *for*, and an obj. case.)

"To apologize especially for his insolent language to Gardner."  
—*Freude: Hist. Eng.*, vol. III, ch. XVII, p. 70.

¶ Sometimes a person apologises for a deed requiring far graver treatment.

"... to apologize for a judicial murder!"  
—*Maulsby: Hist. Eng.*, ch. XIV.

**ap-ōl-ō-gī-zēr, ap-ōl-ō-gī-sēr, s.** [Eng. *apologize*, *apologist*; -er.] One who defends a person, a faith, an institution, &c.; an apologist.

"His apologisers labour to free him; laying the fault of the errors fathered upon him onto the charge of others."  
—*Donner: View of Antiquity*, p. 230.

**ap-ōl-ō-gue, s.** [In Ger. *apolog*; Fr. *apologie*; Sp., Port., & Ital. *apologia*; Lat. *apologus*; from Gr. ἀπόλογος (*apologos*) = (1) a long story, a tale; (2) a fable, like Æsop's; (3) an account; Gr. ἀπό (*apo*) = from, and λόγος (*logos*) = discourse; meaning that an apologue is a discourse drawn from (a fable).] A fable designed to convey to, and impress upon, the mind some moral truth. It resembles a parable, but differs in this respect, that, whereas the event narrated in the parable is within the limits of probability, and might have happened, if indeed it has not actually done so, it can draw for its speakers and actors on the brute creation, or even on inanimate nature. The prodigal son (Luke xv. 11-32) and the ewe lamb (2 Sam. xii. 1-14) are properly parables; whilst the story of the trees electing a king (Judg. ix. 7-20) is an apologue.

"The Senate having decided in favour of a conciliatory course, sent Meenius Agrippa as their envoy to the seceders, who addresses to them the celebrated apologue of the Belly and the Limbs."  
—*Lewis: Early Rom. Hist.*, ch. XII, pt. I, § 16.

† **ap-ōl-ō-guēr, \*ap-ōl-ō-gēr, s.** [Eng. *apologue*; -er.] One who utters apologues.

"A mouse, saith an apologeter [apologuer], was brought up in a chest, there fed with fragments of bread and cheese."  
—*Burton: Anat. of Mel.*, p. 559.

"Why may not a sober apologeter [apologuer] be permitted, who brings his burden to root the contradictions of fiery wits?"  
—*Waterhaus: Apology for Learning*, &c. (1658), p. 258.

**ap-ōl-ō-gŷ, \*ap-ōl-ō-gīe, s.** [In Fr. *apologie*; Sp., Port., Ital., & Lat. *apologia*; Gr. ἀπολογία (*apologia*) = a defence, a speech in defence; ἀπό (*apo*) = from, and λόγος (*logos*) = a word, language, . . . discourse; λέγω (*legō*) = . . . to speak.]

† 1. The act of making a defence against an accusation; vindication, without its being implied that in this there is anything hollow or unsatisfactory; also the defence made.

¶ Used specially of the defence of Christianity and its professors, against opponents and calculators, made by several of the early Fathers. Thus, Justin Martyr wrote two "Apologies"—one about A. D. 150, and the

other after 160; Athenagoras one in 177, and Tertullian in 198; as did Melito, Quadratus, Miltiades, Aristides, and Tatian in the same century. Many works of a similar character were subsequently published, though not always, or even generally, under the same title. Various modern writers have used the term *Apology* in the old sense: thus, Bishop Richard Watson was author of an "Apology for Christianity," and an "Apology for the Bible." So also the department of theology once generally termed "Evidences of Christianity" is now technically denominated *Apologetics* (q. v.).

"We have, among other works of his [Justin Martyr's], two *Apologies for the Christians*."  
—*Mosheim: Church Hist.*, Cent. I., pt. II, ch. II, § 5.

2. An admission of a fault; generally one of no great magnitude, for which this slight humiliation is held sufficient to atone. Sometimes it is so small that the apology for it approaches a full vindication, and sometimes, as in cases of libel, so grave that, even when the apology is accepted, the whole expenses of the trial-at-law are cast on the person who acknowledges himself to have erred.

¶ Crabb considers that "there is always some imperfection, supposed or real, which gives rise to an apology; that "a defence presupposes a consciousness of Innocence more or less;" that "a justification is founded on the conviction not only of entire innocence, but of strict propriety;" that "exculpation rests on the conviction of innocence with regard to the fact." "Excuse and plea are not grounded on any idea of innocence; they are rather appeals for favour resting on some collateral circumstance which averts to extenuate: a plea is frequently an idle or unfounded excuse, a frivolous attempt to lessen displeasure." He adds that "Excuse and plea, which are mostly employed in an unfavorable sense, are to apology, defence, and exculpation, as the means to an end; an apology is lame when, instead of an honest confession of an unintentional error, an idle attempt is made at justification; a defence is poor when it does not contain sufficient to invalidate the charge; a justification is nugatory when it applies to conduct altogether wrong; an excuse or a plea is frivolous or idle, which turns upon some falsehood, misrepresentation, or irrelevant point."  
(*Crabb: Eng. Synonyms*.)

**ap-ō-mē-cōm-ē-tēr, s.** [APOMETROMETRY.] An instrument for measuring objects at a distance.

**ap-ō-mē-cōm-ēt-rŷ, s.** [Gr. ἀπό (*apo*) = from; μήκος (*mēkos*) = length, and μετρώ (*metrō*) = to measure; μέτρον (*metron*) = a measure.] The measuring or measurement of objects at a distance. (*Dyche*.)

**ap-ō-mōr-phine, s.** [Gr. ἀπό (*apo*) = from, and Eng. *morphine* (q. v.).]

*Chem.*: C<sub>17</sub>H<sub>17</sub>N<sub>3</sub>O<sub>2</sub>. An organic base obtained by heating morphine or codeine in a sealed tube to 150°, with excess of HCl. Apomorphine is soluble in alcohol and ether, and is precipitated by caustic potash and ammonia. It gives a dark-violet liquid with FeCl<sub>3</sub>. It is an emetic, in small doses.

\* **ap-ōn-ē, prep.** [UPON.]

**ap-ō-nē-crō-sis, s.** [Gr. ἀπὸνεκρῶσις (*aponekrōsis*) = a becoming quite dead; ἀπνεκρώω (*aponekrōō*) = to kill utterly, especially by cold; ἀπό (*apo*) = from, and νεκρός (*nekros*) = to kill; νεκρός (*nekros*), s. = a dead body, adj. = dead.]  
*Med.*: Complete death.

**ap-ō-neūr-ōg-rā-phŷ, s.** [Gr. ἀπονεύρωσις (*aponeurōsis*), and γραφή (*graphē*) = a delineation, . . . a description.] [APONEUROSIS.]  
*Med.*: The department of medical science which treats of aponeurosis.

**ap-ō-neūr-ō-sis, ap-ō-neūr-ō-sŷ, s.** [In Fr. & Port. *aponevrose*; Gr. ἀπὸνεύρωσις (*aponeurōsis*) = the end of muscle, where it becomes tendon (*Galen*); ἀπνεύρωσις (*aponeurōsis*) = to change into a tendon; ἀπό (*apo*) = from, and νεύρον (*neurōn*) = to strain the sinews; νεύρον (*neurōn*) = a sinew, a tendon.] The expansion of a tendon into a membrane, lamina, or fascia. Aponeuroses occur in connection with the voluntary muscles.

"... attached by their extremities, through the medium of tendon, aponeurosis, or some form of the fibrous tissue."  
—*Todd & Bowman: Physiol. Anat.*, vol. I., p. 150.

**ap-ō-neūr-ōt-ic, a.** [In Fr. *aponevrotique*; Port. *aponevrotico*.] [APONEUROSIS.] Pertaining to aponeurosis.

"Aponevrotic tendinous expansions."  
—*Todd & Bowman: Physiol. Anat.*, I, 71.

**ap-ō-neūr-ōt-ōm-ŷ, s.** [Gr. (1) ἀπό (*apo*) = from; (2) νευροτόμος (*neurōtomos*) = cutting sinews; νευροτομή (*neurōtomē*) = to cut the sinews; νεύρον (*neurōn*) = a sinew, and τέμνω (*temnō*) = to cut.] The dissection of an aponeurosis (q. v.).

**ap-ōn-ō-gē-tōn, s.** [In Fr. *aponeget*. An incomplete anagram of the word ΠΟΤΟΜΑΓΕΤΟΝ (q. v.).] A plant belonging to the order Naiadaceæ, or Naiada. The species are aquatics, ornamental in an aquarium. In India the tuberous roots of *A. monostachyon*, or simple-spiked Aponegeton, are eaten by the natives like potatoes.

**ap-ō-rēmp-tic, a. & s.** [Gr. ἀπόρρητος (*aporrhētos*) = sent forth, dismissed; ἀπορέω (*aporēō*) = to send off, to dismiss; ἀπό (*apo*) = from, and πέμπω (*pempō*) = to send.]

A. *As adjective*:

*Classic Poetry*: Pertaining to a hymn addressed to a stranger on his departure from a place to his own country, or to the gods when they were fabled to be about to return to their habitation.

B. *As substantive*: A hymn used on such occasions.

**ap-ō-ph-ā-sis, s.** [In Fr. *apophase*; Gr. ἀπόφασις (*apophasis*) = a denial, a negation; ἀπόφηναι (*apophēnai*) = (1) to speak out plainly; (2) to say no, to deny; ἀπό (*apo*) = from, and φηναι (*phēnai*) = to declare.]

*Rhet.*: A figure by which a speaker formally declines to take notice of a point, with the probable effect of making the imagination of his audience so to work on what he has ostentatiously declined to bring forward, as to cause them to be more affected by it than if he had spoken out plainly.

**ap-ō-phlēg-māt-ic, a. & s.** [Gr. ἀπό (*apo*) = from, and φλέγμα (*phlegma*) = (1) flame, (2) inflammation, (3) phlegm; from φλέγω (*phlegō*) = to burn.]

A. *As adjective*: Designed to expel phlegm by the nostrils.

B. *As substantive*: A medicine designed or fitted to cause the flow of serous or mucous humour from the nostrils. Some stimulatives have this effect. (*Johnson*.)

**ap-ō-phlēg-mā-tŷm, s.** [In Ger. *apophlegmatismus*; Gr. ἀποφλεγματισμός (*apophlegmatismos*); ἀποφλεγματίω (*apophlegmatizō*) = to purge away phlegm; ἀπό (*apo*) = from, and φλέγμα (*phlegma*) = a flame, inflammation, phlegm.] A medicine specially designed to expel phlegm from the blood.

"... and so it is in apophlegmatism and gargarism, that draw the rheum down by the palate."  
—*Beacon: Nat. Hist.*, Cent. I., § 38.

**ap-ō-phlēg-mā-tiz-ant, s.** [Gr. ἀποφλεγματίω (*apophlegmatizō*) = to expel phlegm.] An apophlegmatic (q. v.). (*Quincy*.)

**ap-ō-phthēgm, ap-ō-thēgm, (ph and g silent), s.** [In Ger. *apophthegma*; Fr. *apophthegme*; Sp. *apoflegma*; Port. *apophthegma*, *apofthegma*; Ital. *apoflegma*; Gr. ἀποφθέγμα (*apophthēgma*), ἀποφθέγγομαι (*apophthēngomai*) = to speak one's opinion plainly, to utter an apophthegm; ἀπό (*apo*) = from, and φθέγγομαι (*phthēngomai*) = to utter a sound, to speak out. Or Gr. ἀπό (*apo*) = from, and φθέγω (*phthēgō*) = a voice, from φθέγγομαι (*phthēngomai*).] A terse pointed saying; a maxim expressed in few but weighty words; a brief pithy remark uttered by a distinguished character, or on a notable occasion.

"So again in his book, *Apophthegma*, which he collected, we see that he esteemed it more honour to pluck himself but a pair of teatles, to take the wise and pithy words of others, than to have every word of his own to be made an apophthegm, or an oracle, as vain princes, by custom of flattery, pretend to do."  
—*Beacon: Adv. of Learning*, bk. I.

**ap-ō-phthēg-māt-ic, ap-ō-thēg-māt-ic, ap-ō-phthēg-māt-ic-al, ap-ō-thēg-māt-ic-al, (ph & g silent), a.** [Gr. ἀποφθεγματικός (*apophthēgmaticos*).] Sententious.

fate, fāt, färe, amidst, whāt, fäll, father; wē, wēt, hère, camēl, hēr, thère; pine, pīt, sire, sir, marine; gō, pūt, or. wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unīte, cūr, rūle, fūll; trŷ, Sŷrian. a, œ = é. ey = ä. qu = kw.

ap-ō-phthēg'-ma-tist, ap-ō-thēg'-ma-tist, a. [Gr. ἀποφθεγματῆς (apophthegmatēs), genit. of ἀποφθεγμα (apophthegma), and Eng. suff. -ist.] One who collects or composes apophthegms.

ap-ō-phthēg'-ma-ti-zē (ph silent), ap-ō-thēg'-ma-ti-zē, v.i. [Formed like APOPHTHEGMATIST (q.v.), but with Eng. suffix -ize = to make.] To utter apophthegms.

ap-ō-ph'-y-gē, ap-ō-ph'-y-gy, s. [In Ital. apofigi; Lat. apophyges; Gr. ἀποφυγή (apophugē) = (1) an escape or place of refuge; (2) Arch. (see def.); ἀποφυγή (apophugē) = to flee from; ἀπό (apo) = from, and φύγω (phugō) = to flee. Gr. ἀπό (apo) = from, and φυγή (phugē) = flight, escape.]

Arch.: The small curve at the top of a column by which its shaft joins its capital. It is sometimes called the spring of the column. Originally it was the ring which bound the extremities of wooden pillars to keep them from splitting, imitated in stone-work. The same name is given to the corresponding concavity connecting the bottom of a pillar with the fillet at its base.

ΑΠΟΦΥΓΕ.

\*Apophyge in architecture is that part of a column where it seems to fly out of its base, like the process of a bone in a man's leg, and begins to shoot upwards."—Glossog. Nova, 2d ed.

ap-ō-ph'-yl-lite, s. [In Ger. apophyllit; Gr. (1) ἀπό (apo) = from; (2) φύλλον (phullon) = a leaf; and (3) suff. -ite (λίτη) (q.v.). Apophyllite was so called by Häuy from the tendency to exfoliate.] A tetragonal mineral, called also Ichthyophthalmite, classed by Dana as the type of an Apophyllite group of Uniafficates. The hardness is 4.5 to 5; the sp. gr. 2.3 to 2.4; the lustre of the face of the crystal terminating the low prism, pearly; that of the sides, vitreous. Colour: white or grayish; occasionally with greenish, yellowish, rose-red, or flesh-red tint. It is generally transparent; is brittle, and has feeble double refraction. It is a "hydrated calceo-potassic silicate;" its composition being—silica, 51.60 to 52.69; lime, 24.71 to 25.86; potassa, 4.75 to 5.75; water, 15.73 to 16.73; and fluorine, 15.73 to 16.67. It occurs chiefly in amygdaloid, though occasionally in granite and gneiss. It is found at Ratho, near Edinburgh, and in Fife, Dumbarton, and Inverness-shires. It occurs also on the continent of Europe; near Poonah and Ahmedungur, in India; in Siberia; in Nova Scotia, and other localities in America; in Australia, and elsewhere. Dana subdivides it into Ordinary (1) Oxhaverite; (2) Tesselite; (3) Leucocyclite; and places with it also Xylochlore.

a-pōph'-y-sis, † a-pōph'-y-sy, s. [Gr. ἀποφύσις (apophusis) = an offshoot; ἀποφύω (apophuō) = to put forth as an offshoot, (passive) to grow; ἀπό (apo) = from, and φύω (phuō) = to bring forth.]

1. Anat.: The process of a bone. \*Processes of bone have usually their own centres of ossification, and are termed epiphyses until they are finally joined to the main part, after which they receive the name of apophyses."—Todd & Bowman: Physiol. Anat., l. 116.

2. Bot.: A sprouting in mosses, which is regularly lengthened. It occurs in most species of the genus Splachnum. (Lindley: Introduct. to Bot.)

3. Arch.: The same as ΑΠΟΦΥΓΕ (q.v.).

ap-ō-plān-ō-sis, s. [Gr. ἀποπλάνησις (apoplanēsis), see def.; ἀποπλάνω (apoplanō) = to make to digress. Or ἀπό (apo) = from, and πλάνησις (planēsis) = a making to wander; πλανάω (planō), fut. πλανήσω (planēsō) = to make to wander; πλάνη (planē) = a wandering.]

Rhet.: A digression.

ap-ō-plēc'-tic, \* ap-ō-plēc'-tick, a. & s. [In Fr. apoplectique; Sp., Port., & Ital. apoplectico; Lat. apoplecticus; Gr. ἀποπληκτικός (apoplektikos).]

A. adjective: Relating to apoplexy. \*Soon after he had risen from table, an apoplectic stroke deprived him of speech and sensation."—Macaulay: Hist. Eng., ch. xvii.

B. As substantive: A person afflicted with apoplexy.

"Rasis, the Arabic physician, hath left it written as I have it from Quistorpius, that it was ordained by a law, that no apoplectics, who foamed about the mouth, should be buried till after seventy-two hours."—Knatchbull: Tr., p. 77.

\*ap-ō-plēc'-tic-al, a. [Eng. apoplectic; -al.]

The same as APOPLECTIC, adj. (q.v.).

"In an apoplectic case he found extravasated blood making way from the ventricles of the brain."—Derham.

ap-ō-plēxed, a. [Old Eng. apoplex (APOPLEXV); -ed.] Affected with apoplexy.

"... But, sure, that sense is apoplex'd: for madness would not err."—Shakesp.: Hamlet, III. 4.

ap-ō-plēx-ŷ, \* ap-ō-plēx-ie, \* ap-ō-plēx, s. [In Fr. apoplexie; Sp. apoplejia; Ital. apoplessia; Ger., Port., & Lat. apoplexia; Gr. ἀποπληξία (apoplexia) = (1) a being disabled in mind, stupor; (2) the bodily disease described below; from ἀποπληκτος (apoplektos), ἀποπληκτω (apoplekō) = to disable in body or mind. Or ἀπό (apo) = from, and πλῆξις (plēxis) = a stroke, a blow; πλῆσσω (plēsō) = to strike, to amite.]

1. Med.: A serious malady, coming on so suddenly and so violently that anciently any one affected by it was said to be *attonitus* (thunder-struck), or *sideratus* (planet-struck). When a stroke of apoplexy takes place, there is a loss of sensation, voluntary motion, and intellect or thought, whilst respiration and the action of the heart and general vascular system still continue. The disease now described is properly called *cerebral* apoplexy, the *cerebrum* or brain being the part chiefly affected. Another malady has been called not very happily *Pulmonary Apoplexy*. It is the Pneumo-hemorrhagia of Andral, and consists of an effusion of blood into the parenchymatous substance of the lung, like that into the substance of the brain in cerebral apoplexy. "F. Humph. This apoplex will, certain, be his end."—Shakesp.: 2 Henry IV., IV. 4.

2. Fig.: Anything that dulls the senses and paralyzes action in the frame. "Peace is a very apoplexy, lethargy, muffled, deaf, sleepy, insensible."—Shakesp.: Coriolanus, IV. 5.

ap-ō-pnix'-is (p often silent), s. [From Gr. ἀποπνίξις (apopnixis) = to choke. Or ἀπό (apo), intensa, and πνίξις (pnixis) = strangling, smothering; πνίγω (pnigō) = to choke.]

Med.: Suffocation.

ap-or-ē-tin, s. [Possibly ἀπό (apo) = from, and ῥητίνη (rhetinē) = resin gum.] A resin obtained by chemical process from extract of rhubarb.

a-pōr'-ia, ap-ō-r'y, s. [Lat. aporia; Gr. ἀπορία (aporía) = being "without passage," involved in difficulty; ἀπορος (aporos) = without passage, difficult; ἀ, priv., and πορος (poros) = means of passing, . . . a pathway.]

1. Rhet.: Perplexity, real or affected, on the part of a speaker as to what to choose from the great abundance of matter lying ready to his hand. Specially perplexity where to begin, where to end, what to say, and what, though well worthy of being stated, to pass by. Aporia is used also for the real or affected perplexity felt by a speaker in coming to a decision on points of difficulty in connection with which there are various ways open to choose. The following sentence, quoted from Cicero in Smith's *Rhetorick*, is an excellent example of an aporia:—"Thus Cicero says, Whether he took them from his fellows more impudently, gave them to a harlot more lasciviously, removed them from the Roman people more wickedly, or altered them more presumptuously, I cannot well declare." (Smith's *Rhetorick*.)

2. Med.: Restlessness; uneasiness occasioned by obstructed perspiration, or any stoppage of the natural secretions. (Parr.)

\*a-pōr-ō-brān'-chī-anz, s. pl. [Gr. ἀ, priv., πόρος (poros) = a pore, and βράγχιον (branchion) = (1) a fin, (2) a gill.]

Zool.: Latreille's name for an order of Arachnida (Spiders), characterized by the absence of respiratory pores (stigmata) on the body.

† ap-ō-rōn, † ap-ō-rime, s. [APORIA.] A problem difficult of solution. (Webster, &c.) ¶ The Glossog. Nov. has the form aporime.

ap-or-rhā'-is, s. [Gr. ἀπορραΐς (aporrhais) = a shell; ἀπορραΐω (aporrhō) = to flow from; ἀπό (apo) = from, and ρῆω (rhēō) = to flow.] Spout-shells. A genus of gasteropodous molluscs belonging to the family Cerithiadae. The *A. pes pelicanii* is found in Britain. Its expanded outer lip gives it a peculiar appearance. In 1875, Tate estimated the recent species of Aporrhais at four, and the fossil one doubtfully at above two hundred, the latter ranging from the Lias to the Chalk.

\* ap-or-rhoc'-a, s. [Gr. ἀπορροα (aporrhoia), ἀπορροή (aporrhoē) = (1) a flowing off, a stream; ἀπό (apo) = from, and ρῆω (rhēō) = to flow from; ἀπό (apo) = from, and ρῆω (rhēō) = to flow.] An emanation; an effluvium. "The reason of this he endeavours to make out by atomical aporrhœas; which, passing from the cruentate weapon to the wound, and being incorporated with the particles of the salve, carry them to the affected part."—Glanville: Scopæ.

\* a-pōr't, \* a-pōr'te, s. [Fr. apporter = to carry.] Department, carriage. (Scotch.)

"By virtuous aporte, fair having Rememb'ry he sought a mighty kyng."—Wyncoon, ix. 96, 75. (Jamieson.)

\* ap-ō-sēp'-i-din, s. [Gr. ἀπό (apo) = from, and σπρῆδών (sēpēdōn) = rottenness, decay; σπῆω (sēpō) = to make rotten.] Chem.: A crystallized substance obtained from impure cheese. It is impure leucine (q.v.). (Watts.)

ap-ō-si-ō-pē-sis, \* ap-ō-si-ōp-ē-sy, s. [Lat. apostopesis; Gr. ἀποσιώπησις (aposiōpēsis) = (1) a becoming silent; (2) see def.; ἀποσιώπησις (aposiōpēsis) = to be silent after speaking; ἀπό (apo) = from, and σιωπᾶω (siōpāō) = to be silent or still. Or ἀπό (apo) = from, and σιωπήσις (siōpēsis) = silence; from σιωπᾶω (siōpāō).]

Rhet.: A term used to describe the reticence which a speaker occasionally employs from delicacy of feeling, from forbearance, from the fear of consequences, if he give utterance to all that he thinks, from being overcome by emotion, or when he designs, by pretending to pass over something, really to call attention to it more forcibly than if he had treated of it formally. From one of these causes a speaker will occasionally omit part of a sentence, as our Saviour, under the influence of emotion, does in Luke xix. 42.

each apoplexy being frequent in language dictated by grief or strong emotion.—Bloomfield: Greek Test. Note on Luke xix. 42.

ap-ō-sit'-ia, ap-ōs-it-ŷ, s. [Gr. ἀποσιτία (aposiitia) = distaste for food; ἀπόσιτος (aposiitos) = having eaten nothing, without appetite; ἀπό (apo) = from; σίτος (sitos) = wheat corn grain, . . . bread.] A loathing of food.

¶ Aposiitia is in Parr, and aposity in Glossog. Nov., 2nd ed.

† ap-ō-sit'-io, a. [Gr. ἀποσιτικός (apositikos): ἀπό (apo) = away from, σίτος (sitos) = wheat, . . . food.]

Med.: Taking away or diminishing the appetite for food.

ap-ō-spās'-ma, ap-ō-spāsm, s. [Gr. ἀποσπασμα (apospasma) = that which is torn off; ἀσπασάω (aspasāō) = to tear or drag away; ἀπό (apo) = from, and σπᾶω (spāō) = to draw out, . . . to tear.] The separation of one part from another; a violent irregular fracture of a tendon, a ligament, &c.

¶ Parr has the form apospasma, and the Glossog. Nov., 2nd ed., apospasm.

a-pōs'-ta-çy, s. [APOSTASY.]

ap-ō-stās'-ī-a, s. [Gr. ἀποστάσις (apostasis) = a standing away from.] [APOSTASY.]

Botany: A genus of Orchids, the type of the Apostasiads (q.v.). The anthers are distinct from each other, and the style is quite free from the stamens, whereas in ordinary orchids these are combined. There are two species found in the East Indies.

ap-ō-stās-ī-ā-çē-æ (Bot. Latin), ap-ō-stās-ī-ādz, s. pl. [APOSTASIA.]

Botany: An order of Endogeous plants belonging to the Orchidial Alliance. They differ from Orchidaceæ proper in having a three-celled fruit, with loculicidal dehiscence, and in the style being altogether free from the stamina for the greater part of its length.

They occur in damp woods in the hotter parts of India. In 1847, Lindley estimated the known species at five.

**a-pōs'-ta-sis, s.** [Gr. ἀπόστασις (apostasis) = a standing away from.]

\* *Old Medicine:*

- 1. A suppurative inflammation, throwing off the peccant humours left by fever or other diseases.
- 2. Transition from one disease to another.

**a-pōs'-ta-sy, † a-pōs'-ta-sy, \* ā-pōs'-ta-sie, s.** [In Ger. & Fr. *apostasie*; Sp., Port., Ital., & Lat. *apostasia*; Gr. ἀποστασία (apostasia), a later form for ἀπόστασις (apostasis) = a standing away from—hence, defection, revolt; ἀφίστημι (aphistēmi) = to put away (in passive, to stand away); ἀπό (apo) = from, and ἵστημι (histēmi) = to make to stand. Or ἀπό (apo) = from, and στάσις (stasis) = a placing, setting; from ἵστημι (histēmi).]

*A. Ord. Lang.:* A defection from real or imagined allegiance. *Specialty:*—

- 1. Direct rebellion against God or His authority.
- "The affable archangel had forewarn'd Adam, by dire example, to beware *Apostasy*, by what befell in heaven To those apostates."—*Milton: P. L.*, bk. vii.
- 2. The abandonment of a religious faith which one has previously held, or a church with which one has been previously connected.
- "The canon law defines *apostasy* to be a wilful departure from that state of faith which any person has professed himself to hold in the Christian church."—*Swift: Parergon*.
- 3. The abandonment of a political party with which one has hitherto acted.
- "The Lord Advocate was that James Stewart who had been so often a Whig and so often a Jacobite that it is difficult to keep an account of his *apostasies*."—*Macaulay: Hist. Eng.*, chap. xxii.

*B. Technically:*

\* *Med.:* It is sometimes used as the rendering of the Greek term *apostasis* (q.v.).

**a-pōs'-tate, \* āp-ō-sta'-ta, s. & a.** [In Ger. & Fr. *apostate*; Sp., Port., Ital., & Lat. *apostata*. Gr. ἀποστάτης (apostatēs) = (1) a runaway slave, a deserter, a rebel; (2) see below; ἀποστατίω (apostatēō) = to stand aloof.] [APOSTATIZE.]

*A. As substantive:*

- 1. A rebel against the Divine authority; one who has cast off the allegiance which his owes to God.
- "High in the midst, exalted as a god, The *apostate* in his sun-bright chariot sat."—*Milton: P. L.*, bk. vi.

- 2. One who abandons the religion which he has previously professed, or the church with which he has before been connected. In the Church of Rome one is also deemed an apostate who, without a legal dispensation, quits a religious order which he has entered.
- "And whose passed that point Was *apostata* in the order."—*Piers Plowman*, 673. (French.)
- "The character of *apostate* has injured the reputation of Julian."—*Gibbon: Decl. and Fall*, ch. xxiii.

- 3. One who similarly abandons his political creed or party.
- "If a name be found where it ought not to be, the *apostate* is certain to be reminded in sharp language of the promise which he has broken and of the professions which he has belied."—*Macaulay: Hist. Eng.*, chap. xv.

*B. As adjective:* Rebel; rebellious. One who has cast off the allegiance which he owes to God, or has abandoned a faith formerly held, or a church, or a political party to which he previously adhered.

"So spake the *apostate* angel."—*Milton: P. L.*, bk. i.

\* **a-pōs'-tate, v.i.** [From the substantive. In Sp. & Port. *apostatar*; Ital. *apostatare*.] To apostatize.

\* Perhaps some of these *apostating* stars have, though themselves true, left their miscarriage make me heedful."—*Sp. Ball: Occas. Medit.* (Richardson.)

**āp-ōs-tāt'-iō-al, a.** [Lat. *apostaticus*; Gr. ἀποστατικός (apostatikos).] Pertaining or relating to an apostate.

"To wear turbans is an *apostatical* conformity."—*Sandys*.

**a-pōs-ta-tize, a-pōs-ta-ti-gē, v.i.** [Eng. *apostate*; -ize. In Fr. *apostasier*; Fr., Sp., & Port. *apostatar*; Lat. *apostato* (Cyprian); Gr. ἀποστατίω (apostatēō) = to stand aloof from, . . . to fall off from; ἀπό (apo) = from, and

ἵστημι (histēmi) = to make to stand. Or ἀπό (apo) = from, and στατίω (statizō), poet. for ἵστημι (histēmi).]

- 1. To rebel against God. [APOSTATE, s. & a.]
- 2. To abandon a faith which one has previously held, or desert a church with which one has been formerly connected.

"Another had not indeed yet *apostatised*, but was nearly resisted to an *apostate*."—*Macaulay: Hist. Eng.*, chap. ix.

- 3. Similarly to abandon a political faith which one has held, or desert a political party with which one has acted.

**a-pōs-ta-ti-zing, a-pōs-ta-ti-sing, pr. par.** [APOSTATIZE.]

**āp-ōs-tāx'-is, s.** [Gr. ἀποσταξίς (apostaxis) = droppings; ἀποσταξίω (apostaxō), fut. ἀποσταξίω (apostaxō) = to let fall drop by drop; ἀπό (apo) = from, and στάζω (stazō) = to let fall drop by drop. Or ἀπό (apo), and στάσις (stasis) = a dropping; from στάζω (stazō).]

*Med.:* The fall of any fluid drop by drop, as blood from the nose. (Parr.)

\* **a-pōs'-tēl, s.** [APOSTLE.]

\* **āp-ō-stēm, \* āp-ō-stēme, \* āp-ō-stūme, s.** [In Fr. *apostème*; Sp., Port., Ital., & Lat. *apostema*; Gr. ἀπόστημα (apostēma) = (1) distance, interval, (2) an abscess; ἀφίστημι (aphistēmi) = to put away from, to remove; ἀπό (apo) = from, and ἵστημι (histēmi) = to make to stand.]

*Med.:* A large deep-seated abscess; a swelling filled with purulent matter.

"How an *apostume* in the mesentery breaking, causes a consumption in the parts, is apparent."—*Barrey*.

"With equal propriety we may affirm that ulcers of the lungs, or *apostemes* of the brain, do happen only in the left side."—*Brown: Vulgar Errors*.

"A joyful casual violence may break A dangerous *apostem* in thy breast."—*Donne: Progr. of Soul*, li. 474

¶ Now corrupted into IMPOSTUME (q.v.).

**a-pōs-tēm-āte, a-pōs-tūme, v.t.** [Eng. *apostem*; -ate.] To become an apostem or abscess. (*Wiseman: Surgery*.)

**a-pōs-tēm-āte, s.** [APOSTEMATE, v.] An abscess. (*The Widow*, iv. 2.)

**a-pōs-tēm-ā-tion, s.** [Eng. *apostem*; -ation.] The process of forming an apostem or abscess; the gathering of matter in a purulent tumour.

"Nothing can be more admirable than the many ways nature hath provided for preventing or curing of fevers; as vomitings, *apostematations*, salivations, &c."—*Grew*.

**a-pōs-tēmēd, a.** [APOSTEM, s.] Corrupted. (*Gentleman Instructed*, 252.)

**āp-ōs-tēm'-a-toūs, a.** [Gr. ἀποστεματός (apostematōs), genit. of ἀπόστημα (apostēma), and suff. -ous.] Pertaining to an abscess or apostem; resembling an abscess. [APOSTEM.]

**ā pōs-tēr-ī-ōr-ī,** used as *a. & adv.* [From Lat. *a* = from, and *posteriori*, ablative of *posterior*, compar. of *posterus* = following after, next.]

*Logic* (*lit.* = from that which is after): An argument which reasons backward from effects to causes, from observed facts to the law of nature which explains them, or in some similar way. If one infer, from marks of design in nature, that there must be a Designer, the argument is one *à posteriori*. It is opposed to the *à priori* argument, which more ambitiously attempts to reason out new facts from previously ascertained laws of nature, or from abstract conceptions. Though this latter process will sometimes brilliantly anticipate discovery, yet it is liable to lead one astray; and the immense advance made during the last two centuries by physical science has arisen mainly from its resolute adherence to the *à posteriori* method of reasoning. [A PRIORI, DEDUCTION, INDUCTION.]

† **a-pōs'-til, † a-pōs'-till, s.** [Fr. *apostille* = (1) a postscript, (2) a recommendation; Sp. & Port. *apostilla*.] A postscript. (*Webster*.)

**apostle (a-pōs'-el), a-pōs'-tēl, s.** [In Sw., Dan., Dut., & Ger. *apostel*; Fr. *apôtre*; Sp. *apostol*; Port. & Ital. *apostolo*; Lat. *apostolus*; Gr. ἀπόστολος (apostolos) = (1) a messenger, an ambassador, an envoy; (2) an apostle; (3) a fleet ready for sea; (4) a merchant vessel; ἀποπέλλω (apostēllō) = to send off or away; ἀπό (apo) = from, and στέλλω (stellō) = (1) to set or place, (2) to send.]

*A. Ordinary Language:*

- 1. *Lit.:* The official designation of twelve or (Paul included) of thirteen men, appointed by Jesus as His messengers, deputies, envoys, or ambassadors to the world. The Greek word ἀπόστολος (apostolos) occurs in a more general sense in various passages of the New Testament: as in John xiii. 18, where it is rendered, "he that is sent," and in Philipp. ii. 25, and 2 Cor. viii. 23, where it is translated "messenger." In an ambiguous passage in Rom. (xvi. 7) the English word *apostle* may possibly be used in the same sense: "Salute Andronicus and Junius my kinsmen, and my fellow-prisoners, who are of note among the apostles." Probably, however, the meaning is not "what apostles are of note," but "who are highly regarded among or by the apostles." Of the thirteen, twelve were designed specially for the Jews, and the remaining one, the most distinguished and successful of the whole, for the Gentiles. The twelve seem to have had but little culture in their early life; but Paul had the highest education which the age could afford. Among the special qualifications of an apostle, one was that he must have been an eye and ear witness of the miracles and teaching of Christ from the commencement to the close of His ministry (John xv. 27; Acts i. 21, 22); or, at the very least, must have seen Him once with the bodily eyes (1 Cor. ix. 1; xv. 8, 9). Another was, that he must have been divinely called to the high office he was to fill (Matt. x. 1—42; Mark i. 16—20; i. 14; iii. 14; Luke v. 27; vi. 13; Acts i. 24—26; 1 Cor. i. 1; Gal. i. 1, &c.). The power of working miracles, though not confined to the apostles, also went far towards proving apostleship (see 2 Cor. xii. 12, &c.). The special work of the apostles was to be "ambassadors for Christ" (2 Cor. v. 20), and to teach (Gr. μαθητεύσασθε (mathēteusate) = make disciples of) all nations, baptising them in (Gr. εἰς (eis) = into) the name of the Father, the Son, and the Holy Ghost. With this commission a promise was given them of the presence and guidance of their Divine Master through all succeeding time (Matt. xxvii. 19, 20).

"The *apostol* Pauls unto the Remeysns writeth . . ."

"*Chaucer: The Tale of Melibee*."

"And when it was day, he called unto him his disciples; and of them he chose twelve, whom also he named *apostles*."—*Luke vi. 13*.

- 2. *Fig.:* By pre-eminence, Jesus Christ, as sent forth on a divine mission by His Heavenly Father.

" . . . consider the *Apostle* and High Priest of our profession, Christ Jesus."—*Heb. iii. 1*.

- 3. A missionary who has laboured with zeal and success, like that of the old apostles, to convert a kingdom to Christ.

"On account of his vast labours in propagating Christianity among the Germans, Boniface has gained the title of the *Apostle* of Germany."—*Morison: Ch. Hist.*, Cent. VIII., pt. 1, ch. i., § 4.

¶ Similarly John Elliot has been called the "Apostle of the Indians"; Judson, "the Apostle of Burmah"; Father Mathew, "the Apostle of Temperance," &c.

- 4. *Sarcastically:* A preacher or pastor unfit for his office.

"From such *apostles*, O ye mitred heads, Preserve the church; and lay not careless hands On skulls that cannot teach and will not learn."—*Cowper: Task*, bk. ii.

*B. Technically:*

- 1. *Church History:*

(a) [APOSTOLI.]

(b) In the "Catholic Apostolic," or Irvingite Church: The highest of the four ecclesiastical grades, the others being Prophets, Evangelists, and Pastors. The "Apostles" ordain by the imposition of hands, interpret mysteries, and exercise discipline. [CATHOLIC.]

2. *Law:* The rendering sometimes given of the Latin word *apostolos* = letters of dismissal given to an appellant. They state his case, and declare that the record will be transmitted. (The term is used chiefly in Civil and Admiralty law.) (*Wharton, &c.*)

**Apostles' Creed.** The well-known creed beginning, "I believe in God, the Father Almighty," and ending with the words "the life everlasting. Amen." For many centuries it was attributed to the Apostles, but historical criticism has shown that it arose some time after their age, and probably not all at one period. It is found in its present form in the works of Ambrose, Bishop of Milan, from 374 to 397. [CREED.]

**apostles' coats.** Coats worn by performers at the miracle plays of the Middle Ages. (*Lee: Gloss.*)

apostle spoons. Spoons of gilded silver, the handle of each ending in the figure of an

APOSTLE SPOONS.

Apostle. They were the usual present of sponsors at baptisms. (Nares.)
And all this for the hope of two apostle spoons, to suffer and a cup to eat a sandle in for that will be thy legacy.—B. Jonson: Bartholomew Fair, l. 2.
(See also Shakespeare: Henry VIII., v. 2.)

manus), Ignatius, Polycarp, Barnabas, and Hermas. (Mosheim: Ch. Hist., Cent. i., pt. ii., ch. ii., §§ 20, 21.)

Apostolic party. A fanatical Roman Catholic party which figured in the history of Spain from 1819 till 1830, when it became merged in the Carlists.

apostolic sees. Sees said to have been founded by the Apostles; specially Antioch, Ephesus, and Rome. (Lee: Gloss.)

apostolic succession. The claim made by most episcopally-ordained clergymen and bishops that they constitute links in an unbroken chain of similarly ordained persons, the first of whom were set apart to their sacred functions by the Apostles themselves. Those who hold that view most tenaciously generally combine with it the opinion that only clergymen who are in the line of this spiritual succession are entitled to the pastoral office in the Christian Church, all others simply usurping the functions of the ministry.

ap-ös-töl-ic-al, a. [Eng. apostolic; -al.] The same as APOSTOLIC, adj. (q.v.)

They acknowledge not that the Church keeps any thing as apostolical which is not found in the apostles' writings, in what other records soever it be found.—Hooker.

The Pope had been requested to give his apostolical sanction to an arrangement so important to the peace of Europe.—Macaulay: Hist. Eng., ch. xxiii.

ap-ös-töl-ic-al-ly, adv. [Eng. apostolical; -ly.] After the manner of the apostles. (Johnson.)

ap-ös-töl-ic-al-ness, s. [Eng. apostolical; -ness.] Apostolicity (q.v.). (Johnson.)

ap-ös-töl-ic-ly, ap-ös-töl-ics, s. pl. [Lat. Apostolicus (pl.); Eng. Apostolics (pl.).]

Church Hist.: More than one ascetic sect which arose in France in the twelfth century. Their tenets were almost the same as those afterwards held by Sigarelli. [APOSTOLIC.] St. Bernard contended against them strenuously. (Mosheim: Ch. Hist., Cent. xii., pt. ii., ch. v., § 15.)

ap-ös-töl-ic-ism, s. [Eng. apostolic; -ism.] Apostolicity (q.v.). (J. Morrison.) (Reid.)

ap-ös-töl-ic-ity, s. [Eng. apostolic; -ity.] The quality of being apostolic. (Faber.) (Worcester.)

a-pös-trö-phë, \* a-pös-trö-phÿ, \* a-pös-trö-phÿs, s. [In Sw. apostrof; Dan. apostroph; Sp. apostrofe; Port. apostrophe (Rhet.), apostrofo (Gram.); Ital. apostrofe (Rhet.), apostrofo (Gram.); Fr. & Lat. apostrophe; Gr. ἀποστροφή (apostrophê) = (1) a turning away; (2) Rhet., an apostrophe; ἀποστροφος (apostrophos) = as adj., turned away from; as subst., an apostrophe (in gram.); ἀποστρέφω (apostrophê) = to turn back: ἀπό (apo) = from, and στρέφω (strophê) = to twist, to turn. Or the rhetorical apostrophe may be from ἀπό (apo) and στροφή (strophê) = a turning; στρέφω (strophê) = to turn.]

A. In the forms apostrophe and \*apostrophy:

Rhetoric: A figure of speech by which, according to Quintilian, a speaker turns from the rest of his audience to one person, and addresses him singly. Now, however, the signification is wider, and is made to include cases in which an impassioned orator addresses the absent, the dead, or even things inanimate, as if they were present and able to hear and understand his words. When Jesus, in the midst of an address to his apostles in general, suddenly turned to Peter and said, "Simon, Simon, behold, Satan hath desired to have you, that he may sift you as wheat" (Luke xxii. 24-37), the apostrophe was in the Quintilian sense. The following are examples of the same figure in the wider meaning:—

(a) Living, but absent.

"This done—but yesterday a king, And arm'd with kings to strive— And now thou art a nameless thing, So subject, yet alive." Byron: Ode to Napoleon.

(b) Dead.

"My mother, when I learn'd that thou wast dead, Say, wast thou conscious of the tears I shed?" Cowper: On Receipt of my Mother's Picture.

(c) Inanimate.

"Why leap ye, ye high hills?" Ps. lxxviii. 15.

B. In the forms apostrophe and \*apostrophus:

1. Gram.: The substitution of a mark like this (') for one or more letters omitted from a word, as tho' for though, 'twas for it was, king's for kinges. (See No. 2.)

2. The mark indicating such substitution, especially in the case of the possessive. The old possessive singular was es, and the apostrophe stands for the omitted e. Thus Chaucer has the "Knights," the "Monkes," and the "Clerkes" Tales, for what now would be written the "Knight's," "Monk's," and "Clerk's" Tales. The old spelling is preserved in the word Wednesday = Woden's day = Woden's day. The name apostrophe is given also to the mark in the possessive plural, as brethren's, assassins'.

"Many laudable attempts have been made by abbreviating words with apostrophes, and by lopping polysyllables, leaving one or two words at most."—Swift.

Two apostrophes (") are usually employed to mark the ending of a quotation, the commencement of the quotation being indicated by inverted commas ('); thus—

The Mosiac narrative commences with a declaration that "In the beginning God created the heaven and the earth."—Buckland: Geol., vol. i. p. 20.

More rarely only one is used, thus—

The note of interrogation must not be used after indirect questions; as, "he asked me who called."—Bain: Eng. Gram. (ed. 1874), p. 203.

When there is a quotation within a quotation, one apostrophe is generally employed, thus—

"I say that the Word of God containeth whatsoever things may fall into any part of man's life. For, as Solomon saith in the second chapter of the Proverbs, 'My son, if thou receive my words,' Ac. 'then thou shalt understand justice and judgment, and equity, and every good way.'"—T. C., quoted in Note to Hooker's Eccles. Pol. (ed. 1841), p. 252.

ap-ös-tröph-ic, a. [Eng. apostrophe; -ic.] 1. Pertaining to the rhetorical figure denominated an apostrophe.

2. Pertaining to an apostrophe. (Used in grammar and in poetry in lieu of a letter or letters omitted.) (Murray.)

a-pös-trö-phÿze, v.t. & t. [Eng. apostrophize; -ize. In Fr. apostropher; Port. apostrophar; Ital. apostrofare.]

A. Transitive:

1. To address one or more persons after the manner of a rhetorical apostrophe; to turn from an audience in general to a single person in it; or to address the absent, the dead, or things inanimate as if able to listen to one's impassioned words.

"There is a peculiarity in Homer's manner of apostrophizing Eumeus, and speaking of him in the second person; it is generally applied only to men of account."—Pope.

2. To omit a letter or letters from a word, or mark that such an omission has taken place by inserting an apostrophe. (Webster.)

B. Intransitive: To use the rhetorical figure called apostrophe.

"... the learned world apostrophizing at my untimely decease, . . ."—Goldsmith: The Bee, No. iv.

a-pös-trö-phÿzed, a-pös-trö-phÿzed, pa. par. & f. [APOSTROPHIZE.]

a-pös-trö-phÿz-îng, a-pös-trö-phÿz-îng, pr. par. [APOSTROPHIZE.]

\* a-pös-trö-phÿ, s. [APOSTROPHE.]

\* ap-ö-stÿme, s. [APOSTEM.]

\* a-pös-tÿme, v.t. [APOSTEMATE.]

ap-ö-tác-tites, s. pl. [Lat. Apolactate; Gr. Ἀπολάκτοι (Apolaktói) = specially appointed; ἀποτάσσω (apotassô) = to set apart; ἀπό (apo) = from, τάσσω (tassô) = to arrange.]

Church History: An austere Christian sect which arose in the second century. Believing matter to be essentially evil, they renounced marriage, fasted frequently, and used water instead of wine in the Communion. Many followed Tatian. They were called also Encratites (Abstainers) and Hydroparastete (Water-drinkers).

\* a-pöt-ë-car-ÿ, s. [APOTHECARY.]

ap-ö-töl-ë-mát-ic, a. [Gr. ἀποτελεσματικός (apotelesmatikos) = (1) of or for completion, (2) of or for astrology; ἀποτελεσμα (apotelesma) = (1) that which is completed; (2) the influence of the stars on human destiny; ἀποτελέω (apoteleô) = to bring to an

böul, böy; pöul, jöwl; cat, cell, chorus, çhin, bench; go, gem; thin, this; sin, a; expect, Xenophon, exist. -îng. -cian, -tian = shan. -tion, -sion = shün; -ñion, -ñion = zhün. -tious, -sious, -cious = shüs. -ble, -dle, &c. = bel, ðel.

end: *ápo* (*apo*) = from, and *τελέω* (*teleō*) = to bring about, to complete; *τέλος* (*telos*) = the fulfilment or accomplishment of anything.] Relative to astrology. (*Gaussen.*)

**ap-ōth-ē-car-ŷ,** \* **ap-pōt-ē-car-ŷ,** *s.* [In Sw. *apokare*; Dan., Dut., & Ger. *apotheker*; Fr. *apothicaire*; Sp. *boticario*. From Lat. *apotheca*; Gr. *ἀποθήκη* (*apothēkē*) = a place where anything is laid up, a shop, a store-house, also what is stored therein; from *ἀποτίθημι* (*apottithēmi*) = to put away: *ápo* (*apo*) = from, and *τίθημι* (*tithēmi*) = to put. Or Gr. *ἀπό* (*apo*) = from, and Lat. *theca*, Gr. *θήκη* (*thēkē*) = a case, box, chest, &c., to put anything in; from *τίθημι* (*tithēmi*).]

- \* 1. The keeper of a shop or warehouse.
- \* 2. The officer in charge of a magazine.
- \* 3. A general practitioner in medicine.
- 4. One who prepares and sells drugs.

"There was also a Doctor of Physik,

Ful redy hadde he his apothecaries,  
To seade him dragges, and his lecturaries."

*Chaucer: The Prologue*, 412, 427-8.  
"... the common drugs with which every apothecary in the smallest market town was provided..."  
—*Macaulay: Hist. Eng.*, chap. xv.

**Apothecaries' Company:** One of the Corporations of the City of London. On the 9th of April, 1606, the apothecaries of that locality were incorporated by James I., being united with the grocers. In 1617, a new charter set them free from this unnatural association. Towards the end of the seventeenth century many of the apothecaries began to practise as medical men in addition to selling medicine—an innovation, of course, stoutly resisted by regular physicians; and about a century later they had themselves to stand on the defensive against similar procedure on the part of the recently arisen chemists and druggists. Various Acts of Parliament subsequently increased the power of the Apothecaries' Company, till in 1815 they obtained the formidable privilege of examining and licensing all apothecaries and sellers of drugs throughout England and Wales. With the important exception of their antagonists, the chemists and druggists, no medical man could now make or dispense drugs without the licence of the Apothecaries' Company. The Medical Act of 1858 and the Pharmacy Act of 1868 gave increased privileges to apothecaries, the latter one allowing them to charge both for medicine and for attendance. In America there is no body strictly analogous to the apothecaries of England.

**Apothecaries' Hall:** The building in London where the Apothecaries' Company carry on their business.

**Apothecaries' weight:** The system of weights by which medical prescriptions are compounded.

**ap-ō-thē-čī-ŭm,** *s.* [Gr. *ἀπό* (*apo*) = from, and *θήκη* (*thēkē*) = a case, chest, or box to put anything in.] [APOTHECARY.]

**Botany:**

1. The scutella or shields constituting the fructification of some lichens. They are little coloured cups or linae with a hard disc, surrounded by a rim, and containing asci or tubae filled with spores. (*Lindley: Introd. to Bot.*)

2. The caeca in which the organs of reproduction in the Algaeae, or Sea-weeds, are contained. (*Ibid.*, p. 273.)

**ap-ō-thēm-g** (*g* ailent), *s.* [ΑΠΟΡΗΘΗΓΜ.]  
For its derivatives also see the appelling commencing ΑΠΟΡΗΘΗ.

\* **ap-ō-thēm,** *s.* [Gr. *ἀποτίθημι* (*apottithēmi*) = to put away: *ápo* (*apo*) = from, away; *τίθημι* (*tithēmi*) = to put or place.] The name given by Berzelius to the insoluble brown deposit which forms in vegetable extracts exposed to the air. It is a mixture of various substances, and not a proper chemical compound. (*Watts.*)

**ap-ōth-ē-ō-sis,** *s.* [In Ger. *apotheose*; Fr. *apothéose*; Sp. *apoteosis*; Port. *apothosis*, *apothose*; Ital. *apoteosi*; Lat. *apothosis*; Gr. *ἀποθεωσις* (*apothēōsis*), from *ἀποθεώω* (*apothēōō*) = to deify: *ápo* (*apo*) = away, and *θεός* (*thēōs*) = to deify; *θεός* (*thēos*) = God.] The deification of a human being; the elevating to the rank of the "gods" of a person who was remarkable for virtue, for heroism, or even for audacious vice. Temples were then built to the new divinity, priests appointed, sacri-

fices offered, and probably festivals instituted. The Romans called apotheosis consecration, and were accustomed in this way to honour their deceased emperors. It still exists in India and other pagan countries.

"... according to which, that which the Grecians call apotheosis, and the Latins *relatio inter deos*, was the supreme honour which man could attribute unto man."—*Bacon: Adv. of Learn.*, bk. i.

**ap-ōth-ē-ō-sī-ze,** *v.t.* [Eng. *apotheosis*]; *v.i.* To grant one an apotheosis; to deify one, to elevate one to the rank of the "gods." (*Bacon.*)

**ap-ōth-ē-sis,** *s.* [In Ital. *apotesi*; Lat. *apothesis*; Gr. *ἀποθεσις* (*apothēsis*) = a laying up in store; *ἀποτίθημι* (*apottithēmi*) = to put away: *ápo* (*apo*) = from, and *τίθημι* (*tithēmi*) = to put. Or *ἀπό* (*apo*) = from, and *θεσις* (*thesis*) = a setting, a placing; from *τίθημι* (*tithēmi*).]

**I. Architecture:**

1. The same as ΑΠΟΡΗΘΗΓ (q.v.).

2. A repository for books, &c., on the south side of the chancel, in the primitive churches.

"This [the chancel] being appropriated only to the sacred ministry, is very short from east to west, though it takes up the whole breadth of the church, together with the diaconico or prothesis, and the apothesis, from north to south."—*Sir G. Wheeler: Desc. of Anc. Churches*, p. 82.

**II. Surg.:** The reduction of a dislocated bone. (*Parr.*)

**ap-pōt-ōm-ē,** **ap-pōt-ōm-ŷ,** *s.* [In Ger. *apptom*; Gr. *ἀποτομή* (*apptomē*) = a cutting off; *ἀποτέμνω* (*apptomēno*) = to cut off: *ápo* (*apo*) = from, and *τέμνω* (*temnō*) = to cut. Or *τομή* (*tomē*) = a stump, . . . a cutting; from *τέμνω* (*temnō*).]

1. **Ancient Greek Music:** (a) That interval in the ratio of 2187 : 2048, which being cut off from the major tone 9 : 8, left the interval called a *leimma*, or *minor semitone*, in the ratio 256 : 243. (b) The interval 125 : 128 was called a major *apptomē*, and 2025 : 2048 a minor one.

2. **Math.:** The remainder or difference of two incommensurable quantities.

**ap-ō-trēp-sis,** *s.* [Gr. *ἀποτρέψις* (*apotrepsis*) = averaion; *ἀποτρέπω* (*apotreptō*) = to turn away from: *ápo* (*apo*) = from, and *τρέπω* (*treptō*) = to turn. Or *ἀπό* (*apo*) = from, and *τρέψις* (*trepsis*) = turning; from *τρέπω* (*treptō*).]

**Med.:** The resolution of a suppurating tumour. (*Coxe.*)

**ap-pōt-rō-pŷ,** *s.* [Lat. *apoptrope*, *apoptropea*, *s. pl.* From Gr. *ἀποτροπή* (*apotropē*) = a turning away from: *ápo* (*apo*) = from, and *τροπή* (*tropē*) = a turn; *τρέπω* (*treptō*) = to turn.]

**Greek Poetry:** A verse or hymn designed to avert the wrath of incensed deities. The divinity chiefly invoked on such occasions was Apollo.

**ap-ō-zēm,** *s.* [In Fr. *apozème*; Port. *apozema*, *apozima*; Lat. *apozema*; Gr. *ἀποζέμα* (*apozemē*), from *ἀποζέω* (*apozēō*), *t. i.* (1) to throw off by fermenting; (2) *t.*, to cease fermenting: *ápo* (*apo*) = from, and *ζέω* (*zēō*) = to boil. Or *ἀπό* (*apo*) = from, and *ζέμα* (*zema*) = that which is boiled, a decoction; *ζέμα* (*zēmā*).] A decoction. An extraction of the substance of plants by boiling them and preserving the infusion.

"During this evacuation, he took opening broths and *apozema*."—*Wiseman: Surgery.*

**ap-ō-zēm-ic-al,** *a.* [Eng. *apozem*; *-ical*.] Pertaining to an apozem or decoction; resembling an apozem or decoction.

"Wine, that is diuine, may safely and profitably be adhibited in an apozemical form in levers."—*Whitaker: Blood of the Grape*, p. 33.

\* **ap-pā'id,** \* **ap-pā'yed,** *pa. par.* [APPAY.]

\* **ap-pā'ire,** \* **ap-pā'ire,** \* **ap-pā'ire,** \* **ap-pē'ire,** \* **ap-pē'ire,** *v.t. & i.* [Norm. Fr. *apreire*; from Lat. *ad*, implying addition to, and *pejoro* = to make worse; *pejor* = Fr. *pire*, Prov. *petre* = worse.] [IMPAIR.]

**A. Transitive:** To impair, to make worse; to lessen, weaken, or injure. (Now IMPAIR.)  
"... his flatterers, madden semblant of wepyers, and appaired and aggregated moche of this matiere."  
—*Chaucer: Tale of Meibous.*

**B. Intransitive:** To become worse or less; to degenerate.

"I see the more that I them forbere,  
The worse they be to yere to yere:  
All that lyveth appawreth fast."  
*Mortality of Every Man: Hawkins's Old Pl.*, l. 88.

**ap-pāl,** \* **ap-pā-lēn,** *v.t. & i.* [Often derived from Fr. *paler* (*t.*) = to make pale, (*i.*) to grow pale; but Wedgwood considers that it is with *pall*, and not with *pale*, that it is connected.]

**A. Transitive:** "To cause to pall;" to take away or lose the vital power, whether through age or sudden terror, horror, or the like. (*Wedgwood.*) *Spec.*, to inspire with terror; greatly to terrify; to thoroughly to discourage; to paralyse energy through the influence of fear.  
"That in the weak men's way like lions stand,  
His soul appal, and damp his rising fire!"  
*Thomson: Castle of Indolence*, li. 60.

**B. Intransitive:** To come under the influence of terror; to become dismayed; to become discouraged; to have the energy paralysed with fright.  
"To make his power to appallen, and to fayle,"  
*Lydgate.*  
"Therewith her wrathfull courage 'gan appal,  
And haughtie spirits meekely to adow."  
*Spenser: F. Q.*, IV. vi. 25.

**ap-pāl'**, *s.* [APPAL, *v.*] Dismay, terror. (*Chapman: Homer; Iliad* xiv. 314.)

**ap-pālled,** *pa. par. & a.* [APPAL.]  
"Give with thy trumpet a loud note to Troy,  
That dreadful Ajax, that th' appalled air  
May pierce the head of thy great combatant."  
*Shaksp.: Troil. and Cress.*, iv. 5.

**ap-pāl-ling,** *pr. par. & a.* [APPAL.]  
"Images of appalling suffering."  
*Lesty: European Morals*, li. 243.

**ap-pāl-ling-ly,** *adv.* [Eng. *appalling*; *-ly*.] In an appalling manner.

"Massillon himself has not stated the case more thrillingly and appallingly."  
—*F. E. Paget: Warden of Berkingholt.*

**ap-pāl-ment,** † **ap-pāl-ment,** \* **ap-pāle-ment,** *s.* [Eng. *appal*; *-ment*.] The action of appalling; the state of being appalled; diamay, consternation.  
"As the furious slaughter of them was a great discouragement and appallment to the rest."  
—*Bacon: Appalment*, 4. Consternation. 5. Dismay. — *Bowering: Bentham's Table of the Springs of Action. Works*, vol. i. p. 204.

"Transient emotions . . . 2. Terror. 8. Appalment. 4. Consternation. 5. Dismay." — *Bowering: Bentham's Table of the Springs of Action. Works*, vol. i. p. 204.

**ap-pan-āge,** † **ap-an-āge,** \* **ap-pēn-āge,** \* **ap-ān-nāge,** *s.* [In Dan., Ger., & Sp. *apanage*; Fr. *apanage*, † *apannage*, † *apannage* = an appanage; Ital. *appannaggio* = an appanage; Law Latin *appannagium*, *apanagium* = an appanage; Med. Lat. *appanare* = to furnish with bread; *ad panem* = for bread, that is, for sustenance.]

**I. Literally:**

1. Properly, lands assigned as portions to the younger sons, or sometimes the brothers of the French king, who in general took their titles from the appanages which they held. Under the first two dynasties of French kings, the sons of the monarch divided his dominions among them. Afterwards the kingdom was assigned to the eldest, and appanages to the others. Then the dominant power of the latter prince was so circumscribed that their appanages could not be willed away to any one, or descend to females, but, on the failure of male issue, were made to revert to the crown; and finally, on the 22nd of November, 1790, the power hitherto possessed by the crown of granting appanages was taken away, and provision made for the younger sons of the royal family by grants from public funds. During the earlier period of the existence of French appanages, they were divided into *royal* and *customary*; the former being those granted to the king's brothers, and not allowed to be possessed by, or descend to, females; and the latter granted to the king's sisters, and consequently under no such restriction.  
"It has been before remarked, that the French nobles became at an early period divided into the greater and the less, the former possessing territories, appanage, sovereignty, almost independent power."  
—*Evans Croze: Hist. France* (ed. 1830), vol. i. p. 165.

2. A similar provision made for princes in other countries than France.  
"He became sutor for the earldom of Chester, a kind of appanage to Wales, and using to go to the king's son."  
—*Bacon.*

3. A dependency.  
"Is the new province to be in reality, if not in name an appanage of Russia?" — *Times*, Nov. 16, 1877.

**II. Figuratively:** Sustenance, appport, stay.  
"That wealth should be the appanage of wit,  
The God of light could ne'er have been so blind,  
To deal it to the wretch of human kind."  
—*Saunders.*

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, campl, hēr, thēre; pīne, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wolf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē ey = ā. qu = kw.

ap-pân-a-gist, s. [Fr. apnanagiste, s. & a.] A prince endowed with an appanage. (Penny Cyclop.)

\* ap-pâr-ail, v.t. [APPAREL, v.]

ap-pâr-â-tûs, s. [In Sw., Ger., & Fr. apar; Sp. aparato; Port. & Ital. apparato; Lat. apparatus, s. = (1) a making ready; (2) an equipment, as instruments, &c.; (3) pomp, state: apparatus = prepared, pa. par. of apparo = to prepare; ad = for, and paro = to prepare.] Any equipment.

A. Ordinary Language: Specially—

1. Art: Instruments, machines, &c., prepared with the view of being used for certain ends: such as the cases of instruments provided for surgeons, for land surveyors, for mathematicians, for natural philosophers, for chemists, &c. Such also are the tools of a trade, the books of a student, the dresses and scenes in a theatre, the furniture of a house, and the munitions of war.

"... a little apparatus for the former purpose. This consists of a thin cylindrical vessel of brass."—Fowles: Chem., 11th ed., p. 6.

"The Greek tragedians, it is indisputable, did not aim at reproducing the whole contemporary apparatus, which was in strictness appropriate and due to their characters."—Gladstone: Homer, I. 21.

2. Nature: An equipment; anything in nature divinely prepared or furnished.

"... who does not see in the vast and wonderful apparatus around us provision for other races of animated beings?"—Herschel: Astronomy, 5th ed., § 519.

B. Technically:

1. Physiol.: A series of organs all ministering to the same end, in the animal or vegetable economy; as the respiratory apparatus, the circulatory apparatus, the digestive apparatus, &c.

"... in both sexes a remarkable auditory apparatus has been discovered."—Darwin: Descent of Man, pt. II, ch. x.

2. Surg.: The operation of lithotomy, or cutting for the stone. [LITHOTOMY.]

3. Astron.: Apparatus Sculptoris, called also Officina Sculptoris = the Sculptor's Apparatus or Workshop. One of Lacaille's twenty-seven Southern constellations.

\* ap-pâr-ayl, v.t. [APPAREL, v.]

ap-pâr-ayl-ýng, pr. par. & s. [APPAREL-LING.]

\* ap-par-çeyve. [APPERCEIVE.]

\* ap-par-çeyv-ýnge. [APPERCEIVING.]

\* ap-pâr-dône, \* a-pêr-dône, v.t. To pardon. (Scotch.) (Knaz.)

\* ap-pâr-ëill, \* ap-pâr-ëille, s. & v. [APPAREL, v.]

ap-pâr-ël, \* ap-pâr-ëill, \* ap-pâr-ëille (Eng.), \* ap-pâr-ale, \* ap-pâr-al-ýe, \* ap-pâr-aill (Scotch), s. [Fr. apparer = preparation, train, dressing, apparatus, symmetry; appareiller = to apparel, to join, to assimilate, to match, equalise, level; pareil = like, similar, equal. In Prov. apparell; Sp. aparejar; Port. apparelar; Ital. apparecchio, apparecchiatura; Lat. paro = to make equal; par = equal. Cognate also with Lat. apparo = to prepare; ad = for, and paro = to prepare.]

A. Ordinary Language: Essential meaning = that which is fitted, adjusted, or prepared.

I. Literally:

1. Dress, vesture, garments, clothing, clothes. "Then David arose from the earth, and washed, and anointed himself, and changed his apparel."—2 Sam. xii. 20.

2. The furniture of a ship; as sails, rigging, anchor, &c.

3. Munitions of war. (Scotch.) "Bring shot and other apparatus."—Barbour, xvii. 293.

II. Fig.: External habiliments, garb, decorations. "Our late burnt London, in apparel new, shook off her ashes to have treated you."—Walter: To the Duchess of Orleans.

B. Technically:

1. Eccles. Vestments: Apparels (pl.) were five ornamental pieces of embroidery, placed one on each of the wrists of the alb, one on the lower part of it before, another behind, and the fifth, or amice, round the neck. Some thought that they symbolised the five wounds of Christ. (Lee: Gloss.)

2. Fort. [In the French form appareille.] The slope or ascent to a bastion.

ap-pâr-ël, \* ap-pâr-ail, \* ap-pâr-ayl, \* ap-pâr-ëill, \* ap-âr-ail, \* ap-âr-ël, v.t. [From the substantive. In Fr. appareiller (APPAREL, v., etym.); Prov. & Port. apparellar; Sp. aparejar; Ital. apparecchiare.] (See the substantive.)

A. [Remotely from Lat. paro = to make equal.] (See etym. of the substantive.)

I. Literary: To dress, to clothe, to place garments upon.

"And she had a garment of divers colours upon her: for with such robes were the king's daughters that were virgins apparelled."—4 Sam. xiii. 18.

II. Figuratively:

1. To equip, to fit out, to furnish with weapons or other apparatus for war. (Used of warriors or of ships.)

"Apparell'd as becomes the brave."—Byron: The Bride of Abydos, I. II.

"It hath been agreed, that either of them should send ships to see well manned and apparell'd to fight."—Sir J. Heywood.

2. To deck out gaily, to adorn, to ornament, to render attractive.

"Of their fair chapel doubt thereof had none, We'll apparell'd was it like and base, With riche Jewelles stuffed many on."—Romans of Parthenay (ed. Skeat), 926-28.

"There was a time when meadow, grove, and stream, The earth, and every common sight, To me did seem Apparell'd in celestial light, The glory and the freshness of a dream."—Wordsworth: Intimations: Immortality.

¶ Apparell is generally used in the pa. par.

B. [Remotely from Lat. paro = to prepare (?).] To prepare.

"And al swo bi heden apparell'd here offrendes swo kam at sterre that yede to for hem in to Jerusalem."—Old Kentish Sermons (ed. Morris), p. 23.

ap-pâr-elled, \* ap-pâr-ëill'd, \* a-pâr-alled, \* a-pâr-al-it, pa. par. & a. [See APPAREL, v.]

"... two white apparell'd angels."—Strauss: Life of Jesus (Transl. 1846), § 143.

ap-pâr-ël-lîng, \* ap-pâr-ayl-ýng, a. & s. As substantive: Preparation.

"For Trullius saith, that long apparayling byfore the batalia, maketh schort victorie."—Chaucer: Tale of Melibeu.

† ap-pâr-ençe, † ap-pâr-en-çý, \* ap-pâr-en-çie, s. [In Fr. apparence; Port. apparencia; Ital. apparenza; Lat. apparenzia = (1) a becoming visible, (2) external appearance.] The state of becoming visible; appearance.

"Which made them resolve no longer to give credit unto outward apparence."—Tran. of Boccalini (1636), p. 66.

"And thus this double hypocrite, With his devoute apparence."—Gower: Conf. Amant., bk. I.

"It had now been a very justifiable presumption in the king, to believe as well as hope, that he could not be long in England without such an apparence of his own party that wished all that he himself desired."—Lord Clarendon: Life, II. 21.

ap-pâr-ent, a. & s. [In Fr. apparent; Sp. aparente; Port. & Ital. apparente; Lat. apparens, pr. par. of appareo = to become visible, to appear; ad = to, and pareo = to appear.]

A. As adjective:

I. Ordinary Language:

1. That may be seen, visible, in sight, in view, or coming in sight, appearing. (Opposed to secret, hidden, or concealed.)

"Large foliage, overhead wing golden flowers, Blown on the summit of th' apparent tract."—Cooper: Task, bk. III.

2. Plain, obvious, indubitable. (Opposed to doubtful.)

"The main principles of reason are in themselves apparent."—Hooker.

3. Open, evident, known. (Opposed to suspected.)

"As well the fear of harm, as harm apparent, In my opinion ought to be prevented."—Shakespeare: Richard III., II. 2.

4. Seeming. (Opposed to true or true.) As seems to the senses in contradistinction to what reason indicates.

"... to live on terms of civility and even of apparent friendship."—Macaulay: Hist. Eng., ch. xv.

¶ This is the most common use of the word, especially in scientific works.

"... the real diameters must be to each other in the proportion of the apparent ones."—Herschel: Astronomy, 5th ed., § 463.

II. Technically:

1. Optics, Astron., &c. [For the Apparent Altitude, Diameter, Magnitude, Figure, Motion, Place, and Distance of an earthly or heavenly

body see ALTITUDE, DIAMETER, MAGNITUDE, FIGURE, MOTION, PLACE, and DISTANCE; for the Apparent horizon, which is the same as the visible horizon, see HORIZON; for Apparent conjunction of the Planets, see CONJUNCTION.]

2. Horology, Astron., &c. [For Apparent Time, see TIME.]

3. Law: With rights or prospects not likely to be set aside by any contingency but death. Opposed to presumptive. This is the use of the word in the phrase heir apparent, the import of which is, that the person so designated will be entitled to ascend the throne or succeed to the estate, if he survive their present possessors. An heir presumptive, on the contrary, though at present the nearest in accession to one or other of these dignities, may have his hope defeated by the birth of a nearer heir. (See Blackstone's Commentaries, bk. II., ch. 14.)

"Two heirs apparent of the crown, who had been prematurely snatched away, Arthur, the elder brother of Henry VIII., and Henry, the elder brother of Charles I., ..."—Macaulay: Hist. Eng., ch. VIII.

¶ By the law of Scotland one is not considered heir apparent to an estate till the actual death of its possessor; and of course he loses the title again shortly afterwards, when he actually enters on the inheritance.

B. As substantive. Apparent is used elliptically for heir apparent.

"Prince. My gracious father, by your kindly leave, I'll draw it as appparent to the crown."—Shakespeare: Henry VI., II. 2.

ap-pâr-ent-ly, adv. [Eng. apparent; -ly.]

\* 1. Plainly, clearly. (Opposed to doubtfully.)

"With him will I speak mouth to mouth, even apparently, and not in dark speeches."—Aumb., XII. 2.

2. Seemingly.

"They found the Emperor himself apparently frank."—Froude: Hist. Eng., vol. IV., p. 375.

ap-pâr-ent-ness, s. [Eng. apparent; -ness.]

The quality of being apparent; visibility, obviousness. (Webster.)

ap-par-ý-tion, s. [In Fr. apparition; Sp. aparición; Port. apparicao; Ital. apparizione. From Lat. apparitio = (1) service, attendance; (2) domestics, from appareo = to become visible, to appear.] [APPEAR, v.]

I. Ordinary Language:

1. The state of becoming visible; visibility, appearance.

"It was also observed that he was troubled with apparitions of hobgoblins and evil spirits; ..."—Bunyan: Pilgrim's Progress, pt. I.

2. A person who, or a thing which, suddenly, and perhaps unexpectedly, becomes visible; an appearance.

"Fitz-James looked round—yet scarce believed The witness that his sight received; Such apparition well might seem Delusion of a dreadful dream."—Scott: Lady of the Lake, v. II.

"A thousand blushing apparitions start Into her face; a thousand innocent shames In angel whiteness bear a way those blushes."—Shakespeare: Much Ado about Nothing, IV. I.

3. Spec.: A so-called ghost, spectre, or hobgoblin; also a spirit of any kind from the unseen world.

"That, if again this apparition come, He may approve our eyes, and speak to it."—Shakespeare: Hamlet, I. I.

II. Technically:

Astron.: A term applied to the appearance in the heavens of a comet, or to the visible ascent above the horizon of a star previously beneath it; or in the shining forth of one which, though up, was before left unlightened from being occulted or eclipsed by another heavenly body. In the latter case it is opposed to Occultation (q.v.).

"The intervals of these successive apparitions being 75 and 78 years, Halley was encouraged to predict it [the comet's] re-appearance about the year 1759."—Herschel: Astronomy, 5th ed., § 567.

"A month of apparition is the space wherein the moon appeareth: deducting three days wherein it commonly disappears, and this containeth but twenty-six days and twelve hours."—Browne: Vulgar Errors.

Circle of Apparition: That part of the heavens in any given latitude within which the stars are always visible. It is opposed to the Circle of occultation.

ap-par-ý-tion-al, a. Of, pertaining to or resembling an apparition; spectral. Capable of appearing (as the apparitional soul); endowed with materializing qualities.

ap-pâr-ý-tör, s. [In Fr. appariteur; Ital. apparitore; Lat. apparitor = a public servant, such as a licitor, a writer, or a priest; from appareo = to appear.]

böul, böy; pöüt, jówl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -tious, -sious, -cious = shüs. -ble, -dle, &c. = bel, del.

1. A petty officer in a civil or criminal court who assists in carrying out the decisions of the judges. In ecclesiastical courts, one who carries summonses.

"They swallowed all the Roman hierarchy, from the pope to the apparitor."—*Lyfife: Parergon.*

2. In other institutions: The deale or similar functionary.

\* **ap-päss-lôn-ä-tëd** (ss as sh), a. [Ital. *appassionato* = endured, suffered; affectionate; *appassionare* = to make to endure or suffer.] Impassioned.

"The seven *appassionated* shepherds."—*Sidney: Arcadia*, bk. II.

**appaumée** (ap-pä'u-mé), a. [APAUMEE.]

\* **ap-pä'y**, v.t. [O. Fr. *appayer*, *apaier*; Prov., Sp., & Port. *apagar* = to quench, to appease; Ital. *appagare* = to satisfy; *pagare* = to pay. From Lat. *pacare* = to pacify; *pac* = peace.] To satisfy, to appease, to content.

¶ Now contracted into PAV (q.v.).

"So only can high Justice rest *appaid*."—*Milton: P. L.*, bk. xii.

\* **ap-pä'yed**, \* **ap-pä'id**, pa. par. [APPAY.]

\* **ap-pë'ach**, \* **a-pë'äche**, \* **a-pë'che**, v.t. & i. [Norm. Fr. *apeschier*, which Mahu believes to be from Lat. *apaccio*, freq. of *appango* = to fasten to: *ad* = to, and *pango* = to fasten.] [IMPEACH.]

A. Trans. To impeach. (*Lit. & fig.*)

"Were he twenty times My son, I would *apëach* him."—*Shakesp.: Richard II.*, v. 2.

"His wonder far exceeded reason's reach. That he began to doubt his dazzled sight, And oft of error did himself *apëach*."—*Spenser: F. Q.*, II. xi. 40.

B. Intrans. To tell; to make revelations of any thing which it was the desire or interest of one's self or others to conceal.

"... come, come, disclose The state of your affection; for your passions Have to the full *apëach'd*."—*Shakesp.: All's Well that Ends Well*, I. 2.

¶ The slang expression to "peach," current among the criminal classes, is the word *apëach* or *impeach* contracted.

\* **ap-pë'ached**, pa. par. [APPEACH.]

\* **ap-pë'ach-ër**, s. [Eng. *apëach*; -er.] One who "apëaches" or impeaches another or himself.

"... common *apëachers* and accusers of the noble men and chiefest citizens."—*North's Plutarch*, p. 226. (Richardson.)

\* **ap-pë'ach-mënt**, s. [Eng. *apëach*; -ment.] An impeachment.

"The duke's answers to his *apëachments*, in number thirteen, I find civilly couched."—*Watson.*

**ap-pë'al**, \* **ap-pë'le**, \* **a-pë'ele**, v.t. & i.

[In Sw. *appellera*; Dan. *appellere*; Dut. *appelleren*; Ger. *appelliren*; Fr. *appeler*; Sp. *apelar*; Port. *appellar*; Ital. *appellare*; Lat. *appello*, -*ari* = (1) to call upon, to speak to, (2) to entreat, (3) to appeal to, (4) to name or call, (5) to pronounce. Cognate with *appello*, -*ulti* = to drive to: *ad* = to, *pello* = (1) to push or strike, (2) to drive.]

A. Transitive:

Law & Ordinary Language:

1. To accuse, impeach, or charge with. (*Lit. & fig.*)

"Quod Youthbe to Age, 'Y thee *a-pëele*, And that before ouce God y-wia."—*Mirror of the Periods of Man's Life* (ed. Furnival), 432-4.

"As well *apëareth* by the cause you come: Namely, to *apëele* each other of high treason.—Cousin of Hereford, what dost thou object Against the Duke of Norfolk?"—*Shakesp.: Richard II.*, I. 1.

2. To carry from an inferior to a superior court or judge.

B. Intransitive:

Law & Ordinary Language:

1. To carry a case from an inferior to a superior court of law, or from an inferior to a superior judge. [APPEAL, &]

"I *apëele* unto Caesar."—*Acts* xxv. 11.

2. To carry a controverted statement or argument, for judgment, to another person than the one who has decided against it; to lay it before the tribunal of public opinion; to point to arguments in its support; or if the issue be very important, and the support adequate, to draw the sword in its defence.

"Whether this, that the soul always thinks, be a self-evident proposition, I *apëele* to mankind."—*Locke.*

"It may suffice here to *apëele* to the immense amount of gross produce, which, even without a permanent tax, English labourers generally obtain from their little allots."—*J. S. Mill: Polit. Econ.*, bk. I, chap. ix., § 4.

"... they *apëeled* to the sword."—*Macaulay: Hist. Eng.*, chap. xxiii.

**ap-pë'al**, \* **ap-pë'l**, s. [From the verb. In Dan. & Dut. *appel*; Ger. *appellation*; Fr. *appel*, *appellation*; Sp. *apelacion*; Port. *appellacao*; Ital. *appello*, *appellazione*, *appellazione*; Lat. *appellatio* = (1) a scotting, (2) an appeal, (3) a calling by name.]

I. Literally:

Law & Ordinary Language:

1. An application for the transfer of a cause or suit from an inferior to a superior court or judge. It differs from a writ of error in two respects: (1) That an appeal may be brought on any interlocutory matter, but a writ of error only on a definite judgment; (2) that on writs of error the superior court pronounces the judgment, whilst on appeals it gives directions to the court below to rectify its decree. (*Blackstone's Comment*, bk. iii., ch. 4.)

"There are distributors of justice from whom there lies an *appeal* to the prior Hereford."—*Idem.*

¶ In Scots Law the term is used only of the carrying of cases from the Court of Session to the House of Lords.

2. The right of carrying a particular case from an inferior to a superior judicatory.

"But of those rights the trustees were to be judges, and judges without *appeal*."—*Macaulay: Hist. Eng.*, chap. xxv.

3. Formerly: Private prosecutions for heinous offences, e.g., the murder of a near relative, larceny, rape, arson, mayhem, &c., from which one's self has suffered, or for treason against the state. If the prosecutor failed to establish the accusation, he was punished. In some cases the person who appealed was an accomplice in the act which he denounced. (*Blackstone's Comment*, bk. iv., chap. 23.)

"Hath thou according to thy oath and band Brought hither to the priory Hereford, thy bold son, Here to make good the boltrous *appeal* Against the duke of Norfolk?"—*Shakesp.: Richard II.*, I. 1.

"... the most absurd and odious proceeding known to our old law, the *appeal* of murder."—*Macaulay: Hist. Eng.*, chap. xxv.

4. A summons to answer to a charge.

"Nor shall the sacred character of King Be urg'd to shield me from thy bold *appeal*; If I have injur'd thee, that makes us equal."—*Dryden.*

II. Figuratively:

1. The referring of a controverted statement or argument to one in whose judgment confidence is placed, or to the verdict of public opinion, or to God.

"From the injustice of our brother men— To him *appeal* was made as to a judge Who, with an understanding heart, ally'd The perturbation; listen'd to the pleas; Resolv'd the dubious point, and sentence gave."—*Wordsworth: Excursion*, bk. II.

"The casting up of the eyes and lifting up of the hands is a kind of *appeal* to the Deity, the author of wonders."—*Bacon.*

2. Recourse, resort.

"... not to denounce all preparations for battle and all *appeals* to arms."—*Times*, Nov. 24, 1876.

**ap-pë'al-a-ble**, a. [Eng. *appeal*; -able.]

Law:

1. Of cases: Which may be appealed; which is of such a character that permission will be given to the person against whom the verdict has gone in the inferior court to appeal to a superior one.

"To elp the power of the council of state, composed of the natives of the land, by making it *appealable* to the council of Spain."—*Bowell: Letters*, I. ft. 15.

2. Of persons: Who may be called on by appeal to answer to a charge.

\* **ap-pë'al-ant**, s. [APPELLANT.]

**ap-pë'al-ed**, pa. par. & a. [APPEAL, &]

**ap-pë'al-ër**, s. [Eng. *appeal*; -er.] One who appeals. [APPELLOR.]

**ap-pë'al-ing**, pr. par. & a. [APPEAL, &]

A. As pr. par.: (See the verb.)

B. As adj. (Spec.): Imporing; mutely solliciting. (*Scott: Rokeby*, v. 8.)

**ap-pë'al-ïng-nëss**, s. [Eng. *appealing*; -ness.] Beseechingness. (*G. Elliot: Daniel Deronda*, ch. xxxv.)

**ap-pë'ar**, **ap-pë're**, **a-pë're**, **a-pë're**, v.t. [In Fr. *apparaitre*, *apparoir*; Sp. *aparacer*; Port. *apparecer*; Ital. *apparire*; Lat. *apparere*, from *ad*, and *pareo* = to come forth, to appear.]

I. Literally:

1. To become visible to the eye, to come in sight.

"Let the waters under the heaven be gathered together unto one place, and let the dry land *appear*."—*Gen.* I. 9.

2. To be visible to the eye, to be in sight.

"... so that things which are seen were not made of things which do *appear*."—*Heb.* xi. 2.

II. More or less figuratively:

1. (In a sense analogous to that of coming in sight.)

(a) To be manifested to; as God, Christ, an angel, or a heavenly portent may be to man.

"Tho' eight ether that *apered* an angel of heaven In these slope his meetings, and hem selde and het."—*Old Kentish Sermons* (ed. Morris), p. 47.

"In that night did God *appear* unto Solomon."—*2 Chron.* II. 7. (See also *Mark* xvi. 7; *Exod.* III. 2; *Matt.* II. 7; and *Rev.* xii. 1.)

(b) To arise as an object of distinction among mankind.

"Ages elapsed ere Homer's lamp *appeared*, And ages ere the Mautian swan was heard."—*Cowper: Table Talk*, 556.

(c) Formally to present one's self before a person, or at a place, as at a sacred spot for worship, or before a judge in a court of law, whether as the accused person, as the prosecutor, or as an advocate.

"When all Israel is come to *appear* before the Lord thy God in the place which he shall choose . . ."—*Deut.* xxxii. 1.

"... we must all *appear* before the judgment-seat of Christ . . ."—*3 Cor.* v. 10.

"... to *appear* in the presence of God for us."—*Heb.* ix. 24.

"One ruffian escaped because to prosecutor dared to *appear*."—*Macaulay: Hist. Eng.*, ch. xii.

(d) To become visible to the eye of reason; to be fully established by observation or reasoning.

"... from the way in which they at first acquitted themselves, it plainly *appeared* to him that he had judged wisely in not leading them out to battle."—*Macaulay: Hist. Eng.*, ch. xiv.

2. (Analogous to the sense of being visible.)

To present the semblance of, to resemble:

(a) Its being implied that, notwithstanding this, the reality is absent:

"Even so ye also outwardly *appear* righteous unto men, but within ye are full of hypocrisy and iniquity."—*Matt.* xxiii. 28.

(b) Without its being implied that the resemblance is unreal.

"... the signature of another plainly *appeared* to have been traced by a hand shaking with emotion."—*Macaulay: Hist. Eng.*, ch. xiv.

¶ *Appear* is sometimes used impersonally: e.g., "it appears to him;" "it appeared that . . ." (See ex. under II. 1, d.)

\* **ap-pë'ar**, s. [From the verb.] Appearance.

"Here will I wash it in this morning's dew, Which she on every little grass doth strew, In silver drop, against the sun's *appear*."—*Fletcher: Faithful Shepherdess*.

**ap-pë'ar-ance**, \* **ap-pë'r-ance**, \* **a-pë'rans**, s. [Fr. *appareance*; Sp. *apparencia*; Ital. *appareanza*, from Lat. *apparentia*.]

A. Ordinary Language:

I. The state of coming in sight.

1. Literally:

(a) In an ordinary way.

"... choice cider from the orchards round the Malvern Hills made its *appearance* in company with the Champagne and the Burgundy."—*Macaulay: Hist. Eng.*, ch. xxiii.

(b) Supernaturally, as a spirit may do to the bodily eye.

"I think a person terrified with the imagination of spectres more reasonable than one who thinks the *appearance* of spirits fabulous."—*Addison.*

2. Figuratively:

(a) Entry into the world, into society, or a particular company or place. Or entry in a particular character.

"Do the same justice to one another which will be done us hereafter by those who shall make their *appearance* in the world, when this generation is no more."—*Addison.*

(b) Visibility to the mind's eye; probability, likelihood.

"There is that which hath no *appearance*, that this priest being utterly unacquainted with the true person, according to whose pattern he should shape his counterfeit, should think it possible for him to instruct his player."—*Bacon.*

II. That which becomes visible.

1. A vision.

"Bot so befell hyme that nyght to meet An *aperans*, the wich one to his spirt."—*Lancelot of the Lake* (ed. Skeet), bk. I, 868-4.

fäte, fät, färe, amidst, whät, fäll, father; wë, wët, hëre, camel, hër, thëre; pine, pît, sire, eir, marine; gö, pöt, or, wöre, wöf, wörk, whö, sön; müte, cüb, cüre, unite, cür, rüle, füll; trÿ, Sÿrian. æ, œ = é. ey = ä. qu = kw.

2. The aspect presented when a person or thing becomes visible; mien.

"His external appearance is almost as well known to us as to his own captains and counsellors."—Macaulay: Hist. Eng., ch. vii.

"She knew not he was dead. She seem'd the same in person and appearance." Wordsworth: Excursion, bk. 1.

"As the appearance of the bow that is in the cloud in the day of rain, . . ."—Ezek. i. 28.

3. A phenomenon; the latter word, and not appearance, being that now commonly used by men of science.

"The advancing day of experimental knowledge discloses such appearances as will not lie even in any model extant."—Glanville: Scepis.

4. Semblance, as opposed to reality; or outward show, as opposed to internal hollowness.

" . . . to answer them which glory in appearance, and not in heart."—2 Cor. v. 12.

"Under a fair and beautiful appearance there should ever be the real substance of good."—Rogers.

5. Semblance, without its being implied that there is unreality.

" . . . there stood before me as the appearance of a man."—Dan. viii. 15.

6. Plural: Circumstances collectively fitted to produce a bad, or to produce a good, impression.

"Appearances were all so strong, The world must think him in the wrong." Swift.

To save appearances, or to keep up appearances, is to make things look externally all right, when in reality they are to a greater or less extent wrong.

**B. Technically:**

**Law:** Formal presentation of one's self in a court in answer to a summons received, to answer any charges which may have been brought against one. A person who does so is said to put in or to make an appearance. This appearance is effected by putting in and justifying bail to the action at law, which is commonly called putting in bail above. [BAIL.] (See Blackstone's Comment., bk. iii., ch. 19.)

"I will not tarry, no, nor evermore Upon this business my appearance make In any of their courts." Shakespeare: Henry VIII., iii. 4.

**Perspective:** The representation or projection of a figure, a body, or any similar object upon the perspective plane.

**ap-pe-ar-er, s.** [Eng. appear; -er.] One who or that which appears.

"That owls and ravens are ominous appearers, and presignify unlucky events, was an arguinal conception."—Browne.

**ap-pe-ar-ing, pr. par. & a.** [APPEAR.]

As present participles & adj.: In senses corresponding to those of the verb.

"We see the appearing buds . . ." Shakespeare: 2 Henry IV., i. 2.

**ap-pe-ar-ing, s.** [APPEAR.] The state of becoming visible; appearance.

" . . . until the appearing of our Lord Jesus Christ."—1 Tim. vi. 14.

**ap-pe-as-a-ble, a.** [Eng. appease; -able.] Not implacable; capable of being appeased. (Johnson.)

**ap-pe-as-a-ble-ness, s.** [Eng. appeasable; -ness.] The quality of being appeasable. The opposite of implacableness. (Johnson.)

**ap-pe-ase, v.t.** [Fr. apaiser; O. Fr. paisier, paisier; Prov. apastar; from Lat. ad = to, and paco = to appease, quiet.] [PEACE.] Properly, to make peace where agitation before existed; as—

"1. To quiet or calm the agitated deep. "By his counsel he appeaseth the deep, and planneth islands therein."—Eccles. xliii. 23.

2. To dispel anger or hatred, and tranquillise the heart previously perturbed by one or both of these passions; to cause one to cease complaining.

"I will appease him with the present that goeth before me."—Gen. xxxii. 20.

"Now then by his sign appease." Spenser: F. Q., I. iii. 29.

¶ Formerly it was sometimes used reflexively.

And Tullius saith: There is no thing so commendable in a great lord, as when he is debonaire and meeke, and appeaseth him lightly."—Chaucer: Melibouse.

3. To tranquillise the conscience and make it cease from troubling.

" . . . and peace Of conscience, which the law by perjurancies Cannot appease . . ."—Milton: P. L., bk. xii.

4. To satiate a clamorous appetite, and by satiety make its cravings cease.

"The stock of salted hides was considerable, and by gnawing them the garrison appeased the rage of hunger."—Macaulay: Hist. Eng., ch. xii.

**ap-pe-ased, pa. par. & a.** [APPEASE.]

**ap-pe-ase-ment, a.** [Eng. appease; -ment.]

- 1. The act of pacifying.
- 2. The state of being pacified.
- 3. An article or guarantee of peace.
- "Being neither in numbers nor in courage great, partly by authority, partly by entreaty, they were reduced to some good appeasements."—Hayward.

**ap-pe-as-er, s.** [Eng. appease; -er.] One who appeases; one who pacifies; a peace-maker. (Johnson.)

**ap-pe-as-ing, pr. par. & a.** [APPEASE.]

**ap-pe-as-ive, a.** [Eng. appease; suffix -ive.] Having the power or the tendency to appease; pacificatory, tranquillising, soothing. (Webster.)

**ap-pe-ale, v.t.** [APPEAL, v.t.]

**ap-pel-lan-ty, s.** [Lat. appellans = appealing.]

- 1. Appeal. (Todd.)
- 2. Capability of appeal. (Todd.)

**ap-pel-lant, \*ap-pe-al-ant, a. & s.** [In Dan. & Dut. appellant; Fr. appellant; Sp. apalante; Ital. appellante. From Lat. appellans, pr. par. of appello = to call upon.]

**A. As adjective:** Appealing. "The party appellant [shall] first personally promise and avow, that he will faithfully keep and observe all the rites and ceremonies of the Church of England, &c."—Const. and Canon. Eccl., 98.

**B. As substantive:**

**I. Ordinary Language:**

1. One who calls out or challenges another to single combat.

"These shifts refuted, answer thy appellant, Though by his blindness main'd for high attempts, Who now defies thee thrice to single fight." Milton: Samson Agonistes.

† 2. One who stands forth as a public accuser of another before a court of law.

"Come I appellant to this princely presence. Now, Thomas Mowbray, do I turn to thee.

Thou art a traitor and a miscreant." Shakespeare: Richard II., I. 1.

3. One who appeals from an inferior to a superior court or judge. In this sense it is opposed to appellee or respondent.

"An appeal transfers the cognizance of the cause to the superior judge; so that, pending the appeal, nothing can be attempted in prejudice of the appellant."—Ayliffe: Parergon.

**II. Technically:**

**Church History:** A term applied in the eighteenth century to the Jansenists and others who appealed to a general council against the bull "Unigenitus" launched by Pope Clement XI. against the translation into French of the New Testament, with notes, by Paschasius Quesnel. (Mosheim: Church Hist., Cent. xviii., § 30, 11.)

**ap-pel-late, a. & s.** [Lat. appellatus, pa. par. of appello = to call upon.] [APPEAL.]

**A. As adjective:**

- 1. To which there lies an appeal. " . . . by assenting or dissenting to laws and exercising an appellate jurisdiction."—Blackstone: Comment., Introd. § 4.
- \* 2. Against whom an appeal is taken. " . . . and the name of the party appellator, or person against whom the appeal is lodged."—Ayliffe: Parergon.

2. In any other way pertaining to an appeal.

**B. As substantive:** The person appealed against.

**ap-pel-lâte, v.t.** [APPELLATE, a. & s.] To name, to call. (Southey: The Doctor, ch. cxxvii.)

**ap-pel-lâ-tion, s.** [In Ger. & Fr. appelliation; Sp. apelacion; Port. appellacao; Ital. appellazione, appellazione = an appeal. From Lat. appellatio = (1) an accosting, (2) an appeal, (3) a naming; from appello = to call.]

- 1. The act of appealing; an appeal. "Father of gods and men by equal right, To meet the God of Nature I appeale And bade Dan Phœbus scribe her Appellation seal." Spenser: F. Q., VII. vi. 55.

2. A name, a designation, that by which any person or thing is called.

"Several eminent men took new appellations by which they must henceforth be designated."—Macaulay: Hist. Eng., ch. xi.

**ap-pel-lâ-tive, a. & s.** [In Dan. & Ger. appellativ, a.; Fr. appellatif, a. & s.; Sp. apelativo, a. & a.; Port. & Ital. appellativo. From Lat. appellativus.]

**A. As adjective:** Common as opposed to proper. (Used especially in grammar.) (See the substantive.)

"Nor is it likely that he [St. Paul] would give the common appellative name of Books to the divinely inspired Writings, without any other note of distinction."—Bp. Bull.: Works, II. 401.

**B. As substantive:**

1. Gen.: An appellation, a name, a designation.

" . . . that the kingdom of Christ may not only be in us in name and form, and honourable appellatives, but in effect and power."—Jeremy Taylor: Exposition of the Lord's Prayer. Works (1839), vol. III., p. 74.

2. Grammar: A common, as opposed to a proper, name. Thus bird, plant, rock, star, are appellatives; but London, Shakespeare, and the planet Venus are not so.

"Words and names are either common or proper. Common names are such as stand for universal ideas, or a whole rank of beings, whether general or special, these are called appellatives; so fish, bird, man, city, river, are common names; and so are trout, eel, lobster, for they all agree to many individuals, and some to many species."—Watts: Logic.

**ap-pel-lâ-tive-ly, adv.** [Eng. appellative; -ly.] As appellatives do or are; after the manner of appellatives; as, "he is a perfect Goliath;" meaning, he is a man of gigantic stature.

" . . . the fallacy lieth in the Homonymy of Ware, here not taken from the town so named, but appellatively for all vendible commodities."—Fulter: Worthies; Hertfordshire. (Richardson.)

**ap-pel-lâ-tive-ness, s.** [Eng. appellative; -ness.] The quality of being appellative.

" . . . reduce the proper names in the genealogies following to such an appellativeness as should compose a continued sense."—Fulter: Worthies; Suffolk. (Richardson.)

**ap-pel-lâ-tôr-ty, a.** [Lat. appellatorius = relating to an appellant or an appeal.] Containing an appeal, in any of the senses of that word.

"An appellatory libel ought to contain the name of the party appellant."—Ayliffe: Parergon.

**ap-pel-lêe, s.** [Lat. appello = . . . to appeal.]

**Law:**

1. The defendant in a case appealed from a lower to a higher court.

2. The defendant against an accusation brought by a private person. [APPEAL, s., No. 3.]

"In this case he is called an approver or prover prolator, and the party appealed or accused is called the appellee."—Blackstone: Comment., bk. iv., ch. 25.

**ap-pel-lor, ap-pel-lor, s.** [Lat. appellator.]

1. One who accuses another person, called the appellee, of a crime, and prosecutes him before a criminal court.

"If the appellee be acquitted, the appellant (by virtue of the statute of Westm. 3. 13 Edw. I. c. 12) shall suffer one year's imprisonment."—Blackstone: Comment., bk. iv., ch. 25.

† 2. One who carries a case from an inferior to a superior court.

¶ When appellant and appellee are used together they are generally both accented on the last syllable.

**ap-pen-age, s.** [APPANAGE.]

**ap-pend, v.t.** [Fr. appendre; Ital. appendere; Lat. appendo = to weigh to; ad = to, and pendo = to suspend as weights, to weigh.]

- 1. To hang to or upon.
- 2. To add one thing as an accessory to another.

" . . . and appended to them a declaration attested by his sign-manual, and certifying that the originals were in his brother's own hand."—Macaulay: Hist. Eng., ch. vi.

**ap-pend-age (age = ÿg), s.** [Eng. append; -age. In Fr. appanage.] [APPEND.]

1. Ordinary Language: Something added or appended to another, but not properly constituting a portion of it. [APPANAGE.]

" . . . and such his source of life, Who now, with no appendage but a staff." Wordsworth: Excursion, bk. I.

2. Bot. (pl.): Certain superficial processes appended to the stems, leaves, calyces, &c., of plants; as hairs, prickles, thorns, glands, tubercles, dilatations or expansions of parts, utricles, pitchers, &c. (*Lindley: Introd. to Bot.*) [APPENDICULATE.]

**ap-pén-dançe, ap-pén-dénçe, 'ap-pén-dén-çy, s.** [Fr. *appendance*.] Anything appended or annexed.

**ap-pén-dant, a. & s.** [Fr. *appendant, pa. par. of appendre*.] [APPEND.]

**A. As adjective:**

**I. Ordinary Language:**

1. Lit.: Hanging to or upon.

2. Fig.: Annexed to, dependant upon, concomitant to, pertaining to, though not intimately.

**II. Technically:**

Common *appendant* is a right belonging to the owners or occupiers of arable land to put commonable animals upon the waste belonging to the lord of the manor, and on the lands of other persons within the manor.

**B. As substantive:** Anything attached to another one, as an accidental or accessory, not an essential, part of it.

**ap-pén-déd, pa. par. & a.** [APPEND.]

**\* ap-pén-dén-çy, s.** [APPENDANCE.]

**\* ap-pén-di-câte, v.t.** [Lat. *appendix* (acc. *appendicem*), and Eng. suff. *-ate*.] [APPENDICL.] To append, to add to.

**† ap-pén-di-câ-tion, s.** [Eng. *appendicate*; *-tion*.] An appendage, an adjunct; something annexed.

**ap-pén-di-çes, s. pl.** The Latin plural of APPENDIX (q.v.).

**ap-pén-di-cî-tis, s.** [Lat. *appendix*; suff. *-itis*.]

**Path.:** Inflammation of the vermiform appendix of the cæcum, a worm-like, blind sac in the lower right side of the abdomen. The causes are various, exposure to cold or dampness, or some indiscretion in diet, being the most usual. In a large proportion of cases, foreign substances are an active factor in the production of the disease when a catarrhal condition of the mucous membrane already exists. In the absence of this condition, foreign bodies may remain and cause little or no disturbance; but should the membrane become inflamed, they add to the irritation by occluding the lumen of the appendix, thus favoring ulceration of the walls, perforation, and even gangrene of the whole organ. Catarrhal inflammations of the appendix are common and frequently chronic, but have not heretofore been recognized as appendicitis. [See TYPHILITIS, PEAITHELITIS.] Several forms of this disease are now recognized, as acute, chronic, and recurrent; also rheumatic appendicitis, which is observed in cases presenting a rheumatic diathesis. Acute, severe attacks occur when the *bacillus communis coli* is present in a virulent form, and if this condition be associated with a fecal concretion or other foreign body causing pressure, there is imminent danger of necrosis, perforation, and death. The symptoms of appendicitis are intense, cramp-like pains, which may not at first be located in the right iliac fossa; nausea, if not vomiting; rigidity of the abdominal walls, especially of the right side and before the pain localizes itself; constipation generally, but diarrhoea occasionally; intense thirst; a disposition to flex the thighs upon the abdomen; and extreme tenderness at the seat of the disease. The inflamed appendix may generally be felt by deep palpation. Extreme local tenderness at this spot is a valuable diagnostic sign distinguishing appendicitis from general peritonitis. In moderately severe cases pulse-rate and temperatura are not seriously affected, but a sudden fall in temperature often indicates perforation and is therefore a suspicious symptom. Medical treatment frequently affords relief, but many practitioners recommend excision of the appendix as the only radical cure, and also as a preventive. This operation is now performed with great success, the rate of mortality being only two or three per cent., exclusive of cases in which surgical interference is made during an acute attack, when the mortality is much larger—perhaps 15 to 20 per cent. Complete natural obliteration of the lumen of the appendix has been observed, resulting in a spontaneous and permanent cure. [See VERMIFORM APPENDIX.]

**ap-pén-di-cle, s.** [Lat. *appendicula*, dimin. from *appendix*.] A small appendage.

**ap-pén-dic-û-lar, a.** [Lat. *appendicula*; Eng. suff. *-ar*.] Constituting or otherwise pertaining to a small appendage.

APPENDICULATE.  
A. 1. *Scutellaria galericulata* (Sculleaph). 2. Calyx. B. 1. *Salsola Kali* (Saltwort). 2. Segment of the calyx.

**ap-pén-dic-û-lâte, a.** [Bot. Lat. *appendiculatus*; from Class. Lat. *appendicula* = a small appendage, dimin. of *appendix* (q.v.).]

**Botany:** A term applied to a leaf, leaf-stalk, calyx, or a portion of a plant, when this is furnished with an appendage or appendages. Examples, the expansions or dilatations in the calyces of *Scutellaria* and *Salsola*. (*Lindley: Introd. to Bot.*)

**ap-pén-ding, pr. par.** [APPEND.]

**ap-pén-dix** (plural formerly **ap-pén-di-çes**, now generally **ap-pén-dix-ês**), **s.** [In Dan. *generally*; Fr., Port., & Ital. *appendice*; Sp. *apendix*. From Lat. *appendix*, pl. *appendices* = (1) that which hangs to anything; (2) anything annexed, an appendage.]

**A. Ordinary Language:**

1. Anything appended or added to another one more important than itself.

2. An adjunct or concomitant.

3. (Now almost exclusively.) A longer or shorter annotation appended to a book. Thus Murchison's *Siluria*, Smith's *Dictionary of the Bible*, and a multitude of other books, have such an appendix.

**B. Technically. As a Latin word, with the Latin plural appendices:**

**I. Anatomy:**

1. (Sing.) *Appendix cæci vermiformis*: A worm-looking process about three inches long, and rather more than the thickness of a goose-quill, which hangs down into the pelvis from the inner and posterior part of the cæcum. (*Todd & Bowman: Physiol. Anat.*, vol. ii., p. 216.)

2. (Plur.) *Appendices epiploicæ* (that is, resembling the epiploon or great omentum): Small processes containing fat which are attached to the colon. (*Ibid.*, p. 218.)

3. (Plur.) *A. pyloricæ* (Pyloric follicles): Tubular prolongations from the intestines of fishes. (*Ibid.*, p. 218.)

**II. Botany:**

1. (Sing.) Anything attached to another part, especially the back, when dilated and compressed, of one of the horn-like processes attached to the corolla in some plants. It is also called *ala* (wing). (*Lindley: Introd. to Botany*.)

2. (Plur.) A name given by Fuchsius to the shoots thrown up from the subterranean part of the stem of some endogenous plants, such as the pine apple. He called them also *ADNATA* and *ADNASCENTIA*. (*Lindley: Introd. to Bot.*)

**\* ap-pêr-ande, \* ap-pêr-and, pr. par.** A Northern form of APPEARING (q.v.). [GLITTERAND, TRENCHANT.]

**\* ap-pêse, v.t.** [APPEASE.]

**ap-pên-se, a.** [Lat. *appensus*, pa. par. of *appendo* = to weigh to.]

**Bot.:** Hung up, like a hat upon a pin; but very different in meaning from *pendulous*.

**\* ap-pêr-çê-ive, \* ap-par-çê-yve, \* a-pêr-çê-ive, \* a-par-çê-î-uy,**

**\* a-pêr-çê-yûe, v.t.** [Fr. *apercevoir*.] To perceive, to comprehend.

**\* ap-pêr-çê-iv-ing, \* ap-par-çê-yv-ÿnge, pr. par. & s.** [APPERCEIVE.]

**As substantive:** Perceiving.  
"For drede of jalous folk *apperceyving*."  
Chaucer: *C. T.*, 10, 600.

**\* ap-pêr-çêp-tion, s.** [Lat. *ad* = to, and Eng. *perception*.] Perception which makes itself its object; self-consciousness, consciousness.

**\* ap-pêr-îl, s.** [Old form of Eng. *peril* (q.v.).] Peril; danger.

"Let me stay at thine *apperil*, Timon."  
Shakesp.: *Timon of Athens*, l. 2.

**ap-pêr-tâ-in, \* ap-pêr-tê-yne, \* ap-êr-tê-yne, \* ap-pêr-tê-in, v.t.** [In Fr. *appartenir*; Ital. *appartenere*; Lat. *appertineo* = to belong to; *ad* = to, and *partineo* = to hold through, to extend through or to; *per* = through, and *teneo* = to hold.] To belong to by nature, by natural right, or by divine or human appointment, or as a partisan by his own choice belongs to his chief.

"Who would not fear thee, O King of nations? for to thee doth it *appertain*."  
—*Jer.* x. 7.

**ap-pêr-tâ-in-ing, \* ap-pêr-tê-yn-ÿng, pr. par. a., & s.** [APPARTAIN.]

**A. As present participle & adjective:** In the same sense as the verb.

"Rom. Tybalt, the reason that I have to love thee Doth much accuse the *appertaining* rage To such a greeting."  
Shakesp.: *Romeo and Juliet*, III. 1.

**B. As substantive:** That which belongs to; that which pertains to.

**\* ap-pêr-tâ-in-mênt, s.** [Eng. *appertain*; *-ment*.] That which belongs to one on account of his rank, dignity, or in any other way.

"He shent our messengers, and we lay by Our *appertainments*, visiting of him."  
Shakesp.: *Troil. and Cress.*, II. 2.

**\* ap-pêr-tên-ançe, s.** [APPURTENANCE, s.]

**\* ap-pêr-tên-ançe, v.t.** [APPURTENANCE, v.t.]

**\* ap-pêr-tê-yne, \* ap-pêr-tê-in, v.t.** [APPURTAIN.]

**\* ap-pêr-tin-ênt, a. & s.** [APPURTENANCE.]

**\* ap-pêt-ençe, ap-pêt-en-çy, s.** [In Fr. *appétence*; Sp. *apetencia*; Port. *apetencia*; Ital. *appetenza*; Lat. *appetentia*, from *appetens*, pr. par. of *appeto* = (1) to approach, (2) to seek after: *ad* = to, and *peto* = (1) to go to, (2) to seek for.]

1. *Of man or other sentient beings:* Instinctive desire or impulse to perform certain actions. *Spec.*, lustful or other appetite or desire.

"Of lustful *appetence*, to sing, to dance, To dress, and troll the tongue, and roll the eye."  
Milton: *P. L.*, bk. xi.

2. *Of things not sentient:* The tendency bodies show to make certain approaches to each other, as in the case of chemical attraction.

**\* ap-pêt-ent, a.** [In Ital. *appetente*, from Lat. *appetens*, pr. par. of *appeto*.] Desirous of gratifying appetite; lustful, or eagerly desirous of anything.

"Knowing the earl to be thirsty and *appetent* after glory and renown."  
—*Sir G. Buck: Hist. of K. Richard III.*, p. 60.

**\* ap-pêt-i-bil-î-tÿ, s.** [Eng. *appetible*; *-ity*.] The quality of being fitted to call forth appetite or desire.

"That elicitation which the schools indeed, is a deducing of the power of the will into act, merely from the *appetibility* of the object; as a man draws a child after him with the slight of a green bough."  
—*Bramhall against Hobbes*.

**\* ap-pêt-î-ble, a.** [In Sp. *apetecible*; Ital. *appetibile*; Lat. *appetibilis*, from *appeto*.] [APPETITE.] Fitted to excite some one of the appetites; fitted to call forth desire; desirable.

"Power both to slight the most *appetible* objects, and to controul the most unruly passions."  
—*Bramhall against Hobbes*.

**fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, camel, hêr, thêre; pine, pît, sire, sir, marine; gô, pôt, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, ûnite, cûr, rûle, fûll; try, Sÿrian. se, ce = ê; ð = ê. qu = kw.**

**ap-pé-tite**, \***ap-pé-tit**, s. [In Sw. *aptit*; Dan. & Ger. *appetit*; Fr. *appétit*; Sp. *apetito*; Port. *appetito*; Ital. *appetito*; Lat. *appetitus* = (1) an attack, (2) a passionate desire for anything; from *appeto*.] [APPETENCE.]

**A. Subjectively:**

**I. Lit. Of sentient beings:**

1. *Ord. Lang. & Mental Phil.*: One of those desires which arise chiefly from the body, and which man shares with the inferior animals. These are the desire for meat and drink, and the sexual impulse. (In this sense often in the plural.)

"Pat. oh, she did so course & er my exterior with such a greedy intution, that the appetite of her eye did seem to scorch me up like a burning-glass!"—*Shakesp.*: *Merry Wives of Windsor*, l. 3.

"Sopple and flexible as Indian cane,  
To take the bend his appetites ordain."

*Cooper*: *Poer*.

¶ Hooker thus distinguishes between Appetite and Will—" . . . the Will, properly and strictly taken, . . . differeth greatly from that inferior natural desire which we call Appetite. The object of Appetite is whatsoever sensible good may be wished for; the object of Will is that good which Reason doth lead us to seek. Affections, as joy, and grief, and fear, and anger, with such like, being, as it were, the amirry fashions and forms of Appetite, can neither rise at the conceit of a thing indifferent, nor yet choose but rise at the sight of some things. Wherefore it is not altogether in our power, whether we will be stirred with affections or no: whereas actions which issue from the disposition of the Will are in the power thereof to be performed or stayed. Finally Appetite is the Will's solicitor, and the Will is Appetite's controller; what we covet according to the one, by the other we often reject; neither in any other desire termed properly Will, but that where Reason and Understanding, or the show of Reason, prescribeth the thing desired." (*Hooker*: *Eccles. Pol.*, bk. i., ch. vii., § 3.)

2. *Spec.*: The deatra for food, which in excess leads to gluttony.

"Schal ben his sause maad to his deyt  
To make him have a newo appetite."

*Chaucer*: *C. T.*, l. 13,900-61.

"When thou sittest to eat with a ruler, consider diligently what is before thee, and put a knife to thy throat, if thou be a man given to appetite."—*Prov.* xiii. 1, 2.

" . . . their appetite became keen . . ."—*Macaulay*: *Hist. Eng.*, ch. xvi.

3. Vehement desire for anything.

"They contained much that was well met to gratify the vulgar appetite for the marvellous."—*Macaulay*: *Hist. Eng.*, ch. ix.

**II. Fig. Of things:** A tendency to go together; as by gravity, cohesion, or chemical affinity.

"It is certain that in all bodies there is an appetite of union and evitation of solution of continuity."—*Bacon*: *Nat. Hist.*, Cent. iii., § 293.

**B. Objectively:** The object of vehement desire.

"He! Melusine, my herbes Appetite,  
Fair lady, my heart, my ioune, my plesance."

*The Romances of Partheny* (ed. Skeech), 2,896-97.

"Power being the natural appetite of princes, a limited monarch cannot gratify it."—*Shelley*.

**ap-pé-tite**, v.t. [From the substantive.] Greatly to desire. (*Chaucer*.)

" . . . appetiting by generation to bring forth his semblance."—*Sir T. Elyot*: *Governour*, p. 70.

**ap-pé-ti-tion**, s. [In Ital. *appetizione*; Lat. *appetitio* = (1) a grasping at, (2) a passionate longing for, (3) appetite.] Vehement desire.

"The actual appetition or fastening our affections on him."—*Hammond*: *Practical Catechism*.

"We find in animals an estimative or judicial faculty, an appetition or aversion."—*Judge Hale*.

**ap-pé-ti-tious**, a. [Eng. *appetit(e)*; i; -ous.] Grateful to the appetite, desirable.

"Some light inspersions of truth to make them appetitious, passable, and toothsome."—*Brief Descrip. of Faneatica*, &c. (1660), p. 17.

†**ap-pét-i-ti-val**, a. [Formed by analogy as if from a Lat. *appetitivus*.] Appetitive.

**ap-pé-ti-tive**, a. [Sp. *apetitivo*. In Ital. *appetitivo*.] Possessed of appetite; and which desire greatly, which eagerly longs for.

"The will is not a bare appetitive power, as that of the sensual appetite, but is a rational appetite."—*Hist. Origin of Manhood*.

"I find in myself an appetitive faculty always in exercise in the very height of activity and invigoration."—*Norris*.

**ap-pé-ti-ze**, v.t. [Lat. *appeto* = . . . to strive after, to long for, and Eng. suffix -ize. In Fr. *appétissant* = imparting an appetite; Ital.

*appetizione* = appetite.] To give one an appetite, to make one feel hungry. (*Sir Walter Scott*.)

**ap-pé-tized**, pa. par. [APPETIZE.]

**ap-pé-ti-z-ér**, s. [Eng. *appetize*; -er.] He, who or that which gives one an appetite.

**ap-pé-ti-z-ing**, pr. par. & a. [APPETIZE.]

**Ap-pi-an**, a. Pertaining to some one of the Romans called Appian Claudius, and specially to that one who lived in the time of the war between the Romans and Pyrrhus, king of Epirus.

**Appian way.** The great Roman high-way constructed by the above-mentioned Appian Claudius, from Rome to Capua, and afterwards extended to Brundisium, and finished B.C. 312. It was built of stones four or five feet long, carefully joined to each other, covered with gravel, furnished with stones for mounting and descending from horseback, with milestones, and with houses at which to lodge.

**ap-pláud**, v.t. & i. [In Fr. & Port. *applaudir*; Sp. *aplaudir*; Ital. *applaudere*, *applaudire*; Lat. *applaudo* = to strike upon, to clap, especially to clap the hands in token of applause: *ad* = to, and *plaudo* = to clap, strike, beat; cognate with *laudo* = to praise, *laus* = praise; also with Eng. *loud*.] [LOUD.]

**A. Transitive:**

1. To express approbation of, or admiration for, by clapping the hands.

"I would applaud thee to the very echo,  
That should applaud again."

*Shakesp.*: *Macbeth*, v. 2.

2. To express approbation of, or admiration for, in any other way.

"You, that will follow me to this attempt,  
Applaud the name of Henry, with your leader."

(*They all cry—Henry II*)  
*Shakesp.*: *3 Henry VI.*, iv. 2.

**B. Intrans.**: To express approval by clapping the hands.

" . . . All hearts  
Applauded."

*Tennyson*: *Enid & Ger.*

**ap-pláud-ér**, s. [Eng. *applaud*; -er.] One who applauds.

"I had the voice of my single reason against it drowned in the voices of a multitude of applauders!"—*Glanville*: *Scepis Scientifica*.

**ap-pláud-ing**, pr. par. & a [APPLAUD.]

**ap-pláud-se**, s. [In Port. & Ital. *applauso*; Sp. *aplauso*; Lat. *applausus*, pa. par. of *applaudo*. Or from *ad* = to, and *plausus* = the noise of clapping or striking two bodies together; *plaudo* = to clap.]

1. Among the ancient Romans: Certain methods of expressing applause, had recourse to in the theatres and elsewhere. There were three kinds of it: (1) *bombus* = a humming or buzzing noise; (2) *imbrices* = noises made with the hollow hands; and (3) *testæ* = the striking of the flat portion of the hands together after the manner of two *testæ* (tiles).

2. Now: High approbation expressed by clapping the hands, beating the ground with the feet, giving forth huzzas, or in some similar way.

"This communication was received with loud applause."—*Macaulay*: *Hist. Eng.*, ch. xl.

**ap-plá-u-sion**, s. [Eng. *applaus(e)*; -ion.] Congratulation. (*Puttenham*: *Eng. Poesie*, bk. i., ch. xxvi.)

**ap-plá-u-sive**, a. [Eng. *applaus(e)*; -ive.] Applauding, commendatory.

"This eye, *applausive*, each sly vermin sees,  
That balks the snare, yet battens on the cheese."

*Scott*: *The Poacher*.

**ap-ple**, \***ap-pel**, s. [A.S. *æpl*, *æpel*, *æppel*, *æpyll*, *æppel*, *æpyl*, *æpyl*; Sw. *äple*; Dan. *äble*; Dut. & O. Fries. *appel*; Ger. *apfel*; O. H. Ger. *aphol*; O. Icel. *æpl*; Gael. *ubhall*; Irish *ubhal*, *ubhal*; Wel. *afal*; Armor. *awal*; Rnss. *gabalko*; Polish *jablko*; Bohem. *gabtko*, *gabla*.]

**A. Ordinary Language:**

**I. Literally:**

1. A well-known fruit; also the tree on which it grows. The fruit is that of the *Pyrus malus*, or Crab Apple, when modified and improved by long cultivation or grafting. [APPLE-TREE.] The apple was known to the classical nations of antiquity, the Greeks calling it

*μῆλον* (*mēlon*), Doric *αἶλον* (*aiēlon*), and the Latins *malum*. These words, however, with the analogous Latin one, *pomum*, were properly generic terms, comprehending several kinds of fruit. The varieties of the apple amount to thousands rather than hundreds, and they may be multiplied almost indefinitely by artificially applying the pollen of one to the stigma of another. Besides being common in gardens, the apple is cultivated in orchards, which are especially numerous in the northern part of the United States and in Southern Canada. It is generally propagated by being grafted on crab-stocks.

"As quans here apples ripe ben."

*Story of Genesis and Exodus* (ed. Skeat), l. 129.

"If the coaster depended alone upon me,  
His apples might hang till they dropp'd from the trees."

*Cooper*: *Pity Poor Africans*.

2. Scripture: Probably the fruit of the Citron-tree (*Citrus medica*). [APPLE-TREE.]

" . . . comfort me with apples . . ."—*Song of Sol.* ii. 5.

\* 3. *Apple of love*: What is now called the LOVE APPLE (q.v.). It is the *Lycoperdon esculentum*.

"Apples of love are of three sorts, . . ."—*Mortimer*: *Husbandry*.

4. *Apple of Sodom*: A plant growing near the Dead Sea, thus described by Josephus:—

" . . . and the traces [or shadows] of the five cities are still to be seen, as well as the ashes growing in their fruit, which fruits have a colour as if they were fit to be eaten; but if you pluck them with your hands they dissolve into smoke and ashes."—*Whiston*: *Josephus's Wars of the Jews*, bk. iv., chap. viii., § 4.

APPLE OF SODOM (*Solanum rodomeum*).  
1. Branch in flower (one-fourth natural size). 2. Ripe fruit.

Some suppose the description to refer to the *Solanum Sodomum*, a plant of the Nightshade genus, and others to the *Calotropis procera*, one of the Aaclepiads.

**II. Figuratively:**

1. *Apple of the eye*: The pupil of the eye, called apple probably from its roundness.

"Keep my commendments, and live; and my law as the apple of thine eye."—*Prov.* vii. 2.

2. *Apple of discord*: Anything, not necessarily an apple, or even a fruit, which, introduced into a nation, church, family, or other society, produce dissension among its members. The expression is founded on the classical myth that Eris, the goddess of strife, on one occasion flung into a meeting of the gods and goddesses a golden apple inscribed with the words, "For the fairest." It produced great jealousy among the female deities, of whom three—Juno, Minerva, and Venus—contended for it, the last-named being the successful competitor.

**B. Technically:**

1. *Bot. Apple or Pome*: The English name given by Linnæus to the kind of fruit called Pommum (q.v.).

2. *Her. Apple of Grenada*: The Pomegranate (*Punica granatum*). (*Gloss. of Her.*)

¶ For such words as *Alligator Apple*, *Custard Apple*, &c., see ALLIGATOR, CUSTARD, &c.

**apple-berry**, s. The English name of the *Biltardiera*, a genus of Australian plants belonging to the order Pittosporaceæ, or Pittosporada.

**apple-blight**, s. A white cottony substance found upon the trunks of apple-trees. It is produced by one of the Aphidæ, the *Lachnus lanigerus*, popularly known as the American blight.

**apple-blossom**, *s.* The blossom of the apple-tree. (Generally in the plural.)

"The farmhouse peeping from among bee-hives and apple-blossoms."—*Macaulay: Hist. Eng.*, ch. xv.

**apple-brandy**, or **apple-jack**, *s.* Brandy made from apples. (*American.*)

**apple-butter**, *s.* A preserve (according Bartlett, a sauce) made of apples stewed in cider.

**apple-crook**, *s.* A crook for gathering apples from the tree.

"The *applecrook* drawings tournaments to synful men."—*Wycliffe: Prefat. Epist.*, p. 70.

**apple-graft**, *s.* A graft from the apple-tree inserted in the stock of some allied species.

"We have seen three-and-twenty sorts of *apple-grafts* upon the same old plant, most of them adorned with fruit."—*Boyle.*

**apple-harvest**, *v.*

1. A harvest of apples; the gathering of apples.

2. The time when apples are gathered.

"The *apple-harvest* that doth longer last."  
—*Ben Jonson: Forest*, III.

**apple-jack**, *s.* [APPLE-BRANDY.]

**apple-john**, *s.* A kind of apple late in coming to maturity, and preserved in a shrivelled state for consumption during the winter.

"What the devil hast thou brought there! *apple-johns*! thou know'st, Sir John cannot endure an *apple-john*."—*Shakesp.: 2 Henry IV.*, II. 4.

**apple-moth**, *s.* A species of moth belonging to the family Tortricidæ. It is the *Tortrix pomonana*.

**apple-pie**, *s.* A pie consisting of apples enclosed within a crust.

**Apple-pie bed**: A bed made with the sheets so doubled as to prevent a person getting his legs between them. Commonly supposed to be so named from its resemblance to an apple turnover, but really from Fr. *plié* = folded.

**Apple-pie order**: Perfect order. (*Colloquial.*)

¶ The expression is probably a corruption of *Cap-a-pie*.

**apple-snail**, *s.* An English synonym of the genus of shells called Ampullaria.

**apple-tree**, *s.*

1. *Pyrus malus*. The tree of which apples are the fruit. It is the crab apple-tree, a member of the British flora, much altered by centuries of cultivation. [APPLE, A., I. 1; CRAB-APPLE.]

"Of a young *apple-tree*."  
—*Wordsworth: Excursion*, bk. 1.

2. The *apple-tree of Scripture*, in Heb. תפוח (tappach), from the root נפח (naphach) = to breathe, also to emit a scent. Apparently not

CITRUS MEDICA (APPLE OF SCRIPTURE).  
1. *Citrus medica* in fruit (one-seventh its natural size).  
2. Cross section of fruit.

the apple-tree, the fruit of which is indifferent in Palestine, except on Mount Lebanon; but the citron-tree (*Citrus medica*), the only species of the Oranga tribe known to the ancients.

"As the *apple-tree* among the trees of the wood."  
—*Song of Solomon*, II. 3.

**apple-woman**, *s.* A woman who sells apples, exhibited by her on a stall or otherwise.

"Yonder are two *apple-women* scolding, and just ready to unclof one another."—*Audubon & Pope.*

**apple-yard**, *s.* A place enclosed for the cultivation of apples; an orchard.

\***áp'-ple**, *v. t.* [From the substantive.] To form like an apple.

"The oblong turnep is of two kinds; one *apples* above ground, and the other in it."—*Marshall: Gardening.*

\***áp-pli's**, *v. t.* [O. Fr. *applaire*.] To satisfy, to content, to please. (*Scotch.*)

"Gif thou wald cum to beyrnals bliss,  
Thyself *apples* with sober reat."  
—*Bannatyne Poems*, p. 186. (*Jamieson.*)

\***áp-plér-in-gý**, \***áp-plér-in-gie**, *s.* [Etymology not apparent.] Southerwood (*Artemisia abrotanum*). (*Scotch.*) (*Jamieson.*)

"The window looked into a small garden rank with *apserings* and other fragrant herbs."—*Sir A. Wylie.*

\***áp-pli'-a-ble**, *a.* [Eng. *apply*; suff. *-able*.]

1. Pliable. (*Scotch.*) (*Colkelbie Lore.*) (*Jamieson.*)

2. Capable of being applied. (Now APPLICABLE is used in its room.)

"All that I have said of the heathen idolatry is *applicable* to the idolatry of another sort of men in the world."—*South.*

**áp-pli'-ange**, *s.* [Eng. *apply*; *-ance*.]

1. The act of applying.

"Have you done this, by the *appliance*  
And aid of doctors?"  
—*Longfellow: The Golden Legend*, I.

2. Anything applied; an application.

"... the *appliance* and aids for producing which they serve to transmit."—*J. & M. Polk: Econ.*, vol. 1, bk. 1, chap. xii, § 8.

**áp-pli-ca-bil'-i-ty**, *s.* [Eng. *applicable*; *-ity*.] The quality of being applicable to anything.

"The principles of Free Trade are principles of universal truth and of universal *applicability*."—*Times*, Nov. 16th, 1877.

¶ It is often followed by *to*,

"... which charge is certainly not true as respects Polybius, whatever *applicability* it may have to the others."—*Lewis: Early Rom. Hist.*, chap. II, § 7.

**áp-pli-ca-ble**, *a.* [In Fr. *applicable*; Sp. *aplicable*; Ital. *applicabile*.] Which may be applied, or which is proper or suitable to be applied to anything.

"But a law which merely alters the criminal procedure may with perfect propriety be made *applicable* to past as well as to future offences."—*Macaulay: Hist. Eng.*, chap. xvi.

**áp-pli-ca-ble-ness**, *s.* [Eng. *applicable*; *-ness*.] The quality of being applicable to anything. *Applicability*.

"The knowledge of salts may possibly, by that little part which we have already delivered of its *applicableness*, be of use in natural philosophy."—*Boyle.*

\***áp-pli-ca-bly**, *adv.* [Eng. *applicable*; *-ly*.] In an applicabilia manner. Of such a character, or in such a manner, that it may be fitly applied. (*Johnson.*)

**áp-pli-can-cý**, *s.* [Lat. *applicans*.] [APPLICANT.] The quality or state of being applicable.

**áp-pli-cant**, *s.* [Lat. *applicans*, pr. par. of *applico* = (1) to join or fasten; (2) to consult with; (3) to direct intently towards, to apply to.]

1. One who applies for anything; as for a situation, for charitable relief, &c.

2. A pupil remarkable for application to study. (*American.*)

\***áp-pli-cate**, *v. t.* [Lat. *applicatus* = lying upon or close to, attached to; pa. par. of *applico* = to join or fasten.] To apply to.

"The act of faith is *applied* to the object according to the nature of it."—*Fearson: On the Creed*, Art. IX.

**áp-pli-cate**, *a. & s.* [Lat. *applicatus*, pa. par. of *applico*.]

1. *As adj.* (*Ordinary Language*): Applied. (*Isaac Taylor.*)

2. *As subst.* (*Math.*): A straight line drawn across a curve, so as to bisect its diameter.

**applicate number**. One applied to a concrete case.

**applicate ordinate**. A straight line applied at right angles to the axis of a parabola, ellipse, or hyperbola, and bounded by the curve.

**áp-pli-cā-tion**, *s.* [In Fr. *application*; Sp. *aplicacion*; Port. *applicação*; Ital. *applicazione*;

Lat. *applicatio* = a binding, a joining to; *applico* = to join to; *ad* = to, and *plico* = to fold together.] [APPLY.]

**A. Ordinary Language:**

1. The act of applying (followed by *to*).

1. The act of literally applying one thing to another in a mechanical manner.

"What we here do by the *application* of a metal plate of determinate length and curvature, we do on the earth by the measurement of a degree of variation in the altitude of the pole."—*Herschel: Astron.*, 10th ed. (1850), § 215.

2. The act of placing one line or figure above another, not mechanically, but mentally. (B. I., *Geom.*)

3. Close attention to study; the act or process of applying the mind to anything with which it desires to occupy itself.

"Of studious *application*, self-imposed, Books were her creditors."  
—*Wordsworth: Excursion*, bk. vi.

"I cannot say whether it is a felicity or unhappiness, that I am obliged at this time to give my whole *application* to Homer . . ."—*Pope: Letter to Blount* (1717).

4. The use of certain means to gain an end.

"If a right course be taken with children, there will not be much need of the *application* of the common rewards and punishments."—*Locke.*

5. The employment or a statement, narrative, anecdote, fable, or anything similar as a means of inculcating a moral lesson. [B. 3.]

"This principle acts with the greatest force in the worst *application*, and the familiarity of wicked men more successfully debauches than that of good men rigorous."—*Bogers.*

6. A soliciting, petitioning, or asking for anything.

"It should seem very extraordinary that a patent should be passed upon the *application* of a poor, private, obscure mechanic."—*Swift.*

**II.** The state of being applied in any of the foregoing senses.

"There is no stat which can be set to the value or merit of the sacrificed body of Christ; it hath no measured certainty of limits; bounds of efficacy unto life it knoweth none, but is also itself infinite in possibility of *application*."—*Henker.*

**III.** Anything applied.

"Lend me an arm,—the rest have worn me out  
With several *applications*,—nature and sickness  
Debate it at their leisure."  
—*Shakesp.: All's Well that Ends Well*, I. 2.

**B. Technically:**

1. *Geom.*: The act of mentally placing one line above another, or a figure above another one of the same dimensions; or of applying one figure to another of the same area, but of different form; or of transferring a given line into a circle or other figure, so that its ends shall be in the perimeter of that figure.

2. *Theol.*: The divine act of placing the merits of Christ to the account of sinners for their justification. (*Bp. Hall.*)

3. *Public speaking, and especially preaching*: That portion of a discourse or address in which the general principles or important truths laid before the audience are applied to their individual case. It generally constitutes the conclusion of a discourse. [*PERORATION.*]

**áp-pli-ca-tivo**, *a.* [Eng. *applicate*; *-ivo*.] Which applies.

"The *applicative* command for putting in execution is in the will."—*Bramhall against Hobbes.*

**áp-pli-ca-tor**, *s.* [Eng. *applicate*; *-or*.] One who applies. (*Gauden: Tears of the Church*, p. 294.)

**áp-pli-ca-tór-ly**, *adv.* [Eng. *applicatory*; *-ly*.] Like that which is applicatory; by way of application, by its being applied. (*Mountagu: Appeal to Caesar*, p. 194.)

**áp-pli-ca-tór-ý**, *a. & v.* [Eng. *applicate*; *-ory*.]

1. *As adjective*: Containing an application; applying.

2. *As substantive*: That which applies.  
"There are but two ways of applying the death of Christ: faith is the inward *applicatory*, and if there be any outward, it must be the sacraments."—*Taylor: Worthy Communicant*.

**áp-pli'ed**, *pa. par. & a.* [APPLY.]

**applied science**. Science of which the abstract principles are put to practical use in the arts.

\***áp-pli'-éd-ly**, *adv.* [Eng. *applied*; *-ly*.] In a manner which may be applied.

"It is not but in such acts as be of themselves, or *appliedly*, acts of religion and piety."—*Mountagu: App. to Cos.*, p. 267.

ap-pli-er, \*ap-ply-er, s. [Eng. apply; -er.] One who applies.

"For his own part, he said, he detested both the author and the applier alike."—Conf. at Hampton Court, p. 49.

\*ap-pli-ment, s. [Eng. apply; -ment.] Application.

"These will wrest the doings of any man to their own base and malicious applications."—Introduction to Marston's Malcontent.

ap-ply, \*ap-ple, \*a-ply, v.t. & i. [Eng. ply. (Ply.) In Fr. appliquer; O. Fr. applier; Sp. aplicar; Port. aplicar; It. applicare; Lat. applico = to join or fasten, to attach to: ad = to, and plico = to fold, to lay flat; root, plak = to twist.]

A. Transitive:

I. Ordinary Language:

1. Mechanically to place one thing upon another, or adjust it to that other.

(a) As a single act:

"The warder at the door his key applies. Shoots back the bolt, and all his courage dies."—Cowper: Hope.

† (b) As a series of acts: To ply, as an oar or the feet in walking.

"A varlet running towards hastily, Whose flying feet so fast their way apply'd, That round about a cloud of dust did fly."—Spenser: F. Q., II. iv. 27.

2. To do so mentally. [B. I., Geom.]

\* 3. To bend to, submit to.

"In pees hys conde hardy full manly, No durste hys beste breke, but to byrn apply."—The Romans of Parley (ed. Skeat), 5, 512-13.

\* 4. To keep employed. (For this we now use PLY, q.v.)

"She was skillful in applying his honour, never suffering fear to fall to despair, nor hope to hasten to assurance."—Sidney.

5. To direct the attention to, to fix the mind or heart upon.

"No other worldly busines did apply."—Spenser: F. Q., II. x. 46.

"Apply thine heart unto instruction, and thine ears to the words of knowledge."—Prov. xxiii. 12.

¶ This is the only sense in which apply is used in the English Bible.

6. To address to.

"Sacred vows and mystic song apply'd, To grisly Pluto and his gloomy bride."—Pope.

7. To use as means for the attainment of an end; for instance—

(a) To give medicine to a diseased or torpid body. (Lit. & fig.)

"Even new the stimulants which he applied to his torpid and feeble party produced some faint symptoms of returning animation."—Macaulay: Hist. Eng., chap. xiii.

(b) To expend money for a certain object, or put it to a specified use.

"The profits thereof might be applied towards the support of the year."—Clarendon.

8. Formally to point out or tacitly to suggest the reference or suitability of a statement or principle to a certain person or thing; also to use science for the regulation and improvement of art. [APPLIED.]

"This brought the death of your father to remembrance, and I repeated the verses which I formerly applied to him."—Dryden: Fables.

"I had never deliberately applied these views to a species taken sloily."—Darwin: Descent of Man, pt. I, chap. 1.

9. To have recourse to, in the hope of being able to obtain assistance. (Now generally used intransitively.) [B. 2.]

II. Technically:

1. Geom.: Mentally to place one line or figure upon another one, and adjust the two together in a prescribed way.

"For if the triangle A B C be applied to D E F, so that the point A may be on D, and the straight line A B upon D E . . ."—Euclid, Bk. I, Prop. 4.

2. Theol.: To place to the sinner's account the merita of Christ for justification.

B. Intransitive:

1. To suit, to agree, to harmonise with, to bear analogy to, to refer to, to have some connection with.

"Would it apply well to the vehemency of your affection that I should win what you would enjoy?"—Shakspeare: Merry Wives, II. 2.

2. To have recourse to, as a petitioner for some kind of aid, or for some favour or right.

"I had no thoughts of applying to any but himself; he desired I would speak to others."—Swift.

\*ap-ply, s. [PLIGHT.] Plight, condition. (Scotch.)

"They found him in a good apply. Both hay and corn and bread him by."—Sir Egeir, p. 43. (Jamieson.)

ap-ply-ing, pr. par. [APPLY.]

ap-pög-gi-a'to, a, adv., & s. [Ital. appoggiato = propped; appoggiata, appoggiato, appoggio = prop, support, defence.] [APPOGIATURA.] A sustaining of the voice in passing from one note to another. [PORTAMENTO.]

ap-pög-gi-a-tür-a, a-pög-gi-a-tür-a, a-pög-gi-a-tür-a, s. [Ital. In Fr. appoggiature. From Ital. appoggiare = to lean upon: ad = to, and poggiare = to ascend; poggio = a hill, cliff, ascent; Lat. podium = an elevated place, a height.]

Music: A grace-note consisting of a sound situated a semitone or tone above or below that to which it is affixed, occurring usually on an accented portion of a bar, and written as if extraneous to its contents.

Written. Rendered. Musical notation example 1.

Written. Rendered. Musical notation example 2.

ap-point, \*a-pöynte, \*ad-pöynte, v.t. & i. [Fr. appointer, from point, pointe = a point; O. Fr. apointer = to prepare, to arrange; Prov. apontar, apontar, apointar; Sp. apuntar = to point, to denote or appoint, . . . to sharpen; Ital. appuntare = to sew, to sharpen, . . . to fix, appoint; Low Lat. appuntio = to bring back to the point; Class. Lat. ad = to, and punctum, accis. of punctus or punctum = (1) a pricking, a stinging, (2) a point; pungo, pupugi, punctum = to prick, to puncture.] [APPOINTER.]

A. Transitive:

I. Ordinary Language:

\* 1. To point to or at.

"Appoint not heavenly disposition."—Milton: Samson Agonistes.

2. To decree, to ordain; hence to make secure, to settle.

(a) To decree, to fix, to ordain, by divine or by human authority; as the arrangements in nature, those for divine worship, times, places, or anything similar.

"He appointed the moon for seasons."—Ps. civ. 19.

"And the Lord appointed a set time, saying, Tomorrow the Lord shall do this thing in the land."—Ezod. ix. 5.

"Moreover I will appoint a place for my people Israel. . . ."—2 Sam. vii. 10.

"It was their undoubted prerogative to regulate coin, weights, and measures, and to appoint fairs, markets, and ports."—Macaulay: Hist. Eng., ch. 1.

(b) To make secure, to establish, to settle.

" . . . when he appointed the foundations of the earth . . ."—Prov. viii. 29.

3. To nominate by competent authority to an office; or to do temporary service. (Followed by two objectives—one of the person nominated, and the other of the office.)

" . . . to appoint me ruler over the people of the Lord . . ."—2 Sam. vi. 21.

4. To allot, to assign, or adjudge to one a portion, wages, or an office or dignity. (Followed—

(a) By an objective of the thing given, and to or unto before the person receiving it:

"And I appoint unto you a kingdom, as my Father hath appointed unto me."—Luke xxii. 29.

(b) By two objectives; there being an ellipsis of the to or unto.)

" . . . and appoint him his portion with the hypocrites."—Matt. xlv. 51.

" . . . Appoint me thy wages, and I will give it."—Gen. xxx. 28.

5. To command, to enjoin.

" . . . and ordain elders in every city, as I had appointed thee."—Titus i. 5.

6. To equip, to supply, to furnish with all things necessary to efficiency.

"The English, being well appointed, did so entertain them, that their ships departed terribly torn."—Haywards.

II. Technically: To make a conveyance altering the disposition of landed property, and assigning it to a specified person.

B. Intransitive: To decree, to arrange; fixedly to resolve.

"So Jeroboam and all the people came to Rehobam the third day, as the king had appointed, saying, Come to me again the third day."—1 Kings xii. 12.

"For the Lord had appointed to defeat the good counsel of Achitophel . . ."—2 Sam. xvii. 14.

ap-point-a-ble, a. [Eng. appoint; -able.] That may be appointed. (Federalist: Madison.) (Webster's Dict.)

ap-pöi-n-éd, pa. par. & a. [APPOINT.]

"Is there not an appointed time to man upon earth?"—Job vii. 1.

ap-pöi-n-té, s. [Eng. appoint, -ee; Fr. appointé, pa. par. of appointer.]

I. Ordinary Language:

1. Gen.: One who has received an appointment.

2. Spec.: Formerly, a foot-soldier in the French army who, on account of his long service and tried courage, received higher pay than his comrades of the same grade. A lance-corporal.

II. Technically (Law):

1. In the same sense as I. 1.

2. A person in whose favour a power of appointment is executed. (Wharton.)

"But the usual course now is for some one to procure letters of patent, or other authority from the king, and then the ordinary of courts grants administration to such appointees of the crown."—Blackstone: Comment., bk. II, ch. 32.

appointée (ap-pöi-n-tä), a. [Fr. appointé, pa. par. of appointer.] [APPOINTEE.]

Her.: Pointed. (Applied to things which touch at the points or ends; as two swords touching each other at their points or tips.)

ap-pöi-n-tér, \*ap-pöy-nc-tér, s. [Eng. appoint; -er.] One who appoints.

"That this queen was for some one to procure letters of patent, or other authority from the king, and then the ordinary of courts grants administration to such appointees of the crown."—Blackstone: Comment., bk. II, ch. 32.

ap-pöi-n-täg, pr. par. [APPOINT.]

ap-pöi-n-mént, \*a-pöynte-mént, s. [From Late Lat. appunctamentum. In Fr. appoinement; Sp. apunamiento.]

A. Ordinary Language:

I. The act of appointing; the act of fixing any arrangements by divine or human decree, edict, or command, or by mutual stipulation.

Specialty:

\* 1. The act of making preparations of any kind.

2. The act of ordering or commanding any one; order, direction, injunction.

"At the appointment of Aaron and his sons shall be all the service of the sons of the Gerohonites, in all their burdens. . . ."—Numb. iv. 27.

" . . . by the appointment of Absalom this hath been determined. . . ."—2 Sam. xiii. 32.

3. The act of arranging for a meeting together; an assignation.

" . . . for they had made an appointment together to come and mourn with him."—Job ii. 11.

4. The act of nominating to any office.

"But such appointments could no longer be made without serious inconvenience."—Macaulay: Hist. Eng., ch. xi.

II. The state of being appointed.

III. That to which one is appointed, or which is appointed to one. (Gen. & Spec.)

Specialty:

1. A situation, an office.

2. Equipment, dress, furniture, arms, armament.

"They have put forth the heaven: further on, Where their appointment we may best discover, And look on their endeavour."—Shakspeare: Antony & Cleopatra, iv. 10.

¶ Sometimes it is used in the plural.

"A fish was taken in Polonia: such an one as represented the whole appearance and appointments of a bishop."—Gregory: Posth. (1850), p. 123.

3. (Plur.) Certain allowances paid to one in virtue of his holding a particular office; perquisites.

"Tycooncel began to rule his native country with the power and appointments of lord lieutenant, but with the humble title of lord deputy."—Macaulay: Hist. Eng., ch. vi.

B. Technically (Law):

1. A devise for a charitable use. (Blackstone: Comment., bk. ii, ch. 23.)

2. An instrument or deed deriving validity from a previous deed, and operating as a conveyance by limiting or altering previous uses.

Power of appointment: The earlier of the two deeds just mentioned—that which gives force to the other.

\*ap-pört, v.t. & i. [Fr. apporter.]

A. Trans.: To bring, to produce.

B. Intrans.: To arrive at one's destination.

böi, boy; pöit, jöwi; cat, çell, chorus, çhin, bench; go, gem; thin, çhis; sin, aç; expect. Xenophon, exist. -iäg. -cian, -tlan = shän. -tion, -sion = shün; -çion, -çion = zhün. -tious, -sious, -çious = shüs. -ble, -die, &c. = bëi, dël.

\*ap-pōr-tēr, s. [Fr. apporter = to bring, to convey; Ital. apportare; Lat. apportio = to bring or carry to: ad = to, and porto = to carry (spec., something heavy).] One who imports or carries anything (into the country).

¶ Now Importer (q.v.).

"This makes only the *apporters* themselves, their alders, abettors and assistants, traitors; not those who receive it at second hand."—*Bate: Hist. Pl. Cr.*, ch. 20.

ap-pōr-tion, v.t. [Lat. ad = to, and portio = a portion.] [PORTION, PART.]

*Ord. Lang. & Law:* To metra out in just proportions; to share among several persons or several things in suitable proportion.

"Christ proportions several degrees of punishment in the other world, which he *apportions* to the degrees of death which had ever been among the Jews."—*Jeremy Taylor: Works* (ed. 1859), vol. III, p. 40.

ap-pōr-tion-âte, v.t. [Eng. *apportion*; -ate.] To apportion. (*Hacket: Life of Williams*, p. 275.)

ap-pōr-tion-âte-ness, s. [Eng. *apportion*; -ate, -ness.] The quality of being in just proportion to something else.

"There is not a surer evidence of the *apportionateness* of the English liturgy to the end to which it was designed, than the contrary *fates* which it hath under gone."—*Hammond: Pref. to View of the New Directory*.

ap-pōr-tioned, pa. par. & a. [APPORTION.]

ap-pōr-tion-ēr, s. [Eng. *apportion*; -er.] One who apportions. (*Webster*.)

ap-pōr-tion-ing, pr. par. [APPORTION.]

ap-pōr-tion-mēt, s. [Eng. *apportion*; -ment.]

*Ord. Lang. & Law:* The act of meting out anything, the rent of a house, for instance, in just proportions among several owners. The distributing anything among several persons according to their just claims; also, the state of being so meted out.

"It is even possible to conceive that in this original *apportionment*, compensation might be made for the injuries of nature."—*J. & Mill: Polit. Econ.*, vol. I, bk. II, chap. I, § 2.

†ap-pō-sal, \*ap-pō-sale, s. [Eng. *ap-pose*; -al.]

*Law: Apposal of Sheriffs:* A charging sheriffs with money received on their account in the Exchequer. (*Glossog. Nov.*, &c.)

\*ap-pō-se, v.t. [Fr. *apposer* = to affix, to put to; Port. *appor*; Lat. *appono* = to put at or near to.] [APPPOSITE.]

1. To apply to.

"By malign putrid vapours, the outriment is rendered unapt of being opposed to the parts."—*Barrey*.

2. To question, to examine.

¶ Now written Pose (q.v.).

"Which been opposed, and knew all here entente."—*Chaucer: C. T.*, 12, 391.

"... to the end they may be opposed of those things which of themselves they are desirous to utter."—*Bacon*.

ap-pō-gēr, s. [Eng. *ap-pose*; -er.]

I. Gen.: One who questions another or others. (Now, POSER.)

II. Specially:

\* 1. A bishop's examining chaplain. (*Webster*.)

2. A certain officer of the Exchequer, whose full designation is *foreign apposer*.

ap-pō-site, a. [Lat. *appositus*, pa. par. of *appono* = to put or lay at or near, to apply to: ad = to, and pono = to put.]

\* 1. Added. (*Glossog. Nov.*, 2nd ed.)

2. Peculiarly applicable to; suitable to time, place, persons, and circumstances.

"The duke's delivery of his mind was not so sharp, as solid and grave, and *opposite* to the times and occasions."—*Wotton*.

"This contrast, not unsuitable to life, is to that other state more *opposite*."—*Wordsworth: Excursion*, bk. v.

ap-pō-site-ly, adv. [Eng. *opposite*; -ly.] In an opposite manner; fitly, suitably, appropriately.

"He ... quoted the New Testament *oppositely*."—*Macaulay: Hist. Eng.*, chap. xxiii.

ap-pō-site-ness, s. [Eng. *opposite*; -ness.] The quality of being apposite; fitness, suitability, appropriateness.

"Judgment is either concerning things to be known, or of things done, of their congruity, fitness, rightness, *oppositeness*."—*Bate: Origin of Man's*.

ap-pō-si-tion, s. [In Ger. & Fr. *apportion*; Sp. *aposition*; Port. *appositao*; Ital. *appositazione*; from Lat. *appositio*.]

A. Ordinary Language:

1. The act of placing to or adding to.

2. The state of being placed to or added to.

"... certain bones, placed more or less in *apposition* with it."—*Flower: Osteol. of Mammalia*, p. 12.

B. Technically:

*Gram.*: The placing of two nouns or pronouns which are in the same case in juxtaposition with each other, without, however, connecting them by a conjunction. The word placed in apposition to the other does not so much add a completely new idea to that conveyed by the first one, as it explains that first. Examples: "She walks a queen," "It is I," "Hamlet, Prince of Denmark." In these sentences *queen* is in apposition with *she*, *I* with *it*, and *Prince with Hamlet*. *She, I, and Prince* are all in the nominative case.

\*ap-pō-si-tion-al, a. [Eng. *apportion*; -al.] Relating to apposition; in apposition.

"The *appositional* construction is in reality a matter of concord rather than of gender."—*Latham: Eng. Lang.* (5th ed.), p. 601.

\*ap-pō-si-tive, a. [Eng. *apposit(e)*; -ive.] Apposite.

"The words in the parenthesis being only *appositive* to the words going immediately before."—*Kitchin: Tr.*, p. 42.

ap-pō-nt, v.t. [APPOINT.]

ap-prāise (1), \*ap-prize, \*ap-prise, v.t. [Fr. *apprécier* = (1) to value, (2) to appreciate, to estimate; O. Fr. *apreiser, apreisier, aprisier, approisier*; Sp. *apreciar*; Port. *apreciar*; Ital. *apprezzare*; Lat. *appretio* = (1) to value, to appraise, (2) to purchase, (3) to appropriate: ad = to, and pretio = to prize; pretium = price.] [APPRAISE, APPRECIATE, PRICE, & PRIZE.] To value any kind of property, especially by means of persons acting under the authority of the law, or by mutual agreement of the parties concerned. (*Glossog. Nov.*)

"... to appraise all the goods that were in the house."—*Sp. Hall: Account of Himself*.

†ap-prāise (2), v.t. [Formed from Eng. *praise* (q.v.).] To praise. (*Poetic*.)

"Appraised the Lycian custom,"—*Tennyson: The Princess*, ll.

ap-prāised (1), \*ap-prized, \*ap-prised, \*ap-pris-ēd, pa. par. [APPRAISE (1).]

†ap-prāised (2), pa. par. [APPRAISE (2).]

ap-prāise-mēt, \*ap-prise-mēt, s. [Eng. *appraise*; -ment.]

1. *Ord. Lang.*: The act of appraising; the state of being appraised; that at which anything is appraised. (*Dyche*.)

2. *Law:* The act of appraising or valuing goods. Formerly, in the case of treasure trove, wrecks, waifs, and strays seized by the king's officer for the sovereign's use, a commission of appraisement was issued by the royal exchequer to value the goods, and if after proclamation had twice been made no claimant appeared, they were then declared derelict, and forfeited to the crown. Similar appraisement took place when the goods of a transgressor against the laws were forfeited and his goods secured for the public use, even if he had personally escaped the reach of justice. (*Blackstone Comm.*, bk. III, ch. 17.)

"There issued a commission of *appraisement* to value the goods in the officer's hands."—*Blackstone*.

"For their *price*: By law, they ought to take as they can agree with the subject: By abuse, they take at an imposed and enforced *price*: By law, they ought to make but one *appraisement*, by neighbours, in the country: By abuse they make a second *appraisement* at the court-gate."—*Bacon: Speech to K. James touching Purveyors*.

ap-prāis-ēr, \*ap-pris-ēr, \*ap-priz-ēr, s. [Eng. *appraise*; -er.] One whose occupation it is to appraise property. The appellation is given chiefly to brokers of household furniture, but is also applied to all, of whatever calling, who in fact appraise property of any kind. (*Dyche*.)

ap-prāis-ing, \*ap-pris-ing, \*ap-priz-ing, pr. par. & a. [APPRAISE (1).]

*As substantive:* The act of valuing by means of persons authorised to do so.

\*ap-prē-cā-tion, s. [Lat. *ad* = to, and *precatio* = a praying, a prayer, from *precor* = to speak as a suppliant, to ask or beg for.] Prayer or application to or for.

"Such shall be the fervent *appreciations* of your much devoted friend."—*Sp. Hall: Remains*, p. 404.

\*ap-prē-ca-tōr-ŷ, a. [Lat. *ad* = to, and *precatorius* = pertaining to prayer.] Relating to prayer or application.

"... how forcible shall we esteem the (not so much *appreciatory* as declaratory) benedictions of our spiritual fathers, sent to us, out of heaven."—*Sp. Hall: Cases of Conscience*, lib. 2.

ap-prē-çi-a-ble (or *ci* = *shi*), a. [In Fr. *appréciable*.]

1. Capable of being estimated and its value ascertained.

(a) Used in a general sense.

"Equally conclusive and more readily *appreciable* proof" —*Owen: British Fossil Mammals and Birds*, p. xxiii.

(b) Used specially of a quantity which, though small, is yet large enough to enable it to be ascertained, or at least estimated.

"... the derivative oscillation (as it may be termed) will be imperceptible in one case, of *appreciable* magnitude in another."—*Herschel: Astron.*, 5th ed. (1858), § 650.

"... the difference between the sexes in the amount of scarlet is so slight that it can hardly make any *appreciable* difference in the danger incurred."—*Barrett: The Descent of Man*, pt. II, ch. xv.

2. Worthy of being appreciated, valuable.

ap-prē-çi-âte, \*ap-prē-ti-âte (or *ci*, *ti* = *shi*), v.t. [In Fr. *apprécier*; Sp. *apreciar*; Port. *apreciar*; Ital. *apprezzare*; Lat. *appretio*.] [APPRAISE.]

1. To value at a proper price. *Spec.*, to estimate at a high price or value. (*Lit. & fig.*)

"... utterly incapable of *appreciating* his higher qualities."—*Macaulay: Hist. Eng.*, ch. xv.

"... the mental culture necessary in order to *appreciate* Homer."—*Gladstone: Studies on Homer*, vol. I, § III, p. 25.

2. To estimate anything, even though the element of price enter into it only remotely; to comprehend, to understand, accurately to conceive.

"It is instructive to endeavour to *appreciate* the direction and estimate the strength of the opposing forces which in different European States will be brought to bear on this question."—*Times*, Nov. 16, 1877.

"... to enable us to *appreciate* the action of an organ in health."—*Todd & Bowman: Physiol. Anat.*, vol. I, Introd., p. 51.

¶ (a) In the United States *appreciate* is used in two other senses: (1) *transitive* = to raise the value of; and (2) *intransitive* = to rise in value. (*Webster*.)

(b) Crabb considers that while *appraise* and *appreciate* both signify to value, *appraise* is used in a literal, and *appreciate* in a figurative, sense: one *appraises* goods, he *appreciates* and does not *appraise* the characters of men. To *estimate* a thing is to get the sum of the value by calculation; to *esteem* anything is to judge its actual and intrinsic value. *Estimate* is used either literally or figuratively; *esteem*, only in a moral sense: one *estimates* losses by fire, he *esteems* the character of a good man.

ap-prē-çi-â-téd (or *ci* = *shi*), pa. par. & a. [APPRECIATE.]

ap-prē-çi-â-tīng (or *ci* = *shi*), pr. par. [APPRECIATE.]

ap-prē-çi-â-tion, \*ap-prē-ti-â-tion (or *ci* and *ti* as *shi*), s. [In Fr. *appréciation*; Port. *apreciacao*.] [APPRECIATE.] The act of estimating anything at its just value, specially if that be a high one; the state of being so valued; the price, valuation, or estimate set upon it.

"Sorrow for sin—in *appreciation* they would ever have to be excessive."—*Dr. Plafiers: The Power of Prayer* (1817), p. 53.

"... a defective appreciation of colour."—*Berberi Spencer*, 2nd ed., vol. II, p. 249, § 853, Note.

¶ In the United States *appreciation* is used also to mean a rise in value.

ap-prē-çi-a-tive (or *ci* as *shi*), a. [Eng. *appraise*; -ive. In Fr. *appréciatif*; Port. *apreciativo*.] Having, containing, or implying appreciation for. (*Goodrich & Porter*.)

ap-prē-çi-a-tōr-ŷ (or *ci* as *shi*), a. [Eng. *appraise*; -ory.] The same as APPRECIATIVE (q.v.). (*Goodrich & Porter*.)

ap-prē-hēnd', v. t. & i. [In Fr. apprehendere & apprehend; Sp. apprehender; Port. apprehender, ap-render; Ital. apprehendere = to learn, to conceive; Lat. apprehendo = (1) to seize, (2) to allege, (3) to comprehend; ad = to, and prehendo = to take hold of, to seize. This is from Lat. prae = before, and the same root which appears in A.S. hehtan, gehentan = to take hold of, to pursue.]

A. Transitive:

I. Of physical action: To take hold of, to grasp, to seize; especially to seize a criminal with the view of bringing him to justice.

"There is nothing but hath a double handle, or at least we have two hands to apprehend it."—Taylor.

"And when he had apprehended him, he put him in prison."—Act xii. 4.

II. Of mental action: To seize, grasp, or lay hold of an idea or a conception; to entertain an emotion.

1. Of mental conceptions:

(a) To interpret, to understand but somewhat doubtfully.

"What was spoken metaphorically may be apprehended literally. What was spoken ludicrously may be apprehended seriously."—Macaulay: Hist. Eng., chap. 7.

(b) To believe, to be of opinion.

"... to do what they conscientiously apprehended to be wrong."—Macaulay: Hist. Eng., chap. xi.

2. Of emotion: To dread the approach of some evil; to look forward with anxiety to a coming event.

"Here, therefore, the opposition had more reason than the king to apprehend violence."—Macaulay: Hist. Eng., chap. ii.

¶ In this sense it is sometimes used impersonally.

"It was apprehended that, if he were now armed with the whole power of the Crown, he would exact a terrible retribution for what he had suffered."—Macaulay: Hist. Eng., chap. xiii.

B. Intransitive:

1. Partially to understand.

2. To think, conceive, entertain an opinion. (Generally followed by that.)

¶ (1.) Apprehend in the sense classed above as II. 1 (a) is a much weaker word than comprehend. Every one apprehends much which he does not comprehend.

(2.) When apprehend is used in the sense classed as No. II. 1 (b), it may be contrasted with the verbs to conceive, to suppose, and to imagine. According to Crabb, to apprehend is simply to take an idea into the mind, as children do; to conceive an idea is to form it after reflection, as is done by adults. To apprehend and to conceive are applied only to reality, whilst to suppose and imagine are used of things which may exist only in the imagination. Apprehend expresses the weakest kind of belief: a man is said to conceive that on which he forms a direct opinion; what one supposes may admit of a doubt, what one imagines may be altogether improbable or impossible, and that which cannot be imagined may be too improbable to be believed. (Crabb: Eng. Synon.)

(3.) When apprehend is used in the sense classed as No. II. 2, it may be contrasted with the verbs to fear and to dread. These rise above each other in force after the manner of a climax in the order apprehend, fear, dread. We apprehend an unpleasant occurrence; we fear a misfortune; we dread a calamity. Moreover, apprehend respects things only; fear and dread relate to persons as well as things. (Crabb: Eng. Synon.)

(4.) More (Sleep of the Soul, ii. 29) use the form apprehend, probably metri gratia.

ap-prē-hēnd'-ēr, s. [Eng. apprehend; -er.] One who apprehends in any of the senses of that verb.

"Gross apprehenders may not think it any more strange, than that a bullet should be moved by the rarefied fire."—Glanville.

ap-prē-hēnd'-īng, pr. par., a., & s. [APPREHEND.]

A. As pr. par. & adj.: In senses corresponding to those of the verb.

B. As substantive: Apprehension.

"... to issue a proclamation for the apprehending of Lidlow."—Macaulay: Hist. Eng., ch. xv.

ap-prē-hēn'-sī-ble, a. [Lat. apprehensibilis.]

\* 1. Able to be comprehended or included; comprehensible, in a literal sense.

"The north and southern poles are incommunicable and fixed points, whereof the one is not apprehensible in the other."—Browne: Vulgar Errors.

2. Able to be apprehended, in a lit. or fig. sense.

"... in reality it exacts so powerful an effort on the part of the reader to realise visually, or make into an apprehensible unity, the scattered elements and circumstances of external landscapes painted only by words."—De Quincey: Works (ed. 1868), vol. II., p. 178.

ap-prē-hēn'-sion, s. [In Fr. apprehension; Port. apprehensao; Lat. apprehensio, from apprehensum, supine of apprehendo.] [APPREHEND.]

I. The act or power of apprehending.

1. Physically: The act of laying hold of, grasping, or seizing with the hands or in some similar way, and especially of seizing a criminal to bring him to justice. [PREHENSION.]

"A lobster hath the chely or great claw of one side longer than the other, but this is not their leg, but a part of apprehension, whereby they seize upon their prey."—Browne: Vulgar Errors.

2. Mentally:

(a) The act of mentally grasping or laying hold of, especially the act of laying hold of an idea without studying it in its various relations so as to comprehend it. [COMPREHEND.]

"Simple apprehension denotes as more than the soul's naked intellect of an object, without either composition or deduction."—Glanville.

"And acts in that obedience, he shall gain The clearest apprehension of those truths, Which unassisted reason's utmost power Is too infirm to reach!"

Wordsworth: Excursion, bk. v.

(b) Opinion, belief, founded on sufficient or resting on doubtful evidence.

"... the unpardonable guilt of murder, which, in his apprehension, was aggravated rather than excused by the vice of intoxication."—Gibson: Decline and Fall, chap. xii.

(c) The power or faculty by which man mentally apprehends.

"What a piece of work is a man! ... in action, how like an angel! in apprehension, how like a god!"—Shakesp.: Hamlet, ii. 2.

II. The state of being apprehended, or being under the influence of apprehension.

1. The state of being seized, grasped, or laid hold of; seizure.

"See that he be conveyed unto the Tower: And go ye, brothers, to the man that took him, To question of his apprehension."—Shakesp.: Henry VI., iii. 2.

"Corn. True or false, it hath made thee Earl of Gloucester. Seek out where thy father is, that he may be ready for our apprehension."—Shakesp.: King Lear, iii. 5.

2. Foreboding of evil, suspicion that something unpleasant is about to happen; fear.

"But Mackay's gentle manner removed their apprehension."—Macaulay: Hist. Eng., chap. xiii.

III. That which is apprehended; an object of apprehension.

"... a foolish extravagant spirit, full of forms, figures, shapes, objects, ideas, apprehensions, motions, revolutions."—Shakesp.: Love's Labour's Lost, iv. 2.

ap-prē-hēn'-sive, a. [Fr. apprehensif; Sp. apprehensivo; Port. apprehensivo; from Lat. apprehensum, supine of apprehendo = to seize, or lay hold of.]

I. Of intellect:

\* 1. Cognizant of, acquainted with.

"She, being an handsome, witty and bold maid, was both apprehensive of the plot and very active to prosecute it."—Fulter: The Profane State, bk. v., c. 6. (See Trench, Glossary, 7, 8.)

2. Quick to understand.

"Nourish'd imagination in her growth, And gave the mind that apprehensive power By which she is made quick to recognize The moral properties and scope of things."—Wordsworth: Excursion, bk. i.

II. Of emotion:

1. Gen.: Keenly susceptible of feeling in general.

"Thoughts, my tormentors, armed with deadly stings, Mangle my apprehensive tenderest parts."—Milton: Samson Agon.

2. Spec.: Entertaining suspicion or slight fear of present or foreboding of future danger.

"... a man inestably greedy of wealth and power, and yet nervously apprehensive of danger."—Macaulay: Hist. Eng., chap. xxiii.

ap-prē-hēn'-sive-ly, adv. [Eng. apprehensive; -ly.] In an apprehensive manner; with apprehension. (Johnson.)

ap-prē-hēn'-sive-ness, s. [Eng. apprehensive; -ness.] The quality of being apprehensive.

"Whereas the vowels are much more difficult to be taught, you will find, by falling upon them last, great help by the apprehensiveness already gained in learning the consonants."—Holder.

\* ap-prēnd', v. t. [APPREHEND, v., ¶ (4).]

ap-prēn'-tice, a-prēn'-tise, a-prēn'-tys, s. [In Fr. apprenti, as a. = an apprentice; as adj. = apprenticed; from apprentice = to learn; O. Fr. & Prov. apprentis, apprentis; Sp. aprendiz = an apprentice; apprentice = to learn; Low Lat. apprenticius = an apprentice; Class. Lat. apprendo (poetic) = apprentice = to seize, ... to comprehend.] [APPREHEND.]

1. Ordinary Language & Law: A young man, or young woman, who has been bound by indentures to serve a particular master or mistress for a certain term of years; the master again, on his side, covenanting to teach the apprentice the trade or profession which he himself practises.

"A kiddy man, who became attached to the little fellow, and in due time made him [Faraday] his apprentice, without fee."—Tyndall: Fragments of Science, 2d ed., xii. 24.

2. In old Law-books: Advocates or barristers under sixteen years' standing were called Apprentices (Apprenticii ad legem). After sixteen years they might become serjeants (serjentes ad legem). (Blackstone: Comment., bk. iii., ch. 3.)

3. Apprentice fee. The fee paid to a master for taking charge of, supporting, and giving technical instruction to an apprentice.

ap-prēn'-tice, v. t. [From the substantive.] To bind as an apprentice or as apprentices.

ap-prēn'-ticed, pa. par. & a. [See APPRENTICE, v.]

"Him portion'd maids, apprentice'd orphans blest, The young who labour, and the old who rest."—Pope.

\* ap-prēn'-tice-hood, s. [Eng. apprentice, and suffix -hood.] Apprenticeship.

"Must I not serve a long apprenticeship To foreign passages, and in the end, Having my freedom, boast of nothing else But that I was a journeyman to grief!"—Shakesp.: Rich. II., i. 2.

ap-prēn'-tice-ship, s. [Eng. apprentice, and suffix -ship.]

1. Strictly: The term of years for which one is bound as an apprentice; also the state or condition of an apprentice.

¶ The duration of apprenticeships varies in different countries, and has not been uniform in any country. Apprenticeships seem to have been unknown among the old Romans. In England they are incidentally mentioned in an Act of Parliament in 1383, but they were then so common that their origin need not be sought at a long prior date. By the "Statute of Apprenticeship," 5 Eliz., c. 4, it was enacted that no person should for the future exercise any trade, craft, or mystery at that time exercised in England, unless he had previously served an apprenticeship to it of at least seven years. The judges of the higher courts of law gave so narrow an interpretation as they could to this repressive enactment. Adam Smith (Wealth of Nations, bk. i., ch. x., pt. ii., and bk. iv., ch. ii., c. 9), swept it away. Optional apprenticeship still flourishes, and is the common method of learning a handicraft. The enforcement of apprenticeship was never carried out to the same extent in Ireland and in Scotland as in England. In the United States apprenticeship followed the English laws and custom. It has almost died out in the larger cities, but still exists in many small towns and villages. From those towns and from immigration the supply of skilled mechanics needed in the large cities is mainly derived.

2. Loosely: The time during which one is learning a profession, or acquiring skill in anything, even though he may not be formally bound by indentures to a master.

"He had never, he said, served an apprenticeship to the military profession."—Macaulay: Hist. Eng., ch. vii.

ap-prēn'-tice-īng, pr. par. [APPRENTICE, v.]

\* ap-prēn'-tis-age, s. [Fr. apprentissage; Sp. aprendizage.] The state or condition of an apprentice; apprenticeship (lit. & fig.).

"... than to utter without apprenticeship of war."—Bacon: Otters, upon a Libel (1622).

ap-prēssed', ap-prēst', a. [From Lat. appressum (adpressum), supine of apprimo (adprimo) = to press to; ad = to, and premo = to press.]

bēl, bōy; pōut, jōwl; cat, cēll, choros, çhin, bench; go, gem; thin, thīs; sin, aș; expect, Xenophon, exist. ph = f. -clan, -tian = shan. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -sious, -cious = shūs. -ble, -dle, &c. = bel, del

**Bot.**: Pressed to anything else; as, for instance, hairs pressed closely to the stem of a plant. [ADRESSED.] (*London: Cycl. of Plants, 1829; Gloss.*)

\* **ap-prē-ti-āte** (tī as shī), *v.t.* [APPRECIATE.]

\* **ap-prē-ti-ā-tion** (tī as shī), *s.* [APPRECIATION.]

\* **ap-prēne**, \* **ap-priene**, *v.t.* [APPROVE.] (*Scotch.*)

\* **ap-prīse**, \* **ap-priise**, *s.* [In Fr. *apprise* = the formal notice sent to an inferior judge of the decision come to by a superior one; from *appris*, *pa. par.* of *apprendre* = to learn, to teach.] [APPREHEND.] Notice, information.

"Then I praised him for to sale His will, and I it wolde obeie. After the forsaie of his apprise." *Gower: Conf. Amantis, bk. 1.*

**ap-prīse** (1), \* **ap-priise** (1), *v.t.* [From *apprise*, *a. (q.v.)*.] To inform, to make aware, to bring to the notice of.

"Herman! I command thee, To apprise the Count of my approach." *Byron: Manfred, III. 4.*

\* **ap-priise** (2), *v.t.* [\* APPRISE (2).]

**ap-priised** (1 & \* 2), *pa. par.* [APPRISE (1 & \* 2).]

**ap-priis-ing** (1 & \* 2), *pr. par.* [APPRISE (1 & \* 2).]

\* **ap-priise** (2), \* **ap-priise** (2), *v.t.* Modified form of APPRAISE (q.v.).

\* **ap-priized** (1 & 2), *pa. par.* [\* APPRISE (1 & 2).]

\* **ap-priize-ment**, \* **ap-priise-ment**, *s.* [APPRAISEMENT.]

\* **ap-priiz-ēr**, \* **ap-priis-ēr**, *s.* [APPRaiser.]

\* **ap-priiz-ing**, *pr. par.* [APPRISE (1).]

\* **ap-priiz-ing**, *pr. par. & s.* [APPRISE (2).] \* *As substantive (Scotch Law)*: Formerly, an action by which a creditor sought permission to take the estates of his insolvent debtor. Adjudications have now been substituted in lieu of apprizings.

**ap-prō-ach**, \* **ap-prō-che**, \* **ap-prō-eh**, *v.i. & t.* [Fr. *approcher*, from *proche* = near; Prov. *aprophar*, from *prop* = near; Ital. *approssimarsi*; Old Ital. *approciare*; Low Lat. *approprio*, from Lat. *ad* = to, and *prop* = near.]

**A. Intransitive:**

1. *Of place*: To advance to the immediate vicinity of, to draw near.

"Danger vaine it were to have assayd That cruel element, which all things feare, No nose can suffer to approuchen neare." *Spenser: F. Q., III. xl. 28.*

"Wherefore approached ye so nigh unto the city when ye did fight?"—*3 Sam. xl. 20.*

2. *Of time*: To draw near, to be not far off.

"Behold, thy days approach that thou must die."—*Deut. xxxi. 14.*

3. *Figuratively:*

(a) *Gen.*: To draw near to in other respects; as in aim, in attainments, or in intellectual or moral character.

"To have knowledge in all the objects of contemplation, is what the mind can hardly attain unto; the instances are few of those who have, in any measure, approached towards it."—*Locke.*

(b) *In Scripture (Spec.)*: To have near access of a spiritual kind to God.

"I will cause him to draw near, and he shall approach unto me: for who is this that engaged his heart to approach unto me?"—*1st Cor. xxi. 21.*

**B. Transitive:**

† 1. *Really transitive*: To cause to draw near.

"By plunging paper thoroughly in weak spirit of wine, and approaching it to a candle, the spirituous parts will burn without burning the paper."—*Boyle.*

2. *Only apparently so, there being an ellipsis of to*: To draw near to in place, in time, or in any other way.

"It was indeed scarcely safe to approach him [that is (to) him]."—*Macaulay: Hist. Eng., ch. vii.*

"He was an admirable poet, and thought even to have approached Homer."—*Temple.*

**ap-prō-ach**, \* **ap-prō-che**, *s.* [From the verb. In Fr. *approche*.]

**A. Ordinary Language:**

I. The act of drawing near in place or in other ways.

"The Pastor learn'd that his approach had given A welcome interruption to discourse." *Worsworth: Excursion, bk. v.*

"... a nearer approach to the human type."—*Owen: Classif. of the Mammoth, p. 85.*

II. The state of being brought near in place, in time, or in other ways.

"Poets sang with envious favour the approach of the golden age."—*Macaulay: Hist. Eng., ch. iii.*

III. That by which one draws near; means or liberty of drawing near.

1. *Lit.*: A road, a street, an avenue, or other way by means of which one can draw near to a place.

"We should greatly ere if we imagined that the road by which he entered that city [Cork] bore any resemblance to the stately approach which strikes the traveller of the nineteenth century with admiration."—*Macaulay: Hist. Eng., ch. xii.*

[See also B. I, Fortif.]

2. *Fig.*: Liberty of drawing near; access.

"Honour hath in it the vantage-ground to do good; the approach to kings and principal persons, and the raising of a man's own fortunes."—*Bacon.*

**B. Technically:**

1. *Fortification (Plur.)*:

(a) *Gen.*: The works thrown up by an army for its protection while it is moving forward to attack a fort or other military post. Among these are the first, second, and third parallels, salemments, with and without trenches, redoubts, places of arms, saps, galleries, and lodgments. (*James: Military Dict., 4th ed., 1816.*)

† A signification analogous to this has found its way into poetry.

"... Sextus Pompeius Makes his approaches to the port of Rome." *Shakesp.: Antony and Cleopatra, I. 4.*

"Against besieg'd heav'n the giants move? Hills pull'd on hills, on mountains mountains lie, To make their mad approaches to the sky." *Dryden.*

Counter approaches are trenches carried on by the besieged against those of the besiegers. (*James.*)

(b) *Spec.*: Attacks. (*James.*)

"... so soon we shall drive back Of Alcibiades the approaches wild." *Shakesp.: Timon of Athens, v. 1.*

2. *Geom.* *Curve of equal approach*: A curve of such a form that a body descending it, under the impulse of gravity, makes equal approaches in equal times to the surface of the ground.

3. *Algebra.* *Method of approach*. [See APPROXIMATION, B.]

4. *Gardening*. [APPROACHING.]

**ap-prō-ach-a-ble**, *a.* [Eng. *approach*; -able.] Capable of being approached.

"... a region essentially mythical, neither approachable by the critic nor measurable by the chronologer."—*Grote: Hist. Greece, pt. 1, ch. 1.*

**ap-prō-ach-a-ble-ness**, *s.* [Eng. *approachable*; -ness.] The quality of being approachable. (*Webster.*)

**ap-prō-ached**, \* **ap-prō-ehed**, *pa. par.* [APPROACH, v.]

**ap-prō-ach-ēr**, *s.* [Eng. *approach*; -er.] One who approaches, one who draws near.

"Thou gav'st thine ears like tapsters, that bid welcome To knaves and all approachers." *Shakesp.: Timon of Athens, IV. 2.*

**ap-prō-ach-ing**, *pr. par., a., & s.* [APPROACH, v.]

**A. & B.** *As present participle & participial adjectives*: In senses corresponding to those of the verb.

"Unable to discern the signs of approaching reaction."—*Macaulay: Hist. Eng., ch. 11.*

**C. As substantive:**

1. *Gen.*: A drawing near, an approach.

"A young Venetian, one that comes before To signify the approaching of his lord." *Shakesp.: Merchant of Venice, II. 2.*

2. *Gardening*: The grafting of a shoot or a small branch of one tree into another without detaching it from the parent stock. It is called also *engrafting by approach* or *by in-arching*.

\* **ap-prō-ach-less**, *a.* [Eng. *approach*; -less.] That cannot be approached; without means of approach. (*Webster.*)

**ap-prō-ach-mēt**, *s.* [Eng. *approach*; -ment.] The act of drawing near; the state of being brought near.

"As for ice, it will not concrete but in the approachment of the air, as we have made trial in glasses of water, which will not easily freeze."—*J. Elton: Errors.*

\* **ap-prō-bāte**, *v.t.* [APPROBATE, a.] To express approval of. (It is still used in America.)

"Mr. Hutchinson approved the choice."—*J. Elton: Scots Law*: The term *approve* is generally used along with *reprobate*, to which it is opposed. To *approve* and *reprobate* is to attempt to take advantage of those portions of a deed which are in one's favour, whilst repudiating the rest. This is not legally admissible. If a person *approve*, approve, or assent to portions of a deed, and take legal advantage of this assent, he must accept the deed as a whole; he cannot "reprobate," repudiate, or reject the portions of it which he dislikes.

**ap-prō-bāte**, *a.* [Lat. *approbatus*, *pa. par.* of *approbo*, -*ari*, -*atum* = to approve: *ad* = to, and *probo* = to try, test, judge, to prove . . . to approve; from *probus* = good, excellent.] Approved

"All things contained in Scripture is *approbate* by the whole consent of all the clergy of Christendom."—*Sir T. Elgot: Governour, fol. 204.*

**ap-prō-bā-tēd**, *pa. par.* [APPROBATE, v.]

**ap-prō-bā-tīng**, *pr. par.* [APPROBATE, v.]

**ap-prō-bā-tion**, \* **ap-pro-ba-ci-on**, *s.* [In Fr. *approbation*; Sp. *aprobacion*; Port. *aprovação*; Ital. *approbazione*, *approvazione*; Lat. *approbatio* = (1) an approving, an assenting to, (2) proof, confirmation; from *approbo* = (1) to approve, (2) to prove.] [APPROBATE, APPROVE, PROVE.]

I. The act of approving or of proving.

1. *Of approving:*

(a) *By words, or in any other way*: Commendation, praise, approval.

"Many, therefore, who did not assent to all that the king had said, joined in a loud huzz of approbation when he concluded."—*Macaulay: Hist. Eng., chap. xxiii.*

"Animals manifestly feel emulation. They love approbation or praise."—*Darwin: Descent of Man, vol. I. (1871), pt. 1, ch. II, p. 42.*

(b) *Tactily*: The act of approving of one's self, of another, or of others, within the secret recesses of the heart; liking, satisfaction, pleasure, complacency.

"I am very sensible how much nobler it is to place the reward of virtue in the silent approbation of one's own breast than in the applause of the world."—*Milton: Pious Letters, bk. 1, lett. 2.*

\* 2. The act of proving; attestation, support, proof.

"For God doth know how many now in health Shall drop their blood in approbation Of what your reverence shall incite us to." *Shakesp.: Hen. V., I. 2.*

II. The state of being approved.

\* *Spec.*: The state of being on probation; trial.

"This day my sister should the cloister enter, And there receive her approbation." *Shakesp.: Measure for Measure, I. 2.*

\* **ap-prō-bā-tive**, *a.* [In Fr. *approbatif*; Port. *approbativo*.] Containing, expressing, or implying approval of; commendatory, laudatory. (*Coitgrave.*) [APPROBATORY.]

**ap-prō-bā-tive-ness**, *s.* [Eng. *approbative*; -ness.]

1. *Ord. Lang.*: The quality of being approbatory.

2. *Phren.*: Love of approbation.

† **ap-prō-bā-tor**, *s.* [Lat. *adprobator*, *approbator*; Ital. *approvatore*.] One who approves.

"Accept them for judges and approbators."—*Evelyn: Mem. & Letters (1665).*

† **ap-prō-bā-tor-ŷ**, \* **ap-prō-bā-tor-ŷe**, *a.* [Eng. *approbate*; -ory.] Expressing or implying approbation; commendatory, laudatory.

"After the *approbatorie* epistle of Cardinal Turcoteate."—*Sheldon: Miracles of Antichrist, p. 300.*

\* **ap-prō-che**, *v.t.* [APPROACH.]

\* **ap-procheand**, *pr. par.* [Northern dialect *pr. par.* of APPROCHE (q.v.).] Proximate, in the vicinity. (*Scotch.*)

"It was equal in glory of sines to any two ap-procheand."—*Bellendens: T. Lilius, p. 17.*

\* **ap-prōmpt**, *v.t.* [Lat. *ad*, implying addition to, and Eng. *prompt* (q.v.).] To prompt, to stimulate, to question.

fāte, fāt, fāre, amidst, whāt, fāll, father; wō, wēt, hēre, campl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt or, wōre, wolf, wōrk, whō, sōn; mūte, cūb, cīre, unite, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē; ā = ē. qu = kw.

"Neither may these places serve only to approof our invention, but also to direct our inquiry."— Bacon: Learning, bk. II.

ap-prô'of, a. [From Eng. approve.]

1. Approval, approbation. "O most perilous months, That bear in them one and the self-same tongue Either of condemnation or approof!"— Shakespeare: Meas. for Meas., II. 2.

2. Proof, trial, experience. "Sister, prove such a wife As my thoughts make thee, and as my farthest band Shall pass on thy approof!"— Shakespeare: Antony and Cleopatra, III. 2.

ap-prôp'ër-âte, v. i. [Lat. appropratus, i. s. par. of appropro = to hasten.] To hasten, to make haste, to set forward. (Johnson.)

ap-prô-pîn-quâte, v. t. [Lat. appropinquo = to draw near: ad = to, and propinquo = to bring near; propinquus = near; prope = near.] To draw near to, to approach. (Johnson.)

ap-prô-pîn-quâ-tion, s. [Lat. appropinquatio; Sp. appropinquacion.] A drawing near, an approach. "There are many ways of our appropinquation to God."—Bp. Hall: Remains, p. 80.

ap-prô-pîn-que, v. i. [Lat. appropinquo = to draw near.] To draw near, to approach. "In the example there is an ellipsis of to, which makes the verb look transitive. It means (to) an end.

"Mortal crisis doth portend My days to appropinquating an end."— Butler: Hudibras, I.

ap-prô-pîn-qui-tÿ, s. [PROPINQUITY.] Nearness, proximity. (Thackeray: Vanity Fair, ch. xiv.)

ap-prô-pre, v. t. [See def.] Original form of APPROPRIATE, v. (q. v.).

"His awn loves, les and mare, That til himself ad be appropried thare."— Hampole: Fricks of Conca., s. 248.

ap-prô-pri-a-ble, a. [Eng. appropriate; -able.] Which may be appropriated. "This conceit, applied unto the original of man and the beginning of the world, is more justly appropriate unto its end."—Browne: Vulgar Errors.

ap-prô-pri-a-mënt, s. [Fr.] That which is proper to one; a characteristic. (N. E. D.)

ap-prô-pri-âte, v. t. [APPROPRIATE, a.] A. Ordinary Language:

I. Literally: 1. To transfer to one's self money, property, or other tangible thing, which one previously held in common with others, or even which was wholly theirs.

"He spoke of merchandises as well as provisions captured and appropriated."—Froude: Hist. Eng., vol. IV., p. 407.

2. To set aside part of what is one's own for a special purpose. "As for this spot of ground, this person, this thing, I have selected and appropriated. I have inclosed it to myself and my own use, and I will endure no sharer, no rival, or companion in it."—South.

II. Figuratively: 1. To take or attempt to take to one's self a natural or spiritual advantage designed to be common to many others.

"I have selected and appropriated. I have inclosed it to myself and my own use, and I will endure no sharer, no rival, or companion in it."—South.

2. To assign a specific meaning to words which previously were general in their signification. "I have selected and appropriated. I have inclosed it to myself and my own use, and I will endure no sharer, no rival, or companion in it."—South.

"He need not be furnished with verses of sacred Scripture; and his system, that has appropriated them to the orthodoxy of his church, makes them immediately irrefragable arguments."—Locke.

B. Technically: Law: To annex the fruits of a benefice to a spiritual corporation. [APPROPRIATION, B., 1.]

"Before Richard II, it was lawful to appropriate the whole fruits of a benefice, to any abbey, the house finding one to serve the cure."—Aylmer.

ap-prô-pri-âte, a. & s. [From Lat. appropriatus, pa. par. of appropro; from ad = to, and proprio = to appropriate; proprius = one's own; perhaps from prope = near. In Fr. approprié. [APPROPRIATE, v.]

1. Properly: Pertaining to something previously shared in common, but now rendered the property of an individual.

2. Suitable, fit, becoming, well adapted to the circumstances.

with appropriate words Accompanied. Wordsworth: Excursion, bk. vii.

B. As substantive: Special function or sim. "The Bible's appropriate being (as itself tells us) to enlighten the eyes and make wise the simple."—Boyle: On the Style of H. Scrip., p. 44.

ap-prô-pri-â-tëd, pa. par. & a. [APPROPRIATE, v.] " . . . in an appropriated spot."—Wordsworth: The Excursion.

ap-prô-pri-âte-ly, adv. [Eng. appropriate; suff. -ly.] In an appropriate manner; fitly, suitably, pertinently, properly. (Todd.)

ap-prô-pri-âte-nëss, s. [Eng. appropriate; -ness.] The quality of being appropriate. "The appropriateness of this particular charge was a fresh cause of suspicion."—Froude: Hist. Eng., vol. IV., p. 642.

ap-prô-pri-â-tiing, pr. par. [APPROPRIATE, v.]

ap-prô-pri-â-tion, s. [In Fr. appropriation; Sp. apropiacion; Port. apropiacao; Ital. appropriazione; Lat. appropriatio.] [APPROPRIATE, v.]

A. Ordinary Language: I. The act of appropriating.

1. Lit.: The act of taking that to one's self which one previously held in common with others, or of applying anything to a special purpose. "The first of these modes of appropriation, by the government, is characteristic of the extensive monarchies which from a time beyond historic record have occupied the plains of Asia."—J. S. Mill: Pol. Econ., Prelim. Remarks, p. 14.

2. Fig.: The act of mentally assigning to a general idea a limited or specific meaning. "The mind should have distinct ideas of the things, and retain the particular name, with its peculiar appropriation to that idea."—Locke.

II. The state of being appropriated. III. That which is appropriated.

" . . . and thus were most, if not all, the appropriations at present existing, originally made, being annexed to bishoprics, prebends . . ."—Blackstone: Comment., bk. II., ch. 11.

B. Technically (Law): 1. The transference to a religious house, or spiritual corporation, of the tithes and other endowments designed for the support of religious ordinances in a parish; also these when transferred. When the monastic bodies were in their glory in the Middle Ages, they begged, or bought for masses and obits, or in some cases even for actual money, all the advowsons which they could get into their hands. In obtaining these they came under the obligation either to present a clergyman to the church, or minister there in holy things themselves. They generally did the latter, and applied the surplus to the support and aggrandisement of their order. On the suppression of the monasteries in the reign of Henry VIII., the appropriated advowsons were transferred to the king, and were ultimately sold or granted out to laymen, since called impropriators. (Blackstone: Comment., bk. I., ch. 11.)

2. Appropriation of payments: The application by a creditor of money received from a debtor who owes him several accounts to that particular one which he (the creditor) thinks fit to reduce or liquidate.

ap-prô-pri-â-tive, a. [Eng. appropriate; -ive.] Appropriating; involving the appropriation of something. (McCulloch.)

ap-prô-pri-â-tôr, \* ap-prô-pri-ët-ôr-y, s. [Lat. appropriator, appropriator.] I. Of the form APPROPRIATOR only.

Gen.: One who appropriates anything. II. Of either form.

Law: A spiritual corporation which has had annexed to it the tithes of a benefice; or the individual at the head of such a corporation. Also a layman who has such tithes transferred to him; but in this latter case the term commonly used is impropriator, meaning one who, not a sacred personage, impropry holds church funds or lands.

" . . . a vicar has generally an appropriator over him, entitled to the best part of the profits, to whom he is in fact perpetual curate, with a standing salary."—Blackstone: Comment., bk. I., ch. 2.

"Let me say one thing more to the appropriators of benefices."—Spelman.

ap-prô-v-a-ble, a. [Eng. approve; -able.] Able to be approved of, meriting approval.

"The solid reason or confirmed experience of any man is very approvable in what profession soever."—Browne: Vulgar Errors.

ap-prô-v-a-ble-nëss, s. [Eng. approvable; -ness.] The quality of meriting approbation. (Webster.)

ap-prô-v-al, s. [Eng. approve; -al.] Approbation. "Dr. Johnson calls this "a word rarely found," but since his time it has completely revived.

"There is a censor of justice and manners, without whose approval no capital sentences are to be executed."—Temple.

ap-prô-v-ance, s. [Eng. approve; -ance.] Approbation, approval. "As parents to a child complacent deign Approvance, the celestial Brightness and God."—Thomson: Liberty, pt. IV.

ap-prô-ve, \* ap-preûe (Eng.), \* ap-prï-ve (Scotch), v. i. & t. [In Fr. approuver; Prov. aprobar, aproar; Sp. aprobar; Port. approvar; Ital. approbare; Lat. approbo = (1) to approve, (2) to prove; ad = to, and probo = to try, test, . . . to be shown to be good; probus = good.] [APPROBATE, PROVE.]

A. Transitive: I. Ordinary Languages: 1. To be pleased with.

(a) More or less formally to express satisfaction with, or liking for, or complacency with regard to any statement, measure, or person. "His deep design unknown, the hosts approve Atreides' speech."— Pope: Homer's Iliad, bk. II., 173, 174.

(b) To like, to feel satisfied with, to be pleased with, even when there is no outward or formal expression of such inward complacency. "He seemed to seek in every eye If they approved his ministry."— Scott: Lay of the Last Minstrel, I. 31.

2. To prove. "To establish the truth of any proposition by reasoning; to attempt to show that it is worthy to be accepted; hence, to assent to it.

"In religion, What damned error, but some sober brow Will bless it, and approve it with a text!"— Shakespeare: Merch. of Venice, III. 2.

† (b) To prove by actual experience, to test, to try, to show, to exhibit. "In all things ye have approved yourselves to be clear in this matter."—2 Cor. VII. 11. (See also Acts II. 22; 2 Cor. VI. 4.)

"During the last three months of his life he had approved himself a great warrior and politician."—Macaulay: Hist. Eng., ch. XIII.

(c) To commend one's self to another person or Being by worthy deeds. "Study to shew thyself approved unto God, a workman that needeth not to be ashamed."—2 Tim. II. 15.

II. Technically: 1. Ordinary Law:

\* (a) To improve, to increase the financial value of. (Used especially of the bringing commons under cultivation.) [APPROVEMENT.] "This enclosure, when justifiable, is called in law approving, an ancient expression signifying the same as improving."—Blackstone: Comment., bk. II., ch. 3.

(b) To turn king's or queen's evidence. [APPROVER.]

2. Military Law: The confirmation by a superior officer or functionary of the sentence come to by a court-martial. "The colonel or commanding officer approves the sentence of a regimental court-martial . . . The governor or other commanding officer of the garrison approves the sentence [of a garrison court-martial]."—James: Mil. Dict., 4th ed. (1816), p. 141.

3. Old Scottish Parliamentary usage: To affirm by a parliamentary vote any question submitted for decision. "The question was put according to the Scottish form, Approve or not approve the article!"—Macaulay: Hist. Eng., ch. xv.

B. Intransitive: To express or to feel approbation. (Generally followed by of. Milton put an infinitive after it, but this is now obsolete.) "Avant listened, wondered, and approved."—Macaulay: Hist. Eng., ch. XII.

"Why hast thou, Satan, broke the bonds prescribed To thy transgressions? and disturb'd the charge Of others, who approve not to transgress."—Milton: Paradise Lost, bk. IV.

ap-prô-ved, \* ap-prô-v-ÿd, pa. par. & a. A. As past participle: " . . . most approved in counsaying."—Chaucer: Melibeus.

bôul, bôy; pôut, jôwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -ing. -tion, -sion = shün; -çion, -çion = zhün. -tious, -sious, -ceous, -cious = shüs. -ble, &c. = bël. -prô = pÿr. -que = k.

**B. As participial adjective:**

"Our public hives of puerile resort,  
That are of chief and most approved report."  
Cooper: *Tirocinium*.  
"Clad. Not to be married,  
Not to knit my soul to an approved wanton."  
Shaksp.: *Much Ado*, iv. 1.

**ap-prôve-mént, s.** [Eng. approve; -ment.]

**I. Ordinary Language:**

1. The act of approving, approbation, approval; the state of being approved.

"It is certain that at the first you were all of my opinion, and that I did nothing without your approvement."—*Hayward*.

2. Improvement. (II, Law, 1.)

**II. Law:**

1. The improvement of commons by enclosing a portion of them for purposes of husbandry.

"For it is provided by the Statute of Merton, 20 Hen. III. c. 4, that the lord may approve, that is, enclose and convert to the uses of husbandry (which is a melioration or improvement) any waste grounds, woods, or pastures, in which his tenants have common appendant to their estates; provided he leaves sufficient common to his tenants, according to the proportion of their land."—*Blackstone: Comment.*, bk. III., chap. 14.

¶ Population in England being very much denser than when the Statute of Merton was passed, it is no longer taken for granted that the enclosure of a common, and especially of one situated near a large town, is an "approvement" (improvement), and there are now many legal pitfalls for a lord of a manor attempting, even with the sanction of the commons, to enclose waste land.

† 2. The act of turning king's or queen's evidence. [APPROVER.]

**ap-prôv-ër, s.** [Eng. approve; -er. In Ger. *prüfer*; Sp. *aprobador*.]

**A. Ordinary Language:**

1. One who approves of any person or thing.

"He that commends a villain is not an approver only, but a party in his villainy."—*South: Sermons*, vol. 120.

2. One who makes trial.

"Their discipline,  
Now mingled with their course, will make known  
To their approvers they are people, such  
That mend upon the world."  
Shaksp.: *Cymbeline*, II. 4.

**B. Technically:**

**I. Law:** A bailiff or steward of a manor.

¶ **II. Plural. King's approvers:**

1. Those who let the king's demesne in small manors.

2. Sheriffs. (*Stat. 1 Edu. III.*, c. 8.)

III. One who approves or appeals, that is, confesses a felony, at the same time betraying his accomplices, in the hope of obtaining pardon to himself. The reason why he is called approver (in Lat. *probat* = prover) is that he has to prove what he alleges. Any person whom he accuses is called an appellee. It is felony in a jailor to force a man to turn approver. (*Blackstone: Comment.*, bk. iv., chaps. 10 & 25.)

"... his testimony would have far greater weight with a jury than the testimony of a crowd of approvers swearing for their necks."—*Macaulay: Hist. Eng.*, chap. xxi.

¶ An approver in this sense is called, as the case may be, king's or queen's evidence. Such testimony is eminently suspicious, and now-a-days requires to be independently corroborated.

"This gentleman kindly showed me the approvers or king's evidence of his establishment."—*Hooker: Himalayan Journals*, vol. 1, p. 65.

**ap-prôv-îng, pr. par.** [APPROVE.]

"That, pledged on earth and seal'd above,  
Grows in the world's approving eyes,  
In friendship's smile and home's caress."  
Moore: *Lalla Rookh*; *The Fire-Worshippers*.

**ap-prôv-îng-ly, adv.** [Eng. approving; -ly.]  
In a way to convey approval. (*Webster*.)

**ap-prôv-î-mant, a.** [In Ital. *approvante*; from Lat. *approvans*, pr. par. of *approvare*.] [APPROXIMATE, v.] Approaching.

"... whereby our times might be approximant and conformant to the apostolical and pure primitive church."—*Sir E. Dering's Speeches*, p. 74.

**ap-prôx-î-mâ-te, a.** [Lat. *approximatus*, pa. par. of *approximare*.]

**A. Ordinary Language:** Nearest to, next to. "These receive a quick conversion, containing approximate dispositions unto animation."—*Brownie: Vulgar Errors*.

**B. Technically:**

1. *Math., Chem., Music, & Science generally:* Making a near approach to exactness, but not

quite exact. (Used with regard to quantities which cannot be ascertained with absolute accuracy.)

"... the approximate concord of an octave."—*Airy: On Sound* (1868), p. 262.

**2. Zoology:**

(a) In the same sense as No. 1.

"Although hardly one shell, crab or fish, is common to the above-named three approximate faunas of Eastern and Western America, and the eastern Pacific islands."—*Darwin: Origin of Species* (ed. 1859), chap. xi., p. 248.

(b) *Of teeth:* So arranged in the gums as to leave no obvious interstices between them.

**ap-prôx-î-mâ-te, v. t. & i.** [From *approximate*, adj. (q. v.). In Fr. *approximer*; Port. *aproximar*; Ital. *approssimare*; all from Lat. *approximo* (*Terullian*): *ad* = to, and *proximo* = to approach; *proximus* = nearest, the superl. of *prope* = near.]

**A. Trans.:** To cause to draw near, to make to approach.

"The favour of God, embracing all, hath approximated and combined all together: so that now every man is our brother, not only by nature, as derived from the same stock, but by grace, as partakers of the common redemption."—*Barrow: Works*, I. 241.

**B. Intrans.:** To draw near, to approach.

"Among such five men there will be one possessing all the qualifications of a good workman, one bad, and the other three middling, and approximating to the first and the last."—*Burke: Thoughts on Scarcity*.

**ap-prôx-î-mâ-téd, pa. par. & a.** [APPROXIMATE, v.]

**A. As past participle:** Brought near; made to approach.

**B. As adjective (Bot., &c.):** Near together. (*Loudon: Cyc. of Plants, Gloss.*)

**ap-prôx-î-mâ-te-ly, adv.** [Eng. *approximate*; -ly.] So as to draw near or approach, as a calculation which cannot be made with perfect exactness, but to which an approach is practicable.

"... prolonged movements of approximately contemporaneous subsidence."—*Darwin: Voyage round the World*, chap. xvi.

"... marks of approximately the same shape..."  
—*Ibid., Descent of Man* (1871), pt. II., chap. xvi.

"In both cases the pressure may be represented at least approximately by the formula."—*Prof. Airy: On Sound* (1868), pp. 19, 20.

**ap-prôx-î-mâ-tîng, pr. par.** [APPROXIMATE, v.]

**ap-prôx-î-mâ-tion, s.** [In Ger. & Fr. *approximation*; Sp. *aproximacion*; Port. *aproximacao*; Ital. *approssimazione*; from Lat. *approximo*.] [APPROXIMATE, v.]

**A. Ordinary Language:**

1. The act of approaching; approach, drawing near in any way.

"Unto the latitude of Capricorn, or the winter solstice, it had been a spring; for unto that position it had been in a middle point, and that of ascent or approximation."—*Brownie: Vulgar Errors*.

2. The state of being near; nearness, proximity.

"... our access to such temptation, whose very approximation is dangerous."—*Jeremy Taylor: Exposition of the Lord's Prayer*.

"In the principal events there is an approximation to an agreement."—*Lewis: Early Rom. Hist.*, ch. xii., pt. 1, § 14.

**B. Technically:**

**I. Geometry, Algebra, Arithmetic, &c.:**

1. *Implying motion towards:* A continued approaching nearer and nearer to a quantity or magnitude, which cannot be determined with absolute precision.

2. *Implying rest:* A quantity or magnitude presenting as near an approach as is practicable to the unattainable one. (See 1.)

**II. Biol.:** An approach in structure, indicating affinity.

"This approximation, also, is more especially marked in the larger development of the innermost of the five digits of the foot in the chimpanzee."—*Owen: Classif. of the Mammalia*, p. 67.

**III. Med.:** Communication of a disease by contact. *Spec.*, an obsolete method of attempted cure of a disease by transferring it by contact to an animal. (*Parr.*)

**IV. Surgery:** The bringing of a fractured portion of the skull into immediate and dangerous proximity to the dura mater. (*Parr.*)

**ap-prôx-î-mâ-tive, a.** [Eng. *approximate*; -ive. In Ger. *approximativ*; Fr. *approximatif*.] Approaching, containing an approach.

"This statement is, of course, only approximately and subject to modification in detail."—*Times*, March 21, 1874.

**ap-prôx-î-mâ-tive-ly, adv.** [Eng. *approximate*; -ly.] Approximately.

**ap-prôx-î-mâ-tive-nëss, s.** [Eng. *approximative*; -ness.] The quality of being approximate. (*George Eliot*, in *N.E.D.*)

**âp-pui' (pui = pwi), âp-puy' (puy = pwë), s.** [Fr. *appui* = support.]

\* **I. Ord. Lang.:** Support. (*Scotch*.)

"What appuy or of whom shall she have, being forsake of her own and old friends."—*Letters of Leitchton, in Keith's Hist.*, p. 233. (*Jamieson*.)

**II. Technically:**

1. *Mil.:* Any particular given point or body upon which troops are formed, or by which they are marched in line or column. This point is called, after the example of the French, the "point d'appuy." (*James: Military Dict.*)

2. *Horsemanship:* The stay upon the hand of a rider; the horse's sense of the action of the bridle in the horseman's hand.

**âp-pui, v. t.** [Fr.]

**I. Ord. Lang.:** To prop, to stay.

**II. Mil.:** To afford support to; to post (as troops) near some point of support. (*N.E.D.*)

\* **âp-pulle, s.** Old form of APPLE.

\* **âp-pül-môy, \*âp-pül-môçe, \*âp-pÿl-môçe, s.** [O. Fr. *appul* = apple, and A.S. *mos* = food.] A dish in cookery, of which apples appear to have been the principal ingredient. (*Boucher & Prompt. Parr.*)

**âp-pülse, s.** [In Ital. *appulso*; from Lat. *appulus*, a. = a driving to; also a lauding, . . . an arrival; *appulus*, pa. par. of *appello*, *appuli*, *appulum* = to drive to; *ad* = to, and *pello* = to push or strike; to drive.]

\* **I. Ordinary Language:** A striking against. "An hectic fever is the (boats heat kindled into a destructive fire through the appulse of saline steams."—*Harvey*.

2. *Astron.:* The approach of a planet or a fixed star to the meridian, or to conjunction with the sun or the moon.

"All the stars, it is true, occupy the same interval of time between their successive appulses to the meridian or to any vertical circle."—*Berchel: Astron.*, § 143.

\* **ap-pül-sion, s.** [Lat. *appulus*, pa. par. of *appello*.] [APPULSE.] The same as APPULSE (q. v.). (*Webster*.)

\* **ap-pül-sive, a.** [Eng. *appulse*; -ive.] Being struck against, causing bodies to receive an appulse. (*Med. Rep.*) (*Webster*.)

\* **ap-pül-sive-ly, adv.** [Eng. *appulsive*; -ly.] In an appulsive manner, so as to produce an appulse. (*Webster*.)

\* **ap-pünct, \*a-pünct, v. t.** [Low Lat. *appunctare* = to come together; *ad* = to, and *punctum* = a point.] To settle. (*Scotch*.) [APPOINT.]

"It is *apuncti* and accordit betwix William Colville and Robert Charteris."—*Act. Dom. Conc.*, A. 1488.

\* **ap-pünct-tä-a-mënt, s.** [Low Lat. *appunctamentum*.] A convention or agreement with specification of certain terms. (*Scotch*.)

"Ratify and appreis the contract and *appunctament* made betwix . . . on all punctis and articulis."—*Act. Jas. V.* (1560). (*Jamieson*.)

\* **ap-pür-chäse, v. t.** [PURCHASE, v.] To obtain, to procure. (*Scotch*.)

"Which he *appurchased* to him by his moyen."—*R. Lindsay: Chronicles of Scotland* (ed. 1728), p. 63.

**ap-pür-tën-ance, \*ap-për-tën-ance, s.** [O. Fr. *apurtenance*; Fr. *appartenance*; Ital. *appartenenza*. From Lat. *appertinens*, pr. par. of *appertineo* = to belong to; *ad* = to, and *partineo* = to hold through, to pertain to; *per* = through, and *teneo* = to hold.] That which belongs to any person or thing; that which, though perhaps loosely connected with another thing, still pertains to it, or is a part or an appendage of it. (It is followed by *of* or *to*.) [APPERTAIN and PURTENANCE.]

"Can they, which behold the controversy of divinity, condemn our enquiries in the doubtful *appertenance* of arts, and receptacles of philosophy?"—*Brownie: Vulgar Errors*.

"Come then: the *appurtenance* of welcome is fashion and ceremony . . ."—*Shaksp.: Romeo*, II. 2.

fäte, fät, färe, amidst, whät, fäll, father; wë, wët, hère, camel, hër, thère; pün, püt, sire, sir, marine; gö, pöt, or, wöre, wqf, wörk, whö, sön; müte, cüh, cüre, unite, cür, räle, füll; trÿ, Sÿrian. æ, œ = é. ey = ä. qu = kw.

... for we see globes, astrolabes, maps, and the like, have been provided as appurtenances to astronomy and cosmography, as well as books."— Bacon: *Advanc. of Learn.*, bk. II.

**ap-pür-tén-ant**, † **ap-pér-tin-ent**, a. & s. [O. Fr. *apurtentant*; Fr. *appurtenant*; from Lat. *appertinens*, pr. par. of *appertinere* = to belong to.] [APPURTENANCE.]

**A. As adjective:** Pertaining to, belonging to.

**B. As substantive:**

1. **Ordinary Language:** That which belongs to a person or thing; an appurtenance.

"You know how apt our love was to accord, To furnish him with all appurtenments Belonging to his honour."

*Shakesp.: Henry V.*, II. 2.

2. **Law:** Common appurtenant is that right of pasturing commonable and even other beasts on the waste land of a manor, which, not existing in the necessity of things, requires to be proved by immemorial usage. (*Blackstone: Comment.*, bk. II., ch. 3.)

\* **ap-puy** (**puy** as **pwé**), s. [APPUI.] (*Scottch.*)

**a-prá-sí-a**, s. [A word of no etymology; a euphonic word. (*Agassiz.*)]

**Zool.:** A genus of lizards belonging to the family Gymnophthalmidae. The extremities are almost entirely wanting. The *A. pulchella*, the only species, inhabits Australia.

† **ap-ri-cáte**, v. t. [Lat. *apricor* and *aprico*, v. t., from Lat. *apricus*. In Ital. *aprico* = (1) open, uncovered, (2) annny.] To bask in the sun.

"Positively not sunning, but mooning himself—apricating himself in the occasional moonbeams."—*De Quincey: Works* (ed. 1863), vol. III., p. 222.

† **ap-ri-cí-tý**, s. [Lat. *apricitas*.] Sunshine. (*Johnson.*)

**ap-ri-cót**, \* **á-brí-cóck**, \* **á-brí-óct**,

\* **á-p-ri-cóck**, s. [In Ger. *abricose*; Fr. *abricot*; Arm. *brigoseen*; Wel. *bricyllen*; Sp. *albaricoque*; white; Ital. *abricoco*; Lat. *albus* = white, and *coccum* = a berry; Gr. *kókkos* (*kókkos*) = a kernel. In Dioscorides *πραϊκόκος* (*práikokion*). From Lat. *præcoctus*, *præcoctus*, or *præcox* = early ripe. A fruit—that of the *Prunus armeniaca*; also the tree on which it grows. It was first settled that it came, as the Latia specific name would imply, from Armenia. It is wild in Africa and in the Caucasus, where the mountains in many places are covered with it; it is found also in China and some other countries. It was cultivated in England at least as early as 1562, and in Italy was known to Dioscorides early in the Christian era as the *Præcoccus*. It is esteemed only second to the peach.

"Gard. Go, bind thou up yon dangling *abricocks*."

*Shakesp.: A Mid. Night's Dream*, II., III. 4.

"And Bazar dates, and apricots: Seed of the sun, from Iran's land."

*Moore: L. R.: The Light of the Haram.*

**apricot-colour**, a. [In Lat. *armeniacus*.] Yellow, with a perceptible mixture of red. (*Lindley: Introd. to Bot.*)

**apricot-tree**, s. [Eng. *apricot*; trees. In Ger. *abricosenbaum*; Fr. *abricotier*; Ital. *albicocco*.] [APRICOT.] The tree on which the apricot grows.

**Á-pril**, s. & a. [In Sw., Dan., Dut., & Ger. *April*; Fr. *Avril*; Irish *Abrail*; Gael. *Giblean*; Corn. *Ebril*; Wel. *Ebrill*; Sp. & Port. *Abril*; Ital. *Aprile*; Lat. *Aprilis*. Generally regarded as a contraction of *aperilis*; from *aperio* = to open. Opening month; the month in which plants open. But Sir Cornwall Lewis says: "The derivation of *Aprilis* from *aperire* overlooks the fact that with a year of 304 days, April would not always have been a spring month." Another etymology connects it with *ἀπρός* (*aphros*) = foam, from which *Venus*, to whom the month was sacred, was said to have sprung.] [APHRODITE.]

**A. As substantive:**

1. **Lit.:** In recent times the fourth month of the year, though when Aprilia was first introduced into Rome by the mythic Romulus it was the second. The Anglo-Saxons called it Easter-month = Easter month. During April the sun is technically said to pass through Aries and Taurus, but the precession of the equinoxes makes him really traverse portions of Pisces and Aries.

"Was April, as the bumpkins say, The legislature called it May."

*Cowper: A Fable.*

2. **Fig.:** The commencement of love; the springtime of affection.

"And the April's in her eyes: it is love's spring, And these the showers to bring it on."

*Shakesp.: Ant. and Cleop.*, III. 2.

**B. As adjective:**

1. **Lit.:** Belonging to the fourth month of the year.

"Oh, how this spring of love resembleth The uncertain glory of an April day; Which now shows all the beauty of the sun, And by and by a cloud takes all away!"

*Shaksp.: Two Gentlemen of Verona*, I. 5.

2. **Fig.:** Promising warmth.

"... men are April when they woo, December when they wed."—*Shaksp.: As You Like It*, IV. 1.

**April-fool**, s. One sent upon a bootless errand, or otherwise made a fool on the 1st of April.

**April-fool-day**, s. The first day of April. [ALL-FOOLS-DAY.]

"I do not doubt but it will be found that the balance of folly lies greatly on the side of the old first of April; nay, I much question whether infatuation will have any force on what I call the false April-fool-day."—*The World*, No. 10.

**á pri-ór-i**, used as adj. or adv. [Latin, literally = from that which is before. The a, though really Latin, is generally marked á, as if it were French.]

† 1. **Logic:** Noting a method of reasoning from an hypothesis to its legitimate consequence, or from a known or imagined cause to an effect. It is essentially the same as deduction, whilst the *á posteriori* method is the equivalent of induction. *Á priori* reasoning is quite trustworthy in mathematics; for the data being hypothetical, error cannot arise if the ratiocination be properly conducted. In metaphysics, latitudinal assumed as the starting-point for reasoning rest on an *á priori* foundation. In natural theology we reason *á priori* when we infer the divine origin of the universe from the theory of an intelligent Creator; we reason *á posteriori* when we infer the existence of an intelligent Creator from the works of creation. [Á POSTERIORI, DEDUCTION, INDUCTION.]

"Thus the conception of the decomposition of compound molecules by the waves of ether comes to us recommended by *á priori* probability."—*Tyndall: Frag. of Science*, 2nd ed., x.

2. **Ord. Lang.:** Prior to investigation; before thinking seriously of a question.

¶ The term is used by the followers of Kant to denote cognitions having their origin in the nature of the mind, and independent of experience.

**á-pri-ór-íst**, s. [Lat. *a priori* (q.v.); -íst.] One who accepts Kant's teaching as to *a priori* cognitions.

\* **a-pri-ze**, v. t. [Fr. *pris*, pr. par. of *prendre* = to take, to seize.] To take.

"The rich prince was there *aprised*, He suffered to be circumsised."

*Festivals of the Church* (ed. Morris), 230-1.

\* **a-pri-ze**, \* **á-prý-ze**, s. [O. Fr. *emprise* = an enterprise.] An enterprise.

"For Allsander's gret *aprise*!"

*Allsander*, 355.

**á-prón**, \* **á-pérn**, \* **ná-prún** (*Eng.*), **ná-p-pérn** (*N. of Eng.*), s. [In Gael. *aparran*, *aparran*; Ir. *aprun* (these three are from the English); Fr. *napperon* = a small table-cloth, put over the great one to protect the latter from stains (*Littre*); *nappe* = a table-cloth; Old Fr. *naperon*; Low Lat. *nappa*, *nappa* = napkin. Thus, *n* is now missing from the word *apron*, arising from the false division of the article and the noun; thus, a *napperon* was incorrectly written an *apron*. Cf. *adder*.] [NAPERY.]

**A. Ordinary Language:**

1. A cloth, a piece of leather, or anything similar, tied round the waist, and hanging down before to protect the clothes, or as a covering.

"Put on two leather jerkins and aprons, and wait upon him at his table as drawers."—*Shaksp.: 2 Hen. IV.*, II. 2.

2. Anything resembling an apron worn as part of official dress by bishops and deans, Freemasons, Oddfellows, &c.

3. The leather covering for the legs in an open carriage.

4. The apron of a goose: The fat skin covering the belly of a goose. (*Johnson.*)

**B. Technically:**

1. **Gunnery:** A square plate of lead, placed over the touchhole of a cannon to preserve it clean and open, and keep the powder inside dry. (*Dyche, James, &c.*)

2. **Naval Architecture:**

(a) A piece of curved timber fixed behind the lower part of the stem of a ship immediately above the foremost end of the keel. (*Webster.*)

(b) A platform or flooring of plank raised at the entrance of a dock, against which the dock-gates are shut. (*Webster.*)

3. **Mech.:** The piece that holds the cutting tool in a planing machine. (*Goodrich & Porter.*)

4. **Plumbing:** A strip of lead which leads the drip of a wall into a gutter; a *flashing*.

**apron-lining**, s.

**House Carpentry:** The cover of the apron-piece (q.v.).

**apron-man**, s. A man wearing an apron; a term, designed to be somewhat contemptuous, for an artisan.

"You have made good work."

*Shaksp.: Coriol.*, IV. 6.

**apron-piece**, s.

1. **House Carpentry:** A small piece of timber projecting from a wall to support the ends of

APRON-PIECE.

the joists underlying the landing-place in a staircase.

2. **Mech.:** [See APRON, B., 3.]

**apron-string**, s. The string of an apron.

"To be tied to the apron-strings of a wife, sister," &c., means = to be unduly controlled by her. (*Maxwell: Hist. Eng.*, chap. x.)

**apron-string tenure**, s. Tenure in virtue of one's wife, or for her lifetime only.

á-próned, a. [Eng. *apron*; -ed.] Wearing an apron. (*Pope: Essay on Man*, IV. 197.)

\* **á-prón-eér**, s. [Eng. *apron*; -eer.] A tradesman. Contemptuously applied by the Cavaliers to the Parliamentarians. (*D'Urfey: Collin's Walk*, III.)

**ápropos** (**á-p-ró-pó**), *adv. & adj.* [Fr. *á*, and *propos* = (1) a thing said in conversation, (2) speech, (3) purpose, design, (4) *pl.*, idle talk.]

**A. As adverb:**

1. Opportunely, seasonably, by the way.

2. As bearing upon the subject, as suggested by; by the way. (See ex. under B. 2.)

¶ Frequently followed by *of*; as, *ápropos* of this, &c.

**B. As adjective:**

1. Opportune, seasonable.

2. Appropriate, bearing on the matter in hand; to the point.

"Our Friend Dan Prior told (you know) A tale extremely *ápropos*."

*Pope: Imitations of Horace*; Sat. VI. 153-4.

**ápsé**, **áp-sís** (*pl. áp-sí-dés* or *áp-sé-sé*), s. [Lat. *apsis*, genit. *apsidis*; or *apsis*, genit. *apsidis*; Gr. *ἄψις* (*apsis*) = Ionic *ἀψίς* (*apsís*) = (1) a joining, a fastening, (2) the felloe of a wheel or the wheel itself; hence, also, a bow, an arch, *s* vault; *ἀπρω* (*apró*) = to fasten or bind to.]

† 1. **Carriage Building:** The felloe or exterior rim or circumference of a wheel.

II. **Architecture:**

1. **Gen.:** The arched roof of a house, an oven, &c.

2. **Specially:**

(a) A semi-circular or polygonal and generally dome-roofed recess in a building. Several apses exist in some mediæval churches, the episcopal throne being against the centre of the wall of one, the principal altar in front of a second, and smaller altars in others. They

**bell**, **boy**; **póut**, **jówl**; **cat**, **cell**, **chorus**, **chin**, **bench**; **go**, **gem**, **thin**, **this**; **sin**, **as**; **expect**, **Xenophon**, **exist**. **ph = f**. **-cian**, **-tian** = **shan**. **-tion**, **-sion** = **shün**; **-tion**, **-sion** = **zhün**. **-tious**, **-sious**, **-cious** = **shüs**. **-ble**, **-dle**, &c. = **bel**, **dél**.

exist also in the temples of antiquity. (Gloss. of *Architectura*.)

APSE.

(b) The bishop's seat or throne, called also *Exedra* and *Tribuna*.

III. *Art*. : A reliquary or case in which the reputed relics of saints were placed.

IV. *Astron.* [See *APSIDES*.]

**ap-si-dal**, a. [Lat. *apsidis*, genit. of *apsis*; and Eng. suffix *-al* = pertaining to.] [APSE.]

APSIDAL CHAPPEL.  
Church of St. Julien, Brionne, Anvergne.

1. Pertaining or relating to an architectural apse or apsis.

"Gloicester Cathedral crypt, with aisle and three radiating apsidal chapels. —Gloss. of *Arch.* (1850), p. 29.

2. Relating to the apses of the moon or of the primary planets.

**ap-si-dēs**, s. pl. [APSE.] The plural of the form *APSES* (q. v.).

I. *Generally*.

II. *Technically (Astron.)*: The two points in the elliptic orbit of a planet where it is at the greatest and at the least distance respectively from the body around which it revolves. The moon moving in an elliptic orbit around the earth, which is situated in one of the foci, is at what was anciently called its higher apse when it is in apogee, and at its lower one when it is in perigee. Similarly, the primary planets, including the earth and comets, moving in elliptic orbits around the sun, which is situated in one of the foci, pass through their higher apse when they are in aphelion, and their lower one when in perihelion. It is the same with the satellites of Jupiter when they are in apoJove and perijove.

*Line of the apses*: The line connecting the two apses of a primary or secondary planet.

Were it not for a motion of the apses, it would exactly coincide with the major or longer axis of the ellipse. Let *A B C* be the orbit of the moon, of which the eccentricity has been purposely exaggerated, and let *c* be the earth; then *A* and *B* are the two lunar apses.

*Progression of the moon's apses*: A slow movement in the position of the apses of the

moon, produced by the perturbing attraction of other heavenly bodies. It is about 3° of angular motion in one revolution of the moon, and in the same direction as her progression in her orbit. The apses of the primary planets are also to a certain extent perturbed.

*Revolution of the moon's apses*: The movement of the apses around the entire circumference of the ellipse, which takes place in 3232-5753 mean solar days, or about nine years.

*Libration in planetary apses*: A movement sometimes forward and sometimes backward in the apses of Venus and Mercury, from perturbations caused by other heavenly bodies.

**ap-sis**, s. [APSE.]

**apt**, \* **apte**, a. [In Fr. *apte*; Sp. & Port. *apto*; Ital. *atto*. From Lat. *aptus* = (1) fitted or attached to; (2) bound or tied together, connected; (3) suitable; *apto* = to fit; Gr. *ἄρτω* (*haplō*) = to fasten or bind to; Sansc. *ap* = to go to, to obtain.]

¶ Not used in the first or second senses of the Lat. *aptus*, but only in the third or figurative one.

I. Fit, suitable, proper.

"Long frize mantles, resembling those which Alexander had, a century before, described as great beds for rebels and apt cloaks for thieves. . . . —Macaulay; *Hist. Eng.*, ch. xii.

II. Having a tendency to.

1. *Of things*: Liable to.

"Things natural, as long as they keep those forms which give them their being, cannot possibly be apt or inclinable to do otherwise than they do. —Hooker.

2. *Of persons*: Having a disposition to, prone to, inclined to. (Used of persons.)

III. Quick, ready.

"I have a heart as little apt as yours." *Shakesp.*; *Cortol.*, iii. 2.

IV. Qualified for; with a natural genius, or acquired skill and knowledge for, or both.

"Apt to teach." —1 Tim. iii. 2; 2 Tim. ii. 24.

\* **apt-tind**, a. [Eng. *apt*; A.S. *tendan*, *tindan* = to tind, to set on fire.] Having a tendency to ignite.

"Incessantly th' apt-tinding fume is tost Till it inflame." *Sylvester's Du Barlais*. (*Wright*; *Dict. Obs. & Prov. Eng.*)

\* **apt**, v.t. [From the adjective. In Port. *aptar*; Lat. *apto*.]

I. *Lit.*: To place in close proximity to, as if fitted or adjusted to.

"They sit so apted to her." —*Beaumont & Fletcher* (1647).

II. *Figuratively*:

1. To suit, to adapt, to fit.

"We need a man that knows the several graces Of history, and how to apt their places." *Ben Jonson*.

2. To dispose, to prepare.

"The king is melancholy, Apted for any ill impressions." *Denham*; *Sophy*.

\* **apt-a-ble**, a. [Eng. *apt*; *-able*.] That may be adapted. (*Sherwood*.)

\* **ap-tāte**, v.t. [Lat. *aptatus*, pa. par. of *apto* = to be made fit.]

*Astrol.*: To render apt, fit, or suitable.

"To aptate a planet is to strengthen the planet in position of house and dignities to the greatest advantage, in order to bring about the desired end." —*Bailey*.

\* **ap-tēd**, pa. par. [APT, v.]

**ap-tēn-ō-dy-tēs**, s. [(1) Gr. *ἀπτην* (*aphtēn*) = (1) unfledged, (2) unable to fly; *ἀ*, priv., and *πτηνός* (*ptēnos*) = feathered, winged; *πτηναι* (*ptēnai*), aor. inf. of *πτερομαι* (*ptetomai*) = to fly; (2) *δυτης* (*dytēs*) = a diver; *δύω* (*dyō*) = to enter, to plunge into.]

*Ornith.*: A genus of swimming birds, classed by some under the family *Alcidae*, and by others under that of *Spheniscidae*. It contains the penguins of the Southern hemisphere. Their wings are rudimentary, with only vestiges of feathers, and their feet so far behind that when on shore they have to sit or stand bolt upright. When pursued, however, they can manage to make way quickly by using their wings as an anterior pair of legs. The water is their natural element, in which they live, and they move in it with much agility. Example, *A. Patagonica*, a species as large as a goose, seen standing in large flocks on barren shores near the Straits of Magellan, and here and there as far as New Guinea.

**ap-tēr-a**, s. pl. [Nent. plur. of Gr. *ἄπτερος* (*apteros*) = wingless; *ἀ*, priv., and *πτερόν* (*pteron*) = a wing; *πτερομαι* (*ptetomai*) = to fly.]

*Zool.*: Linnæus's name for his seventh and last order of Insecta. This order contained a heterogeneous assemblage of six-footed insects proper—spiders, crabs, and centipedes. Any entomologists who now retain it limit it to the wingless orders of insects proper—the Anoplura, the Mallophaga, the Thysanura, and the Aphaniptera, which, however, are now not placed in a single category, owing to the fact that the Aphaniptera differ from the rest in undergoing metamorphosis.

**ap-tēr-al**, a. [APTERA.]

1. *Zool.*: Destitute of wings.

2. *Arch.*: Not having columns on the sides. (Used of temples or similar buildings.)

**ap-tēr-ān**, s. [APTERA.] Any individual of the *APTERA* (q. v.).

**ap-tēr-ī-al**, a. [APTERIUM.] Pertaining to a featherless tract on the skin of a bird.

**ap-tēr-i-ūm**, s. [APTEROUS.]

*Med.*: A featherless tract on the skin of a bird. (*Nitsch*; *Pterylography*.)

**ap-tēr-ō-nō-tūs**, s. [Gr. *ἄπτερος* (*apteros*) = finless, and *νότος* (*notos*) = the back.]

*Zool.*: A genus of American fishes of the Eel family. They have on their back not a fin, but a soft fleshy filament couched in a furrow. They have an affinity to Gymnotus.

**ap-tēr-ōūs**, a. [Gr. *ἄπτερος* (*apteros*) = wingless. In Fr. *aptere*; Port. *aptero*.] [APTERA.]

1. *Zool.*: Wingless.

"Cuvier and Latreille divide the *Apterous* Insecta into three tribes; the Suctorii (Flukes), the Parasita (Lice), . . . and the Thysanoura. —*Owen*; *Invertebrata*, Lect. xvi.

2. *Bot.*: Without membranous wing-like expansions. (*Loudon*; *Cycl. of Plants*; *Gloss*.)

**ap-tēr-yg-i-dæ**, s. pl. [APTERYX.]

*Zool.*: A family of Cursorial Birds with some affinities to the Struthionide, or Ostriches, but differing in their lengthened bill, their short legs, their possession of a short hind toe, with a strong claw, and finally, by their wings being quite rudimentary.

**ap-tēr-yx**, s. [Gr. *ἀ*, priv., and *πτερυξ* (*pteryx*), genit. *πτερυγος* (*pterygos*) = a wing.]

*Zool.*: A genus of birds, the typical one of the family *Apterygidae*. Two species are known—the *A. australis* and *A. Mantelli*, both from New Zealand. The natives call the former, and probably also the latter, *Kiwi-kiwi*, which is an imitation of their peculiar

APTERYX.

cry. The *A. australis* is somewhat less in size than an ordinary goose. It runs when pursued, shelters itself in holes, and defends itself with its long bill; but unable as it is to fly, its fate, it is to be feared, will soon be that of the dodo—it will become extinct.

**ap-ti-tūde**, s. [In Fr. *aptitude*; Sp. *aptitud*; Port. *aptidão*; Ital. *attitudine*; Lat. *apto* = to fit; *aptus* = fit.]

1. Fitness, suitability, adaptation. *Used—*

(n) *Of things*:

"The mutual aptitude of seed and soil." *Wordsworth*; *Excursion*, bk. v.

(b) *Of persons*: Competence for, natural genius or acquired skill for learning or for doing any particular thing.

fāte, fāt, fare, amidst, whāt, fāll, father; wē, wēt, here, camel, hēr, there; pine, pīt, sīre, sīr; marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unte, cūr, rāle, fūll; trȳ, Sȳrian. æ, œ = ē. ey = ā. qu = kw.

... he seems to have had a peculiar aptitude for the management of irregular troops."—Macaulay: *Eng. Eng.*, ch. xii.

2. Tendency towards, proneness to. (Used of man and other animated beings, as well as of things inanimate.)

"The aptitude of the Chreptores, Insectivora, and certain Rodentia to fall like Reptiles into a state of true torpidity . . ."—Owen: *Classif. of the Mammalia*, p. 24.

\* **āp-ti-tū-dīn-ā-l**, a. [From Eng. *aptitude*.] Possessed of aptitude for. (*Webster*.)

\* **āp-ti-tū-dīn-ā-l-ly**, adv. [Eog. *aptitudinal*; -ly.] In a manner to advance aptitude. (*Webster*.)

**āpt-ly**, adv. [Eng. *apt*; -ly.]

1. Fittingly, suitably; with proper adaptation, correspondence, or connexion.

"In his wild notes seem aptly met  
A strain of pleasure and regret."  
*Scott: Robbery*, ll. 20.

2. Pertinently, justly.

"Irenaeus very aptly remarks, that those nations who were not possessors of the gospel, had the same accounts of our saviour which are in the Evangelists."—*Addison*.

3. Quickly, readily. (*Johnson*.)

**āpt-ness**, s. [Eng. *apt*; -ness.]

1. Fitness, suitability.

"The nature of every law must be judged of by the aptness of things therein prescribed, unto the same end."—*Hooker*.

2. Tendency. Used—

(a) *Of things inanimate*:  
"Some seeds of goodness give him a relish of such reflections as have an aptness to improve the mind."—*Addison*.

(b) *Of animated beings*: Propensity, proneness.

"... their aptness to superstition."—*Jeremy Taylor: Of the Decalogus. Works* (ed. 1839), vol. iii., p. 14.

3. Quickness, readiness.

"What should be the aptness of birds in comparison of beasts to imitate speech? may be enquired."—*Bacon*.

\* **āp-tōte**, s. [Lat. *aptota*, neut. plur.; Gr. ἀπτότα (*aplotā*), neut. pl. of ἀπτός (*aplotos*), adj. = without cases: ā, priv., and πτός (*ptos*) = (1) a falling, (2) a case; πτόσις (*ptosīs*), 2 perf. of πείρω (*peirō*) = to fall.]

*Grammar*: A noun "without cases," that is, an indeclinable noun. (*Glossog. Nova*.)

\* **āp-ty-chūs**, s. [Gr. ā, priv., and πτυχός (*ptuchos*), genit. of πτύξ (*ptux*) = a fold, leaf, layer, or plate.]

*Paleont.*: A fossil body now regarded as the operculum of Ammonites (q.v.). Before their nature was understood they were called Trigonallites, Lepadites, and various other names.

**ā-pūs**, s. [Gr. ἄπους (*apous*) = footless, without feet: ā, priv., and πούς (*pus*) = a foot.]

1. *Zool.*: A genus of Entomostraca, the typical one of the family Apodida. They have the carapace of one piece, and completely enveloping the anterior part of the animal. Though the name implies that they are footless, yet they have about sixty pairs of feet. The *A. cancriformis*, or Crab-shelled Shrimp, from 2 to 3 in. long, is found in England; it preys on the smaller Entomostraca. The males have been only recently discovered.

2. *Astron.*: One of Lacaille's twenty-seven Southern constellations. Its English name is "the Bird of Paradise," that animal being once erroneously supposed to be destitute of feet. [PARAL. 33E.]

\* **āp-ŷ-rēt-īc**, a. [In Fr. *apyretique*; Gr. ā, priv., and πυρετικός (*pyretikos*) = feverish; πυρετός (*pyretos*) = burning heat, . . . fever; πυρεσσω (*pyressō*) = to be feverish, to be in a fever; πυρ (*pur*) = fire . . .] Free from fever.

\* **āp-ŷ-rēx-y**, **āp-ŷ-rēx-ī-a**, s. [In Fr. *apyretic*; Port. & Mod. Lat. *apyretia*; Gr. ἀπυρεξία (*apurexia*); ā, priv., and πυρεσσω (*pyressō*).] [APYRETIC.] The intermission or the abatement of a fever. (*Glossog. Nova*.)

\* **āp-ŷ-rite**, s. [In Ger. *apyrit*; Gr. ἀπυρος (*apuros*) = without fire: ā, priv., and πυρ (*pur*) = fire; Eng. enfl. -ite, denoting quality.]

*Mtn.*: An unimportant variety of Tourmaline not now retained.

\* **āp-ŷ-roūs**, a. [In Fr. *apyre*; Lat. *apuros*; Gr. ἀπυρος (*apuros*) = without fire: ā, priv., and πυρ (*pur*) = fire.] Incumbustible; not

able to be altered by the greatest amount of heat to which, in the present state of scientific knowledge, it can be subjected.

† An *apurous* body is not the same as a *refractory* one. In the former the heat produces no perceptible change; whilst the latter may be in various ways altered, though not fused.

**aq.** A contraction for AQUA, used in physicians' prescriptions.

**aq. bull.**, contracted from *aqua bulliens* = boiling water.

**aq. fer.**, contracted from *aqua ferrens* = boiling water.

**aq. dest.**, contracted from *aqua destillata* = distilled water.

**aq. font.**, contracted from *aqua fontana* = spring water.

**ā-quā**, s. [Lat. = water. In Ital. *acqua*; Port. *agua*, *agua*; Sp. *agua*; O. Fr. *atgu*, *jauve*, contracted in Mod. Fr. into *eau*; A.S. *ed* = running water, a stream, water; O. H. Ger. *aha* = a river; Goth. *ahva*; Wél. *gwj*, *sw*; Irish *aig*, *oiche*; Gael. *uisge*; Arm. *eagui* = to water; Pers. *āb* = water, as Punjab or Panjāb = the five waters or rivers; Sansc. *ap* = water, *ap* = to go.]

1. (*Standing alone*):  
*Pharm.*, &c.: Ordinary water.

2. (*Having in apposition with it an adjective or substantive which limits its signification*):

*Pharm.*, *Chem.*, &c.: A liquid, of which water constitutes the chief part, the adjective or substantive indicating which. In the *Materia Medica*, *aqua*, followed by the genitive of some plant, means water holding in solution a small quantity of oil or other volatile matter derived from that plant; as *Aqua camphoræ* = water of camphor; *Aqua cinnamomi* = water of cinnamon; *Aqua rosæ* = rose-water.

**aqua alcalina oxymuriatica**. Glyceri-muriatic alkaline water, used as a bleaching liquid.

**aqua aluminis composita**. Compound alum water.

**aqua aluminis Bateana**. Bate's alum water.

**aqua ammoniæ**. Water of ammonia; called also *Liquor ammoniac*. It is a solution of ammoniacal gas in water.

**aqua ammoniæ acetatis**. Water of acetate of ammonia.

**aqua ammoniæ causticæ**. Caustic water of ammonia.

**aqua ammoniæ aetitis**. Water of acetate of ammonia.

**aqua ammoniæ puræ**. Pure water of ammonia.

**aqua anethi**. In modern pharmacy = dill water.

**aqua calcis**. Lime water.

**aqua calcis composita**. Compound lime water.

**aqua camphoræ**. In modern pharmacy = camphor water.

**aqua carbonatis ammoniæ**. Water of carbonate of ammonia.

**aqua carui**. In modern pharmacy = caraway water.

**aqua carui spirituosa**. Spirituous caraway water.

**aqua cerasorum nigrorum**. Black cherry water.

**aqua cinnamomi**. In modern pharmacy = cinnamon water.

**aqua cinnamomi fortius**. Strong cinnamon water.

**aqua cinnamomi spirituosa**. Spirituous cinnamon water.

**aqua citri aurantii**. Orange-peel water.

**aqua citri medicæ**. Lemon-peel water.

**aqua cupri ammoniati**. Water of ammoniated copper.

**aqua cupri vitriolata**. Water of sulphate of copper.

**aqua destillata**. Distilled water. [AQUE, A.]

**aqua floris aurantii**. Orange-flower water.

**aqua fœniculi**. In modern pharmacy = common or sweet-fennel water.

**aqua fontana**. Water from a fountain; spring water.

\* **aqua fortis**. [Strong water. In Sp. *agua fuerte*.] In Chemistry, Modern Pharmacy, &c., an old name for nitric acid.

"It dissolves in *aqua fortis*, with great ebullition and heat, into a red liquor so red as blood."—*Bacon: Physiol. Rem.*

**aqua græca**. A weak solution of nitrate of silver, sometimes sold to dye hair of a black colour. It is unwise to use such dyes.

**aqua kali**. Water of kali, or the liquor of the sub-carbonate of potassa.

**aqua kali caustici**. Water of caustic kali.

**aqua kali preparati vel puri**. Water of prepared or pure kali.

**aqua juniperi composita**. Compound juniper water.

**aqua labyrinthi**. In anatomy, a fluid contained within the labyrinth of the ear.

**aqua lauri cassiæ**. Cassia or Bastard cinnamon water.

**aqua lauri cinnamomi**. Cinnamon water.

**aqua laurocerasi**. In modern pharmacy = laurel water.

**aqua lithargyri acetati**. Water of acetated litharge.

**aqua lithargyri acetati composita**. Compound water of acetate of litharge.

**aqua lithargyrites**. Water of litharge.

**aqua menthæ piperitæ**. In modern pharmacy = peppermint water.

**aqua menthæ piperitæ spirituosa**. Spirituous peppermint water.

**aqua menthæ pulegii**. Pennyroyal water.

**aqua menthæ sativæ**. Spearmint water.

**aqua menthæ sativæ spirituosa**. Spirituous spearmint water.

**aqua menthæ viridis**. In modern pharmacy = spearmint water.

**aqua menthæ vulgaris**. Common mint water.

**aqua menthæ vulgaris spirituosa**. Spirituous mint water.

\* **aqua mirabilis**. [*Lit.* = the wonderful water.] A liquor prepared of cloves, galangals, cubeba, mace, cardamoms, nutmegs, ginger, and spirit of wine, digested twenty-four hours, and then distilled. (*Johnson*.)

**aqua morgagni**. A watery humour found after death between the capsule and the body of the lens in the human eye, having probably been absorbed from the aqueous humour. (*Todd and Bowman: Physiol. Anat.*, vol. ii., p. 34.)

**aqua muriatis calois**. Water of muriate of lime.

**aqua myrti pimentæ**. Allspice water.

**aqua nucis moschatæ**. Nutmeg water.

**aqua oxymuriatica**. Oxymuriatic water.

**aqua oxymuriatis potassæ**. Water of oxymuriate of potash.

**aqua piolis liquida**. Tar water.

**ābūl**, **boŷ**; **pōūt**, **jōwl**; **cat**, **cell**, **chorus**, **ghin**, **bench**; **gō**, **gem**; **thin**, **thīs**; **sin**, **aq**; **expect**, **Xenophon**, **exist**. -**īng**. -**cian**, -**tian** = **shan**. -**tien**, -**ston** = **shūn**; -**tion**, -**gion** = **zhūn**. -**tious**, -**sious**, -**cious** = **shūs**. -**ble**, -**dle**, &c. = **bel**, **dēl**.

**aqua pimentæ.** In modern pharmacy = pimento or allspice water.

**aqua pimentæ spirituosæ.** Spirituous pimento water.

**aqua piperis jamaicensis.** Jamaica pepper water.

**aqua potassæ.** Water of potash. A solution of potassa in water.

**aqua pulegii.** Pennyroyal water.

**aqua pulegii spirituosæ.** Spirituous pennyroyal water.

**aqua raphani composita.** Compound water of horse-radish.

**aqua regia.** [In Sp. *agua regia*.] A liquor consisting of nitric and hydrochloric acids in certain proportions. It has the property of dissolving gold, whence its name, regia or royal. Properly speaking, it is only the chlorine which attacks the gold.

"Gold is dissolved with *aqua regia* into a yellow liquor, with little heat or ebullition."—*Bacon's Physiol. Rem.*, p. 418.

**aqua rosæ.** Rose water.

**aqua sambuci.** Elder-flower water.

**aqua saturnina.** Water of lead.

**aqua secunda.** Nitric acid liberally diluted with pure water. Its use in art is to clear the surface of metals and of certain stones.

**aqua seminum anisi composita.** Compound aniseed water.

**aqua seminum carui.** Caraway-seed water.

**aqua seminum carui composita.** Compound caraway water.

**aqua styptica.** Styptic water.

**aqua subcarbonatis kall.** Water of subcarbonate of kali.

**aqua sulphureti ammoniæ.** Water of sulphuret of ammonia.

**aqua sulphureti kall.** Water of sulphuret of kali. Hydrosulphuret of potassa.

**aqua supercarbonatis potassæ.** Water of supercarbonate of potash.

**aqua supercarbonatis sodæ.** Water of supercarbonate of soda.

**aqua tofana.** [From an infamous Italian woman called Tofana, who lived about the middle of the seventeenth century, and is said to have poisoned more than 600 people by means of a deadly preparation she had discovered.] A preparation in which the main ingredient is crystallised arsenic in solution. Modern chemistry very easily detects the presence of arsenic in the stomach and intestines of one poisoned by it, and renders the rise of a second Tofana all but impossible.

**aqua vegeto-mineralis.** Vegeto-mineral water.

**aqua vitæ.** [Lit. = water of life.] An old name for alcohol. Some extend the term *aqua vitæ* to spirits of wine and brandy, whilst others apply it to spirituous liquor distilled from malt, as contradistinguished from brandy, which they limit to liquor procured from wine or the grape.

"Alas! alas!—Help! help! my lady's dead!—O, wail-a-day, that ever I was born! Some *aqua-vitæ*, ho! My lord! my lady!"  
*Shaksp.: Romeo and Juliet*, iv. 3.

**aqua vitæ man.** A seller of drams.  
"Sell the dole here to *aqua vitæ* men."  
*Ben Jonson: Alchemist*, i. 1.

**â-quæ-mâ-nâ-lê** (pl. **â-quæ-mâ-nâ-lê-lê**), s. [Low Lat., from Lat. *aqua* = water, and *manale* = an ewer.]

- 1. A pitcher used by the ancient Romans for pouring water over the hands into a basin during and after meals.
- 2. The basin in which the priest washes his hands before saying mass.
- 3. A basin or ewer of grotesque form.

**â-quæ-for-tist**, s. [Lat. *aqua fortis* = strong water, an old name for nitric acid.] One who etches with aquafortis.

\* **â-quæ-ke**, pret. **â-quæ-ightte** (gh silent), e. i. [A.S. *acwacan* = to be moving or trembling.] To tremble.

"The geymen used her tongue,  
The wode *aquightte* so hy smuge."  
*Alisunder*, l. 257.

**â-quæ-ma-rine**, \* **â-quæ-ma-rî-na**, s. [Lat. = marine water, a term borrowed from the Italian lapidaries, to whom it was suggested by a remark of Pliny's, that the mineral thus named resembled the green colour of the sea.]

*Min.*: A bluish-green variety of the Beryl (q.v.). It is regarded as a gem. The finest specimens known come from Brazil.

"Kinehojunga bore nearly due north, a dazzling mass of snowy peaks, intersected by blue glaciers, which gleamed in the slanting rays of the rising sun, like *aquamarines* set in frosted silver."—*Hooker: Himalayan Journals*, chap. viii., vol. I, p. 184.

**â-quæ-pûlt**, s. [Formed on analogy with *calapult* (q.v.). The first element is Lat. *aqua* = water.] A small force-pump, differing from the ordinary form in being portable.

**aquarelle** (as **âk-wa-rêl**), s. [Fr., from Ital. *aquarella* = water-colour.]

- 1. Water-colour painting.
- 2. A painting in water-colours.

**aquarellist** (as **âk-wa-rêl-ist**), s. [AQUARELLE.] One who paints in aquarelle; a water-colour painter.

**â-quâr-y-an**, a. & s. [Lat. *aquarius* = of or relating to water.]

- A.** *As adjective*:  
1. Pertaining to an aquarium.
- B.** *As substantive*:

*Church Hist.*: One of a sect in the primitive Church who used water instead of wine in the Lord's Supper. Some of them did so from holding sentiments like those now entertained by total abstinents; whilst others, employing wine in the evening communion, used water in the morning one, lest the smell of wine might betray their assemblies to persecuting foes.

**â-quâr-y-ûm** (pl. **â-quâr-y-ûms**, **â-quâr-y-â**), s. [Lat. = a watering-place for cattle; *aqua* = water.] An artificial tank, pond, or vessel, filled with salt or fresh water, and used for the purpose of keeping alive marine or fresh water animals, to study their habits or for exhibition. Fresh water aquaria are also used for cultivating aquatic plants. The largest and finest examples ever seen in this country were the aquaria of the Fisheries Exhibit at the Columbian World's Fair.

**â-quâr-y-ûs**, s. [In Sp., Port., and Ital. *Aquario*; from Lat. *aquarius* = (1) a water-carrier, (2) an inspector of conduits or water-pipes, (3) a constellation. (See I & 2.) From *aquarius* = of or relating to water.]

- In Astronomy*:  
1. The eleventh of the twelve ancient zodiacal constellations, now generally called *signus of the zodiac*. It is generally quoted as "Aquarius, the Water-bearer."  
2. A division of the ecliptic—that between 300° and 330° of longitude, which, on account of the precession of the equinoxes, has gradually advanced from the constellation Aquarius, once within those limits. The sun enters this part of his course about the 21st of January, at which time there are generally copious rains in Italy, whence the name Aquarius = the water-bearer or waterman. (*Herschel: Astron.*, §§ 380, 381.) It is marked thus ☊.  
"A constellation in the watery sign,  
Which they *Aquarius* call."  
*Clarendon: Poems*, &c., p. 17.

**â-quât-ic**, \* **â-quât-ick**, a. & s. [In Fr. *aquatique*; Sp., Port., & Ital. *aquatico*. From Lat. *aquaticus* = (1) found in the water, (2) watery, (3) like water.]

- A.** *As adjective*:  
1. *Of plants*: Growing in the water.  
"Characeæ are aquatic plants found in stagnant fresh or salt water."—*Linley: Nat. Syst. of Bot.*, 2nd ed. (1836), p. 418.

2. *Of animals*: Living in or about the water; swimming in, flying over, or deriving its food from the water.

"Brutes may be considered as either aerial, terrestrial, aquatic, or amphibious. *Aquatic* are those whose constant abode is upon the water."—*Locke*.

- B.** *As substantive*:  
1. An aquatic animal or plant.  
"Flags, and such like *aquatics*, are best destroyed by draining."—*Mortimer: Husbandry*.
- 2. A person fond of water. (N.E.D.)

\* **â-quât-ic-al**, a. [Eug. *aquatic*; -al.] The same as AQUATIC, *adj.* (q.v.). (*Evélyn*.)

\* **â-quâ-tile**, \* **â-quâ-til**, a. & s. [In Sp. *aguatíl*. From Lat. *aguatilis*, neut. of *adj. aguatilis* = aquatic.]

- A.** *As adj.*: Aquatic.  
"We beheld many millions of the *aguatilis*, or water frog, in ditches and standing places."—*Brown: Vulgar Errors*.
- B.** *As subst.*: An aquatic animal or plant.

**â-quâ-tint**, **â-quâ-tin-ta**, s. & a. [In Ger. *aquatinta*; Fr. *aqua-tinta*, *aqua-tinte*; Lat. *aqua* = water, and Ital. *tinta* = a dye, a tincture.]

**A.** *As substantive*: A kind of engraving so called from its resemblance to water-colour drawings. The most approved method of practising it is to first trace the outline of the proposed picture on a copper-plate by means of an etching needle or other sharp instrument. Next, the etching ground is removed, and the plate thoroughly cleaned with whitening and water. The plate is then placed in a flat tin or earthen vessel in an inclined position, and on it is poured a solution of resinous matter, prepared in rectified spirits of wine. When dry, the design is drawn upon it with the bursting-ground [BURSTING-GROUND], and the plate is varnished and dried. Some clear water is then applied to it, and finally, the design is bit into the copper by two successive applications of diluted nitric acid.

**B.** *As adjective*: Pertaining to the kind of engraving now described.

"... method of producing the *aquatint* ground."—*Rees: Cyclop.*, ii., "Aquatint."

**â-quâ-tint**, v. t. [From the substantive.] To carry out the process described under AQUATINT, *subst.* (q.v.).

"The principal disadvantages of this method of *aquatinting* are . . ."—*Rees: Cyclop.*, ii., "Aquatint."

**â-quâ-tint-îng**, *pr. par.* [AQUATINT, v.]

**â-quâv-a-lêut**, s. [Lat. *aqua* = water, and *valens* = strong, *pr. par.* of *valeo* = to be worth, to have a value.]

*Chem.*: The molecular ratio of the water to the salt contained in a cryohydrate.

**âq-uê-dûct**, \* **âq-uê-dûct**, **âq-uê-dûc-tûs**, **âq-uê-dûc-tûs** (**âque = âk-wê**), s. [Fr. *aqueduc*, *aqueduc*; Sp. & Port. *aqueducto*; Ital. *aquidotto*; Lat. *aqueductus* = *aquæ ductus* = a leading or conducting of water; *duco* = to lead.]

**A.** (*Of the English forms aqueduct, \* aqueduct*): In a general sense any artificial channel for the conveyance of water from place to place; but the term is generally limited to an artificial

AQUEDUCT ON THE ANIO, NEAR ROME.

channel or conduit raised on pillars for the conveyance of drinking water to a city. Of all the nations of antiquity, the Romans were the great builders of aqueducts. No fewer than twenty of these erections converged on the

capital during its palmy days; whilst there were many more in the provincial parts of the empire. Magnificent ruins of some of these still remain: the best of them in the Campagna around Rome; the others, in portions of France, Spain, Italy, Sicily, Greece, Asia, and Africa, once occupied by important cities and towns. Aqueducts are rare in this country; the most notable one being the great aqueduct recently finished for the water supply of the City of New York.

"No magnificent remains of Latin provinces and aqueducts are to be found in Britain."--Macaulay: Hist. Eng., ch. i.

**Aqueduct of the cochlea.** [AQUEDUCTUS, B.] **Aqueduct of Fallopius.** [AQUEDUCTUS, B.] **Aqueduct of Sylvius.** [AQUEDUCTUS, B.] **B.** (Chiefly of the form aqueductus): **A. cochlea,** the aqueduct of the cochlea. [COCHLEA.] A funnel-shaped canal in the ear. It leads to the jugular fossa, and is supposed to afford a passage for a small vein. (Todd & Bowman: Physiol. Anat., vol. ii., pp. 74, 75.) **A. Fallopii,** the aqueduct of Fallopius. A channel in the ear near the tympanum. (Ibid., vol. ii., p. 70.) **A. Sylvii,** the aqueduct of Sylvius. A channel in the brain, connecting the third and fourth ventricles. (Ibid., vol. ii., p. 289.) **A. vestibuli:** A canal running from the vestibule of the internal ear to the posterior surface of the pars petrosa of the temporal bone.

**\* a-quéightte** (ph silent). Pret. of **V. AQAIRE** (q.v.). **\* a-qué'int** (2), *pa. par.* [AQUENCH.] **\* a-qué'int a-ble,** *a.* [ACQUAINTEABLE.] **\* a-qué-y-thé-s,** [*In Ital. aquetta, aquettade* = wateriness.] Wateriness.

"The aquetty, Terrelty, and sulphurety, Shall run together again." *Ben Jonson: Alchemist, iv. 1.*

**\* a-qué'le,** **\* a-quill,** **\* a-qué'l-lén,** **\* a-qué'l-lan** (*pa. par.* **\* a-quó'ld,** *v.t.* [A.S. *acwellan.*]) To kill.

"Nule heo the sothe telle Thah me schoilde heom aquelle." *Sinners Beware* (ed. Morris), 241-42.

**\* a-quén'ch,** **\* a-quén'che,** **\* a-quén'chen** (*pret.* **\* a-qué'int,** **\* a-qué'ynt,** *v.t.* [A.S. *aquenan* = to quench.]) To quench. **\* a-quén'th** (*man theroure the bethoch or thou walle of th' bench thil zenne aquench.*—*Agenbite* (ed. Morris), p. 130.)

**\* a-qué'nt,** **\* a-qué'int** (1), **\* a-qué'ynte,** *pa. par.* [ACQUAINT, *pa. par.*] (*Chaucer, Prompt. Parv.*)

**\* a-quén'tyn,** *v.t.* [ACQUAINT, *v.*] To make known. (*Prompt. Parv.*)

**\* a-qué'ous,** *a.* [*In Fr. aqueux;* Sp., Port., & Ital. *aqueo;* from Lat. *aqua* = water.]

- A. Ordinary Language:**
  1. Consisting wholly or in large measure of water. [B. 1.]
  2. Made by the addition of water.
  3. Deposited from water. [B. 4.]
- B. Technically:**
  1. **Meteorol.** *Aqueous vapour:* The water which, evaporating from the earth, goes to constitute clouds.

"The leaves of the plants absorb both the carbonic acid and the aqueous vapour of the air."--*Tyndall: Frag. of Science, 3rd ed.*, iv. 47.

2. **Anat.** *Aqueous humour:* A humour of the eye filling up the space between the cornea and the crystalline lens. It is partially divided by the iris into an anterior and posterior chamber. The former is the larger, and has the cornea in front, the iris behind, and a portion of the ciliary ligament on its circumference.

"The aqueous humour of the eye consists very nearly of water. Berzelius states that all its other constituents taken together do not amount to so much as one-fiftieth part of the whole. Of these, more than half is chloride of sodium, and the rest is extractive matter, soluble either in water or alcohol."--*Todd & Bowman: Physiol. Anat.*, vol. ii., p. 34.

- 3. **Chem.** [A. 2.]
- 4. **Geol.** *Aqueous rocks:* Rocks originally deposited from water, whence they are sometimes called *aqueous deposits*. As what is deposited is sediment of some one kind or other, they are also termed *sedimentary rocks*, and, as, unless too much metamorphosed, they contain

the now fossilised remains of the animals which lived in the water, and the plants which grew or were carried into it, they are denominated *fossiliferous rocks*. Finally, as the sediment successively deposited from the water tended to arrange itself in layers or strata, the rocks thus formed are called *stratified rocks*. (*Lyell: Geology.*) A great part of the science of geology has been built up on the careful study of aqueous rocks, the relative order of their disposition, and their fossil contents.

**\* a-qué'ous-ness,** *s.* [Eng. *aqueous;* -ness.] The quality of being watery; wateriness.

**\* a-qué'ynt,** *pa. par.* [AQUENCH.]

**\* a-quif-ér-ous,** *a.* [Lat. *aqua* = water, and *fero* = to bear.] Bearing water.

"... with a conspicuous (aqueiferous) pore in the middle."--*Woodward: Malusca* (1851), p. 117.

**\* a-quif-fo-li-á-qé-s,** *s. pl.* [Lat. *aquifolia, aquifolium.*] Hollyworts. An order of monopetalous plants ranked by Lindley under his Gentianial Alliance. It consists of trees or shrubs with coriaceous leaves, small axillary flowers, and fleshy indehiscent fruit, with from two to six seeds. The common holly, *Ilex aquifolium*, is the type of the order. In 1846, Lindley estimated the number of known species at 110.

**\* a-quif-fo-li-úm,** *s.* [Lat. *aquifolium*, or *aquifolia* = the holly-tree, or the Scarlet Holm (*Ilex aquifolium*); *aquifolius*, *adj.* = having pointed leaves.] A plant-genus from which the Holly order is called *Aquifoliaceæ*. (Now ranked under *Ilex*.)

**\* a-quif-form,** *a.* [Lat. *aqua* = water, and *forma* = form, shape.] In the form of water.

**\* a-quil-a** (**\* a-quil = ák-wil**), *s.* [Ital. & Lat. *aquila* = an eagle, perhaps from the root *ac* = sharp, swift.]

**I. Zool.:** A genus of raptorial birds, the typical one of the Aquilinae, or Eagle, a sub-family of Falconide. The species have not that strong tooth in their bills which the falcons possess, and are feebler for their size, less voracious and less predatory than the falcons proper. Two species occur in Britain. In the United States the Bald Eagle has been chosen as the national emblem.

AQUILA.

**2. Astron.:** One of the twenty ancient Northern constellations. Within it is included also the constellation Antinous, the only one of forty-eight recognised by the ancients which modern astronomers have merged in another one. [ANTINOUS.]

**\* a-quil-ár-i-a** (**\* a-quil = ák-wil**), *s.* [From Lat. *aquila* = an eagle.] [AGALLOCH.] A genus of plants, the typical one of the order Aquilariaceæ (q.v.). Aloes-wood, Agilawood, or Eagle-wood, is the inside of the trunk of the *Aquilaria ovata*, and *A. Agallocha*. [ALOE-WOOD, AGILAWOOD.]

**\* a-quil-ár-i-á-qé-s** (**\* a-quil = ák-wil**), *s. pl.* [AQUILARIA.] An order of plants classed by Dr. Lindley under his Rhamaleæ, or Rhamal Alliance. They have the calyx turbinate or tubular, with its orifice furnished with ten or five bearded scales, which are really stamens. Corolla, 0; stamina, ten or five, in the latter case opposite the segments of the calyx; style, 0, or conical and thread-shaped; stigma, large, simple; ovary, superior, one-celled; seeds, one on each placenta, or one abortive. Trees with alternate entire shining leaves without stipules. Habitat, the East Indies. In 1847, Dr. Lindley estimated the known species at ten.

**\* a-quil-áte** (**\* a-quil = ák-wil**), *v.t.* [From Lat. *aquila* = an eagle.]

*Her.:* To adorn with eagles' heads. (Used chiefly, if not exclusively, in the *pa. par.*)

**\* a-quil-á-téd** (**\* a-quil = ák-wil**), *pa. par.* [AQUILATE.]

**\* a-quil-á-gi-a** (**\* a-quil = ák-wil**), *s.* [A.S. and Ital. *aquilegia*; from Lat. *aquila* = an eagle, the species resembling eagles' claws.] Columbine. A genus of plants belonging to the order Ranunculaceæ, or Crowfoots. The *A. vulgaris*, or Common Columbine, a plant, the petals of which terminate beneath in a hornlike spur, is a doubtful native of Britain.

**\* a-quil-li-næ** (**\* a-quil = ák-wil**), *s. pl.* [From Lat. *aquila* = an eagle.] A sub-family of Falconideæ. It contains the eagles. Three genera—*Aquila*, *Haliaeetus*, and *Pandion*—have representatives in this country.

**\* a-quil-line** (**\* a-quil = ák-wil**), *a.* [*In Fr. aquilin;* Sp. *aquilino* and *aguileno*; Port. & Ital. *aquilino*; Lat. *aquilinus*, from *aquila* = an eagle.]

- 1. *Gen.:* Pertaining to an eagle.
- 2. *Spec.:* Eagle-like in bill or in nose; hooked.

"His nose was aquiline, his eyes were blue, Ruddy his lips, and fresh and fair his hue." *Dryden: Fables from Æsop & Arctis*, fil. 74.

"We may trace the commencement of an aquiline curvature in the nose of the Hooleck Gibbon."--*Darwin: Descent of Man*, pt. 1, chap. vi.

**\* a-quil-lón** (**\* a-quil = ák-wil**), *s.* [Fr. & Sp. *aquilino*; Port. *aquilao*; Ital. *aquilone, aquilonare*; Lat. *aquila*.] The north wind.

"Blow, villain, till thy spher'd his cheek Outswell the colick of puff'd Aquilon." *Shaksp.: Troil. and Cress.*, tv. 5.

**\* a-quil-á-s,** *s. pl.* [Lat. *aqua* = water, and *tela* = a web.]

**Zool.:** A sub-division of Araneideæ, containing the genus *Argyrota* (q.v.).

**\* a-quítte,** *v.t.* [AQUYTEL.]

† **\* a-quó'pe,** *a.* [*In Sp. & Port. aquoso;* Ital. *acquoso, acquoso*; from Lat. *aqueus* = abounding in water.] Watery, aqueous. (Bailey.)

† **\* a-quó's-i-tý,** *s.* [*In Fr. aqueosité;* Sp. *aqueosidad*; Port. *aqueosidade, aqueosita, aqueosita*; Low Lat. *aqueositas*.] [AQUOSE.] Wateriness, aqueousness. (Bailey.)

**\* a-quú-la,** *s.* [Lat. = a small stream; dimin. of *aqua* = water.]

**A. acustica** (*Anat.*): A fluid which fills the cavity of the vestibule connected with the internal ear.

**\* a-quý'ke,** *v.t.* [A.S. *acwician* = to make alive: *cwic, cwuc* = quick, alive.] To kindle.

"Is ofte aquyked that uer of lecherie. Hærd the writinge spekh that word of fole wyfman is bernide ase cur."--*Agenbite* (ed. Morris), p. 203.

**\* a-quý'tte,** **\* a-quítte,** **\* a-quý't-ýn,** *v.t.* [ACQUIT.]

- 1. To acquit, set free, release, pay.
- "Him behoeth paye ne neure aquitte he ne may, and thereure he seel by ydamned."--*Agenbite* (ed. Morris), p. 137.
- "And the heghe me thet aol yeth the tornemans and thet by betaketh hyre lodes and here eritage ine wed and dead wed that naght him ne aquy'teth."--*Ibid.*, p. 34.

2. To berave.

"And the Admiral hit mightis wite That he nere of his life aquita." *Floriz and Blanchefleur* (ed. Lumby), 207, 208.

**\* a-quý'nt,** *pa. par.* [ACQUAINT.] (*Lancelot of the Lake*, bk. ii., 1,295.)

**\* a-quý't-ýn,** *v.t.* [ACQUIET.] (*Prompt. Parv.*)

**-ar.** [An Eng. suffix, from Lat. *-aris* = of or belonging to; as *stellar* (Lat. *stellaris*) = of or belonging to a star.]

**A.R.** An abbreviation for *Anno Regni* = in the year of the reign; as, A.R. V.R. 30 = *anno regni Victoriae reginae tricesimo* = in the 30th year of Queen Victoria's reign.

**\* ár,** *conj.* [A.S. *ar* = ere, before.] [ERE.] Ere, before; ere ever, before ever.

"Bnt al to deere they bought it ar they ryse." *Chaucer: C. T.*, 4,840.

**ár,** *v.t.* [EAR, *v.*] (Scottch.)

**ár-a,** *s.* [Lat. = an altar.] "The Altar:" one of the fifteen ancient Southern constellations.

**\* a-ra,** *s.* [South American Indian name, designed to imitate the voice of the bird.]

**Zool.:** A genus of birds, the typical one of the sub-family Araineæ, which is ranked under the family Pittaciidae, or Parrots. It is called

also *Macrocerus*, from Gr. *μακρός* (*makros*) = long, . . . large, and *κεράκος* (*kerkos*) = tall. It contains the Macaws. [MACAW.]

**A.R.A.** An abbreviation for "Associate of the Royal Academy."

**Ar-ab, a. & a.** [In Ger. *Araber* (s.), *Arabisch* (adj.); Fr. & Port. *Arabe* (s. & adj.); Ital. *Arabo* (adj.); Lat. *Arabs* (s.); Gr. *Ἀραβ* (*Araps*) (s), genit. *Ἀραβος* (*Arabos*)]

GROUP OF ARABS.

**A.** As substantive: A native of Arabia.

"In his march over the sandy desert between Emesa and Palmyra, Aurelian was perpetually harassed by the Arabs."—Gibbon: *Decline and Fall*, ch. xi.

**B.** As adjective: Pertaining to Arabia or its inhabitants.

"Our Arab tents are rude for thee."  
Moors: *L. R.*; *Light of the Haram*.

**Arab-like, a.** Like an Arab, in roaming tendency or some other particular.

"Here, Arab-like, is pitched my tent,  
And straight again is fortified."  
Longfellow: *The Two Locks of Hoir*.

**ar-a-bā, s.** [Hindustani, &c.] A wheeled carriage, a gun-carriage, a kind of cart used in Eastern journeys or campaigns.

**ar-a-bā-tā, s.** [Native name.] An American monkey (*Mycetes stramineus*).

**Ar-a-besque (que = k), \*Ar-a-besq', s. & adj.** [As substantive: In Dut. *Arabesken* (pl.); Ger. *Arabeske* (sing.); Fr. *Arabesque* (sing.); Port. *Arabesco* (pl.); Ital. *Arabesco*, *Rabesco* (sing.); terms all implying that the style of ornamentation so designated originated with the Arabs, whereas it seems to have sprung up first among the Romans.]

**A.** As substantive:

*Arch.*: A style of ornamentation in which are represented men, animals (the latter consisting of mythic as well as actual forms), plants, with leaves, flowers, and fruit; mathematical figures, &c.; the whole put together in a whimsical way, so that, for instance, the animals not merely rest upon the plants, but grow out of them like blossoms. There are three kinds of Arabesque:—1st (and oldest), that of the Romans, without the animals. They occur in the mural paintings at Pompeii, Herculaneum, and other places. 2nd. That of the Arabs, also without the animals. This is well seen in the Alhambra. 3rd. The Christian Arabesque, with the figures introduced. It appears in illuminated mediæval manuscripts and elsewhere. (*Gloss. of Arch.*)

**B.** As adjective (in Fr. *Arabesque*);

† **1. Gen.**: Pertaining to Arabia or its inhabitants.

ARABESQUE PANEL.

"Though a follower of the Arabian school, the astiduity with which he [Achilli] cultivated anatomy, has rescued his name from the inglorious obscurity in which the *Arabesque* doctors have in general elumbered."—*Encyc. Brit.*, 7th ed., II. 756.

**2. Spec.**: Consisting of, or pertaining to, the kind of ornaments called Arabesques. [See A., as substantive.]

"A kind of ornament, which may be called *Arabesque*, was much used in the domestic architecture of this country in the sixteenth and seventeenth centuries."—*Gloss. of Arch.*, 5th ed., II. 1850.

**Ar-ā-bī-ān, a. & s.** [Eng. *Arabī*(a); -an.]

**A.** As adjective: Pertaining to Arabia.

"... the rigor of the Arabian laws. . . ."—*Goldsmith: The Bee*, No. iv.

**B.** As substantive: An Arab, a native of Arabia.

"... neither shall the Arabian pitch tent there."  
—*Isa*, xiii. 20.

*Arabian Architecture.* [See MOHAMMEDAN ARCHITECTURE.]

**Ar-ab-īc, \*Ar-ab-īck, a. & s.** [In Eng. *Arab-ic*; Ger. *Arabisch*; Fr. *Arabique*; Port. *Arabico*; Lat. *Arabicus*.]

**A.** As adjective: Pertaining to Arabia, or to the language prevailing there.

"What way was there taken for spreading his [Pococke's] *Arabic* translation of Grotius de Veritate Religionis Christianæ?"—*Worthington to Hartlib*, Epist. 7.

"Gum arabic, or gum acacia, is an exudation from various species of acacia."—*Trease, of Bot.* (ed. 1865), II. 8.

**B.** As substantive: The language of Arabia or of the Arabs. It is properly the dialect of the Koreishite tribe in Arabia, rendered classic by its being the language in which the Koran was composed. It is now vernacular in Arabia, Egypt, and Northern Africa, and the learned and sacred tongue of all Mohammedan countries. The numbers who at present speak it have been estimated at 100 millions, which is probably an exaggeration. Philologically viewed, Arabic is the most southerly of the Syro-Arabian family of languages, besides being itself the type of one of the three classes into which that leading family of tongues is divided. Associated with it in this relation are the living Amharic and the dead Ethiopic and Himyaritic tongues. About two-thirds of the Hebrew roots occur with slight modification in Arabic, which renders the language useful to the Biblical student, as its wide diffusion does to the missionary; while numerous chemical, alchemical, astronomical, and astrological words which arose during the brilliant, but brief, period when the Saracens aimed at intellectual as well as political ascendancy, will always render it an object of interest to scientific men. The Arabic literature is posterior in date to the time of Mohammed.

"That Schultens had from the *Arabic* happily and satisfactorily illustrated some very obscure and difficult words of the Hebrew text. . . ."—*Parkhurst: Heb. Lex.*, Pref.

**\*Arabic numerals:** The first nine digits—1, 2, 3, &c.—and the cipher used in writing the number 10. Though often called Arabic, they are really of Brahmanic origin. [NUMERALS.]

**\*Ar-āb-ī-āl, a.** [Eng. *Arab*; -ical.] Pertaining to Arabia or the Arabs. The same as the adj. ARABIC.

"Written in *Arabic* characters."—*Shelton: Don Quixote*, II. 2, 1.

**\*Ar-āb-īc-āl-īy, adv.** [Eng. *Arabic*]; -ly.] After the manner of the Arabs.

"Mahomet, whose name *Arabic*ly signifies deceit."  
—*Sir T. Herbert: Travels*, p. 321.

**Ar-āb-ī-āz, s. pl.** [From Arabia, in which the sect arose.]

*Church Hist.*: A sect which sprung up about A.D. 207. Their distinguishing tenet was, that the soul died with the body, but revived with it at the resurrection. Origin is said to have re-converted them to the orthodox belief, and thus extinguished their separate organisation.

**Ar-āb-ī-āz, v. t.** [Eng. *Arabic*; -ize.] To render skin to Arabia.

"... being superseded by Hindi in its *Arabicised* form of Urdu."—*Asiatic Researches, Gram. of Arayan Lang. of India*, vol. I. (1872), introd., p. 52.

**Ar-ā-bīd-ēs, s. pl.** [ARABIS.] A tribe of plants belonging to the order Brassicaceæ, or Crucifera. It includes several British genera, the typical one being *Arabis*.

**Ar-ā-bin, s.** [From *Arabis*, is the term *gum arabic*.] The pure soluble principle in gum

arabic and similar substances. It is precipitated by alcohol and by basic lead acetate, but not by the neutral acetate. It is composed of C<sub>12</sub>H<sub>22</sub>O<sub>11</sub>. It is isomeric with cane sugar. (*Fownes: Manual of Chem.*, 10th ed., p. 689.)

**Ar-a-bīs, s.** [In Fr. *arabette*; Sp. *arabide*.]

The Wall-cress. A genus of plants belonging to the order Brassicaceæ, or Crucifera. Five species are natives of Britain; the most common being the *A. hirsuta*, or Hairy Rock-cress. It has small white flowers.

**Ar-ab-īsm, s.** [In Eng. *Arab-ism*; Ger. *Arabism*.] An idiom or other peculiarity of languages borrowed from the Arabic.

**Ar-a-bist, s.** [Eng. *Arab*; suffix -ist.] One conversant with the Arabic language and literature.

**Ar-a-ble, \*ēr-a-ble, a.** [In Fr. *arable*; Ital. *arabile*; Lat. *arabilis* = that may be ploughed; *aro* = Gr. *ἀρόω* (*arōō*) = to plough. In Wel. *arad* is = a plough, and *ar* = arable land; Gael. *ar* = a plough; Irish *árain* = to plough.] Capable of being ploughed. Applied to land which may profitably be ploughed, with the view of being sown with cereal or other crops. It is contradistinguished from land not worth ploughing, but which it is thought better to leave in grass, pasturage, if not even in wood and moor.

"The arable land and pasture land were not supposed by the best political arithmeticians of that age to amount to much more than half the area of the kingdom."—*Macaulay: Hist. Eng.*, ch. III.

**Ar-a-bō, in compos.** = connected with the Arabs.

**Arabo-tesesco, s.** [Ital. *Arabo*, and *Talescho* = German.]

*Arch.*: A style of architecture blending together the Roman, Moorish, and German-Gothic.

**ar-a-ca-ri, s.** [Imitated from the note of the bird.]

*Zool.*: The name given in Brazil to several Scansorial birds ranked as aberrant members of the Rhamphastidæ, or Toucan family. They are placed under Pteroglossus and its allied genera. They have smaller bills than the Toucans proper, and are of brighter colours, being generally green, with red or yellow on their breasts.

**\*Ar-a-çé, \*ār-as, v. t.** [Fr. *arracher* = to pluck, to pick, to pull away.] To pluck out, to tear away.

"That with great sleight and great difficulty,  
The children from her arm they gonne arace."  
Chaucer: *C. T.*, 3, 974-8.

"The throndsen of a brokine spert that was,  
Quikch no man out dedeoty to arace."  
Lancelot of the Lake (ed. Skeat), *Prolog.*, 239-40.

**Ar-ā-çé-ēs, s. pl.** [Latinised from *arum* (q. v.).]

*Arads.* An order of endogenous plants having for their inflorescence a spadix placed within a spathe. They have neither calyx nor corolla. The leaves are frequently cordate. The fruit is succulent, with many seeds. They are acrid in character, and often poisonous. The *Caladium Seguinum*, or Dumb Cane of the West Indies and South America, when chewed, causes the tongue so to swell as to cause temporary dumbness. In 1847, Dr. Lindley estimated the known genera at twenty-six, and the species at 170. There is one species in the British flora, the *Arum maculatum*, Cuckoo-pint, Wake-Robin, or Lords and Ladies. [See ARUM.]

**Ar-ā-çé-ōūs, a.** [ARACEÆ.] Pertaining to the Araceæ (q. v.).

**Ar-a-chid-īc, a.** [Fr. *arachide*; Eng. suffix -ic.] Pertaining to the Earth-nut (*Arachis hypogæa*). [ARACHIS.]

**arachidic acid, s.**

*Chem.*: C<sub>20</sub>H<sub>40</sub>O<sub>2</sub> = C<sub>19</sub>H<sub>38</sub>COOH. A monatomic fatty acid, obtained by the saponification of the oil of the Earth-nut (*Arachis hypogæa*). It crystallises in minute scales, which melt at 75°. It is soluble in boiling alcohol and in ether.

**Ar-a-chis, s.** [In Fr. *arachide*; Lat. *aracis*, a name applied by Pliny to a plant which had neither stem nor leaves; Gr. *ἀρακός* (*arakos*), *ἀρακίς* (*arakis*), and later, *ἀραχός* (*arachos*),

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unīte, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ð = ē. qu = kw.

the name of a leguminous plant.] A genus of leguminous plants belonging to the sub-order Cæsalpinieæ. The *A. hypogæa*, or the nuder-ground Arachis (Gr. ὑπόγειος (hypogæios) = subterranean), is so called because the legumes are produced and matured beneath the soil. The plant is believed to have come originally from Africa, but it is now cultivated in the warmer parts both of Asia and America. The legumes are eatable. The seeds have a sweet taste, and furnish a valuable oil used for lamps and as a substitute for olive-oil. In South Carolina they are employed for chocolate.

**ἄ-ράχ-νί-δα, † ἄ-ράχ-νί-δα, † ἄ-ράχ-νί-δεσ, s. pl.** [In Fr. *araignée*; Sp. *arana*; Port. *arana*; Ital. *aragna, aragno*; Lat. *araneus, aranea*. From Gr. ἀράχνη (*arachnê*) and ἀράχνη (*arachnê*) = a spider, and εἶδος (*eidos*) = form.]

**Zool.**: The class of animals which contains Spiders, Scorpions, and Mites. It belongs to the Articulata or Annulosa, and the sub-class Arthropoda, and is appropriately placed between the Crustacea on the one hand, and the Insecta on the other. The highest Crustacea have ten feet, the Arachnida eight, and the Insecta six. The Arachnida are wingless, have no antennæ, breathe by means of tracheal tubes or pulmonary sacs performing the function of lungs. As a rule, they have several simple eyes. They have no proper metamorphosis. They live in a predatory manner. Cuvier divided the class into two orders: Pulmonaria and Trachearia; that is, those breathing by lungs and those breathing by tracheæ. The former include the Spiders proper and the Scorpions; the latter, the Acari (Mites) and their nearer and more remote allies. Huxley separates the Arachnida into six orders: (1) Arthrogastrs, including Scorpio, Chelifer, Phrynus, Phalangium, Galeodes, &c.; (2) Araneina, or Spiders; (3) Acarina, or Mites and Ticks; (4) Fresh-water Arctisea or Tardigrada, called Water-bears; (5) Pycnogonida (Marine animals); and (6) Pentastomida (Parasites).

"Most of the Arachnides live on insects."—Griffith's *Cuvier*, vol. xiii. (1833), p. 384.  
"It supports the first of the four pairs of legs usually ascribed to the Arachnida."—Owen: *Invertebrate Animals* (1845), Lect. xix.  
"The next four classes—Insecta, Myriapoda, Arachnida, Crustacea—without doubt also present so many characters in common as to form a very natural assemblage."—Huxley: *Classif. of Animals* (1869), p. 78.

**ἄ-ράχ-νί-δ, s.** [ARACHNIDA.] A member of the class Arachnida; an Arachnid.

"... a Crustacean, an Arachnid, a Myriapod, or an Insect."—Huxley: *Classif. of Animals*, p. 77.

**ἄ-ράχ-νί-δαν, a. & s.** [Eng. *Arachnida*; -an.]  
**A. As adjective:** Pertaining to the Arachnida.  
**B. As substantive:** An animal of the class Arachnida.

"The smaller Arachnidans breathe, like insects, by tracheæ exclusively."—Owen: *Invertebrate Animals*, Lect. xix.

**ἄ-ράχ-νί-τις, † ἄ-ράχ-νί-δ-ί-τις, s.** [Eng. *arachnid*, and suffix *-itis* = Gr. -ιτις, implying inflammation.] [ARACHNOID.]

**Med.**: Names given by Martinet to a formidable malady, the inflammation of the arachnoid. Sometimes the other membranes investing the brain are also affected, in which case the disease is termed Meningitis (q.v.). It is also apt to spread to the substance of the brain. Arachnitis and Meningitis are akin to apoplexy and cerebritis, from which, however, they may be distinguished by the absence of premonitory symptoms, by the occurrence of spasmodic and convulsive symptoms on both sides of the body, and by the presence of febrile excitement without decided paralysis, followed by collapse.

**ἄ-ράχ-νί-δ, a. & s.** [In Fr. *arachnoïde*. From Gr. ἀράχνη (*arachnê*) and ἀράχνη (*arachnê*) = a spider, and εἶδος (*eidos*) = form.]

**A. As adjective:**  
**I. Anat.**: Of the form or aspect of a spider's web. *Specially*—  
1. Pertaining to the membrane of the brain called the Arachnoid. (Todd & Bowman: *Physiol. Anat.*, vol. ii., p. 253.)  
2. Pertaining to the tunic of the crystalline humour of the eye.  
3. Pertaining to one of the coverings of the spinal marrow.

**II. Botany and Biology generally:** Long and loosely entangled, so as to resemble a cobweb. (Used specially of hairs in plants. Example, *Calceolaria arachnoidea*.) (Lindley.)

**B. As substantive (Anatomy):**  
1. The serous membrane of the cranio-spinal cavity. It adheres to the dura mater by its parietal layer, and with the intervention of the pia mater to the brain and spinal cord by its visceral layer. (Todd & Bowman: *Physiol. Anat.*, vol. ii., p. 253.)  
2. The capsule of the crystalline lens, which is a continuation of the hyaloid membrane. [ARACHNOIDES.]

**ARACHNOID cavity.** The space between the two layers of the arachnoid membrane. (Todd & Bowman: *Physiol. Anat.*, ii. 253.)  
**arachnoid membrane.** [ARACHNOID (B. 1).]

**\* ἄ-ράχ-νί-δ-εσ, \* ἄ-ράχ-νί-δ-α, s. pl.** [ARACHNOID.]

"The form *arachnoidea* is in *Glossog. Nova*, 2nd ed. (1719), with the meaning, "The crystalline Tunic of the Eye." In Johnson's Dictionary, ed. 1773, there is *arachnoidea* with the two significations given under Arachnoid (B. 1, 2). The same form is in Parr's *Med. Diet.* (1809), and even in Todd (1827)."

"As to the tunic of the eye many things might be taken notice of: the prodigious fineness of the arachnoidea, the acute sense of the retina."—Derham.

**† ἄ-ράχ-νί-δ-ί-τις, s.** [ARACHNITIS.]

**ἄ-ράχ-νί-δ-ί-στis, s.** [Eng. *arachnology*; -ist.] One who makes the Arachnid or Spider class of animals a special subject of study.

**ἄ-ράχ-νί-δ-εσ, s.** [Gr. ἀράχνη (*arachnê*) or ἀράχνη (*arachnê*) = a spider; λόγος (*logos*) = . . . discourse.] The department of Natural Science which treats of the Arachnid or Spider class of animals.

**† ἄ-ρά-ακ, s.** [ARRACK.]

**† ἄ-ρά-αόν, s.** A term in alchemy, denoting copper.

**ἄ-ρά-α, s.** [From Lat. *arum* (q.v.).]  
**Bot.**: A plant of the genus *Arum*, or at least of the natural order Araceæ.

**Plural. Arads:** In the English name of the natural order Araceæ.

**ἄ-ρ-ε-ὄμ-ε-τ-ε-ρ, s.** [AREOMETER.]

**ἄ-ρ-ε-ὄ-σ-τ-υ-λε (1), s. & a.** [In Fr. *arèstiles*; Lat. *areostylus*; Gr. ἀραιόστυλος (*araiostulos*) = ἀραιός (*araios*) = thin, narrow, slight, . . . with intervals; στυλος (*stulos*) = a pillar with columns far separated.] (*Vitruvius*.)

**A. As substantive:**  
**Arch.**: A kind of intercolumniation in which the pillars are so wide apart that the intermediate spaces are each upwards of three diameters of the column. This constitutes one of the five kinds of intercolumniation described by Vitruvius.

**B. As adjective:** Pertaining to the intercolumnation now described.

**ἄ-ρ-ε-ὄ-σ-τ-υ-λε, s.** [Gr. ἀραιός (*araios*) = thin, narrow, slight, and στυλος (*stulos*) = with columns standing close.] (*Vitruvius*.)

AREOSTYLE: WESTERN FRONT OF ST. PAUL'S CATHEDRAL.

**Architecture:** The arrangement attendant on coupled columns, as in the western front of St. Paul's Cathedral.

**ἄ-ρ-ε-ὄ-τ-ι-ος, s. pl.** [Gr. ἀραιότικος (*araiotikos*) = of or for rarefying; ἀραιός (*araios*) = . . . to make thin; ἀραιός (*araios*) = thin.]

**Med.**: Remedies which rarely the humours, and thus make it more easy for them to be carried away by the pores of the skin.

**ἄ-ρ-ε-ὄ-κ-ε-νε, s.** [In Ger. *aræosen*; from Gr. ἀραιός (*araios*) = thin, narrow, slight, . . . porous, spongy, and ζένος (*zenos*) = foreign, strange.] A mineral, the same as Dechenite (q.v.).

**\* ἄ-ρ-ε-γε, \* ἄ-ρ-ε-γε, s.** Any plant of the genus *Atriplex*. (*Prompt. Parv. & Falsg.*)

**ἄ-ρ-ε-γε, s.** [AVERAGE.] (*Scotch*.)

**ἄ-ρά-γ-ὄ-ν-ι-τε, † ἄ-ρά-γ-ὄ-ν-ι-τε, s.** [From Aragon, in Spain, where it was first found.] A mineral with orthorhombic crystals, generally six-sided prisms, though the rectangular octohedron is considered its regular form. It occurs also globular, reniform, coralloidal, columnar, stalactitic, and incrusting. The hardness is 3.5—4; the sp. gr., 2.927 to 2.947; the lustre vitreous or nearly resinous on fractured surfaces. Its colour is white, grey, yellow, green, or violet; it is transparent or translucent, and brittle. The composition is carbonate of lime, 95.94 to 99.31, with smaller quantities of strontia-carbonate, &c. Dana thus divides it:—Var. 1. Ordinary: (a) Crystallised in simple or compound crystals, or in radiating groups of acicular crystals; (b) Columnar, including Satin-spar; (c) Massive. 2. Scaly massive. 3. Stalactitic or Stalagmitic. 4. Coralloidal. 5. Tarnovcicite. Moscovite and Oeserite also rank with Aragonite. It occurs in Spain, Austria, Italy, England, America, and elsewhere.

**aragonite group.** Dana's second group of Anhydrous Carbonates, comprising Aragonite, Manganoalcite, Witherite, Bromlite, Strontianite, and Cerussite.

**ἄ-ρ-ε-γ-α-τ-ὸ (gua = gwa), s.** [South American name of Humboldt.] A species of monkey (the *Myces ursinus*), found in South America.

**\* ἄ-ρά-ιδ, pa. par.** of ARAYE (q.v.).

**araignée, arraign (ἄ-ρά-ν-γᾶ, ἄ-ρά-ν), s.** [Fr. *araignée* = (1) a spider, (2) a cobweb.]  
**Fortification:** A branch, return, or gallery of a mine. (*Bailey, James, &c.*)

**\* ἄ-ρά-ϊσε, \* ἄ-ρά-ϊσε, \* ἄ-ρά-ϊσε, v. t.** [A.S. *arastan* = to raise. Cognata with Gothic *ur-reisan* = to stand up.] To raise.

"A medicine . . . whose simple touch is powerful to raise King Fayn."—Shakspeare: *All's Well That Ends Well*, II. 1.

**ἄ-ρά-ϊ-ἄ-ῥ-ε, s.** [In Ger. & Fr. *aralie*; Dut. *aralia*. Derivation unknown.] A genus of plants, the typical one of the order Araliaceæ. *A. umbellifera* exudes an aromatic gum. *A. nudicaulis* is used in North America as a substitute for sarsaparilla. The berries of *A. spinosa*, the Angelica-tree, Prickly Ash, or Toothache-tree, of America, infused in wine or spirits, are used in cases of colic, whilst a tincture of them is prescribed in toothache. *A. racemosa*, the spikenard of America, is also regarded as a medicinal plant. [ANGELICA-TREE.]

**ἄ-ρά-ϊ-ἄ-ῥ-ε, s. pl.** [ARALIA.] Ivyworta. (*Lindley*.) An order of plants belonging to the Umbellal Alliance, and akin to the Apiceæ or Umbellifers, from which, however, they differ in their many-celled fruit and their more shrubby appearance. They inhabit China, India, and America. In 1847, Dr. Lindley estimated the known species at 160. Two occur in the British flora—*Hedera helix*, or Common Ivy, and *Adoxa Moschatellina*, or Tuberous Moschatel.

**ἄ-ρ-ε-μᾶ-ἄ-ν, a. & s.** [Heb. אֲרָם (*arām*), or Aram, the youngest son of Shem (Gen. x. 22); אֲרָם (*arām*) in Heb. means high, from אָרַם (*arām*) = to be high, apparently implying that the region which Aram inhabited was a high one. The term was applied to Syria and Mesopotamia.]

**1. As adjective:** Pertaining to the Aramæan territory, and especially to its language—the Aramæan or Aramaic. [ARAMAIC.]

**bōl, bōy; pōut, jōwī; cat, çoll, chorus, ohin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -ing. -cian, -tian = shān -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bel, del.**

2. As substantive: The language now described. [See No. 1.]

Ar-a-mæ-an-ism, Ar-a-mæ-an-ism, s. [Eng. Aramean; -ism.] An idiom or other peculiarity of language borrowed from the Aramean tongue.

Ar-a-mæ-ic, a. & s. [From Heb. אַרְמִי (aramith), 2 Kings xviii. 26 and Dan. ii. 4 of the Heb. Bible (rendered in the Eng. version "Syrian" or "Syriack.")] [ARAMEAN.]

1. As adjective: Pertaining to the Arameic or Aramean tongue. The Semitic family of languages may be divided into three classes or branches: (1) The Arabic, or Southern Semitic; (2) the Hebrew, or Middle Semitic; and (3) the Arameic, or Northern Semitic. Under the third of these classes Prof. Max Müller ranks of living languages the Neo-Syriac; and of dead ones, (1) the Chaldee of the Masora, Talmud, Targums, and the Bible; (2) the Syriac or Peshito of the second century, A.D.; and (3) the cuneiform inscriptions of Babylon and Nineveh. (Max Müller: Science of Lang., 4th ed., 1864, Table.)

2. As substantive: The language or subfamily of languages above described. [See No. 1., adj.]

Ar-a-mæ-ism, s. [Heb. אַרְמִי (aram).] [ARAMEAN.] The same as ARAMEANISM (q.v.).

a-rān-ō-s, s. [Lat. aranea; Gr. ἀράχνη (arachnē) and ἀράχνη (arachnē) = a spider.] The typical genus of the family Araneidæ, the order Araneina, and the class Arachnida. It contains the domestic spider (A. domestica) and other species.

Ar-a-nō-ī-dæ, s. pl. [ARANEINA.]

Ar-a-nō-ī-dæ (Mod. Lat.), Ar-a-nō-ī-dans (Eng.), s. pl. [ARANEÆ.] The typical family of the class Arachnida. They have the eyes in two rows, one behind the other, the terminal claw of the mandibles directed inwards, and the palpi, though long, never converted into foot-like organs. All spin for themselves a dwelling-place, and most weave webs. It contains the genera Aranea, Epeira, Argynoneta, &c. Their mode of life is so various that Walchner divides them thus:—

- I. Terrestres:
  1. Venantes: (a) Latebricolæ, (b) Tubicolæ, (c) Cellulicolæ, (d) Cursoræ, (e) Saltatoræ.
  2. Vagantes: Laterigradæ.
  3. Errantes: (a) Niditelæ, (b) Filitelæ.
  4. Sedentes: (a) Tapitelæ, (b) Orbitelæ, (c) Retitelæ.
- II. Aquaticæ; Natantes; Aquitelæ.

† Ar-a-nō-ī-dōs, s. pl. [ARANEINA.]

a-rān-ē-ī-form, a. [Lat. aranea = spider, and forma = form, shape.] Shaped like a spider.

a-rān-ē-ī-nā, † Ar-a-nō-ī-dæ, † Ar-a-nō-ī-dōs, s. pl. [ARANEÆ.]

Zool.: An order of Arachnida. Huxley, adopting the term Araneina, makes it the second of the six orders into which he divides that class of animals. The Araneina have the abdomen unsegmented; it is, moreover, connected with the thorax by a narrow peduncle. They breathe by means of two or more pulmonary sacs and two stigmata connected with tracheæ. They have from four to six spinnerets for the exit of the silken threads whence their webs are spun. They are sometimes called Dimerosomata. Carpenter, Dallas, &c., divide them into three families—Araneidæ, Lycosidæ, and Mygalidæ (q.v.).

"The first family of the Pulmonary Arachnides, that of Araneidæ, is composed of the Spiders (Araneæ, Linn.)."—Spittler's Curator, xiii. 387.

"The Araneidæ do not undergo any essential change of form."—Ibid., p. 440.

"The Araneina (or Spiders) have the abdomen not segmented."—Huxley: Classif. of Animals, p. 123.

\* a-rān-ē-ō-se, a. [Lat. araneosus = full of spiders' webs; araneum = a spider's web.] The same as ARACHNOID, sdj. (q.v.).

a-rān-ē-ō-s, s. [Lat. araneum = a spider's web.]

- \* 1. Full of spiders' webs. (Glossog. Nov.)
- 2. Resembling a spider's web.

"The curious araneous membrane of the constringent and dilatah it, and so varieth its focus."—Derham.

\* a-rāng, s. [HABANQUE.]

a-rān-gōēs, s. pl. [Local name.] Pierced beads of various forms made of rough carnelian, formerly imported from Bombay to be re-exported to Africa. (Milburn: Oriental Comm.) (M'Culloch's Diet. of Comm.)

a-ra-ram-boŷ-a, s. [Brazilian name.] A Brazilian snake, green in colour. It is called also the Dog-headed Boa, or Bojôbi. It is the Xiphosoma caninum.

\* ar-as, v.t. [ARACE.]

\* a-rā-tion, s. [Lat. aratio = ploughing; ara = Gr. ἀρόω (arōō) = to plough.] The act or practice of ploughing. (Johnson.)

a-rā-tōr, s. [In Ital. aratore; from Lat. arator = a ploughman, a farmer.] A ploughman, one who ploughs. (Webster.)

\* ar-a-tōr-ŷ, a. [From Lat. arator = a ploughman.] Contributing to tillage. (Johnson.)

a-rā-trūm, s. [Latin = a plough.]

aratrum terræ. [Literally = a plough of the land.]

Scots Law: As much land as can be tilled with one plough. (Jacob: Law Dict., ed. Tomlins, 1797.)

ar-a-tū-r-a-tōr-ræ. [Lit. = a ploughing of the land.] The service which the tenant is to do for his lord in ploughing the land. (Jacob: Law Dict., ed. Tomlins.)

ar-āu-cā-r-ī-g, s. [From the Chilian name araucanos. This again is called after the Araucarian tribe of Indians, or their country, Araucaria, which is between the Andes and the Pacific Ocean, about 37° S. lat., and nominally constitutes part of Chili, but is really independent.]

Bot.: A genus of plants belonging to the order Pinacæ (Conifers) and the family or section Abietinæ. The inflorescence is terminal; the male flowers in cylindrical spikes; and the fruit succeeding the female ones large and globular; each scale, if not abortive, bearing a single seed. The branches are verticillate and spreading, with stiff pointed leaves. Five or six species are known; all from the Southern hemisphere. The one so common in English gardens is A. imbricata, a native of the mountainous parts of Southern Chili. It is of hardy constitution, scarcely requiring protection, except in very severe weather. Another species, A. excelsa, or Norfolk Island Pine, is a splendid tree of giant

ARAUCARIA EXCELSA.

- 1. The tree.
- 2. Portion of a branch with its leaves.
- 3. Single leaf.
- 4. Mature cone.

size. All the genus are ornamental from their fine and unfading foliage. Araucarian pines were abundant in Europe during the Oolitic period, associated with mammals, fishes, &c., whose nearest living analogues are now confined to Australia and the adjacent regions.

ar-āu-cā-r-ī-an, a. [ARAUCARIA.]

Bot.: Pertaining or relating to the Araucaria. " . . . he says it belongs to the fir tribe, partaking of the character of the Araucarian family."—Darwin: Voyage round the World, chap. xv.

\* a-rānght (gh guttural), pa. par. [ARÉCHE (2.)]

\* a-rāy, v. & s. [ARRAY.]

\* a-rāye (pret. & pa. par. a-rāid), v.t. [ARRAY.] To trouble, to afflict.

"The link knight than on to hyme-self he said: "Remember the, how yow haith ben araid." Lancelot of the Lake (ed. Skeat), iii. 3,200-70.

a-rāyne, pa. par. [ARRAY, y.] [Scotch.]

\* ar-bal-ēt, \* ar-bal-ist, \* ar-bal-ēt, \* ar-bal-ēt, \* ar-cu-bal-ist, \* ar-cu-bal-ist-ta, s. [In Fr. arbaliste; O. Fr. arbaliste; Port. arbalista; Lat. arcubalista, from arcus = a bow, and balista, balista = a military engine for hurling stones and other missiles. Gr. βάλλω (ballō) = to throw.]

1. A steel crossbow used in mediæval times. It was set in a wooden shaft, with a sling and

ARBALEST AND ARROW.

trigger bent with a piece of iron, fitted for the purpose, and used to throw bullets, large arrows, darts, and other missiles. (James: Mil. Dict.)

"It is reported by William Brito, that the arcubalista or arbalist was first shewed to the French by our king Richard the First. . . .—Camden.

\* 2. A mathematical instrument, called also a Jacob's staff, formerly used to measure the height of stars above the horizon. (James: Mil. Dict.)

\* ar-bal-ēs-tē-na, s. pl. [From Eng., &c., arbalest (q.v.).] Cruciform apertures in the walls of ancient fortifications through which arrows were discharged.

\* ar-bal-ēs-tēr, \* ar-bal-ēs-tēr, \* ar-bla-tēr, \* ar-cu-bal-ist-tēr, s. [Eng. arbalest; arbalist; -er. In Lat. arcuballistarius.] One whose weapon is the crossbow; a crossbow-man.

"When Richard was at the siege of this castle (Chalus), an arbalester standing on the wall, and seeing his time, charged his steel bow with a square arrow, or quarrel.

"King Joha was espied by a very good arcuballister, who said that he would soon dispatch the cruel tyrant."—Camden: Remains.

ar-bi-tēr, \* ar-bi-trōure, s. [In Fr. arbitre; Sp., Port., & Ital. arbitro; Lat. arbiter = (1) one who comes to a place, a visitor, an intruder, an eye-witness, (2) an umpire, (3) a manager. By some derived from ar (ad) = to, and the root bit = to come or go; but Wedgwood connects it with the Finnish arpa = a lot, believing the original meaning was s'lot'a man," or soothsayer.]

I. Of persons:

1. Law and Ord. Lang.: An arbitrator, a person chosen, in most cases by mutual agreement, to decide between contending parties who do not wish to go to law. Now the term used is ARBITRATOR (q.v.).

"He would put himself into the king's hands, and make him arbiter of the peace."—Shakspeare.

2. One who is so much raised above his fellows that law cannot, for the times at least, reach him, and who has therefore the power of absolutely deciding questions affecting the property and even the lives of others.

"But swear, impartial arbiters of right: Swear to stand neutral, while we fight." Pope: Homer's Odyssey, bk. xviii. 64-5.

ARBALESTENA. (Chateau de Pierrefonds.)

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, eire, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unīte, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē. ey = ā. qu = kw.

II. Of things. Fig.: That which acts with uncontrolled influence and on a great scale.

"Next him high arbiter  
Chance governs all."  
Milton: P. L., ll., 909.

ar-bi-trā-ble, a. [Lat. arbitror = to observe, v. l. . . . to judge; Eng. -able. In Sp. arbitrable.]

1. Arbitrarily, settled by the will; voluntarily.

"... offerings bestowed upon God by the people, either in such arbitrable proportion as their own devotion moveth them, or as the laws or customs of particular places do require them."—Spelman.

2. Determinable.

"The value of moneys or other commodities is arbitrable according to the sovereign authority and use of several kingdoms and countries."—Sp. Hall: Cases of Conscience, Dec. 1, Case 1.

\* ar-bi-trā-ge, s. [Fr.] Arbitration. (Sir William Temple.) (Worcester.)

ar-bit-ra-mēt, ar-bit-rē-mēt, s. [From Low Lat. arbitramentum; Lat. arbitror = to observe, to judge.]

A. Ordinary Language:

I. Of persons or other intelligent beings:

1. Power or liberty of deciding; choice, decision, determination.

"... to stand or fall  
Free in thine own arbitrement it lies."  
Milton: P. L., bk. viii.

2. Compromise.

"Lukewarm persons think they may accommodate points of religion by middle ways and witty reconcilments, as if they would make an arbitrement between God and man."—Bacon: Essays, Civ. and Mor., chap. iii.

II. Of things (Fig.): The final decision of a case, question, controversy, or struggle by the sword, by natural law, or in some similar way.

"... a people who had challenged the arbitrament of the sword."—Mr. Forsyth, M.P., Parl. Deb., Times, 17th Feb., 1877.

"The supreme importance of these characters has been proved by the final arbitrament of the battle for life."—Darwin: Descent of Man, pt. 1, chap. iv.

B. Law: The award given by arbitrators.

ar-bi-trā-ri-ly, adv. [Eng. arbitrary; -ly.] Agreeably to one's own will or caprice without reference to the rights or the feelings of others; despotically, tyrannically.

"But the power of arbitrarily taking away the lives of men is infinitely less likely to be abused than the power of arbitrarily taking away their property."—Macaulay: Hist. Eng., chap. xxiii.

ar-bi-trā-ri-ness, s. [Eng. arbitrary; -ness.] The quality of being arbitrary, despotical, or tyrannical.

"Self-regarding or dissocial moral qualities . . . 8. Arbitrariness."—Bowring: Bentham's Table of the Springs of Action. Works, vol. 1, p. 198.

\* ar-bi-trā-r-i-ōūs, a. [Lat. arbitriarius = (1) pertaining to arbitration; (2) arbitrary.] Arbitrary, despotical, tyrannical.

"These are standing and irrefragable truths; such as have no common existence or arbitrary dependence upon any will or understanding whatsoever."—Norris.

\* ar-bi-trā-r-i-ōūs-ly, adv. [Eng. arbitriarius; -ly.] In an arbitrary manner.

"Where words are imposed arbitrarily, distorted from their common use, the mind must be led into misprision."—Glanville.

ar-bi-trā-rī, a. [In Fr. arbitraire; Sp., Port., & Ital. arbitrario; Lat. arbitriarius = (1) pertaining to arbitration; (2) arbitrary, depending on the will; (3) unfixed, uncertain.]

A. Ordinary Language:

1. According to one's own will or caprice and probably not defensible at the bar of reason or justice; capricious.

"It may be perceived with what insecurity we ascribe effects, depending on the natural period of time, unto arbitrary calculations, and such as vary at pleasure."—Broune: Vulgar Errors.

"But the detailed description of the lights on the Roman epars, in the Sabine war of 508 B. C., given by Dionysius, has all the appearance of arbitrary fiction."—Lewis: Early Rom. Hist., chap. v., § 11.

2. Despotical, tyrannical. (Applied to power, the deeds of a government, or to the character of a ruler.)

"The thought of establishing arbitrary power, by calling in the aid of foreign arms. . . ."  
Macaulay: Hist. Eng., chap. ii.  
". . . had served the most arbitrary of monarchs."  
Ibid., chap. xxiii.

B. Technically:

Law. Arbitrary punishment: (1) A punishment left to the discretion of the judge; (2)

because capital punishments are never so left, therefore it signifies also a penalty not capital.

Arbitrary Consecration of Tithes. [TITHES.]

ar-bi-trā-te, v. t. & i. [In Fr. arbitrer; Prov. Sp., & Port. arbitrar; Ital. arbitrare; Lat. arbitror, -atus = (1) to observe, (2) to judge, (3) to testify, (4) to believe.]

A. Transitive:

1. To judge, to judge of.

"Yet, where an equal poise of hope and fear  
Does arbitrate th' event, my nature is,  
That I incline to hope rather than fear."—Milton.

2. To decide, settle, determine.

"At Coventry, upon Saint Lambert's day;  
There shall your swords and lances arbitrate  
The swelling difference of your settled hate."  
Shakesp.: King Richard II., i. 1.

"Let Heaven's high powers be call'd to arbitrate  
The just conditions of this stern debate."  
Pope: Homer's Iliad, bk. xxii., 823-4.

B. Intransitive: To decide in the capacity of an arbitrator; or, more generally, to decide, to determine.

"... consults and vice-consults, whose business was to keep the Peace and the Cleft in good humour, and to arbitrate in disputes among Englishmen."—Macaulay: Hist. Eng., chap. xxiii.

ar-bi-trā-tion, s. [In Fr. arbitration; Port. arbitrago; Lat. arbitratio = decision, will; from arbitror.] [ARBITRATE.]

A. Ordinary Language:

1. The decision of a case by means of an arbitrator. (B. 1, Law.)

2. Final decision of a matter in dispute or in doubt, without reference to the method by which this is effected.

"... the will  
And arbitration wise of the Supreme."  
Cowper: Task, bk. ii.

"... there was little chance that they would submit to any arbitration that that of the sword."—Macaulay: Hist. Eng., ch. xxiii.

B. Technically:

1. Law: This decision of a case not by a judge of a law court, but by an arbitrator or arbitrators, that is, by a person or persons to whom the contending parties mutually consent to submit their differences. When there are more than one, and they disagree in what is termed their award, a third person, called an umpire, is in general called in to give a final decision. When the arbitrators and umpire do their duty well, their verdict may be enforced by a court of law.

2. Comm. Arbitration of Exchange: The operation of converting the currency of any country into that of a second one by means of other currencies intervening between the two.

arbitration bond.

Law: A bond which is generally entered into by parties wishing to submit their differences to arbitration. It binds them to acquiesce in the award given. (Blackstone: Comment., bk. iii., ch. 1.)

ar-bi-trā-tōr, \* ar-bi-trā-tōre, s. [In Fr. arbitrateur; Sp. & Port. arbitrador. From Lat. arbitrator = a lord, master, or ruler.]

A. Ordinary Language:

I. Of persons:

† 1. A ruler or governor. (Applied by Milton to the Supreme Being.)

"... Though heaven be shut  
And heaven's high Arbitrator sit secure  
In his own strength. . . ."  
Milton: P. L., bk. ii.

2. He who occupies so high a position, for the moment at least, that he can settle disputes as he himself thinks fit, and enforce the award he makes.

"Another Blenheim or Ramilles will make the confederates masters of their own terms, and arbitrators of a peace."—Addison: On the State of the War.

3. A person or even a public body invited or permitted to decide between contending parties who do not wish to go to law. [ARBITRATION.]

"... yet he adviseth that Christian arbitrators be appointed for decision of emergent questions."—Jeremy Taylor: Of Lawfulness. Works (ed. 1889), vol. iii., p. 60.

"Instead of this, the senate is convened, and appears to occupy the position of arbitrator and mediator between the deity and the plebs."—Lewis: Early Rom. Hist., ch. xiii., pt. iii., § 64.

II. Of things: That which finally settles anything.

"And that old common arbitrator, time,  
Will one day end it."  
Shakesp.: Troil. & Cress., iv. 6.  
"Out, idle words, servants to shallow fools!  
Unprofitable sounds, weak arbitrators!"  
Ibid.: Tarquin and Lucrece.

B. Technically:

Law: A person appointed to settle disputes between contending parties who otherwise would probably engage in litigation, if indeed they have not done so already.

"The arbitrator may settle and determine the matters and questions by this Act referred to him, not only in accordance with the legal and equitable rights of the parties as recognized at law or in equity, but also on such terms, and in such manner, in all respects, as he in his absolute and unfettered discretion may think fit, just, and expedient, and as fully and effectually as could be done by Act of Parliament."—Epping Forest Act (1878), 41 & 42 Vict., ch. cxxiii., § 10 (3).

ar-bi-trā-trēss, s. [The fem. form of Eng. arbitrator.] A female arbitrator; an arbitratrix.

ar-bi-trā-trix, s. [Lat. = a mistress, a female ruler.] A female arbitrator, an arbitress. (Beaumont: Psyche, xix. 163.)

\* ar-bi-tre (tre = tēr), v. t. [Fr. arbitrer.] [ARBITRATE.] To decide finally.

"All that shall be declared, ordained, and arbitred, by the forsaid Archbishop, Dukes, and bishoppes."—Hall: Henry VI. (an. 4).

\* ar-bi-trōe, s. [Fr. arbitre = . . . will; Lat. arbitrium.] Free will.

"To destroy the freedom of our arbitre, that is to say, of our free will."—Chaucer: Boecius, bk. v.

ar-bit-rē-mēt, s. [ARBITRIMENT.]

\* ar-bi-trēs, \* ar-by-trēs, s. [The fem. form of arbitror (q.v.).] THE SAME AS ARBITRESS AND ARBITRATRIX. A female who acts as arbiter. (Lit. & fig.)

"Overhead the moon  
Sits arbitress, and nearer to the earth  
Wheels her pole course."—Milton: P. L., l. 788.

\* ar-blaest, s. [ARBALIST.]

ar-bōi-ist, s. [Sp. arbol = a tree.] A word occurring twice in Howell (Dodona's Grove, p. 11, p. 131). An obsolete form of Arborist and Herbalist (both which see).

ar-bōr, \* ar-bōur, \* ar-bēr, \* hēr-bēr, \* hēr-bere, s. [O. Fr. herbier = a herbarium; in O. Eng. herber, erber. It was first confused with A. S. herberge, Icel. herbergi = harbor, shelter, and afterwards from a supposed connection with trees, written arbor, as if from the Lat. arbor = a tree. Properly it is a garden of herbs.] A frame of latticed work, over and around which creeping and clinging plants are turned, so as to form a shady and romantic retreat; a bowser.

ar-bor, s. [Lat. = a tree.]  
I. Bot.: A tree; that is, a vegetable having branches which are perennial, and are supported upon a trunk; in the latter respect differing from a shrub, one characteristic of which is, that its branches proceed directly from the surface of the ground without having a supporting trunk. (Lindley: Introd. to Bot.)  
II. Mechanism:  
1. The axis or spindle of a machine; as, for instance, of a crane or windmill.  
2. That part of a machine which sustains the rest.

Arbor Day, s. A day set apart by legislative enactment or otherwise, for voluntary planting of trees by the people, the purpose being to offset the constant destruction of forests. The custom originated in Nebraska, in 1874, being suggested by Hon. J. Sterling Morton, then Governor of that state, and is now generally observed throughout the States, in nearly all of which the planting is done by school children, with appropriate ceremonies.

arbor Diane, s. (Lit. = the tree of Diana.) A beautiful arborescent appearance presented by silver when precipitated from its nitrate by the addition of mercury.

arbor genealogica. A genealogical tree. [GENEALOGICAL.]

arbor Saturni. [Literally = the tree of Saturn.] An arborescent appearance presented by lead when a piece of zinc is suspended in a solution of acetate of lead.

arbor-vine, s. A species of bind-weed. (Johnson.)

arbor vite, s. [Lit. = the tree of life.]  
1. Bot.: A name given to the trees belonging to the coniferous genus Thuja. T. occidentalis, or American Arbor Vite, is a well-known and valued evergreen found in British gardens.

bōil, bōy; pōut, jōwl; cat, cēll, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shùn; -tion, -sion = shùn. -tions, -sious, -cious = shüs. -ble, -dle, &c. = bēl, dēl.

In Upper Canada it rises to the height of a timber, though with us it is only a shrub.

2. *Anat.*: A dendriform arrangement which appears in the medulla of the brain when the cerebellum is cut through vertically.

**ar'bor-a-ry**, a. [Lat. *arborarius* = pertaining to trees.] Pertaining to a tree or trees.

¶ **ARBOREAL** is now the more common word.

**ar'bor-ā-tōr**, s. [Lat. *arborator* = one who prunes trees.] One who prunes or who plants trees.

"The course and nature of the sap act being as yet universally agreed on, leads our arborators into many errors and mistakes."—*Evelyn*.

**ar'bor-ē-āl**, a. [Lat. *arborēus*]; and Eng. suffix *-al*.] Pertaining to a tree or trees. *Spec.*, living in trees, or climbing trees.

"... a temperature sufficiently high for arborēal Mammalia of the four-handed order."—*Swen.*: *British Fossil Mammals and Birds*, p. 8.

**ar'borēd**, a. [Eng. *arbour*; *-ed*.] Furnished with an arbor. (*Pollok*.)

**ar'bor-ē-ō-us**, a. [In Sp., Port., & Ital. *arborēo*. From Lat. *arborēus* = pertaining to a tree.]

1. Arborescent, becoming or being a tree. (*Louder*: *Cycl. of Plants*; *Gloss*.)

"A grain of mustard becomes arborēo."—*Brown*.  
2. Growing on a tree, as contradistinguished from growing on the ground.

**ar'bor-ēs-ce**, v. i. [Lat. *arborēscō* = to grow into a tree.] To become a tree; to assume a tree-like appearance. to put forth branches.

**ar'bor-ēs-ge-nce**, s. [In Fr. *arborescence*, as if from a Lat. *arborescentia* = a growing into a tree. *arborēscō* = to grow up into a tree.]

1. *Bot.*: The characteristics of a tree, as contradistinguished from those of a shrub or of an herb.

2. *Min. & Chem.*: Dendritic markings on minerals, or a tree-like appearance of chemical substances.

**ar'bor-ēs-cent**, a. [In Fr. *arborescent*, from Lat. *arborēscens*, pr. par. of *arborēscō* = to become a tree; *arbor* = a tree.]

I. *Lit.* (*Bot.*): Properly, growing up into a tree; having a tendency to become a tree, from a shrub becoming a tree; also, less precisely, existing as a tree.

"Fandaneæ are remarkable among arborescent monocotyledons . . ."—*Lindley*: *Nat. Syst. Bot.*, 2nd ed. (1830), p. 361.

"... an arborescent grass, very like a bamboo . . ."—*Darwin*: *Voyage Round the World*, ch. xl.

II. *Fig.* (*Physical Science and Ord. Lang.*):

1. *Gen.*: Having ramifications like a tree.

"They ramify in an arborescent manner."—*Todd & Roseman*: *Physiol. Anat.*, vol. II., p. 274.

2. *Specialty*:

(a) *Min.*: Dendritic. Native copper is composed of this form. [DENORITIC.]

(b) *Zool.*: The Arborescent Starfish: A species of starfish, the *Asterias Caput Medusæ*.

\* **ar'bō-rēt** (1), s. [Lat. *arbor* = a tree.] A small tree, a shrub.

"No arboret with painted blossoms drest,  
And smelling sweets, but there it might be found  
To had out faire."—*Spenser*: *F. Q.*, II. vi. 12.

\* **ar'bō-rēt** (2), s. [Ital. *arborēto*.] A small grove, a place planted or overgrown with trees or shrubs.

"Among thick wovon arborets, and flowers."  
*Milton*: *P. L.*, IX. 457.

**ar'bō-rē-tūm**, s. [Lat. = a plantation, a vineyard.] A place in which the scientific culture of trees and shrubs is carried on; a botanical garden for trees, or that part of a botanical garden especially devoted to arboriculture.

\* **ar'bōr-iō-āl**, a. [Lat. *arbor* = a tree; Eng. suffix *-īal*.] Pertaining to trees.

"That arborical discourse."—*Howell*: *Letters*, IV. 22.

**ar'bōr-ī-cūl-tūr-ī-āl**, a. [Eng. *arboriculture*; *-al*.] Pertaining to the culture of trees. (*Louder*.)

**ar'bōr-ī-cūl-tūre**, s. [In Fr. *arboriculture*, from Lat. *arbor* = a tree, and *cultura* = cultivation.] The culture of trees. (*Webster*.)

**ar'bōr-ī-cūl-tūr-īst**, s. [Eng. *arboriculturist*]; *-ist*.] One who cultivates trees. (*Louder*.)

**ar'bōr-ī-form**, a. [Lat. *arbor* = a tree, and *forma* = form.] Having the form of a tree. (*Webster*.)

\* **ar'bōr-īst**, s. [Fr. *arboriste*.] One who makes a special study of trees.

"The mulberry, which the arborists observe to be long in the getting his buds."—*Howell*: *Vocal Forest*.

**ar'bōr-ī-zā-tion**, s. [Fr. *arborisation*.]

*Min. & Geol.*: The process of forming dendritic markings on a simple mineral or on a rock. (*Webster*.)

**ar'bōr-ize**, v. t. [In Fr. *arboriser*.] To form the appearance of a tree; to make dendritic markings on some simple mineral or rock. (*Webster*.)

**ar'bōr-ōūs**, a. [Lat. *arborēus* = of or pertaining to a tree.] Full of trees; formed by trees.

"Under shady arborous roof."  
*Milton*: *P. L.*, v. 157.

**ar'būs-cle** (*cle* = *el*), s. [Lat. *arbuscula* = a small tree.]

¶ Sometimes the Latin term *arbusculus* is employed. It is not so classical as *arbuscula*. (*Lindley*.)

**ar'būs-cūl-ar**, a. [Eng. *arbuscule*; *-ar*.] Pertaining to a small tree. (*Da Costa*.)

**ar'būs-tive**, a. [Lat. *arbutivus*, from *arbutum* (q.v.).] Planted with shrubs or trees; containing copes of shrubs or trees. (*Bartram*.)

**ar'būs-tūm**, s. [In Fr. *arbuté*; Sp., Port., & Ital. *arbuto*; Lat. *arbutum*, a contraction of *arbutetum* = (1) a plantation, (2) a tree; from *arbor*, a tree.]

*Bot.*: A shrub, distinguished from a tree by the character that its branches rise directly from the ground without being supported on a trunk. It is called also FRUTEX. (*Lindley*.)

**ar'bū'te**, s. [ARBUSCUS.]

**ar'bū'tē-an**, a. [Lat. *arbuteus*.] Pertaining to the arbutus.

"Arbutean harrows, and the mystick van."  
*Evelyn*: *Virgil*.

**ar'bū'tūs** (*Lat.*), **ar'bū'te** (*Eng.*), s. [In Dut. *arbutus*; Fr. *arbutier*; Ital. *arbuto*; from Lat. *arbutus* = the wild strawberry-tree; *arbutum*, its fruit: from *arbor* = a tree, or, according to Theis, from the Celtic or rough austere, and *bois* = a bush.]

A. *Ord. Lang.* (*Of the forms Arbutus and Arbuta*.) Any plant of the genus *Arbutus*: specially, the *A. unedo*, or strawberry-tree, described under B.

"There have been in the neighbourhood of Killarney specimens of the *arbutus* thirty feet high and four feet and a half round."—*Maceaulay*: *Hist. Eng.*, chap. VI. (Note).

"In falling, elatched the frail arbutu."  
*Longfellow*: *To a Child*.

ARBUSCUS UNEDO (STRAWBERRY-TREE).  
1. Flower. 2. Ovary and stamen. 3. Stamen enlarged. 4. A branch in fruit. 5. Section of fruit. (Figures 1 and 4 one-third natural size.)

B. *Bot.* (*Of the form Arbutus*.) Strawberry-tree. A genus of plants belonging to the

order Ericaceæ (Heath-worts). A species, the *A. unedo*, or Austere Strawberry-tree, is found, apparently wild, in the neighbourhood of the Lakes of Killarney. It has panicles of large, pale greenish-white flowers and red fruit, which, with the evergreen leaves, are especially beautiful in the months of October and November.

\* **ar'by-trēs**, s. [ARBITRESS.]

**arc**, \* **arck**, \* **ark**, s. [In Fr. *arc* = an arch, an arc; Prov. *arc*: from Lat. *arcus* = a bow, . . . anything arched, a mathematical arc. Essentially the same word as the Eng. ARCH (q.v.).]

A. *Ordinary Language*:

1. An arch.

"Statues, and trophies, and triumphal arcs."  
*Milton*: *P. E.*, bk. IV.

"Turn arcs of triumph to a garden gate."  
*Pope*: *Mor. Ess.*, Ep. 4.

2. [In the geometric sense of the word.] [See B.] (*Lit. and Fig.*)

"Your loss is rarer: for this star  
Rose with you thro' a little arc  
Of heaven."  
*Tennyson*: *To J. S.*

"The circle of human nature, then, is not complete without the arc of feeling and emotion."—*Tyndall*: *Prog. of Science*, 3rd ed., v. 104.

B. *Technically*:

1. *Geom.*: A portion of the circumference of a circle, cut off by two lines which meet or intersect it. Its magnitude is stated in degrees, minutes, and seconds, which are equal to those of the angle which it subtends. Hence, counted by degrees, minutes, and seconds, the arc of elevation and the angle of elevation of a heavenly body are the same, and the two terms may be used in most cases indifferently. The straight line uniting the two extremities of an arc is called its chord.

"Their segments, or arcs, for the most part exceeded not the third part of a circle."—*Newton*: *Opticks*.

*Equal arcs* must come from circles of equal magnitude, and each must contain the same number of degrees, minutes, and seconds as the others.

*Similar arcs* must also each have the same number of degrees, minutes, and seconds, but they belong to circles of unequal magnitude.

*Concentric arcs* are arcs having the same centre.

2. *Math. Geog.*: An arc of the earth's meridian, or a meridional arc, is an arc partly measured on the surface of the earth from north to south, partly calculated by trigonometry. Such arcs have been measured in Lapland; in Peru; from Dunkirk, in France, to Barcelona, in Spain; at the Cape of Good Hope, and other foreign parts; and in our own island, from Shanklin Down, in the Isle of Wight, to Balta, in Shetland. It was by these measurements that the earth was discovered to be an oblate spheroid. (*Airy's Pop. Astron.*, and *Herschel's Astron.*)

3. *Astron.* (*For arc of elevation, see ANGLE. For Diurnal Arc, Nocturnal Arc, &c., see DIURNAL, NOCTURNAL, &c.*)

4. *Mech. Phil.*: Arc of vibration (in a pendulum): The arc in which it vibrates.

5. *Electricity*. *Voltoic arc*: A luminous arc, which extends from one pencil of charcoal to another, when these are fixed to the terminals of a battery in such a position that their extremities are one-tenth of an inch apart. (*Galot*: *Physics*, transl. by Atkinson, 3rd ed. § 718.)

**ar'ca**, s. [Lat. *arca* = a chest.] A genus of Coniferiferous Molluscs, the typical one of the family Arcada. The shell is strongly ribbed, or cancellated, hinge straight, with very numerous transverse teeth. They are universally distributed, but are commonest in warm seas. They inhabit the zone from low water to 230 fathoms. In 1875, Tate estimated the known recent species at 140, and the fossil ones at 400, the latter commencing with the Lower Silurian rocks. Of the recent species, *A. Noæ*, *A. tetragona*, *A. lactea*, *A. roridatula*, and *A. barbata* occur in Britain. The fossil species are found in the United States, Europe, and Southern India.

† **ar-ca-bū-cē-rō** (e as th), s. [Sp.] A musketeer.

"Here in front you can see the very dint of the bullet  
Fired point-blank at my heart by a Spanish arcabucero."  
*Longfellow*: *Courtship of Miles Standish*, I.

fāte, fāt, fāro, amidst, whāt, fāll, fāther; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, eīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, eūb, cūre, unīte, cūr, rāle, fūll; trȳ, Sȳrian. æ, œ = ē. ey = ā. qu = kw.

ar-ca-dæ, s. pl. [ARCA.] A family of Conchiferous (bivalved) Mollusca. They have the shell regular and equivaive, its hinge with a long row of slender, comb-like teeth. It contains the genera Arca, Cucullæa, Pectunculius, Avicula, Leda, &c. Of those enumerated, all but the Cucullæa have representatives in the British fauna.

ar-câ-de, s. [In Sw. arkad; Ger. arkade; Fr. arcade; Sp. & Port. arcada, Low Lat. arcata; from Class. Lat. arcus = a bow, an arch.] [ARCH.]

Architecture: 1. Properly: A series of arches sustained by columns or piers. They may be open or may be closed by masonry behind; thus the small arches built into the walls of some cathedrals are genuine examples of the arcade proper.

2. An arcade differs from a colonnade in this respect, that while the columns of the former support arches, those of the latter sustain straight architraves. (Gloss. of Arch.)

ARCADE.

"He had probably after the fashion of his craft pled for customers under the arcades of the Royal Exchange."—Macaulay: Hist. Eng., chap. xxi.

With lawns, and beds of flowers, and shades Of trellis-work in long arcades."—Wordsworth: White Doe of Rylstone, iv.

2. Less accurately: The arches and piers dividing the body of a building from its aisles. (Gloss. of Arch.)

3. A long arched gallery lined on both sides with shops. (P. Cycl.)

4. Loosely: Any gallery or passage with shops, though not arched.

ar-cæ-dæd, a. [Eng. arcade; -ed.] Furnished with an arcade. (Penny Mag.) (Worcester's Dict.)

Ar-cæ-di-an, a. & s. [In Ger. & Fr. Arcadien; Lat. Arcadius; from the country Arcadia, said to be named after Arcas, a son of Jupiter and Callisto.]

A. As adjective: Pertaining to Arcadia, a country in the heart of the Peloponnese, the inhabitants of which were reckoned as simple, ignorant, and stupid, but happy.

"The poor, insured to drudgery and distress, Act without aim, think little, and feel less, And nowhere, but in feigned Arcadian scenes, Taste happiness, or know what pleasure means."—Cowper: Hope.

B. As substantive:

1. An inhabitant of Arcadia.

"The Arcadians speak of Jupiter himself."—Cowper: Transl. from Virgil, Æneid, bk. viii.

2. A name sometimes assumed by persons in modern times who imitated or affected to imitate Arcadian simplicity.

"... the wits even of Rome are united into a rural group of nymphs and swains under the appellation of modern Arcadians."—Goldsmith: Politic Learning, chap. iv.

ar-cæ-næ, s. pl. [Pl. neut. of Lat. arcænus.] [ARCANUM.]

ar-cæ-næ, a. [Lat. arcænus = shut up, closed; from arca = a chest.] Hidden, concealed; secret.

"Have I betray'd thy arcæne secrecy?"—Tragedy of Locrine, v. 4.

ar-cæ-nite, s. [From Lat. arcænum duplicatum, one of the names given to it by the alchemists.] The name of a mineral, the same as Apthitalite and Glaserite (q. v.).

ar-cæn-na, s. [Fr. arcenne = ruddle.] A kind of red chalk used by carpenters for marking timber.

ar-cæ-nium, s. [Lat. arcænum, neut. sing. of adj. arcænus, neut. pl. arcæna. In Ger. & Fr. arcænum; Sp., Port., & Ital. arcæno.]

I. Gen.: Anything hidden, a secret. Anything difficult to explore. (Generally in the plural, arcæna = secrets.)

"... which, until traced by Newton up to this their origin, had ranked among the most inscrutable arcæna of astronomy."—Herschel: Astron. (5th ed.), § 220.

II. Specially:

1. Med.: An undivulged remedy, or what passes for such.

2. Alchemy & Old Chem.: A mysterious operation.

aro-bou-tant, arch-bû-tant (ant = ân), s. [Fr. arc-boutant, arc-bouter = to buttress; arc = a bow, an arch; bout = end, extremity.]

Arch.: An abutment. "An arch-formed prop which connects the walls of the upper and central portions of an aisled structure with the vertical buttresses of the outer walls." (Glossary of Architecture.) It is called also a flying buttress, because it passes through the roof of the side aisles.

FLYING BUTTRESSES.

ar-gè-tyr, s. [Lat. and O. Eng. ars = art.] One who learns or teaches art. (Promp. Parv.)

arch (1), arche, s. [In Fr. arche; Sp., Port., & Ital. arco; Low Lat. arca; Class. Lat. arcus = (1) a bow, (2) the rainbow, (3) anything arched or curved, ... a mechanical arc, (4) an architectural arch.] [ARC.]

A. Ordinary Language:

1. An arc of a circle.

"The mind perceives that an arch of a circle is less than the whole circle, as clearly as it does the idea of a circle."—Locke.

II. (In the architectural sense.) [B., I.]

"To build, to plant, whatever you intend, To rear the column, or the arch to bend,"—Pope: Moral Essays, Epistle iv. 47-8.

"Bid the broad arch the dangerous flood contain."—Ibid., 109.

"Arches on arches! as it were that Rome, Collecting the chief trophies of her line, Would build up all her triumphs in one dome,"—Byron: Childe Harold's Pilgrimage, iv. 128.

III. Any object in nature or art which is formed like an architectural arch [B., I.], or is curved like the segment of a circle.

1. Generally:

"It is well once to behold a squall with its rising arch and coming fury, or the heavy gale of wind and mountainous waves."—Darwin: Voyages round the World, chap. xxi., p. 502.

2. Specially:

(a) The rainbow.

"Beholds th' amusive arch before him fly,"—Thomson: Seasons; Spring, 215.

"Triumphal arch that fills't the sky When storms prepare to part."—Campbell: The Rainbow.

[See Triumphal Arch defined under B.]

(b) The vault of heaven, which, to a spectator on the earth, seems to be an arch of infinite span.

"What a grand and majestic dome is the sky! How is that immeasurable arch upheld!"—Hervey: Meditations on the Starry Heavens (1747).

"Fanning his temples under heaven's blue arch."—Wordsworth: Excursion, bk. viii.

B. Technically:

I. Arch.: A series of wedge-shaped stones or bricks, so arranged over a door or window in an edifice for habitation, or between the piers of a bridge, as to support each other, and even bear a great superincumbent weight.

The stones and bricks of a truncated wedge shape used in building arches are called voussoirs. The sides of an arch are called its haunches or flanks, and by old English writers of the sixteenth century its haunc. The highest part of the arch is called its crown, or by the old English authors the scheme or skeen, from the Italian schiena. The lowest voussoirs of an arch are called springers, and the central one which holds the rest together the keystone. The under or concave side of

the voussoirs is called the intrados, and the outer or convex one the extrados of the arch. A chord to the arch at its lower part is called its span, and a line drawn at right angles to this chord, and extending upwards to its summit, is called its height.

The impost of an arch is the portion of the pier or abutment from which the arch springs. If the height of the crown of an arch above the level of its impost is greater than half the span of the arch, the arch is said to be surmounted. If, on the contrary, it is less, then the arch is said to be subsided.

The curved arch was known to the Assyrians and the Old Egyptians. Sir J. G. Wilkinson considers that it existed in brick in the reign of Amenoph I., about B.C. 1540, and in stone in the time of Psammethicus II., B.C. 600. The evidence is derived from the ruins of actual buildings, but paintings appear to carry the arch back to about 2020 B.C. There is no mention of the genuine arch in Scripture, the term "arches," in Ezek. xl. 16, being a mistranslation.

The arch was brought into extensive use by the Romans, and everywhere prevailed till the twelfth century A.D., when the arch pointed at the apex, and called in consequence the pointed arch—the one so frequently seen in Gothic architecture—appeared in Europe as its rival. The forms of both curved and pointed arches may be indefinitely varied. Of

SEMI-CIRCULAR ARCH.

HORSE-SHOE ARCH.

the former may be mentioned the horse-shoes arch, a name which explains itself, and the foil arch, from Lat. folium = a leaf, of which there are the trefoil, the cinquefoil, and the multi-foil varieties, so named from the plants after which they are modelled.

Other arches are the pointed one; the equilateral one, when the centres of the circles whose intersection constitutes the pointed arch coincide with the angular points at the two sides of the base; the lancet arch, when the centres fall beyond these points; the drop arch, when they fall within the base; and the segmented pointed arch, the sides of which constitute segments of circles containing less than 180°. Besides these are several other varieties of arch distinguished by their respective forms. (Gloss. of Arch., &c.)

POINTED ARCH.

Triumphal arch: An arch erected in commemoration of some triumph. The idea has been borrowed from the ancient Romans, who erected many such structures, as those of Augustus, Titus, Trajan, and other emperors.

II. Anat. The word arch is employed to designate various portions of the mechanism existing in the body.

"... its neural arch."—Todd & Bowman: Physiol. Anat., ii. 597.

"... the first visceral arch, ... the second visceral arch, ... the third visceral arch."—Ibid., p. 599.

Arches, Court of. [So named from the fact that it originally met in the church of St. Mary-le-Bow (Lat. Santa Maria de arcibus), literally, "of bows" or "arches," by which is meant that the roof or steeple was supported by arches. The name was retained after the court was removed, first to Doctors' Commons and then to Westminster Hall.] An ecclesiastical court of appeal for the Archbishopric of Canterbury. It has proper jurisdiction over thirteen "peculiar" parishes in London belonging to the Archbishop of Can-

bol, boy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect. Xenophon, exist. -ian, -cian. -tlan = shan. -tion, -sion = shün; -tion, -sion = zhün. -tious, -sious, -cious = shüs. -ble, -dle, &c. = bel, &c.

terbury; but as the judge of the court, who is called Dean of Arches, is also the principal officer under the Archbishop, he now receives and determines appeals from the sentences of all inferior ecclesiastical courts within the province. Combined with it, or annexed to it, is the Court of Peculiarities. [PECULIAR.] Appeal from both of these ecclesiastical jurisdictions originally lay to the King in Chancery, afterwards it was to the Judicial Committee of Privy Council. (*Blackstone, Wharton, &c.*)

**arch-brick, s.** A brick of a wedge shape, suitable to be employed in the building of an arch.

**arch-buttant, s.** [ARCHBOUTANT.]

**arch-buttress, s.** The same as arch-buttant, a flying arch. [ARCHBOUTANT.]

**arch-like, a.** Like an arch.  
"At this period the arteries run in arch-like branches."—*Darwin: Descent of Man*, pt. 1, ch. 1.

**arch-stone, s.** A stone belonging to an arch.  
"... the weight of any one arch-stone."—*Penny Cyclop.*, II. 261.

**arch-way, s.** A way under an arch.

**arch-wayed, a.** Provided with a way which runs under an arch. (*Tweeddel.*) (*Worcester's Dict.*)

**arch-work, s.** Work with the object of erecting arches. (*Jodrell.*) (*Worcester's Dict.*)

**arch (2), s.** [ARCHE (2), ARK.]

**arch, v. t. & i.** [From the substantive. In Fr. *arquar*; Sp. and Port. *arquear*; Ital. *archeggiare*.]

**A. Transitive:**  
1. To cover with an arch or arches.  
"The proud river, which makes her bed at her feet, is arched over with such a curious pile of stones."—*Boswell.*  
2. To form into an arch or arches.  
"The stately sailing swan  
Gives out his snowy plumage to the gale,  
And arching proud his neck, with oary feet  
Bears forward Greece."  
*Thomson: Seasons: Spring.*

**B. Intransitive:** To assume the form of an arch, or of a series of arches.  
"The nations of the field and wood  
Build on the wave, or arch beneath the sand."—*Pope.*

**arch, a** [A corrupted form of *orgh*. In A.S. *earh* = inert, weak, timid, evil, wretched; Sw. *eris* = chief, first, arrogant; *arg* = angry, passionate, bitter, shrewd, vehement; Dan. *orrig* = malicious, spiteful, wicked; Dut. *arglistig* = crafty, cunning; Ger. *arg* = bad, mischievous, cunning, severe. *Mahn* connects it with the Gr. ἀρχός (*archos*) = a chief, a commander. Richardson and some others considered this the correct etymology; whilst Johnson, adopting this view also alternatively, suggested that the word might possibly be from *Archy*, jester to James I. It is closely akin to *arrant*.] Sly, cunning; sometimes, but not always combined with the sense of mischievous mischief, or waggishness. *Used*—

(a) *Of persons:*  
"Great, above all that Christian met with after he had passed through Vanity Fair, one By-ends was the arch one."—*Bunyan: P. P.*, pt. II.  
(b) *Of a word spoken:*  
"... after his comick manner spoke his request with so arch a leer that . . ."—*Tatler*, No. 198.  
"And freak put on, and arch word dropped . . ."—*Wordsworth: Excursion*, bk. VII.

**arch, s., adj., and in composition.**  
**A. As substantive.** [From Gr. ἀρχός (*archos*) = a leader, a chief, a commander.] [See B., etym.] A chief, a leader.  
"My worthy arch and patron comes to-night"  
*Shakspeare: King Lear*, II. 1.

**B. As adjective:** Either an independent word, or in composition.  
*In compos.* [Gr. ἀρχή (*archē*) an inseparable prefix from the same root as ἀρχός (*archos*) = chief; ἀρχω (*archō*) = to be first, to be a leader, a commander; ἀρχή (*archē*) = beginning. In Lat. *archi*; Low Lat. and Ital. *arci*; Port. and Sp. *arce*; Fr. *archi*; G. H. Ger. *arci*; M. H. Ger. *erze*, *ers*; H. Ger. *erz*; Dut. *erz*; Dan. *ark*, *arki*; Sw. *erke*; A.S. *arce*.] Chief, principal, highest, most eminent, of the first order. It is used—

(c) *As an independent word.*  
"There is sprung up  
An heretick, an arch one, Crammer."  
*Shakspeare: Henry VIII.*, III. 2

"The most arch deed of piteous massacre,  
That ever yet this land was guilty of."  
*Ibid.: Richard III.*, IV. 2.  
(b) In composition, as a prefix to many words derived from Greek or any other language, as *archangel*, *archbishop*, *archduke*.

¶ The compounds of *arch* are indefinite in number. Those which immediately follow generally retain the hyphen; the others more commonly omit it, and are therefore here arranged as independent words.

**arch-abomination, s.** A chief abomination; one more loathsome than others of a more ordinary kind. (*Everett.*)

**arch-apostate, s.** An apostate who occupies a more conspicuous place, or stands out more prominently than others who have abandoned the faith. *Spec.*, Satan. (*Webster.*)

**arch-apostle, s.** A chief apostle.  
"That the highest titles would have been given to St. Peter, such as arch-apostle, supreme of the apostles, or the like."—*Trapp: Popery Truly Stated*, pt. I.

**arch-architect, s.** The supreme Architect.  
"Till ever believe that the Arch-architect  
With all these fires the heavenly arches deckt  
Only for show."  
*Bysshe: Du Bartas.*

**arch-beacon, s.** The chief beacon.  
"You shall win the top of the Cornish arch-beacon  
Halsborough, which may for prospect compare with  
Rama in Palestina."—*Grove.*

**arch-botcher, s.** Sarcastically, the chief botcher.  
"Thou, once a body, now but air,  
Arch-botcher of a palm or prayer."  
*Sp. Corbett to the Ghost of R. Wisdom.*

**arch-buffoon, s.** One who plays the buffoon above others. (*Scott.*)

**arch-builder, s.** The chief builder.  
"Those excellent arch-builders, of the spiritual temple of the Church, I mean the Prophets and Apostles."  
*Harmer: Tr. of Beza's Serms.*, p. 9.

**arch-butler, s.** The chief butler. An officer of the old German or Holy Roman empire. It was his special function to present the cup to the emperor on great occasions. He was called also arch-cupbearer, or arch-skinker (in Ger. *ers schenke*). The office was filled by the king of Bohemia.

**arch-chamberlain, s.** A chief chamberlain. An officer of the German empire with functions like those of the great chamberlain here. The Elector of Brandenburg was so designated by the golden bull under the old German empire.

**arch-chancellor, s.** [ARCHCHANCELLOR.]

**arch-chanter, s.** The chief chanter in a church. (*Henry.*)

**arch-chemic, arch-chymic, a.** Producing chemical effects on an unparalleled scale of magnitude and importance.  
"The arch-chymic sun, so far from us remote,  
Produces, with terrestrial humour mix'd,  
Here in the dark so many precious things  
Of colour glorious, and effect so rare!"  
*Milton: P. L.*, bk. III.

**arch-city, \* arch-citie, s.** A chief city.  
"To that arch-citie of this government."  
*Phin. Fletcher: Purple Island*, II. 44.

**arch-conspirator, s.** A chief conspirator.  
"Severian, the grand adversary and arch-conspirator against Chrysothem."—*Maunderell: Journey*, p. 13.

**arch-count, s.** A chief count. A title formerly given to the Earl of Flanders on account of his great wealth and power.

**arch-critic, \* arch-critick, s.** A chief critic.  
"... the arch-critic of the sacred muses."—*Tr. of Boccacini* (1626), p. 167.

**arch-cupbearer, s.** A chief cupbearer. [ARCH-BUTLER.]

**arch-dapifer, s.** [ARCHIDAPIFER.]

**arch-defender, s.** A chief defender.  
"Nay, drunkenness hath got an arch-defender,  
Yea, more than that, a principal commandet."  
*Ear. Eng. Text Soc. (ed. Cooper)*, vol. 46-48, *Satira*, v. 3, ll. 2, 115.

**arch-divine, s.** A chief divine; that is, a chief clergyman or theologian.  
"Georgius Wicellius, one of his own arch-divines, exclaims against it and all such rash monastical vows."  
*Burton: Anac. of Mel.*, p. 287.

**arch-enemy, s.** [Eng. *arch*; *enemy*.] A principal enemy; specially, Satan.  
"To whom the arch-enemy,  
And thence in heaven called Satan."  
*Milton: P. L.*, bk. I.

**arch-felon, s.** A chief felon.  
"Which when the arch-felon saw,  
Due entrance he disdained."  
*Milton: P. L.*, bk. IV.

**arch-fiend, s.** A chief fiend.  
"Whom thus answer'd the arch-fiend . . ."  
*Milton: P. L.*, bk. I.

**arch-flamen, s.** [From Lat. *flamen* or *flamen*, a priest of one particular deity; *flum* = a thread or fillet; the latter worn by flamen.] A chief flamen; that is, a chief priest of any particular deity.  
"In lesser figures are represented the Satrapes or Persian nobility, who with their arms stand on one side of those majestic figures; and on the other, the magi or arch-flamens, some of which hold lamps, others censers or perfuming-pots, in their hands."—*Sir T. Herbert: Trav.*, p. 143.  
"The Roman Gentiles had their altars and sacrifices, their arch-flamens and vestal virgins."—*Boswell: Lett.*, II. 11.

**arch-flatterer, s.** [Eng. *arch*; *flatterer*. In Fr. *archiflatteur*.] A chief flatterer; one who flatters above all others.  
"... the arch-flatterer, which is a man's self."  
*Bacon: Ess. of Fraike.*

**arch-foe, s.** A chief foe. (*Milton.*)

**arch-fool, s.** A fool above others.

**arch-founder, s.** A chief founder.  
"Him, whom they feign to be the arch-founder of prelaty, St. Peter."—*Milton: Reason of Ch. Gov.*, I. 2.

**arch-god, s.** A chief god, or the chief god.  
"Homer knows nothing of Uranus, in the sense of an arch-god anterior to Kronos."—*Grote: Hist. Greece*, pt. I, ch. 1.

**arch-governor, \* arch-gouverneur, s.** A chief governor.  
"The arch-governour of Athens took me by the hand."  
*Brewer: Lingua*, II. 4.

**arch-heresy, s.** The greatest heresy.  
"He accounts it blasphemy to speak against any thing in present vogue, how vain or ridiculous soever, and arch-heresy to approve of any thing, though ever so good and wise, that is laid by."  
*Baxter: Characters.*

**arch-heretic, s.** [Eng. *arch*; *heretic*. In Fr. *archihérétique*.] A chief heretic.  
"From their pulpits they poured out execrations against heresy and the arch-heretic, Henry of England."  
*Froude: Hist. Eng.*, vol. IV, pp. 40, 41.

**arch-hypocrite, s.** A chief hypocrite. One hypocritical above all others.  
"Alexius, the Orrelian emperor, that arch-hypocrite and grand enemy of this war."  
*Fulter: Holy War*, p. 42.

**arch-magician, s.** A chief magician.  
"Lying wonders wrought by that arch-magician, Apollonius."—*Spenser: On Prodiges*, p. 223.

**arch-marshal, s.** [Eng. *arch*; *marshal*. In Fr. *archimarschal*; Ital. *archimarsciallo*.] A chief marshal, like our field-marshal.

**arch-mock, s.** A mock or mocking of a pre-eminently insulting character.  
"Oh, 'tis the spite of hell, the fiend's arch-mock,  
To lip a wanton in a secure chock,  
And to suppose her chaste!"  
*Shakspeare: Othello*, IV. 1.

"Freedom'd by God—by man secur'd,  
And that last act, though not thy worst,  
The very Fiend's arch-mock."  
*Byron: Ode to Napoleon.*

**arch-monarchy, s.** A leading monarchy.  
"... the world's arch-monarchies aptly to compare."  
*Fulter: Worthies: Miscell. (Cadwallar)*, vol. I, p. 47.

**arch-pastor, s.** The chief pastor.  
"The Scripture speaketh of one arch-pastor and great shepherd of the sheep, exclusively to any other."  
*Barrow: On the Pope's Supremacy.*

**arch-philosopher, s.** A chief philosopher. A philosopher of the first reputation.  
"It is no improbable opinion, therefore, which the arch-philosopher was of, that the chiefest person in every household was always as it were a king."  
*Hooker.*

**arch-pillar, s.** A chief pillar; the principal pillar of a building.  
"That which is the true arch-pillar and foundation of human society, namely, the purity and exercise of true religion."—*Harmer: Tr. of Beza's Serms.*, p. 234.

**arch-poet, s.** A chief poet; a poet laureate.  
"He was then saluted by common consent with the title of 'arch-poet,' or arch-poet, in the style of those days; in ours, poet laureat."  
*Pope: The Post Laureat.*

fate, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, er, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unīte, oūr, rāle, fūll; trý, Sýrian. æ, œ = ē; ð = ð. qu = kw.

**arch-politician, s.** A chief politician; a politician standing out more prominently than others.

"He was indeed an *arch-politician*."—*Bacon*.

**arch-pontiff, s.** A chief pontiff. *Spec.*, the Pope. (*Burke*.)

**arch-prelate, s.** A chief prelate.

"May we not wonder that a man of St. Basil's authority and quality, and *arch-prelates* in the house of God, should have his name far and wide called in question?"—*Hooker*.

**arch-presbyter, s.** [Eng. *arch*; *presbyter*. In Fr. *archipêtre*, *arcipêtre*; Lat. *archipresbyter*; Gr. *ἀρχιεπίσκοπος* (*archipresbuteros*)] A chief presbyter.

"As simple deacons are in subjection to presbyters, according to the canon law; so are also presbyters and *arch-presbyters* in subjection to these archdeacons."—*Aylife: Paragon*.

**arch-presbytery, \* arch-preistre, \* arch-prestrie, s.** [Eng. *arch*; *presbytery*. In Fr. *archipresbytériat*, *archiprêtre*; Ital. *archipresbiterato*, *arcipretato*.]

I. A chief presbytery. *Spec.*:

\* I. A dignity in collegiate churches. (*Scott*.)  
\* Votaries patrons of the said *arch-preistre* and college kirk of Dunbar.—*Acts Chas. 1*.  
\* 2. A vicarage.  
\* . . . the *archpreistre* or vicarage of Dunbar.—*Acts Jas. VI* (1606).

¶ At an early period the *arch-priests* or *arch-presbyters* in a cathedral church acted as vicars to the bishop; afterwards they became the same as rural deans. (*Jamieson*.)  
II. Presbytery claiming too extensive and too lordly a power of domination.  
"The government of the kirk we despised" not, but their imposing of that government upon us; not presbytery, but *arch-presbytery*, classical, provincial, and diocesan presbytery, claiming to itself a lordly power and superintendency, both over flocks and pastors, over persons and congregations no way their own."—*Milton: Ecce, 1 xlii*.

**arch-priest, s.** [Eng. *arch*; *priest*. In Fr. *archipêtre*, *archiprêtre*; Sp. & Port. *arcipreste*.] A chief priest.  
"The word *deaconus* was extended to an ecclesiastical dignity which included the *arch-priests*."—*Aylife: Paragon*.

**arch-priesthood, s.** [Eng. *arch*; *priesthood*. In Ital. *arcipretato*.] Chief priesthood; the office or dignity of an arch-priest or chief priest.  
"One *arch-primate* or Protestant pope."—*Milton: Reason of Ch. Gov., 1. 6*.

**arch-primat, s.** The chief primate, if those, all of whom are primates, or first in rank, can have a chief.  
"The *arch-prophet*, or St. John Baptist."—*Warton: Hist. Eng. Poetry, iii. 90*.

**arch-prophet, s.** [Eng. *arch*; *prophet*. In Fr. *archiprophète*.] A chief prophet.  
"The *arch-prophet*, or St. John Baptist."—*Warton: Hist. Eng. Poetry, iii. 90*.

**arch-Protestant, s.** A chief Protestant; a Protestant standing prominently out from among his competers.  
"These sayings of these *arch-Protestants* and master ministers of Germany."—*Stapleton: Fort of the Faith, p. 6*.

**arch-publican, s.** A chief publican.  
"The *arch-publican* Zaccheus . . ."—*Sp. Hall: Cases of Conscience, 1. 7*.

**arch-rebel, s.** A chief rebel.  
"Dillon, Muskerrey, and other *arch-rebels*."—*Milton: Art. of Peace between the E. of Orm. and the Irish*.

**arch-swindler, s.** A more notorious swindler than all others.  
"Many of the persons named by this *arch-swindler* as having been concerned in these transactions deny the truth of his statements."—*Daily Telegraph, Oct. 6, 1877*.

**arch-traitor, s.** [Eng. *arch*, *traitor*; Fr. *arch-traitor*.] A chief traitor; one who has stood forth more prominently than others as a traitor.  
"It was reasonable to expect that a strict search would be made for the *arch-traitor*, as he was often called."—*Macaulay: Hist. Eng., ch. v*.

**arch-treasurer, s.** [Eng. *arch*; *treasurer*. In Fr. *archtrésorier*.] A chief treasurer.  
"The Elector of Hanover claims the post of *arch-treasurer*."—*Guthrie*.

**arch-treasurership, s.** The chief treasurership; the office of the chief treasurer. (*Collins: Peetrage*.)

**arch-tyrant, s.** A chief tyrant; one invested with more power to tyrannize than

others, and who takes advantage of his opportunities to act despotically.

"As every wicked man is a tyrant, according to the philosopher's position; and every tyrant is a devil among men; so the devil is the *arch-tyrant* of the creatures; he makes all his subjects errand vassals, yes, chained slaves."—*Sp. Hall: Rom., p. 23*.

**arch-villain, s.** A chief villain; a person villainous above all others.

"Yet an *arch-villain* keeps him company."—*Shakespeare: Timon of Athens, v. 1*.

**arch-villany, s.** Villany at the time unparalleled.

"All their *arch-villanies*, and all their doobles."—*Bacon and Fletcher: Wom. Prize, iii. 4*.

**ar-chā'-ān, \* ar-chāi'-ān, a.**

*Genl.*: Characteristic of, or pertaining to the earliest period or strata recognized by geologists.

**ar-chā-ōg'-ra-phŷ, s.** [Gr. *ἀρχαίος* (*archaios*) = from the beginning or origin, ancient; and *γραφῆ* (*graphē*) = a writing, a description.] A writing about, or a description of, antiquity or antiquities, but not of a character so scientific as to merit the appellation of *archæology*. (*Elmes: Worcester's Dict.*)

**ar-chā-ō-lō'-gī-ān, s.** [Eng. *archæology*; *-ian*.] The same as *ARCHÆOLOGIST* (q. v.). (*J. Murray: Worcester's Dict.*)

**ar-chā-ō-lōg'-īc, \* ar-chāi'-ō-lōg'-īc, \* ar-chāi'-ō-lōg'-īck, ar-chāi'-ō-lōg'-īck, ar-chāi'-ō-lōg'-īc-al, a.** [In Fr. *archéologique*; Gr. *ἀρχαιολογικός* (*archaiologikos*); *ἀρχαίος* (*archaios*) = ancient, and *λόγος* (*logos*) = pertaining to speech; *λόγος* (*logos*) = a word, . . . a discourse.] Pertaining to the science of *archæology*.  
¶ The form *archaiologick* is in Todd's *Johnson's Dictionary*, whilst *archæologic* is absent. The latter term appears in Webster.

**ar-chā-ō-lōg'-īc-al-īy, adv.** [Eng. *archæologic*; *-ally*.] After the manner of *archæologists*. In the way recognised in *archæology*. (*Webster*.)

**ar-chā-ō-lōg'-īc-al-īy, s.** [In Fr. *archéologue*; Gr. *ἀρχαιολόγος* (*archaiologos*); *ἀρχαιολογία* (*archaiologia*) = to discuss antiquities; *ἀρχαίος* (*archaios*) = ancient; *λογιστικός* (*logistikos*) = skilled in calculating or in reasoning.] One who makes a special study of antiquity, and especially of the ruined buildings, the inscriptions, and other relics which it has left behind. There are in London several *archæological societies*, and similar societies exist in all the large cities of Europe and America.

**ar-chā-ō-lōg'-īc-al-īy, s.** [In Fr. *archéologue*; Gr. *ἀρχαιολόγος* (*archaiologos*); *ἀρχαιολογία* (*archaiologia*) = to discuss antiquities; *ἀρχαίος* (*archaios*) = ancient; *λογιστικός* (*logistikos*) = skilled in calculating or in reasoning.] One who makes a special study of antiquity, and especially of the ruined buildings, the inscriptions, and other relics which it has left behind. There are in London several *archæological societies*, and similar societies exist in all the large cities of Europe and America.

**ar-chā-ō-lōg'-īc-al-īy, s.** [In Fr. *archéologue*; Gr. *ἀρχαιολόγος* (*archaiologos*); *ἀρχαιολογία* (*archaiologia*) = to discuss antiquities; *ἀρχαίος* (*archaios*) = ancient; *λογιστικός* (*logistikos*) = skilled in calculating or in reasoning.] One who makes a special study of antiquity, and especially of the ruined buildings, the inscriptions, and other relics which it has left behind. There are in London several *archæological societies*, and similar societies exist in all the large cities of Europe and America.

**ar-chā-ō-lōg'-īc-al-īy, s.** [In Fr. *archéologue*; Gr. *ἀρχαιολόγος* (*archaiologos*); *ἀρχαιολογία* (*archaiologia*) = to discuss antiquities; *ἀρχαίος* (*archaios*) = ancient; *λογιστικός* (*logistikos*) = skilled in calculating or in reasoning.] One who makes a special study of antiquity, and especially of the ruined buildings, the inscriptions, and other relics which it has left behind. There are in London several *archæological societies*, and similar societies exist in all the large cities of Europe and America.

**ar-chā-ō-lōg'-īc-al-īy, s.** [In Fr. *archéologue*; Gr. *ἀρχαιολόγος* (*archaiologos*); *ἀρχαιολογία* (*archaiologia*) = to discuss antiquities; *ἀρχαίος* (*archaios*) = ancient; *λογιστικός* (*logistikos*) = skilled in calculating or in reasoning.] One who makes a special study of antiquity, and especially of the ruined buildings, the inscriptions, and other relics which it has left behind. There are in London several *archæological societies*, and similar societies exist in all the large cities of Europe and America.

**ar-chā-ō-lōg'-īc-al-īy, s.** [In Fr. *archéologue*; Gr. *ἀρχαιολόγος* (*archaiologos*); *ἀρχαιολογία* (*archaiologia*) = to discuss antiquities; *ἀρχαίος* (*archaios*) = ancient; *λογιστικός* (*logistikos*) = skilled in calculating or in reasoning.] One who makes a special study of antiquity, and especially of the ruined buildings, the inscriptions, and other relics which it has left behind. There are in London several *archæological societies*, and similar societies exist in all the large cities of Europe and America.

**ar-chā-ō-lōg'-īc-al-īy, s.** [In Fr. *archéologue*; Gr. *ἀρχαιολόγος* (*archaiologos*); *ἀρχαιολογία* (*archaiologia*) = to discuss antiquities; *ἀρχαίος* (*archaios*) = ancient; *λογιστικός* (*logistikos*) = skilled in calculating or in reasoning.] One who makes a special study of antiquity, and especially of the ruined buildings, the inscriptions, and other relics which it has left behind. There are in London several *archæological societies*, and similar societies exist in all the large cities of Europe and America.

**ar-chā-ō-lōg'-īc-al-īy, s.** [In Fr. *archéologue*; Gr. *ἀρχαιολόγος* (*archaiologos*); *ἀρχαιολογία* (*archaiologia*) = to discuss antiquities; *ἀρχαίος* (*archaios*) = ancient; *λογιστικός* (*logistikos*) = skilled in calculating or in reasoning.] One who makes a special study of antiquity, and especially of the ruined buildings, the inscriptions, and other relics which it has left behind. There are in London several *archæological societies*, and similar societies exist in all the large cities of Europe and America.

**ar-chā-ō-lōg'-īc-al-īy, s.** [In Fr. *archéologue*; Gr. *ἀρχαιολόγος* (*archaiologos*); *ἀρχαιολογία* (*archaiologia*) = to discuss antiquities; *ἀρχαίος* (*archaios*) = ancient; *λογιστικός* (*logistikos*) = skilled in calculating or in reasoning.] One who makes a special study of antiquity, and especially of the ruined buildings, the inscriptions, and other relics which it has left behind. There are in London several *archæological societies*, and similar societies exist in all the large cities of Europe and America.

**ar-chā-ō-lōg'-īc-al-īy, s.** [In Fr. *archéologue*; Gr. *ἀρχαιολόγος* (*archaiologos*); *ἀρχαιολογία* (*archaiologia*) = to discuss antiquities; *ἀρχαίος* (*archaios*) = ancient; *λογιστικός* (*logistikos*) = skilled in calculating or in reasoning.] One who makes a special study of antiquity, and especially of the ruined buildings, the inscriptions, and other relics which it has left behind. There are in London several *archæological societies*, and similar societies exist in all the large cities of Europe and America.

**ar-chā-īc, † ar-chā-īc-al, a.** [In Fr. *archaïque*; Gr. *ἀρχαίος* (*archaios*), or *ἀρχαϊκός* (*archaikos*) = old-fashioned; *ἀρχαίως* (*archaios*) = to be old-fashioned; *ἀρχαίος* (*archaios*) = ancient; *ἀρχή* (*archē*) = beginning.] Pertaining to antiquity.

" . . . not devoid of information to the *archaic student*."—*Way: Frag. to Prompt. Paris, 1843, 1. 7*.

"It was engraven on a brass pillar, in Greek characters of an *archaic* form, but, as it appears, was composed in the Latin language."—*Levis: Early Rom. Hist., ch. v. 17*.

"What is sentimental, romantic, *archaic*, or patriarchal in the Homeric politics . . ."—*Gladstone: Studies on Homer, vol. iii, pp. 6, 7*.

**\* ar-chāi'-ō-lōg'-īck, a.** [ARCHÆOLOGIC.]

**\* ar-chāi'-ō-lōg'-īck, s.** [ARCHÆOLOGY.]

**ar'-chā-īsm, s.** [In Ger. *archaism*; Fr. *archaïsme*; Ital. *arcaismo*; Gr. *ἀρχαίος* (*archaios*) = ancient, from *ἀρχή* (*archē*) = beginning.] An obsolete word or idiom which has lingered behind, and appears (though somewhat out of place) in a more modern composition.

**ar'-chā-īst, s.** One who is fond of archaisms. A student of *archæology*.

**ar'-ch-ān-gel, \* ar'-ch-ān-n-gel, s.** [In Sw. *erkeangel*; Dan. *erkeengel*; Dut. *aartangel*; Ger. *archangel*; Fr. *archange*; Sp. *arcangel*; Ital. *arcangelo*; Lat. *archangelus*; Gr. *ἀρχαγγέλος* (*archangelos*); *ἀρχή* (*archē*) = a chief, and *ἄγγελος* (*angelos*) = (1) a messenger, (2) an angel.]

I. A chief angel, a leading angel, one high (according to Jewish writers, of the eighth rank) in the celestial hierarchy.  
"¶ *Michael the archangel*, when contending with the devil."—*Jude 8*.

2. The name of a plant, called also the Yellow Weasel-anent. It is the *Galeobdolon luteum* of Hudson, and belongs to the order Lamiales (Labiates). It occurs in Britain. [GALEOPHYS.]

¶ London uses it as an English name for the whole genus *Lamium*.

**ar-ch-ān-gel-īc, a.** [Gr. *ἀρχαγγελικός* (*archangelikos*)] Pertaining to an archangel or archangels.

"He ceased; and the *archangelic* power prepared for swift descent."—*Milton: P. L., bk. xi*.

**ar-ch-ān-gel-īc-al, s.** [Lat. *archangelus* = an archangel.] A genus of umbelliferous plants, containing the *Angelica officinalis*, called also *Angelica archangelica*. [ANGELICA.]

**ar'-ch-bīsh-op, s.** [Eng. *arch*; *bishop*. In Sw. *erkebishop*; Dan. *erkebispap*; Dut. *aartsbischof*; Ger. *erzbischof*; Fr. *archevêque*; Sp. *arcebispo*; Port. *arcebispo*; Ital. *arcivescovo*; Lat. *archiepiscopus*; Gr. *ἀρχιεπίσκοπος* (*archiepiscopos*); *ἀρχή* (*archē*) = chief, and *ἐπίσκοπος* (*episcopos*) = bishop.] [See BISHOP.] A chief bishop. The attentive reader of the whole of the Apostles, noting that nearly the whole missionary energy of St. Paul was expended upon the cities and chief towns rather than on the villages and the country districts, will be prepared to learn that there were flourishing churches in the leading centres of population, whilst as yet nearly all other parts remained "pagan." [PAOAN.] So strong, however, was the evangelistic spirit prevailing that in the time eveny one of the first-formed churches was surrounded by a number of younger and less powerful congregations which it had called into being. The pastors of these new churches being called "bishops," that term no longer appeared a dignified enough appellation for the spiritual chief of the mother church, and about A.D. 340 the Greek title of *ἀρχιεπίσκοπος* (*archiepiscopos*) = Eng. *arch-bishop*, was introduced to meet the difficulty. Two archbishops figure at the Council of Ephesus, in 431, and in subsequent centuries the designation became common over Christendom.

In England the early British churches were, in large measure, swept away by the Anglo-Saxon invaders, who were heathens, and the country consequently required re-conversion. The great southern centre from which this was done was Canterbury, then the capital of Kent, where King Egbert gave Augustine, the chief missionary, a settlement. In the north, York, the chief town of Northumbria, where King Edwin built a shrine for Paulinus, became the great focus of operation for that part of England; hence the two archbishoprics now existing are those of Canterbury and

of York. The prelate who occupies the former see is Primate of all England, whilst his brother of York is only Primate of England, the superiority of the see of Canterbury, long contested by that of York, having been formally settled in A.D. 1072. The former is the first in dignity after the princes of the blood; the latter is not second, but third, the Lord Chancellor taking precedence of him in official rank. An archbishop is often called Metropolitan. In the United States the Roman Catholic Church has twelve archbishops, but there are none in any of the Protestant churches.

"A secular assembly had taken upon itself to pass a law requiring archbishops and bishops, rectors and vicars, to abjure, on pain of deprivation, what they had been teaching all their lives."—*Macaulay: Hist. Eng.*, ch. xiv

**arch-bish-öp-ric**, *s.* [In Fr. *archevêque*; Ital. *arcivescovo*] = archbishop; and Eng. suffix *-ric* = territory or jurisdiction. The office or dignity of an archbishop, or the see over which he exercises spiritual authority.

"Several months were still to elapse before the archbishopric would be vacant."—*Macaulay: Hist. Eng.*, ch. xiv.

**arch-chan-gel-lör**, *s.* [Eng. *arch*; *chan-celler*. In Fr. *archichancelier*.] A chief chancellor. An officer of high rank who formerly presided over the secretaries of the court. Under the first two races of French kings, when their kingdom consisted of Germany, Italy, and Arles, there were three archchancellors—viz., the archbishops of Mentz, Cologne, and Treves.

"The seals of the triple kingdom were borne in state by the archbishops of Mentz, Cologne, and Treves, the perpetual archchancellors of Germany, Italy, and Arles."—*Gibbon: Decline and Fall*, ch. xlix.

**arch-däp-i-fër**, *s.* [ARCHIDAPIFER.]

**arch-dëa-cön**, \***arche-dëkne** (or **con = kn**), *s.* [Eng. *arch*, and *deacon*; A.S. *arcdeacon*; Dan. and Ger. *archidiaconus*; Dut. *archidiacon*; Fr. *archidiacre*; Sp. *arcediano*; Port. *arcediago*; Ital. *arcidiacono*; Lat. *archidiaconus*; Gr. *ἀρχιδιάκονος* (*archidiaconos*); *ἀρχι* (*archi*) = chief, and *διάκονος* (*diakonos*) = deacon.] [DEACON.] A chief deacon. The first institution of deacons [Gr. *διάκονοι* (*diakonoi*)] = servants, waiting-men, ministers, messengers is recorded in Acts vi. They were elected to discharge such half-secular functions as raising and distributing alms to the poor, thus leaving the apostles free for purely spiritual work. It may be assumed that from meetings of the deacons took place, some one presided over them, and if this chairman was one of themselves, he would naturally be called in Greek *ἀρχιδιάκονος* (*archidiaconos*), in Eng. Archdeacon. The president of the deacons' meeting would require to be often in conference with the pastor; and when people meet, mind will affect mind, altogether apart from the relative dignity of the men brought in contact with each other. The archdeacon gradually gained in power, and, becoming what was called "the bishop's eye," was often dispatched on confidential missions to different parts of the diocese, there probably being about him a pliability wanting in the *υπερεπισκοπος* (*chēpēpiscopos*) = counsellor, coadjutor or suffragan bishops. The survival of the fittest took place, and the archdeacon ended by superseding the more dignified but less bending functionaries. The same drama was re-enacted on English soil between the archdeacons and the rural deans, the latter, who were at first higher in position than their rivals, being now regarded as inferior to them in rank; an ordinary, or full dean, however, as contradistinguished from a rural dean, is admittedly superior to an archdeacon. The emoluments of the archdeaconates being but trifling, the occupants of the office generally hold also other preferments. They are empowered to hold a court, the lowest in the scale, from which there lies an appeal to the bishop of the diocese.

"They were in the archdeacon's book"  
*Chaucer: G. T.*, 6, 900.

"Twenty-two deans and fifty-four archdeacons sat there in virtue of their offices."—*Macaulay: Hist. Eng.*, ch. xiv.

**arch-dëa-cön-ste** (or **cön = kn**), *s.* [Eng. *archdeacon*; *-ste*.] The position or rank of an archdeacon.

**arch-dëa-cön-ry** (or **cön = kn**), *s.* [Eng. *archdeacon*, and suffix *-ry*.] The district over which an archdeacon exercises his authority

or jurisdiction; more rarely his office, or his residence.

"Every diocese is divided into archdeaconries."—*Blackstone: Comment.*, bk. i., Introduct., § 4.

**arch-dëa-cön-ship** (or **con = kn**), *s.* [Eng. *archdeacon*, and suffix *-ship*.] The office of an archdeacon. (*Johnson*.)

**arch-dë-gel-vër**, *s.* [Eng. *arch*; *deceiver*.] A chief deceiver; one pre-eminent above all others for deceit.

"He set off for London, breathing vengeance against Churchill, and learned, on arriving, a new crime of the arch-deceiver. The Princess Anne had been some hours missing."—*Macaulay: Hist. Eng.*, ch. ix.

**arch-dī-ō-çese**, *s.* [Eng. *arch*; *diocese*.] The diocese of an archbishop. (*Webster*.)

**arch-drū-īd**, *s.* [Eng. *arch*; *druid*.] A chief druid; the head of the ancient druids. (*Henry: Hist. Eng.*)

**arch-dū-cal**, *s.* [Eng. *arch*; *ducal*. In Fr. & Sp. *archiducal*.] Pertaining to an archduke. "It would be difficult to enumerate all the different quarters and armorial bearings of the archducal family."—*Guthrie*.

**arch-dūch-ëss**, *s.* [Eng. *arch*, and *duchess*. In Fr. *archiduchesse*; Sp. *archiduquesa*; Ital. *archiduchessa*.] A chief duchess. An Austrian title, applied to the daughters of the Emperor.

**arch-dūch-ý**, *s.* [Eng. *arch*; *duchy*. In Fr. *archiduché*; Ital. *arciducato*.] The territory ruled over by an archduke or archduchess. (*Ash*.)

**arch-dūke**, *s.* [Eng. *arch*; *duke*. In French *archiduc*; Sp. & Port. *archiduque*; Ital. *arciduca*.] A chief duke. An Austrian title applied to the sons of the Emperor.

"Philip, archduke of Austria, during his voyage from the Netherlands towards Spain, was weather-driven into Weymouth."—*Carew's Survey*.

**arch-dūke-döm**, *s.* [Eng. *archduke*; *-dom*.] The territory or jurisdiction of an archduke or archduchess.

"Austria is not an archdukedom."—*Guthrie*.

\***arçhe** (1), *s.* [ARCH (1).]

\***arçhe**, \***arch** (2), *s.* [Fr. *arçhe* = Noah's Ark, or any similar structure. Lat. *arca* = a chest, a purse.] [ARK.]

1. An ark.

"Dat arçhe was a fetesle good,  
Set and limesd a god the flood."  
*Story of Genesis and Exod.* (ed. Morris), 561-2.

2. A purse.

"Thi toeseint complet and conennmant,  
Thyne slier and thine arçhe escoute."  
*Early Scottish Verse* (ed. Lumby), 1. 272.

\***arçhe-wold**, *s.* An ark-board.

"Quan he dede him in the arçhe-wold."  
*Story of Gen. and Exod.* (ed. Morris), 574.

**ar-chë-al**, *a.* [ARCHEUS.] Pertaining to, or caused by, the "archeus."

**arçhed**, *pa. par. & a.* [ARCH, *v.*]

*As participial adjective:*

1. Covered with an arch.

"As she paused at the arched door."  
*Scott: The Lay of the Last Minstrel* 1. 20.

2. Curved in the form of an arch.

"... the swan with arched neck."  
*Milton: P. L.*, bk. vii.

3. *Her. Arched*, or *arçhy*, signifies that an ordinary on an escutcheon is bent or bowed.

\***arçhe-di-a-cro**, *s.* [Fr. *archidiacre*.] An archdeacon. (*Chaucer*.)

**ar-chë-gö-ni-äl**, *a.* [Eng. *archegoni(um)*; *-äl*.] *Bot.*: Pertaining to an archegonium.

**ar-chë-gö-ni-äte**, *a.* [Eng. *archegoni(um)*; *-äte*.] *Bot.*: Having archegonia.

**ar-chë-gö-ni-üm** (pl. **ar-chë-gö-ni-ä**), *s.* [Gr. *ἀρχηγόνος* (*archegonoi*) = the first of a race.]

*Bot.*: The female organ of the higher Cryptogams, corresponding in function to the pistil in flowering plants.

**arçh-ën-çëph-äl-ä**, *s.* [Gr. *ἀρχω* (*arçhō*) = to overrule; *ἐκέφαλος* (*enkephalos*) = the

brain; *κεφαλή* (*kephalē*) = the head.] A term proposed by Professor Owen for his first subclass of Mammalia. He included under it one order, Bimana, and a single genus, Homo, or Man. The characters he assigned to the sub-class were the overlapping of the olfactory nerves and cerebellum by the cerebral hemispheres, so that the latter constitute a third lobe; the presence of a posterior horn to the lateral ventricle, and also that of the hippocampus minor. (*Owen: Classif. of Mammalia*.)

**arçh-ën-çë-phäl-ic**, *a.* [Mod. Lat. *archen-cephal(a)*; Eng. suff. *-ic*.] Pertaining to the Archencephala (q.v.).

**arçh-ër**, *s.* [In Fr. *arçher*; Sp. *arçhero*; Ital. *arciere*, *arciere*; from Lat. *arcus* = a bow.]

1. *Ord. Lang.*: One who is skilled in the use of the bow.

"Against him that bendeth let the archer bend his bow."—*Jer.* li. 3.

2. *Astron.*: The constellation Sagittarius.

"Now when the cheerless empire of the sky  
To Capricorn the Centaur Archer yields."  
*Thomson: Spring*.

**arçher-fish**, *s.* A fish, the *Toxotes jaculator*, which shoots water at its prey. It is found in the East Indian and Polynesian seas.

**arçh-ër-ëss**, *s.* [Eng. *arçher*; *-ess*.] A female archer.

"The swiftest and the keenest shaft that is,  
In all my quiver—  
I do select, to thee I recommend it,  
O archeress eternal!"

*Parishave: Past. Fid.*, p. 143.

**arçh-ër-ý**, *s.* [Eng. *arçher*; *-ý*.]

1. The employment of the bow and arrows in battle, in hunting, or for other purposes. The art is of great antiquity. It is mentioned in Gen. xxi. 20, and in the Iliad and the Odyssey, besides being depicted on Egyptian monuments and Assyrian sculptures. The Philistines seem to have excelled in it, which caused David to issue orders that special instruction and training in it should be imparted to the Hebrews (2 Sam. i. 18). There were archers in both the Greek and Roman armies. In England, up to the time when gunpowder came into general use, the archers constituted some of the most formidable soldiers in the English army, several of the battles won over the Scots having been gained by their surpassing skill in the use of the bow. The weapon first employed was the arbalest, or cross-bow [ARBALEST]; afterwards the long bow supplanted it, the change taking place some time before the reign of Edward I. The Scottish "Royal Company of Archers" still claim the right of acting as the Sovereign's body-guard in Scotland; but, picturesque as they may look in a procession, it is to be hoped, both for their own and the monarch's sake, that they may never have to test the powers of their antique weapon against those of the breech-loading rifle.

"Had often heard the sound of glee  
When there the youthful Northos met  
To practice games and archery"  
*Wordsworth: The White Doe of Eglarston*, v.

† 2. The art or skill of an archer.

"Blest seraphims shall leave their quire,  
And turn Love's soldiers upon thee,  
To exercise their archery."  
*Crawshaw: Steps to Temple*.

† 3. Those who at any time or place practise archery; taken collectively, the archers. (Chiefly poetic.)

"The vaulon free, and Boardman wine,  
Might serve the archery to dine."  
*Scott: Lady of the Lake*, v. 25.

**arçh-ëß**, *s. pl.* (1). [Pl. of ARCH (1), *s.* (q.v.).]

1. *Entom.*: The English name given to various species of moths with arch-like zig-zags on their wings.

*Black Arches: Psilura monacha*, a moth of

BLACK ARCHES (PSILURA MONACHA).

the family Bombycidae. The primary wings are greyish-white with many black spots, and

fäte, fät, färe, amidst, whät, fäll, father; wë, wët, hëre, camel, hër, thëre; pine, pít, síre, sír, marine; gö, pöt, or, wöre, wölf, wörk, whô, sôn; müte, cüb, cüre, uníte, cür, rüle, fül; trý, Síryan. æ, œ = é. ey = ä. qu = kw.

four zigzags of the same colour. The secondary wings are brownish-grey, spotted with black, and having a white border. The expansion of the wing is from fifteen to eighteen lines in the male, and two inches in the female. The caterpillar is brown with grey hairs, and one black with two white spots. It is found in the south of England. (Duncan, in Jardine's Naturalist's Libr.)

Green Arches: *Polia herbida*, a moth of the family Noctuidae.

Light Arches: *Xylophasia lithoscoylea*, a moth of the family Noctuidae.

Buff Arches: *Thyatira derasa*, a moth of the family Noctuidae, of a light yellowish-brown colour, with two white oblique bands on the upper wings, and several brown or buff zigzag lines on two rows of small white arches on the lower ones. The caterpillar is yellowish-green, with dark-brown spots and lines. It is found in England. (Duncan, in Jardine's Naturalist's Libr.)

ar-chêt (t silent), s. [Fr. archet; Ital. archetto] = the bow of a violin or a similar instrument.]

Music: à archet (with bow), a term applied to such musical instruments as are played with the bow. (Porter, Webster.)

ar-chê-tÿ-pal, a. [Eng. archetype, -al; Lat. archetypus; Gr. ἀρχετύπος (archetypos).] Pertaining to an archetype, pattern, or model.

"Him, who is fairer than the sons of men; The source of good, the light archetypal." Norris.

¶ In the Platonic Philosophy the archetypal world is the idea or model of the world as it existed in the Divine mind previous to its creation.

ar-chê-type, sp. ar-chi-type, s. [In Fr. archetypus; Sp. arquetipo; Port. archetipo; Ital. archetipo; Lat. archetypum; Gr. ἀρχετύπος (archetypus), s. the neut. of ἀρχετύπος (archetypus) = stamped as a model: ἀρχή (archê) = beginning, and τύπος (typos) = a blow, . . . anything struck, . . . a model, type.]

1. Platonic Philosophy, and generally: The primitive type, model, or pattern on which anything is formed.

"Then it was that the House of Commons, the archetype of all the representative assemblies which now meet, either in the Old or in the New World, held its first sittings." Macaulay: Hist. Eng., chap. I. . . . this great archetype . . ." Bacon: Physiol. Rom.

2. Minting: The standard weight by which the others are adjusted.

3. Comp. Anatomy. The archetype skeleton: Professor Owen's name for an ideal skeleton of which those actually existing in the several classes of vertebrated animals are held to be modifications.

ar-chê-tÿp-ÿ-cal, a. [Eng. archetype; -ical.] The same as ARCHETYPAL. (Warburton.)

ar-chê-ÿs, s. [From Gr. ἀρχή (archê) = beginning, . . . first principle, element.] A term applied by Basil Valentine, Paracelsus, and Van Helmont to denote the regulative and conservative principle of the animal world—what is now called vital force.

\*arche-wÿves, s. pl. [Eng. arche = Gr. ἀρχή (archê) = chief, and O. Eng. wÿves = wives.] Wives who aspire to govern their husbands. (Chaucer.)

arch-hî-êr-ey, s. [ARCHIERY.]

† arch-i-â-têr, s. [Lat. archiaterus; Gr. ἀρχιάτρος (archiateros): from ἀρχή (archê) = chief, and ἰατρός (iatros) = s. surgeon, a physician; ἰατρικὴ (iatrîkê) = to heal, to cure.]

1. Anciently: The first physician of the Roman emperor; the chief ruler in Greece, &c.

2. Now: It is still used in a similar sense in some Continental countries.

"I wanted not the advice and help of the archiater, the king's doctor." Sir T. Herbert: Trav., p. 234.

ar-chÿ-cal, a. [Gr. ἀρχικός (archikos) = pertaining to rule; ἀρχή (archê) = beginning, rule.] Chief, primary.

"When the brutish life leads us astray from the government of reason, and we cast away . . . that principality and archical rule, wherewith God hath invested us, over all our corporeal passions and affections . . ." Halliwell: Excol. of Mor. Vir., p. 48.

arch-ÿ-dâp-ÿ-fêr, arch-dâp-ÿ-fêr, s. [Gr. ἀρχός (archos) = a chief; Lat. daps, genit.

daps = sacrificial or other dignified feast; fero = to bear. Chief food-bearer.]

In the Old German Empire: An officer whose special function it was, when the emperor was crowned, to carry the first dish of meat to table on horseback. The office belonged to the Elector of Bavaria, though claimed by the Palatine of the Rhine.

arch-i-dî-â-côn-al, a. [From Lat. archidiaconus; Gr. ἀρχidiaconos (archidiaconos) = an archdeacon.] Pertaining to an archdeacon.

"Thus, the Archidiaconal Courts, the Consistory Courts, the Court of Arches, the Court of Pecuniars, and the Court of Delegates were revived." Macaulay: Hist. Eng., chap. vi.

arch-ÿ-ê-pîs-côp-a-qÿ, s. [In Fr. archiepiscopat.] The state of an archbishop.

"I did not dream, at that time, of extirpation and abolition of any more than his [Laud's] archiepiscopacy." Sir E. Dering's Speeches, p. 4.

arch-ÿ-ê-pîs-côp-al, a. [In Fr. archiepiscopal; Sp. arzobispal; Ital. arcivescovile.] Pertaining to an archbishop.

"Nothing in England astonished him so much as the Archiepiscopal library." Macaulay: Hist. Eng., chap. xxiii.

arch-ÿ-ê-pîs-côp-ate, s. [In Fr. archiepiscopat; Port. archiepiscopado.] The office, dignity, or jurisdiction of an archbishop; an archbishopric. (Ch. Obs.) ( Worcester's Dict.)

arch-ÿ-ê-pîs-cô-pâ-l-ÿ-tÿ, s. [As if from a Low Lat. archiepiscopallitas.] The dignity of an archbishop. (Fuller: Ch. Hist., II. iii. 89.)

arch-ÿ-êr-ey, arch-hî-êr-ey, s. [Lat. archiereus; Gr. ἀρχιερεύς (archiereus) = a chief priest: ἀρχή (archê) = a chief, and ἱερεύς (hierêus) = priest, a sacrificer.] A name given in Russia to the higher ecclesiastical dignities of the Greek Church, the metropolitans, the archbishops, and the bishops. (K. Pinkerton.)

arch-ÿ-ra-phêr, s. [Gr. ἀρχή (archê) = chief, and γραφή (graphê) = to write.] A chief secretary. (Dr. Black.) ( Worcester's Dict.)

ar-ghi-lâch, s. [ARCHILOUE.] (Scott.)

ar-chill, ar-göl, or-chill, or-chill, or-châl, s. [In Fr. archil, archilla, and orchilla, also Orseille des Canaries.] Two species of lichen, the Roccella tinctoria and R. fastiformis, which grow best in the Canary Islands, though they are found also in the south of Britain. They are found on rocks near the sea. They produce a fine but fugitive purple dye, and are largely employed for that purpose. Arriving in this country in its natural state, it is ground between stones so as to be completely bruised, but not reduced to powder. Then it is moistened with a strong spirit of urine, or with urine itself mixed with quicklime. In a few days it acquires a purplish-red, and finally a blue colour. In the former state it is called Archil, in the latter Lacmus or Litmus. Cudbear is similarly made. Other lichens, such as the Variolella orcina, the Lecanora tartarea, &c., are sometimes used in place of the Roccella.

Ar-chi-lô-chi-an, a. & s. [In Ger. Archilochisch; Lat. Archilochius. See the def.]

A. As adjective: Pertaining to the Greek satiric poet Archilochus, who flourished about 700 B.C., or to the verse which he introduced.

B. As substantive: A kind of verse supposed to have been invented by the Greek poet Archilochus. The "Archilochian major" has seven feet, the first three dactyls or spondees, the fourth a dactyl, and the fifth, sixth, and seventh trochees, as—

Nunc dæcât [aut virt] | di nîtt | dûm câpût | impé | diré | mÿr | tû.

(Horace, Carm. I., iv. 9.)

The Archilochian minor has two dactyls and a cæsura, as—

Arbôri | bûsquê cõ | mæ.

(Horace, Carm. IV., vii. 2.)

Horace varies these two metres in four different ways, called the first, second, third, and fourth Archilochian metres. The first consists of a dactylic hexameter combined with an Archilochian minor; the second of a dactylic hexameter with an iambic; the third of an iambic trimeter and an elegiac; and the fourth of an Archilochian major, with a catalectic iambic trimeter.

ar-ghi-lôwe, ar-ghi-lâch, s. [Etymology doubtful.] A peace-offering. (Scott.)

"I'll pay for another, by way of archlowe." Scott; Rob Roy, ch. xxvii.

Ar-gh-ÿ-mâge, Arch-ÿ-mâ-gö, Arch-ÿ-mâ-güs, s. [Gr. ἀρχή (archê) = chief, and μάγος (magos) = a Magian, . . . an enchanter, a wizard.]

1. The high priest of the Median or Persian Magi. The title was assumed by Darius Hystaspes.

2. Any magician or wizard; an enchanter.

¶ The term perpetually figures in Spenser's Faerie Queene. Some other writers have copied it from that work.

"I will, he cry'd, 'so help me, Ood I destroy That villait Archmage." Thomson: Castle of Indolence, II. 82.

arch-ÿ-mân-drite, s. [In Russ. arkhimandritum; Ger. archimandrit; Fr. archimandrite; Sp., Port., Ital., & Lat. archimandrita; Gr. ἀρχιμανδρίτης (archimandrites) = ἀρχή (archê) = chief, μάνδρα (mandra) = an enclosed space, . . . a monastery.] An Eastern abbot or superior of a monastery, especially one of the first order.

"His rival Eutyches was the abbot, or archimandrite, or superior of three hundred monks." Gibbon: Decline and Fall, chap. xviii., vol. iv., p. 357.

¶ Formerly it was used in a somewhat wider sense, being occasionally applied to archbishops.

Arch-ÿ-mê-dê-an, Ar-chi-mê-dî-an, a. [Eng. Archimed(es); -ian.] Pertaining to Archimedes, a celebrated mathematician of Syracuse, who lived in the third century B.C.

Archimedean principle, or Archimedean theorem; Archimedes's principle or theorem: It is that a body immersed in a liquid loses a part of its weight equal to the weight of the displaced liquid. It was by this law that he discovered the amount of alloy mixed in Hiero's crown. (Gannot: Physics, transl. by Atkinson, 3rd ed., 1868, § 104.) It holds good of gases as well as liquids properly so called. (Ibid., § 168.)

Archimedean Screw, Archimedes's Screw: A water-screw or "cochlion." Cochlion is from the Greek κοχλίων (cochlion) = a small snail, the shell of which it resembles, though it must be confessed very remotely, in being of a spiral form. It consisted of a spiral pipe or

ARCHIMEDEAN SCREW.

tube wound around a long cylinder. The machine, which was originally designed for raising water from the Nile, was slanted so that one end of the spiral tube was beneath the water of the river, and the other rested on the bank. The inside of the tube really consisted of an inclined plane, down which the water flowed, though to a superficial observer it seemed to flow up in contravention of the laws of gravity. It was, of course, unable to act if slanted to the water at too high an angle. It is now disused, one serious defect which it has being that it is apt to become clogged up with weeds, mud, stones, &c., which cannot easily be removed from a tube of spiral form.

arch-ÿng, pr. par. & a. [ARCH, a.]

As participial adjective:

1. Having in it an artificial or a natural arch.

"Now driv'n before him through the arching rock, Came tumbling, heaps on heaps, th' unnumber'd rock." Pope: Homer's Odyssey, bk. ix., 260-1.

2. Curving like an arch.

"Blue ribbons decked his arching mane." Scott: Marmion, l. 6.

"The arching lines are tall and shady." Tennyson: Margaret, 5.

bâl, bôy; pôut, jôwl; oat, çell, chorus, çhin, bench; go, çem; thin, ðis; ain, aç; expect, Xenophon, exist. -ÿng. -cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -tious, -sious, -cions = shüs. -ble, -dle, &c. = bel, del.

ar-chi-pé-lá-g-í-o, a. [Eng. Archipelago(o); -ic.] Pertaining to an archipelago, and especially to the most notable ones—that between Greece and Asia Minor. (Ed. Rev.) (Worcester's Dict.)

Ar-chi-pél'-a-gō, s. [In Dnt. & Fr. Archipel; Ger. Archipel; Fr. Archipelagus; Sp. and Port. archilago; Ital. arcipelago; Gr. ἀρχι (archi) = chief, and πέλαγος (pelagos) = sea; countenancing the belief that the Greeks considered the sea which washed their eastern shores, and was the chief sea to them, the chief sea also to others.]

1. The sea studded with islands which lies between Greece and Asia Minor.

"... the line [of Euboean hills] is further prolonged by a series of islands in the Archipelago, Andros, Tenos, Myconos, and Naxos.—Grote: Hist. Greece, pt. II, ch. I.

2. Any sea agreeing with the former in containing many islands.

"... hence, after long subsidence, this great reef would not produce one great atoll 400 miles in length, but a chain of archipelago of atolls, of very nearly the same dimensions with those in the Maldiva archipelago.—Darwin: Voyage round the World, ch. xx.

ar-chip'-pūs, s. [Gr. Ἀρχιππος (Archippos), a Greek proper name (Col. iv. 17; Philem. 2).] A fine butterfly, the Danus archippus. It does not occur in Britain.

ar-chi-téot, s. [In Dan. architect; Sw. arkitekt; Ger. architekt; Fr. architecte; Sp. arquitecto; Port. architecta; Ital. architetto; Lat. architectus, architecton; Gr. ἀρχιτέκτων (architekton) = chief artificer, (literally) chief carpenter: ἀρχι (archi) = chief, and τέκτων (tekton) = a carpenter. The word carries us back to the period when edifices were constructed chiefly of wood.]

1. Lit.: One who draws the plans designed to show the builders the exact dimensions, form, and arrangements of an edifice which, under his superintendence, they are engaged to erect. Among great architects may be enumerated M. Vitruvius Pollio, who seems to have lived in the time of Augustus; and in our own island, Inigo Jones, born about 1572, died 1652; and the very celebrated Sir Christopher Wren, who died, aged ninety-one, in 1723. He drew out the plan for the restoration of St. Paul's, and the rebuilding of many City churches destroyed in the Great Fire of 1666.

2. Fig.: A contriver or designer of anything.

Used—

(a) Spec.: Of man.

"Chief architect and plotter of these woes; The villain is alive in Titus' house."

Shaksp.: Titus Andronicus, v. 3.

"A French woman is a perfect architect in dress; she never, with Gothic ignorance, mixes the orders..."—Goldsmith: The Bee, No. II.

(b) Of God, as the Designer of everything created.

"This inconvenience the Divine Architect of the body obviated."—Ray: On the Creation.

"... as by work Divine the sovereign Architect had framed."

Milton: P. L., bk. v.

(c) Of any animal constructing a habitation for itself by instinct, but in a style suggesting the architecture of man.

ar-chi-téot'-tíve, a. [Eng. architect; -ive.] Used for building purposes; suitable for building purposes.

"How could the bodies of many of them, particularly the last-mentioned, be furnished with architectical materials?"—Derham: Physico-Theology.

ar-chi-téot-tón'-í-o, \* ar-chi-téot-tón'-í-o-k, a. & s. [In Ger. architectonisch; Fr. architectonique; Port. architectonico; Ital. architettonico; Lat. architectonicus; Gr. ἀρχιτεκτονικός (architektonikos), from ἀρχιτεκτονέω (architektonéō) = to be an architect, to construct, to contrive; ἀρχι (archi) = chief, and τεκταίνωμαι (tektainōmai) = to make or frame, to devise; τέκτων (tekton) = a carpenter.]

A. As adjective: Pertaining to architecture; having a genius or an instinct for architecture; skilled in architecture.

"How much will this architectonic wisdom [if I may call it], excited in framing and regulating an innumerable company of differing creatures, be recommended?"—Boyle: Works, v. p. 147.

B. As substantive:

1. Lit.: The science of architecture.

2. Fig.: The art or capacity of arranging knowledge methodically.

ar-chi-téot-tón'-í-o-al, a. & s. [Eng. architectonic; -al.]

A. As adjective: The same as ARCHITECTONIC, adj. (q. v.).

"... not ectypal, but archetypal, and architectonical of all."—Cudworth: Intell. Syst., p. 853. (Richardson.)

B. As substantive: That which, in a loose sense, creates, frames, or originates anything.

"Those inferior and ministerial arts, which are subjected unto others, as to their architectonicals."—Fotherby: Theomastix, p. 186.

ar-chi-téot-tón'-í-cs, s. [In Ger. architektonik.] The science or art of architecture. (Ash.)

† ar-chi-téot-tor, \* ar-chi-téot-tour, s. [Port. & Lat.] An architect.

"Having first, like a skilful architect, made the frame, he now raises and sets it up."—Austin: Hec Homo, p. 55.

"... merchants, pilots, seamen, architects, masons, &c."—Gayton: Notes on Don Quix., iv. 11.

ar-chi-téot-tress, s. [Eng. architect; -ess.] A female architect. (Lit. & fig.)

"If Nature herself, the first architectress, had to use an expression of Vitruvius winedowed her breast."—Wotton: Remarks, p. 129.

ar-chi-téot-tur-al (tur = tyūr), a. [Fr. architectural.] Pertaining to architecture. (Mason.)

"Plot's, though a neat engraving, and in the most finished manner of that excellent architectural sculptor, Michael Burghers, is by no means a faithful and exact representation."—Warton: Hist. of Kingdington, p. 16.

ar'-chi-téot-ture (ture = tyūr), s. [In Ger. architektur; Fr. architecture; Sp. arquitectura; Ital. architettura; Port. & Lat. architettura, from Lat. architectus.] [ARCHITECT.]

1. Properly, the art of building; more specifically, the art of building human habitations, temples, or edifices of any kind, whether humble or splendid. The term is generally, however, limited to the art of erecting edifices which, besides answering their primary purpose of utility, are fitted by beauty, by symmetry, and in other ways, to please the eyes and gratify the mind. About half a century ago it was common to limit the signification still farther to buildings constructed after Greek or Roman models; but this unduly narrow meaning is now abandoned. Architecture, like other arts, carries out the principles of science, and must rest upon them. So continually, indeed, does it draw upon geometry, that it might almost itself be called a science. The architecture of a people is an index of their mental and moral qualities, and of the state of civilization which they have reached. Ferguson considers it also more trustworthy than language in settling the question of race. The numerous styles of architecture, partly diverse, partly connected with each other, may be primarily divided into Ethnic and Christian. The following is a more minute classification:—In America two styles of architecture worthy of notice exist—the Mexican and the Peruvian. The Chinese have one in Eastern Asia. In India there are two totally distinct races—an Aryan one [ARVAY], of which the Brahmans are the type, and a Turanian one, represented by the Tamuls of the Coromandel coast and Ceylon. The latter were the great builders. Ferguson recognises in India a Buddhist, a Jaina, a Southern Hindoo, a Northern Hindoo, a Modern Hindoo, and a Cashmerian style. In Western Asia there existed, at a more or less remote period, a Phœnician, a Jewish, an Assyrian, a Babylonian, a Persepolitan, an Persian, and a Sassenian type of building; whilst in Europe there were Pelagian or Cyclopean, Etruscan, and Druidical or Celtic types. A celebrated style commenced in Egypt as the Egyptian style; transferred to Greece, and modified there by Assyrian, it was called Grecian, and became a model for universal imitation. Adopted by the Romans, it was called Roman. Passing from them, it gave rise in one direction to the Saracenic, Arabian or Moorsque, and in another to the Christian style, the latter with Romanesque, Gothic, and Byzantine sub-divisions. [SARACENIC, GOTHIC, &c.]

The following are the leading styles of English architecture, arranged in the chronological order in which they flourished:—

- A. D. A. D.
- I. Norman . . . . . From 1066 to 1154.
- II. Transition from this to the next, i. e., from 1. to III. . . . . " 1154 to 1189.
- III. Early English . . . . . " 1189 to 1272.
- IV. Transition from III. to V. . . . . " 1272 to 1307.

- V. Decorated . . . . . From 1307 to 1377.
- VI. Transition from V. to VII. . . . . " 1377 to 1399.
- VII. Perpendicular . . . . . " 1399 to 1547.
- VIII. Tudor . . . . . " 1550 to 1600.
- IX. Jacobean . . . . . " 1603 to 1641.

Probably the finest display of architecture ever made was that of the Columbian World's Fair, at Chicago, in 1893.

¶ The subject now treated generally, called simply Architecture, is sometimes more precisely described as Civil Architecture, in which case there are at least two others, viz., Military Architecture, treating of the construction of fortifications, and Naval Architecture, the subject of which is the construction not merely of ships, but of harbours, docks, or might else requisite to promote maritime enterprises. In this division the term civil is used vaguely, so as to include Ecclesiastical Architecture, but more frequently the two are made distinct.

2. The method of construction adopted in nature, which one insensibly compares or contrasts with the handiwork of man

"The molecular attractions of the liberated carbon and hydrogen find expression in the architecture of grasses, plants, and trees."—Tynndall: Frag. of Science, 3rd ed., iv. 87.

¶ Heaven's architecture = the sky.

"Them and their city vterly to quell With fire which from heaven's architecture fell."

E. E. T. S., vol. 44-48, Satira v., l. 187-4.

ar'-chi-téot-ture (ture as tyūr), v. t. To build. (Keats: Fingal's Cave.)

ar'-chi-tráve, s. [In Ger. architrav, architrab; Fr. & Ital. architrave; from Gr. ἀρχι (archi) = chief, and Ital. trave, from Lat. trabis = a beam; Gr. τράπηξ (trapēx), genit. τράπηκος (trapēkos) = a beam; τρέπω (trepō) = to turn.] Architecture:

1. The lowest portion of the entablature of a column, immediately resting on the column itself. The architrave is immediately sur-

ARCHITRAVE: TEMPLE OF AGRIGENTUM.

mounted by the frieze, and it again by the cornices, which is the highest portion of the entablature.

"Built like a temple, where pillars round Were set, and Doric pillars overlaid With golden architraves."

Milton: P. L., bk. I.

2. The ornamental moulding surrounding the exterior portion of the curve belonging to an arch, or round doors, windows, &c.

3. The mantelpiece in a chimney.

\* ar-chi-tri'-clín, s. [Gr. ἀρχι (archi) = chief; Lat. trichlinium; Gr. τρικλινιον (triklinion) and τρικλινος (triklinos) = a couch running round three sides of a table for guests to recline on at a feast.] Master of a feast (John II. 18).

"... the seide are lord to the sergauz. Moveth to gidere and bereth to Architrclin, that was so the first was l-serued."—Old English Sermons (ed. Morris), p. 99.

¶ Morris says that this word is frequently mistaken for a proper name in Early English books.

\* ar-chi-týpe, s. [ARCHETYPE.]

ar-chi'-vá, s. pl. [ARCHIVES.]

ar-chi'-val, a. [Lat. pl. archiva; Eng. snffix -al.] Pertaining to archives. (Tooke.)

ar'-chive (pl. ar'-chives, \* ar-chi'-va), s. [In Sw. arkiv; Dan. arkivet; Dut. archieven; Ger. archiv; Fr. archives (pl.); Ital. archivi (pl.); archivio; Lat. archiva, pl. of archivum. There is also a Latin form archivum; Gr. ἀρχεῖον (archeion) = the town-house, the official residence of the first magistrate.]

† 1. Plur.: The place in which important historical records are kept.

"Though we think our words vanish with the breath that utters them, yet they become records in God's court, and are laid up in his archives as witnesses either for or against us."—Government of the Tongue.

2. (a) *Pl.*: The records themselves. These generally consist of charters and other documents bearing on the rights, the history, &c., of a nation or of a smaller community or house.

"The Christians were able to make good what they asserted by appealing to those records kept in the Roman archives."—*H. Moss: On Godliness*, h. 7, c. 12, § 2 (French).

"I shall now only look a little into the Mosiac archives, to observe what they furnish us with upon this subject."—*Woodward*.

† (b) *Sing.*: One such record.

"Vespasian, according to Suetonius, restored this national archive, by procuring copies from all quarters."—*Lewis: Early Rom. Hist.*, ch. 7, § 9.

**ar'-chi-vist**, *s.* [In Fr. *archiviste*; Ital. *archivista*; Lat. *archeola*.] One who has charge of archives; a keeper of records. (*Rees: Cyclop.*)

**ar'-chi-volt**, **ar'-chi-vol-tum**, *s.* [Fr. *archivolte*; Ital. *archivolta*; properly, a contraction for Ital. *architrave voltato* (*lit.*) = an architrave turned.]

1. Used by mediæval writers for a vault.
2. Used by the writers of the Renaissance for the group of concentric mouldings and ornaments with which the face of a classical arch is decorated.

ARCHIVOLT OF NOTRE DAME DU PORT, CLERMONT.

3. By some modern authors it is applied to the mass of mouldings which usually occupy the faces and soffits of a mediæval arch. (*Gloss. of Arch.*)

**ar'ch-lûte**, **ar'ch-lûte**, *s.* [In Fr. *archiluth*.] A long and large lute, with its bass strings lengthened after the manner of the theorbo, and each row doubled, either with a little octave or a unison. It is used by the Italians for playing a thorough bass.

**ar'ch-ly**, *adv.* [Eng. *arch*; *-ly*.] In an arch manner; slyly, cunningly, waggishly.

"This he archly supposes."—*Thyer: Notes to Butler's Remains*.

**ar'ch-ness**, *s.* [Eng. *arch*; *-ness*.] Slyness, cunning, waggery.

"... and such a dryness and archness of humour, as cannot fail to excite laughter."—*Dr. Warton: Ess. on Pope*, II, 62.

**ar'-chôn**, *s.* [In Ger. *archont*; Fr. *archonte*; Ital. *arcante*; Lat. *archon*; Gr. ἀρχων (*archôn*) = a ruler, commander, from ἀρχω (*archô*) = to begin; ἀρχή (*archê*) = a beginning.]

1. *Civil Hist.*: Any one of the series of individuals who, when the royal authority was abolished at Athens, succeeded to the highest place in the State. At first the archonship was for life and even hereditary, but the person elected by the people might again be deposed—"the right divine of kings to govern wrong" was not recognised. After a time the occupancy of the office was limited to ten years, and then to one year; while its duties were divided among ten persons; the first called, by way of pre-eminence, the *archon*; the second, the *king*; the third, the *polemarch*, or leader in war; and the other seven, *thesmothetes*, or legislators.

"Among these, the first in rank retained the distinguishing title of the *archon*, and the year was marked by his name."—*Thirlwall: Hist. Greece*, ch. 31.

† *Lord Archon*: A similar officer in an imaginary English government never realised.

"All the detail, all the nomenclature, all the ceremonial of the imaginary government was fully set forth, Poemarchs and Phylarchs, Tribes and Galaxies, the Lord Archon and the Lord Stratagus."—*Macaulay: Hist. Eng.*, ch. III.

2. *Church Hist.* The "Great Archon" of the *Gnostic Basilides*: A created being who was supposed to rule the world.

"There burst forth and was begotten from the cosmic seed and the conglomeration of all germs the great Archon and Head of the world."—*Hippolytus: Refut. of all Heresies*, bk. vii., ch. 21.

**ar'-chôn-shîp**, *s.* [Gr. ἀρχων (*archôn*) = archon, and Eng. suff. *-ship*.] The office of an archon, or the time during which he held office.

"Draco's archonship, in which his laws were enacted, is placed Ol. 39, B.C. 624."—*Thirlwall: Hist. of Greece*, ch. 31.

**ar'-chôn-tîos**, *s.* [In Ger. *archontiken*.]

*Church Hist.*: A Gnostic sect, a branch of the Valentinians. They were of opinion that the world was brought into existence not by God, but by inferior "Archontes," beings themselves created. [ARCHON (2).]

**'ar'qh-wîse**, *s.* [ARCHEWIVES.]

**ar'qh-wîse**, *adv.* [Eng. *arch*; suffix *-wise*.] Shaped like an arch; in the form of an arch.

"The Court of Arches, so called as *arcuato sedes*, or from Bow Church, by reason of the steeple or clocher thereof, raised at the top with stone pillars, in fashion of a bow bent *archwise*."—*Ayliffe: Farergon*.

**ar'-chý**, *a.* [Eng. *arch*; *-y*.]

1. *Ord. Lang.*: Arched.

"Beneath the black and archy brows shined forth the bright lamps of her eyes."—*Parthenia Sacra* (1658), Pref.

2. *Heraldry*. [ARCHED.]

**ar'-qí-form**, *a.* [Lat. *arcus* = a bow, and *forma* = form.] Shaped like a bow, curved.

"... some *arciform* fibres which cross it at its lower part..."—*Todd & Bowman: Physiol. Anat.*, I, 264.

**'ar'-qí-tên-ënt**, *a.* [Lat. *arcitenens*, from *arcus* = a bow, and *tenens*, pr. par. of *teneo* = to hold.] Bow-bearing. (*Johnson*.)

**ar'-ô-graph**, *s.* [Lat. *arcus* = a bow, and Gr. γράφω (*graphô*) = to grave, ... to describe.] An instrument for describing an arc without the use of a central point; a cyclograph. (*Hebert*.)

† **arc-tâ-tion**, *s.* [In Fr. *arctation*; Mod. Lat. *arctatio*; Lat. *arcus*, *artus* = pressed together, close, narrow; *arcto* = to narrow, to enclose.]

† *Med.*: A narrowness or constriction of any passage in the body. (Used specially of constipation of the intestines produced by inflammation or by spasms. It is called also ARCTITUDE.)

"*Arctation*, Lat.: Straightning or crooking."—*Glossog. Nov.*

**ar'cî-a**, *s.* [Apparently from Gr. ἀρκτος (*arktos*) = a bear, referring to the woolly character of the caterpillar; but Agassiz, in his *Nomenclator Zoologicus*, derives it from ἀρκτεία (*arkteia*) = consecration.] A genus of moths, the typical one of the family Arctiidae. *A. caja* is the well-known and beautiful Tiger-moth. Its caterpillar is the "Woolly Bear."

**ar'cî-a-dæ**, *s. pl.* [ARCTIDÆ.]

**ar'cîc**, **ar'cîck**, *a.* [In Fr. *arctique*; Sp. & Port. *arctico*; Ital. *arctic*; Lat. *arcticus*; from *arctos*, Gr. ἀρκτος (*arktos*), a bear, also the constellation Ursa Major. In Sanscrit *riksha*, from the root *ark* or *ask* = to be bright, is (1) an adjective = bright, and (2) a substantive = a bear, so called either from his bright eyes or from his brilliant tawny fur. Before the Aryans had finally separated, *riksha* = bright, applied to the plough-like constellation, had become obsolete, and the substantive bear remained, whence the constellation came to be called ἀρκτος (*arktos*) among the Greeks, *Ursa* among the Latins, and *Bear* among ourselves. (*Max Müller: Science of Language*, 6th ed., vol. II., 1871, p. 393.)]

1. *Properly*: Pertaining to the constellation called by the Greeks ἀρκτος (*arktos*) = bear, by the Romans *Ursa*, and by ourselves *Ursa Major*, the Great Bear, the Plough, Charles' Wain, &c.

2. *Pertaining to the North generally, or more specially to the region within the Arctic Circle.*

"Man has become a denizen of every part of the globe, from the torrid to the arctic zones."—*Owen: Classif. of the Mammalia*, p. 49.

*Arctic Circle*: A small circle of the globe, 23° 28' distant from the North Pole, which is its centre. It is opposed to the Antarctic Circle, which is at the same distance from the South Pole. (*Glossog. Nov.*, &c.)

*Arctic Expedition*: An expedition designed to explore the all but impenetrable regions surrounding the North Pole. The object with which these enterprises were commenced by the English was to obtain a passage by way of the Polar regions to India, Egypt being in Mohammedan hands, and fear, which now

seems absolutely ludicrous, being left that the Portuguese would successfully debar the English seamen from using the route by the Cape of Good Hope. When the utter hopelessness of finding either a north-western or a north-eastern passage to India though the Polar regions became apparent, it was felt that arctic expeditions might still profitably be sent out for purely scientific exploration, one main object now being to make as near an approach as possible to the pole. They have continued at intervals to our own times, chief among the most recent being those of Lieutenant R. E. Peary, of the U. S. Navy, and of Dr. Nansen. Around the respective opinions of these two explorers public interest in this question is mainly centered at present. On returning from his first expedition in September, 1892, Lieutenant Peary claimed to have found that at the 82nd parallel the Greenland coast turned South again, which, in his idea, forbids the possibility of a Polar current flowing down into the Greenland Sea. On the contrary, Dr. Nansen's theory is that the current which flows through Baffin's Bay and Smith's Sound does make its way to the North Pole, and that if a ship were once bedded in the ice and allowed to drift, she would be ultimately carried to the pole by this current. Whether the results of his search since July, 1893, are to prove less disappointing than those of our fellow-citizen is not yet known at the present date (April, 1896). An attempt to reach the North Pole by balloon has been in course of preparation for some time, the start being announced by the authorities at Washington for the month of July, 1896.

*Arctic Fox* (*Vulpes lagopus*): A species of fox found in North America within the Arctic Circle. It is blackish-brown in summer, but in winter has a long, thick white fur, which renders it a beautiful animal.

*Arctic Pole*: The North Pole as opposed to the Antarctic or Southern one. (*Glossog. Nov.*)

*Arctic Zone*: The zone or belt of the earth between the North Pole and the Arctic Circle.

**ar'cî-cîte**, *s.* [In Ger. *arcticit*; from Gr. ἀρκτικός (*arktikos*) = near the Bear, arctic, northern.] [ARCTIC.] A mineral, called also Wernerite and Scapolite (q. v.).

**ar'cî-i-dæ**, **ar'cî-a-dæ**, *s. pl.* [ARCTIA.] A family of moths, comprehending the *Arctia caja*, or Tiger-moth, the *Phragmatobia fuliginosa*, and other beautiful species.

**ar'cîs-cæ**, *s. pl.* [Gr. ἀρκτος (*arktos*) = a bear, and ἰσκω (*iskô*) = to make like.] Water-bears. [ARACHNIDA, BEAR-ANIMALCULES.]

**ar'cî-tûde**, *s.* [In Fr. *arctitude*; from Lat. *arcus*, *artus* = pressed together, narrow.] The same as ARCTATION (q. v.).

**ar'cî-ûm**, *s.* [Lat. *arctium* = a plant, the *Verbascum ferrugineum* (?), or a Lappa; Gr. ἀρκτιον (*arktion*), from ἀρκτος (*arktos*) = a bear; in Celt. *arbh*, after which the Arctium is called, on account of its shaggy involucre.] Burdock. A genus of plants belonging to the order Asteraceæ, or Compositæ.

**ar'cî-gâl-i-dæ**, *s.* [Gr. ἀρκτος (*arktos*) = a bear, and γαλή (*galê*) = a weasel.] A family of carnivorous Mammalia, containing the Skunks (Mephitæ) and some allied animals.

**ar'cî-tô-mÿs**, *s.* [Gr. ἀρκτος (*arktos*) = a bear, and Lat. *mus* = a mouse.] The Mammalian genus to which the Marmots belong. It is placed under the Rodentia. They have pointed cheek-teeth. There are several species, the *A. marmota*, or Marmot, resident in the mountains of Europe and Asia [MARMOT], the *A. bobac* of Poland and Northern Russia, the *M. citillus*, the Zizel or Soudlik, and several from America.

**ar'cî-tôp-sîs**, *s.* [Gr. ἀρκτος (*arktos*) = a bear, and σίς (*sis*) = aspect.] A genus of decapodous Crustaceans of the family Maidea. The *A. tetradon* is the Four-horned Spider-crab of the British coasts.

**ar'cî-stâph-ÿ-lôs**, *s.* [Gr. ἀρκτος (*arktos*) = a bear, and σταφυλή (*staphulê*) = a bunch of grapes. Hence *arctostaphylos* means bear-grape.] The Bear Berry. A genus of plants belonging to the order Ericaceæ (Heath-works). It has an ovate corolla, ten stamens, and a fleshy, five-celled, five-seeded fruit. Two species occur in Britain, the *A. alpina* and the *A. uva ursi*.

**bôil**, **bôy**; **pôut**, **fôwi**; **cat**, **çell**, **chorus**, **çhin**, **benç**; **go**, **çem**; **thin**, **this**; **sin**, **aç**; **expect**, **çenophon**, **exist**. **ph** = **f**. **-cion**, **-tian** = **shan**. **-tion**, **-sion** = **shün**; **-tion**, **-sion** = **zhün**. **-tious**, **-sious**, **-cious** = **shüs**. **-hle**, **-dle**, &c. = **bel**, **dcl**.

arc-tō-tis, s. [In Fr. arctotide; Sp. & Port. arctotis; Gr. ἀρκτος (arktos) = a bear.] A genus of plants belonging to the order Asterales, or Composites. The species are found at the Cape of Good Hope, whence some have been introduced into Britain.

Arc-tū-r-ūs, s. [In Ger. Arktur; Fr. Arcture, Arcturus; Port. Arcturo; Ital. Arturo; Lat. Arcturus; Gr. Ἄρκτουρος (Arktouros), from ἀρκτος (arktos) = bear, and -ουρος (ouros), a termination corresponding to ward in English, as θυρωρός (thuroros) = a door-ward, a doorkeeper. Hence Arcturus means bear-keeper.] (Max Müller.)

I. Astronomy:

1. A fixed star of the first magnitude, called also a Bootis. It is one of the very brightest stars in the Northern heavens. In March, 1635, Morin saw it in the west for more than half an hour after sunrise. To find it, draw a line through the tail of the Bear four times the length of the distance between the stars Mizar and Benetnash in the diagram below. The ancients considered it a red star. Piazzi could not find it had any parallax. Though nominally "fixed," yet it has a proper angular motion of 2'25", equivalent to 53'32 miles in a second. In 752 years it altered its latitude 5', and in twenty centuries, according to Humboldt, it has moved 2 1/2 times the diameter of the moon's disc. In 1803, Herschel found its diameter, seen through a fog, 1/3 of a second, from which he calculated its diameter to be not less than 8,000,000 leagues = 24,000,000 miles. (Arago, Herschel, &c.)

2. The Arcturus of Scripture. Heb. ʿAšh (Ash), Job ix. 9; ʿAšh (Ash), xxxviii. 32. Sept. Ἀρκτουρος (Arktouros); Vulg. Arcturus. Not the star now called Arcturus, which stands in solitary grandeur in the sky, unaccompanied by any of his "sons," ʿAšh (Ash), mentioned in Job xxxviii. 32, but the Great Bear (Ursa Major). (ʿAšh) Ash la formed by spheristics from ʿAšh (neash) = a bier or litter. In Arabic naash, cognate with the Heb. ʿAšh (neash), is the name of the four stars (α, β, γ, and δ) constituting the hinder portion of the Great

Bear: whilst the three in the tail (ε, ζ, η) are called in Arabic Benetnash = daughters of the bier, meaning, the mourners following the bier. The last of these (η) is still designated by its Arabic name Benetnash (q. v.).

"Which maketh Arcturus, Orion, and Pleiades, and the chambers of the south."—Job ix. 9. "Canst thou bring forth Mazzaroth in his season? or canst thou guide Arcturus with his sons?"—Job xxxviii. 32.

II. Zool.: An isopod crustacean. Example, the A. Baffinii, or Baffin's Bay Arcturus.

ar-cū-āto, a. [In Sp. arqueado, arcuado; Ital. arcuato; Lat. arcuatus, pa. par. of arcus = to bend like a bow; arcus = a bow.]

Ordinary Language, Botany, &c.: Curved like a bow, or like the arc of a circle. "... sounds, that move in oblique and arcuate lines, ..."—Bacon: Nat. Hist., Cent. iii., § 224.

\* ar-cū-a-tile, a. [Lat. arcuatilis = bow-shaped, from arcus = to bend in the form of a bow, to curve; arcus = a bow.] Nat. Science: Curved like a bow.

ar-cū-ā-tion, s. [In Fr. arcuation. From Lat. arcuatus = bent in the form of a bow; arcus = to bend like a bow; arcus = a bow.]

A. Ordinary Language:

- 1. The act of bending any thing; incurvation.
- 2. The state of being bent.

B. Technically:

Gardening: The method of propagating certain trees by bending down to the ground the branches which spring from the offsets or shoots after they have been planted. Arcustion is adapted for the elm, lime, alder, and the willows, which cannot easily be raised from seed.

ar-cū-a-tūre, s. [Lat. arcuatus = bent like a bow.] The curvature of an arch.

\* ar-cū-bal-ist, \* ar-cū-bal-is-ta, \* ar-cū-bal-is-tēr, s. [ARBALEST.]

\* ar-cū-būs, s. [ARQUEBUS.]

ar-cūs, s. [Lat. = a bow.] arcus senilis. Literally, the senile arch; the arch of old men or of old age; an opacity around the margin of the cornea which constitutes one of the numerous marks of old age.

-ard, -art, -heart, as terminations. [From Ger. hart = hard; A.S. heard; Icel. hard; Goth. hardus. In M. H. Ger. and in Dutch it in general has, as an appellative, a bad meaning; but it is the reverse in O. H. Ger. proper names, as Bernhart, Bernhart = strong, like a bear; in Fr. & Eng. Bernard (Mahn.) Bain and others consider that it was introduced into the languages of France, Spain, and Italy by the Germanic invaders, who overthrew the Roman empire.] (a) One who does, or (b) one who is: as sluggard = one who is slothful like a slug; braggart = one who brags. In the majority of cases ard and art are used in a bad sense, as dullard, coward, laggard, braggart, but this is not the case with the form heart.

ar-dās-sineš, s. [Ardayssines, plur. of Fr. ardassine; Sp. ardaycina; Arab. & Pers. ardan = a description of raw silk.] The finest kind of Persia silk used in the French looms.

ar-dē-a, s. [Lat. ardea; Gr. ἐραδίας (eradias) = a heron.] The typical genus of the sub-family Ardeinae, and the family Ardeidae.

Ardea cinerea is the Gray Heron which is found in Britain. It is a tall bird, standing upwards of three feet high, with a long black crest on the back of its neck, the feathers of its back dark in colour, and those on its breast white. In summer it may be seen on the margin of lakes or rivers, and in winter on the shores of the sea, waiting for its prey, which consists of small fish, crustacea, &c.

ARDEA CINEREA.

ar-dēh, s. [In Arab. tridab or urdab.] A measure of grain containing almost eight bushels, used in the parts of Africa where the Arabs most abound.

ar-dē-ī-dē, s. pl. [ARDEA.] A family of gallatorial or wading birds. They have large, long, and strong beaks and powerful wings, yet their flight is but slow. They are migratory, frequenting the margins of lakes, or of the ocean, of the several countries in which they sojourn. The family is divided into four sub-families—the Ardeine, or Herons proper; the Ciconiinae, or Storks; the Tantalinae, or Ibises; and the Plataleinae, or Spoonbills.

ar-dē-ī-nē, s. pl. [ARDEA.] The typical sub-family of the family Ardeidae. It contains the Ursa Herona [ARDEA], the Bitterns, the Boathills of South America, and their allies.

\* ar-dē-ī-ō, s. [In Fr. ardillon; Lat. ardilio, from ardeo = to burn.] A busy-body, a meddler.

"Striving to get that which we had better be without, ardilia, busy-bodies as we are."—Burton: Anat. of Melancholy, pp. 12, 17. (Trench.)

ar-dēn-cy, s. [In Sp. ardentia; Port. ardentia, ardentia; Ital. ardentia; from Lat. ardens.] [ARDENT.]

A. Ordinary Language:

- 1. Lit.: Heat. "By how much heat any one receives from the ardency of the sun, his internal heat is proportionally excited."—Sir T. Herbert: Travels, p. 27.
- 2. Fig.: Warmth of affection or of passion; ardour, vehemence of courage, zeal, &c. "The ineffable happiness of our dear Redeemer must needs bring an increase to ours, commensurate to the ardency of our love for him."—Boyle.

B. Technically:

Naut.: The tendency of a vessel to gripe (Ogilvie.)

ar-dent, \* ar-daunt, a. [In Fr. ardent; O. Fr. ardaunt; Sp. ardiente; Port. & Ital. ardente; Lat. ardens, pr. par. of ardeo = to burn.]

I. Of material things:

- 1. Burning, in a literal sense. "... more ardent than the blaze of fire."—Copper: Homer's Iliad, b. xviii.
- 2. Fiery to the taste. "... wine, tea, and ardent spirits..."—Macaulay: Hist. Eng., ch. lili.
- 3. Shining, brilliant, reminding one of the reflection of fire. "A knight of swarthy face. High on a coal-black steed pursued the chase; With flashing flames his ardent eyes were kind."—Macaulay: Hist. Eng., ch. v. Bryten: Theodore & Honoria.

II. Of emotions or conduct:

- 1. Warm in affection, in passion, or desire. "Ardent and intrepid on the field of battle, Monmouth was every where else effeminate and irresolute."—Macaulay: Hist. Eng., ch. v.
- 2. Inspired by warm feeling, and therefore powerful as a flame in its effects; warm or even more than warm. "Her manner was warm and even ardent."—De Quincey's Works (ed. 1863), vol. 11., p. 134.

ar-dent-ly, adv. [Eng. ardent; -ly.] In an ardent manner; with warmth of desire or affection; with warmth of emotion generally; affectionately, passionately. "What ardently I wish'd, I long believed."—Copper: On Receipt of my Mother's Picture.

ar-dent-ness, s. [Eng. ardent; -ness.] The quality of being ardent; arduous. (Sherwood.)

\* ar-dēr, \* ar-dōūr, s. [Prob. from Icel. arðr = a plough.]

- 1. Fallowing or ploughing of ground.
- 2. The state of being fallow.
- 3. Fallow land.

ar-diš-ī-a, s. [Gr. ἀρδία (ardis) = a point, in reference to the acute segments of the corolla.] The typical genus of the Ardiadae (q. v.). About one hundred species are known. They are ornamental plants, having fine leaves, flowers, and berries. Several have been introduced into Great Britain from the East and West Indies. The bark of A. colorata, called in Ceylon dan, is used in that island in cases of fever and diarrhoea, besides being applied externally to ulcers. The red juice of the berries of A. solanacea becomes brown on paper, and retains its colour permanently. The plant grows in some English gardens.

ar-diš-ī-ā-čē-æ (Mod. Lat.), ar-diš-ī-ādž (Eng.), s. pl. Ardiaceae is the name given by Jussieu to an order of Exogenous plants called by Lindley and others Myrsinaceae (q. v.). Type, Ardisia (q. v.). Ardiadae is Lindley's name for the Myrsinaceae.

ar-dor, \* ar-dūre, s. [In Fr. ardeur; Sp. & Port. ardor; Ital. ardore, ardore; from Lat. ardor = (1) a burning, fire, (2) brilliancy, (3) fire of affection or passion.]

- 1. Lit.: Heat, as of the sun, a fire, &c. "Joy, like a ray of the sun, reflects with a greater ardour and quickness, when it rebounds upon a man from the breast of his friend."—South.
- 2. Figuratively:

(a) Heat of the affections or of the passions, of courage, of zeal, &c. "The wicked enchaunting or ardure of this sin."—Shaver: The Perseus Tale.

"Wounds, charms, and ardours were no sooner read, But all the vision vanished from his head."—Pope: Rape of the Lock, l. 119, 120.

"And the vain ardours of our love restrain'd."—Pope.

"Neither his years nor his profession had wholly extinguished his martial ardour."—Macaulay: Hist. Eng., chap. v.

(b) Poetically: A shining being.

"Nor delay'd the winged saint, After his charge receiv'd; but, from among Thousand celestial ardours, where he stood Fell'd with his gorgeous wings, up-springing light Flew thro' the midst of heav'n."—Milton: P. L., bk. v.

ar-dū-ī-ty, s. [In Sp. arduidad; Ital. arduita, arduitate, arduitate; Lat. arduitas = steepness; from arduus.] [ARDUOUS.] Arduousness. (Johnson.)

ar-dū-ōūs, a. [In Fr. ardu; Sp., Port., & Ital. arduo; Lat. arduus = (1) steep, lofty, (2) difficult. Cognate with Gr. ὀρθός (orthos)]

= straight, or (applied to height) upright. In Erse *ard* is a height, and in Sansc. *árdra* means = raised np or lofty.]

1. *Lit.*: Steep and lofty; high and precipitous.

"High on Parnassus' top her sons she show'd, And pointed out those arduous paths they trod." Pope.

2. Involving much labour, difficult. "To point them to the arduous paths of fame." Pope: Homer's *Odyssey*, bk. xi. 302.

"He must have been aware that such an enterprise would be in the highest degree arduous and hazardous." Macaulay: *Hist. Eng.*, chap. II.

**ar-dū-ōis-lý**, adv. [Eng. *arduous*; -ly.] With labour or toil; laboriously, toilsomely. (*Webster*.)

**ar-dū-ōis-nēss**, s. [Eng. *arduous*; -ness.] The quality of being high and steep, and therefore difficult to climb; or, in a more figurative way, presenting difficulty. (*Johnson*.)

**ar-dūre**, s. [ARDORE.]

**are** (pl. **arees**), s. The old way of spelling the letter R.

"[I] are for [i] Richards that bene of noble fame." *Twelve Letters to save England* (ed. Furnivall), 21.

**are** (1). The plural of the present tense in the verb to be. It is used in all the three persons — we are, you are, they are. Obviously it came originally from another root than be. O. Northern Eng. *arow*.

"We are all one man's sons; we are true men, thy servants are no spies."—*Gen.* xlii. 11.

"Ye are spies; to see the nakedness of the land ye are come."—*Gen.* xlii. 3.

**äre** (2), v. l. [EAR, v.] (*Scotch*.)

**äre** (1), s. [HEIR.] (*Scotch*.)

**are** (2), s. [Fr. *are*, from Lat. *area* (q.v.).] In French superficial measure, a square of which the sides are ten metres in length.

"We prefer the form which we have employed because it is etymologically correct. Mr. Sadler seems not to know that a hectare is so called because it contains a hundred *ares*."—*Macaulay: Sadler's Reputation Refuted*.

**a-rè** (3), **a-la-mi-rè**, s. [Italian.] The lowest note but one in Guido's scale of music. [A-LA-MI-RE.]

"Oamut, I am, the ground of all accord, A re, to plead Hortensio's passion; B mi, Bianca take him for thy lord, C fa ut, that loves with all affection." *Shakspear: Taming of the Shrew*, III. 1.

**äre**, adv. [A.S. *ar* = before, early.]

\* 1. Before. (*O. Eng.*) "He herds a new tidder That he heard never are." *Sir Tristrem*, 85. (*S. in Boucher*.)

2. Early. (*Scotch*.) *Are* morrow: Early in the morning. (*Scotch*.)

**är-ö-a** (pl. **är-ö-as** or **är-ö-es**), s. [In Ger. *areal*; Fr. *aire*; Ital., Sp., Port., & Lat. *area* = (1) an open space, (2) *Med.* (see B., 4).]

**I. Ordinary Language**

**A. Generally:**

1. Any open space, as the floor of a building, the part of a church not occupied by pews or other fixtures, the arena in an amphitheatre, the stage in a theatre; or, outside buildings, the open space within any enclosure.

"Let us conceive a floor or area of goodly length, with the breadth somewhat more than half the longitude."—*Wotton*.

"The Alban lake is of an oval figure; and, by reason of the high mountains that encompass it, looks like the area of some vast amphitheatre."—*Addison*.

"In areas vary'd with Mosaic art, Some whirl the disk, and some the jav'lin dart." Pope.

2. The space enclosed within defined limits, however large or however small.

"Extensive as was the area which he governed, he had not a frigate on the water."—*Macaulay: Hist. Eng.*, chap. xxiii.

"... therefore nearly 187,000 square miles is the least space which can be distinctly discerned on the sun as a visible area."—*Herschel: Astronomy*, 8th ed. (1835), § 285.

**II. Speciality:**

1. The enclosed space or site on which a building stands.

2. The sunken space, generally enclosed by railings, which exists in most of the larger town houses, to afford light and ingress to the servants in the floor of the house built below the level of the street.

**B. Technically:**

1. *Geom., Nat. Phil., Astron., &c.*: The space enclosed by the lines which bound any figure. Thus the area of a circle is the space enclosed by its circumference, the area of a triangle the space within its three sides, &c.

*Measures of area* are the same as square measure, such as a square inch, a square foot, a square yard, a square mile, &c.

*The unit of area*: The area of the square described upon the unit of length. (*Everett*.)

"If in this case L stands for length, their area is = L<sup>2</sup>."—*Everett: The U. G. B. System of Units*, chap. 1, pp. 1, 5.

2. *Geol.*: Almost in the same sense as A., 1. 2 (q.v.).

"... led me to conclude that the great oceans are still mainly areas of subsidence, the great archipelagos still areas of oscillations of level, and the continents areas of elevation."—*Darwin: Origin of Species*, chap. ix.

3. *Mining*: A compass of ore allotted to diggers. (*Coxe*.)

4. *Med.*: Baldness, or a bald spot upon the head produced by alopecia; also slopocy itself.

5. *Anat.*: Any space in the embryo or more developed physical structure. (See also the compounds which follow.)

**area germinativa.**

*Anat.*: The space in an egg in process of being hatched in which the first traces of the embryo appear. It is marked by an opaque roundish spot upon the germinal membrane. (*Todd & Bowman: Physiol. Anat.*, vol. II, p. 576.)

**area pellucida.**

*Anat.*: A clear space which appears in the centre of the germ of an egg when the latter is exposed for a few hours to hatching heat. It ultimately increases to about a line in diameter. (*Ibid.*, p. 582.)

**area vasculosa.**

*Anat.*: An area surrounding the *A. pellucida* in an egg in which the process of incubation has commenced. (*Ibid.*, p. 583.)

**area vitellina.**

*Anat.*: An area surrounding the *A. vasculosa* in an egg in which the process of incubation has commenced. (*Ibid.*, p. 583.)

**ta-rēad, ta-rēod, ta-rēde** (pa. par. **ā-rēd, a-rēd'd**), v. t. [A.S. *aredan* = (1) to read; (2) to tell; to speak; (3) to conjecture, to prophesy, find out; (4) to elect; (5) take counsel; (6) to care for; (7) to pursue; (8) to effect.]

\* 1. To read. \* 2. To tell, to say, to declare, to describe, to inform, to teach, to interpret, to explain. [REDE.]

"To whom she thus: 'What need me, Sir, to tell That which your selfe have earst ared so right!'" *Spenser: F. Q.*, VI. iv. 28.

3. To advise, to counsel, to warn, to order. "At those proud words that other knight begonne To wax exceeding wroth, and him aredd To turne his steede about, or saie he should be dead." *Spenser: F. Q.*, III. viii. 17.

"But mark what I ared thee now, Avants; Fly thither whence thou fiddst." *Milton: P. L.*, bk. iv.

\* 4. To guess, to conjecture. "Of which no man couth areden The nombre..." *Alisaunder*, 5, 115. (*Boucher*.)

\* 5. To detect as an impostor or an imposition.

"So hard this Idole was to be ared, That Florimell her selfe in all mens view She seem'd to passe; so forged things do fairest shew." *Spenser: F. Q.*, IV. v. 15.

\* 6. To choose, to elect, to appoint, to ordain.

"Whose praises having slept in silence long, Me, all too meane, the sacred Muse aredd To biason broadest amongst her learned throng." *Spenser: F. Q.*, I. l. 1.

"And time and place convenient to aredd In which they twoe the combat might darraigne." *Ibid.*, V. xii. 9.

¶ *Aread*, though generally called obsolete, is still used, though rarely, in poetry. "Imagined in his little schemes of thought; Or e'er in new Utopias were ared, To teach man what he might be, or he ought." *Byron: Ch. Har.*, II. 95.

\* **a-rēad-i-nēss**, s. [READINESS.] "... and therefore we put in areadiness our army."—*English Manifesto*, A.D. 1442, quoted in *Proude's Hist. Eng.*

**är-ö-æ**. The plural of AREA (q.v.).

**är-ö-al**, a. [Lat. *arealis* = pertaining to a threshing-floor; from *area*.] Pertaining or relating to an area.

\* **a-rēare**. [ARREAR.]

**är-ö-ca**, s. [In Ger. *arek* (*palme*); Fr. *arec*; Port. *areca*. Said to be the Malabar or Malayalam name Latinised.] A genus of plants belonging to the order Palmaceæ, or Palms. It is the type of the section *Areceæ*. Among the more notable species are

(1) the *A. catechu*, or Betel-nut Palm, a very graceful and handsome tree cultivated in the hotter parts of Asia. It furnishes the Indian *scoræ* or betel. The betel-nut is remarkable for its narcotic or intoxicating power; there is sometimes prepared from it a spurious catechu. [CATECHU.] (2) The *A. oleracea*, or Cabbage-palm, a very tall species growing in the West Indies. [CABRAOE.]

ARECA PALM AND NUT.

\* **a-rēche** (1), v. t. [A.S. *arecan* = to explain; pret. *areht*.]

1. To explain. "Crist and Seint Stevens, Quoth Horn, areche thy awene." *K. Horn*, l. 655. (*Boucher*.)

2. To utter. "Uneth he myght areche O word for pure anguyshe." *Chaucer: Hist. of Beryn*, l. 2, 999.

\* **a-rēche** (2) (pa. par. **a-râught**), v. t. [A.S. *arecan*, pret. *areahle*, *arehte* = to reach out, to extend, to lay hold of.]

1. To reach. "Al that hys ax areche myght." *Richard*, 7, 659. (*Boucher*.)

2. To attain. "... the tongue myght not areche to speke." *Trevisa: Bartholomeus de Propr. Herum*, bk. II.

3. To strike. "Hercules araught one of them named Gryneus between the eyen."—*Jason*, MS., l. 6. (*Boucher*.)

**är-ö-cī-næ**, s. pl. [ARECA.] A section or family of palms, distinguished by having either no spathe or one or more complete ones. The ovary is three-celled, and the berry one-seeded. Type, *Area* (q.v.).

**† a-rēd, † a-rēd'd**, pa. par. [AREAD.]

\* **a-rēde**, \* **ar-rūde**, v. t. [A.S. *aredan* = to free.]

"... arud us of the feondes rake." *Legend of St. Catherine*; MSS. (*Boucher*.) "That the laund so arede." *Hule & Nightingale* (1837). (*Boucher*.)

**a-rēde**, v. t. [AREAD.]

\* **a-rēod**, s. [A.S. *ared* = counsel, welfare, safety.]

1. Advice. 2. A discourse.

**a-rēok**, adv. [Eng. *a*; *reek*.] In a reeking state. [REEK.]

"A messenger comes all areek Mordanto at Madrid to seek." *Swift*.

**† är-ö-fäc-tion**, s. [Fr. *aréfaction*, from Lat. *arefacto* = to make dry; *areo* = to be dry, and *facto* = to make.]

1. The act of msking dry. 2. The state of becoming dry.

"For all putrefaction, if it dissolve not in arefactio, will in the end issue into plants or living creatures bred of putrefaction."—*Bacon: Nat. Hist.*, Cent. vii, § 294.

**† är-ö-fy**, v. t. [Lat. *arefacto* = to make dry.] To mske dry.

"Heat drieth bodies that do easily exptre... so doth time or age arefy se if in the same bodies."—*Bacon: Nat. Hist.*, § 294.

\* **a-rēhte**, s. [A.S. *yrhto* = (1) sluggishness, (2) fear; *earh*, *earg* = timid, cowardly.] Fear. (*Hule & Nightingale*, l. 1, 794.) [AROH.]

**boil, boy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -ing. -cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -tious, -sious. -cious = shüs. -hle, -dle, &c. = hel, del.**

**a-rē'lk, ar-rē'lk, v.t.** [A.S. *areccan* = to get, to attain, to reach, to take.] To reach, to extend.

"And heold seamað to the heold areik." *Doma: Verg.*, 81, 19.

**\* a-rē'ir, adv.** [Fr. *arriere* = backward; Lat. *a retro*.] Back. (Scotch.)

"Thairfor we reid you rin arer  
in dreid ya be miscaryik."  
*Lindsay: S. P. R.*, II, 111.

**\* a-rē'ise, v.t.** [RAISE.] To elevate, to raise. (Chaucer.)

**\* a-rē'ist, \* ar-rē'ist, v.t.** [ARREST, v.] (Scotch.)

**\* ar'-em, s.** [ARM.]

**\* ar'-en, \* arne.** Plur. of present tense of verb to be. [ARE.]

**arē-na, v.** joined with *adv.* [Eng. *are*, and Scotch *na* = no.] Are not. (Scotch.)

"... and in this present days, when things ar that and-waird sort *arens* kept in mind around winter freides as they used to be..."—*Scott: Antiquary*, ch. xlii.

**a-rē-na, s.** [In Fr. *arène*; Sp., Port., Ital., & Lat. *arsna* = dry earth, sand; *areo* = to be dry.]

**A. Ordinary Language:**

1. *Lit.*: The floor of an amphitheatre, so called from being strewn with sand, one main object of which was to absorb the blood of the gladiators "butchered to make a Roman holiday."

"My voice sounds much—and fall the stars' faint rays  
On the arena void..."—*Byron: Ch. Har.*, IV, 142.

2. *Fig.*: A field of contest, whatever its nature, as a battlefield, the position of a plaintiff or defendant in a law court, or of a controversialist in a periodical.

"But drag'd again upon the arena, stood  
A leader not unequal to the feud."  
*Byron: Lara*, II, 9.

**B. Technically:**

**I. Architecture:**

1. In the same sense as A. 1.

2. The amphitheatre itself. (*Gloss. of Arch.*)

3. The body of a church or temple. (*Ibid.*)

**II. Med.:**

"Sand" or "gravel" in the kidneys.

**ār-ē-nā'-çō-ō,** *fn compos.* Having sand in combination with some other mineral substance, as *Arenaceo-gypseous* = composed of sand or something sandy, and gypsum.

**ār-ē-nā'-çō-ōūs, a.** [In Fr. *arénacé*; Lat. *arenaceus*.] Sandy, having more or less of sand in its composition, or partaking of the qualities of sand; in the form of sand.

*Geol.*: *Arenaceous* or *siliceous* rocks are those which consist very largely of sand. This sand may be loose, though it is generally cemented by siliceous, calcareous, ferruginous, or argillaceous matter into a more or less compact sandstone. (*Lyell: Elem. of Geol.*)

**ār-ē-nā'-r-ī-a, s.** [In Sp., Port., & Ital. *arenaria*; from Lat. *arenarius* = pertaining to sand; *arena* = sand.]

1. *Botany*: Sandwort. A genus of plants belonging to the order Caryophyllaceæ, or Cloveworts, and the sub-order Alsineæ. There are about nine British species—four belonging to the sub-genus *Alsine*, and four to *Euaenaria*. Many of the species are Alpine; but the *A. verna*, or Vernal, the *A. respyllifolia*, or Thyme-leaved, the *A. trinervis*, or Three-nerved Sandwort, with other species, are found upon the plain.

2. *Zool.*: A genus of Scolopacidæ (Snipes), containing the Redshank, now called *Totanus calidris*.

**ār-ē-nā'-r-ī-ōūs, a.** [Lat. *arenarius*.] Sandy.

**† ar-ē-nā'-tion, s.** [Fr. *arénation*; Lat. *arenatio* = the laying of fine mortar on a wall.]

*Old Med.*: A sand bath in which the patient sits with his feet upon hot sand, or has it sprinkled over him. (*Glossog. Nov.*)

**a-rēn'-dal-ite, s.** [In Ger. *arendallit*, named from Arendal in Norway, near which it is found.] A mineral, a sub-variety of ordinary Epidote. It mostly occurs in dark-green crystals.

**ar-ēn-dā'-tor, s.** [Low Lat. *arendator, arrendator*, from *arendo, arrendo* = to pay rent; *arenda* = rent; *ad* = to, and *rendā* = rent. (RENT.) In Russ. *arend* is = lease, farm, rent, and in Spanish *arrendar* is = to let out to rent.]

In Livonia and other provinces of Russia: One who farms the rents or revenues. One who contracts with the Crown for the rent of the farms.

*Crown-arendator*: One who rents an estate belonging to the Crown. (*Tooke: Russia*, II, 288.)

**a-rēng, s.** [Native Malay name.]

1. A palm-tree, formerly called *Areng saccharifera*, but now more generally denominated *Saguerus saccharifer*. It belongs to the section Cocolos. It grows wild in the islands of Southern Asia, and is cultivated in India. It furnishes sago and wine, whilst its fibres are manufactured into ropes.

2. An old genus of palms, now altered into *Saguerus*. [See I.]

**\* a-rēng'e, adv.** [ARENKE.]

**ār-ē-nīc'-ōl-a, a.** [Lat. *arena* = sand, and *colo* = to inhabit.] A genus of Annelida, the typical one of the family Arenicolidæ. *A. piscatorum*, the *Lumbricus marinus* of Belon and Linnæus, is a worm which buries itself in the ground one and a-half or two feet in depth, betraying its lurking-place, however, by leaving on the surface little cordons of sand, closing the entrance to its hole. It has a large, eyeless head, small feet at its anterior part, and fine branchiæ (gills) in its middle segments. It is about eight inches long. Fishermen call it the Lobworm, and dig it up for bait.

**ār-ē-nīc'-ōl'-ī-dæ, s. pl.** [ARENICOLA.] A family of Annelids, arranged under the order Errantia. [ARENICOLA.]

**† ā-r-ē-nī-līt'-īc, a.** [Lat. *arena* = sand; Gr. *λίθος* (*lithos*) = stone.] Pertaining to sandstone. [Kruwan.]

**a-rēnk'e, a-rēng'e, adv.** [O. Eng. *a; renke* = rank.] In a row; in a series.

"And ladda him and his monks  
In to a well fair halle,  
And sette him adoun *arenke*,  
And wosche here *fe alle*."  
*M. S. Hart*, 2, 377, l. 44b. (*Boucher*.)

**ār-ē-nōse, a.** [Sp., Port., and Ital. *arenoso*; Lat. *arenosus*.] Full of sand; sandy. (*Johnson*.)

**\* a-rēnt', s.** [Contraction for Eng. *annual rent* (?).] Annual rent. (Scotch.)  
"... the *manysis*, or *arent*, or *lyrent*..."—*Act*, Chas. I.

**ār-ē-nū-loūs, a.** [Lat. *arenula* = fine sand; diminutive of *arena* = sand.] Full of fine sand; composed of fine-grained sand; gritty. (*Glossog. Nov.*)

**ār-ē-ō-la** (Lat.), **ār-ē-ō-le** (Eng.), **a.** [In Fr. *aréole*; Sp. & Port. *areola*; from Lat. *areola* = (1) a small open place, (2) a small garden-bed; dimin. of *area*.] [AREA.]

*Physical Science*: Any small area; any minute surface. *Specially*—

**I. Anatomy & Medicine:**

1. A dark-coloured circle surrounding the nipple. (*Barclay, &c.*)

2. A similar one surrounding the pock in vaccination.

3. The interstices in areolar tissue.

"... as ossification advances between the rows, these cups are of course converted into closed areolæ of bone."—*Todd & Bowman: Physiol. Anat.*, vol. I, p. 118.

*II. Entom.* (Pl. *Areole*): The small areas, spaces, or interstices into which the wings of insects are divided by the nervures. They are important for classification.

*III. Bot.*: The little spaces or areas on the surface of any portion of a plant. Thus if, as is often the case, the surface of a crustaceous lichen is cracked in every direction, then the spaces between the cracks are the *areolæ*. (*London: Cycl. of Plants, Glossary*.)

**ār-ē-ō-lar, a.** [Eng. *areolæ*]; *ar-*] Pertaining to an areola.

"... the cutis or areolar framework of the skin."—*Todd & Bowman: Physiol. Anat.*, vol. II, p. 407.

**areolar tissue.**

1. *Anat.*: A tissue widely diffused through the body, and composed of white and yellow fibres, the former imparting to it strength, and the latter elasticity. The two kinds of fibres interlace with each other again and again in the most complex manner. The interstices left between them are of very unequal size, and should not be called, as for a long time they were, cells. Areolar tissue protects from injury the parts of the body in which it occurs, and when placed in the interstices of other tissues it keeps the latter from moving as freely as otherwise they would. The *cutis vera*, or true skin, is composed of it, and it abounds in the exterior parts of the musclicæ and in the interstices between their fibres, beneath the skin, on the surface of the pharynx, and the œsophagus. (*Todd & Bowman: Physiol. Anat.*)

"This adipose tissue is generally found associated with the areolar or connective tissue."—*Beale: Bioplasm* (1872), § 182.

2. *Bot.*: A term occasionally applied to cellular tissue.

**ār-ē-ō-lāte, a.** [Mod. Lat. *areolatus*; from *area*.]

*Phys. Science*: Divided into a number of irregular squares or angular spaces.

*Spec. Bot.*: Pertaining to such markings as are left on the receptacles of certain composite plants when the seeds have fallen off, or to similar areolations. [AREOLA.] (*Lindley*.)

*Entom.*: Pertaining to the small spaces into which the membranous wings of insects are divided by the nervures which traverse them.

**ār-ē-ō-lā'-tion, s.** [From Eng. *areolate*.] Any small irregular square, angular space, mesh, or cell in a tissue or other substance.

**ār-ē-ō-lic, s.** [AREOLA.]

**ār-ē-ōm'-ō-tēr, s.** [In Ger. *areometer*; Fr. *aréomètre*; Port. *areometro*; from Gr. *ἀραιός* (*araios*) = (1) thin, (2) porous, and *μέτρον* (*metron*) = a measure.] An instrument designed to measure the specific gravity of liquids. The simpler areometers measure only the relative weights of liquids. They consist of a tube of glass, terminated in a ball at its lower part, and divided into equal portions through its whole length. Another ball filled with mercury is soldered below to keep it vertical. The depth to which it sinks in various liquids is in the inverse ratio of their relative specific gravities. In Fahrenheit's areometer there is an adjustment by weights, so that the volume of the part immersed is constant, and thus the absolute specific gravity of the liquid tested is ascertained, that of water being previously fixed. (*Glossog. Nov.*, &c.)

AREOMETER.

**ār-ē-ō-mēt'-rī-cal, a.** [In Ger. *areometrisch*; Fr. *aréométrique*.] [AREOMETER.] Pertaining to the areometer. Measured by means of the areometer. (*Webster*.)

**ār-ē-ōm'-ōt-ry, s.** [In Ger. *areometrie*; Fr. *aréométrie*.] The act or process of measuring the specific gravity of liquids. (*Webster*.)

**† ā-r-ē-ōp'-a-gīt, s.** [Eng. *Areopagus*]; *-ist*.] The same as AREOPAGITE (q.v.). (*Pen. Mag.*) ( *Worcester*.)

**ār-ē-ōp'-a-gīte, s.** [Fr. *aréopagite*; Sp., Port., Ital., & Lat. *Areopagita*; Gr. *Ἀρειοπαγίτης* (*Areiopagitēs*).] A member of the Areopagus (q.v.).  
"... Dionysius the *Areopagite*, ..."—*Acts* xvii. 34.

**ār-ē-ōp'-a-gīt'-īc, a.** [In Ital. *Areopagitic*; Gr. *Ἀρειοπαγίτικος* (*Areiopagitikos*).] Pertaining to the Areopagus. (*Knowles & Worcester*.)

**ār-ē-ōp'-a-gīt'-īcs, ā-r-ē-ōp'-a-gīt'-īcs, s.** [From *Areopagite* (q.v.).] A work by Milton, which he describes as a "speech for the liberty of unlicensed printing." It has been characterised by Prescott as perhaps the most splendid argument the world had then witnessed on behalf of intellectual liberty. The name is taken either from the Areopagus as the great fount of justice, or possibly from the *Areopagium* of Isocrates.

**fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gā, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, oūb, cūre, ūnite, cūr, rāle, fāll; trȳ, Sȳrian. se, ce = ē. ey = ā. qu = kw.**

"The truth is that the Just Vindication consists chiefly of garbled extracts from the Areopagitius of Milton."—Macaulay: Hist. Eng., chap. xix.

Ar-ē-ōp-a-gūs, s. [Ger. Areopag; Fr. Aréopage; Sp., Port., & Ital. Areopago; Lat. Areopagus; Gr. Ἀρεώπαιος (Areopaios), a hill sacred to Ares (Mars), on the west side of the Acropolis at Athens; ἄρειος (Areios), adj. = pertaining to Ares or Mars; from Ἄρης (Arēs) = Mars, and ἄγος (agos) = a peak, a rocky hill.]

I. Spec.: The highest court at Athens, so called from the fact that its place of meeting was upon the hill of Ares (Mars' Hill). It was of great antiquity, and was said to have taken its name from the legend of Ares having been tried there by Poseidon for the murder of his son, Halirrhottus. The judges belonging to

THE AREOPAGUS.

it sat in the open air. They consisted of all who had filled the archonship without having been expelled from it for misconduct. The cases which came before the court were specially those which might result in the infliction of capital punishment. When Paul pleaded the cause of Christianity before the Court of Areopagus he addressed the most august assembly which Athens could boast. (Acts xvii. 19, 22.)

2. Gen.: A conference or congress consisting of ambassadors or other dignified personages representing the several European powers.

"We shall know how to prove to Europe by the attitude we now observe that Roumania deserved better of the European Areopagus."—Pines, July 18, 1878; Speech of Prince Charles of Roumania.

ār-ē-ō-stylo, s. [ARÆOSTYLE.]

ār-ē-ō-sys-tylo, s. [ARÆOSYSTYLE.]

†ār-ē-ō-tēc-tōn-ics, \*ār-ē-ō-tēc-tōn-icks, s. [In Fr. arélectrique; the Gr. ἄρειος (Areios) = devoted to Mars, martial, and τεκτονικός (tektonikos) = practised or skilled in building; τεκτων (tektōn) = a carpenter.]

Fortification: That part of the science of fortification which teaches, or at any rate attempts to teach, how to encounter an enemy as advantageously as possible. (Glossog. Nov., 2nd ed.)

\*ar-ē-ōt-ic, \*ar-ē-ōt-ick, a. & s. [Gr. ἀραιός (araios) = (1) thin, narrow, slight, (2) porous, spongy.]

1. As adjective: Pertaining to an attenuant; having the property of dissolving viscidities. [See the substantiva.]

2. As substantive: An attenuant; a medicine designed to dissolve viscidities, to promote the removal of morbid matter by means of perspiration, and healthfully to attenuate the frame.

ār-ēr (pl. ār-ēr-īs), s. [Apparently from Low Lat. hereditarius = an heir.] An heir. (Scotch.) (Jamieson.)

\*a-rē-re, v.t. & i. [A.S. aræran = to rear up; arærnes = a raising.]

A. Transitive:

1. To raise.

"... that he with his steuens the storuens arewede."—M.S. Cott., Titus, D. xviii., fo. 130. (S. in Boucher.)

2. To re-icite.

"Crystandom how they gonne arere." Octavian, l. 21. (S. in Boucher.)

B. Intransitive: To rear, to stand on the hind-legs, as a horse.

Ar-ēs, s. [Gr. Ἄρης (Arēs).] The god of war

in the Greek mythology, son of Zeus and Hero, corresponding to Mars in that of the Romans. He was worshipped principally in Thrace and Scythia. The people of Greece proper, though constantly engaged in war, seem to have paid but little attention to his worship.

ARES.

"The twelve great gods and goddesses of Olympus.—Zeus, Poseidon, Apollo, Ares, Hephestus, Hermes, Hera, Athena, Artemis, Aphrodite, Hestia, Demeter."—Grate: Hist. of Greece, pt. 1, chap. 1.

\*a-rē-se, v.t. [A.S. aræsan = to fall down, to perish.] To totter. (Severn Sages, i. 215.)

\*a-rē-sōn, \*a-rē-soūn, v.t. [Fr. arraisonner = to attempt to persuade by reasons; O. Fr. araisonner = to interrogate, to reason; Low Lat. arrationare.]

- 1. To reason with; to attempt to persuade. "Their fours at Rome was to aræson the Pope."—Chron., p. 314.
- 2. To interrogate. (Sir Tristrem, p. 34, at 51.)
- 3. To censure.
- 4. To arraign.

\*a-rēst, \*a-rēste, s. [ARREST.]

\*a-rēste, \*a-rēst, \*a-rēst-ýd, \*rēst-ýd, a. [RESTR.] Rancid or "resty," as flesh. (Prompt. Parv.)

\*a-rēste-nesse, s. [O. Eng. aræste; -nesse.] Rancidity. (Prompt. Parv.)

\*a-rēst-ēr, s. Old spelling of ARRESTER.

\*a-rēs-týn, v.t. Old spelling of ARREST.

ār-ē-tā-ics, s. [ARETOLOGY.]

ā-rēte, s. [Fr., from Lat. arista = an ear of corn; cf. acer and arvo.] (See extract.)

"I have heard an aræte described as an infinitely narrow ridge of rock with an overlying vertical precipice on one side, and one longer and steeper on the other."—Rev. J. F. Hardy, in Peaks, Passes, & Glaciers (1860), p. 210.

Ar-ē-thū-aa, s. [Lat. Arcthusa; Gr. Ἀρεθούσα (Aréthousa).]

1. Class. Myth.: One of Diana's nymphs, who was transformed into a fountain.

2. Ancient Geog.: The name of several fountains, and notably one at Syracuse.

3. Astron.: An asteroid, the ninety-fifth found. It was discovered by Luther on the 23rd of November, 1867.

4. Bot.: A genus of plants belonging to the order Orchidaceæ, or Orchids. The only known species is A. bulbosa, found in North America.

\*a-rē-tī-a, s. [From Benoit Arctio, a Swiss, Professor in the University of Berne. He died in 1574.] A genus of plants belonging to the order Primulacæ, or Primworts. The species, which are brought from Switzerland and the Pyrenees, are peculiarly suitable for rock-work.

†ār-ēt-ōl-ō-gý, ār-ē-tā-ics, s. [Gr. (1) ἀρετή (arētē) = manliness, virtue in the Roman sense, goodness, excellence; (2) λόγος (logos) = discourse.] That part of Ethics which treats specially of virtue.

\*a-rēt-te, v.t. [ARRET.]

\*a-rēt-týt, pa. par. [ARRET.]

\*a-reū, \*areghwe (a-rū) (gh allent), s. [ARGH.] Fear.

"That he not areghes hit ne forlete." Hute & Nyghtingale, l. 1404. (S. in Boucher.)

\*a-rew (rew = rū), v.t. [RUE, v.] To compassionate.

"Jhesu Crist arew hem sore, And seide he wolde racche hem thore." M.S. Harl., 2, 253, l. 66. (S. in Boucher.)

\*a-rew, a-rewe (rew = rū), adv. [Old Eng. a, and rew = row.] In a row.

"Was war and lesse, that all her teeth arewe, And all her bones might through her cheekes be red." Spenser: F. Q., V. xii. 29.

ar-fvəd-sōn-ite, ar-fwəd-sōn-ite, s. [In Ger. arfwedsonit; from Arfwedson, the discoverer of lithia, and Eng. suff. -ite.] A mineral classed by Dana under his Amphibola group and sub-group of Bialicitæ. Its crystals are probably monoclinic. Its hardness is 6; its sp. gr. 3.329 to 3.589; the lustre vitreous; the colour pure black in mass, deep green or brown in thin scales. Composition: silica, 46.57 to 51.22; alumina, 2.00 to 3.41; protoxide of iron, 0 to 24.38; protoxide of manganese, 0.62 to 7.46; magnesia, 0.42 to 5.88; lime, 1.56 to 5.91; soda, 0 to 2.96; chlorine, 0.24; titanica acid, 2.02. It occurs in Greenland, Norway, &c.

\*ar-gal, adv. [Corrupted from Lat. ergo = therefore.] Therefore.

"... the gallows is built stronger than the church; argal, the gallows may do well to thee."—Shakspeare: Hamlet, v. 1.

ar-gal, s. [ARGOL.]

ar-ga-la, s. [Hind.]

Zool.: Ciconia argala, the adjutant (q.v.).

ar-ga-li, s. [The Mongolian name.]

Zool.: A wild sheep, Ovis ammon, or O. argali, perhaps the dishon of the Pentateuch, from the mountains and steppes of Northern Asia.

ar-gänd lämp, s. [So called after Aimé Argand, a Genevese, who invented it about

ARGAND LAMP.

the year 1782.) A lamp with the wick made hollow, so as to admit air to both surfaces of the flame with the effect of much increasing the light and heat. The same principle has also been adapted successfully to gas-burners.

Ar-gē-an, a. [Lat. Arg(o); Eng. anfix-ean.

In Lat. argous, from Argo, Jason's vessel (see ARGO).] Pertaining to the old ship Argo, that in which Jason is represented as having sailed in quest of the golden fleece.

ar-gēi, ar-ghēi, s. [Mod. Syriac.] A name given in Syria and the Levant to the Cyananthum or Solanostemma argel, an asclepiadaceous plant, the leaves of which are used in Egypt for adulterating senna. (Lindley.)

ar-gē-ma, s. [In Sp. & Lat. argema; Gr. ἀργεμα (argema), ἀργεμων (argemon), and ἀργεμα (argema) = shining, bright.] A small white speck or ulcer partly on the cornea, and partly on the sclerotic coat of the eye.

ar-gēm-ō-nē, s. [Fr. argémone; Sp., Port., & Ital. argemone; Lat. argemone; Gr. ἀργεμώνη (argemōnē), either a kind of poppy or an adonis; from Lat. argema = Gr. ἀργεμα (argema) = a small ulcer in the eye, for which the argemone was believed to be a proper application.] [AROMA.]

\*A. Ordinary Language: The wild tansy. (Minskew.)

B. Technically:

Bot.: A genus of plants belonging to the family Papaveraceæ, or Poppy-worts. It has three sepals and six petals. The A. Mexicana, believed, as its name imports, to have come from Mexico, is now common in India and other warm countries in the Old World as well as in the New. It has conspicuous yellow flowers. From having its calyx prickly, it is often called Mexican Thistle. The yellow juice, when reduced to consistence, resembles gamboge. It is detersive. The seeds are a more powerful narcotic than opium.

bōil, bōy; pōut, jōwi; cat, cell, chorus, çhin, bench; go, gem; thin, çhis; sin, aç; expect, Xenophon, exist. ph = f. -cian, -tian = çhan. -cton, -tion, -ston = shün; -çion, -çion = çhün. -ctious, -ctious = shüs. -ble, -dle, &c. = beç, deç.

**ar-gent, 'ar-gente, s. & a.** [In Fr. *argent*; Sp. *argen*; Port. & Ital. *argento*; Lat. *argentum*; Gr. *ἀργυρος* (*argyros*) = the white metal, silver; *ἀργός* (*argos*) = shining, bright; Sansc. *ragalam* = silver; *ragatas* = white; *ragārm* = to shine; *argunas* = light, from the root *arg*. The Teutons have quite a different word for silver, which is in A.S. *seolfor*, *seolfor*, *syffor*; Sw. *silfver*; Dan. *solv*; Dut. *silver*; Ger. *silber*. Probably, therefore, the discovery of silver was not made till the Teutonic race had separated from the old Aryan nations in Central Asia, which gave origin to nearly all the European nations. Or they may have forgotten it, and after some ages re-discovered it independently.]

**A. As substantive:** Silver, figuratively rather than literally.

1. **Ordinary Language:** Used of the silvery colour of certain clouds or their margins, or anything white and shining.

"The polish'd argent of her breast to sight Laid bare."

Tennyson: *A Dream of Fair Women*.  
"And soft, reflected clouds of gold and argent!"  
Longfellow: *The Golden Legend*, l.

2. **Her.:** Used of the silvery colour on coats of arms. In the arms of princes it is sometimes called *Luna*, and in those of peers, *Pearl*. In engravings it is generally represented by the natural colour of the paper. It is intended to symbolise purity, innocence, beauty, or gentleness, graces which add a lustre and attractiveness to their possessor like that of silver lit up by the rays of the sun.

ARGENT.

"He beareth gules upon his shield,  
A chevron argent in the field."

Longfellow: *Tales of a Wayside Inn*, Prelude.

**B. As adjective:** Silvery-white, brilliant white; shining.

1. **Ordinary Language:**

"Or ask of yonder argent fields above,  
Why Jove's satellites are less than Jove's?"—*Popo*.

2. **Technically. Used—**

(a) **Zool.:** Of the scales of fishes, or of silvery markings on the wings of insects.

(b) **Her.:** Of the colouring on coats of arms.

"Rinaldo flings  
As swift as fiery lightning lidded o'er;  
His argent eagle with her silver wings,  
In field of azure, fair Ermalua knew."—*Fairfax*.

**argent and sable moth.** The *Melanips hastata*. Its colour is delicate creamy-white, with jet-black markings. It belongs to the family Geometridæ.

**argent content.** Ready money. (*Scotch.*)

"Klog Wyllyam ad pay ene hundred thousand poundis strineling for his redemption, the one half to be payt with argent content."—*Bolland.*: *Chron.*, bk. xii., c. 5.

**argent-horned, a.** Silver-horned.

"Bright as the argent-horned moone."  
*Lovelace*: *Luc.*, p. 151.

**argent-lidded, a.** Having silvery or shining lids. (*Poetical.*)

"Serene with argent-lidded eyes."  
Tennyson: *Recol. of the Arabian Nights*.

**\*argent-vive, s.** [Fr.] Quicksilver, mercury. (*Ben Jonson.*)

**ar-gén-tal, a.** [Fr. *argental*; Ital. *argentale*.] Pertaining to silver; consisting of silver; containing silver as one of its ingredients; having silver combined with it.

**ar-gén-tan, s.** [From Lat. *argentum* = silver.] "German silver;" an alloy of nickel with copper and zinc.

**ar-gén-tā-tion, s.** [From Lat. *argentatus* = plated or ornamented with silver.] A coating with silver. (*Johnson.*)

**ar-gén-tic, a.** [Lat. *argenti*(um); Eng. suffix -ic.] Pertaining or relating to silver; composed in whole or in part of silver; obtained from silver.

**Chem.:** Argentic salts are distinguished by giving with hydrochloric acid a white precipitate of argentic chloride (AgCl), which is insoluble in boiling water and in nitric acid, but dissolved by ammonia without blackening. Argentic sulphide (Ag<sub>2</sub>S) is black; argentic phosphate (Ag<sub>3</sub>PO<sub>4</sub>) is yellow; argentic chro-

mate (Ag<sub>2</sub>C<sub>2</sub>O<sub>4</sub>) is brick-red; Ag<sub>2</sub>CO<sub>3</sub> is white, insoluble in water, soluble in nitric acid or in ammonia. Caustic alkalis give a brown precipitate of Ag<sub>2</sub>O, which is soluble in ammonia. Argentic iodide (AgI) is a pale yellow colour, insoluble in ammonia or in nitric acid.

**Argentic Chloride** (AgCl) is obtained as a curdy-white precipitate by adding a soluble chloride to argentic nitrate. It is insoluble in water and in acids, but dissolves in ammonia, in potassic cyanide, and is slightly dissolved by a saturated solution of sodium chloride. When melted it looks like horn, hence it has been called *horn silver*. It is acted upon by light. The chloride, iodide, and bromide are used in photography.

**Argentic nitrate** (AgNO<sub>3</sub>) is obtained by dissolving silver in nitric acid. It crystallises in transparent anhydrous colourless tables, soluble in their own weight of cold water, and in half their weight of boiling water; it is also soluble in alcohol. When fused it is called *lunar caustic*, and is used for marking ink and to dye hair. It is used in medicine as a caustic for wounds, and is administered internally in small doses as an astringent and alterative to the mucous coats of the stomach. It also acts as a tonic; but it stains the skin a blue leaden colour when it has been taken for a long time. It has been given for epilepsy.

**Argentic oxide** (Ag<sub>2</sub>O) is a brown powder, which is obtained by adding caustic potash to argentic nitrate. It is a powerful base, decomposed at red heat into silver and oxygen.

**ar-gén-ti-ná, s.** [From Lat. *argentum* = silver.] A genus of fishes belonging to the Salmonidæ, or Salmon family. Linnæus founded it for the Argentine, described below.

**ar-gén-tine, a. & s.** [In Fr. *argentin*; Port. & Ital. *argentino*.]

**A. As adjective:**

1. Pertaining to silver.

2. Made in whole or in part of silver.

"With an antic'd desarture with letters *argentine*,"  
*Holmes*: *Fall of Rebellion* (*Boucher*).

3. Silvery in aspect.

4. Sounding with a tone like that of silver.

**B. As substantive:**

1. **Mín.** [In Ger. & Fr. *argentin*.] A mineral, a pearly lamellar variety of Calcite. It is of a white, greyish, yellowish, or reddish colour. [*CALCITE*.]

2. **Zool.:** Any species of the genus *Argentina*. *Spec.*, a small fish of brilliant aspect, the *Scopelus humboldtii* of Cuvier, and the *Argentina ephyræna* of Pennant and Fleming. It belongs to the Salmonidæ. Yarrell, in 1836, mentioned that it had been taken three times on the British coasts.

3. **Geog.:** An inhabitant of some one of the provinces belonging to the *Argentine Confederation*; a *La Platan*.

**Argentine Confederation or Argentine Republic:** A South American Republic—that of La Plata—lying along and south from the great La Plata river. Its capital is Buenos Ayres. Though there are silver mines within this vast region, yet it is not after them that the territory is named. Argentine, from Sp. *argento*=silver, is simply a synonym for *plata*=silver, in the term *Río de la Plata*=river of silver. Under the reflection of the sun's rays, every river presents a silvery aspect, the Río de la Plata in this respect not surpassing a multitude of others.

**ar-gén-tite, s.** [Lat. *argentum* = silver, and Eng. suffix -ite.] A mineral placed by Dana at the head of his Galena group of minerals. It occurs in isometric crystals; also reticulated, arborescent, and filiform. The hardness is 2-2.5; sp. gr. 7.106-7.365; lustre, metallic. It is opaque, has a sub-conchoidal fracture, and is perfectly sectile. It consists of about 12.0 parts of sulphur, and 87.1 of silver. It is found in Cornwall, also in Germany, Norway, Hungary, the Ural Mountains, and America. It is closely akin to Argentopyrite and Salpaite (q.v.).

**ar-gén-tō-pyr-ite (pyr=pir), s.** [Lat. *argentum* = silver, and Gr. *πυρίτης* (*purites*), adj. = of or in fire; s. = pyrites; *πύρ* (*pur*) = fire.] A mineral made a species by Walters-hausen, but now shown to be a pseudo-morph, composed of argentic, marcasite, pyrrotite, and pyrrargite. Dana classes it with the first of these species.

**ar-gén-toús, a.** [Lat. *argentum*, and Eng. suffix -ous = full of. In Fr. *argenteux*; Port. & Ital. *argenteo*; Lat. *argenteus*.]

**Argentous oxide** is prepared by heating argentic citrate in a stream of hydrogen to 100°. The residue is mixed with potash, which precipitates the oxide as a black powder. Its salts are of no importance.

**ar-gén-tum** (genit. *ar-gén-ti*), s. [Lat. = silver.] [*ARGENT*.]

**Chem.:** A monatomic metallic element; symb., Ag; atomic weight, 108; sp. gr., 10.5; melting point, 1023° C. A white malleable ductile metal. It is not acted upon by air or moisture. When melted it absorbs oxygen, which is liberated when the metal cools. It is scarcely acted upon by hydrochloric acid, but easily dissolved by nitric acid. It has great affinity for sulphur, and tarnishes in the air. [*SILVER*.]

\* **argentum album, s.** [Literally = white silver.] Formerly, silver coin or pieces of silver which passed for money.

\* **argentum Del.** [Literally = God's silver.] "God's penny;" earnest money given to confirm a bargain.

\* **argentum vivum.** [*Lit.* = living silver.] Quicksilver, mercury. [*Glossog. Nova*.]

\* **argh, \*ergh, \*areh** (*ch* guttural), v. t. [*A.S. argtan*.] To hesitate; to be reluctant.

"Antenor argeth with austere words."  
*Destruction of Troy*, 1976.

\* **arghe, \*ar-wę, \*ar-ęh, \*érke** (*O. Eng.*), \* **argh, \*airgh, \*érgh, \*arçh, \*erçh** (*Scotch*), (*gh, ch* guttural), a.

[*A.S. earg, earh* = (1) inert, weak, timid, evil, wretched, (2) swift, fleeing through fear; *arg* = wicked, bad; *arh* = mean; *Iceal. argr*.] [*ARCH, a.*]

1. Timid.

"That day nought so *arghe* he es."  
*Nasmynton*: *Myrrou*. (*S. in Boucher*.)

"And thou art as erow coward."  
*Alisauxer*, l. 3,340. (*Ibid.*)

2. Indolent; averse to work from timidity or other cause.

"And if that dede be not *erke*."  
*Romanus of the Rose*, 4,856.

**ar'gh-nēs, \*arçh-nēs, s.** [*O. Eng. & Scotch argh* = arch; and Eng. suff. -ness.] (*O. Eng. & Scotch.*)

1. Reluctance, backwardness, sluggishness.

"*Arghe* of goods dede to begyn."  
*Nasmynton*: *Myrrou*. (*S. in Boucher*.)

"... and must regret their *arghe* to improve such an opportunity."—*Woodrow*: *Hist.*, l. 2,211.

2. **Sarcastically:** Niggardliness. (*Scotch.*)

"For *arghe*ness to had in a groat,  
He had no will to be a vote."  
*Legend, Sp. & Androta*, p. 233.

**ar-gil, s.** [Fr. *argile* = clay; Sp. & Port. *argilla, arcilla*; Ital. *argilla, argilla*; Lat. *argilla*; Gr. *ἀργίλλος* (*argillos*) or *ἀργίλος* (*argilos*) = white clay, pottera's earth.] [*ARGENT*.]

1. White clay, pottera's earth.

2. *In compos.*: Alumina.

"Clay, strictly speaking, is a mixture of silic, or flint, with a large proportion, usually about one-fourth, of alumina or *argil*."—*Lyell*: *Manual of Geology*, 4th ed., London, 1846, p. 11.

**ar-gil-lā-çé-ōūs, a.** [In Fr. *argilacé*; Port. *argillaceo*; Lat. *argillaceus*; from *argilla*.] Consisting in whole or in considerable measure of clay; clayey.

**argillaceous rocks.** Rocks into the composition of which alumina pretty largely enters. When breathed upon they give out a peculiar earthy odour, arising from alumina apparently combined with oxide of iron. Example: mud, clay, shale. (*Lyell*: *Geology*.)

**argillaceous schist.** Another name for *CLAY SLATE* (q.v.). (*Ibid.*)

**ar-gil-lif-ēr-ōūs, a.** [Fr. *argilifère*, from Lat. *argilla* = white clay, and *fero* = to bear.] Producing white clay; applied to earths abounding with argil.

† **ar-gil-lite, s.** [*ARGILLYTE*.]

† **ar-gil-lit-ic, a.** [*ARGILLYTIC*.]

**ar-gil-lō, only in composition.** [*ARGIL*.] Alumina, or clay, in chemical combination with some other mineral substance. [*ARGIL*.]

**argilla-arenaceous, a.** Containing alumina, or clay, in combination with sand. [ARENACEOUS.]

**argillo-calcareous, a.** Containing alums, or clay, in combination with lime, or rather with carbonate of lime.

**argillo-calcite, s.** [In Ger. *argillokalzit*.] A mineral or rock consisting of alumina in combination with lime.

**argillo-ferruginous, a.** Containing alumina or clay in combination with iron. [FERRUGINOUS.] In Phillips' *Mineralogy*, 2nd ed. (1819), there figures among the varieties of limestone one, the third in order, called *argillo-ferruginous limestone*. Under it are included Calp, A berthall limestone, and blue and white lias. These are now looked at almost exclusively from the geological point of view, and are arranged not according to their chemical composition, but according to their relative ages as ascertained by their stratigraphical position and their fossil remains.

**\* argillo-murite, s.** [In Ger. *argillomurit*; from Lat. (1) *argillo* and (2) *muria* = brine, salt water.]

**Old Mtn.:** A variety of Magnesite not now recognized.

**argill-or-nis, s.** [Gr. *ἀργίλλος* (*argillos*) = white clay, and *ορνίς* (*ornis*) = a bird.]

**Palæont.:** A genus of fossil birds founded by Prof. Owen on remains obtained by Mr. W. H. Shrubsole from the London clay of Sheppey. The *A. longipennis* (Owen) was probably a long-winged natorial bird most nearly related to *Diomedea*, but exceeding the *D. exulans*, or Albatross, in size. (*Q. J. Geol. Soc.*, vol. xxxiii, 1877.)

**† argill-lous, a.** [Lat. *argillosus* = consisting of clay, from *argilla* = white clay. In Fr. *argileux*; Sp. *arcilloso*; Ital. *argillioso*; Gr. *ἀργιλλώδης* (*argillōdēs*), or *ἀργιλλώδης* (*argillōdēs*).] Consisting in whole or in part of clay; pertaining to clay; derived from clay.

"Albuquerque derives this redness from the sand and argillous earth at the bottom."—*Browne: Vulgar Errors*.

**argill-lyte, † argill-lite, s.** [Gr. *ἀργίλλος* (*argillos*) = white clay; and suff. *-lyte*, given by Dana to rocks, as contradistinguished from minerals, which receive the termination *-ite*. Both are from Gr. *ἴτις* (*itis*) = of the nature of.] Another name for Clay Slate (q. v.).

"*Argillyte* and *talouse schist* generally contain more or less of orthoclase in a crypto-crystalline or undistinguishable state."—*Dana: Min.*, 6th ed., p. 539.

**argill-lyt-ic, † argill-lit-ic, a.** [Eng. *argillyte* (q. v.), and suff. *-ic*.]

**Arg-ive, a & s.** [Lat. *Argivus*; Gr. *Ἀργεῖος* (*Argēios*).]

**A. As adjective:** Pertaining or relating to Argos, the capital of Argolis, in the Peloponnesus; or to the Greeks generally.

"I see thee trembling, weeping, captive led, In Argive looms our battles to design."

**B. As substantive:** A native of Argos; hence, a Greek in general.

"Let any Argive at this hour awake." *Pope: Homer's Iliad*, bk. xxiv, 312.

**Arg-gō, s.** [Lat. *Argo*; Gr. *Ἄργώ* (*Argō*); from *ἄργος* (*argos*) = swift.]

1. The ship, fabled by the poets to be the first vessel ever made, in which Jason and his crew sailed to Colchis in quest of the "golden fleece."

2. The constellation Argo Navis (q. v.).

**Argo Navis.** [Lat. = the ship Argo. In Sp. *Argonave*.]

**Astron.:** A very extensive southern constellation introduced by the ancients. Its inconvenient extent has led Sir John Herschel to subdivide it into four parts, by which alternation the stars are more readily referred to. These subdivisions are Carina, Puppis, Vela, and Malus. Its principal star is Canopus (q. v.).

**Arg-gō-an, a.** [Lat. *Argous*; Gr. *Ἀργεῖος* (*Argēios*).] Pertaining or relating to the good ship Argo.

**\* arg-gōil, s.** [ARGOL (2).]

**ar-gōil (1), s.** [ARCHIL.]

**ar-gōil (2), † ar-gal, † ar-gil, \* ar-gōil, s.** [From the same root as *argil* (?) (q. v.).]

**Comm.:** An impure acid potassium tartrate deposited during the fermentation of grape-juice, as it is less soluble in dilute alcohol than in water. Tartaric acid is obtained from it. It is much used in dyeing to dispose of the stuffs to take their colors better. When properly purified by chemical processes it then becomes *cream of tartar*.

**Arg-gōil-ic, a.** [Lat. *Argolicus*; Gr. *Ἀργολικός* (*Argolikos*).] Pertaining or relating to Argolis, a district in the Peloponnesus.

**arg-gōil-ō-gy, s.** [Gr. *ἀργολογία* (*argologia*); from *ἀργός* (*argos*), contr. from *ἀεργός* (*ærgos*) = not working, idle: *ἀ*, priv., and *εργον* (*ergon*) = a work; *λόγος* (*logos*) = a discourse.] Idle speaking. (*Cockeram*.)

**ar-gōn, s.** A new constituent of the atmosphere discovered in 1894 by Lord Rayleigh and Prof. Ramsay. It is possibly a triatomic form of nitrogen.

**Ar-gō-naut, ar-gō-naut, ar-gō-nā-ut, s.** [In Fr. *Argonaute*; Sp. & Port. (pl.) *Argonautas*; Ital. (pl.) *Argonauti*; Lat. (sing.) *Argonauta*; Gr. *Ἀργοναύτης* (*Argonautēs*); *Ἀργώ* (*Argō*), the ship so called, and *ναυτής* (*nautēs*) = a sailor; from *ναῦς* (*naus*) = a ship.]

**A. Of the form Argonaut** (Argonaut in the singular, and Argonauts in the plural):

1. *Argonaut*: One of the heroes who accompanied Jason in the ship Argo when he sailed on his mythic voyage in quest of the "golden fleece." (Generally used in the plural, *Argonauts*.)

"... where the boxing contest took place between the King Amycus and the Argonaut Pollex."—*Grote: Hist. Greece*, pt. 1, chap. xiii.

"... this was a signal to the Argonauts."—*Ibid.*

2. A cephalopod mollusc. [B., ARGONAUTA.]

**B. Of the form Argonauta:** A genus of cephalopod molluscs, the typical one of the family Argonautidae. The best known species is the Argonaut, or Paper Sailor. The shell is thin

ARGONAUT.

and translucent. Aristotle supposed that it floated with the concave side up, the animal holding out its arms, after the manner of sails, to catch the breeze. Poets have ever since repeated the fable; but naturalists know that when the Argonaut floats the sail-shaped arms are applied closely to the sides of the shell, and when the animal crawls at the bottom the so-called boat is reversed like the shell of a snail. In 1875, Tate estimated the known species at four recent and two fossil, the latter being from the tertiary rocks.

**Ar-gō-nā-ut-ic, a.** [Eng. *Argonaut*; *-ic*.] Pertaining to the Argonauts or their celebrated expedition.

"... the Argonaut expedition..."—*Thirlwall: Hist. Greece*, chap. v.

**Ar-gō-nā-ut-ics, s.** [ARGONAUTIC.] Any poem of which the Argonautic expedition is the theme.

**ar-gō-nā-ut-ī-dæ, a. pl.** [ARGONAUTA.] A family of dibranchiate cephalopodous molluscs, the first of the section Octopoda or Octopoda. The dorsal arms (of the female) are webbed at the extremity, secreting a symmetrical involuted shell. The mantle is supported in front by a single ridge on the funnel (*Woodward*). It contains but the single genus *Argonauta* (q. v.).

**Ar-gō Nā-vis, s.** [AROO.]

**ar-gō-sy, † ar-gō-sic, † ar-gū-sē-a, \* rāg-u-sy, s.** [Ital. *una Ragusea* (*naue*). Ragusa itself appears in sixteenth century English as *Aragouse*, *Aragosa*, whence the natural substitution of *argosus* for *ragusea*. (*Athenæum*, March 1, 1884.) A large vessel designed for carrying merchandise; a carrack. "Your argosies with portly sail. . . Do overpeer the petty traffickers." *Shaksp.: Merchant of Venice*, l. 1.

**ar-gōt** (i silent), s. [Fr.] A term originally applied to the language in use among thieves and bad characters generally in France; now extended to any slang.

**ar-gū-a-ble, a.** [Eng. *argue*; *-able*.] Which may be argued; which cannot, *primâ facie*, be set aside as absurd. (*Ed. Rev.*) ( *Worcester*.)

"The neutralisation of a certain area of *Arguable* ground is a very clever phrase for which Lord Cairnes deserves theological or at least episcopal thanks."—*Daily Telegraph*, June 11, 1874.

**ar-gūe, v. t. & i.** [In Fr. *arguer* = to speak against, to accuse. Prov., Sp., & Port. *arguir*; Ital. *arguire*; from Lat. *arguo*, v. t. = to make clear, prove, assert, declare; possibly from the root *arg*.] [ARGENT.]

**A. Transitive:**

**I. Ordinary Language:**

\* 1. [Directly from Fr. *arguer*.] (See etym.) To find fault with; to accuse; to charge with. (Often followed by *of*.)

"The false Matabrune . . . reproved her of the faults that her self had made, arguing her without a cause."—*Helyas*, p. 22. (*Boucher*.)

"I have pleaded guilty to all thoughts and expressions of mine, which can be truly argued of obscenity, profaneness, or immorality, and retract them."—*Dryden: Fables*.

2. [Directly from Lat. *arguo*.] (See etym.)

(a) To debate a question. (See II.)

(b) To prove, to show, to evince; to exhibit by reasoning, perception, or some other satisfactory process.

"Not to know me, *argues* yourselves unknown." *Milton: P. L.*, bk. iv.

(c) To persuade; to conduct by argument to a certain intellectual conclusion, or to a course of conduct.

"It is a sort of poetical logic, which I would make use of, to argue you into a protection of this play."—*Congress: Association to Old Bachelor*.

**II. Technically:**

**Law:** To debate a question in law, or in fact by means of opposing counsel, each doing his best to establish his case to the satisfaction of a judge and jury.

**B. Intransitive:**

1. To reason in favor of a proposition or against it; to attempt to establish or refute a statement.

"If the Convention—it was thus that he argued—was not a Parliament, how can we be a Parliament?"—*Macaulay: Hist. Eng.*, ch. xv.

2. To reason with or against an opponent; to attempt to convince or silence him; or if that be not practicable, then to show others that he has been beaten in the intellectual encounter. (Followed by *against* or *with*.)

"He that, by often arguing against his own sense, imposes falsehoods on others, is not far from believing himself."—*Locke*.

"I do not see how they can argue with any one without setting down strict boundaries."—*Ibid.*

**ar-gūed, pa. par. & a.** [AROUÉ, v. t.]

**ar-gū-er, s.** [Eng. *argue*]; *-er*.] One who argues; a disputant, a controversialist.

"Men are ashamed to be proselytes to a weak arguer, as thinking they must part with their reputation as well as their sin."—*Deacy of Fives*.

**ar-gū-ty, v. t. & i.** [Eng. *argue*], *a*; *-ty* (q. v.).]

**A. Trans.:** To signify. (*Shenstone: To a Friend*.)

**B. Intrans.:** To argue. (*Combe: Dr. Syntax*, Tour ii., c. v.)

**ar-gū-ing, pr. par., a., & s.** [AROUS.]

**A. As pr. par. & a.:** (See the verb.)

**B. As subst.:** Argumentation.

"It will in time Win upon power, and throw forth greater thames For insurrection's arguing." *Shaksp.: Coriolanus*, l. 1.

"But what doth your arguing prove?"—*Job vi. 24*.

**ar-gū-llī-dæ, s. pl.** [AROUUS.] A family of Entomostacans belonging to the order Parasita, or by another arrangement, to the order Siphonostomata, and the first tribe Peltoccephala. [AROUUS.]

ar-gu-lūs, s. [Diminutive from Gr. ἀργός (argos) = . . . swift.] A genus of Entomostreans, the typical one of the family Argulidae. The *A. foliaceus* is a common parasite upon various fresh-water fishes.

ar-gu-mēt, \*ar-gu-mēnte, s. [In Sw. † argument; Fr. argument; Sp. & Port. argumento; Ital. argomento, argumento; Lat. argumentum = (1) proof, evidence; (2) a logical conclusion; (3) the subject of any written composition, theme, plot, &c.: from arguo.] [ARQUE.]

A. Ordinary Language:

I. The act or process of reasoning, argumentation, contention, controversy.

"Which [obstinacy]. . . though proof to argument, was easily shaken by caprice."—Macaulay: Hist. Eng., ch. xii.

II. The state of being argued about: as, "whilst this was under argument;" meaning, whilst it was in the state of being argued about.

III. That about which arguing, debate, or reasoning takes place, or the reasons adduced.

1. Gen.: A theme or topic for argumentation; the subject of any reasoning, discourse, or writing.

" . . . what in me is dark, illumine; what is low, raise and support; That to the height of this great argument I may assert Eternal Providence, And justify the ways of God to men."—Milton: P. L., bk. I.

2. Spec.: The contents of any book presented as an abstract.

"The argument of the work, that is, its principal action, the economy and disposition of it, are the things which distinguish copies from originals."—Dryden.

IV. The reasons adduced in support of any assertion. (This is now the most common use of the word.)

" . . . and fill my mouth with arguments."—Job xxiii. 1.

¶ When it is not stated whether one reasons for or against a proposition, the word argument is followed by about, concerning, regarding, or some such preposition. When it is stated, then an argument to establish a proposition is said to be for or in favour of it (to it is now obsolete); and when to controvert it, then against is the term used.

"If the idea be not agreed on betwixt the speaker and hearer, the argument is not about things, but names."—Locke.

"The best moral argument to patience, in my opinion, is the advantage of patience itself."—Tillotson.

"This, before that revelation had enlightened the world, was the very best argument for a future state."—Atterbury.

B. Technically:

1. Logic: An expression in which, from something laid down as granted, something else is deduced, i.e., must be admitted to be true as necessarily resulting from the other. Reasoning expressed in words is argument, and an argument stated at full length, and in its regular form, is a syllogism. Every argument consists of two parts—that which is proved, and that by which it is proved. Before the former is established it is called the question, and when established, it is called the conclusion, or inference; and that which is employed to effect this thing, the premises. (Whately: Logic, bk. ii., ch. iii., § 1.) [ARGUMENTATUM.]

2. Astron.: Any number or quantity by which another may be found. (Hind.)

Argument of latitude: The distance of a body from one of the nodes of its orbit upon which the latitude depends. (Hind.) [NODE.]

"Argument of the Moon's Latitude is her Distance from the Dragon's Head or Tail, which are her two Nodes."—Glossog. Nova.

\*ar-gu-mēt, v. i. [From the substantive. In Sw. argumentera; Fr. argumenter; Sp. & Port. argumentar; Ital. argumentare, argumentarsi.] To reason about anything.

"Not yet that argumentum faste Upon the pope and his estate."—Gower: Conf. Am., Prolog.

†ar-gu-mēt'-a-ble, a. [Eng. argument; -able.] Which admits of argument. (Chalmers.)

ar-gu-mēt'-tal, a. [Lat. argumentalis.] Pertaining to or containing argument.

"Afflicted sense thus kindly doat set free, Oppress'd with argumental tyranny; And rooted reason finds a safe retreat in thee."—Pope.

ar-gu-mēt'-tā-tion, s. [Fr. argumentation; Sp. argumentación; Port. argumentação; Ital. argumentazione; Lat. argumentatio, from ar-

gumentor = to adduce proof; pa. par. argumentatus, from argumentum = an argument.]

Logic and Ordinary Language:

1. The act or process of reasoning; that is, of drawing a deductive inference from premises given, or of inductively making a generalization from a multitude of facts carefully brought together and sifted.

"Argumentation is that operation of the mind whereby we infer one proposition from two or more propositions premises; or it is the drawing a conclusion, which before was unknown or doubtful, from some propositions more known and evident; so when we have judged that matter cannot think, and that the mind of man doth think; we conclude that therefore the mind of man is not matter."—Watts: Logic.

2. The state of being argued or reasoned upon.

"I suppose it is no ill topic of argumentation, to show the prevalence of contempt, by the contrary influences of respect."—South.

3. That which contains argument, or is a topic for argument.

ar-gu-mēt'-tā-tive, a. [Formed by analogy as if from Lat. argumentativus, from argumentatus, pa. par. of argumentor.]

I. Of things:

1. Consisting of argument, or containing argument.

"The argumentative part of my discourse."—Atterbury.

† 2. Which may be adduced as an argument for. (In this sense followed by of.)

"Another thing argumentative of Providence, is that pappous plumage growing upon the tops of some seeds; whereby they are wafted with the wind."—Ray.

II. Of persons: Having a natural tendency to have continual recourse to argumentation; disputulous.

ar-gu-mēt'-tā-tive-ly, adv. [Eng. argumentative; -ly.] In an argumentative manner.

"Nor do they oppose things of this nature argumentatively, so much as oratoriously."—Sp. Taylor: Artificial Handicraft, p. 115.

ar-gu-mēt'-tā-tive-ness, s. [Eng. argumentative; -ness.] The quality of being argumentative.

\*ar-gu-mēt'-tize, v. t. [Eng. argument; suffix -ize.] To adduce arguments, to argue. [ARGUMENTIZING.]

\*ar-gu-mēt'-tī-zēr, s. [Eng. argumentize(e); -er.]

"This argumentizer should, to have made this story more probable, have cited this proclamation."—Brady: Introd. to Old Eng. Hist. (1864), p. 341.

ar-gu-mēt'-tī-zing, pr. par. [ARGUMENTIZE.]

" . . . all the unmix'd and argumentising philosophy, . . ."—Manselpham: Discourses, p. 34.

ar-gu-mēt'-tūm, s. [Lat.] An argument. [ARGUMENT, B. I.] (Used in Logic.)

argumentum à posteriori. [À POSTERIORI.]

argumentum à priori. [À PRIORI.]

Argumentum ad baculum. (Humorously.) An appeal to the stick, as when a schoolmaster renders an argument which has produced only limited conviction among his pupils conclusive, at least to the extent of silencing gainsayers, by the use of the birch. The phrase may be employed also in a vaguer sense for any appeal to physical force; as when a French political party "descends into the streets."

argumentum ad hominem. [Lit. = argument to a, or to the, man.] An argument drawn from an appeal to the man himself; that is, founded on his professed principles, his conduct, or the concessions he has made. St. Paul's argument, in Rom. ii. 17, &c., is an argumentum ad hominem.

argumentum ad ignorantiam. [Lit. = an argument to ignorance.] An argument in which a too confident disputant is reminded of his ignorance. When John Foster, reasoning again, at atheism, reminds the man who categorically and dogmatically declares that there is no God, that his personal experience has been limited to what has occurred in one fragment of the earth, and one very brief period of time, and that possibly, had he traversed the universe and lived through a bygone eternity, he somewhere or at some time might have found proofs of the Divine existence which would have convinced even him, the argument is one ad ignorantiam.

argumentum ad verecundiam. [Lit. = an argument to modesty.] An appeal to a person's modesty; as if one were to say to an opponent, "Well, Sir Isaac Newton was of a different opinion; but perhaps you are more competent to judge than he was."

Ar-gūs, s. [In Fr., Lat., &c., Argus; Gr. Ἄργος (Argos), from ἀργός (argos) = abiding, bright, because Argus's eyes were so.]

1. Class. Myth.: A son of Arestor, said to have had 100 eyes, of which only two slept at one time, the several pairs doing so in succession. When killed by Mercury, his eyes were put into the tail of the peacock, by direction of Juno, to whom this bird was sacred.

¶ Argus was deemed a highly appropriate name to give to a vigilant watch-dog.

"Argus, the dog, his ancient master knew."—Pope: Homer's Odyssey, bk. xvii. 344.

2. Zool.: A genus of birds of the family Phasianidae, and the sub-family Phasianinae. It contains the Argus, or Argus Pheasant (Argus giganteus). The male measures between five and six feet from the tip of the bill to the extremity of the tail, and is an eminently beautiful bird, the quill-feathers of the wings, which often exceed three feet in length, being ornamented all along by a series of ocellated spots. The Argus Pheasant inhabits the larger islands of the Eastern Archipelago.

¶ The name Skotland Argus is given to a starfish (Asterophyon scutatum). It is called also the Basket Urchin or Sea-basket. The arms branch again and again dichotomously, so that their ultimate fibres are supposed to be about 80,000 in number.

argus-eyed, a. Very observant; allowing little that is cognizable by a momentary glance of the eye to escape one's notice.

argus-shell, s. A species of porcelan-shell, beautifully variegated with spots somewhat resembling those upon a peacock's tail.

ar-gūte, a. [In Sp. agudo; Ital. arguto; Lat. argutus = (1) made clear; (2) wordy; (3) witty, sagacious; from arguo.] [ARGUS.]

- 1. Shrill. (Glossog. Nova.)
- 2. Witty, sagacious. (Glossog. Nova.)

ar-gūte-ness, s. [Eng. argute; -ness.] The quality of being argute. Mental sharpness, sagacity.

" . . . this [Plutarch] tickles you by starts with his arguteness. . . ."—Dryden: Life of Plutarch.

Ar-gūn'-nis, s. [Gr. Ἀργοννίς (Argonnis), and Ἄργοννίς (Argonnis).] (See definition 1.)

1. Greek Mythology: A name of Aphrodite (Venus). The Greeks derived it from a sacred place near the Cephissus, where a boy, Argynnus, beloved by Agamemnon, is said to have died; but Max Müller traces it remotely to the Sanscrit arguni = the bright or splendour, an appellation of the dawn. (Max Müller: Science of Language, 6th ed., vol. ii., 1871, p. 409.)

2. Entom.: A genus of butterflies belonging to the family Nymphalidae. Several species occur in Britain. They are marked on the lower surface of the wings with silvery spots. The *A. Paphia*, or Silver-washed Fritillary, is one of the most common. The other species are *A. Lathonia*, or Queen of Spain Fritillary; *A. Adippe*, or High Brown Fritillary; and *A. Aglata*, or Dark-green Fritillary. (Jardine: Nat. Lib., vol. xxxix., pp. 150 to 158.)

ar-gūr'-ē-s, s. [Gr. ἀργυρέος (argyretos) = silvery.] A genus of plants belonging to the order Convolvulaceae, or Bindweeds. They have large flowers and fine silvery leaves. They occur in the East Indies.

ar-gūr'-ē-ō-sūs, s. [Gr. ἀργυρέος (argyretos) = of silver, silvery.]

Ichthy.: A genus of spiny-finned fishes belonging to the Scenberidae, or Mackerel family. They are akin to the Zeus, or Dory.

ar-gūr'-ite, s. [In Ger. argyrit; from Gr. ἄργυρος (argyros) = white metal, silver, silver money, and Eng. suff. -ite.] A mineral, the same as ARGENTITE (q.v.).

ar-gūr'-ō-pēr'-a-tite, s. [Gr. (1) ἀργυρός (argyros) = silver; (2) possibly κεράτιος (keratios) = horned, from κέρας (keras), genit. κέρατος (keratos) = a horn.] A mineral, the same as Cerargyrite of Dana, and Chlorargyrite (q.v.) of the British Museum Collection.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, there; pine, pīt, sire, sir, marine; gō, pōt, cr, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, qūite, cūr, rāle, fūll; trȳ, Sȳrlan. æ, œ = ē. ey = ā. qu = kw.

**ar-gyŕ-ô-my-gēs, s.** [Gr. ἀργυρός (*arguros*) = silver, and μύω (*mysō*) = . . . to suck.] A genus of moths belonging to the family Yponomeutidae. *A. sylvestra*, the dark porcelina, is occasionally found near London. Three other British species are known. (*Jardine: Nat. Lib.*, vol. xi, pp. 263-4.)

**ar-gyŕ-ô-nô-ta, s.** [Gr. ἀργυρός (*arguros*) = silver, and possibly νῆος (*nēos*) = heaped up, from νῆω (*nēō*) = to heap; or νῆτος (*nētos*) = spun, from νῆω (*nēō*) = to spin.] A genus of spiders belonging to the family Araneidae. The *A. aquatica*, or Diving Spider, weaves for itself a bell-shaped dwelling at the bottom of the water, to which it descends with its prey to devour it. It carries down air entangled among the hairs which cover its body, and sets bubble after bubble free inside its abode till there is sufficient for respiration; for, provided with lungs and not with gills, it cannot breathe after the manner of a fish in the water.

THE DIVINO SPIDER.

**ar-gyŕ-ô-ph-is, s.** [Gr. ἀργυρός (*arguros*) = silver, and φῆς (*phēs*) = a serpent.] Silver-snake. A genus of Saurians or like serpents in appearance that, as will be observed, the word *ophis* (serpent) enters into the composition of their name. They belong to the family Typhlopidae.

**ar-gyŕ-ô-se, s.** [Gr. ἀργυρός (*arguros*) = silver.] *Min.*: The same as ARGENTITE (q. v.).

**ar-gyŕ-ŷ-thrōse, s.** [Gr. ἀργυρός (*arguros*) = silver, and ἐρυθρός (*eruthros*) = red.] *Min.*: The same as PYRRHYZITE (q. v.).

**ar-ī-ā, s.** [Ital.] *Music*: I. *Gen.*: A rhythmical song as contradistinguished from a recitative one.

II. *Specially*: 1. *Formerly*: A measured lyrical piece for one or for several voices. 2. *Now*: A song intended for one voice supported by instruments. It is introduced into a cantata, oratorio, or opera. [Afr.]

**Ār-ī-ād-nē, s.** [Lat. *Ariadne*; Gr. Ἀριάδνη (*Ariadnē*)] I. *Class. Myth.*: A daughter of Minos, king of Crete, who, falling in love with Theseus, then shut up by her father in the labyrinth, gave him a clue by which he threaded his way out. Afterwards she was the wife of Bacchus, who gave her a crown, which ultimately became a constellation called by her name.

"Not Ariadne, if you met her herself, could serve you with a better." *Cowper* (transl. from Vincent Bourne): *The Mass.* 2. *Astron.*: An asteroid, the forty-third found. It was discovered by Pogson, on the 15th of April, 1857.

**-arian, suffix.** [Lat. *-arius*.] As *adjective*: Pertaining to: as *riparian* = pertaining to the bank of a river. As *substantive*: An agent, one who: as *Horarian*, an agent in books, one who looks after books.

**Ār-ī-an** (I), a. & s. [In Ger. *Arianisch* (a.), *Ariamen* (s.); Fr. *Arien*; Lat. *Arianus*; Gr. Ἀριανός (*Arianos*)]

A. As *adjective*: Pertaining to Arius or his doctrine. [See the substantive.] B. As *substantive*: A follower of Arius, presbyter of Alexandria in the fourth century A.D., or one holding the system of doctrine associated with his name. During the first three centuries of the Christian era what was subsequently called the doctrine of the Trinity had become the subject of controversy, chiefly in one direction; it had been decided against Sabellians that there are in the Godhead three distinct persons, whereas Sabellius had in effect reduced the three to one. [SABELLIANISM.] In the year 317, Alexander, Bishop of Alexandria, having publicly expressed his

opinion that the Son of God is not only of the same dignity as the Father, but of the same essence [in Gr. *οὐσία* (*ousia*)], Arius, one of the presbyters, considered this view as leaning too much to Sabellianism, and, rushing to the other extreme, he declared that the Son of God was only the first and noblest of created beings, and though the universe had been brought into existence through His instrumentality by the Eternal Father, yet to that Eternal Father He was inferior, not merely in dignity, but in essence. The views of Arius commended themselves to multitudes, while they were abhorrent to still more; fierce controversy respecting them broke out, and the whole Christian world was soon compelled to take sides in the struggle. Constantine, the first Christian emperor, was then the reigning sovereign, and after he had failed by private means to restore peace and unity, he summoned a council to meet at Nice, in Bithynia, which it did in A.D. 325. It was the first general council and the most celebrated of all. It declared Christ to be *ὁμοούσιος* (*homooousios*), i. e., of the same essence as the Father, whereas Arius regarded Him as only *ὁμοιούσιος* (*homoiouosios*), of similar essence. The erring presbyter was deposed and exiled; but his numerous followers maintained his doctrine, and were at times so successful that each party had in turn the power, of which it had no scruple to avail itself, of using carnal as well as spiritual weapons against its adverse aerie; indeed, it is believed that Arius himself died by poison. It would occupy too much space to detail the vicissitudes of a highly-chequered struggle; suffice it to say that the Arians greatly weakened themselves by splitting into sects [SEM-ARIAN], and the doctrines regarding the relation of the three Divine Personages authoritatively proclaimed at Nice were at last all but universally adopted. They may be found detailed in what are popularly termed the Nicene and the Athanasian Creeds. [NICENE, ATHANASIAN.] They were held almost without a dissentient voice through the Middle Ages, and were cordially accepted by the leading reformers. The Churches of Rome, England, and Scotland are all at one with regard to the doctrine of the Trinity, as are also the most powerful bodies of English Nonconformists. Arianism has from time to time appeared in the churches, but as a rule its adherents have sooner or later gone back to orthodoxy or forward to Unitarianism; and of 164 English religious sects enumerated by the Registrar-General as possessing certified places of worship in England during the year 1878 there was not one officially designated as Arian.

† **Ār-ī-an** (2), a. & s. A rare form of ARYAN.

**Ār-ī-an-ism, s.** [Eng. *Arian*; -ism. In Fr. *Arianisme*; Port. *Arianismo*.] The system of theological doctrine held and taught by Arius and his followers.

"The Sacerdants in Spain were first Catholic, then fell off into Arianism. It was not till the sixth century that Spain was Catholic."—*Niseman: Latin Christianity*, vol. I, p. 348.

**Ār-ī-an-ize, vt. & i.** [Eng. *Arian*; -ize.] A. *Trans.*: To render Arian in tenets; to imbue with Arianism. B. *Intrans.*: To speak after the Arian manner, or according to the Arian tenets.

**Ār-ī-an-iz-ing, pr. par. & a.** [ARIANIZE.] "These some were the Christians, that lived after the downfall of the Arianizing Vandals and the expiring of their power."—*Worthington: Miscellanies*.

**ar-ī-ŷine, s.** [From *Arica*, the principal seaport in Southern Peru.] *Chem.*: Cinchovstine, C<sub>20</sub>H<sub>26</sub>N<sub>2</sub>O<sub>4</sub>. An alkaloid contained in *Arica* bark and in *Cinchona ovata*.

**ar-ī-ŷite, s.** [Apparently from Ital. *Ariccia*, Lat. *Aricia*, in Italy, near Mount Albano, where it occurs.] A mineral, the same as Glauconite (q. v.).

**ar-ī-d, a.** [Fr. *aride*; Sp., Port., & Ital. *arido*; Lat. *aridus* = dry; from *areo* = to be dry.] Dry, parched, wanting in moisture. "... dry sand-hillocks and arid plains, where not a single drop of water can be found."—*Darwin: Voyages round the World*, chap. v.

**ar-ī-das, s.** [From some of the Indian languages.] A kind of taffeta from the East Indies woven from fibres derived from various plants.

**Ar-ī-dēd, s.** [Corrupted Arabic (?)] A fixed star of the first magnitude, called also *Deneb Adige* and a Cygni.

**a-rid-ī-tŷ, s.** [Eng. *arid*; -ity. Fr. *aridité*; Ital. *aridità*, *ariditàade*, *ariditàate*; Lat. *ariditas*.]

I. *Lit.*: The quality or state of being dry, aridness, dryness, drought; absence of moisture. (Used of soil, a country, of the bodily frame, or even the herbage of a plant, such as that of the genus of rushes termed *Xerotea*.)

"Salt taken in great quantities, will reduce an animal body to the great extremity of aridity or dryness."—*Arbushnot on Aliments*.

2. *Fig.*: Absence of proper feeling, as if the affections and other emotions had dried up.

"... no sceptical logic or general triviality, insincerity and aridity of any time and its influences, can destroy this noble inborn loyalty and worship that is in man."—*Carlyle: Heroes and Hero-Worship*, Lect. I.

**a-rid-ī-ūm, s.** [Altered from *Iridium* (?)] The name given by Uilgren to what he believed to be a new metal in the chromium ores of Rörös, in Sweden. Further examination has not confirmed his opinion. (*Graham: Chem.*, 2nd ed., vol. ii., p. 59.)

\* **ār-īe, s.** [EVRIE.]

**Ār-ī-ēl, s.** [Eng. *Ariel* = an airy spirit (Shakesp.: *Tempest*); Heb. אֲרִיֶּל (*Ariel*) = Lion of God; the name of a person (Ezra viii. 6), and of Jerusalem (Isa. xxix. 1, 2; Ezek. xliii. 16). But in the latter case Gasenius brings it from Arab. *ari* = fire-hearth, and Heb. אֵל (*El*) = God = fire-hearth of God.] A name given by Sir John Herschel to one of the interior satellites of Uranus.

**Ār-ī-ēg, s.** [Lat. *aries* = (1) a ram (the animal), (2) the sign of the zodiac, (3) a battering-ram, (4) &c. . . ]

I. *Astronomy*: 1. The constellation Aries, or the Ram, one of the ancient zodiacal constellations, and generally called the first sign of the zodiac.

2. The portion of the ecliptic between 0° and 30° long., which the sun enters on the 21st of March (the vernal equinox). The constellation Aries, from which the region derives its name, was once within its limits, but now, by the precession of the equinoxes, it has gradually moved into the space anciently assigned to Taurus. [PRECENSION.] It is denoted by the symbol ♈, which remotely resembles a ram's head. (*Herschel: Astron.*, §§ 380, 381.)

"At last from Aries rolls the bounteous sun, And the bright Bull receives him."

*Thomson: Seasons; Spring.*

The first point of Aries is the spot in the heavens where the sun appears to stand at the vernal equinox. It is not marked by the presence of any star, but it is not very far from the third star of Pegasus, that called Algenib. It is the point from which the right ascension of the heavenly bodies are reckoned upon the equator and their longitudes upon the ecliptic. [RIGHT ASCENSION.] (*Airy: Popul. Astron.*, &c.)

II. *Astrol.* Aries was considered a choleric or hot sign.

"In Martes face, and in his mandoulon, In Aries, the coleric, the hote signe." *Chaucer: C. T.*, 10,364-5.

† **ār-ī-ō-tāte, v.** [Ital. *arietare*; Lat. *arietatum*, supine of *arieta*; from *aries* = a ram.]

1. To butt. (Used of a ram.) (*Johnson*.) 2. To strike in such a manner as a ram would do. (*Johnson*.)

**ār-ī-ō-tā-tion, s.** [Lat. *arietatio*.]

I. *Lit.*: The act of butting like a ram. II. *Figuratively*: 1. The act of battering of walls by means of a battering-ram.

"Secondly, the strength of the percussion, wherein likewise ordinance do exceed all orientations and ancient inventions."—*Bacon: Essays, Civ. and Mor.*, ch. lviii.

2. The act of striking against anything; quite apart from the metaphor of the ram's buttings.

"Now these heterogenous atoms by themselves, hit so exactly into their proper residence, in the midst of such tumultuary motions and orientations of other particles."—*Glanville*.

**ar-ī-ōt-ta, s.** [Ger. & Fr. *ariette*; Sp. & Port. *arieta*; both from Ital. *arietta*.]

*Music*: A short lively air, tune, or song.

bōl, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aç; expect, Xenophon, exist. ph = f -cian, -tian = shañ. -tion, -sion = shün; -tion, -sion = zhün. -tious, -sious, -ceous = shüs. -ble, -dle, &c = bēl, dēl.

**a-right, \*a-ryght** (*gh* silent), *adv.* [Eng. *a, right*; A.S. *arht*.]

1. *As adverb*: Rightly, directly to what is aimed at; & properly, becomingly, to some good purpose; without failure of any kind.

"Fair queen, he said, direct my dart aright."  
Dryden: *Virgii*; *Seneca* ix. 346.

**\*aright-half, aryght-half, adv.** On the right side, on the one side, on this side.

"*Arigh-half and sleff-half*."  
*Agenside* (ed. Morris), p. 23.

**är-ll, a-ril'-lūs, s.** [Lat. *arillus* = a wrapper.]

*Bot.*: Anything which proceeds from the placenta, and does not form part of the seed itself. Before the time of Richard the first was yet more vaguely applied, as to the testa in Orchidaceae and other plants, and the endocarp of some Rubiaceae and Rutaceae. The mace surrounding the seed in the Nutmeg, and the envelope enclosing the seeds of Eucynimus, are genuine instances of the aril. (*Lindley: Introd. to Bot.*)

**a-ril'-lāte, a-ril'-lā-tōd, är'-lled, a.** [From *aril* (q.v.).] Furnished with an aril.

"*Arillate* seed."—*Lindley: Natural System of Botany*, p. 18.

**är-ll-lōde, s.** [ARIL.] A false aril; one not proceeding from the placenta.

**är-yl-ūs, s.** [A proper name. (*Agassiz*.)] A genus of Bugs of the family Reduviidae.

One species, the *Arilus serratus*, or Wheel-bug, is said to possess electric powers.

**Ar'-i-ma, Ar'-i-man, s.** Another form of ARIMAN.

**\*a-rime, \*a-ri-men, v.t.** [A.S. *ariman*.] To count, to reckon. (*Layamon*, iii. 156.)

**är-ī-ō-lā-tion, här-ī-ō-lā-tion, s.** [In Lat. *ariolatio*, or oftener *hariolatio*; from *hariolus* = to foretell; *hariolus* = a soothsayer.] Soothsaying; divination.

"The priests of elder time deluded their apprehensions with ariolation, soothsaying, and such oblique idolatries."—*Brown*.

**A-rī'-ōn, s.** [Gr. *Ἀρίων* (*Arion*.)]

1. *In Greek Myth.*: The horse of Adrastus, who lived during the Theban war. It was fabled to have the power of utterance, and to foretell future events.

2. *In Zool.*: A genus of Gasteropodous Molluscs of the family Limsidae, or Slugs. The *A. ater* is the common Black Snail. Tate, in 1875, estimated the known recent species at twenty and the fossil at one, the latter from the Newer Pliocene of Maidstone. The sub-genus *Plectrophorna*, ranked under *Arion*, has five species, all from Teneriffa.

**är-ī-ō-se, a.** [From Ital. *arioso* (q.v.).] Characterized by melody as distinguished from harmony.

**är-ī-ō-sō, adv. & s.** [Ital. (1) lightsome, airy; (2) pretty, graceful: from *aria* = air, tune.]

**A.** *As adverb*: After the manner of an air, as distinguished from recitative.

**B.** *As substantive*:  
1. A kind of melody bordering on the style of a capital air.  
2. A short solo in an oratorio or opera, like an air, but not so long.

**\*a-rise, \*a-rize, \*a-ryse** (pret. **a-rōse, \*a-rist'**; ps. par. **a-ris'-en**), *v.i.* [A.S. *arisan* = to arise, rise, rise up, rise again.] [RISE.]

**I.** To move from a lower to a higher place. *Specialty*:  
1. To ascend as vapours do.

"Behold, there *arise*h a little cloud out of the sea, like a man's hand."—*1 Kings* xviii. 44.

2. To emerge from beneath the horizon, as the sun, the moon, or a star (*lit. & fig.*).

"The sun *arise*th, they gather themselves together, and lay them down in their dens."—*Psa.* civ. 24.

**II.** To assume an upright position from a sitting, kneeling, or recumbent attitude.

1. To rise from a bed or from the ground (*lit. or fig.*).

"How long wilt thou sleep, O sluggard! when wilt thou *arise* out of thy sleep?"—*Prov.* vi. 9.

"Rejoice not against me, O mine enemy: when I fall, I shall *arise*."—*Micah* vii. 8.

2. To rise from the seat with the view of engaging in some work (*lit. & fig.*).

"*Arise* ye, and depart: for this is not your rest."—*Micah* ii. 10.

3. To rise from the dead (*lit. & fig.*).

"Wherefore he saith, Awake thou that sleepest, and *arise* from the dead, and Christ shall give thee light."—*Ephes.* v. 14.

**III.** To swell as the waves of the sea in a storm, or a river during heavy rain.

"Thou rulest the raging of the sea: when the waves thereof *arise*, thou stillest them."—*Psa.* lxxxix. 9. (See also *Luke* vi. 48.)

**IV.** To be excited against; to break forth against.

1. As anger.

"And if so be that the king's wrath *arise* . . ."—*1 Sam.* xi. 20.

2. As an assailant rushing against one (*lit. & fig.*).

" . . . and when he [the lion?] or the bear?] *arose* against me, I caught him by his beard, and smote him, and slew him."—*1 Sam.* xvii. 35.

"Let God *arise*, let his enemies be scattered."—*Psa.* lxxviii. 1.

**V.** To advance from a lower to a higher condition with regard to social standing, freedom from trial, intellectual, moral, or spiritual advancement.

" . . . by whom shall Jacob *arise*! for he is small."—*Amos* vii. 2.

**VI.** To commence, to begin.

1. To begin, to commence, to originate; to spring up, to rise, to emerge.

" . . . the persecution that *arose* about Stephen."—*Acts* vi. 19.

"Nerves are said to *arise* or have their origin in the nervous centre to which they are on the one hand attached . . ."—*Todd & Bowman: Physiol. Anat.*, vol. i., p. 216.

2. To begin to act a part; to rise up in a figurative sense.

"Now there *arose* up a new king over Egypt, which knew not Joseph."—*Exod.* i. 8.

**\*a-rish, s.** [Persian.] A Persian measure of length = about thirty-eight English inches. It is not now in use.

**a-ris'-ing, pr. par. & a.** [ARISE.]

"The sun's *arising* gleam."  
*Scott: Lord of the Isles*, iii. 12.

**\*a-rist.** Old pret. of verb *ARISE* (q.v.).

**a-ris'-ta, s.** [Lat. = an awn. In Sp. *arista*.] *Bot.*: The awn or beard in grasses. It is formed by the elongated midrib of a bract, and sometimes diverges from the lamina before reaching its apex. (*Lindley: Introd. to Bot.*)

† **är-ī-s-tarch** (1), *s.* [Gr. *ἀριστάρχης* (*aristarchos*) = best ruling; *ἀριστορχία* (*aristarcheō*) = to rule in the best way, from *ἀριστος* (*aristos*) = best, and *ἀρχή* (*archē*) = to rule. Or from *ἀριστος* (*aristos*) = best, and *ἀρχος* (*archos*) = a leader, from *ἀρχή* (*archē*).] A ruler who is also the best man in the community. (*Ogilvie*.)

**Är-ī-s-tarch** (2), *s.* [In Ger. *aristarch*; Fr. *aristarque*; Sp., Port., & Ital. *aristarco*.] Called after Aristarchus, a grammarian of great celebrity, who lived at Alexandria during the reign of Ptolemy Philadelphus. He had great critical acuteness, which he used in correcting Homer and the other poets.] An acute and severe critic.

**Är-ī-s-tar-chī-an, a.** [From Aristarchus, the severe critic.] [ARISTARCH (2).] Pertaining or relating to Aristarchus, or to severe criticism.

**är-ī-s-tar-chy, s.** [In Ger. *aristarchie*. From Gr. *ἀριστος* (*aristos*) = the best; *ἀρχή* (*archē*) = sovereignty.] The rule of the best; government by the best. Etymologically, almost the same in meaning as *aristocracy*.

"The ground on which I would hold his chief praise, to some of the *aristarchy* and sour censures of these days, requires first an apology."—*Harrington: Brief View of the Ch. of Eng.*, p. 158.

**är-ī-s-tāte, a.** [Lat. *aristatus*, from *arista* = an awn (q.v.).] Awned; furnished with an awn or awns; bearded; as the glumes of barley and many other grasses. (*Loudon: Cycl. of Plants*; *Gloss*.)

**är-ī-s-tōc-raq-çy, \*är-ī-s-tōc-raq-tie, \*är-ī-s-tōc-raq-ty, s.** [In Sw. *aristocrati*; Dut., Ger., & Fr. *aristocratie*; Sp. & Port. *aristocracia*; Ital. *aristocrazia*; Gr. *ἀριστοκρατία* (*aristokratia*) = (1) the government of the best-born, (2) the rule of the best; *ἀριστος* (*aristos*) = the best, and *κράτος* (*kratos*) = to be strong,

mighty, or powerful; hence to rule; *κράτος* (*kratos*) = (1) strength, (2) power over.]

**I. Of persons**:  
1. Government exercised by the best-born class in the community—in other words, by the nobles.

"As to the other forms of government, Socrates would say, That when the chief offices of the commonwealth were lodged in the hands of a small number of the most eminent citizens, it was called an *aristocracy*."—*Xenophon: Memorab. of Socrates*. (*Richardson*.)

The word *aristocracy*, which is now made to mean more of the upper rank than lower those of the nobility, means, by right, not men at all, but only a state-wielding by the nobles; and in England there is no *aristocrazia* but that of the House of Lords.—*Barnes: Early England and the Saxon English* (1859), pp. 110, 111.

2. The nobles and other people of position and wealth in a country, taken collectively; or in a more extended sense, those who rise above the rest of the community in any important respect; thus, in addition to the aristocracy of rank, there is one of intellect, one of knowledge, one of high moral feeling, &c.

"Thus our democracy was, from an early period, the most aristocratic, and our *aristocracy* the most democratic in the world."—*Macaulay: Hist. Eng.*, ch. i.

¶ For the views and feelings of aristocracies see the following examples.

"The principle of an *aristocracy* is equality within its own body, ascendancy over all the rest of the community."—*Arnold: Hist. Rome*, vol. i., p. 66.

¶ **II. Of things**: Rule, dominion, domination, control, ascendancy.

" . . . expelling from his mind the wild democracy of passions, and establishing (according to the quaint expression of Evagrius) a perfect *aristocracy* of reason and virtue."—*Gibbon: Decline and Fall*, ch. xiv. (1849), vol. iv., p. 257.

**är-ī-s-tō-crāt, s.** [In Sw. *aristokrat*; Fr. *aristocrate*; Port. *aristocrata*.] [ARISTOCRACY.]

1. One who is one of a small governing class in a nation, or who, even if he takes no part in government, is of high rank.

"We were thus accompanied by the two greatest *aristocrats* in the country, as was plainly to be seen in the number of all the poorer Indians towards them."—*Barnes: Voyage round the World*, ch. xiv.

2. One who considers the best form of government to be that which places the chief power in the hands of the aristocracy of birth and rank.

3. One who really is, or at least is considered to be, despotic in temper.

"What his friends call *aristocrats* and despots."—*Burke*.

**är-ī-s-tō-crāt-ic, \*är-ī-s-tō-crāt-ick, är-ī-s-tō-crāt-ic-al, s.** [Fr. *aristocratique*; Sp., Port., & Ital. *aristocratico*; Gr. *ἀριστοκρατικός* (*aristokratikōs*).] Pertaining or relating to a government conducted by the nobles or other persons of rank in the community, or pertaining or relating to those nobles or people of rank themselves.

"Four chief powers will be found on examination to influence and divide political society—the kingly, the sacerdotal, the *aristocratic*, and the democratic."—*Evans-Crowe: Hist. France* (ed. 1859), vol. xx., p. 9.

" . . . which will then be the *aristocratical* branch of our legislature."—*Bouring: Bentham's Fragm. on Government*, Works, vol. i., p. 230.

**är-ī-s-tō-crāt-ic-al-ly, adv.** [Eng. *aristocratcal*; -ly.] In an aristocratical manner; as this aristocracy are wont to do.

"The whole Christian world, the universal Church, is by some pretended to be monarchical, or by others *aristocratically* governed."—*Hammond: Works*, vol. ii., pt. ii., p. 97. (*Richardson*.)

**är-ī-s-tō-crāt-ic-al-nēss, s.** [Eng. *aristocratical*; -ness.] The quality of being aristocratic. (*Webster*.)

**\*är-ī-s-tōc-raq-tie, s.** [ARISTOCRACY.]

† **är-ī-s-tōc-raq-tīze, v.t.** [Eng. *aristocrat*; -ize.] To render aristocratic. (*Ogilvie*.)

**\*är-ī-s-tōc-raq-ty, s.** [ARISTOCRACY.]

**är-ī-s-tō-lō-ohī-ç (Mod. Lat.), †är-ī-s-tō-lō-ohy (Eng.), s.** [In Fr. *aristolochie*; Sp. *aristolochia*; Ital. *aristolochia*, *aristolochia*; Port. & Lat. *aristolochia*; Gr. *ἀριστολόχεια* (*aristolochia*) = an herb promoting child-birth; *ἀριστος* (*aristos*) = best, and *λοχεία* (*locheia*) = child-birth.]

**A.** *Ordinary Language.* (*Of the form aristolochy*.) Birthwort; any plant of the genus *Aristolochia*. [See B.]

"*Aristolochia*, 1. *aristolochy*, hartwort."—*Forniaes: Spanish Dict.* (London), 1811.

**fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sire, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, oūr, rūle, fūll; trȳ, Sȳrian sē, sē = ē; š = š, qu = v-w**

B. Bot. (Of the form aristolochia.) A genus of plants, the typical one of the order Aristolochiaceæ, or Birthworts. They have curiously inflated irregular flowers, in some cases of large size; these consist of a tubular coloured calyx, no corolla, six stamens, one style, and a six-celled capsular fruit, with many seeds. One species, the A. clematis, or Common Birthwort, a plant with pale-yellow tubular flowers, swollen at the base, is naturalised among old ruins in the east and south of England. Most of the Aristolochias are emmenagogue, especially the European species, A. rotunda, longa, and clematitis, and the Indian A. indica; the last-named species is also antarthritic. A. bracteata is antihelmintic; when bruised and mixed with castor-oil it is used in cases of obstinate psora. A. odoratissima, of the West Indies, is alexipharmic. The A. fragrantissima of Peru is given in dysenteria, fevers, rheumatism, &c.; A. serpentaria (the Virginian Snake-root), besides being given in the worst forms of typhus fever, is deemed of use against snake-bite; as is also A. trilobata. (Lindley.) The Treasury of Botany points out that faith in the efficacy of some Aristolochia or other, as an antidote to the poison of serpents, prevails in America, Egypt, and India, its existence in regions so remote from each other affording strong evidence of its truth.

ār-is-tō-lō-chī-ā'-rē-æ, s. pl. [ARISTOLOCHIA.]

Bot.: An order of plants placed by Lindley under his last or Aequal alliance of Perigynous Exogens. It has hermaphrodite flowers, six to ten epigynous stamens, a three or six-celled inferior ovary, and wood without concentric zones. In 1844, Lindley estimated the known species at 130. Many are climbing plants. In their qualities they are tonic and stimulating. [ARISTOLOCHIA, ASARUM.]

ār-is-tō-phān'-īc, a. [From Greek Ἀριστοφάνης (Aristophanēs).] (See def.) Pertaining to Aristophanes, the Athenian comic poet, whose plays were exhibited on the stage between B.C. 427 and 388. (North Amer. Rev.)

ār-is-tō-tē-lī-an, a. & s. [Lat. Aristoteli (us); Eng. suffix -an.]

A. As adjective: Pertaining to Aristotle, the greatest philosopher of all antiquity, who was born in B.C. 384, and died in 322. His natal place being Stagira, now Stauros, a town of Macedonia, he is often called "the Stagyrite." He was a disciple of Plato, tutor of Alexander the Great, a highly distinguished teacher at Athens, the author of treatises on nearly every subject of human thought, and the founder of the Peripatetic Philosophy, his writings on the last-named theme and on Logic being venerated during the Middle Ages as no other book was but the Bible.

"... the Aristotelian collection of marvellous stories."—Lewis: Early Rom. Hist. (1855), chap. iii., § 12, vol. 1, p. 95.

B. As substantive: One who regards Aristotle as his master. Spec., an adherent of the Peripatetic Philosophy. [PERIPATETIC.]

"The Aristotelians were of opinion that superfluity of riches might cause a tumult in a commonwealth."—Sir Miles Sandys: Essays, p. 210.

ār-is-tō-tē-lī-an-īsm, s. [Eng. Aristotelian; -ism.] The peripatetic system of philosophy founded by Aristotle. [PERIPATETIC.]

ār-is-tō-tēl'-īc, \*ār-is-tō-tēl'-īck, a. [Ital. Aristotelico; Lat. Aristotelicus.] Pertaining or relating to Aristotle. The same as ARISTOTELIAN.

"The Aristotelick or Arabian philosophy continued to be communicated from Spain and Africa to the rest of Europe chiefly by means of the Jews."—Warton: Hist. Eng. Poetry, l. 448.

ār-ith-mān-ōy, s. [Gr. ἀριθμός (arithmos) = a number, and μαντεία (mantēia) = prophesying, divination; μάντις (mantis) = a diviner, a prophet.] Pretended divination of future events by means of numbers.

a-rith'-mēt-īc, \*a-rith'-mēt-īck, \*a-rith'-mēt-īcke, \*ars'-mēt-rike, \*ars'-mēt-ryk, s. [In Ger. arithmetik; Fr. arithmétique; Port. arithmetica; Sp. & Ital. aritmetica; Lat. arithmetica; Gr. ἀριθμητική (arithmētikē) [supply τέχνη (technē) = art], the fem. of ἀριθμητικός (arithmētikos) = of or for numbering; ἀριθμός (arithmos) = number.] In its broadest sense the science and art which treat of the properties of numbers. This definition, however, would include Algebra,

which is considered a distinct branch. Algebra deals with certain letters of the alphabet, such as x, y, z, a, b, c, &c., standing as symbols for numbers; arithmetic operates on numbers themselves, as 1, 2, 3, 4, &c. Viewed as a science, arithmetic is a branch of mathematics; looked on as an art, its object is to carry out for practical purposes certain rules regarding numbers, without troubling itself to investigate the foundation on which those rules are based.

It is variously divided, as into Integral and Fractional Arithmetic, the former treating of integers, and the latter of fractions. Integral arithmetic is sometimes called Vulgar or Common Arithmetic; and from fractional arithmetic is sometimes separated Decimal Arithmetic, treating, as the name implies, of decimals. There are also Logarithmic Arithmetic for computation by logarithms, and Instrumental Arithmetic for calculation by means of instruments or machines. Another division is into Theoretical Arithmetic, treating of the science of numbers, and Practical Arithmetic, which points out the best method of practically working questions or sums. Political Arithmetic is arithmetic applied to political economy, as is done in the statistical returns so continually presented to Parliament. Finally, Universal Arithmetic is a name sometimes applied to Algebra. The chief subjects generally treated under the science or art of Arithmetic are (1) Numeration and Notation; (2) Addition; (3) Subtraction; (4) Multiplication; (5) Division; (6) Reduction; (7) Compound Addition; (8) Compound Subtraction; (9) Compound Multiplication; (10) Compound Division; (11) Simple Proportion (Rule of Three); (12) Compound Proportion; (13) Vulgar Fractions; (14) Decimal Fractions; (15) Duodecimals; (16) Involution; (17) Evolution; (18) Ratios, Proportions, and Progressions; (19) Fellowship or Partnership; (20) Simple Interest; (21) Compound Interest; and (22) Position. (Hutton, &c.) Of these, the most important are the simple processes of Addition, Subtraction, Multiplication, and Division, the judicious use of which, singly or in combination, will solve the most complex arithmetical questions.

"At the same time one of the founders of the Society, Sir William Petty, created the science of political arithmetic, the humble but indispensable handmaid of political philosophy."—Macaulay: Hist. Eng., ch. iii.

Arithmetic of Infinites: The summing up of an infinite series of numbers.

ār-ith-mēt'-īc-al, a. [Eng. arithmetic; -al.] Pertaining to arithmetic.

"... should his comprehension of arithmetical principles be unquestionable."—Herbert Spencer: Psychol., 2nd ed., vol. ii., § 388, p. 512.

arithmetical complement. That which a number wants to make it reach the next highest decimal denomination. Thus the arithmetical complement of 4 is 6, for 4 + 6 are = 10, and that of 642 is 358, because 642 + 358 are = 1,000. The arithmetical complement of a logarithm is what it wants to make it reach 10.

arithmetical mean.

1. The number, whether it be an integer or a fraction, which is exactly intermediate between two others. Thus, 5 is the arithmetical mean between 2 and 8; for 2 + 8 are = 5, and 5 + 3 are = 8. To find such a mean, add the two numbers together, and divide their sum by 2; thus 2 + 8 = 10, and 10 ÷ 2 = 5.

2. More loosely: Any one of several numbers in an arithmetical ratio (q.v.) interposed between two other numbers. Thus, if 6, 9, and 12 be interposed between 3 and 15, any one of them may be called an arithmetical mean between these two numbers.

arithmetical progression. A series of numbers increasing or diminishing uniformly by the same number. If they increase, the arithmetical progression is said to be ascending, and if they decrease, descending. Thus the series 3, 6, 9, 12, 15 is an ascending arithmetical progression mounting up by the continued addition of 3; and the series 3, 6, 4, 2, is a descending one, falling regularly by 2. [PROGRESSION.]

arithmetical proportion. The relation existing between four numbers, of which the first is as much greater or less than the second, as the third is than the fourth; that the equality of two differences or arithmetical

ratios. In such cases the sum of the extremes is = that of the means. [PROPORTION.]

arithmetical proportionals. The numbers so related to each other. (The term is opposed to geometric proportionals.) [PROPORTIONAL.]

arithmetical relation. The comparison of numbers in an arithmetical progression with the view of ascertaining how much they differ from each other.

arithmetical ratio. The difference between any two numbers constituting part of a series in arithmetical progression.

ār-ith-mēt'-ī-ōal-īy, adv. [Eng. arithmetical; -ly.] In an arithmetical manner; after the principles of arithmetic.

"Though the fifth part of a zecche, being a simple fraction, and arithmetically regular, it is yet no proper part of that measure."—Arbutnot: On Coins.

ār-ith-mē-tī'-cian, s. [Eng. arithmetic; -ian. In Fr. arithmétique.] One skilled in arithmetic; a proficient in arithmetic.

"Gregory King, Lancaster herald, a political arithmetician of great acuteness and judgment."—Macaulay: Hist. Eng., ch. iii.

a-rith'-mīc, s. [Gr. ἀριθμός (arithmos) = number.] Arithmetic. (Sir E. Arnold, v. 132.)

ār-ith-mōc'-rā-ōy, s. [Gr. ἀριθμός (arithmos) = number, and κράτος (kratos) = to rule.] The rule of mere numbers. (C. Kingsley: Alton Locke, pref.)

a-rith'-mō-crāt'-īc, a. [ARITHMOCRACY.] Pertaining to an arithmocracy (q.v.); (C. Kingsley: Alton Locke, pref.)

ār-ith-mōm'-ē-tēr, a. [From Gr. ἀριθμός (arithmos) = a number, and μέτρον (metron) = a measure.] A machine which enables a person, however unskilled, to perform the operations of multiplication and division with facility, rapidly, and unflinching accuracy. The arithmometer of M. Thomas (De Colmar), highly commended by General Hanington (Journal of Actuaries, vol. xvi., p. 244) and by Mr. Peter Gray, F.R.A.S., and others, does more, for, in forming the product of two given numbers, it can either add that product to, or subtract it from, another given number, according to the pleasure of the operator. The machine is provided on its face with spaces for the reception of three numbers, say P, Q, and R. These being properly placed, the turning of a handle brings out the value of P + Q R or P - Q R, according as the regulator was adjusted for addition or subtraction.

ark, \*arke, \*aroke, s. [A.S. arc, ere, enre; Sw., Dan., and Dut. ark; Ger. and Fr. arche; Goth. arka; Gael. arca; Prov. archa; Irish airg, aric; Sp., Port., Ital., and Lat. arca. From the same root as Lat. arceo = to enclose.]

I. A chest, a box, a coffer with a lid. Specially—

1. The ark used in Jewish worship, called the Ark of the Covenant (Numb. x. 33, &c.), the Ark of the Testimony (Exod. xxx. 6), the Ark of God (2 Sam. vii. 2), the Ark of IIus (God's Testament (Rev. xi. 19), the Ark of

JEWISH ARK. (FROM CALMET.)

Thy (God's) strength (Ps. cxxxii. 8), and the Ark of the Lord (1 Kings ii. 26). It was an oblong chest of acacia-wood overlaid with gold inside and out. On its top was the mercy-seat, and inside it at first were the two tables of stone, the pot of manna, and Aaron's rod which budded (1 Kings viii. 9, and Heb. ix. 4)

ārl, bōy; pōūt, jōwl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -īng, -cian, -tian = shan. -tion, -sion = shūn. -tion, -sion = shūn. -tious, -sious, -cions = shūs. -ble, -dle, &c. = bel, del.

At each of the four corners was a ring into which staves or poles might be fitted to carry it when it required to be moved.

2. A large chest for holding meal. (*Scott.*)

"... when we have sent awa the hall meal in the ark and the giral."—*Scott: Old Mortality*, chap. xx.

II. A chest-like vessel or ship. *Specialty*—

1. *Literally*:

(c) Noah's ark, a chest-like vessel about the dimensions of the *Great Eastern* steam-ship.

"Make thee an ark of gopher-wood."—*Gen.* vi. 14.

(b) The ark made of bulrushes, rendered watertight by a coating of bitumen, in which Moses when an infant was committed to the Nile.

"... she took for him an ark of bulrushes. . . ."—*Exod.* ii. 3.

(c) *In America*: A large boat used on the American rivers to transport produce to market. (*Webster.*)

2. *Fig.*: Life.

"But thou," said I, "hast mis'd thy mark,  
Who sought'st to wreck my mortal ark."  
*Tennyson: The Two Voices.*

**ark**, *v.t.* [From the substantive.] To enclose within an ark. [ARKED.]

**ark-an-gite**, *s.* [From Arkansas, where it is found.] A mineral, a variety of Brookite (q.v.) It occurs in thick black crystals.

**arke**, *s.* [ARC, ARCH.]

"The arke of his artificial day hath tronne  
The fourthe part, of half an hour and more."  
*Chaucer: C. T.*, 4,423-5.

**ark-éd**, *pa. par. & a.* [ARK, V.]

"When arkéd Noah and seven with him."  
*Warner: Abdon's Eng.*, bk. I, chap. I.

**ark-ite**, *s. & a.* [ENG. ARK; -ITE.]

A. *As substantive*: An inmate of the ark. (*Bryant.*)

B. *As adjective*: Pertaining or relating to Noah's ark. (*Bryant.*)

**ark-sú-tite**, **ark-sú-dite**, *s.* [From Ark-sut Flord, in South Greenland.] A mineral classed by Daus in his Cryolite Group of Fluorine Compounds. It is a white, translucent, and brittle species, with vitreous lustre, except on cleavage faces, where it is pearly. Its composition is—fluorine, 51.03; alumina, 17.87; lime, 7.01; soda, 23.00; and water, 0.57, with 74 of insoluble matter.

**ark-ýs**, *s.* [Gr. *ἀρκυς* (*arkus*) = a net.] A genus of spiders. The *A. lancier* is yellow with red at the sides. It is a native of South America.

**ärke**, \***ärke** (pl. **ärles**, **ärles**), *s.* [A.N. *earles*, *yearles* (pl.).] Generally in the plural. Earnest-money; money given to a person hired as a servant as an earnest that in due time the wages for which he has stipulated will be paid.

"As for Morton, he exhausted his own very slender stock of money in order to make Cuddie such a present, under the name of *ärke*, as might show his sense of the value of the recommendation delivered to him."—*Scott: Old Mortality*, chap. viii.

**arle-penny** (sing.), **arles-penny** (pl.), *s.* A penny given for such a purpose.

\***arled**, *a.* [A.S. *aril* = a welt, the border of a garment, a robe.] Ring-streaked.

"Sep or got, haused, arled, or grel."  
*Story of Gen. and Exod.* (ed. Morris), 1,723.

\***ar-ly**, *a. & adv.* [EARLY.]

**arm** (1), \***arme**, *s.* [A.S. *arm*, *earn*: Sw., Dan., Dut., Mod. Ger., O. L. Ger., and O. H. Ger. *arm*; O. Fris. *erm*; O. Icel. *armr*; Goth. *arms*; Arm. *armm*; Lat. *armus* = an arm; Gr. *ἀρμός* (*harmos*) = a fitting, a joint; *ἀρῶ* (*arō*) = to join, to fit together; Lat. and Gr. root *ar* = to join, to fit.]

A. *Ordinary Language*:

I. *Lit.*: The portion of the human body on either side, extending from the shoulder to the hand; the corresponding part also in a quadrumanous animal, a monkey for example. More rarely, one of the forelegs in a digitated quadruped of any kind.

"Then let my arm fall from my shoulder-blade. . ."  
*Job* xxxi. 22.

"The hair of the orang-outang is of a brownish-red colour, and covers his back, arms, legs, and outside of his hands and feet."—*Griffith's Curator*, I. 233.

"... the arms and paws [of a squirrel, *Sciurus bicolor*] are bordered with a beautiful series of hairs."  
*Ibid.*, iii. 182.

II. *Figuratively*:

1. *Of material things*: Anything which stands out from that of which it constitutes a part, as an outstretched arm does from the human body. *Specialty*—

(a) A branch of a tree, especially when it is tolerably horizontal.

"A broad oak, stretching forth its leafy arms."  
*Wordsworth: Excursion*, bk. v.

(b) The projecting supports for the human arms on the two sides of some chairs, hence called *arm-chairs*. [ARM-CHAIR.]

(c) [See B. 2, Naut.]

(d) A narrow inlet running from the ocean some distance inland. The White Sea, the Baltic, and the Adriatic Sea may be considered arms of the sea.

"... good reasons can be assigned for believing that this valley was formerly occupied by an arm of the sea."—*Jarvis: Voyage round the World*, chap. ix.

2. *Of things not material*:

(a) Power, physical, mental, moral, or spiritual; support of any kind.

"Behold, the days come, that I will cut off thine arm, and the arm of thy father's house, that there shall not be an old man in thine house."—*I Sam.* ii. 31.

(b) Trust, dependence.

"Cursed be the man that trusteth in man, and maketh flesh his arm, and whose heart departeth from the Lord."—*Jer.* xvii. 5.

B. *Technically*:

1. *Her.* The human arm is often found constituting part of a crest. [CUBIT-ARM.]

2. *Naut.* The word *arm* is used for the extremity of a yard. (Generally called the *yard-arm*.)

**arm-and-arm**, *adv. & a.* The same as ARM-IN-ARM (q.v.).

"Oo, fool; and arm-and-arm with Clodio, plead  
Your cause before a bar you little dread."  
*Cooper: Progress of Error.*

**arm-bone**, *s.* The bone of the arm (the humerus).

"The bone of the arm (humerus) is of remarkable length."—*Owen: Classific. of the Mammalia*, p. 66.

"... an extensive fracture, badly united, of the left arm-bone."—*Ibid.*, p. 90.

**arm-chair**, *s.* A chair with arms. It is written also *armed-chair*.

"Her father left his good arm-chair,  
And rode his hunter down."  
*Tennyson: The Talking Oak.*

**arm-ful**, *a.* [ARMFUL.]

\***arm-gret**, *a.* As great or as thick as the arm.

"A wrethe of gold arm-gret, and hage of wight,  
Upon his heed, set ful of stooles bright."  
*Chaucer: C. T.*, 2,147-8.

**arm-hole**, *s.* The arm-pit.

"Tickling is most in the soles of the feet, and under the arm-holes, and on the sides. The cause is the thinness of the skin in those parts, joined with the rareness of being touched."—*Bacon: Nat. Hist.*

"In Ezek. xiii. 18, the word rendered "arm-hole" should probably be translated "fore arm, cubit," though some make it the wrist.

**arm-in-arm**, *adv. & a.* With one's arm interlocked with that of another; arm-and-arm.

"When arm-in-arm we went along."  
*Tennyson: The Miller's Daughter.*

**arm's-end**, *s.* A metaphor derived from boxing, in which the weaker man may overcome the stronger, if he can keep him from closing. (*Lit. & fig.*)

"For my sake be comfortable; hold death awhile at the arm's-end."—*Shakep.: As You Like It*, ii. 6.

**arm-shaped**, *a.* Shaped like the arm.

**arm's-length**, *s.* A phrase derived from boxing [ARM'S-END], and signifying to keep a person at a distance, not to permit him to attempt familiarity.

"He ceased, and Paris held the costly fruit  
Out at arm's-length. . . ."—*Tennyson: Æneid.*

**arm's-reach**, *s.* The reach of the arm, (*Todd.*)

**arm-strong**, *a.* Powerful in the arms. (*Greene: Menaphon*, p. 56.)

**arm** (2), *s.* [ARMS.] A weapon of war.

¶ Generally in the pl., ARMS (q.v.).

**arm** (1), *v.t.* [From the substantive arm (1).]

1. To offer the arm to; to take by the arm; to take up in the arms.

"Make him with our pikes and partisans  
A grave: come, arm him."  
*Shakep.: Cymbeline*, iv. 2.

† 2. To furnish with bodily arms.

"Her shoulders broad and long.

*Armed long and round.*"

*Beaumont & Fletcher.*

**arm** (2), *v.t. & i.* [From Eng. arm (2). In Fr. *armer*; Sp. & Port. *armar*; Ital. *armare*; Lat. *armo* = to furnish with implements, and *spec.*, with warlike weapons; from *arma* = arms.]

A. *Transitive*:

I. *Ordinary Language*:

1. *Lit.*: To equip with weapons, defensive or offensive.

"And Saul armed David with his armour, and he put an helmet of brass upon his head; also he armed him with a coat of mail."—*I Sam.* xvii. 38.

2. *Figuratively*:

(a) *Of material things*: To add to anything what will give it greater strength or efficiency.

"You must arm your hook with the line in the inside of it."—*Walton: Angler.*

(b) *Of things immaterial*: To impart to the mind or heart any thing that will make it more fitted for offence or defence; to provide against.

"... arm yourselves likewise with the same mind."  
—*I Pet.* iv. 1.

II. *Technically*:

**Magnetism**. To arm a magnet is to connect its poles by means of a soft iron bar. [ARMATURE.]

B. *Intransitives*: To equip with weapons of war. (Used of individuals or of communities.)

"... and thus aloud exclaims:

*Arm, arm, Patroclus!* . . ."

*Pope: Homer's Iliad*, bk. xvi, 144-54.

\***arm**, \***arme**, \***ar-gme**, *a.* [Sw., O. Icel., and Mod. Ger. *arm* = poor.] (*Moral Ode*, ed. Morris, 223.)

**ar-mā-da**, \***ar-mā-dō**, *s.* [Sp. *armada* = a war fleet as contradistinguished from *flota* = a fleet of merchant vessels; Lat. *arma* = arms. From Spanish, *armada* has passed into German, French, &c., and is = Ital. *armata* = a navy, a fleet.]

(1.) *Spec.*: The celebrated fleet, called at first, by anticipation, "The 'Invincible' Spanish armada," which was sent in 1588 to assail England, but which, utterly falling in its object, and coming to a tragic and inglorious end, was latterly known simply as the "Spanish armada," the word "invincible" being dropped.

"They melt into thy yeast of waves, which mear  
Alike the Armada's pride or spoils of Trafalgar."  
*Byron: Child Harold*, iv. 131.

Hence (2.) *Gen.*: Any war fleet.

"So by a roaring tempest on the food  
A whole armada of convicted sail  
Is scatter'd and disjoin'd from fellowship."  
*Shakep.: King John*, iii. 4.

"... We will not leave,  
For them that triumph, those who grieve,  
With that armada gay."  
*Scott: Lord of the Isles*, l. 17.

**ar-mā-dil-la**, *s.* [In Fr. *armadille*; from Sp. *armadilla*, dimin. of *armada*.] A small armada.

**ar-mā-dil-lō** (plural **-lōs**, and **-lōes**), *s.* [In Ger. *armadill* and *armadilther*. From Sp. *armadillo*.]

1. The Spanish American name, now imported into English, of various Mammalia belonging to the order Edentata, the family Dasypodidae, and its typical genus *Dasypus*. [DASYPOD.] The name *armadillo*, implying

ARMADILLO.

that they are in armour, is applied to these animals because the upper part of their body is covered with large strong scales or plates, forming a helmet for their head, a buckler for their shoulders, transverse bands for their

back, and in some species a series of rings for the protection of their tail. Another peculiarity is the great number of their molar teeth; these amount in some species to more than ninety. There are five toes on the hinder feet, and four or five, according to the species, on the anterior ones. The fore feet are admirably adapted for digging, and the animal, when it sees danger, can extemporise a hole and vanish into it with wonderful rapidity. If actually captured, it rolls itself into a ball, withdrawing its head and feet under its strong armour. There are several species—such as the Great Armadillo, or Tatu (*Dasypus gigas*), the Three-banded Armadillo, or *Apara* (*D. Apar*), the Six-banded Armadillo (*D. sexcinctus*), and the Hairy Armadillo (*D. villosus*). They feed chiefly on ants and other insects and worms, and are peculiar to South America, where a giant-animal of similar organisation, the Glyptodon, lived in Tertiary times.

"It is generally understood that the Armadillos bring forth but once a year."—*Griffith's Cuv.*, iii. 286.

2. A genus of Crustaceans belonging to the order Isopoda, and the family Oniscidae, the type of which is the well-known wood-louse. It is so called partly from its being covered with a certain feeble kind of armour; but chiefly from its rolling itself up into a ball after the fashion of the South American mammalian Armadillos.

**armadillo-like**, *a.* Like an armadillo, covered with natural armour.

"In the Pampean deposit at the Bajada I found the osseous armour of a gigantic armadillo-like animal."—*Darwin: Voyage round the World*, ch. vii.

\* **ar-mā'-dō**, *s.* [ARMADA]

**ar-mā-mēt**, *s.* [In Fr. *armement*; Sp. *Port.*, & Ital. *armamento*; Lat. *armamentum* = the outfitting of a ship, the supplying it with everything excepting only its hull: *arma* = to furnish with implements; *arma* = implements, . . . the tackle of a ship.]

I. The act of arming a fleet or army; the state of being armed.

II. That which constitutes the equipment or that which is itself equipped.

1. That which constitutes the equipment. (Often in the pl., *armaments*, signifying everything needful to render the naval and military forces of a country efficient.) *Spec.*, weapons and ammunition.

" . . . and the increase [of expenditure] is for the most part due to more costly armaments."—*Times*, Nov. 11, 1874.

2. The forces equipped

(a) A naval expedition fitted out for war; a fleet, with the men, guns, ammunition, and stores on board.

"English sailors, with more reason, predicted that the first gale would send the whole of this fair-weather armament to the bottom of the Channel."—*Macaulay: Hist. Eng.*, ch. xvi.

(b) Land forces fully equipped; an army encamped for war. (*Lit.* & *fig.*) (*Byron: Siege of Corinth*, xx.)

\* **ar-mā-mēn'-tā-rŷ**, *s.* [Lat. *armamentarium*.] An armour, an arsenal. (*Johnson.*)

**ar-man**, *s.* [Fr.] A confection for restoring appetite in horses. (*Johnson.*)

\* **ār-mā-rŷ**, *s.* [Lat. *armarium* = a chest, a coffer.] [ALMERY.] A chronicle or archive. (*Wycliffe: 1 Esdras* ii. 15.)

**ar-mā-tŷre**, *s.* [In Ger. *armatur*; Fr. *armateur* and *armature*; Sp. *armadura*; Ital. & Lat. *armatura* = (1) armour, (2) armed soldiers, (3) a kind of military exercise.]

**A. Ordinary Language:**

1. Armour worn for the defence of the body, or, more frequently, the armour in which some animals are enveloped for their protection against their natural foes.

"Others should be armed with hard shells, others with prickles; the rest, that have no such *armature*, should be endued with great swiftness and perversity."—*Ray: Creation*.

2. Offensive weapons.

"The double *armature* is a more destructive engine than the tumbrilary weapon."—*Dr. H. More: Decays of Pity*.

**B. Technically:**

1. **Magnetism:** The armatures, called also the *keepers*, of a magnetic bar are pieces of soft iron placed in contact with its poles. These, by being acted on inductively, become magnets, and, re-acting in their turn, not

merely preserve, but even increase, the magnetism of the original bar. Magnets thus provided are said to be *armed*.

2. **Electricity:**

(a) *The internal and external armatures, or coatings of a Leyden jar*, are the coatings of tin-foil on its interior, and part of its exterior, surface.

(b) *Siemens' armature or bobbin:* An armature designed for magneto-electrical machines,

SIEMENS' CYLINDRICAL ARMATURE.

*a.* Cylinder. *b.* Cylinder on which covered copper wire is wound. *c.* Cylinders inserted in magnets. *N.* North Pole. *S.* South Pole.

in which the insulated wire is wound longitudinally on the core, instead of transversely.

3. *Arch.*: Iron bars employed for the consolidation of a building. (*Gloss. of Arch.*)

**armed**, *a.* [From *arm*, *s.*] Furnished with arms in a literal or figurative sense. Especially in comp., as *long-armed*, *strong-armed*, &c.

**armed**, *pa. par.* & *a.* [ARM, *v.t.*]

**A. Ordinary Language:**

**I. Literally:**

1. Equipped with weapons offensive or defensive, or both. [*B.*, 1. *Mil.*]

"So the armed men left the captives and the spoil . . ."—*2 Chron.* xviii. 14.

2. Having its natural efficiency increased by mechanical appliances.

"But they continually grow larger, and pass by insensible gradations into the state of cloud, when they can no longer elude the armed eye."—*Tyndall: Frag. of Science*, 3rd ed., vi. 150.

**II. Fig.**: Strengthened in mind and heart against danger.

**B. Technically:**

**I. Military and Naval:**

1. *Of men.* An armed body of men is a military detachment provided with arms and ammunition, ready for an engagement. [*A.*, 1.] (*James: Mil. Dict.*)

2. *Of ships:*  
(a) *Armed in full*, that is, armed after the manner of a transport. Having had part of her guns removed to make more room. In such a case the effective armament of the vessel is less than that at which she is rated. (*Webster.*)  
(b) *An armed ship* is one taken into the Government service, and equipped in time of war with artillery, ammunition, &c. (*James.*)

3. *Of shot.* A crossbar shot is said to be armed when some rope-yarn is rolled round the end of the iron bar running through the shot.

4. *Of procedure.* *Armed neutrality.* [NEUTRALITY.]

**II. Heraldry:**

1. Furnished with arms.

"A man armed at all points (see the annexed figure) is a man covered with armour on every portion of him excepting only his face.

2. Adding to anything that which will give it greater strength or efficiency.

"The term *armed*, followed by *of*, is applied to a beast of prey when his teeth and claws, or to a predatory

ARMED AT ALL POINTS.

bird when his talons and beak, are differently coloured from the rest of his body.

**III. Biology. Used—**

1. (*Zool.*) *Of the natural armature of various parts of the body of man or of the inferior animals:* Furnished with teeth, tusks, nails, claws, &c.

" . . . the most formidably armed jaws."—*Owen: Classif. of Mammalia*, p. 76.

2. (*Botany:* Of thorns, prickles, &c., on plants.

**IV. Magnetism.** An armed magnet: One provided with an armature (*q.v.*)

\* **ar-mōe**, *s.* [ARMY.]

**Ar-mō-nŷ-an**, *a. & s.* [Eng. *Armenia*(a); -an. In Fr. *Arménien*; from Lat. *Armenia*; Gr. *Ἀρμενία* (*Armenia*). Armenia, in 2 Kings xix. 37, is in the original *Ararat*, and should have been so rendered.]

**A.** *As adjective:* Pertaining to Armenia, a country situated on the mountainous region between the Black and the Caspian Seas, between latitudes 37° and 42° N., and long. 89° to 50° E.

**B.** *As substantive:*

1. A native of Armenia.

2. The language spoken by the Armenians, who are not confined to their native land, but are many of them successful merchants in India and other parts of the East. The *Living* comes from the *Old* or *Dead* Armenian, ranked by Max Müller under the Iranic Branch of the Southern Division of the Aryan Languages.

**Armenian bole.**

*Mineralogy:* A kind of bole from Armenia. [BOLE.]

**Armenian stone.**

*Mineralogy:* A blue carbonate of copper brought from Armenia.

**Armenian whetstone.**

*Min.*: Dana's rendering of the Greek term *ἀκόνι ἐξ Ἀρμενίας* (*akonē ex Armenias*), the name given by Theophrastus to emery (*q.v.*)

\* **ar-mēn'-tāl**, *a.* [Lat. *armentalis*; from *armentum* = cattle for ploughing or for draught.] Pertaining or relating to a herd of cattle. (*Bailey.*)

**ar-mēn'-tine**, *a.* [Lat. *armentum* (ARMENTAL), and Eng. suffix -ine.] The same as ARMENTAL (*q.v.*) (*Bailey.*)

\* **ar-mēn'-tōse**, *adj.* [Lat. *armentosus*.] Abounding with cattle. (*Bailey.*)

**ar-mē-r-ŷ-a**, *s.* [From the term *Flos Armenia*, applied by the botanists of the Middle Ages to some of the Sweet William Pinks. *Flos Armenia* again is, according to Clusius, the French word *armoiries* (armorial bearings), Latinised. (*Hooker and Arnol.*)] A genus of plants belonging to the order Plumbaginaceae (Leadworts). It contains two British species. The first is the *A. maritima*, the Common Thrift, Sea-pink, or Sea-gillflower so abundant on our coasts, and the *A. plantaginea*, or Plantain-leaved Thrift of the island of Jersey. A variety of the former species occurs on the tops of mountains. Next to the Box, *A. vulgaris* is the best edging for walks.

**ar-mēt**, *s.* [French = armour for the head.] A helmet used in the thirteenth, fourteenth, and fifteenth centuries. It is represented in the annexed illustration.

**armet-grand**, *s.*

[Fr. *grand* = great.] An armet worn with a beaver.

**armet-petit**, *s.*

[Fr. *petit* = little.] An armet worn without a beaver. It had a guard for the face, consisting of three bars.

**arm-fūl**, \* **arm'-fūll**, *s.* [Eng. *arm*; *full*. In Ger. *armvoll*.] As much of anything as an arm can hold.

"He comes so lazily on in a smile, with his 'armfull of weeds,' . . ."—*Milton: Apol. for Isaac Newton*.  
"As an especial favour, he allowed me to purchase, at a high price, an armful of dirty straw."—*Darwin: Voyage round the World*, chap. xvi.

ARMET.

**\* arm-gâunt, a.** [Eng. *arm*; *gaunt*.] As gaunt—i.e., as slender—as the arm; no thicker than the arm.  
 "So he nodded,  
 And soberly did mount an armgaut steed."  
*Shakesp.: Ant. & Cleop., l. 6.*

† **ar-mif-er-ous, a.** [Lat. *armifer* = weapon-bearing; *arma* = arms, and *fero* = to bear.] Bearing arms. (*Ogilvie*.)

**ar-mi-gör, s.** [Lat. *armiger*, in inscriptions *armigerus*; from *arma* = arms, and *gero* = to wear, to bear about with one.] An esquire, properly one who attended on a knight, to bear his shield and otherwise render him service. [ESQUIRE.]

"Slender, Ay, and ratororum too; and a gentleman born, master parson: who writes himself *armigero*: in any bill, warrant, quitance, or obligation, *armigero*."—*Shakesp.: Merry Wives of Windsor, l. 1.*

**ar-mig-er-ous, a.** [In Sp., Port., & Ital. *armigero* = martial (see ARMIGER), "bearing arms."] Pertaining or relating to an esquire or person who attended on a knight. [See ESQUIRE.]

"They belonged to the *armigerous* part of the population."—*De Quincey. (Goodrich & Porter.)*

**ar-milla, s.** [Lat. *armilla* = a bracelet.] [ARMILLA.]

*Mech. & Astron.*: An ancient astronomical instrument. It was of two forms: an *Equinoctial Armil*, constructed with a single ring placed in the plane of the equator, for determining the line of the equinoxes; and a *Solstitial Armil*, in which there were two or more rings, one of them in the plane of the meridian, for ascertaining the solstices. (*Whevell*.)

**ar-mi-lân-ça, s.** [Lat., according to Isidore, contract. from *armilatus* = a military cloak.] A cloak covering the shoulders, worn in England in mediæval times.

"The book of Worcester reporteth that in the year of our Lord . . . 1372, they first began to wear in it a ertial weed which they called a cloak, and in Latin *armilatus*, as onely covering the shoulders."—*C Camden: Remains, 195.*

**ar-mil-la, s.** [Sp., Port., Ital., & Lat. = (1) an arm-ring, a bracelet, (2) a hoop or ring; from *armus* = arm.]

1. A bracelet.
2. *Mech.*: An iron ring, hoop, or brace, in which the gudgeons of a wheel move.
3. *Anat.*: The round ligament which confines the tendons of the carpus. (*Parr, &c.*)

† **ar-mil-la-ry, a.** [In Fr. *armillaire*; Sp. *armillar*; Port. *armillar*; Ital. *armillare*; Low Lat. *armillarius*; from Class. Lat. *armilla* = an armlet, an arm-ring, a bracelet.] Resembling a bracelet in form; circular. (Rarely used, except in Astronomy.)

"He [Hipparchus] is also said to have erected *armillary circles* at Alexandria."—*Penny Cycl., ii. 525.*

**armillary sphere.**

*Mech. & Astron.*: A sphere not solid like a modern celestial globe, but consisting of several metallic or other circles mechanically fixed in such relative positions that one represented the celestial equator, a second the ecliptic, and two more the colures. It was capable of revolving on its axis within a movable horizon. Astronomers used the armillary sphere for purposes of instruction not merely in ancient times, but on to the age of Tycho Brahe, in the sixteenth century. Now, however, it has fallen into disuse, having been superseded by the celestial globe. [ASTROLABE, CELESTIAL.]

"When the circles of the mundane sphere are supposed to be described on the convex surface of a sphere, which is hollow within, and, after this, you imagine all parts of the sphere's surface to be cut away, except those parts on which such circles are described; then that sphere is called an *armillary sphere*, because it appears in the form of several circular rings, or bracelets, put together in a due position."—*Harris: Description of the Globes.*

**ar-mil-lâ-téd, a.** [Lat. *armillatus*.] Wearing bracelets. (*Johnson*.)

**\* ar-mille, \* ar-mÿlle, s.** [Lat. *armilla* (q.v.).] A bracelet.

"When he had seen the ruyges on his systers ceros, and her poyntes or *armilles* on her hands."—*Golden Legend, l. 10. (S. in Boucher.)*

**\* ar-min, s.** [Dut. *arm* = poor.] A beggar.

"O hear God!—so young an *armis*!  
*M. Flow. Armis*, sweet heart, I know not what you mean  
 By that, but I am almost a beggar."  
*London Prod., Supp. Sh., ii. 513. (Nares.)*

**\* ar-mined, a.** [ERMINED.]

**arm-ing, pr. par., a., & s.** [ARM, v.t.]

**A. & B.** *As pr. par. and participial adj.*: In senses corresponding to those of the verb.

**C.** *As substantive*:

**I. Ordinary Language**:

1. The act of equipping one's self with weapons, or the state of being so equipped.

(a) *Lit.*:

"For the *arming* was now universal."—*Macaulay: Hist. Eng., ch. xii.*

(b) *Fig.*: Confirmation of a suspicion, or of a truth previously but half-believed.

"Lord. Hath the count all this intelligence?"

1 *Lord. Ay*, and the particular confirmations, point from point, to the full *arming* of the verity."—*Shakesp.: All's Well that Ends Well, iv. 3.*

2. That which constitutes the equipment.

**II. Technically (Nautical)**:

1. *Plur.*: Waist-cloths; cloths hang about the outside of the ship's upper-works fore and aft, and before the cubridge heads. Some are also hang round the tops, called *top armings*.

2. *Sing. (in soundings at sea)*: A preparation of tallow, placed in the concavity at the bottom of the lead used for soundings, and designed to ascertain the character of the ocean bed at the place.

"The soundings from which this section is laid down were taken with great care by Capt. Fitzroy himself: he used a ball-shaped lead, having a diameter of four inches, and the *armings* each time were cut off and brought on board for me to examine. The *arming* is a preparation of tallow, placed in the concavity at the bottom of the lead. Good, and even small fragments of rock, will adhere to it; and if the bottom be of rock, it brings up an exact impression of its surface."—*Darwin: On Coral Reefs (1842), ch. l. p. 7.*

**D. In composition**: Applied to various things used in, and for the purpose of, *arming*.

**arming-buckle, s.**

*Her.*: A lozenge-shaped buckle. (*Gloss. of Heraldry*.)

**arming-doublet, s.** A surcoat.

"*Arming-doublets* of crimson satin."—*Masius of the Inner Temple (1612). (Walker: Contr. to Lewis.)*

**arming-points, a. pl.** The fastenings keeping the several pieces of armour from separating.

**arming-press, s.** A press used in book-binding. [BLOCKING PRESS.]

**Ar-min-i-an, a. & s.** [Lat., &c., *Armini(us)*; Eng. suffix *-an*. In Ger. *Arminianer, s.*] Pertaining to Arminius, the Latinised form of the surname of James Harmensen, a noted Dutch theologian. [B.]

**A. As adjective**: Pertaining to Arminius or to his tenets.

"The *Arminian doctrine*, a doctrine less austere logical than that of the early Reformers, but more agreeable to the popular notions of the divine justice and benevolence, spread fast and wide."—*Macaulay: Hist. Eng., ch. i.*

**B. As substantive**:

*Church Hist.*: A follower of Arminius, or in other words, of James Harmensen (see *etym.*), first a Dutch minister in Amsterdam, and afterwards Professor of Theology in Leyden University. The views of himself and his followers were summed up in five points, which may be briefly stated thus:—1. That God from all eternity predestinated to eternal life those who He foresaw would have permanent faith in Christ. 2. That Christ died for all mankind, and not simply for the elect. 3. That man requires regeneration by the Holy Spirit. 4. That man may resist Divine grace. 5. That man may fall from Divine grace. This last tenet was at first held but doubtfully; ultimately, however, it was firmly accepted. Arminius died in the year 1609. In 1618 and 1619 the Synod of Dort condemned the Arminian doctrines, the civil power, as was the general practice of the age, enforcing the decrees of the council by pains and penalties. [REMONSTRANTS.] Nevertheless the new views spread rapidly. Archbishop Laud introduced them into the Church of England; the Wesleyans also are essentially Arminians; whilst the remainder of the English Nonconformists and the Presbyterians in Scotland and elsewhere are mostly Calvinists. The only English sect formally called after Arminius is that of the "Arminian New Society."

**Ar-min-i-an-ism, s.** [Eng. *Arminian*; *-ism*. In Ger. *Arminianism*.] The distinctive religious tenets held by the Arminians.

"Laud, Nell, Moutagu, and other Bishops were all supposed to be tainted with *Arminianism*."—*Burns: Hist. Eng.*

**Ar-min-i-an-ize, v.t. & i.** [ARMINIAN.]

**A. Trans.**: To make Arminian, to imbue with Arminian doctrines.

**B. Intrans.**: To teach Arminianism.

**Ar-min-i-an-iz-er, s.** [ARMINIANIZE.] One who teaches Arminianism.

**ar-mip-ô-tence, s.** [ARMIPOTEŒT.] PuiŒsance at arms. (*Bailey*.)

**ar-mip-ô-tent, a.** [Sp., Port., & Ital. *armipotente*; Lat. *armipotetas* = mighty in arms (an epithet of Mars); *arma* = arms, and *potens* = powerful, possum = I am able.] Powerful or mighty in arms; mighty in war.

"Lord. This is your devoted friend, sir, the man! fold linguist, and the *armipotent* soldier."—*Shakesp.: All's Well, iv. 2.*

**ar-mis-ô-nant, a.** [Lat. *arma* = arms, and *sonans*, pr. par. of *sono* = to sound.] Having sounding arms or rustling armour. (*Ash*.)

**ar-mis-ô-neus, a.** [Lat. *armisonus*; *arma* = arms, and *sono* = to sound.] Having sounding arms or rustling armour. (*Bailey*.)

**ar-mis-tice, s.** [Fr. *armistice*; Sp. & Port. *armisticio*; Ital. *armistizio*; from Lat. *arma* = arms, and *sisto* = to cause to stand.] A short cessation of arms for a certain stipulated time during a war; a truce, designed for negotiation or other ends.

"Lastly, he required some guarantee that the king would not take advantage of the *armistice* for the purpose of introducing a French force into England."—*Macaulay: Hist. Eng., ch. ix.*

"Now that an *armistice* has been accepted, and a conference is about to assemble to elaborate, if possible, terms of peace . . ."—*Times, Nov. 11, 1876.*

**arm-ï-ess (1), \* arm-ï-ess, a.** [Eng. *arm* (1), a., and suff. *-less* = without. In Ger. *armlos*.] Without arms.

"And saugh an hond *armlos*, that wrocht fast."  
*Chaucer: C. T., l. 549.*

**arm-ï-ess (2), a.** [Eng. *arm* (2), s.; suff. *-less*.] Without weapons, defenceless.

**arm-ï-ët, s.** [Eng. *arm*; suffix *-ët*, used as a diminutive.]

1. A small arm.
2. A bracelet worn on the upper arm as contradistinguished from one of the ordinary type encircling the wrist. Armlets are of two kinds.

(a) Those worn by men in the East as one of the insignia of royal power. Kifto thinks that the *armlet* (עֲרֻמָּה *arumma*), or so-called "bracelet," which the Amalekite said he took from the arm of the slain Saul, was of this armlet character (2 Sam. i. 10). The same Hebrew word, again rendered "bracelet," occurs in Numh. xxxi. 50, and probably with the same meaning. Armlets of this nature are still seen on Persian, Hindoo, and other sovereigns, and in most cases they are studded with expensive jewels.

ARMLETS.

"*Armlet*. Although the word has the same meaning as *bracelet*, yet the latter is practically so exclusively used to denote the ornament of the wrist, that it seems proper to distinguish by *armlet* the similar ornament which is worn on the upper arm. There is also this difference between them, that in the East bracelets are generally worn by women, and *armlets* only by men. The *armlet*, however, is in use among men only as one of the insignia of sovereign power."—*Kifto: Bib. Cycl., Art. "Armlet."*

(b) Those worn by women in our own and other countries simply for ornament.

"Every nymph of the flood her tresses rendering,  
 Throws off her *armlets* of pearl in the male."  
*Dryden: Albion & Albanius, iii.*

3. Armour for the arm.

† **ar-mô-ni-a, s.** [HARMONIA.]

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pine, pît, sire, sir, marine; gô, pôc or, wôre, wolf, wôrck, whô, sên; mûte, cûb, cûre, ûnite, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = ê. ey = â. qu = kw.

\***ar-mō-nī-ōc.** Old form of AMMONIAC.  
*Sal armoniac, . . . the Ibride t-wls*  
*Bel armoniac, . . . —Chaucer: C. T., 17, 754.*

\***ar-mōn'-ī-cāl.** [HARMONICAL.]

\***ar-mōn'-y.** s. [HARMONY.] (Scotch.)

**ar'-mōr, iar'-mōūr, \*ar-mouro, \*ar-mure, s.** [In Fr. *armure*; O. Fr. *armure*; Sp. & Port. *armadura*; Ital. & Lat. *armatura* = equipment, outfit, armor; *armo* = to fit out with implements, to equip; *arma* = implements, arms.]

**A. Ordinary Language:**

**1. Lit.** Defensive arms; a covering designed to protect the body, especially in war, from being injured by any weapon the foe could use. In the authorized version of the Bible it is frequently mentioned under its appropriate name (1 Sam. xvii. 54; 1 Kings xxii. 38, &c.), and several times under the name *harness*, which was a term for armor common during the fifteenth and sixteenth centuries (1 Kings xx. 11; xxii. 34; 2 Chron. ix. 24). [HARNES.] The heroes of the Trojan war are described by Homer as wearing it. It was in use among the other nations of antiquity, but it was not till the age of chivalry that it reached its full development. From the list of pieces of armor enumerated in the unjoined example, quoted by Nares from Warner, it can be well understood that a knight "in compleat armour" was too well protected to be in much danger from a foe, and too cowardly to put that foe in much danger. *Mail armor* was in use from 1086 to 1300. It was *legatated*, consisting of little lubricated plates sewn upon a hauberk without sleeves or hood; *ripped or chain*, consisting of interlocking rings; *gancoiced*, consisting of padded work stitched; *scaled*, of small circular plates like fish scales. *Mixed armor* to 1410, chain and plate. *Plate armor* to 1600, composed of large plates, and entirely enclosing the body. *Half armor* to eighteenth century, consisting of helmet and body armor only. Armor has almost disappeared in modern warfare, its only remnant being the defence against sword blows worn by cavalry. Recently, however, a bullet-proof coat has been devised, which may be worn by future infantry.

"To them in compleat armour seem'd the greene knight to appeare."  
 The burgonet, the bever, haffe, the collar, corates, and the poldron, gnaogard, vambraces, gauntlets for either hand,  
 The tashes, cushies, and the graves, staff, pensell, halces, all  
 The greene knight carst had tyld with, that held her love his thrall."  
 Warner: *Alb. Engl.*, bk. xii., p. 291. (Nares.)

**2. Fig.** Anything designed and fitted to prove a defence against spiritual enemies.  
 ¶ The "armor of light" (Rom. xiii. 12), opposed to "the works of darkness," would seem to be holy deeds. "The armor of righteousness" (2 Cor. vi. 7), as the name implies, is righteousness, justice. The "armor of God" (Eph. vi. 11, 13), is described at length in verses 13 to 20.

**B. Technically:**

**1. Law.** The Statutes of armor, repealed in the reign of King James I., were ancient enactments requiring every one, according to his rank and estate, to provide a determinate quantity of the weapons then in use, that if required he might aid to the defence of his country against domestic commotion or foreign invasion. (Blackstone's Comment., bk. 1., chap. 13.) Embezzling or destroying the king's armor or warlike stores was, by 31 Eliz., 3, 4, felony. (*Ibid.*, iv. 101, 102.)

**2. Her.** *Coat-armor:* The same as COAT or ARMS. [ARMS.]

**3. Magnetism:** The "armor" of a magnet is the same as its *armature* (q. v.).

**ar'-mor-béar-ér, s.** [Eng. *armor*; *beaver*.] One who carries the weapons of war belonging to another.  
 "Then he called hastily onto the young man his *armor-beaver*, and said unto him, Draw thy sword, and slay me, . . ."—*Judg.* ix. 54.

**ar-mōr-ā-ōi-a, s.** [Lat. *armoracia*, *armoracia*, *armoracium*; Gr. *ἀρορακία* (*armorakia*) = horse-radish; from *Armerica*, the Latin name of Brittany, where it was said to grow abundantly.] Horse-radish or Water-radish. A genus of plants belonging to the order Brassicaceæ, or Crucifera. It contains one

species, the *A. camphobia*, or Great Water-radish, wild in Britain; and another, the *A. rusticana*, or Common Horse-radish, naturalized. The former has yellow flowers, and this latter white.

**ar'-mōr-ér, ar'-mōūr-ér, ar'-mēr-ér, ar'-mūr-ér, s.** [Eng. *armor*; -er. In Fr. *armurier*.]

1. One who dresses another in armor.  
 "The armorers, accomplishing the knights,  
 With busy hammers closing rivets up,  
 Gave dreadful note of preparation."  
*Shaksp.: Henry V., iv., Chorus.*
2. One who manufactures or repairs armor and weapons.  
 "This let the armorer with speed dispose."  
*Ayrton: Corair, l. 7.*
3. One who has charge of the small arms of a ship or regiment.

**ar-mōr'-ī-ai, a. & s.** [Fr. *armorial*, from *armoirs* = arms, coats of arms; Lat. *armarium* = a place for tools; hence a chest for clothing, money, &c.; *arma* = tools, implements.]

1. *As adjective:* Pertaining or relating to heraldic arms.  
 "Ancient Armorial Quarterings."—*Nichols: Herald & Genealogist*, vol. viii., p. 247.
2. *As substantive:* A book containing coats of arms. Thus the phrases occur, "the French *armorial*, the Spanish *armorial*, &c."

**Ar-mōr'-ic, a. & s.** [Lat. *Armericus*. From *Armerica*, said to be derived from two old Gallic words, *ar* (Gallic *air*) = upon, and *mor* (Lat. *mare*) = the sea.]

**A. As adjective:** Pertaining to Armerica, the western part of the country between the Seine and the Loire. It was inhabited in Cæsar's time by a confederacy of tribes called the Armerican League. He made war against them and subdued them. Long afterwards it received the name of Bretagne, in English Brittany, from being inhabited by the Britons. Now it is divided into several French departments.

**B. As substantive:** The language of Armerica. It is called by the French *Bas Breton*. It belongs to the Celtic family, and is akin to the Welsh and the extinct Cornish. (In the etymologia of this Dictionary it is cited as *Arm.*)

**ar-mōr'-ic-an, a. & s.** [Eng., &c., *Armeric*; -an. In Ger. *Armericaner*.]

**A. As adj.:** The same as ARMERIC, *adj.* (q. v.).

**B. As subst.:** A person born in Armerica.

**ar'-mōr-ist, ar'-mōūr-ist, s.** [Fr. *armoriste*.] One well acquainted with coats of arms one skilled in heraldry. (*Bailey*.)

**ar-mōr'-y (plur. ar-mōr'-lēg), s.** [Eng. *armor*; -y. In O. Fr. *armoire*, *armarie*, *armoire* (in Mod. Fr. *armoiries* is = coats of arms); Prov. *armari*; Sp. *armiera*. From Lat. *armarium* = a place for tools, a chest for clothes; *arma* = tools, implements, arms.]

- A. From Eng. armor, in the sense of a coat of arms:**
1. Coat armor; coats of arms.
  2. Skill in heraldry.
- B. From Eng. armor, in its ordinary sense:**
1. Defensive armor, also offensive weapons, or both taken together.

"Nigh at hand  
 Celestial armory, shields, helms, and spears,  
 Hang high, with diamond flaming, and with gold."  
*Milton.*

2. A place for keeping weapons; a magazine in which all kinds of weapons are deposited and maintained in good order till they are required. (*Lit. & fig.*)

" . . . the tower of David, builded for an *armoury*, wherein there hang a thousand bucklers, all shields of mighty men."—*Song of Sol.* iv. 4.

"The Lord hath opened his *armoury*, and hath brought forth the weapons of his indignation."—*Jer.* l. 25.

3. (Occasionally.) A place where arms are manufactured.

**ar'-mō-zēen, ar'-mō-zēne, s.** [Fr. *armasin*, *armoisin*. Corrupted from Ormuz or Hormuz,

an island in the Persian Gulf.] A thick plain silk, generally black, used for clerical robes. (*Goodrich & Porter*.)

**arm'-pit, s.** [Eng. *arm*; *pit*.] The pit or hollow under the arm where it is joined to the body. The axilla.  
 " . . . up to their *armpits* in water."—*Macaulay: Hist. Eng.*, chap. xvi.

**arms (1), s. pl.** The plural of ARM (1) (q. v.).

**arms (2), s. pl.** [In Gael. *armachd* (sing.) = armor, arms; Fr. *armes*, pl. of *arme*; Prov., Sp., & Port. *armas* (pl.); Ital. *arme* (sing.); from Lat. *arma* (pl.) = implements, especially of war, notably a shield. Probably from root *ar* = to fit or join.] [ART.]

**A. Ordinary Language:**

**1. Lit.:** Weapons offensive or defensive.  
 " . . . hid their *arms* behind waistcoats or in baskets."—*Macaulay: Hist. Eng.*, chap. xv.

¶ War is so exciting, that when it breaks out it powerfully attracts the attention of the general public in every country; hence a number of phrases, at first purely military, now occur in ordinary English authors. [For these see B. 1.]

2. War, a state of hostility; the act of taking arms. [B.]

**B. Technically:**

**I. Mil.:** In the same sense as A. I. Military arms are of two kinds: *arms of offence*, or *offensive arms*, and *arms of defence*, or *defensive arms*. Under the first category are rifles, pistols, muskets, cannons, swords, bayonets, &c.; and under the latter: shields, helmets, cuirasses, greaves, or any similar defence, for the person. Of offensive weapons, those in which flame is generated are called *fire-arms*.

*Arms of parade or courtesy:* Those used in ancient tournaments. They were unshod lances; edgeless and pointless swords, some of which, moreover, were of wood; and, finally, even canes. (*James: Mil. Dict.*)

*Bells of arms, or Bell-tents:* Bell-formed tents, formerly for the reception of arms, now for men also, when an army is in the field.

*In arms:* The state of having assumed weapons and commenced war or rebellion.

"Rose up in arms, conquered, ruled."—*Macaulay: Hist. Eng.*, ch. iii.

*Pass of arms:* A kind of combat in which, in mediæval times, one or more cavaliers undertook to defend a pass against all attacks. (*James*.)

*Passage of arms:*

(a) *Lit.:* A combat in which the armed opponents exchange blows or thrusts with each other.

(b) *Fig.:* A controversial encounter with the pen or some similar weapon.

*Place of arms (Fort.):* A part of the covered way opposite to the re-entering angle of the counterscarp, projecting outward in an angle. (*James*.)

*Small arms:* Those which can be carried in the hand, as muskets, swords, &c., in place of requiring wheel-carriages for their transportation.

*Stand of arms:* A complete set of arms for one soldier, as a rifle and bayonet.

*To appeal to arms:* To put a dispute to the arbitration of war.

"The House of Austria, indeed, had appealed to arms."—*Macaulay: Hist. Eng.*, chap. xxv.

*To arms:* An exhortation or command to assume weapons and commence rebellion or active warfare.

"And seas, and rocks, and skies rebound,  
 To arms, to arms, to arms!"—*Pope.*

*To take arms:* To assume weapons and commence war or rebellion.

"Many lords and gentlemen, who had, in December, taken arms for the Prince of Orange and a free Parliament, . . ."—*Macaulay: Hist. Eng.*, chap. xi.

*Under arms:* In the state of having one's weapons borne on one's person, or otherwise ready for immediate use.  
 "The trainbands were ordered *under arms*."—*Macaulay: Hist. Eng.*, chap. x.

**II. Law:** Anything which one takes in his hand in anger to strike another with or throw at him. Pistols and swords are, of course, arms in the legal sense, but so also are stones and sticks.

**III. Heraldry.** *Armorial bearings:* In the days when knights were so encased in armour that no means of identifying them was left, the practice was introduced of painting their

bēl, bēy; pōut, jōwī; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, a; expect, Xenophon, exist. -ing. -cian, -tian = çhan. -tion, -sion = shūn. -tion, -sion = zhūn. -tious, -sious, -cious = shūs. -bie, -dle, &c. = bēl, del.

insignia of honour on their shield, as an easy method of distinguishing them. For a time these were granted only to individuals, but Richard I., during his crusade to Palestine, made them hereditary. The reason why they are called *coats of arms* is that they used to be introduced on the surcoat of their possessor, but the term once introduced was afterwards retained even when they were displayed elsewhere than on the coat. These are usually divided into (1) *public*, as those of kingdoms, provinces, bishoprics, corporate bodies, &c.; and (2) *private*, being those of private families. These again are separated into many subdivisions, founded mainly on the varied methods by which arms can be acquired. [ASCUMPTION, CANTON, DOMINION, FEUDAL, &c.]

The *Colleges of Arms*, or *Heralds' College*, is situated in Queen Victoria Street, London. It has at present one Earl Marshal, three kings of arms, called respectively Garter, Clarenceux, and Norroy; six heralds, and four pursuivants, with a Secretary to the Earl Marshal and a Registrar.

IV. *Falconry*: The legs of a hawk from the thigh to the foot. (Webster.)

V. *Bot.*: The same as *ARMATURE* or *ARMOR* (q.v.).

\* *ar-müre*, *s.* [ARMOR.]

*ar-myj*, \* *ar-mœe*, *s.* [In Sw., Dan., & Ger. *armee*; Gael. *armailt*; Irish *arbharr*, *armhar*; Fr. *armée*, all meaning an army; Prov., Sp., & Port. *armada* = a naval armament; Ital. *armata* = an army; from Lat. *armatus* (masc.), *armata* (fem.) = armed, *pa. par.* of *armo.*] [ARM, v.t., ARMADA, ARMS.]

1. *Lit. (Ord. Lang. & Milit.)*: A body of men, enlisted, brought together, drilled and armed for warfare. The three chief arms of the service are Infantry, Cavalry, and Artillery; all other branches, such as Engineers, the Commissariat, Transport, Police, Postal, Medical, and Chaplains' departments being auxiliary. The officers of the British army consist of field-marshal, generals, lieutenant-generals, major-generals, colonels, lieutenant-colonels, majors, captains, and lieutenants. An army is composed of army corps consisting of divisions, these of brigades, and these of battalions. Each has a separate staff, but the division is the first unit that has a proportion of each of the three arms and of the several departments. It is arranged for battle in two or more lines, the infantry occupying the centre, the cavalry one or both flanks, the artillery, as far as possible, conveniently massed. Cavalry is organized in regiments, one attached to each division, the remainder as the cavalry brigade, which, with a battery of horse artillery, is attached to a corps. Artillery is organized in batteries of six guns each. Milton represents Satan, leading the infernal hosts, as bringing up his troops in "a hollow cube" (a solid square), having

"His devilish enginery impaled  
On every side with shadowing squadrons deep."  
When all is ready, then, according to the poet,  
"to right and left the front  
Divided, and to either flank retired."

The way thus cleared, the guns are suddenly displayed and fired. (Milton's *P. L.*, bk. vi.)

¶ (a) A *blockading army* is one engaged in blockading or investing a place. [BLOCKADE.] [James.]

(b) A *covering army* is one guarding the approaches to a place. [COVER, v.] (*Ibid.*)

(c) A *flying army* is one continually in motion, both to cover its own garrisons and alarm the enemy. (*Ibid.*)

(d) An *army of observation* is one in a forward position engaged in watching the enemy. (*Ibid.*)

(e) An *army of reserve* is one not itself at the moment engaged in fighting, but all ready to furnish men to another army which is so, or, if need arise, to go *en masse* to its assistance. (*Ibid.*)

(f) A *standing army* is an army so embodied that it continues from year to year without requiring for its perpetuation an annual legislative vote. The British army is not a standing one, the Legislature during each successive year authorising its continued existence, and fixing the number of men of which for the time being it is to consist. So jealous were the people of a standing army, that after the peace of Ryswick, concluded in 1697, the majority of the nation wished to disband all the highly-trained and experienced

soldiers of England, and trust the defence of the country to the militia alone. King William and his minister Somers could with difficulty obtain permission to keep 10,000 professional soldiers; and to make sure that they did not illegally enlist more, the expenses of the army were fixed as low as £350,000. The standing army of the United States is limited by the law of 1874 to 25,000 men, this being considered an amply sufficient force in times of peace.

"What he [Somers] recommended was not a standing but a temporary army, an army of which Parliament would annually fix the number, an army for which Parliament would annually frame a military code."—*Macaulay: Hist. Eng.*, ch. xxiii.

2. *Figuratively*:

(1) A great number, a mighty host, though not embodied for war.

"The caulkermoot, and the caterpillar, and the palmerworm, my great army."—*Joel* ii. 23.

(2) A body of people organized for a common object, as the Salvation Army.

*army-list*, *s.* The official list of commissioned military officers.

*army-worm*, *s.* The larva of the *Leucania unipunctata*.

\* *ar-myñ*, \* *ar-myñg*, *s.* [ARMINO.] *Ar-mor*, *arms*. (Scott.) [Barbour.]

\* *arn*, \* *ar-ñn*, *v.* [ARÆ.] *Are*, the so-called plural of the present tense of the verb *to be*.

"Cristene men ogen ben so fagen,  
So foles arn quan he it sen dagen."  
*Story of Gen. & Esau*, (ed. Morris), 15, 16.

\* *arn*, \* *orn*, \* *ourne*, *v.t.* [A.S. *arn* = ren, pret. of *arnan* = to run.]

1. *To run*.

"The arnd vorth the noble knyght Robert Court-chese."  
*Rod. Gloucet.*, vol. ii., p. 297.

2. *To run in the sense of flowing; to flow*.

"Wepynde hit armed hem the teres overne alouen."  
*Rod. Gloucet.*, vol. ii., p. 408.

\* *arn* (1), *s.* [A.S. *earn* = an eagle.] An eagle.  
"John was sothlist his felans.  
For thi to the arn lickest es he."  
*M.S. Cott.*, *Vesp.*, A. iii., l. 74. (Boucher.)

\* *arn* (2), *s.* [Wel. *uern* *guernnen*; Arn. *vern* *guern*; Ger. *erlen-baum*; Fr. *aune*; Lat. *alnus*.] [ALNUS.] The elder.  
"*Frax* is evidently derived from the *arn* or elder tree, in Gaelic *fearna*."—*Scottic Account*, Ross, iv. 238. (Jamicson.)

*ar-nat-tō*, *s.* [ARNOTTO.]

\* *arn-dörn*, *s.* [UNDERN.]

"When the sad arndorn shatting in the light."  
*Dragon: Owl*, p. 131a.

*Ar-nēb*, *s.* [Corrupted Arabic (?).] A fixed star of  $\frac{3}{4}$  magnitude, called also a Leporis.

\* *ar-nēde*, *s.* [ERRAND.]

\* *ar-nē-mōnt*, *s.* [A corruption of Lat. *atramentum* = any black liquid. . . ink; *ater* = black.] Ink.  
"*As blak* as an *arnement*."  
*Beyn Sagos*, 237b. (Boucher.)

\* *ar-nēst*, *a. & s.* [EARNEST.]

*ar-nī-ōa*, *s.* [Corrupted from *Parmica*.] [ACRILLEA.]

1. A genus of plants belonging to the order Asteraceæ, or Compositæ.

2. The English name of plants belonging to the above-mentioned genus, and specially of the *A. montana*, the Mountain Arnica, or

ARNICA MONTANA: ROOT AND FLOWERS.

German Leopard's-bane. It is not a British species, but is common in the alpine parts of

Germany, Sweden, Lapland, and Switzerland. It is a perennial, of a slightly fetid odour, and a bitterish acid taste. Given in large quantities it produces deleterious effects, but the powdered leaves, in moderate doses of five to ten grains, have been found serviceable in paralysis, convulsions, amaurosis, chlorosis, gout, and rheumatism. (*Castle: Letic. Pharmacœut.*, 2nd ed.) As an outward application, arnica is in constant use as a remedy for sores, wounds, bruises, and ailments of a similar kind. It is also employed as an internal medicine.

*ar-nī-çine*, *s.* [ARNICA.] A bitter principle contained in the flowers of the *Arnica montana*. [ARNICA.]

*Ar-nōid-ist*, *s.* [From the *Arnold* mentioned below.]

*Ch. Hist.*: A follower of Arnold of Brescia, who, in the twelfth century, when the papal power was at its maximum, opposed the Pope's temporal authority, and proposed that the Church should be disendowed and left for its support to the freewill offerings of the people. For advocating these views he was strangled to death at Rome in the year 1155, and to prevent the people paying veneration to his remains his corpse was burnt and the ashes thrown into the Tiber. All the more on account of his cruel fate, his name was enshrined in the affections of many, and the Arnoldists from time to time gave trouble to the Papacy. (*Mosheim: Ch. Hist.*, Cent. xii., pt. ii., chap. 5, § 10.)

† *ar-nōt*, † *ar-nūt*, *s.* [EARTH-NUT.]

*ar-nōt-tō*, *ar-nāt-tō*, *ān-nōt-tō*, *ān-nōt-tā*, *a-nāt-tō*, *s.* [Ety. doubtful, perhaps the native American name.]

1. *Comm.*: The waxy-looking pulp which envelops the seeds in the arnotto-tree. This is detached by throwing the seed into water, after which it is dried partially, and made up first into soft pellets, rolled in leaves, in which state it is called *flag* or *roll arnotto*. Afterwards, becoming quite dry, it is formed into cakes, and becomes *cake arnotto*. The South American Indians colour their bodies red with it; farmers here and elsewhere use it to stain cheese; in Holland the Dutch employ it to colour butter; the Spaniards put it in their chocolate and soups; dyers use it to produce a reddish colour, and varnish makers, to impart an orange tint to some varnishes. As a medicine it is slightly purgative and stomachic.

¶ This substance is very frequently adulterated. Previous to the passing of the Adulteration Act it was found almost impossible to obtain a pure sample, the adulterants being flour, rye meal, turmeric, chalk, gypsum, Venetian red, and, in some cases, red lead; this last substance being a poison. At the present time the only adulterants used are flour, turmeric, and small quantities of either chalk or gypsum. Pure arnotto should not contain more than six per cent. of ash. Adulterated samples contain as much as twenty or even thirty per cent. The organic adulterants are easily detected by the microscope.

"*Arnotto* dyeth of itself an orange-colour, is used in pot-shales upon silk, linen, and cottons, but not upon cloth, as being not apt to penetrate into a thick substance."—*Sir W. Petty, in Sprat's Hist. of the Royal Society*, p. 399.

2. *Bot.*: The Arnotto-tree, the *Bixa orellana* of Linnaeus, has a five-dentate calyx, ten petals, many hypogynous stamens, and a two-valved hialid capsule. It is from twenty to thirty feet in height, and grows in tropical America. [BIXA.] It is the type of the old order Bixaceæ, now more generally called Flacourtiaceæ (q.v.).

† *ar-nūt*, *s.* [EARTH-NUT.]

*ār-ōid*, *a. & s.* [AROIDÆ.]

A. *As adj.*: Aroideous.

B. *As subst.*: A plant allied to Arum (q.v.).

*a-rōi-dō-sē*, *a pl.* [Lat. *arum* (q.v.), and Gr. *εἶδος* (*eidōs*) = appearance.] An order of endogenous plants, the same as ARACEÆ (q.v.).

*a-rōid-ē-ōūs*, *a.* [Eng. *aroid*; *œous*.]

*Bot.*: Allied to the genus Arum (q.v.).

\* *a-rōint*, \* *a-rōynt*, \* *a-rōn-ÿt*, *interj.* or *imper. of verb.* [Provincial Eng. of Cheahire *rynt*, *run*, applied, according to Ray, to

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sire, sir, marine; gō, pōt, or, wōre, wōif, wōrk, whō, sōn; mūte, cūb, cūre, unīte, cūr, rāle, fūll; trÿ, Sÿrian. æ, œ = ē. ey = ā. qu = kw.

witches, as in the proverb—"Rynt you, witch, quoth Bessie Locket to her mother;" but the expression is more commonly addressed to a cow by a milkmaid, when she wishes the animal to move out of the place it occupies. (Boucher.)

"A word used apparently as a standard formula for exorcising witches. It seems to have meant, "Avant thee! be gone, be off!" In English literature it is hardly found elsewhere than in Shakespeare.

"And aroint thee, witch! aroint thee." Shakespeare: Lear, III. 4. "Aroint thee, witch! I the rump-fed ronyon cries." Ibid.: Macbeth, I. 3.

a-rō-ma, † a-rō-mat. s. [In Fr. aroma, aromatic; Ger., Sp., Port., & Lat. aroma; Gr. ἀρώμα (arōma) = a spice. This, according to Pott, is from Sansc. ghrā = to smell; but according to Max Müller, is from the Aryan root ar = to plough, and r = to go.] The quality of fragrance in a plant, in a spice, or in anything else.

"Suffered no waste nor loss, though filling the air with aroma."—Longfellow: Evangeline, pt. II., s. "Criates body noble hope of life to hyde. In oyn't he was w'tt' aromas' holl writ to fulle." Horas da Cruce (ed. Morris), II., 32.

ār-ō-māt'-īo, † ā-r-ō-māt'-īok, a. & s. [In Fr. aromatique; Sp., Port., & Ital. aromatico; Lat. aromaticus; Gr. ἀρωματικός (arōmatikos).] [AROMA.]

A. As adjective:

I. Ordinary Language: Pertaining or relating to an aroma; fragrant, sweet-smelling, odoriferous, spicy.

"Her sweetest flowers, her aromatic gama." Cooper: Task, bk. II. "Of cinnamon and sandal blent, Like the soft aromatic gales That meet the mariner, who sails Through the Moluccas, and the seas That wash the shores of Celebes." Longfellow: Tales of a Wayside Inn; Prelude.

II. Technically:

1. Chem. Aromatic acids: Acids whose radical has the form C<sub>n</sub>H<sub>2n-6</sub>O<sub>2</sub>, as the benzoic, the toluic, and the cumic or cumic. There are also Aromatic alcohols, aldehydes, hydrocarbons, and ketones.

2. Pharm. Aromatic Mixture of Iron, and Aromatic Powder of Chalk, with and without opium, are described in Garrod's Materia Medica.

B. As substantive: A plant or a substance which exhales a fragrant odour, conjoined in general with a warm pungent taste.

(Plur.): Aromatics, spicea.

"They were furnished for exchange of their aromatics and other proper commodities."—Raleigh.

ār-ō-māt'-īo-al, a. [Eng. aromatic; -al.] The same as AROMATIC (q.v.). (W. Browne.)

ār-ō-māt'-ī-zā'-tion, s. [Fr. aromatisation.] The act of scenting or rendering sweet-smelling or fragrant; the state of being so scented. (Holland.)

a-rō-ma-tī-ze, v.t. [In Fr. aromatiser; Sp. & Port. aromatizar; Ital. aromatizzare; Lat. aromatizo, v.l.; Gr. ἀρωματίζω (arōmatizō), v.t. & i.] To render aromatic, odoriferous, or fragrant; to perfume, to scent. (Thompson.)

a-rō-ma-tī-zed, pa. par. [AROMATIZE.]

a-rō-ma-tī-z'ēr, s. [Eng. aromatize; -er.] That which renders any person or thing aromatic; that which imparts fragrance.

"Of other strewings, and aromatics, to enrich our sallets, we have already spoken."—Evelyn.

a-rō-ma-tī-z'īng, pr. par. [AROMATIZE.]

a-rō-ma-tō-us, a. [Lat. aromatis, genit. sing. of aroma, and Eng. suffix -ous.] Full of fragrance, impregnated with a fine odour. [AROMATIC.] (Smart.)

ar-ō-ph, s. [A contraction of aroma philosophorum, the philosopher's aroma.] A name given to essfion.

A. Paracelsi: A name given to a kind of chemical flowers resembling the Ena Veneris, prepared by sublimation from equal quantities of lapis hematites and sal ammoniac.

a-rō-re, adv. [O. Eng. a = on; rore = roar (q.v.).] With a roar.

"With a syching gurd out arose, All the payne hit could be doore." The XI. Poins of Hell, xiv. (ed. Morris), 180, 181.

a-rō-ŕe, \* a-rō-ŕs, v. The preterite of the verb ARISE (q.v.).

"... and she arose and ministered unto them."—Matt. VIII. 15. "Vor eure lhorrd aris uram dyathe to lyue than sonday." Ayrantie (ed. Morris), p. 7.

\* a-rō-ūm, adv. [A.S. geroum; as subst. = room; as adj. = roomy.] [ROOM.] Far apart.

"He saih him-self that harde stour, Whon aces Arroun weire rest aroum." Disputa between Mary and the Cros (ed. Morris).

a-rō-ūnd, \* a-rō-ūnd, prep. & adv. [Eng. a = on, and round (q.v.).]

A. As preposition:

I. Surrounding, encompassing; everywhere about, on all sides of.

"Or rather, as we stand so holy earth, And have the dead around us." Wordsworth: Excursion, bk. v.

2. More vaguely: From place to place.

B. As adverb: All round; in a circle, in a manner to surround.

"Tho, wrapping up his wrethed sterns around, Lept farce upon his shield." Spenser: F. Q., I. 13.

"For all round, without, and all within, Nothing arove what delightful was and kiud." Thomson: Castle of Indolence, II. 1.

a-rō-ū-rā, s. [Lat. arura; Gr. ἀρουρα (aroura); from Lat. arō; Gr. ἀρού (arō) = to plough, to till.]

1. Corn-land, a corn-field. [ARURA.]

2. A Grecian measure of superficial extent, a quarter of a plethron, and containing one and a-half hektol. Porter makes it equivalent to 9 poles, 107 3/833 square feet.

a-rō-ū-s'al, s. [Eng. arouse; -al.] The act of arousing; the state of being aroused. (N.E.D.)

† a-rō-ū-s'e, s. [AROUSE, v.] A single act of arousing; an alarum.

a-rō-ū-se, v.t. [See ROUSE (1), v. The prefix, meant to be intensive, is a needless addition. (Skeat.)]

1. Gen.: To excite, to stimulate any person, any passion, &c., at rest or torpid, into a state of activity.

"Bot absent, what fantastick woes arousd Rage in each thought, by restless musing fed, Chill the warm cheek, and blast the bloom of life." Thomson: Spring, 1,004.

2. Spec.: To wake a person from sleep.

"Aad oow lood-howling wolves arouse the jades, That drag the tragic melancholy night." Shakespeare: 3 Henry VI., IV. 1.

a-rō-ū-sed, pa. par. [AROUSE.]

a-rō-ū-s'ēr, s. [Eng. arouse, v.; -er.] One who arouses.

a-rō-ū-s'īng, pr. par. [AROUSE.]

a-rō-w, adv. [Eng. a = on, in, and row.] In a row; one after the other.

"My master and his man are both broke loose, Beaten the maida a-row, and bound the doctor." Shakespeare: Comedy of Errors, v. 1.

"But with a pace more sober and more slow, And twenty, rank in rank, they rode a-row." Dryden.

\* a-rō-ynt, interj. or imper. of verb. [AROINT.]

ar-pēg'-gī-ō, s. [Ital. = harping; arpeggiare = to play upon the harp; arpa, arpe = a harp.] Music. Of keyed instruments: Playing after the manner of the harp, that is, striking the

Sometimes written

notes in rapid succession in place of simultaneously.

"The funeral song... was sung in recitative over his grave by a recalcitrant, or rhapsodist, who occasionally sustained his voice with arpeggios swept over the strings of the harp."—Walker: Hist. Mem. of the Irish Bard, p. 17.

ar-pēg'-gī-ō, v. [ARPEGGIO, s.]

Music: To play or sing as an arpeggio.

\* ar-pēnt, \* ar-pēn, s. [Fr. arpent; Norm. Fr. arpent, arpen; Prov. arpen, arpin; O. Sp. arapende; Low Lat., from Domesday Book, arpenus, arpendus; Class. Lat. arpenus, arpenis (said to be of Gaelic origin), equal, according to Columella, to a Roman semijugurum, &c., half an acre of ground.] [ARPENTAROR.] An obsolete French measure of land, varying in amount in different parts of the country. The standard arpent was that of Paris, which contained 100 square perches (about five-sixths of an English acre).

\* ar-pēn-tā-tōr, s. [Anglicised from O. Fr. arpenteur = a measurer of land, from arpent = to measure land.] [ARPENT.] A land surveyor. (Bowler.) (Worcester's Dict.)

ar-quā-tēd, a. [Lat. arcuatus, from arcus, an old way of writing arcus.] Bent like a bow, curved. (E. James.) (Worcester's Dict.)

ar-quē-būs-āde, s. & a. [Fr. arquebuse. In Port. arcabuzada.]

A. As substantives:

1. The discharge from an arquebuse.

2. The name of an "agua" (water), formerly used as a vulnerary in gunshot wounds, whence its name of arquebused. It was prepared from numerous aromatic plants, as thyme, halm, and rosemary. It was called also Aqua vulneraria, A. scolopetaria, and A. calapultum. (Parr: Med. Dict., I. 165, 166, 181.)

B. As adjective: Pertaining or consisting of the "water" described under A. 2.

"You will find a letter from my sister to thank you for the arquebused water which you sent her."—Chesterfield.

ar-quē-būse, ar-quē-būss, \* har-quē-būse, s. [Fr. arquebuse; O. Fr. harquebus; Sp. & Port. arcabus; Ital. archibuso; Dut. haakbus, from haak = hook, and bus = box, urn, barrel of a gun. This is preferable to the old view, to which Planché adheres, that arquebus is Fr. arc-à-bouche or arc-à-bouca = bow with a mouth or aperture or opening.]

ARQUEBUSE.

An old hand-gun, longer than a musket, and of larger calibre, supported on a rest by a hook of iron fastened to the barrel. It was an improvement on the old hand-gun, which was without a lock. Henry VII., in establishing the yeomen of the guard in 1485, armed half of them with arquebuses, whilst the weapons of the other half were bows and arrows. (James: Mil. Dict. Planché: Costume, &c.)

"A arquebuse, or ordinance, will be farther heard from the mouth of the piece than backwards or on the sides."—Bacon.

"Each arm'd, as best becomes a man, With arquebuse and staffian." Byrons: The Giaour.

ar-quē-būs'-ī-ēr, \* har-quē-būs'-sī-ēr, s. [Fr. arquebusier. In Dan. arquebuser; Port. arcabuzeiro.] A soldier whose offensive weapon is an arquebuse.

"He compassed them in with fifteen thousand arquebusiers, whom he had brought with him well appointed."—Knoles.

"... the appearance and equipment of the arquebusiers..."—Planché: Brit. Costume (1847), p. 284.

ar-quē-īte, s. [From the minea of Arquero, in Coquimbo, a department of Chili, where it abounds.] According to the British Museum Catalogue, a variety of Amalgam; but Dana makes it a distinct species, which he places between amalgam and gold amalgam. In appearance it resembles native silver, and is composed of about 86.5 of silver, and 13.5 of mercury. Its sp. gr. is 10.8.

ar-quī-foux (oux as ū), s. [Fr.]

Comm.: An orts of lead used by potters to give a green varnish to the articles which they manufacture. (McCulloch.)

\* ar-rā, s. [ARREBA.]

ar-ra-ca-çha, s. [From the South American Indian name of various tuberous plants.]

1. A genus of plants belonging to the order Apiceae, or Umbellifera. A. esculenta is cultivated for the sake of its root in the elevated portions of equinoctial America. Several attempts have been made, but without success, to introduce it into Britain.

\* ar-raught, \* a-raught (gh silent), v. The pret. of ARACHE (2) (q.v.).

ar-rāy, \* a-rāy, \* a-rāye, s. [In Fr. arroi = train equipage; O. Fr. arroi, arroi, arrei, from rai, rei, rot = order, arrangement; Prov. arrei; Sp. arreo = ornament, dress, horse-trappings; Port. arrei; Ital. arredo = furniture, implements. Cognate also with A.S. gerad, geradū, geradero = housing, harness, trappings; Sw. reda = order; Gael. earradh = dress; Irish earradh = armour, accoutrements, wares.] [ARRAY, v.]

A. Ordinary Language:

I. The act of arranging, putting in order, or decorating; the state of being so arrayed, adorned, or decorated. *Specialty*:

1. Equipment, equipage.

"But for to talle you of his aray, His horse was good, but he ne was sought gay." Chaucer: C. T., Prologue, 78-4.

2. Order of battle in soldiers.

In array: In military order, with the view of immediately fighting. [Used of an army, a "battle" (the main body of an army) (7), or rarely of a single fighting man.] [I.]

"... he chose of all the choise men of Israel, and put them in array against the Syrians."—3 Sam. x. 9.

"... and set the battle in array against the Philistines."—1 Sam. xvii. 2.

"... they shall ride upon horses, every one put in array, like the man to a battle, against thee, O daughter of Babylon."—Jer. l. 42.

3. Adornment.

(a) Lit. Of persons: Dress, especially when rich or beautiful.

"The sun is bright; the fields are gay With people in their best array Of stoles and doublet, hood and scarf, Along the banks of the White Sea." Wordsworth: White Doe of Rylstone.

(b) Of things: Regular order, with adornment.

"Agas his waves in milder tides unfold Their long array of asphire and of gold." Byron: The Corsair, III. 1.

II. The persons thus arrayed or placed in order. *Spec.*, the whole body of fighting men. [See also B.]

"The whole array of the city of London was under arms."—Macaulay: Hist. Eng., chap. 1.

Who now may sleep amidst the thunder reading, Through tower and wall, a path for their array? Hemans: The Last Constantine, 61.

B. Technically (Law):

\* 1. The Commission of Array was a commission of arranging in military order, formerly issued from time to time by the English sovereigns and put in regular form by Parliament in 5 Henry IV. It empowered certain officers in whom the Government could confide to muster or array—that is, set in military order—the inhabitants of every district. [Blackstone: Comment., bk. i., chap. 13.]

2. The act or process of setting a jury in order to try cases; also the jury thus put in order, or their names when impanelled.

"Challenges to the array are at once an exception to the whole process in which the jury are arrayed, or set in order by the sheriff in his return."—Blackstone: Comment., bk. III, ch. 23.

ar-rāy, \* a-rāy, \* a-rāye, v.t. [O. Fr. arriar, arriar, arriar, arriar = to set in order, to prepare; Port. arriar = to caparison, to harness; Prov. arriar, arriar; Ital. arriar = to prepare. Cognate also with A.S. geradian = to make ready, to arrange, to teach, to decree; Sw. reda = to disentangle (in Scotch, to read); Dan. rede = to comb, to "make" a bed; rede = ready, prepared; Dut. redderen = to arrange; Ger. redderen = to dress sails.] [REDD, READY.]

A. Ordinary Language:

I. To put in order. *Spec.*, to put in military order for a battle or for a review.

"The English army had lately been arrayed against him."—Macaulay: Hist. Eng., chap. xii.

"... a force of thirteen thousand fighting men were arrayed in Hyde Park, and passed in review before the Queen."—Ibid., chap. xviii.

2. To invest with raiment, especially of a splendid kind.

(a) Literally:

"... and arrayed him in vestures of fine lincea."—Gen. xl. 42.

"And the woman was arrayed in purple and scarlet colour, and decked with gold and precious stones and pearls."—Rev. xvii. 4.

(b) Figuratively:

"... and he shall array himself with the land of Egypt, as a shepherd putteth on his garment."—Jer. xliii. 12.

"... in solid waves with horrid glooms arrayed."—Trumbull.

B. Technically:

Law: To set a jury in order for the trial of an accused person.

"... in which the jury are arrayed or set in order by the sheriff in his return."—Blackstone: Comment., bk. III, chap. 23.

ar-rāyed, \* ar-rāied, \* a-rāyed, \* a-rāied, \* a-rāide (Eng.), \* a-rāyne (Scotch), pa. par. & a. [ARRAY, v., ARAY, v.]

"So wel arrayed heus as ther was on, Aurilius in his lif saw never non." Chaucer: C. T., II, 409, 11, 500.

ar-rāy-ēr, s. [Eng. array; -er.]

1. *Gen.*: One who arrays.

2. *Spec.*: One of the officers whose function in mediæval times it was to see the soldiers of an army duly equipped with armour, and who had therefore charge of the armour and accoutrements. [Covel.]

ar-rāy-īng, \* a-rāi-ynge, pr. par. [ARRAY, v., ARAY, v.]

\* ar-rāy-mēt, \* ar-rāily-mōnt, \* ar-rāi-mēt, s. [Eng. array; -ment.] The same as RAIMENT (q.v.).

"Whose light arraignment was of lovely green." Beumont: Hermaphrodite. [Richardson.]

\* arre, s. [Icel. Örr, Ör.] A scar.

"If it is broken, if it hath a wounde or an erre."—Wycliffe: Levit. xxii. 22.

ar-rō-ar, \* ar-rō-are, \* a-rō-ar, \* a-rō-are, \* a-rō-re, adv. & s. [Fr. arrière; as adv. = backwards, behind, in arrear, in debt; as s. = the hinder part of anything, especially the stern of a ship; Prov. arrière; arrearado (pl.) = arrears, from Lat. ad = to, and retro = backwards, behind; re = back, and suff. -tro.] [ARRIAR, s.]

A. As adverb:

1. To the rear; implying motion to any place; behind one.

"Ne ever did her eyenight turn arere." Spenser: Virgil's Æneid, 468.

2. In the rear; implying rest; behind one.

"To leave with speed Atlants in arrear." Fairfax: Tasso, II. 40.

3. Behindhand, falling back; not so far forward as might have been expected; becoming slow.

"From perill free he away her did beare; But when his force gan falle his pace gan wax arere." Spenser: F. Q., III, vii. 24.

B. As substantive:

1. That payment which is behind. The remainder of money owing, of which a portion has already been paid; or, more loosely, money overdue, of which not even the first instalment has been received (gen. in pl.).

"If a tenant run away in arrear of some rent, the land remains; that cannot be carried away or lost."—Locke.

2. The rear. (Heylin: Reformation. I. 92.)

ar-rō-ar-age, \* ar-rō-r-age (age = īg), s. [Fr. arriérage (pl.) = arrears, from arriere = behind.] [ARRIAR, ARRIARE.] The remainder of a sum of money, of which a portion has been paid; or generally, any money unpaid at the due time; arrears.

"Ther couthe the noman bringe him in arriérage." Chaucer: C. T., 604.

"He'll grant the tribute, send the arriérages." Shakespeare: Cymbeline, II. 4.

\* ar-rō-ar-ance, s. [Eng. arrear; -ance.] The same as ARREAR (q.v.).

\* ar-rōct, v.t. [Lat. arrectum, sup. of arriigo = to set upright; ad = to, and rege = to stretch, to lead in a straight line; reclus = (1) drawn in a straight line, straight; (2) correct, proper.]

I. Lit.: To set upright; to point anything directly upwards. (Fuller: Ch. Hist., X. 1. 20.)

II. Figuratively:

1. To address, to direct to a Being or person.

"My supplication to you I arrecte." Skelton to Dame Pallas.

2. To impute, to attribute.

"But God, because he hath from the beginning chosen them to everlasting bliss, therefore he arrecteth no blame of their deeds unto them."—St. T. More: Works, 2. 21.

\* ar-rōct, a. [Lat. arrectus, pa. par. of arriigo.] [ARRECT, v.]

1. Lit.: Pointing directly upwards; upright.

"Having large ears, perpetually exposed and arrect."—Swift: Tale of a Tub, § 11.

2. Fig.: Attentive.

ar-rēn-ō-thēle, a. [Gr. ἀρρενωθής (arrenotheus) = male and female, of uncertain or doubtful sex.] Androgynous, uniting the characters of the two sexes in one person.

"Mr. Bancroft seems to me to accept the arrenothele character of these deities on insufficient evidence."—Brinton: Myths of the New World, p. 161.

ar-rēn-tā-tion, s. [From Fr. arrenter; Sp. & Port. arrendar = to rent, to farm, to take by lease.] [RENT.]

English Forest Law: Licence granted an owner of lands in a forest to enclose them with a low hedge and a small ditch, on condition of his paying a yearly rent for the privilege. (Johnson.)

\* ar-rēp-tion, s. [From Lat. arreptum, sup. of arripio = to seize or draw to one's self; ad = to, and rapio = to seize and carry off.] A seizing and carrying away. (Bp. Hall.)

† ar-rēp-ti-tious (1), a. [In Sp. arrepticio = possessed with a devil; Lat. arreptivus or arreptivus = seized in mind, inspired; arripus, pa. par. of arripio = to seize; ad = to, and rapio = to seize.] Snatched away.

† ar-rēp-ti-tious (2), a. [Lat. arreptus, pa. par. of arripo = to creep towards; ad = to, and repo = to creep.] Crept in privately.

\* ar-rē-r-age (age = īg), s. [ARRIARAGE.]

ar-rēst, \* ar-rēst'e, \* a-rēst, \* a-rēst'e, \* a-rēest, \* a-rēst (Eng.), \* ar-rēist, \* a-rēist (Scotch), v.t. [In Sw. arrestera; Dan. arrestere; Dut. arrestieren; Fr. arrêter = to march, to cease, to fix, to attach, to decide, to make prisoner, to interrupt; O. Fr. arrestar, arrestar, arrestiar, arrestier; Prov. Sp. & Port. arrestar; Ital. arrestare; Low Lat. arresto; Class. Lat. ad = to, and resto = to stand behind, to keep back, to withstand.] [ARREST, REST.]

A. Ordinary Language:

1. To cut short the course of anything which previously was in unimpeded motion; to stop, to stay. *Specialty*—

(a) To stop the motion of running water.

"An icy sale, oft shifting, o'er the pool Breathes a blue film, and in its mild career Arrests the hickering stream." Thomson: The Seasons; Winter.

(b) To stop the advance or the flight of a soldier in battle, the progress of a conquering army or nation, or the course of law.

"The fatal lance arrests him as he flies." Pope: Homer's Iliad, bk. v. 70.

"His diplomatic skill had, twenty years ago, arrested the progress of the French power."—Macaulay: Hist. Eng., ch. xii.

2. To fix, to attach; to call in wandering thoughts or affections, and concentrate them on an object. (It is not now followed by upon.)

"We may arrest our thoughts upon the divine mercies."—Bp. Taylor.

3. To seize an offender or his property. [B. Law.]

\* ¶ But arrest used adverbially = forthwith, without delay. (Scotch.)

"... Mercury, but arrest, Drest to obey his grate faderis behest." Douglas: Virgil, 108. 7. [Sainteou.]

B. Technically (Law):

1. To apprehend or seize upon a person either that he may be imprisoned, or that security may be obtained for his appearing when called upon to answer to a charge about to be brought against him. [ARREST, s., ARRET.]

"Constables were unwilling to arrest the offenders."—Macaulay: Hist. Eng., ch. xxi.

\* ¶ It is sometimes followed by of prefixed to the alleged offence.

"I arrest thee of high treason, by the name of Thomas Grey, knight of Northumberland."—Shakespeare: King Henry V., II. 2.

2. To seize property in virtue of authority received from a magistrate.

"He hath enjoyed nothing of Ford's, but twenty pounds of money, which must be paid to master Brook: his horses are arrested for it."—Shakespeare: Merry Wives, v. 1.

ar-rēst, \* a-rēst', \* a-rēst'e, s. [In Sw., Dan., Dut., Ger., O. Fr., & Prov. arret; Mod. Fr. arret; Sp., Port., & Ital. arresto; Low Lat. arrestum, arresta.] [ARREST, v.]

A. Ordinary Language: The act of arresting; the state of being arrested; seizure, detention.

bēl, bōy, pōt, jōwī; cat, çell, chorus, çhin, bench; go, gem; thin, this; ssn, ag; expect, Xenophon, exist, -īng. -cian, -tian = shan. -tion, -sion = shūn; -tion, -sion = zhūn. -tions, -sions, -cions = shū. -ble, -dle, &c. = bel, dēl.

## Specially:

\* 1. Stoppage, delay, hindrance.  
 "And in he goth, withouten more arrest,  
 That as he saw most perill and most dred."  
*Lancelot of the Lake* (ed. Skeat), bk. iii, 3, 073-8.

2. The seizure of a person charged with some crime, or that of his goods [B., I.]; detention, custody.  
 "And dwelleth eek in prison and arreste."  
*Chaucer: C. T., 1, 312.*

To make arrest upon or of: To arrest, to seize.  
 "Wee lik an hound, and wold have maad arrest  
 Upon my body, and wold hat had me deed."  
*Chaucer: C. T., 16, 336-7.*

Under arrest: Into or in the state of one who has been and remains arrested, seized, kept in custody, or at least under restraint. (Generally preceded by the verb to put or to place.)

"William refused to see him, and ordered him to be put under arrest."  
*Macaulay: Hist. Eng., chap. 5.*

"The governor was placed under arrest."  
*Ibid., chap. ix.*

See also examples given under ARREST, s.

## B. Technically:

## I. Law:

1. Of persons: The seizure of a suspected criminal or delinquent that security may be taken for his appearance at the proper time before a court to answer to a charge. Ordinarily a person can be arrested only by a warrant from a justice of the peace; but there are exceptional cases in which he can be apprehended by an officer without a warrant, by a private person also without a warrant, or by what is technically called a *hue and cry*. An arrest is made by touching the body of the person accused, and after this is done a bailiff may break open the house in which he is to take him; but without so touching him first it is illegal to do so. The object of arrest being to make sure that he answers to a charge about to be brought against him, it does not follow that after being seized he is incarcerated; if bail for his appearance at the proper time be given, and the case be not too aggravated a one for such security to be accepted, he will be released till the day of trial. The privilege of exemption from arrest is granted to peers of the realm, members of Parliament, and corporations, clerks, attorneys, and others attending the courts of justice, clergymen whilst actually engaged in performing divine service, and some other classes. No arrest can take place on Sunday, except for treason, felony, or breach of the peace.

¶ In the United States the law of arrest differs in certain respects from that in England, though the same general principles underlie both. [ARRESTMENT.]

2. Of things. Arrest of judgment: The act or process of preventing a judgment or verdict from being carried out till it shall be ascertained whether it is faulty or legally correct. Judgment may be arrested (1) when the declaration made varies from the original writ, (2) where the verdict materially differs from the pleadings and issues thereon, and (3) where the case laid in the declaration is not sufficient in law to admit of an action being founded upon it. (*Blackstone: Comment., bk. iii, ch. 24.*) Formerly the omission to state certain facts led to an arrest of judgment; but now, under the New Common Law Procedure Act, 15 and 16 Vict., c. 76, § 143, the omitted facts may, by leave of the court, be suggested.

II. Biology: Arresta of development. [See ARRESTED.]

"... they are due chiefly to arrests of development."  
*Owen: Classic. of the Mammalia, p. 92.*

III. Veterinary Science: A manny humour between the ham and pastern of the hinder legs of a horse. (*Johnson.*)

ar-rēs-tā-tion, s. [Fr. *arrestation*.] The act of arresting; the state of being arrested. (*Webster.*)

ar-rēs-tēd, pa. par. [ARREST, v.]

Biol. Arrested development: Development arrested at some stage of its progress. (See the example.)

"Arrested development differs from arrested growth, as parts in the former state still continue to grow, whilst still retaining their early condition. Various monstrosities come under this head."  
*Darwin: Descent of Man, pt. I, ch. iv.*

ar-rēs-tōe, s. [Eng. *arrest*; -ee.]

Scots Law: The person in whose hands property attached by arrestment is at the time when it is thus dealt with.

ar-rēs-tēr, ar-rēs-tōr, s. [Eng. *arrest*; -er, -or.]

Scots Law: The person who obtains legal possession, on which he acts, to arrest a debt or property in another's hands.

ar-rēs-t'ing, pr. par. [ARREST, v.]

ar-rēs-t'mēt, s. [Eng. *arrest*; -ment. In Ital. *arrestamento* = act of arresting.]

Scots Law: The process by which a creditor detains the effects of his debtor, which are in the hands of third parties, till the money owing him is paid. It is of two kinds:—(1.) *Arrestment in security* when proceedings are commencing, or there is reason to believe that a claim not yet in a state to be enforced will speedily become so. (2.) *Arrestment in execution*, being that which follows the decree of a court, or when a debt is otherwise settled to be legally owing.

ar-rēt', \*ar-rēt't, \*a-rēt'te, \*a-rīt'te, v.t. [From Fr. *arrêter*; Low Lat. *arreto*; the same as *arresto*.] [ARREST, v. & s.]

1. To reckon, to lay to the charge, or put to the account of.

"... his faith is arrested to rightwysnesse."  
*Wycliffe: Rom. iv. 4.*

2. To charge with a crime. (Scotch.)

"And gud Schyr Dewy of Brechyn  
 Was off this deed arestet synne."  
*Barbour, ix. 20. MS.*

3. To assign, to allot; to adjudge, to decree.

"But, after that, the judges did arrest her  
 Unto the second best that loved her better."  
*Spenser: F. Q. IV. v. 21.*

"The other five five sondry wayes he sett  
 Against the five great Bulwarke of that pyle,  
 And unto each a Bulwarke did arreste."  
*Ibid., II. xi. 7.*

† ar-rēt', s. [Fr. *arrêt* = an arrest, a sentence, a judgment; decree of a sovereign or other high authority.] Old spelling of ARREST, v. & s.

\* ar-rēt'-ēd, \* ar-rēt'-tēd, \* a-rēt'-tēd (Eng.), a-rēt'-y'd (Scotch), pa. par.

\* ar-rē-yāe, v.t. [ARABIC.]

\* ar'-rha, \* ar'-ra (pl. ar'-rha, ar'-rae), s. In Fr. (plur.) *arrhes*; Lat. *arra*, *arra*, *arrhabe*, and *arrabo*, from Heb. אֲרָבֹן (*arabon*) = a pledge; אָרַב (*arab*) = to promise, to pledge one's faith.]

1. A pledge.

"... we have not onely our *arra* and earnest penny of his assured covenant..."  
*Anderson: On the Banns Benedictus (1574).*

2. Scots Law: Earnest money (in Scotland popularly called *arles*).

ar-rhēn-āth-ēr-ūm, s. [Gr. ἄρρη (arrhē) = male, and ἀθή (athē) = an awn.]

Botany: A genus of plants belonging to the order Gramineae, or Grasses. A species grows wild in Britain—*A. avenaceum*, or tall, oat-like grass. It is also cultivated occasionally in England, and much more frequently in France, but is not very nutritious.

† ar-rhōe'-e, s. [Gr. ἄ, priv., and ῥέω (*rheō*) = to flow.] The absence of any flux. (*Parr.*)

ār-rī-āge (āge as īg), s. [AVERAGE.] Used only in the expression, *Arrage and carriage*, signifying plough and cart services formerly demanded by lords from their vassals. They were abolished by 20 Geo. II, c. 50. (Scotch.)

"... payment of mill-tithes, kain, *arrage*, carriage, dry milture,..."  
*Scott: Heart of Mid-Lothian, ch. vii.*

\* ar-rīde, v.t. [In Ital. *arridere* = to smile, to favour; Lat. *arrideo* = to smile upon especially, approvingly (opposed to *derideo* = to laugh at, to deride).]

1. To smile upon pleasantly, as a symbol of approbation. *Fig.*, to please.

"Her form answers my affection,  
 It arrides me."  
*Merriton: Antiquary, II. 1.*

"I have had more care to suite the aspect of the vulgar, than to observe those criticisms which arride the learned."  
*Wiener: Transl. of the Psalms (1629), Pref., p. 1.*

2. To laugh at, to deride.

¶ Ben Jonson in *Every Man out of his Humour* (II. 1) ridicules *arride*, evidently regarding it as an affected Latinism.

\* ar-rīd'ge, s. [A.S. *hrycg* = the back of a man or beast; a ridge.] A ridge.

"This stean tacks a fine *arridge*."  
*Croven Gloss. (S. in Boucher.)*

arrière (ar-rī-ē-re), s. [In Fr. *arrière*, a = the rear; also *arrear* or *arrear*; adj. = hinder, back, behind; adv. = behind.]

1. In the rear.

(a) Of an army:

"The horsemen might issue forth without disturbance of the foot, and the avant-guard without shuffling with the battell or *arrière*."  
*Bayard.*

(b) Of anything:

2. ARREARS. [ARREAR.]

arrière-ban, s. [Fr. *arrière-ban*; O. Fr. *arban*, *heriban*, *heriban*; Prov. *arriban*; Low Lat. *arbanum*, *herabanum*, *heribanum*; O. H. Ger. *hariban*, *heriban*; N. H. Ger. *heriban* = the calling together of an army; O. H. Ger. *heri* = an army, and *ban* = a public call, a proclamation. (ABANDON, BAN.)] The French, not understanding the old Teutonic term *heri* = an army, have supposed *arrière-ban* to have the word *arrière* in its composition, which is believed to be an error. (*Mahn.*)

1. Lit.: A general proclamation by which the old French kings summoned to their standard, for the purpose of war, their feudatory vassals, with those also who were in a state of vassalage to them.

2. Fig.: Any general summons issued by an authoritative voice.

"Thus Vice the standard rear'd; her *arrière-ban* Corruption call'd, and loud she gave the word."  
*Thomson: Castle of Indolence, II. 90.*

arrière-fee, arrière-fief, s. [Fr. *arrière-fief*.] A fee or a fief depending on one above it. These fees commenced when dukes and counts, rendering their governments hereditary, distributed to their officers parts of the domains, and permitted those officers to gratify the soldiers under them in the same manner. (*Johnson.*)

arrière-vassal, s. The vassal of a vassal. (*Trevoix.*)

arrière-voussure, s. [Fr. *voussure* (Arch.) = eaving.] A secondary arch. An arch placed within an opening to form a larger one. Sometimes it has the effect of taking off the bearing upon a wooden lintel. [DISCHARGING.]

† ar-rī-ē-rō, s. [Sp.] A muleteer.  
 "... an 'arriere' with his ten mules..."  
*Darwin: Youags round the World, ch. xv.*

ār-rī-ōnt, s. A doubtful word in Chaucer (C. T., 15, 680), prob. an error for *appetite*.

ār-rīs, s. [Fr. *arête* = (1) a fish-bone; (2) (Arch.), see def.; O. Fr. *arrete*.]

Architecture:

1. The line in which the two straight or curved surfaces of a body forming an exterior angle meet each other. This intersection forms the edge of the body.

2. The same as ARRIS-GUTTER (q.v.).

arris-fillet, s. A triangular piece of wood used to raise the slates or lead of a roof against the shaft of a chimney or a wall, so as more readily to throw off the rain. It is used also for farming gutters around skylights. It is sometimes called a *tilting-fillet*.

arris-gutter, s. A wooden gutter shaped like the letter V. (*Gwilt.*)

arris-wise, adv.

1. Ord. Lang.: Diagonally, edgewise, so as to present a sharp ridge.

2. Her.: With one angle towards the spectator; showing the top and two sides (said of a rectangular bearing, as an altar).

† ar-rī-gion, s. [Lat. *arrisio*, from *arrideo*.] [ARRINE.] A smiling upon with approbation.

\* ar-rī-vāge (āge as īg), s. [Fr.] Arrival.

"At his first entrance and *arriage*, he (Paris) assailed by rough hand to suppress the rebellious of the army."  
*Speed: The Roman, c. 21. (Richardson.)*

ar-rī-val, s. [Eng. *arria*(e); -al.]

1. The act or state of arriving.

1. Lit.: The act of reaching any place, or the state of being brought to it, by water, by land, or in any way.

"The arriving is the arrival of Ulysses upon his own island."  
*Brome: View of Epic Poetry.*

2. Fig.: The act of attaining to, or the state of being made to attain to, any object of desire.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sire, sir, marine; gō, pēt, or, wōre, wolf, wōrk, whō, sōn; mūte, oūb, cūre, unite, oūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē. ey = ā. qu = kw.

II. The peopls who reach the place indicated.

"To-day the Lady Psyche will harangue The fresh arrivals of the week before." Tennyson: The Princess, II.

\*ar-riv-ange, s. [Eog. arriv(e); -ance.]

- 1. The same as ARRIVAL; meaning the act of arriving, or the state of being made to arrive.
2. People arriving; company coming.
"For every minute is expectancy Of more arrivance." Shakesp.: Othello, II. 1.

ar-rive, \*a-rive, \*a-rÿve, \*rÿve, v.i. & t. [Fr. arriver = to disembark, . . . to arrive, from rive = bank of a river; Prov. arribar; Sp. & Port. arribar; Ital. arrivare; Low Lat. arrivo, arripo, adripo; from Class. Lat. ad = to, and rÿpa = the bank of a river, more rarely the shores of the sea.]

A. Intransitive:

I. Lit.: Properly, to reach the bank of a river or the shore of the sea; but it is now quite as commonly used for one finishing a land journey.

1. To reach by water.

"At length a ship arriving brought The good so long desired." Cowper: A Tale, June, 1798.

"And they arrived at the country of the Odarenes, . . . And when he went forth to land, . . ." Luke viii. 26, 27.

2. To reach by land journey.

"When we were arrived upon the verge of his estate, we stopped at a little inn, to rest ourselves and our horses." Sidney.

" . . . there was no outbreak till the regiment arrived at Ipswich." Macaulay: Hist. Eng., chap. XI.

II. Figuratively:

1. Of persons: To reach any sim or other object towards which one has for some time been moving. (Generally followed by at, rarely by to.)

"It is the highest wisdom by despising the world to arrive at heaven." Taylor.

" . . . the conclusions at which I arrived." Darwin: Descent of Man, vol. I, pt. I, chap. I. (1871), p. 3.

2. Of things:

(a) To reach, to attain to.

"If some things are too inhuman, it is owing to the richness of the soil; and if others are not arrived to perfection or maturity, it is only because they are overrun and oppressed by those of a stronger nature." Pope: Preface to Homer's Iliad.

(b) To come, to happen, to occur, to take place.
"Happy! to whom this glorious death arrives; More to be valued than a thousand lives." Waller.

\*B. Transitive; To reach.

"But ere we could arrive the point proposed, Caesar cried, 'Help me, Cassius, or I sink.'" Shakesp.: Julius Caesar, I. 2.

\*ar-rive, \*a-rive, s. [From arrive, v. In Fr. arrivée; Sp. arribá; Ital. arrivo.] An arrival.

" . . . and in the Grecic see At many a noble arrive hadde he be." Chaucer: C. T., 89, 90.

ar-riv-ing, pr. par. [ARRIVE, v.]

ar-rô-da, s. [In Fr. arrobie; Sp. & Port. arroba; from Arab. ar-rub or ar-rubu = a fourth part.]

A. In Spain:

1. An old weight = twenty-five English pounds. (Fernandez: Eng. & Sp. Dict., 1811.)

2. An old measure, as yet only partially superseded by the French metric system of weights and measures introduced into Spain on January 1, 1859. It is of two capacities: (1) The arroba for wine contains 3 1/4 imperial gallons. (2) The arroba for oil contains 2 1/2. (Statesman's Year-Book, 1875.)

B. In Portugal: An old Portuguese weight of about thirty-two pounds. (Simmonds.) It is too completely disused to be mentioned in the Statesman's Year-Book.

ar-rô-de, v.t. [Lat. arrodô; from ad = to, and rodô = to gnaw.] To gnaw; to nibble. (Johnson.)

âr-rô-gânçe, †âr-rô-gan-çy, s. [In Fr. arrogance; Sp. & Port. arrogancia; Ital. arroganza; Lat. arrogantia; from arrogans, pr. par. of arrego.] [ARROGATE.]

Properly, the act of taking to one's self in an insolent way that which one unjustly claims, or of helping one's self to that which, though one's own, should have been handed to one by another; the taking too much upon one's self; exorbitant pretensions, insolence.

"The fear and hatred inspired by the greatness, the injustice, and the arrogance of the French king were at the height." Macaulay: Hist. Eng., chap. IV.

âr-rô-gant, a. [In Dan. & Fr. arrogant; Sp. Port., & Ital. arrogante; Lat. arrogans; pr. par. of arrego.] [ARROGATE.]

1. Of persons: Taking in an overbearing manner something which one claims, but not justly, as one's own, or that which, though one's own, should have been passively received by him; assuming, overbearing, manifesting too high an appreciation of one's self; insolent.

"In the hour of peril, the most arrogant and mutinous spirits will often submit to the guidance of superior genius." Macaulay: Hist. Eng., ch. XIII.

2. Of things: Marked with arrogance; the offspring of arrogances.

"The pride of arrogant distinctions fall." Cooper: Retirement, 659.

âr-rô-gant-ly, adv. [Eng. arrogant; -ly.] In an arrogant manner; with undue assumption.

"Our poet may Himself admire the fortune of his play; And arrogantly, as his fellows do, Think he writes well, because he pleases you." Dryden: Indian Emperor. (Frol.)

âr-rô-gant-ness, s. [Eng. arrogant; -ness.]

The quality of being arrogant; arrogance. (Johnson.)

âr-rô-gâte, v.t. [In Fr. arroger; Sp. arrogarse; Ital. arrogare, arrogarsi; Lat. arrogatum, supine of arrego = to ask, . . . to claim what is not one's own: ad = to, and rogo = to ask.] To put forth unduly exalted claims, the offspring of self-conceit; to manifest assumption, to put forth baseless pretensions.

"He arrogated to himself the right of deciding dogmatically what was orthodox doctrine and what was heresy, of drawing up and imposing confessions of faith, and of giving religious instruction to his people." Macaulay: Hist. Eng., chap. I.

âr-rô-gâ-téd, pa. par. [ARROGATE.]

âr-rô-gâ-tíng, pr. par. [ARROGATE.]

âr-rô-gâ-tion, s. [Lat. arrogatio; from arrego = to ask, . . . to adopt as a son: ad = to, and rogo = to ask.]

1. The act of arrogating; claiming or taking to one's self more than is one's due.

" . . . have still a smack of arrogation and self-seeking." More's Poems: Notes on Psychosola, p. 87. (Boucher.)

2. Among the old Romans: The act of formally adopting an adult as a son.

" . . . recourse was then had to adoption, properly called arrogation." Note by Gieseler in Gibbon's 'Decline and Fall,' chap. XIV. (ed. 1846), vol. IV, p. 211.

âr-rô-gâ-tive, a. [From Lat. arrego = to arrogate.] Arrogating, claiming or taking what one has no real right to; putting forth unfounded pretensions.

"Mortification, not of the body (for that is sufficiently insisted upon), but of the more spiritual arrogant life of the soul, that subtil ascribing that to ourselves that is God's, for all is God's." More: Song of the Soul, Notes, p. 371.

†ar-rôn-dêe, †ar-rôn-dî, †ar-ôn-die, †a-rôn-dÿ, s. [Fr. arrondi = (1) rounded, (2) round, (3) roundish, (4) full (in face), pa. par. of arrondio = (1) to round, (2) to enlarge.]

Her.: Made round. (Gloss. of Her.)

\*âr-rôn-dëll, s. [Fr. hirondelle.] A swallow. (Scottish.)

"The arrondell so swift of flight." Bulw's Fug. (Wilson's Coll.), II. 162. (Jamieson.)

âr-rôn-disse-ment (ent = ön), s. [Fr. arrondissement = (1) a rounding, (2) roundness, (3) a district or ward; aronder = (1) to round, (2) to enlarge; rond = round.]

In France: A territorial division of the country, less than a department, but greater than a canton, which again is higher than a commune.

"France was divided, in 1866, into 89 departments, subdivided into 378 arrondissements, 2,941 cantons, and 37,543 communes." Statesman's Year-Book (1875), p. 75.

\*âr-rôn-ly, adv. [ARRANTLY.]

\*ar-rô-se, v.t. [Fr. arrosser; Lat. ros = dew.]

To wet; to bedew.

âr-rô-sion, s. [Lat. arrosus, pa. par. of arrodô = to gnaw, to nibble: ad = to, and rodô = to gnaw.] The act of gnawing, or the state of being gnawed. (Johnson.)

\*ar-rôund, v.t. [Pref. ar = Lat. ad, and Eng. round, s.] To surround. (Heath: Odes of Horace, I. 7.)

âr-rôw, \*âr-ôwe, \*âr-wë (pl. âr-rôws, \*âr-rôwes, \*âr-wëg, \*âr-wën), s. [A.S. arewe, aruwe, arwe; from ar = one (Basworth), earh = an arrow going, archery; O. feel. ör, plur. orwar = arrow (Stratmann, Wedgwood, &c.). Mshn brings it from Wel. arf, ar = weapon; Arm., Fr., & Gael. arm; Lat. arma = arms. Other derivations have been given.]

I. Lit.: A missile weapon designed to be propelled by the impulse communicated by the snapping of the string of a bow, temporarily bent into an angular form, back to its normal state of rest in a straight line. To make the wound it inflicts more deadly, and prevent its being easily pulled out, it is barbed at the tip, and often poisoned, whilst at the other extremity it is feathered, to make it move more directly forward. [ARCHERY.]

"An lancech droge is arrow ner." Story of Gen. & Exod. (ed. Morris), 472.

" . . . that which commandeth bowes and arrowes." Spenser: Present State of Ireland.

"And as the lad ran, he shot an arrow beyond him." 1 Sam. xx. 36.

II. Fig.: In Scripture arrows signify or symbolise (1) bitter words (Ps. lxxv. 3); (2) false words (Jer. ix. 8); (3) a false witness; (4) affliction divinely sent (Lam. iii. 12, 13; Job vi. 4; Ps. xxxviii. 2); (5) the judgments of God on sinful nations or individuals (Numb. xxiv. 8; Deut. xxxii. 23), or more specifically (a) famine (Ezek. v. 16, &c.), (b) lightning (2 Sam. xxii. 14, 15; Ps. xviii. 14; Zech. ix. 14); (c) children, especially stalwart sons (Ps. cxviii. 4).

1. Her.: Arrows are often represented on coats of arms, either singly or in sheaves, i.e., in bundles.

A broad arrow is one with a head resembling a pheon, except in wanting the engrailing or jaggings on the inner edge. [See 2.] (Gloss. of Heraldry.)

2. Surveying: A "broad arrow" is the name applied to the mark cut by the officers of the Ordnance Department conducting the trigonometrical survey, to note the points from which their several measurements are made.

3. Fort.: A mark placed at the esient angle of a glacis. (James: Mil. Dict., p. 247.)

\*arrow-case, s. A quiver. (Wycliffe: Gen. xxvii. 4.)

\*arrow-girdle, s. A quiver. (Wycliffe: Ezek. xxvii. 11.)

arrow-grass, s. [The English name of the botanical genus Triglochin. There are two British species, the Marsh Arrow-grass

THE "BROAD ARROW."

ARROW-GRASS (TRIGLOCHIN PALUSTRE). 1. Flower. 2. Fruit. 3. Base of leaf. 4. Complete plant.

(T. palustre) and the Sea-side Arrow-grass (T. maritimum). They have small greenish flowers. [TRIGLOCHIN.]

arrow-head, s.

- 1. The head of an arrow.
2. Cartography: A mark like the following, used to indicate the direction of a road or river, or line of march.

3. Bot.: The English name of the botanical genus *Sagittaria*. It is so called because its leaves resemble an arrow-head. There is one British species, the Common Arrow-head (*Sagittaria sagittifolia*). [SAGITTARIA.]

**arrow-headed, a.**

Bot., Archæol., &c.: Shaped like the head of an arrow; sagittate.

*Arrow-headed characters*: [CUNEIFORM.]

**arrow-maker, s.** A maker of arrows. Arrow-makers were formerly called *fletchers* and *bowyers*, and were deemed persons of importance. [See ex. under ARROW-HEAD.]

**arrow-poison, s.** Poison used by savages to tip their arrows with. That of Central America is Curarina. (Fornes: *Manual of Chemistry*, 10th ed., p. 903.)

**arrow-seed, s.** Seed shaped like an arrow; arrowy. (Tennyson: *The Poet*, 19.)

**arrow-slain, a.** Killed by an arrow. (Tennyson: *Vivien*, 415.)

\* **arrow-smith, s.** An arrow-maker. (*Destruction of Troy*, 1,588.)

**arrow-wounded, a.** Wounded by an arrow. (Tennyson: *Princess*, ii. 251.)

**ār-rōw-lēt, s.** [Eng. *arrow*, and dimm. suff. -*let*.] A little arrow. (Tennyson: *Gareth & Lynette*.)

**ār-rōw-rōot, s.** [Eng. *arrow*; *root*. The translation of a term originally applied by a tribe of native American Indians to the root of *Maranta arundinacea*, which had long been used by them to counteract the effect of wounds inflicted by poisoned arrows. Other derivations have been given. It is, however, noteworthy that in Ger. *arrowroot* is *pfel-wurz*: *pfel* being = arrow, and *wurz* = root.]

1. Bot.: The English name of the botanical genus *Maranta*, the type of the endogenous order Merantaceæ, called by Lindley, in his *Nat. Syst. of Bot.*, the Arrow-Root tribe; but entered in his *Vegetable Kingdom* to Marants. The flowers of *Maranta* are in long, close, spike-like panicles, with irregular corollas, each having a single perfect stamen, with half an anther. The veins of the leaves run out obliquely from the midrib to the margin. The root is a fleshy corm, which, when washed, grated, strained through a sieve, and again repeatedly washed, furnishes the substance so much prized as food for invalids, which is described under No. 2.

2. Comm.: The starch extracted from the rhizomes of a *Maranta*, and imported into this country in large quantities from the East and West Indies, and from Africa, each importation taking the name of the place from which it comes. Thus we have East Indian arrowroot, Bermuda arrowroot, St. Vincent arrowroot, Natal arrowroot, &c. Attempts have been made to call every starch *arrowroot* which bears the slightest resemblance to the true *Maranta*; for example, Potato or British arrowroot, from the *Solanum tuberosum*; Tons-les-mois, or French arrowroot, from the *Canna edulis*; Tapioca, or Brazilian arrowroot, from the *Manihot utilisima*, &c. This has failed since the passing of the Adulteration Act, and it is now understood by public analysts, magistrates, &c., that arrowroot must consist entirely of the starch which is extracted from the rhizomes of a *Maranta*, and that any admixture of potato or other starch is regarded as an adulteration.

EAST INDIA ARROWROOT. Magnified 100 diameters.

WEST INDIA ARROWROOT. Magnified 100 diameters.

*East Indian arrowroot* is said by some to be prepared from the tubers of the *Curcuma angustifolia*. Such we believe to be the case in Southern India, where it is a favourite food among the natives; but the article sold in this country as East Indian arrowroot is certainly the starch of a *Marant*, and not a *Curcuma*. This is readily determined by the microscope.

*Natal arrowroot* has given much trouble to the public analysts, owing to the granules somewhat resembling those of potato-starch. It has, however, been lately proved to be a genuine *Maranta* starch.

*Portland arrowroot*: A name applied to a starch prepared, some years ago, in Portland, from the roots of the *Arum maculatum*. It is not now an article of commerce.

Arrowroot is adulterated either by the mixing together of various qualities of arrowroot, or by the admixture of other starches, such as potato or tapioca. Neither of these methods renders the arrowroot deleterious; but when we consider that the price of the different qualities of genuine arrowroot varies from 6d. to 2s. 6d. per pound, and that the price of potato or tapioca flour seldom exceeds 6d. per pound, we then see how the public may be cheated in pocket. The adulteration by potato or tapioca flour is readily detected by the microscope.

**ār-rōw-ŷ, a.** [Eng. *arrow*; -*y*.]

1. Consisting of arrows.

"He saw them, in their forms of battle rang'd,  
How quick they wheel'd, and dying, behind them shot  
Sharp sleet of arrows show' against the face  
Of their pursuers, and scream'd by flight."  
*Milton: P. L.*, bk. III.

2. Resembling an arrow in form or appearance.

"By the blue rushing of the arrow Rhone."

*Byron: Childe Harold*, iii. 71.

"And beside it outstretched the skin of a rattlesnake glittered."

Filled, like a quiver, with arrows; a signal and challenge for warfare.

Brought by the Indian, and speaking with arrowy tongues of defiance.

*Longfellow: Courtship of Miles Standish*, iv.

\* **ār-rūr-ā, s.** [ARURA.]

\* **ār-rŷve, v. s.** Old spelling of ARRIVE.

\* **ars, s.** [AET.]

**A.R.S.A.** An abbreviation for (1) Associate of the Royal Society of Arts; (2) Associate of the Royal Scottish Academy.

**arse, \* ars, s.** [A.S. *ars, ars*; Sw. *ars*; Dut. *ars*; Ger. *arsch*; Pers. *arsit, arst*.] The buttock or hind part of an animal. (Chaucer: *C. T.*, 3,732.)

To hang an arse: To be tardy, sluggish, or dilatory. (Vulgar.)

"For Hudibras were but one spur;  
As wisely knowing, could he ads  
To adive frok one side of a horse,  
The other would not hang on arse."  
*Hudibras*.

**arse-smart, s.**

Bot.: (1) A vulgar name for the plant *Polygonum persicaria*; (2) *P. Hydrophyllum*.

\* **ār-sē-dine, \* ar-se-dine, \* ors-dēn, s.** [A vulgar corruption of arsenic (q.v.).] Yellow orpiment. (Nares.)

"A London vintner's signe, thiock jagged and round fringed, with theaming arsenaine."—*Nashe: Lenten Stuff*.

**ār-sē-ene, s.** [A.S. *erac-hen, erac-henn* = a quail; from *erac* = a park, a warren; and *hen* = hen.] A quail. (Scott.)

"Upon the sand yet I saw, as the more rare tane,  
With grene awions on hede, Sir Oswane the Drake  
The Arsenne that ourman ay prichand."  
*Scott: I. V.* [Jamieson.]

**ār-sen, in compos.** [From arsenic (q.v.).] Containing arsenic; as arsen-monomethyl, arsen-dimethyl, arsen-diethyl, arsen-chloro-dimethyl, &c. (Fornes: *Manual of Chem*.)

**ār-sen-āl, s.** [In Sw., Dan., Ger., Fr., & Arm. *arsenal*; Dut. *arsenaal*; Port. *arsenale*; Sp. *arsenal* = dockyard; *atarasana* = dock, arsenal, rope-yard, wine-cellar; Ital. *arsenale, arsenale, arsanale* = a dock; Arab. *dār cind'ā* = house of industry or fabrication; *dār* = house, and *cind'ā* = industry.] A magazine of military stores, containing weapons of all kinds and ammunition for the supply of the military force belonging to a country. The chief arsenal in Britain is at Woolwich. A

great many of the stores are manufactured as well as kept there.

"The Spanish fleets and arsenals were doubtless in wretched condition."—*Macculay: Hist. Eng.*, ch. xxiv.

**ār-sēn-āte, ar-sēn-i-āte.** [See ARSENIC ACID.]

**arsenate or arseniate of cobalt.** [EARTHITE.]

**arsenate or arseniate of copper.** [TRICHALCITE, OLIVENITE, LIROCONITE.]

**arsenate or arseniate of iron.** [PHARMACOSIDERITE.]

**arsenate or arseniate of lead.** [MIMETITE.]

**arsenate or arseniate of lime.** [PHARMACOLITE.]

**arsenate or arseniate of manganese.** [CHRONDARSENITE.]

**arsenate or arseniate of nickel.**

1. & 2. Two allied minerals placed by Dana as an appendix to his Oxygen Compounds. One is dark-green or brownish, and the other sulphur-yellow.

3. [See CABRERITE.]

**arsenate or arseniate of nickel and cobalt** (called also *Hydrous bisasic Arsenate of Nickel and Cobalt*). A mineral akin to Annabergite (q.v.). It is found in the desert of Atacama.

**arsenate or arseniate of zinc.** [KÖTTIGITE.]

**ars'e-nic, \* ars'e-nick, \* ars'e-nicke,**

\* **ars'-nēk, s.** [In Sw. & Ger. *arsenik*; Fr. & Prov. *arsenic*; Sp., Port., & Ital. *arsenico*. Lat. *arsenicum, arrhenicum*, which, however, is not native arsenic, but sulphuret of arsenic, orpiment; Gr. *ἀρσενικόν (arsenikon), ἀρσενικόν (arrhenikon), not arsenic, but orpiment; ἀρσενικός (arrhenikos) = masculine; ἀρσεν (arrhen), older form ἀρσεν (arsēn) = male.* From some one of these comes Arab. *zirnakan*; Syr. *sarnika*. Arsenic is so called from its powerful effects.]

**A. Ordinary Language:** The substance described under B. 1 (Chem.).

"Arsenik, sal armoniak, and brimstoner."

Chaucer: *C. T.*, 13,724.

**B. Technically:**

1. Chem. Arsenic is a triad semi-metallic element, but it may be a pentad in some of its compounds. Symbol, As; atomic weight, 75; vapour density, 150 (H = 1); atonic volume,  $\frac{1}{4}$ ; sp. gr., 5.75. It volatilises when heated without fusing, and its vapour smells like garlic. It is obtained by distilling native alloys of arsenic and iron, copper, cobalt, or nickel; also by heating arsenious oxide (As<sub>2</sub>O<sub>3</sub>) with charcoal in earthen crucibles. Arsenic has a steel-grey metallic lustre, is very brittle, and crystallises in rhombohedra. It unites with metals when fused with them, forming brittle alloys called *arsenides*. Arsenic is added to lead used for making shot, to make it run into regular globules. Metallic arsenic is often called *black arsenic*, to distinguish it from the white arsenic of shops, which is arsenious oxide. Arsenic forms two oxides, arsenious oxide (As<sub>2</sub>O<sub>3</sub>) and arsenic oxide (As<sub>2</sub>O<sub>5</sub>), but only one chloride, AsCl<sub>3</sub> (arsenous chloride). It is prepared by distilling one part of metallic arsenic with six parts of corrosive sublimate or arsenious oxide with strong hydrochloric acid. It is a colourless, oily, poisonous liquid. Arsenic unites with nascent hydrogen, forming hydride of arsenic, AsH<sub>3</sub>. Arsenic forms sulphides (q.v.). It also forms organic bases (see CACONYL and ARSINE). Arsenic is easily detected in cases of poisoning, but the reagents must be first tested for arsenic, as traces occur in zinc and in mineral acids. Compounds of arsenic, when heated on charcoal, give off fumes of metallic arsenic, recognised by its garlic-like smell. If heated with charcoal in a test-tube it forms a metallic ring. Arsenic is precipitated from solutions in the presence of hydrochloric acid by H<sub>2</sub>S (see ANALYSIS), as a yellow sulphide, As<sub>2</sub>S<sub>3</sub>, soluble in sulphide of ammonium, also in carbonate of ammonium. A piece of bright copper heated in a solution containing arsenous oxide or an arsenite rendered acid by hydrochloric acid, becomes covered with a grey film of metallic arsenic. Any arsenic compound treated with

zinc and hydrochloric acid gives off arseniuretted hydrogen ( $AsH_3$ ), which burns with a grey-blue flame, and deposits metallic arsenic on a cold porcelain dish held in the flame. It may be distinguished from antimony by dissolving in hypochlorite of sodium. Metallic arsenic, heated in a current of air, yields the characteristic octohedral crystals of arsenious acid. Nitrate of silver gives a yellow precipitate with arsenites, and a brick-red one with arsenates. Arsenates require to be reduced, or heated, before they are precipitated by sulphuretted hydrogen. Arsenates give a white crystalline precipitate with magnesium mixture and ammonia like the phosphates.

2. *Min.* Arsenic occurs native in rhombohedral crystals, or massive, reticulated, reniform, and stalactitic. The hardness is 3.5; the sp. gr. 5.93; the lustre, sub-metallic; the colour and streak, tin-white, soon tarnishing dark grey. It occurs with various metals in crystalline and schistose rocks. It is found in Norway, Hungary, Silesia, and the United States. [For other ores of it see REALGAR, ORPIMENT, &c.]

White arsenic is the same as Arsenolite (q.v.).

**arsenic-glance.** In *Mineralogy*, a variety of Arsenic.

**arsenic oxide.** In *Mineralogy*, the same as Arsenolite (q.v.)

**arsenic sulphides.**

*Chem.*: There are three sulphides— $As_2S_3$ ,  $As_2S_4$ , and  $As_2S_5$ .

*Disulphide of arsenic* ( $As_2S_3$ ) occurs native as realgar (q.v.). It can be prepared by melting metallic arsenic with sulphur. It is used to prepare Indian white fire, a mixture of twenty-four parts of nitre, seven parts of sulphur, and two parts of realgar. Heated with strong sulphuric acid,  $As_2S_3$  forms arsenious and sulphurous acids. It is used as a pigment.

*Arsenious sulphide* ( $As_2S_4$ ) occurs native as orpiment. It is obtained in a pure state by passing hydrosulphuric acid ( $H_2S$ ) through a solution of an arsenite acidified by hydrochloric acid. Arsenious sulphide is used as a pigment, called King's Yellow, also as a dye stuff.

*Arsenic sulphide* ( $As_2S_5$ ) does not exist in a separate state, but in combination with metallic sulphides, as sulpharsenates.

**ar-sên-îc, a.** [Formed from the substantive, but distinguished from it by being accented on the second syllable instead of the first. In Fr. *arsénique*; Port. *arsénico*.]

**arsenic oxide,**  $As_2O_5$ , called in the hydrated state *arsenic acid*. This compound is prepared by oxidising arsenious oxide with nitric acid, also by passing chlorine into aqueous arsenious acid. Arsenic oxide forms three hydrates analogous to phosphoric acid—monohydrate ( $HAsO_3$ ), dihydrate ( $H_2As_2O_7$ ), and trihydrate ( $H_3As_3O_{10}$ ); the last forms salts isomorphous with the phosphates. Arsenic oxide, when strongly heated, is decomposed into arsenious oxide and oxygen, and is reduced to metallic arsenic by charcoal or cyanide of potassium at red heat. Sulphurous anhydride,  $SO_2$ , reduces  $As_2O_5$  to  $As_2O_3$ . Hydrosulphuric acid,  $H_2S$ , passed through a warm solution, acidified with hydrochloric acid, of arsenic acid or of an arsenate, gives a precipitate of  $As_2S_3 + S_8$ . Arsenic oxide is used in dyeing and in preparing aniline colours. The salts of arsenic acid are called *arsenates* or *arsenites*. The salt of magnesium and ammonium is a white crystalline salt like the corresponding phosphate. Nitrate of silver gives a brick-red precipitate, and with basic acetate of lead a white precipitate, which is reduced by heating with charcoal with evolution of arsenic, recognised by the garlic-like smell.

**ar-sên-îc-al, a.** [Eng. *arsenic* (adj.), and suff. -al. In Fr. & Port. *arsénical*.] Pertaining to arsenic; having arsenic as one of its constituents.

**arsenical antimony.** A mineral, the same as Allemontite (q.v.). It is not identical with Antimonial Arsenic (q.v.).

**arsenical bismuth.** [In Ger. *arsenik wismuth*.] A mineral consisting of ninety-seven per cent. of arsenic and three per cent. of bismuth. It was known to Werner.

**arsenical cobalt.** A mineral, called also Smaltite (q.v.).

**arsenical copper.** A mineral, called also Condurrite (q.v.), a variety of Domsykite (q.v.).

**arsenical copper pyrites.** A mineral, called also White Copper.

**arsenical iron.** A mineral, the same as Mispickel (q.v.). There is a variety of it called *Argentiferous Arsenical Iron*.

**arsenical nickel.** A mineral, called also Nickeline (q.v.).

**arsenical pyrites.** A mineral, called also Mispickel (q.v.).

**arsenical silver.** A mineral, a variety of Dyscrasite. There is also an *Arsenical Antimonial Silver*.

**arsenical silver blende.** A mineral, called also Proustite (q.v.).

**ar-sên-î-côte, v.t.** [Eng. *arsenic* (adj.), and suff. -ate.] To combine with arsenic.

**ar-sên-î-câ-téd, pa. par.** [ARSENICATE.]

**ar-sên-î-cîte, s.** [Eng. *arsenic*, and suff. -ite.] A mineral, the same as Pharmacolite (q.v.).

**ar-sên-î-de, s.** [Eng. *arsenic*(to); -ide.] An alloy of arsenic with a metal. These alloys are generally brittle. Metallic arsenides, when fused with nitre, are converted into basic arsenates. Arsenides fused with sulphur and an alkaline carbonate yield a sulpharsenite or sulpharsenate of the alkali metal, and the other metal remains as a sulphide free from arsenic.

**ar-sên-î-ô, in compos.** [Eng. &c., *arsenic*(o); -o.] Containing arsenic.

**arsenic-sulphuret, or sulpharsenite.** Compounds of arsenious sulphide ( $As_2S_3$ ) with metallic sulphides. They are generally of a red or yellow colour. (See *Watts's Dict. Chem.*)

**ar-sên-î-ô-sid-êr-îte, s.** [Eng. &c., *arsenic* (q.v.); and *siderite*, from Gr. *σίδηρος* (*sîdêros*) = iron.] A mineral, called by Glocker *arsenocrocite*, it being his belief that arseniosiderite was so alike in sound to arsenosiderite that it was expedient to alter one of these terms, and arsenosiderite had the precedence in time. [ARSENOSIDERITE.] It is a fibrous species of a yellow golden colour and a silky lustre. Hardness, 1-2; sp. gr., 3.520-3.98. Compos.: Arsenic acid, 37.9; sesquioxide of iron, 42.1; lime, 11.1; water, 8.9 = 100. It occurs in France.

**ar-sên-î-ô-s, a.** [Eng. *arsenic*(o); suff. -ous.] Pertaining to arsenic; having arsenic as one of its constituents.

**arsenious oxide, or arsenious anhydride,**  $As_2O_3$ , called in the hydrated state *arsenious acid*. It is formed by burning arsenic in the air, but is obtained by roasting arsenical pyrites, ores of tin, cobalt, &c., which contain arsenic, in a furnace supplied with air, and condensing it. Arsenious oxide crystallises in octohedra. It volatilises at 218°C. If it is condensed on a hot surface it fuses into a vitreous form, which is more soluble in water than the crystalline variety. One part dissolves in twelve parts of hot and thirty parts of cold water; no definite hydrate exists. It is insoluble in alcohol and ether. Arsenious oxide is a violent irritant poison, two grains producing death, but by commencing with small doses it is possible to take even four grains without injury. The Tyrolese eat arsenic to increase the power of the respiratory organs, as they have to climb mountains. Arsenious oxide is used in medicine in small doses in skin diseases. It is rapidly absorbed into the blood when it is applied to a wound. The best antidote is obtained by adding magnesia to ferric chloride; the mixture of sesquioxide of iron and magnesia can be used at once, without washing it. Arsenious oxide reduces chromic acid, manganic acid, &c.; but it is reduced to metallic arsenic by potassium, charcoal, sulphur, and phosphorus at red heat. Arsenious oxide unites with bases forming *arsenites*, but they are not very stable compounds. Their solutions give a yellow precipitate with argentic nitrate, soluble in acetic acid, also in caustic potash; a light-green precipitate (Scheele's green) with cupric salts. *Aceto-arsenite* of

copper (Schweinfurt green) is used as a pigment for wall papers, and is very poisonous. Arsenite of sodium, formed by dissolving  $As_2O_3$  in caustic soda, is used to prepare the papers to poison flies. Arsenious oxide is used to poison rats and as a flux for glass, also in calico printing and for making pigments. Arsenites are decomposed by heat. Hydrosulphuric acid ( $H_2S$ ) gives a yellow precipitate,  $As_2S_3$ , from a solution of an arsenite in hydrochloric acid.

**ar-sên-îte, s.** [Eng. *arsen*; -ite. In Fr. *arsénite*.]

1. *Chem.* [See ARSENIOUS OXIDE.]

2. *Min.* [In Ger. *arsénit*.] The same as Arsenolite (q.v.).

**ar-sên-î-ür-ê-t, ar-sên-î-ür-ê-t, s.** [Eng. &c., *arsen* (q.v.); suffix -urett, -urel (q.v.).] Arsenic in combination with a metal. [ARSENIDE.]

**ar-sên-î-ür-ê-t-téd, a.** [Eng. *arsenuret*; -ed.] Combined with arsenic.

**arsenuretted hydrogen, arsenetted hydrogen, arsenic trihydride, arsenious hydride, or arsine.** A gas, obtained pure by the action of strong hydrochloric acid on an alloy of equal parts of zinc and arsenic; also formed when hydrogen is liberated in contact with arsenious oxide. Arsenuretted hydrogen ( $AsH_3$ ) is a colourless poisonous gas smelling like garlic; it burns with a blue flame; its sp. gr. is 2.095.

**ar-sên-ô-crô-cîte, s.** [Eng. &c., *arseno* (q.v.), and *crocite*; from Gr. *κρόκη* (*krôkê*) = wool or web, . . . a thread, so called from its fibrous character. In Ger. *arsenokrokitt*.] A mineral, the same as Arseniosiderite (q.v.).

**ar-sên-ô-lite, s.** [Eng. &c., *arseno* (q.v.) and suff. -lite. Altered by Dana from the name *arsenite*, which is used in another sense in Chemistry.] A mineral, the same as White Arsenic, Oxide of Arsenic, and Arsenious Acid. It is isometric, occurs octahedral, usually in minute stelliform crystals, or crusts, investing other substances, or botryoidal or stalactitic. The hardness is 1.5, the sp. gr. 5.698, the lustre vitreous or silky, the colour white, occasionally tinged with yellowish or reddish, the taste somewhat sweet. Composition: Oxygen, 24.24; arsenic, 75.76 = 100. Occurs at Wheal Sparan, in Cornwall, also on the Continent.

¶ Dana has an Arsenolite Group, containing this mineral and Senarmontite. It is the first placed under "Oxyds of elements of the Arsenic and Sulphur Groups, Series II."

**ar-sên-ô-pÿ-rite, s.** [Eng. *arseno* (q.v.) and *pyrite*, from Gr. *πυρίτης* (*purîtês*), s. = pyrites; adj. = of or in fire; *πίρ* (*pur*) = fire.] A mineral, made in the British Museum Catalogue synonymous with Dufrenoyite, but ranked by Dana as a distinct species, which he places in his Marcasite Group of the Pyrite Division of minerals, and calls also Mispickel. It is orthorhombic, has a hardness of 5.5-6, sp. gr. 6.0 to 6.4, a metallic lustre, and a silvery-white or steel-grey colour. Its composition is—arsenic, 46; sulphur, 19.6; iron, 34.4 = 100. It is found at Wheal Madwin and Unanimité, and other spots in Cornwall, at the Tamar mines in Devonshire, in Sweden, Norway, Germany, and North and South America. Dana divides it into Var. (1) Ordinary; (2) Cobaltic, Danaité, including Vermontite and Akontite; (3) Niccoliferous; (4) Argentiferous.

**ar-sên-ô-sid-êr-îte, s.** [ARSENOSIDERITE.] *Min.*: An obsolete name for Löllingite (q.v.). [See also ARSENOSIDERITE.]

**ar-sên-ô-s, a.** [Eng. *arsen* (q.v.), and suff. -ous. In Port. *arsenioso*.] Pertaining to arsenic, or having it as one of its constituents. [ARSENIOUS.]

**arsenous acid.** The same as Arsenolite (q.v.).

**\*ar-se-vêr-sÿ, \*ar-se-vêr-sic, \*ar-sÿe vêr-sÿe, adv.** [Eng. *arse* (q.v.), and Lat. *versus* = turned.] Reverse; turned backwards.

¶ But the matters being turned *arses verso*, they have the friction of those pleasures that never shall decay.—*Udai: James, a. 6.*

\**Arsenose*, preposterously, perversely, without order.—*Glossog. Nov.*

bôil, bôy; péat, jôwl; eat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -îng. -alan, -tian = shan. -tion, -sion = shân; -tion, -sion = zhün. -tions, -sions, -cions = shüs. -hle, -dle, &c. = bel, del.

**ars'-foot**, *s.* [Eng. *arse*; *foot*.] An English name for a bird—the Great-crested Grebe (*Podiceps cristatus*).

*Small arsfoot*: The Little Grebe (*Podiceps minor*).

† **ar'-shoon**, † **ar'-shine**, *s.* [Russ. *arschin*; from Turkish or Tartar *arshin*, *arshim* = an ell, a yard.] A Russian measure of length, 2 feet and 4-24 inches; but the English foot of 12 inches has since 1831 been the common measure of length in Russia. (*Statesman's Year-Book*, 1875.)

**ar'-sine**. *In compos.*, as a prefix or a suffix.

*Chem.*: A name given to  $AsH_3$ , arsenious hydride. A name also given to the organic arsenic bases, as Triethylarsine,  $As(C_2H_5)_3$ , obtained by distilling an alloy of arsenic and sodium with ethyl iodide. It is a colourless, stinking liquid, boiling at  $140^\circ$ . It unites with ethyl iodide, forming a crystalline substance,  $As(C_2H_5)_3I$ , from which freshly precipitated silver oxide separates the hydrate  $As(C_2H_5)_3(OH)$ , a powerfully alkaline compound. (See also *CACONYL*.)

**ar'-sis**, *s.* [In Ital. & Lat. *arsis*; Gr. *ἀρσις* (*arsis*), from *ἀρῶ* (*arō*) = to raise.]

**I. Prosody**:

1. A raising of the voice at any part of a line. It is opposed to what the Greeks called *thesis* (*thesis*), which was a depression of the voice.

2. The point in a line on which the stress is laid.

3. The rhythmic accent, metrical accentuation. It has been a subject of controversy whether this was produced by a higher tone, greater force, or more prolonged time.

**II. Music**:-

1. The raising or depressing the hand in beating time.

2. The part of the music where this occurs.

\* **ars'-môt-rîke**, \* **ars'-môt-ike**, *s.* [See *ARITHMETIC*.]

\* **ars'-nôk**, *s.* [*ARSENIC*.]

**ars'-rôpe**, *s.* [Eng. *arse*, and *rope*.] A gut, an entrail. (*Wycliffe*: 1 *Kings* v. 9.)

**ar'-sôn** (1), *s.* [O. Fr. *arson*, *arsion*, *arsun*; Prov. *arsum*, *arcto*, from Lat. *arsum*, sup. of *ardeo* = to burn.] The malicious and wilful burning of a dwelling-house or out-house belonging to another person by directly setting fire to it, or even by igniting some edifice of one's own in its immediate vicinity. If a person, by maliciously setting fire to an inhabited house, cause the death of one or more of the inmates, the deed is murder, and capital punishment may be inflicted. When no one is fatally injured, the crime is not capital, but is still heavily punishable; it is a penal offence also to attempt to set a house on fire, even if the endeavour do not succeed.

**ar'-sôn** (2), \* **ar'-soûn**, *s.* [In Fr. *arçon*; Ital. *arcione*; Lat. *arcum* = a bow.] A saddle-bow.  
"Between the saddle and the arsoon."—*Guy of Warwick*, vol. II.

\* **arst**, *adv.* [A.S. *arst*, *arost*, *erest*, superl. of *ar* = before, early, first.] First.  
"A sonne thou schalt arst habbe."  
*Alisaunder*, 312. (*S.*, in *Boucher*.)

**art**, \* **ard**, *v.* [A.S. *arþ*.] The second person sing. pres. indic. of the verb to be. Formerly it was used in speaking to men; now it is rarely employed except in addresses to the Deity.  
"Of alle thinge riche weden  
Na the ard al sikere."  
*Doct.*, xxiii. (ed. Morris), 179, 180.

**art**, \* **arte**, \* **ars**, *s.* [In Fr. & Prov. *arte*; Sp., Port., & Ital. *art*, from Lat. *ars*, acc. of *ars* = art, of which the root is *ar* = to fit, to join.] [*ARTE*, *v.*]

**A. Ordinary Language**:

**I. Subjectively**:

1. Skill, dexterity, tact in planning and in carrying out a project.  
"It is not strength, but art, obtains the prize."  
*Pope*: *Horace's Iliad*, bk. xxiii. 388.

2. Cunning.  
"More matter with less art."  
*Shakespeare*: *Hamlet*, II. 2.

3. Speculation.  
"I have as much of this in art as you;  
But yet my nature could not bear it so."  
*Shakespeare*: *Julius Cæsar*, IV. 3.

**II. Objectively**: The results of such skill or dexterity. *Specially*:-

1. The principles of science practically carried out: a series of rules designed to aid one in acquiring practical skill or dexterity in performing some specified kind of work, manual or mental. The several arts may be arranged in two groups—(a) the *mechanical*, and (b) the *liberal* or *fine arts*. The *Mechanical Arts* are those which may be successfully followed by one who does not possess genius, but has acquired the facility of working with his hands, which long practice imparts. Such are the arts of the carpenter, the blacksmith, the watchmaker, &c. They are often called *trades*. The *Liberal* or *Fine Arts* are such as give scope not merely to manual dexterity, but to genius; as music, painting, sculpture, architecture, &c.

"But it is assuredly an error to speak of any language as an art in the sense of its having been elaborately and methodically formed."—*Darwin*: *Descent of Man* (1871), vol. I., pt. I., p. 61.

2. *Spec.*: The visible expression of the sublime and beautiful.  
"A thousand lamentable objects there,  
In scorn of nature, art gave lifeless life."  
*Shakspeare*: *Rape of Lucrece*, 1, 874.

3. Anything planned; a device, a project, a scheme of operations.  
"They employed every art to soothe and to divide the discontented warriors."—*Macaulay*: *Hist. Eng.*, ch. I.

4. Whatever has been made by man, as opposed to what is natural.  
"Elsewhere we had towns, like St. Petersburg, built on artificial foundations, but the whole country of the Dutch is a work of art."—*Times*, Nov. 11, 1874.

**B. Technically**:

*Mediæval Education*: The "arts" signified the whole circle of subjects studied by those who sought a liberal education. This included science as well as art. The seven liberal arts were thus divided: 1. The *Trivium*—viz., Grammar, Rhetoric, and Logic. 2. The *Quadrivium*—viz., Arithmetic, Music, Geometry, and Astronomy. It is a remnant of this classification, which was in vogue as early as the fifth century, that we still speak of the curriculum of arts at a university, and that graduates become bachelors or masters of "arts."  
"Four years spent in the arts (as they are called in colleges) is, perhaps, laying too laborious a foundation."—*Goldsmith*: *On Politic Learning*, ch. xiii.

† **art and jure**. [Eng. *art*, and Lat. *ius*, (genit. *juris*) = law, equity.] Arts [*ART*, *B.*] and jurisprudence. (*Scotch*.)  
"And thereafter to remane three yeris at the scoles of *Arts and Jure*, so that that may have knowlege and understanding of the lawis."—*Acts James II.*, 1496 (ed. 1814), p. 288.

**art and part**.

1. *Scots Law*: Instigation, sbetment.  
"One may be guilty of a crime not only by perpetrating it, but by being accessory to or sbetting it; which is called, in the Roman law, *ope et consilio*, and in ours, *art and part*. By *art* is understood the mendate, instigation, or advice, that may have been given to others committing the crime; *part* expresses the share that one takes to himself in it by the aid or assistance which he gives the criminal in the commission of it."—*Erskine's Institutes*, Bk. IV., iv. 10.  
2. *Fig.*: Share, participation.

**art-union**, *s.* A union of persons interested in art [*ART*, II. 2], and who desire to promote it specially by purchasing the pictures of meritorious artists. These are generally distributed to the members by a lottery, which is legal in this case, though the reverse in most others. There is an art-union in London, and others exist in some of the leading provincial cities.

\* **art**, *v.* [*ART*, *s.*]

1. To instruct in art or in the arts.  
2. To make artificial.

-**art**, -**ard**, *as a suffix*. [*ARD*.]

**ar-ta-bô-trÿs**, *s.* [Gr. *ἀρτάβη* (*artabê*) = to fasten, and *βότρυς* (*botrys*) = a cluster of grapes. So called because it possesses tendrils.] A genus of plants belonging to the order *Anonaceæ*. *A. odoratissima*, or Sweet-scented Artabotrys, is a beautiful Chinese plant, which makes a fine covering for walls.

\* **ar-tâ-ll-yê**, *s.* [*ARTILLERY*.] (*Scotch*.)

**ar-tân-thê**, *s.* [Gr. *ἀρτάνθη* (*artânthê*) = to fasten or hang one thing upon another, and *άνθος* (*anthos*) = a blossom, a flower.] A genus of plants belonging to the order *Piperaceæ*

(Pepperworts). The stems are jointed; the flowers are in spikes opposite to the leaves, which are rough, and are used with good effect for stanching blood. *A. elongata*, in Peru, furnishes a kind of cube; and *A. adimtia*, in Brazil, is a pungent, aromatic, and stimulant.

\* **ar-tâ-tion**, *s.* [Low Lat. *artatio*, from Classical Lat. *artio*, *artio* = to press close.] [*ARTE*, *v.*] Exhortation, incitement, encouragement. (*Scotch*.)

"Gif him gret artation to pursen the third weid."  
—*Bellenden*: *Chron.*, bk. xii., c. 4. (*Jamieson*.)

**art'e**, \* **arc'te**, *v.t.* [O. Fr. *arter* = to force; Lat. *artus*, *arctus* = pressed together; hence close, confined, from *arto* = to shut up, to confine.] To constrain, to force, to urge, to compel, to prompt.  
"And over all this, myche more he thought  
What to speke, and what to holdyn inne,  
And what to artye."  
*Chaucer*: *Troilus & Cressida*, l. 288-91.

"Love arted me to do my obeeruance  
To his estate, and done him obeisance."  
*Chaucer*: *Court of Love*, 46-7.

\* **ar-têl**, *s.* [*Russian* (?).]

*Comm.*: An association of labourers who became responsible as a body for the honesty of each individual member of the brotherhood. They placed their earnings in a common fund, whence each received enough for his support, the rest being distributed among the members at the close of the year. Many were Russian crown serfs, chiefly in the province of Archangel.

\* **ar-têl-rieg**, *s. pl.* [*ARTILLERY*.]

**Ar-tê-mî-a**, *s.* [Gr. *Ἄρτεμις* (*Artemis*), a goddess usually identified with the Roman *Diana*.]

*Zool.*: A genus of Entomostreans belonging to the family Branchipodidae. The *A. salina*, or Brine Shrimp, loves water so salt that most other marine animals die in it. At the salt-pans at Lympington, Hants, the workmen call them *brine-worms*.

**Ar-tê-mî-s**, *s.* [Lat. *Artemis*; Gr. *Ἄρτεμις* (*Artemis*).]

1. *Class. Mythology*: A celebrated Grecian goddess, worshipped in Arcadia and elsewhere. She corresponded to the Roman *Diana* (q.v.).  
2. *Astron.*: An asteroid, the 105th found. It was discovered by Watson on Sept. 16, 1868.

**ar-tê-mîs-ÿ-a**, *s.* [Lat. *artemisia*, and Gr. *ἀρτεμισία* (*artemisia*) = wormwood. Called after Artemis, the Greek goddess corresponding to the Roman *Diana*.] Wormwood, Southernwood, or Mugwort. A genus of plants belonging to the order *Asteraceæ*, or *Compositæ*. It contains four British species—the *A. campestris*, or Field Southernwood; the *A. vulgaris*, or Common Mugwort; the *A. absinthium*, or Common Wormwood; and the *A. maritima*, or Sea-wormwood. [*ABSINTHUM*, *ABSINTHIC*, *WORMWOOD*.]

"Where Cuckow-plants and Dandelions sprung,  
(Gross names had they our plainer ears among),  
There Aruns, there Leon-tolons, we view,  
And Artemisia grows where wormwood grew."  
*Crabbe's Poems*: *The Parish Register*.

**ar-têr-ÿ-a**, † **ar-têr-ÿ-ûm**, *s.* [Lat. *arteria*, † *arterium*; Gr. *ἀρτηρία* (*artêria*) = (1) the windpipe, (2) an artery.]

*Anat.*: An artery.

¶ Not used as the ancient Greeks did, for the windpipe.

**ar-têr-ÿ-al**, *a.* [Fr. *artériel*; Sp. & Port. *arterial*; Ital. *arteriale*.] Pertaining to an artery or to arteries; contained in an artery or arteries.

"On the opposite sides of those air-bladders, along the surface of which this arterial tube creeps."  
—*Arbuthnot*.  
*Arterial blood* is scarlet in colour. It is obtained from the left side of the heart, and from the arteries. (*Todd & Bowman*: *Physiol. Anat.*, vol. II., pp. 290, 291.)

*Arterial navigation*: Navigation through the interior of a country by means of estuaries, rivers, inland lakes, canals, &c., which, to a certain extent, present an analogy to the arteries in the bodily frame.

**ar-têr-ÿ-al-ÿ-zâ-tion**, *s.* [Eng. *arterialize*; -*ation*.] The process of converting venous blood, which is dark-red, or even almost black, into arterial blood, which is bright scarlet.

**fâte**, **fât**, **fâre**, **amidst**, **whât**, **fâll**, **father**; **wê**, **wêt**, **hêre**, **camel**, **hêr**, **thêre**; **pine**, **pît**, **sîre**, **sîr**, **marine**; **gô**, **pôt**, **or**, **wôre**, **wôlf**, **wôrk**, **whô**, **sôn**; **mûte**, **cûb**, **cûre**, **unite**, **cûr**, **rûle**, **rûll**; **trÿ**, **Sÿrian**. **æ**, **œ** = **ë**. **ey** = **ä**. **qu** = **kw**.

This is done by chemical action; the venous blood, while passing through the lungs, absorbing oxygen from the air inhaled, and giving forth the carbonic acid which is breathed forth in succeeding expirations.

**ar-tér-i-ál-i-ze**, v. t. [Eng. arterial; -ize.] To convert venous into arterial blood. [ARTERIALIZATION.] (Proust.)

**ar-tér-i-ál-i-zed**, pa. par. [ARTERIALIZE.]

**ar-tér-i-ál-i-zing**, pr. par. [ARTERIALIZE.]

**ar-tér-i-ól'-ó-gý**, s. [In Sp. arteriología; Fr. artériologie; Port. & Ital. arteriologia; Gr. ἀρτηρία (arteria) = an artery, and λόγος (logos) = a discourse.] A discourse regarding the arteries. That part of medical sciences which treats of the arteries. (Dunglison.)

**ar-tér-i-ól'-ó-mý**, s. [In Fr. artériotomie; Sp., Port., & Ital. arteriotomia; Lat. arteriotomia; Gr. ἀρτηριότης (arteriotomia), from ἀρτηριότομος (arteriotomós) = to cut the windpipe or artery; ἀρτηρία (arteria) = artery, and τομή (tomé) = a cutting; τέμνω (temno) = to cut.] The operation of making an incision in an artery and drawing blood.

**ar-tér-i-tis**, s. [Eng. arter(y); -itis.] Inflammation occurring in the arteries. It may be acute or chronic. Its anatomical characters are redness of the internal membrane of the heart and arteries, an effusion of plastic, pseudo-membranous lymph on its surface, and thickening and ulceration of its substance. In chronic, which is much more common than acute inflammation, the internal membrane of the artery is thickened, softened, and coloured a deep dirty red, especially in the vicinity of calcareous and other degenerations. (Dr. J. Hope: Cycl. Pract. Med.)

**ar-tér-ý**, s. [Gr. arterie; Fr. artère; Sp., Port., Ital., & Lat. arteria; Gr. ἀρτηρία (arteria) = the windpipe or trachea; (2) an artery, from ἀήρ (ahr) = air, and τέρω (téro) = to watch over; τήρησις (téresis) = a watch, a guard. So called because the ancients, finding that, in the dead bodies which they examined, the arteries were empty of blood, took up the very erroneous notion that they were designed for the circulation of air through the system. Thus Cicero says, "Spiritus ex pulmone in cor recipitur et per arterias distributor, angustia per venas." (Cicero, De Nat. Deorum, ii. 55, 138.) This error was not shaken by Herophilus.] One of the vessels designed to convey the blood from the heart. The arteries are long cylindrical tubes, with three coats, an external tunic commonly called the cellular coat, a middle or fibrous tunic or coat, and an epithelial tunic. The coating of the arteries is very elastic. The largest arteries which leave the heart are the aorta and the pulmonary artery; both spring from the base of the heart in front. They branch and anastomose to a large extent. The contractility of the arteries forces the blood to the extremities from the heart, the valves of which prevent its return. "The prominent difference between blood drawn from the arteries and that from the veins is to be found in the bright scarlet colour of the former and the dark red, almost black, of the latter." (Todd and Bowman: Physiol. Anat., vol. ii., p. 310.)

"The chief arteries so frequently run in abnormal courses that it has been found useful for surgical purposes to calculate from 12,000 corpses how often each course prevailed."—Darwin: Descent of Man, vol. i. (1871), pt. 1, ch. iv.

**Ar-té-si-an**, a. [In Fr. Artésien.] Pertaining to Artois, an old province of France. [ARRAS.]

**Artesian well**. A well of a type copied from those in use in Artois, though it is said that similar ones previously existed in Italy, Egypt, China, and probably elsewhere. If at any place the strata bend into a trough or basin, with its concavity upwards, and if two impermeable beds are separated by one or more strata which water can penetrate, then the rain will percolate into the porous beds at any point where an outcrop takes place, and, prevented from moving far up or down by the impermeable strata, will accumulate till it reaches the outcrop. If now a bore be made in the centre of the basin the water will be forced up by that standing at a higher level than itself, and may reach or even rise above the surface of the ground. Artesian wells now exist very widely in the United States and Europe.

**art'-fúl**, a. [Eng. art, and -ful.]

**I. Of persons:** Disposed to have recourse to schemes contrived with art; cunning.

"While a large party was disposed to make her an idol, she was regarded by her two artful servants merely as a puppet."—Macaulay: Hist. Eng., ch. xv.

**II. Of things:**

- 1. Performed with art. "The last of these was certainly the most easy; but, for the same reason, the least artful."—Dryden.
- 2. Crafty, cunning.
- 3. Artificial as opposed to natural. "... the long-delayed and artful revenges of various animals."—Darwin: Descent of Man, pt. 1, ch. 11.

**art'-fúl-ly**, adv. [Eng. artful; -ly.]

- 1. In a manner to evince art; in an artful manner; craftily.
- 2. By the operation of art, as opposed to naturally; by the operation of nature.

"He knows indeed that, whether dressed or rude, Wild without art, or carefully studied."—Cooper: Retirement.

**art'-fúl-ness**, s. [Eng. artful; -ness.] The quality of being artful.

- \* 1. Skill. "Consider with how much artfulness his bulk and sturdiness is contrived, to have just matter to draw round him these rascally bodies."—Cheyne.
- 2. Cunning. (Johnson.)

**ar-thán'-ít-in**, s. [From Arthanita officinalis, a plant now called Cyclamen Europæum.]

**Chem.**: A crystalline substance which may be extracted from the roots of the Cyclamen Europæum, Primula veris, Anagallis arvensis, and Limosella aquatica. It is called also Cyclamin. It is purgative in its effects, besides producing vomiting. (Watts: Chem.)

**ar-thrit'-ic**, **ar-thrit'-ic-al**, adj. [Lat. arthriticus; Gr. ἀρθριτικός (arthritikos), from ἄρθρον (arthron) = a joint.]

† **I. Relating to the joints.** "Serpents, worms, and leeches, though some want bones, and all extended articulations, yet have their arthritical analogies; ead, by the motion of fibrous and muscular parts, are able to make progression."—Browne: Vulgar Errors.

**2. Relating to the gout, as affecting the joints; gouty.**

"Oh, may I live exempted (while I live Guiltless of pampered appetite obscene) From pangs arthritic, that infect the toe Of libertine Excess."—Cooper: Task, bk. 1.

**ar-thri-tis**, s. [Lat. arthritis; Gr. ἀρθριτις (arthritiς) = belonging to the joints.] Disease of the joints, especially gout. (Quincy.)

**ar-thró'-dí-a**, s. [Gr. ἀρθρώδια (arthrodia), from ἄρθρον (arthron) = a joint; ἄρω, the obsolete radical form of ἀραισκώ (arariskó) = to joint, to fit together.]

**Anat.**: A particular kind of articulation. (See exempla.)

"The varieties of the diarthrodial joint are as follow:—(a) Arthrodia. In this species the surfaces are plane, or one is slightly concave, and the other slightly convex. The motion is that of sliding, limited in extent and direction only by the ligaments of the joint, or by some process or processes connected with the bones."—Todd & Bowman: Physiol. Anat., i. 134, 136.

**ar-thró'-dí-al**, a. [Eng. arthrodia(a); -al.] Pertaining to the kind of articulation called arthrodia (q. v.).

"Arthrodial joints are generally provided with ligaments."—Todd & Bowman: Physiol. Anat., i. 134.

† **ar-thró'-dí-c**, a. [Eng. arthrodia(a); -ic.] The same as ARTHRODIAL (q. v.). (Webster.)

**ar-thró'-dýn'-ý-a**, s. [Gr. ἄρθρον (arthron), a joint, and ὀδύνη (odýnē) = pain.] Pain in the joints; chronic rheumatism.

**ar-thró'-dýn'-ic**, a. [English, &c., arthro-dynia(a); -ic.] Pertaining to arthrodynia.

**ar-thró'-gás'-tra**, s. pl. [Gr. ἄρθρον (arthron) = a joint, and γαστήρ (gastēr), genit. γαστέρος (gasteros), by syncope γαστρός (gastro) = the belly.] In Prof. Huxley's classification, an order of Arachnida (Spiders), in which the abdomen is distinctly divided into somites—i. e., into segments—each with an upper and lower pair of appendages. The leading genera are Scorpio, Chelifer, Phrynus, Phalangium, and Galeodea. (Huxley: Classif. of Animals, 1869, p. 123.)

**ar-thróg'-ra-phý**, s. [Gr. ἄρθρον (arthron) = a joint, and γραφή (graphē) = description.] **Anat.**: A description of the joints.

**ar-thró-íó'-bí-ým**, s. [Gr. ἄρθρον (arthron) = a joint, and ἰός = a legume.] Joint-vetch. A genus of plants belonging to the Leguminosæ order. It contains one British species, the *A. bracteatum*, or Sand Joint-vetch, found in the Channel Islands.

**ar-thró-íó'-gý**, s. [Gr. ἄρθρον (arthron), and λόγος (logos) = a discourse.] A discourse concerning the joints; that part of anatomical sciences which treats of the joints.

**ar-thró-nóm'-al-ýs**, s. [Gr. ἄρθρον (arthron) = a joint, and ἰσόμελος (isómēlos) = uneven, irregular; ἄν (an), priv., and ὁμοίος (homóios) = even, level; ὁμός (homos) = one and the same.]

**Zool.** A genus of centipedes. The *A. longicornis*, a British species, is a phoaphorecent.

**ar-thróp'-ó-da**, s. pl. [Gr. ἄρθρον (arthron) = a joint, and πούς (pous), genit. ποδός (podos) = a foot. Animals with jointed feet.]

**Zool.**: A sub-division of the Annulosa, or Articulates, containing the classes belonging to that sub-kingdom which are of the highest organisation. The body is very distinctly divided into rings or segments, sometimes, as in the Myriapoda (Centipedes and Millepedes), mere repetitions of each other, but more frequently with some of them differentiated for special ends. In general the head, thorax, and abdomen are distinct. Under the subdivision Arthropoda are ranked in an ascending series the classes Myriapoda, Crustacea, Arachnida, and Insecta.

**ar-thró-sis**, s. [From Gr. ἄρθρον (arthron) = a joint.] **Anatomy**: Articulation.

**ar-ti-ád**, s. [Gr. ἄρτιος (artios) = complete; even, opposed to odd.]

**Chem.**: A name given to elements of even equivalency, as dyads, tetrads, &c.; those of uneven equivalency, as monads, triads, &c., are called perissada [Gr. περισπός (perissos) = uneven].

\* **ar-tic**, \* **ar-tick**, a. [ARCTIC.] The same as ARCTIC (q. v.).

"But they would have winters like those beyond the arctic circle; for the sun would be 80 degrees from them."—Browne.

**ar-ti-çhóke**, s. [In Sw. ärtstocka; Dan. artischok; Dut. artijsok; Ger. artischoke; Fr. artichaut; Sp. artichoca; Ital. artichocco, articofo, carciofano, or carciofalo; O. Ital. archicocca.] *Cynara Scolymus*, a plant belonging to the order Asteraceæ, or Compositæ, the sub-order Tubulifere, and the section Carduineæ, the same to which the thistles belong. It considerably resembles a huge thistle. The receptacle on which the florets are situated, and the fleshy base of the scales are eaten. The modern Arabs consider the root as aperient, and the gum, which they term *kunkirzced*, as an emetic. Artichokea were introduced into England early in the sixteenth century.

"Artichokes grew sometimes only in the Isle of Sicily, and since my remembrance they were so daily in England, that usually they were sold for crowns apiece."—Balfour: Health's Improvement.

¶ The Jerusalem Artichoke, in Ger. *erdartichoke*, is not from Jerusalem, and is not an artichoke. It is a sunflower (*Helianthus tuberosus*). The word Jerusalem arose from a mispronunciation or corruption of the Italian *girasole*, meaning *turner to the sun*, which is the most obvious peculiarity of the Helianthus genus. The tuberous roots of this species are in general use as vegetables. (HELIANTHUS, SUNFLOWER.)

**ar-ti-cle** (cle as kel), \* **ar-tý-cúle**, s. [In Sw., Dan., Dut., & Ger. artikel; Fr. article; Sp. & Port. artículo; Ital. articolo; Lat. articulum = (1), a little joint, a joint, a knuckle; (2) Fig., (a) a member of a discourse, (b) a moment of time; dimin. of artus = a joint; Gr. ἄρθρον (arthron).] [ARTHRODIA.]

**Essential meaning:** A separate portion of anything connected, in some way, with the other portions of the same thing. *Specially*—

**A. Ordinary Language:**

- I. Lit. Of material things:**
  - † **I. Gen.**: A separate portion of a material thing. [B. 1., Bot.]
  - 2.** Any particular commodity or material substance. (Most frequently used of things manufactured, or of things exposed for sale.)

**bél**, **béy**; **póut**, **jówt**; **cat**, **cell**, **chorus**, **chin**, **bench**; **go**, **gem**; **thin**, **this**; **sin**, **as**; **expect**, **Xenophon**, **exist**. **ph = f**. **-cian**, **-tian = shan**. **-tion**, **-sion = shün**; **-tion**, **-sion = zhün**. **-tions**, **-sious**, **-cious = shüs**. **-ble**, **-dle**, &c. = **bél**, **dél**

"There were few articles important to the working man of which the price was not, in 1685, more than half of what it now is."—*Macaulay: Hist. Eng.*, ch. iii.

"The large farmer has some advantage in the article of buildings."—*J. & Mill: Polit. Econ.*, vol. 1, bk. 1, ch. 12, § 4.

**II. Fig. Of things essentially immaterial:**

1. One of a series of facts, principles, or propositions presented with logical precision and clearness in their natural order. When these are all viewed as a whole, the plural is used.

(a) (Reduced to writing.)

"... he might lay on the table *articles of impeachment* against all the chief ministers..."—*Macaulay: Hist. Eng.*, ch. xv.

"*Articles of capitulation* were speedily adjusted."—*Ibid.*, ch. xvi.

(b) (Not necessarily reduced to writing.)

"... he might lay on the table *articles of impeachment* against all the chief ministers..."—*Macaulay: Hist. Eng.*, ch. xv.

"... each *article of human duty*."—*Paley*.

2. One distinct portion of a printed newspaper or other periodical too important to be called a paragraph, and not consisting simply of a reported speech.

"For the copyright Dryden received two hundred and fifty pounds, less than in our days has sometimes been paid for two *articles* in a review."—*Macaulay: Hist. Eng.*, ch. 11.

¶ A *leading article* is one of the chief articles in a newspaper. It is supposed to be written by, or at least express the views of, the editor, and is accorded larger and more conspicuous type than that used in most other parts of the paper.

3. A point of time: in the phrase, "in the *article of death*," a translation of the Latin *in articulo mortis*, meaning = at the exact moment of death.

**B. Technically:**

**I. Bot.:** The part of an articulated stem between the joints.

**II. Gram.:** A part of speech consisting of the particles *a, an, or the*, placed before a noun to impart to it a more or less limited signification. In Greek the article is thus written: *ὁ, ἡ, τό*; in Fr. *le, la*, in the sing., and *les* in the pl.; in Ital. *il, lo, la*. In English *a or an*, the former used before a consonant sound, and the latter before a vowel one, is called the *indefinite article*, because it does not define or limit the exact person or thing to which it points; and *the* is called the *definite article*, because it does thus define or limit the person or thing which it indicates. [A, AN, and THE.]

"The *articles* are of great value in our language."—*Bain: Higher English Grammar* (ed. 1874), p. 33.

**III. History and Law:**

**1. English History and Law:**

(a) *Articles of the Navy:* Certain express regulations, first enacted soon after the Restoration, but since modified, which enumerate punishable offences in the navy, and annex specific penalties to each. (*Blackstone: Comment.*, bk. 1, ch. 13.)

(b) *Articles of War:* Similar regulations for the army of much later origin, the delay being caused by the reluctance with which Parliament admitted the principle of a standing army. [ARMY, 1, f.]

(c) *Articles of the Peace:* A recognition or obligation whereby certain parties acknowledge themselves indebted to the crown in a certain sum, but to be void if they appear in court on a certain day and meanwhile keep the peace. (*Blackstone: Comment.*, bk. iv., ch. 18.)

**2. Old Scottish History and Law:**

\* *Lords of the Articles.* (See example.)

"It had long been the custom of the Parliaments of Scotland to entrust the preparation of Acts to a select number of members who were designated as the *Lords of the Articles*."—*Macaulay: Hist. Eng.*, ch. xiii.

3. *American Hist. & Law. Articles of Confederation:* The compact entered into by the thirteen States, the confederation of which formed the United States of America. These "Articles" were adopted on March 1, 1781, and remained the supreme law till 1789. (*Goodrich & Porter.*)

**IV. Theology, Church History, Civil History, and Law. The Thirty-nine Articles:** "Articles of Religion," amounting to that number, framed and adopted as the recognised creed of the English Church during the progress of the Reformation struggle, having been "agreed upon by the Archbishops of both provinces and the whole clergy," first in a Convocation

held in 1562, and then in another in 1571. The ratification of successive sovereigns was also given, the first of them, in conformity with the spirit of the age, adding, "from which [Doctrine and Discipline of the Church of England now established] "We will not endure any varying or departing in the least degree." The Thirty-nine Articles give prominence to the distinctive tenets which sever the Church of England from that of Rome. They assail the supremacy of the Pope (Art. 37); the asserted infallibility of the Church of Rome and of General Councils (Arts. 19 & 21); the enforced celibacy of the clergy (Art. 32); the denial of the cup to the laity (Art. 30); transubstantiation (Art. 28); and five out of seven of the alleged seven sacraments (Art. 25); purgatory and relics; the worship of images (Art. 22); and finally, works of supererogation (Art. 14). The Thirty-nine Articles agree in doctrine, as distinguished from discipline, with those of the other Protestant communions at home and abroad. Assent to the Articles is required from every one who aspires to the office of a clergyman and pastor in the English Church. Till lately a similar subscription was demanded from every student taking a degree at one of the two oldest English Universities, but the Act 17 & 18 Vict., c. 81, removed this disability from Oxford, and the 19 & 20 Vict., c. 88, did so from Cambridge. [DEGREES, SUBSCRIPTION.]

**V. Commercially:**

1. *Articles of Association:* Rules, specifications, &c., framed as the basis of commercial agreements.

2. The agreement or conditions on which an apprentice, &c., is *articled*.

**ar-ti-cle (cle = kəl), v. t. & i.** [From *article*, s. In Fr. *articuler*.]

**A. Transitive:**

1. To draw up in the form of articles, or a statement of particulars, either for a legal accusation against one, or for some similar purpose.

"He whose life seems fair, yet if all his errors and follies were articulated against him, the man would seem vicious and miserable."—*Taylor: Rule of Living Holy*.

2. To bind an apprentice to a master by a covenant, agreement, articles, or stipulations.

**B. Intransitive:** To make a covenant with, to stipulate with.

"If it be said, God chose the successor; that is manifestly not so in the story of Jephthah, where he is articulated with the people, and they made him judge over them."—*Locke*.

**ar-ti-cled (cled = kəld), pa. par. & a.** [ARTICLE, v.]

**articled clerk.** An apprentice bound by articles requiring him to serve an attorney or solicitor for a certain time on condition of being instructed in his profession.

**ar-tic-u-lar, a.** [In Fr. *articulaire*; from Lat. *articularis*.] Pertaining or relating to the joints.

"... the head of the thigh-bone, an *articular eminence*."—*Todd & Bowman: Physiol. Anat.*, vol. 1, p. 105.

"... the acetabulum, an *articular depression*..."—*Ibid.*, p. 105.

**ar-tic-u-lar-ly, adv.** [Eng. *articular*; -ly.] In separate heads or divisions; under separate sections.

**ar-tic-u-lā-ta, s. pl.** [Lat., n. pl. of *articulatus* = divided into joints, pa. par. of *articulo* = to divide into joints.] [ARTICLE.] Cuvier's name for the third great division or sub-kingdom of animals. The species so designated have their body divided into rings, with the muscles attached to their interior. Their nervous system consists of two cords extending along the under part of their body, and swelled out at regular intervals into knots or ganglia. One of these is the brain, which is not much larger than the other ganglia. Cuvier divided the Articulates into four classes, arranged in an ascending order—the Annelida, the Crustacea, the Arachnida, and the Insecta. Professor Owen includes under the province Articulates four classes—(1) Annullata, (2) Chirripedia, (3) Crustacea, and (4) Insecta. With the insects proper he combines also the Myriapoda, or Centipedes, and the Arachnida, or Spiders. (*Owen: Paleont.*, 1868.) The name *Articulata* (jointed animals) being a somewhat indefinite one, *Annullata* (ringed animals) has been substituted for it by Macleay and other naturalists. Prof. Huxley divides Cuvier's

Articulata into Annullata and Annuosa (q.v.). (See also *ARTHROPODA*.)

**ar-tic-u-lāte, v. t. & i.** [From Lat. *articulatus*, supine of *articulo* = (1) to divide into joints, (2) to utter distinctly.]

**A. Transitive:**

**I. Lit.:** To connect by means of a joint; to joint.

"Although the foot be articulated to the leg..."—*Owen: Classif. of the Mammalia*, p. 72.

**II. Figuratively:**

\* 1. To draw up in articles.

"These things indeed you have articulated, 'Proclaim'd at market-crosses, read in churches.'"—*Shakespeare: 1 Henry IV.*, v. 1.

2. To enunciate, to utter, to pronounce.

"Parisian academicians, in their anatomy of speech, tell us, that the muscles of the tongue, which do most serve to articulate a word, were wholly like to those of man."—*Hay: Creation*.

**B. Intransitive:**

1. To joint; to form a joint with.

2. To treat with; to attempt to form articles of agreement with.

"Send us to Rome  
The best, with whom we may articulate,  
For their own good and ours."—*Shakespeare: Coriolanus*, 1, 3.

3. To utter distinctly separated, and therefore intelligible sounds; to speak.

"The prisoner, straggled by illness, was unable to articulate, or to understand what passed."—*Macaulay: Hist. Eng.*, chap. v.

**ar-tic-u-late, a.** [From Lat. *articulatus*, pa. par. of *articulo* (see the verb). In Sp. *articulado*; Ital. *articolato*.]

**A. Ordinary Language:**

1. Divided into joints.

\* 2. Put into the form of articles.

"Henry's instructions were extremely curious and articulated, and, in them, more articles touching inquiry than negotiation; requiring an answer in distinct articles to his questions."—*Bacon*.

3. So uttered as to be intelligible.

(v) *Lit.:* So spoken that each sound is separated from the rest, and each word and letter distinctly enunciated. The gift of doing this is a special glory of man; the inferior animals do not possess it in any considerable degree.

"The first, at least, of these I thought denied  
To beasts, whom God, on their creation-day,  
Created mute to all articulate sound."

*Milton: P. L.*, bk. ix.

"Those were his last articulated words."—*Macaulay: Hist. Eng.*, chap. xxv.

(b) *Fig.:* Intelligible, however uttered or communicated. In this sense it may be applied even to a written document as well as an oral communication.

"Wherever articulated contemporary declarations have been preserved, although it is not less certain than other sorts of history."—*Lewis: Early Rom. Hist.*, chap. viii., § 1.

**B. Technically:**

**Scots Law. Articulate Adjudication:** An adjudication proceeding at the instance of a single creditor for several debts, each placed quite distinct from the other, so that if the evidence for one fail, that for the other may not be damaged. [ADJUDICATION.]

"This is called an *articulation adjudication*, and is strictly a congeries of single adjudications carried on in one action to avoid expense."—*Hell: Comment. Law of Scotland*, 6th ed. 248.

**ar-tic-u-lā-tēd, pa. par. & a.** [ARTICULATE, v.]

**A. Ord. Lang.:** In senses corresponding to those of the verb.

"They would advance in knowledge, and not desolve themselves with a little articulated air."—*Locke*.

**B. Technically:**

1. Zool.: Having joints.

*Articulated Animals:* A common English name for the animals called in Latin *Articulata* and *Annullosa* (q.v.).

2. *Bot.:* (1) United to another body by a real or apparent articulation. (2) Possessed of joints, of which the separate portions at a certain stage of development fall asunder, or at least may be readily separated, as the joints of some legumes. (*Lindley*.)

**ar-tic-u-late-ly, adv.** [Eng. *articulate*; -ly.]

1. In the form of a joint; after the manner of a joint.

2. In the form of articles or separated particulars; to articulate.

3. With distinct enunciation of the separate sounds, and therefore intelligibly; or intelligibly, without reference to sounds at all.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, there; pine, pit, sire, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trȳ, sȳrian. æ, œ = ē. ey = ā. qu = kw.

... articulately pronounced, omitting no letter or syllable. —Elyot: Boecronus, bk. I, ch. 5.
"The secret purpose of our heart no words articulately spoken to God, who needs not our leeds to discern our meaning." —Deacy of Pisy.

ar-tic-u-late-nēss, s. [Eng. articulate; -ness.] The quality of being articulate. (Johnson.)

ar-tic-u-lā-tīng, pr. par. [ARTICULATE, v.]
... the articulating surfaces are generally flattened. —Coen: Class. of Mammals, p. 12.

ar-tic-u-lā-tion, s. [In Ger. articulation; Fr. articulation; Sp. articulacion; Port. articulacao; Ital. articolazione. From Lat. articulatio, acc. of articulatio = the putting forth of joints or nodes.]

A. Ordinary Language:

I. The act of articulating. Spec., the act of forming sounds distinctly separated.

"I conceive that an extreme small, or an extreme great, sound cannot be articulated; but that the articulation requires both a mediocrity of sound." —Bacon.

II. The state of being articulated.

1. Lit.: The state of being jointed. [B., Zool., Bot.]

2. The state of being articulately sounded, so as to be intelligible, or simply of being intelligible without indication how.

"The looks and gestures of their griefs and fears Have all articulation in his ears." —Cooper: The Needless Alarm.

III. That which is articulated. [B., I, Anat., &c.; 2. Bot.]

B. Technically:

1. Anat., Zool., Painting, Sculpture, &c.: A joint; the particular kind of connection between two bones. This is of three kinds, Diarthrosis, Synarthrosis, and Symphysis (q.v.).

"A joint, or articulation, may be defined to be the union of any two segments of an animal body, through the intervention of a structure or structures different from both." —Todd & Bowman: Physiol. Anat., I. 351.

2. Bot.: The nodes of an articulated stem.

3. Gram.: A consonant, so called because it is formed by the bending of the organs of voice into the joint, as closing the lips, &c.

ar-tic-u-lā-tōr, s. [Eng. articulate], and suff. -or.]

1. One who articulates or pronounces.

2. One who articulates bones or skeletons.

ar-tic-u-lite, s. [Lat. articulus = a little joint, and lith = Gr. λίθος (lithos = stone). Itacolumite, a variety of Quartz (q.v.).]

ar-ti-fice, s. [Fr. artifice; Sp. & Port. artificio; Ital. artificio, artificio = (1) handicraft, trade, art, (2) skill, ingenuity, (3) theory, system, (4) dexterity, skill: from artificio, acc. of artifice = an artist or an artificer; ars = art; facio = to make.] [ARTIFICER.]

I. The act or practice of making anything by art.

1. Lit.: A handicraft, a trade; art in general.

"... and as ye see a thing made by artifices perish, ... —The Golden Bole, ch. 42 (Richardson.)

2. Fig.: Skill.

"... such as illustrate the artifice of [the sun's] Maker." —Brome: Vulgar Errors, bk. vi, ch. v. (Richardson.)

II. Anything contrived by art; anything skillfully devised.

1. (Not necessarily in a bad sense): Anything framed, devised, or contrived by man, as distinguished from that which emanates more directly from God.

"Rhetoric is artifice, the work of man." —Cooper: Exposition.

2. (In a bad sense): A stratagem, a trick, a piece of low cunning.

"The ringleaders, the men of rank, fortune, and education, whose power and whose artifices have led the multitude into error, are the proper objects of severer." —Macaulay: Hist. Eng., ch. v.

ar-tif-i-cēr-shīp, s. [Eng. artifice; -er. In Fr. artificier; Sp., Port., and Ital. artifice. From Lat. artificio, acc. of artifice = (1) one who exercises a liberal art, an artist; (2) a maker of anything; ars = art, and facio = to make.]

I. Lit.: One who is proficient in, or practises, any art. (Originally applied especially to one practising a liberal art, but now generally to a simple artisan.)

"... for all manner of work to be made by the hands of artificers." —Chroa, xix, s.

II. Fig.: One who frames, contrives, or devises anything of whatever kind: a contriver, a deviser, a forger, a framer.

1. In a good sense. (Used of God, the great Framer of all things; rarely of man.)

"But by the great Artificer ended With no inferior power." —Wordsworth: Excursion, bk. iv.

2. In a bad sense: One who devises anything bad. Spec., a cunning person, a trickster.

"He, soon aware, Each perturbation smooth'd with outward calm, Artificer of fraud! and was the first, That practis'd falsehood under saintly show." —Athen: P. L., bk. iv.

ar-tif-i-cēr-shīp, s. [Eng. artificer; suff. -ship.] The state of being an artificer; the whole body of artificers taken collectively.

ar-ti-fic-ial (q as sh), a. & s. [In Fr. artificiel; Sp. & Port. artificio; Ital. artificiale and artifiziale; Lat. artificialis, from artificium.] [ARTIFICE.]

A. As adjective:

I. Ordinary Language:

1. Framed or produced by art instead of by nature; in some way modified by art rather than by nature.

(a) Framed, made, or produced by art instead of by nature.

"Artificial fountains spouted among the flower-beds." —Macaulay: Hist. Eng., ch. xi.

(b) With which art has had to do. Spec., cultivated, as opposed to growing or arising spontaneously. (It may be used in a good sense, as an "artificial grass" = a cultivated one; or in a bad sense, as in the enjoin example.)

"They swathe the forehead, drag the limping limb, And vex their flesh with artificial sores." —Cooper: Two, bk. I.

(c) Not conformable to nature; unnatural, as opposed to natural.

"These seem to be the more artificial, as those of a single person the more natural governments." —Temple.

2. Contrived with some measure of art or skill, as opposed to what is artless, undesigned, or unskillful.

(a) (In a good, or at least, in an indifferent sense): Ingenious.

(b) (In a bad sense): Containing or involving some kind of trickery.

II. Technically:

1. Rhet. Artificial arguments: Proofs on considerations which arise from the genius, industry, or invention of the orator. They are thus called to distinguish them from laws, authorities, citations, and the like, which are said to be inartificial arguments.

2. Astron. Artificial horizon. [HORIZON.]

3. Mathematics:

(a) Artificial lines: Lines, on a sector or scale, so contrived, as to represent the logarithmic sines and tangents; which, by the help of the line of numbers, solve, with tolerable exactness, questions in trigonometry, navigation, &c.

(b) Artificial numbers: Logarithms.

4. Bot. The artificial system of classification: That of Linnæus, founded mainly on the number of the stamens and pistils; the chief aim being to facilitate the naming of specimens, and not to rank together the plants which are most closely akin. The Natural as opposed to the Artificial System makes this latter object its special one, and the classification of Linnæus, which in its day rendered immense service in popularising Botany, has now all but sunk into disuse.

† B. As substantive: Anything produced by art.

"There ought to be added to this work many and various indices, besides the alphabetical ones; as, namely, one of all the artificials mentioned in the whole work." —Sir W. Patsy: Advice to S. Bartib, p. 19.

† ar-ti-fic-ial-ly (q as sh), s. [Eng. artifice; -ity.] The quality of being artificial.

"Trens in hedges partake of their artificiality." —Shenstone.

ar-ti-fic-ial-ize (q as sh), v.t. [Eng. artifice; -ize.] To render artificial.

ar-ti-fic-ial-ly (q as sh), adv. [Eng. artifice; -ly.]

\* I. Artfully, skillfully, with contrivance.

"How cunningly he made his faultiness less; how artfully he set out the torments of his own conscience." —Stdney.

2. By art, not by nature.

"The tall of the giraffe looks like an artificially constructed fly-apper." —Darwin: Origin of Species (ed. 1859), ch. vi, p. 198.

ar-ti-fic-ial-nēss (q as sh), s. [Eng. artifice; -ness.] The quality of being artificial. (Johnson.)

\* ar-ti-fic-iōus (q as sh), a. [Lat. artificiosus; Fr. artificieux.] The same as ARTIFICIAL (q.v.). (Johnson.)

\* ar-tif-i-ce, v.t. [Eng. art, formed on the analogy of naturalise: see example.] To make to resemble art. (Used of operations upon nature.)

"[It] was a philosopher: says Montaigne, 'I would naturalise art, instead of artificial nature.' The expression is odd, but the sense is good." —Bolingbroke to Pope.

ar-til-lēr-ist, s. [Eng. artiller(y); -ist.] An artilleryman; one practically acquainted with artillery or gunnery.

"The artillery is all English, as the Government has never seen fit, since the mutiny of 1857, to train native artilleryists to use the guns." —American Account of India (by Gen. Forsyth), Times, April 28, 1876.

ar-til-lōr-ŷ, \* ar-til-lēr-iō, \* ar-tŷl-ēr-ŷ, \* ar-til-yēr-ŷ, \* ar-til-ric, \* ar-tōl-ric (Eng.), \* ar-tā-lŷ-ō (Scolch), s. [In Ger. & Fr. artillerie; O. Fr. artillerie, artillerie, from artiller = to render strong by art, to work with artifice, to fortify, to arm; Prov. artilharis, artilheria; Sp. artilleria; Port. artilharia; Ital. artiglieria; Low Lat. artillare = to make machines; artilharis, artilheria = warlike engines, vans laden with military arms; Class. Lat. ars = art.]

A. Ordinary Language:

I. Implements of war.

1. Literally:

(1) Gen.: Warlike implements of whatever kind.

"And all his vthir artillery also He dowbleth hath, that neverwill to sen." —Lancelot of the Lake (ed. Skeat), bk. III, 2:58-9.

† Formerly it might be used in the plural; now only the singular is employed.

\* Swiche as be castelles and other manere edifices, and armure, and artilleries. —Chaucer: Tale of Melibee.

(2) Specially:

(a) Bows and arrows.

"And Jonathan gave his artillery [bows and arrows] unto his lad. . . . —1 Sam. xx, 40.

(b) Cannons or other great guns, in a state all appliances needful to keep them in and also of efficiency for use in time of war.

2. Figuratively:

(1) Any weapon used in intellectual, moral, or spiritual warfare.

"He laughs whatever weapon Truth may draw, And deems her sharp artillery more stave." —Cooper: Hope.

(2) The "electric fluid" in the clouds when flashing forth lightning accompanied by the roar of thunder.

"And heaven's artillery thunder in the skies." —Shakespeare: Taming of the Shrew, I. 2.

II. The science and art of gunnery.

"In artillery practice the heat generated is usually concentrated upon the front of the bolt, and on the portion of the target first struck." —Tyndall: Frag. of Science, 3rd ed., I. 17.

† Here the word is used almost adjectively.

III. The men constituting the military corps in charge of the cannons, and who are trained to fire them in war.

"But there was no regiment of artillery, no brigade of sappers and miners. . . ." —Macaulay: Hist. Eng., ch. III.

B. Technically:

Mil.: For the several uses of the word artillery, see A., I., II.; & III. James, in his Military Dict., considered the artillery in the sense A., III. as consisting of (1) the Royal Regiment of Artillery, (2) the Royal Horse Artillery, (3) the Royal Artillery Drivers, and (4) the Commissary's Department. It is now often divided into (1) Horse Artillery, (2) Field Artillery, and (3) Garrison Artillery.

In the United States, the principal artillery school is at Fortress Monroe, Virginia, where five batteries (one from each artillery regiment of the army) are in constant training.

Field Artillery: Artillery designed to be taken with an army to the field of battle.

Park of Artillery (PARK): Artillery, with the carriages, horses, and stores of all kinds necessary for its effective use.

Siege Artillery: Artillery of heavy metal, designed to be employed in breaching fortifications.

Train of Artillery: A certain number of pieces of cannon mounted on carriages, with all their furniture fit for marching.

bōil, bōy; pōut, jōwl; cat, cēll, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -īng, -cian, -tian = shān. -tion, -sion = shūn; -tīon, -sion = zhūn. -tious, -sious, -cious = shūs. -ble, -dle, &c. = bpl. dpl.

ar-til-lér-y-man, s. [Eng. artillery; man.] One who belongs to the artillery or who serves a gun.

... from the artillerymen being in particular cases mounted upon the cart attending the brigade. —James: Military Dic., p. 26.

ar-ti-ó-dác-tý-la, s. pl. [Gr. ártios (artios) = equal, and dáktulos (daktulos) = a finger or toe. Having equal toes.] In the classification of Mammalia by Professor Owen, the first (highest) order of the Ungulata. It is divided into two families or sections: Omnivora, as the Hog; and Ruminantia, as the Sheep.

ar-ti-ó-dác-týle, a. [ARTIODACTYLA.] Having even toes, that is, toes even in number. (Used also as a substantive.)

"In the even-toed or 'artiodactyle' Ungulates." —Owen: Classif. of the Mammalia, p. 29.

\* ar-tí-que (tique = tík), adj. [ARCTIC.] The same as ARCTIC (q.v.). "From tropic, e'en to pole arctique." —Dryden: To Sir G. Etherage, 6.

\* ar'-tís (Old Eng.), äirts (Scotch), s. pl. Quarters of the sky. [AIRT.] "... and sua seridis the ord about all arctis anis every day, puzad spret in all that lyf beris." —Wisdom of Solomon (ed. Lumby), 256, 252. "Of a' the arctis the wlad can blaw I dearly like the west." —Burns: I Love my Jean.

ar-ti-sán, s. [Fr. artisan; Sp. artesano; Ital. artigiano. From Lat. ars = acquired skill, art.]

\* 1. One who practised any of the arts, including the liberal ones, such as sculpture and painting, or was a student of books. "Zeuxis [meaning the celebrated painter] a professed artisan, ... —Holland: Pliny, pt. II., p. 535. (Trench: Select Gloss., pp. 8, 9). 2. One trained to practise a manual art; a handicraftsman, a mechanic, a tradesman.

¶ This meaning, though not the original one, has still long existed; for instance, Bullokar, in the edition of his English Expositor, published in 1856, defines an artisan to be "A handy crafts-man; an artificer." "Even in the towns the artisans were very few." —Macaulay: Hist. Eng., ch. xii.

ar-tíst, s. [Fr. artiste; Sp., Port., & Itsl. artista; from Lat. ars = art.]

I. Of a person's profession, occupation, craft, or study:

\* 1. One who has had a liberal education, or at least is a reader, and has in consequence acquired knowledge, as contradistinguished from one who is unread. "The wise and fool, the artist and unlearned." —Shaksp.: Troilus & Cressida, I, 3. ¶ It was used especially (a) for a cultivator of classical learning: "Some will make me the pattern of ignorance for making this Scaliger the pattern of the general artist." —Fuller: Holy State, bk. II., ch. 3. (See Trench: Select Glossary, pp. 8, 9).

OR (b) for a cultivator of science. In the unjoined example it probably means "astronomer," or if it be "constructor of the telescope," the example will illustrate signification 2 instead of 1. [ART (B.), ARTSMAN.] "... the moon, whose orb Through optic glass the Tuscan artist views At evening from the top of Fensole." —Milton: P. L., bk. I.

† 2. One who practises an art of whatever kind. (The variety of occupations to which the term may be applied may be seen in the example from Pope under No. II.) "Then from his arvil the lame artist rose, Pope: Homer's Iliad, bk. xviii. 482.

3. One who practises any of the fine arts, as music, painting, sculpture, engraving, or architecture. (This is now the ordinary signification of the word.) (a) Literally: "Rich with the spoils of many a conquer'd land, All arts and artists Theseus could command, Who sold for hire, or wrought for better fame; The master painters and the carvers came." —Dryden. (b) Figuratively: "Well hast thou done, great artist, Memory." —Tennyson: Ode to Memory, 5.

\* II. One who is possessed of trained skill in any art or occupation, as distinguished from one who is destitute of such training. (Lit. & Fig.) "It is not strength, but art, obtains the prize, And to be swift is less than to be wise,

"Is more by art than force of numerous strokes The dexterous woodman shakes the stubborn oaks: By art the pilot, through the boiling deep And howling tempest, steers the fearless ship; And 'in the artist wins the glorious course, Not those who trust in chariots and in horse. In vain, unskilful, to the goal they strive, And short or wide th' ungodward' courier drive; While with sure skill, though with inferior steeds, The knowing racer to his end proceeds." —Pope: Homer's Iliad, bk. xxiii., 883-94.

\* artist-god, s. [Here the word artist is used in the sense 1., 2.] Vulcan. "To her the artist-god: Thy griefs resign, Secure, what Vulcan can, is ever thine." —Pope: Homer's Iliad, bk. xviii., 531-2.

artist-like, a. Like an artist. "Artist-like, Ever retiring thou dost gaze On the prime labour of thine early days." —Tennyson: Ode to Memory, 5.

ar-tíste, s. [Fr.] One who practises an art and professes to do so in the highest style. (Often used of play-actors and musicians, but not unfrequently also of milliners and cooks, who, deriving their inspiration from Paris, wish to be designated by a word current in that capital rather than by one of indigenous growth.)

ar-tís-tíc, ar-tís-tíc-al, a. [Eng. artist; -ic, -ical. In Fr. artistique.]

1. According to the rules of art, or in the way which a proper artist might be supposed to adopt. (Webster.) 2. Pertaining to an artist. (Webster.)

ar-tís-tíc-al-ly, adv. [Eng. artistical; -ly.] In an artistic manner. (Quarterly Review.) (Worcester's Dic.)

art'-lèss, a. [Eng. art; -less.] Without art. Specially—

I. Of persons & minds: 1. Not understanding art; destitute of all acquaintance with art. (Rarely followed by of.) "The high-shod plowman, should he quit the land, Artless of steers, and of the moving sars." —Dryden. 2. Guileless, simple, unsuspecting, too innocent to try to deceive, and not likely to succeed even if the attempt were made. "Suspicion lurks not in her artless breast; The worst suggested, she believes the best." —Cooper: Charity.

II. Of things: 1. Destitute of art; not evincing the possession of art in its or their constructor. "... these assemblages of artless and massy pillars." —Warton: Hist. of Kingdngton. 2. Conceived in simplicity and sincerity; not designed to produce an effect, but producing it all the more on account of this. "Oh, how unlike the complex works of man, Heaven's easy, artless, unaccomber'd plan!" —Cooper: Truth.

art'-lèss-ly, adv. [Eng. artless; -ly.] In an artless manner. Specially— 1. Without skill. 2. Without craft; simply, guilelessly, undesignedly, sincerely. "Nature and truth, though never so low or vulgar, are yet pleasing, when openly and artlessly represented." —Pope.

art'-lèss-nèss, s. [Eng. artless; -ness.] The quality of being artless; simplicity, sincerity, unaffectedness; absence of guile or affectation. (Todd.)

art'-ly, adv. [Eng. art; -ly.] Artificially, by human skill or contrivance. "A crabsteck, if it have a eye of some delicate apple artly grafted upon it, they [the branches] will all follow the nature of the stock." —Sanderson: Works, I. 431.

ar-tó-car-pá-çé-sè (Mod. Lat.), ar-tó-car-páds (Eng.), s. pl. [ARTOCARPUS.] An order of exogenous plants, placed by Lindley under his Urticales or Urtical Alliance. The female flowers are collected into fleshy masses or heads. The stipules are convoluted and sheathing, as in the genus Ficus. In 1847, Lindley estimated the known species at fifty-four. [ARTOCARPUS.]

ar-tó-car-poús, ar-tó-car-pè-oús, a. [ARTOCARPUS.] Relating to the order Artocarpeæ, the genus Artocarpus, or to the Bread-fruit.

ar-tó-car-pūs, s. [In Itsl. artocarpe; Mod. Lat. artocarpus; from Gr. ártos (artos) = bread, and καρπός (karpós) = fruit. Bread-

fruit.] A genus of plants—the typical one of the order Artocarpeæ, or Artocarpaceæ. It contains various species. The most notable is the *A. incisa*, or Bread-fruit tree. It is a

BREAD-FRUIT TREE.

middle-sized tree, with large variously-cut and lobed leaves. It has a round, curiously-nuricated fruit. [BREAD-FRUIT.] It flourishes in the South Sea Islands. Dampier, Anson, and Captain Cook made it known in Europe, and the expedition of Captain Bligh of the *Bounty*, dispatched with the view of introducing it into the West Indies, ended in the mutiny of the crew, the capture of the vessel, and the settlement of some of the mutineers in 1790 on Pitcairn's Island, whence their descendants were transferred to Norfolk Island in July, 1856. The *A. integrifolia* is the Jack-tree. [JACK-TREE.]

ar-tó-týr-tés, s. pl. [Gr. ártótyros (artotyros) = bread made with cheese; ártos (artos) = a loaf of bread, and τυρός (tyros) = cheese.]

Ch. Hist.: A sect in the primitive Church who celebrated the Lord's Supper with bread and cheese, on the ground that the first oblations of man were not only the fruits of the earth, but their flocks (Gen. iv. 3, 4).

\* ar-tóu, \* ar-tóu, \* ar-tú, [Eng. art; thou.] A contraction for art thou. "Why artow so discoloured on thy face?" —Chaucer: C. T., l. 12, 92. "Chyld, whi artow out a-shamed?" —Dispute between Mary & the Cross (ed. Morris), ll. 22.

art'-shíp, s. [Eng. art; -shíp.] Artistic skill. (Sylvester: The Vocation, 118.)

\* arts'-mán, s. [Eng. arts; man.] A man skilled in any science or art. "... and that the pith of all sciences, which maketh the artisan differ from the ignorant, is in the middle proposition, which in every particular knowledge are taken from tradition and experience." — Bacon (Quotation from Plato): Adv. of Learn., bk. II.

ár'-úm, s. [In Ital. arò; Sp. yáro; from Lat. aròs, aròr, arum = the cuckoo-pint; Gr. áron (aron). Hooker and Arnott think the Greek word may come from the Heb. ארון, in the sense of fire or flame, and may refer to the burning or acrid character of these plants.] A

ARUM MACULATUM.

genus of plants belonging to the order Araceæ, or Arads. It contains one British species, the well-known *A. maculatum*, the Cuckoo-pint (meaning point), Lords and Ladies, or Wake-Robin. The solitary spikes of bright scarlet

berries may often be seen under hedges in winter, after the leaves and spadix have disappeared. They are poisonous. The rhizomes are used in Switzerland for soap. There is in them an amylaceous substance, which, after the acid matter has been pressed out, may be employed in lieu of bread-flour.

**A-rūn-dēl'-ī-an, a.** [Eng. *Arundel*; -ian.] Pertaining to any of the successive Earls of Arundel.

*Arundelian* or *Oxford Marbles*: Certain marbles brought from the East by Mr. William Petty, who purchased them for Thomas, Earl of Arundel, in 1624. Arriving in London in the year 1627, they were placed in the gardens of Arundel House, which then occupied the site on which Arundel, Norfolk, Surrey, and Howard Streets, running off the Strand, in London, now stand. In 1667 the Hon. Henry Howard, grandson of the first purchaser, and afterwards Duke of Norfolk, presented the collection, which had met with Vandal treatment in London, to the University of Oxford. It was either from his ancestor or from him that the term *Arundelian*, applied to the marbles, was derived. The marbles contain the *Parian Chronicle* (q.v.).

**a-rūn-dif-ēr-ōūs, a.** [Lat. *arundifer*, from *arundo* = a reed or cane; and *fero* = to bear.] Reed-bearing, cane-bearing. Bearing reeds or canes. (*Ogilvie*.)

**a-rūn-dī-nā'-qē-ōūs, a.** [Lat. *arundinaceus*.] Resembling a reed or cane.

**a-rūn-din-ār'-ī-a, s.** [From *arundo* (q.v.).] A genus of grasses containing the Cane-brake of North America (*A. macrosperna*).

**a-rūn-din-ē-ōūs, a-rūn-din-ō'ye, adj.** [Lat. *arundineus, arundinosus*.]  
1. Made of reeds.  
2. Abounding in reeds.  
3. Resembling a reed.

**a-rūn-dō, s.** [Lat. *arundo* = a reed.] A Linnæan genus of grasses, formerly made to include several British species; but all these are by some botanists now removed from it, and placed in other genera. Bentham partly returns to the older view, and gives one British *Arundo*—viz., *A. phragmites*, the Common Reed. It is *Phragmites communis* of most modern botanists. It is a stout perennial, five, six, or more feet high, with a long creeping root-stock, long leaves, and a small or large panicle of flowers. It occurs in Britain in wet ditches, marshes, &c., flowering towards the end of summer and in autumn. [AMMOPHILA, ΠΑΡΜΑ, CALAMAOBOSTIS.] *A. donax* supplies material for fishing-rods, and is imported for the purpose from the south of Europe, where it is indigenous. The striped-leaved variety, formerly more common than it now is in gardens, is called Gardener's *Gartiera*.

**\*a-rūn-r-a, \*ar-rūn-r-a, s.** [Lat. *arura*; Gr. *ἀρουρα* (*aroura*) = tilled or arable land, corn-land; *ἀρούω* (*arōō*) = Lat. *aro* = to plough, to till.] A day's ploughing. [AROURA.]

**a-rūs-pōx, †ha-rūs-pōx, a-rūs-pīce s.** [In Fr., Sp., & Ital. *aruspice*; Port. *aruspice, haruspice*; Lat. *haruspex*; † *aruspex*, from (1) *hira* = the empty gut; Sansc. *hīrā* = the intestines; Greek *χολάς* (*cholās*) and *χολαί* (*cholai*); Old Norse *gar-nitr* = the intestines; and (2) *specio* or *epicio* = to look at.]

Among the Etruscans and Romans: A soothsayer or diviner who pretended to foretell future events by the inspection of the entrails of victims.

"Adorn'd with bridal pomp, she sits in state;  
The public cotaries and *aruspex* wait."  
*Dryden*; *Jus. Sat.*, 10.

"The Senate, however, consider this *aruspex* of uncertain authority, and await the response of the Delphian oracle."—*Lewis*; *Early Rom. History*, ch. xii.

Though the form *aruspice* is given in Dictionaries, the examples cited to illustrate it, being in the plural, do not establish its existence, for *aruspices* might be the plural of the Lat. *aruspex*, as well as of the English *aruspice*.

"The second sort of ministers mentioned by Cicero, were not priests, but *aruspices* and *aruspices*, designed to be the interpreters of the mind of the gods."—*Sp. Story on the Priesthood*, ch. 5.

"They [the Romæans] had colleges for *aruspices* and *aruspices*, who used to make their predictions sometimes by fire, sometimes by flying of fowls, &c."—*Wood*; *Letters*, III. 22.

**a-rūs-pī-çy, s.** [From Lat. *aruspiceum*, accus. of *aruspex* = a soothsayer.] [ARUSPEX.] Pretended divination of future events by inspecting the entrails of victims.

"A flame more ceaseless than the roquary  
Of old *aruspices* and augury."  
*Budler*; *Hudibras*, pt. II., c. III.

**\*ar'-val, \*ar'-vél, \*ar'-vil, \*ar'-thél, s.** [Dan. *arvful* = a solemn feast in honour of a deceased chieftain, from *arv* = an heir, and *ol* = ale.] A funeral. (Used chiefly in the north of England.)

**\*arval-bread, s.** Bread given to the poor in the north of England on occasion of funerals.

**\*arval-feast, \*arvil-feast, s.** A feast made at a funeral.

"I had an *inella* on't at th' *arvil-feast*."  
*Yorkshire Dialogue*, p. 59. (*Boucher*.)

**\*arval-supper, s.** A supper in connection with a funeral.

**ar'-val, a.** [Lat. *arvalis* = arable.] Of or pertaining to ploughed land.

**Arval Brethren, s. pl.**  
*Roman Mythol.*: Priests who offered sacrifice to the divinities of the field in order to secure the fertility of the soil.

**ar-vic-ōl-a, s.** [Lat. *arvum* = a field, and *colō* = to dwell in, to inhabit.] A genus of rodent mammals, belonging to the family Castoridae, though they have also close affinities with the Muridae, or Mice. Its representatives in Britain are the *A. amphibius*, the Water-vole, or Water-rat; the *A. agrestis*, the Field-vole, Short-tailed Field-mouse, or Meadow-mouse; and the *A. pratensis*, or Bank-vole. All the three are found, also fossil, in Newer Pliocene strata and caves in Britain.

**Ar-vō-nī-an, a.** [From *Arvonita*, the Roman name of a district in Wales.] Pertaining to the above-mentioned Arvonian.

*Geol.*: Noting Pre-Cambrian formation in Pembrokeshire, Carmarvonshire, and Anglesea. Dr. Hicks divides the Pre-Cambrian formation into *Dimetian*, *Arvonian*, and *Pebidian*. Each of these must have been many thousand feet in thickness, and their horizontal extension is very wide. The Arvonian formation contains the quartz-felsites and porphyries, called *hellestinia* by Torell, and *petrosiles rocks* by Hnnt. (Used also substantively.)

**\*ar-wē, \*ar'-whē, \*ar-ōwe, a.** [A.S. *eary* = laert, weak, timid.] [AROH, a.] Timid.

**\*ar-wē, v. i.** [A.S. *earyian* = to be a coward.] [ARWE, a.] To render timid.

"Hast *arwe* many herly men that hadden wil to lyghte."  
*Piers Plowman*. (*Boucher*.)

**\*ar-wē** (plural *\*ar-wēs, \*ar-wēn*), s. [ARROW.] An arrow.

"A bow he bar, and *arwes* bright and kene."  
*Chaucer*; *C. T.*, 2, 993.

**\*ar'-wýg-ýll, s.** [EARWIG.]

**-ary, as suffix.** [From Lat. suff. *-arius, -arium*.]

1. An agent in performing any act or doing any work; as *lapidary* (Lat. *lapidarius*) = a worker in stone.
2. A place for; as *library* (Lat. *librarium*) = a place for books.
3. Connected with or pertaining to.

**Ār'-y-an, †Ār'-y-an, a. & s.** [In Sansc. *Arya* (as subst.) = (1) *Ā* (a tribe or nation) = the Aryas; (2) in later Sanscrit (as adj.) = noble, of good family. India was called *Arya-dvāra* = the country of the Aryas. These Aryas were invading Brahmans, Kāhatriyas (warriors), and Vaisyas (merchants); whilst the aborigines of India were called in the Vedas *Dasyus*. In later Sanscrit *Arya* specially meant the third or merchant class, the most numerous of the three, whence it came to stand for the whole nation. It seems to mean one who ploughs or tills, and to be connected with the Latin word *aro* = to plough, to till. It was opposed to *Tura*, in Sanscrit meaning (1) as adj. = swift; (2) as subst. = a nomad. [TURANIAN.] In *Zend airya* (adj.) means venerable, and (subst.) the Persian people. (The Persians and the Indian Aryans were originally the same nation.) Persia was called by Hellenicists, who wrote before Herodotus, *Aria*. Herodotus says that the Medes called themselves *Arii*. In the cuneiform inscrip-

tions Darius denominates himself *Ariya*. Many other words, ancient and modern, appear to contain the term, as Iran (Persia); Armenia; *Aria*, in Thrace; the *Arii*, in Germany; and even our own Erin and Ireland. (See Max Müller on the *Science of Language*, 4th ed., pp. 246–255.) The word has sometimes been written *Arian*; but *Aryan* is more correct, besides having the great advantage of discriminating the term from *Arian*, pertaining to the Presbyter of Alexandria, so prominent in discussions regarding the doctrine of the Trinity.]

**A. As adjective:**  
**I. Philol. & Ethnol.**: Belonging to the great family of human languages described below.

*Aryan family of languages*: A great family of languages, sometimes, though rarely, and not quite accurately, called *Japhetic*; more frequently designated as the Indo-European or Indo-Germanic family of tongues. They have reached a higher development than those of the second great family, the "Semitic," better described as the Syro-Arabian family, and are far in advance of the next one—that comprising the Turanian tongues. [LANGUAGES.] Like the Syro-Arabian forms of speech, they are inflectional [INFLECTIONAL]; while those of Turanian origin are only agglutinata. [AGGLUTINATE.] Max Müller separates the Aryan family of languages primarily into a Southern and a Northern division. The former is subdivided into two classes—(1) the Indic, and (2) the Iranian; and the latter into six—(1) the Celtic, (2) the Italic, (3) the Illyric, (4) the Hellenic, (5) the Windic, and (6) the Teutonic. [See these words.] (*Max Müller*; *Science of Language*, vol. II., 1871, p. 411.) It is often said that Sanscrit, spoken by the old Brahmans, is the root of all these classes of tongues. It is more correct to consider it as the first branch, and assume the existence of a root not now accessible to direct investigation. As an illustration of the affinity among the Aryan tongues, take the common word *daughter*. It is in Sw. *dotter*; Dan. *datter*; Goth. *dohter*; O. H. Ger. *tohtar*; Goth. *daughtar*; Lith. *duktere*; Gr. *θύγάτρα* (*thugatēr*); Armenian *dastur*; Sansc. *dūhitri*; the last-named word signifying, primarily, "milkmaid," that being the function, in the early Brahman or Aryan household, which the daughter discharged. Not only are the roots of very many words alike throughout the several Aryan tongues, but (a more important fact) so also are the inflections. Thus the first person singular of a well-known verb is in Lat. do; Gr. *ἔδωκα* (*didōmi*); Lith. *duimi*; Old Slav. *domy*; *Zend dadāmi*; Sansc. *daddmi*; and the third person sing. present indicative of the substantive verb is in Eng. *is*, Goth. *ist*, Lat. *est*, Gr. *ἔστί* (*estī*), Sansc. *asti*.

"... there exists in India a sort of rivalry between the Aryan languages, or rather between the three principal ones—Hindi, Marathi, and Bengali—each considering itself superior to the others."—*Beames*; *Compar. Gram. Aryan Lang. of India*, vol. I. (1872); *Introduction*, p. 31.

**II. Ethnology:**

**1. Gen.**: Pertaining to the old race speaking the primal Aryan tongue [A.], or any of the numerous forms of speech which have sprung from it. The ancestors of most modern Europeans lived together as one people, speaking the primeval Aryan tongue, in Central Asia, and apparently near the Pamir steppe. Their separation took place at so remote a period that, while they seem to have known gold, silver, and copper, they were unacquainted with iron, the name of which is different in all the leading Aryan tongues. (*Max Müller*, *Science of Language*, vol. II., 1871, p. 255.)

**2. Spec.**: The Aryan race which invaded India at a period of remote antiquity, possibly 1700 B.C., and still remains the dominant Hindoo race there.

**B. As substantive:** The race or races described under A., II. (q.v.).

**\*a-ry'ght** (*gh* silent), adv. [ARIGHT.]

**\*ar'-y-ōle, s.** [Lat. *hariolus* = a soothsayer.] A soothsayer, a diviner.

"... for *arpyetes*, *nympyranses* brought them to the actors of their god."—*Troilus de Prop. Roman*, l. 126. (*Boucher*.)

**\*a-ry'se, v. i.** [ARISE.]  
"And made forward *arly* to *aryse*."  
*Chaucer*; *C. T.*, 22.

**\*a-ry'st'e, s.** [A.S. *ærest, ærist* = resurrection; *arisan* = to arise.] Resurrection.  
"As heo stode and spoken, and wæren æt wenyng.  
Of vrs lounder *aryste*, and fele oþer þyng."  
*The Passion of Our Lord* (ed. Morris), 595, 596.

**bōl, bōy, pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aš; expect, Xenophon, exist. ph = ʒ**  
**-cian, -tian = shān. -tion, -sion = shūn; -ñion, -ñion = zhūn. -tions, -sions, -cions = shūs. -ble, -dle, &c. = bēl, dēl.**

ar-ÿ-tê-nôid, † ar-ÿ-tæ-nôid, a. & s. [In Sp. arytena = the larynx; Lat. arytena or arutena; Gr. ἀρυταινα (arutaina) or ἀρυτήρ (arutēr) = ladle or cup; ἀρύω (arūō) = to draw water.] Ladle-shaped or cup-shaped.

A. As adjective:

Arytenoid cartilages: Two pyramidal bodies articulated by their bases with the oval articular substances which exist on the upper margin of the cricoid cartilage in the human larynx. (Todd & Bowman: Physiol. Anat., vol. ii, p. 434.)

Arytenoid muscle: Muscles which pass from one of the arytenoid cartilages to the other. (Ibid.)

B. As substantive:

Plural. Arytenoids: The cartilages described above.

"The mobility of the articulation of the arytenoids with the cricoid, and their connexion with the vocal ligaments, give them great importance in the mechanism of the larynx."—Todd & Bowman: Physiol. Anat.

As, °, ase, adv., conj., & pref. [A contraction for Eng. also As in A.S. is calwa, alswa; Dut. & Ger. als; M. H. Ger. also; O. H. Ger. also, from al = all, and so = so.] [Also.]

A. As an adverb of comparison. (Bain: Higher Eng. Gram.)

I. Denoting comparison resulting in the discovery of likeness.

1. Like, similar to, resembling.

"And the Lord God said, Behold, the man is become as one of us."—Gen. iii. 22.

2. In the same manner as; like that or those which.

"As we hit findeth Iwriten in the godspelle."

Deoth, xxiii. [ed. Morris], 15, 16.

"The Lord seeth not as man seeth; for man looketh on the outward appearance, but the Lord looketh on the heart."—1 Sam. xvi. 7.

¶ In some cases, especially when the comparison is presented at length, as is either followed or preceded by so. (See also B., II. 2.)

"As your fathers did, so do ye."—Acts vii. 51.

"And he said, So is the kingdom of God, as if a man should cast seed into the ground."—Mark iv. 26.

¶ To render the so more emphatic, even is sometimes placed before it.

"For as in Adam all die, even so in Christ shall all be made alive."—1 Cor. xv. 22.

¶ When so is not present it is understood.

"As in my speculations, I have endeavored to distinguish passion and prejudice; I am still desirous of doing some good in this particular."—Spectator.

¶ Such is occasionally employed as the word in relation to as.

"... such an one as Paul the aged."—Philemon a.

3. With.

"... upon the like devotion as yourselves."—Shakspeare: Richard III., lv. 1.

4. Than. (Scottch.)

"Better be dead as out of the fashion."—Fergusson: E. Fero. (Jamsieson.)

II. Denoting proportion; in the same degree with, equally with, as much as.

"Thou good old man, benevolent as wine."—Pope: Homer's Odyssey.

"Before the place a hundred doors a hundred entries grace: As many voices issue, and the sound Of Sybil's words as many thunders rebound."—Dryden.

¶ In this sense it is generally succeeded after an interval by another as, with which it stands in relation.

"... his personal qualities were as amiable as his poetical."—Pope: Letter to Wycherley (1704).

III. Redundant; but this use of the word is vulgar. [See As how.]

B. As a subordinating conjunction of reason and cause. (Bain: Higher Eng. Gram.)

I. (Implying time): While, whilst.

"... it whilsted as it flew."—Dryden.

II. (Implying reason):

1. (Denoting a cause): Since, because, because of, being.

"... as thou art a prince, I fear thee."—Shakspeare: 1 Henry IV., iii. 2.

2. (Denoting a consequence): That.

"The relations are so uncertain, as they require a great deal of examination."—Bacon.

C. As an intensifying prefix: Frequently used in Mid. Eng., as aswyrthe, asyke, &c.

D. In special phrases, with varying signification, according to the words with which it is combined.

1. As far as: To the extent.

"... as far as I can see."—Darwin: Descent of Man, vol. i., pt. II., ch. xi.

"Every offence committed in the state of nature, may in the state of nature be also punished, and as far forth as it may in a commonwealth."—Locke.

"... as for as can now be ascertained."—Macauley: Hist. Eng., ch. xx.

2. As for: As far as relates to, with regard to, with respect to.

"As for such as turn aside unto their crooked ways."—Ps. cxxv. 5.

3. As how: How, the word as being considered redundant. (Vulgar.)

"As how, dear Syphax?"—Addison: Cato.

4. As if: Like what it would be if.

"As in the case of the ether, beyond the 'as if' you cannot go."—Tyndall: Frag. of Science, 3rd ed., vii. 133.

¶ In poetry, when the necessities of the metre require it, the if is occasionally omitted.

"He lies as he his limbs did know."—Waller.

"... as they would dance."—Milton: P. L., bk. vi.

5. As it were: Like, resembling.

"... and heard, as it were the noise of thunder, one of the four beasts saying, Come and see."—Rev. vi. 1.

6. As long as: Noting (a) extent of space.

"He draws a bonny silken purse, As lang's my tail."—Burns: The Two Dogs.

Or (b) Duration of time.

"Because he hath inclined his ear unto me, therefore will I call upon him as long as I live."—Ps. cxvi. 2.

7. As soon as: Whenever.

"... as soon as I am gone out of the city."—Ezek. ix. 20.

8. As though: As if.

"... under colour as though they would have cast another out of the fellowship."—Acts xxvii. 30.

9. As to: With respect to, concerning.

"I pray thee, speak to me, as to thy thinking. As thou dost remember, and give thy worst of thoughts."—Shakspeare: Othello, iii. 3.

10. As well as: Equally with, no less than.

"But I have understanding as well as you; I am not inferior to you."—Job xii. 8.

¶ Sometimes the words as well are separated from the as.

"... as well the stranger as he that is born in the land."—Lev. xxiv. 14.

II. As yet: Up to this time.

"Though that war continued nine years, and this hath as yet lasted but six; yet there hath been much more action in the present war."—Addison.

\* As, 2nd & 3rd pres. sing. pres. indic. of verb. [HAVE, HAS.] Hast, has.

"And qui as the min godes stolen?"—Story of Gen. and Ezek. [ed. Morris], 1, 780.

\* As (1), s. [ASH (1)]

As (2), s. [In Ger. as; from Lat. as, genit. assis, whence are the Eng., Fr., & Sp. ace, and the Port. az.]

Among the Romans: A weight, coin, or measure.

I. As a weight of twelve ounces, the same as a libra or pound, and divided into twelve parts called uncie or ounces. These were: Uncia = 1 oz.; sextans (½) = 2 oz.; quadrans (¼) = 3 oz.; quinarius = 5 oz.; semis (½) = 6 oz.; septunx = 7 oz.; bes = 8 oz.; dodrans = 9 oz.; dextans, or decunx = 10 oz.; denx = 11 oz.

II. As a coin, which, in the time of Tullus Hostilius, is said to have weighed twelve ounces. After the first Punic war had exhausted the treasury, it was reduced to two ounces. The second Punic war brought it to one ounce; and, finally, the Papiian law fixed it, at half an ounce only. At first it was stamped with a sheep, an ox, a ram, or a sow, but under the empire it had on one side a two-faced Janus, and on the other the rostrum or prow of a ship.

"... three minus or, 300 asses for each prisoner."—Arnold: Hist. Rome, ch. xlv.

III. As a measure:

1. (Square) An acre.

2. (Linear) A foot.

¶ As in Latin has other significations, among which may be noted (in Law) a portion divided among heirs. [ACE.]

As. The contraction and symbol for Arsenic. Atomic weight, 75; density of vapour, 150; hydrogen being taken as 1.

A.S. [Contraction for Lat. Artium soror = Sister of Arts.] An American degree conferred upon women. (Times, Dec. 31, 1873.)

As-a, s. [Mod. Lat. asa; corrupted from Class. Lat. laser, genit. laseris = (1) the juice of the plant Laserpitium assafetida, (2) the plant itself. In Pers. asa is = mastic; and in Arab.

asā is = healing, isā = a remedy.] The name of a gum.

asa dulcis. [Lit. = sweet asa, as opposed to asa fetida = fetid asa.] Beuzoisia (q. v.).

asa fetida. [ASAFETIDIA.]

As-a-fet-i-da, As-a-fet-i-da, As-sa-fet-i-da, As-a-fet-i-da (œ = ò), s. [In Ger. assafetida; Sp. asa fetida. From Mod. Lat. asa (q. v.), and Classical Lat. fetida = fetid, having a bad smell.]

J. The English name of two, if not more, plants growing in Persia, the Ferula assafetida

ASAFETIDA. (BRANCH, FLOWER, AND SEED.)

and the F. Persea. They belong to the order Apiceae, or Umbelliferae.

2. The drug made from them. Old plants being cut across, juice exudes from the wound. This, being scraped off, is exposed to the sun to harden it, and is sent in large irregular masses to this country for sale. It is a useful medicine in hysteria, asthma, tympanites, dyspepsia, pertussis, and worms; it is sometimes given also as a clyster.

\* a-sā-lic, v. i. [ASSAIL.]

As-a-phēs, s. [Gr. ἀσάφης (asaphēs) = dim, indistinct; ἄ, priv., and σάφης (saphēs) = clear, distinct.] A genus of Ichneumonids, of which the best known species, A. vulgaris, deposits its eggs in aphides, on which the larva, when hatched, prey.

As-ar-a-bac-ca, s. [Lat. asarum (q. v.), and bacca = a berry.]

Bot.: The English name of the Asarum Europæum. It is a plant with binate reniform leaves and solitary flowers, containing twelve stamina, a six-lobed stigma, and a six-celled many-seeded fruit. It is naturalised in a few woods in the North of England and in Scotland. The leaves are emetic, cathartic, and diuretic. Used as snuff, they produce a copious discharge from the nostrils.

As-ar-ōne, s. [From Lat. asarum (q. v.).] Camphor of asarum.

Chem.: A crystallised substance obtained from the Asarum Europæum.

As-ar-ūm, s. [To Fr. asaret; Sp., Port., & Ital. asaro; Lat. asarum; Gr. ἀσάρον (asarōn); from ἄ, priv., and σείρα (seira) = a cord, string, or band. The plant was so called because it was rejected from the garlands of flowers made up by the ancients.] A genus of plants belonging to the order Aristolochaceae, or Birthworts. It contains a species naturalised in Britain, the Asarum Europæum, or Asarabacca (q. v.).

\* a-sā-ye, \* a-sā-y, v. t. [ASSAY, v., ESSAY, v.]

\* a-sā-yic, \* a-sā-y-ly, v. t. [ASSAIL.]

\* a-sā-yled, pa. par. [ASAYLE.]

As-bé-fér-rite, s. [Eng., &c., asbestos; ferrite. From Lat. ferrum = iron, and Eng. suff. -ite.] A mineral, a variety of Amphibole. It is of a grayish-white or ashy-gray colour. Dana classes Asbesterrite with Danemorite under the head "Iron-Manganese Amphibole."

As-bés-tic, a. [Eng., &c., asbest(=as); ic.] Pertaining to asbestoa; made of asbestos.

âte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hêrc, camêl, hêr, thêre; pine, pît, sîre, sîr, marine; gô, pôt, or, wêre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, unîte, cûr, rûle, fûll; trÿ, Sÿrian. œ, œ = ô; œ = ë. qu = kw.

as-bés-ti-form, a. [Lat. asbestos, and forma = form.] Of the form which asbestos generally assumes; fibrous.

"Asbestiform, or lamellar-fibrous . . ."—Dana: Min., 5th ed., p. 284.

as-bés-tine, a. [In Sp. asbestino; Gr. ἀσβεστικός (asbestinos) = made of asbestos. Applied especially to the cloth made from it.] 1. Made of asbestos. 2. Like asbestos; incombustible. (Johnson.)

as-bés-toid, a. & s. [Gr. ἀσβεστός (asbestos), and εἶδος (eidos) = form.] 1. As adjective: Of the form of asbestos; fibrous. 2. As substantive: A mineral resembling asbestos in form. It is called also Byasolite (q.v.).

as-bés-tós, as-bés-tús, \*as-bés-tón, †as-bést, s. [In Gr. & Fr. asbeste; Sp. & Port. asbesto; Lat. asbestos; Gr. ἀσβεστός (asbestos), as a. (see def.); as adj. = unquenched, unquenchable; á, priv., and σβεστός (sbestos) = quenched; from σβένω (sbeno) = first fut. of σβέννυμι (sbennumi) = to quench.]

\* I. Among the ancients:

1. Quicquid.

" . . . quicquid, which is named (says Procopius, I. II., c. 27) τίταρος (titanos) by the ancients; by the moderns ἀσβεστός (asbestos)."—Gibbon: Decl. & Fall. Note under ch. xli.

¶ By moderns, of course, Procopius means the men of his own time, viz., the sixth century A.D.

2. The mineral described under II. 1.

II. Now (Mineralogy):

1. A variety of Hornblende, which itself is classed by Dana as a synonym or subdivision of Amphibole. He says that the several varieties of Amphibole, and notably Tremolite and Actinolite, when they have little alumina in their composition, tend to become fibrous, in which case they are called Asbestos. Haily regarded the fibres as rhomboidal prisms. As the etymology imports, asbestos is exceedingly infusible, at least in a mass. It contains a considerable percentage of magnesia in its composition. It occurs in many localities in Britain and elsewhere, mostly in serpentine districts. The varieties are—

(a) Amianthus, in which the fibres are so exceedingly long, flexible, and elastic, that they may be woven into cloth. [AMIANTHOS.]

(b) Common Asbestos, with the fibres much less flexible. It is heavier than the first variety. It is dull green, sometimes pearly in lustre, and unctuous to the touch.

(c) Mountain Cork, light enough to float on water.

(d) Mountain Leather, also very light, but thinner and more flexible than the last.

(e) Mountain Paper, a designation formerly given to fine thin specimens of Mountain Leather.

(f) Mountain Wood, which, in the external aspect, resembles dry wood.

2. The fibrous varieties of Pyroceene. It is difficult to distinguish these from the former.

¶ Blue Asbestos: [CROCIDOLITE.]

asbeston-stone, s. [ASBESTOS.]

as-ból-án, s. [ASBOLITE.]

as-ból-ino, s. [Gr. ἀσβολός (asbolos), ἀσβόλιη (asbolíē) = soot.]

Chem.: A yellow, oily substance, very acrid and bitter, obtained from soot.

as-ból-ite, as-ból-án, s. [Gr. ἀσβολαίω (asbolaiō) = to cover with soot; ἀσβολός (asbolos), ἀσβόλιη (asbolíē) = soot.] A mineral, called also Earthy Cobalt. Dana makes it a variety of Wad (q.v.), and considers it to be that mineral combined with oxide of cobalt.

as-cál-a-phús, s. [Gr. ἀσκάλαφος (askalaphos).] A word in Aristotle, apparently meaning a kind of owl.

Entom.: A genus of Neuropterous insects belonging to the family Myrmeleontidae, or Aolelions. They differ from the Myrmeleon proper in having much longer antennae and shorter bodies, whilst their larvae do not construct a pitfall. None are British.

as-cár-í-dæ, a. pl. [ASCARIS.]

Zool.: A family of intestinal worms belong-

ing to the class Intestina Entozoa of Rudolphi, Cuvier, &c., the class Entozoa of Owen and others, and the doubtful class Scoleocia, group or sub-class Nematolidea (Thread-worms). They constitute the highest type of intestinal worms. [ASCARIS.]

ás-car-is, s. [Gr. ἀσκαρίς (askaris), from ἀσκαρίω (askaríō), or σκαρίω (skaríō) = to leap, to throb, to palpitate.]

Zool.: A genus of intestinal worms, the typical one of the family Ascariidae. A lumbricoides, or Round Worm, is the commonest intestinal parasite of the human species, generally occupying the small intestines; it is found also in the hog and ox. In the human species it is much more common in children than in adults, and is extremely rare in aged persons. It reaches seven inches in length. A second species, the Ascaris or Oxyurus vermicularis, is one of the most troublesome parasites of children, and occasionally of adults. It infests the larger intestines, especially the rectum. The male is two or three lines long, and the female five. (Owen: Compar. Anatomy of the Invertebrate Animals, 1843, pp. 66, 67, &c.)

\* as-cá-unço, \* as-cá-uns, adv. [ASKANCE.]

\* as-cá-unt, adv. [ASKANT.]

as-gél-li, s. pl. [Latinised dimin. from Gr. ἀσκό (askō), pl. of ἀσκός (askos) = a bottle.]

Bot.: The same as ASCI (q.v.).

\* as-cen-ci-oun, s. [ASCENSION.]

as-cénd, \* as-sénd, v. i. & t. [In Sp. ascender; Ital. ascendere; Lat. ascendere; from ad = to, and scandere = to climb.]

A. Intransitive:

I. Ordinary Language:

1. Lit.: To move from a lower to a higher place. It is opposed to descend (q.v.).

(a) Of animated beings: To climb up, or even without actual climbing to move from a lower to a higher elevation.

" . . . and ascendit to hevyne."—The Craft of Deyng (ed. Lumby), 287.

" . . . beheld the angels of God ascending and descending upon it [the ladder]."—Gen. xxviii. 12.

¶ It is often followed by up.

"And no man hath ascended up to heaven, . . ."—John iii. 13.

(b) Of things: To go up, as smoke or vapour does by the operation of the law of gravity, or as any material substance goes up without actual climbing.

" . . . the curling smoke ascends."

Wordsworth: Excursion, bk. v.

"The piston either ascended or descended."—Smith: Wealth of Nations, bk. I, ch. 1.

2. Figuratively:

(a) To proceed from recent to remote times, or trace back a course of development.

" . . . they boast

Their noble birth, conduct us to the tombs Of their forefathers, and, from age to age Ascending, triumph their illustrious race."—Cooper: Transit. of Great Verses on Pedigree.

(b) To mount up from what is materially feeble to what is materially strong, or from what is morally or intellectually low to that which is in these respects higher.

"As when the winds, ascending by degrees,

First move the whitening surface of the seas."—Pope: Homer's Iliad, bk. iv. 478-9.

(c) To proceed from particulars to a more or less wide generalisation, or from trifling matters to matters of greater moment.

"By these steps we shall ascend to more just ideas of the glory of Jesus Christ, who is intimately united to God, and is one with Him."—Watts: Impr. of Mind.

II. Technically:

1. Astron.: To rise higher above the horizon, and proceed more or less directly towards the zenith.

2. Music: To pass from a lower to a higher note.

B. Trans.: To climb or move into, on, or upon, from a lower place.

"Ascend thy car,

And save a life, the bulwark of our war."—Pope: Homer's Iliad, bk. v. 504.

" . . . their galleys ascended the river."—Gibbon: Decl. and Fall, ch. xlii.

as-cénd-a-ble, a. [Eng. ascend; -able.] Able to be ascended. (Johnson.)

as-cénd-an-çý, s. [ASCENDENCY.]

as-cénd-ant, a. & s. [ASCENDENT.]

as-cénd-éd, \* as-cénd-id, pa. par. & a.

[ASCEND.]

Brutus goes into the Rostrum.

"O! The noble Brutus is ascended!" Silence!

Shakspeare: Julius Cæsar, III. 2.

"For when degrees Lytane were ascended,"

Chaucer: C. T., 16, 343.

as-cénd-en-çý, as-cénd-an-çý, s. [In Fr. ascendence; Sp. ascendencia; = ancestry; Port. ascendencia; Ital. ascendenza; from Lat. ascendens = ascending.] [ASCENDENT.] Controlling influence; governing power.

"Barrington, however, admits that superiority in song birds to birds in an amazing ascendancy over others, as is well known to bird-catchers."—Darwin: Descent of Man, pt. ii, ch. xiii.

"The ascendancy of the ascertorial order was long the ascendancy which naturally and properly belongs to intellectual superiority."—Macaulay: Hist. Eng., ch. 1.

as-cénd-ent, as-cénd-ant, a. & s. [In Fr. ascendant; Sp. ascendient; Port. and Ital. ascendente; from Lat. ascendens, pr. par. of ascendo = to ascend.] [ASCEND.]

A. As adjective: (Formerly ascendant, now ascendent.)

I. Ordinary Language:

1. Lit.: Moving upwards.

2. Fig.: Dominant, predominating, ruling.

" . . . the ascendancy community obtained a surplus of wealth."—J. S. Mill: Polit. Econ., Fratrim. Rem., p. 19.

II. Technically:

1. Astrol.: Above the horizon.

"Let him study the constellation of Pegasus, which is about that time ascendant."—Brounne: Vulgar Errores.

2. Bot.: Ascending. (Applied to a procumbent stem which rises gradually from its base to ovules attached a little above the base of the ovary, and to hairs directed to the upper part of their support.)

B. As substantive:

I. Ordinary Language:

1. Lit.: Ascent, slope, acclivity.

" . . . the ascendancy of the byll called Blacketh

Hyll."—Hall: Henry VIII., an. 31.

2. Figuratively:

(a) Height, elevation; point of elevation.

"He was initiated in order to gain instruction in sciences, that were there in their highest ascendancy."—Temple.

(b) Superiority of any kind, as in power, wealth, influence, intellect, or morality.

"The friends of the English alliance were now recovering the ascendancy."—Froude: Hist. Eng., vol. iv., 37.

"By the ascendancy he had in his understanding, and the dexterity of his nature, he could persuade him very much."—Clarendon.

(c) An ancestor. (Opposed to descendant.)

"The most nefarious kind of bastards are incestuous bastards, which are begotten between ascendants and descendants, in fratrimus, and between collateral, as far as the divine prohibition."—Ayliffe: Parergon.

II. Technically:

Astrol.: The degree of the ecliptic which is rising in the eastern part of his horizon at the moment of a person's birth. This, when ascertained, was supposed to indicate his tastes or proclivities, and enable his horoscope to be drawn out. In the celestial theme, other names are given to the ascendant; viz., the first house, the angle of the east, an orientals angle, and the house of life.

"Wel cowde he fortune the ascendant

Of his yunges for his patient."—Chaucer: C. T., 410-20.

" . . . his signe, his house, his ascendancy."—Gower: Conf. Amant., bk. vi.

¶ In the ascendancy: Dominant, predominant.

"The French occupation of Rome led the way to the reaction, and by the end of 1849 absolutism was in the ascendancy."—Times, Feb. 8, 1878.

¶ Lord of the Ascendant:

1. Lit. (Astrol.): The planet or other heavenly body which rules in the ascendant or first house when the latter is just rising above the horizon.

" . . . Mercury being lord of the ascendancy."—Quotation from Pen. Cyc., II, 57.

"Mercury, lord of the ascendancy, being in Gemini

. . ."—Ibid.

2. Fig.: One who possesses commanding power or influence.

\* as-cénd-id, pa. par. [ASCENDED.]

as-cénd-ing, pr. par. & a. [ASCENDING.]

A. Ordinary Language:

As present participle and adj.: In senses corresponding to those of the verb.

"Dark o'er the fields th' ascending vapour flies."

Pope: Homer's Iliad, bk. xvi. 436.

ból, bóy; pout, jówl; cat, fell, chorus, çhin, bench; go, çom; thin, çhis; sin, aý; expect, Xenophon, exist. -ing. -tian, -tian = çhan. -tion, -sion, -cioun = çhün; -çion, -çion = çhün. -tious, -sious = çhüs. -ble, -dle, &c. = bçl, dçl.

**B. Technically:**

**I. Astronomy:**

1. The ascending node of the moon is that in which the moon passes from the southern to the northern side of the ecliptic. It is opposed to the descending node. [DESCENDING.] (Herschel: *Astron.*, § 406.) The meaning is the same in the case of a planet (§ 498).

2. The ascending signs of the zodiac are those through which the sun passes whilst he is approaching his greatest northern declination, the one which to us is many degrees above the horizon. They are Capricornus, Aquarius, Pisces, Aries, Taurus, and Gemini. The other six are called descending signs.

3. Ascending latitude: The increasing latitude of the moon or a planet.

**II. Anal.:** Directed upwards.

"... has powerfully ascending rami."—Owen: *Classif. of the Mammalia*, p. 67.

Ascending vessels: Those which carry the blood upwards, that is, from the lower to the higher parts of the body.

**III. Bot.:** Sloping upwards. (Lindley.)

1. An ascending embryo is one the apex of which is pointed towards the apex of the fruct. (Lindley.)

2. An ascending ovule is one which grows from a little above the base of the ovary. (Ibid.)

**IV. Genealogy:** Noting ancestors in a direct line backwards, excluding collaterals.

"The only locus was in the ascending (not collateral) branch; as, when parents and children married, this was accounted incest."—Broom: *Notes on the Oligines*.

**as-cen-sion, \*as-cen-ci-oun, \*as-sen-ti-oun, s.** [In Fr. & Sp. *ascension*; Port. *ascensao*; Ital. *ascensione*; Lat. *ascensio*, from *ascensus*, sup. of *ascendo*.] [ASCEND.]

**A. Ordinary Language:**

I. The act of ascending (*lit.* or *fig.*).

1. In a general sense:

"By nature he knew eche ascension."—*Chaucer*: *C. T.*, 14,861.

"No eek oure spiritis ascension."—*Ibid.*, 12,708.

2. Spec.: It is applied to the ascent of our Saviour from the earth, in view of his disciples, some time after his resurrection.

"The traditional scene of the Ascension is one of the four summits of the Mount of Olives."—Cook: *Holy Bible with Comment.*, vol. 1. (1873), p. 471.

† II. That which ascends.

"Med era in the theory of inspiration, conceiving the brain doth only suffer from vaporous ascensions from the stomach."—Brewer: *Vulgar Errors*.

III. The distance by which anything ascends. [B. Astron.]

**B. Technically:**

**Astron.** Right ascension: The distance of a heavenly body from the first point of Aries, measured upon the equator. (*Hind.*) The arc of the equinoctial included between a certain point in that circle, called the *Vernal Equinox*, and the point in the same circle to which it is referred by the circle of declination passing through it. Or the angle included between two hour-circles, one of which, called the *equinoctial colure*, passes through the vernal equinox, and the other through the body. (Herschel: *Astron.*, §§ 108, 293.) It is opposed to *oblique ascension* (q. v.).

† The terms *right ascension* and *declination* are now generally used to point out the position in the heavens of any celestial object, in preference to the old method of indicating certain prominent stars by proper names or by Greek letters. By means of the transit instrument, or by an equatorially-mounted telescope, a star or planet may be readily found, when once its *right ascension* and *declination* are known. [EQUATORIAL TELESCOPE, TRANSIT INSTRUMENT.]

† *Oblique ascension*: The arc of the equator intercepted between the first point of Aries and the point of the equator which rises with a star or other heavenly body, reckoned according to the order of the signs.

**Ascension-day, s.** The day on which our Saviour's ascension is commemorated—the Thursday but one before Whitsuntide, sometimes called Holy Thursday. It is one of the six leading festivals for which services are assigned in the Liturgy.

"This, on Ascension-day, each year."—*Spect.*: *Marrion*, 11, 13.

**as-cen-sion-al, a.** [Eng. *ascension*; -al. In Fr. *ascensionnel*; Sp. *ascensional*.] Pertaining or relating to ascension.

**Ascensional difference:** The difference between the right and oblique ascensions. (*Glossog. Nova, Hind, &c.*)

**as-cen-sive, a.** [Lat. *ascens(us)*, pa. par. of *ascendo*, and Eng. suffix -ive.] Ascending, on an ascending plan.

"... the gradations of the Mammalian structure, of which we have to now complete the ascensive survey."—Owen: *Classif. of the Mammalia*, p. 51.

**as-cen-t, s.** [In Sp. and Port. *ascenso*; Ital. *ascendenza* and *ascosa*. Lat. *ascensus* (s.), from *ascensus*, pa. par. of *ascendo*.]

I. The act or process of ascending or moving from a lower to a higher place.

1. Literally:

(a) Of persons:

"The ascent had been long and toilsome."—Macaulay: *Hist. Eng.*, ch. xiii.

(b) Of things:

"... the ascent of soap bubbles."—Darwin: *Voyage round the World*, ch. viii.

2. Fig.: Progress upwards.

"In regard to animal life, and its assigned work on this planet, there has therefore plainly been an ascent and progress in the main."—Owen: *Classif. of the Mammalia*, p. 60.

"... steep and hard of ascent."—Jotland: *Livy*, p. 995.

II. That which is ascended.

1. Literally:

(a) That by which ascent is made—a flight of steps, an inclined plane artificially formed, or the natural acclivity of a hill.

"... and his ascent by which he went up into the house of the Lord."—2 Chron. ix. 4.

(b) The eminence ascended; or generally an eminence, a hill.

"A wide flat cannot be pleasant in the Elysian fields, unless it be diversified with depressed valleys and swelling ascents."—Bentley.

(c) The slope or angle of the eminence ascended.

2. Fig.: Gradation, series, order.

"Large store of gleaming crimson-spotted tints, Ranged side by side, in regular ascent, One after one, still lessening by degrees, Up to the dwarf that tops the pinnacle."—Wordsworth: *Excursion*, bk. viii.

**\*as-cen-ti-oun.** [ASCENSION.]

**as-cer-tain, \*as-cer-taine, \*a-cer-tain, v.t.** [O. Fr. *ascertainer*, *ascertainer*, *ascertener*, *ascerteneir*, *ascertier*; Sp. *ascertar*, from Fr., O. Fr., & *certain*.] [CERTAIN.]

I. Of persons: To render a person certain of anything, or at least inspire him with confidence respecting it.

"Mer. Bot how shall I be ascertained that I also should be entertained?"—Bungay: *P. F.*, pt. II.

II. Of things:

\* 1. "To assert for certain, to assure." (*Glossog. Nova.*)

2. To render a thing certain which before was doubtful.

\* (a) By making that fixed which before was fluctuating, or at least liable to change.

"For ought of them is yours, but th' onely vantage Of a small time, which none ascertain may."—Spenser: *Daphnida*.

"... the mildness and precision of their laws ascertained the rule and measure of taxation."—Gibbon.

\* (b) By arranging matters previously. To insure.

"The ministry, in order to ascertain a majority in the House of Lords, persuaded the Queen to create twelve new Peers."—Smollett.

† 3. By divine revelation, or at least by credible testimony regarding anything.

"The divine law both ascertaineth the truth, and supplieth unto us the want of other laws."—Hooker.

"Money differs from uncoined silver in this, that the quantity of silver in each piece is ascertained by the stamp."—Locke.

4. By instituting an inquiry, investigation, examination, or experiment. (This is now the almost exclusive use of the word.)

"The extent to which parliamentary support was bartered for money cannot be with any precision ascertained."—Macaulay: *Hist. Eng.*, ch. xv.

"Their periods may, therefore, be regarded as ascertained with the utmost exactness."—Sir J. Herschel: *Astron.*, § 468.

† *Ascertain* may be followed by a substantive [examples under No. II. 1, 2, 3 and 4], by *that* [example under No. I.], or by *whether*.

"... but he was there only for the purpose of ascertaining whether a descent on England was practicable."—Macaulay: *Hist. Eng.*, ch. xiii.

**as-cer-tain-able, a.** [Eng. *ascertain*; -able.] Capable of being ascertained.

"... if truth in Irish matters was ascertainable at all."—Froude: *Hist. Eng.*, vol. IV, p. 78.

**as-cer-tain-ed, pa. par. & a.** [ASCERTAIN.]

"... compared first with the amount of ascertained difference."—J. S. Mill: *Logic*, 2nd ed. (1846), vol. II, p. 104.

**as-cer-tain-er, s.** [Eng. *ascertain*; suff. -er.] One who ascertains anything; one who establishes anything beyond the possibility of reasonable doubt.

**as-cer-tain-ing, pr. par.** [ASCERTAIN.]

**as-cer-tain-ment, s.** [Eng. *ascertain*; -ment.] The act of ascertaining; the state of being ascertained.

"... the positive ascertainment of its limits."—Burke: *French Revolution*.

\* **as-cēs-san-ōy, s.** Old form of ACESCENTY.

\* **as-cēs-sant, a.** [ACESCENT.]

**as-cēt-yo, \*as-cēt-ick, a. & s.** [In Ger. *ascetisch* (adj.), *ascet* (substan.); Fr. *ascétique*; Sp., Port., & Ital. *ascetico*; Gr. ἀσκητικός (*askhētikos*) = industrious, belonging to an athlete; ἀσκητής (*askhētēs*) = (1) one who practises any art or trade, (2) a hermit; ἀσκήσις (*askhēsis*) = (1) exercise, training, (2) a profession; ἀσκήσις (*askhēsis*) = (1) to form by art, (2) to practise, to exercise.]

**A. As adjective:**

1. Retired from the world, and engaged in devotions and mortifications.

"... he entered into such an ascetic course as had well nigh put an end to his life."—*Life of Bishop Burnet*, ch. 13.

2. Severe, harsh, rigid, precise.

**B. As substantive:**

I. Ordinary Language:

1. Spec.: One who retires from active and adopts a contemplative life spent in devotion, in mortification of the body, &c.; a hermit, a recluse.

"I am far from commending those ascetics, that, out of a pretence of keeping themselves unspotted from the world, take up their quarters in desert."—Norris.

2. Gen.: One who, whether he retires from active life or not, adopts habits of self-mortification.

II. Church History: A class of persons who, aspiring after higher attainments in holiness than other Christians, thought they would best attain their object by self-mortification. They therefore abstained from wine, flesh, matrimony, and worldly business; and moreover emaciated their bodies by long vigils, fasting, toil, and hunger. Both men and women embraced this austere mode of life. During the second century of the Christian era, when they first attracted notice, they lived by themselves and dressed differently from others, but did not altogether withdraw from the society and converse of ordinary men. During the course of the third century they gradually withdrew to the Egyptian desert, and early in the fourth (about A.D. 305) were associated by Anthony into monastic communities. [ANCHORITE, MONASTICISM.]

"The Ascetics who obeyed and abused the rigid precepts of the Gospel."—Gibbon: *Decl. & Fall*, ch. xxxvii.

**as-cēt-i-cism, s.** [Eng. *ascetic*; -ism. In Fr. *ascétisme*.] The mode of life of an ascetic; mortification of the body.

"There are two classes of men of very different complexions, by whom the principle of asceticism appears to have been embraced; the one a set of moralists, the other a set of religionists."—Bowring: *Jeremy Bentham's Works*, vol. 1, p. 4.

**as-cēt-ī-ōs, s.** [ASCETIC.] A treatise on the subject of asceticism, or giving rules to be observed by ascetics.

\* **as-chā-me, v.t.** [ASHAME.]

\* **as-chā-med, a.** [ASHAMED.]

\* **as-chare, adv.** [A.S. on *cyrrre* = in the act of turning; *ceran* = to turn.] Aside.

"Euer after the dogges wer so starke, That thode aschare when the schuld bark."—*Hunting of the Hare*, 106. (Boucher.)

\* **asche, s.** [ASH (1).]

\* **asche, s.** [ASH (2).]

\* **as-chē-pōn, pret. of v.** [A.S. *gesecepan* = formed, created.] [SHAPE.] Shaped, formed, devised.

"Watz nener so hlystful a bour as watz ebes theene ! No so schredde bou so schefu as a-chēpan there."—*Ear. Eng. Alliter. Poems* (ed. Morris), *Clowness*, 1,075-6.

\* **asch-ēt, s.** [ASSET.] (Scotch.)

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sire, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unīte, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē. ey = ā. qu = kw.

aschewele, v.t. [SHEWEL.] To scare away. "Thar ich aschewele die and growe." The Hule & the Nyingtate (1800). [Baucher.]

as-ci, s. pl. [Latinised form of askoi (askoi), pl. of askos (askos) = a leathern bottle.]

- 1. Tubes in which the sporules of Mchens are contained whilst in the nucleus. (Lindley.)
2. Tubes in which the sporidia of fungi are placed. They are called also ascelli or thecae.

As-ci-an (pl. As-ci-ans), s. [Lat. Ascii; Gr. Askoi (Askoi), pl. of askos (askos) = without shadow: a, priv., and skia (skia) = a shadow.]

Plural: Those who at midday of one or two days of the year are destitute of a shadow. Those living in the tropics of Cancer and Capricorn are so at midday once a year, and those living between those circles are so twice a year.

as-cid-i-a, † as-cid-i-æ (Mod. Lat.), as-cid-i-ans (Eng.), s. pl. [ASCIDIUM.]

Zool.: The first order of the Tunicated Class of Mollusca. It contains four families: the Ascidiæ, or Simple Ascidiæ; the Clavelliidæ, or Social Ascidiæ; the Botryllidæ, or Compound Ascidiæ; and the Pyrosomidæ, an aberrant family tending to the order Biphora. [ASCIDIIDA.]

as-ci-di-a-g-æ, s. pl. [ASCIDIUM.] Simple Ascidiæ. The typical family of the Ascidian order of Tunicated Mollusca. Professor Garrod considers them to be degenerate Vertebrata, which should be placed quite at the end of that sub-kingdom, under Amphioxus. The animals are simple and fixed; they are solitary or gregarious, with their branchial sac simple or disposed in 8-18 deep and regular folds. Their external integument is provided with two apertures, making them look like double-necked jars. When touched they squirt a stream of water to some distance. They look like shapeless cartilaginous masses. Some are highly coloured. In Brazil, China, and the Mediterranean they are eaten as food.

as-cid-i-form, a. [Mod. Lat. ascidi(um), and Lat. forma = shape.] Bottle-shaped, like the leaves of Sarracenia and Nepenthes.

as-cid-i-ō-da, s. pl. [Mod. Lat. ascidi(um), and Gr. eidos (eidos) = appearance.] Professor Huxley's name for the class called by some others Ascida or Ascidiæ. He classes it under his great division Molluscoïda.

as-cid-i-ūm (pl. as-cid-i-ā), s. [Gr. aski-dion (askidion), dimin. of askos (askos) = a leathern bottle of goatskin or similar material.]

1. Zool.: The typical genus of the Tunicated Mollusca, belonging to the family Ascidiæ and the order Ascida. The species vary in length from an inch to five or six inches. Nineteen occur in Britain. Example, the Sea-squirt (A. hyalinum). The Ascidian genus,

ASCIDIUM (SEA SQUIRT). A. Ascidium mentula. B. Ascidia echinatum.

family, and order have recently acquired greatly-increased interest from the fact that Darwin has taken this part of the animal kingdom as his point of departure in tracing the process of development which he believes to have ultimately resulted in the production of man.

2. Botany: The pitcher in such plants as Sarracenia and Nepenthes. (Lindley.)

as-ci-g'er-ous, a. [(1) Gr. askoi (askoi), pl. of askos (askos); (2) Lat. gero = to wear, to carry about.] Having ascl. (Loudon: Cyclop. of Plants; Gloss.)

As-ci-tæ (Lat.), As-ci-tang (Eng.), s. [From Gr. askos (askos) = a leathern bottle.]

Ch. Hist.: A sect of Montanists who arose in the second century. Their name was de-

signed to express the fact that some Bacchanals of their party believed the passage in Matt. ix. 17, which speaks of pouring new wine into new bottles, required them to blow up a skin or bag, and dance around it when inflated, which accordingly they did with unsatisfactory vigour, as an act of solemn worship.

as-ci-tæg, s. [In Fr. ascite; Port. & Lat. ascites; Gr. askites (askites); from askos (askos) = a leathern bottle.]

Med.: Effusion of fluid of any kind into the abdomen; specially effusion of fluid within the cavity of the peritoneum, as distinguished from ovarian dropsy and dropsy of the uterus. There is an idiopathic ascites, which may be of a tonic or acute form, or of an asthenic type; and a sympathetic or consequential ascites. Another division is into active ascites, that in which there is a large effusion of serum into the cavity of the peritoneum, after undue exposure to cold and wet; and passive ascites, that produced by disease of the heart or liver.

as-ci-t'ic, \* as-ci-t'ick, as-ci-t'ic-al, a. [Eng. &c., ascites; Eng. suff. -ic, -ical. In Fr. ascitique; Port. ascitico.] Pertaining or relating to the disease called ascites.

"When it is part of another tumour it is hydroptical, either anasarous or ascitical."—Wiemann: Surgery.

as-ci-t'i-tious (tious as shûs), a. [Low Lat. ascititius; from Lat. ascitus = approved, adopted, pa. par. of ascisco = to approve, to adopt.] Not originally existent; adopted, additional, supplemental. [ASCITITIOUS.]

"Homer has been reckoned an ascititious name from some accident of his life."—Fope.

as-clō-pi-ād, s. [In Fr. asclepiade; Sp. asclepiadeo; Lat. Asclepiadeus.]

Ancient Prosody: A kind of verse used by Horace and other writers, and divided into two primary types: (1) Asclepiadeus minor, consisting of a spondee, a choriambus, a dactyl, a trochee, and a cesura, as Maëcō | nās āvās | ēdītē | rēgī būs (Horace); and (2) the Asclepiadeus major, consisting of a spondee, two choriambuses, a trochee, and a cesura, as Quis pōst | vinā grāvem | millitiam aūt | paup'ērēm | crēpāt? (Schmidt: Lat. Gram., 1860, p. 306.)

as-clō-pi-a-dā-g'ē-æ, s. pl. [ASCLEPIAS.]

Asclepiads. An order of plants closely allied to the Apocynaceæ, or Dogbanes. Lindley places them under his alliance Solanæes. They have a 5-divided persistent calyx; a monopetalous 5-lobed regular corolla; 5 stamens, with the filaments usually connate; anthers 2—sometimes almost 4—celled; the pollen at length cohering in masses, or sticking to 5 processes of the stigma; styles 2; stigma 1, tipping both styles, dilated, 5-cornered; ovaries 2; fruit, 2 follicles, of which one is sometimes abortive; seeds numerous. Shrubs, or more rarely herbs, almost always milky, and frequently twining. Leaves entire, opposite; flowers umbellate, fascicled, or racemose. Their favourite habitat is Africa. They occur also in India, and the tropics generally. In 1846 Lindley estimated the known species at 910; now fully 1,000 are known. The milk, which in some species furnishes caoutchouc, is usually acrid and bitter, through apparently not so deleterious as that of Apocynaceæ. That of Calotropis gigantea, the akund, yercum, or mudar plant of India, has been used with effect in leprosy, elephantiasis, and some other diseases. The roots of Cynanchum tomentosum, and Periploca emetica are emetic. Gymnema lactiferum is the Cow-plant of Ceylon (COW-PLANT). Pergularia edulis and Periploca esculenta are eatable. Diplopepis vomitoria is expectorant and diaphoretic, and is used like Ipecacuanha in dysentery. Hemidesmus Indica is the Indian Sarsaparilla [SARSAPARILLA]. The leaves of Cynanchum Argel are used in Egypt for adulterating senna. Marsadenia tenacissima is employed for bowstrings by the mountaineers of Rajmahal, whilst M. tinctoria and Gymnema tinogens yield an indigo of excellent quality. (Lindley.) [ASCLEPIAS.]

as-clō-pi-ād'-ē-an, a. [Lat. asclepiadeus.] Pertaining or relating to the metre called Asclepiad (q. v.).

"The distichs used by Horace are—(1) The second Asclepiadean metre, consisting of a Glyconic and the Asclepiadeus minor.—Schmidt: Lat. Gram. (1860), p. 306.

as-clō-pi-ād'-ic, a. [Eng. asclepiad; -ic.] The same as ASCLEPIADEAN (q. v.).

as-clō-pi-ās, s. [In Fr. asclepiade; Ital. asclepiade; Sp. asclepiada; Lat. asclepias; Gr. ἀσκληπιός (asklēpiós), a plant, the Swallow-wort (Asclepias vincetoxicum f.); from Ἀσκληπιός (Asklēpiós), the Roman Esculapius, or Esculapius, the fabled god of medicine.] A genus of plants, the typical one of the order Asclepiadaceæ. The species are found chiefly along the eastern portion of North America, in Bermuda, &c. Though all more or less poisonous, they are used medicinally. A. decumbens excites general perspiration without in any perceptible degree increasing the heat of the body. It is used in Virginia as a remedy against pleurisy. Another variety, A. tuberosa, is a mild cathartic and diaphoretic. The root and tender stalks of A. volubilis create sickness and expectoration. A. tuberosa (Butterfly Weed) and A. curassavica, sometimes but incorrectly called Ipecacuanha, are also medicinal plants, whilst A. lactifera yields a sweet copious milk used by the Indians, &c.; hence the ordinary name milkweed. A. ophyllia and stipitacea are eatable. (Lindley.)

as-clō-m'y-ōs'-tæg, s. pl. [Gr. askos (askos) = a bag, and μύκης (mukēs) = a mushroom.] A group of fungi whose spores or sporidia are contained within ascl.

as-clō-m'y-ōs'-toūs, a. [Eng. &c. ascomycete(s); -ous.] Belonging to or connected with the ascomycetes (q. v.).

a-scrib'-be-ble, a. [Eng. ascrib(e); -able.] That may be ascribed.

"... the effects of nature's abhorrence of a vacuum, which seem to be more fitly ascribed to the weight and spring of the air."—Boyle, vol. 1, p. 17.

a-scrib'e, v.t. [In Ital. ascrivere. From Lat. ascribo = (1) to add to or insert in a writing; (2) to impute: ad = to, and scribo = . . . to write.]

- \* 1. To write down.
"Hereupon the Athenians do ascribe that day for most unfortunate day."—North: Plutarch, p. 151.
2. To attribute, to impute, to assign. Used—

(a) Of qualities or actions attributed to a person or other being:

"ascribe ye greatness unto our God."—Deut. xxxii. 5

"They have ascribed unto David ten thousands, and to me they have ascribed but thousands."—1 Sam. xviii. 5

(b) Of effects attributed to causes:

"The mind, indeed, enlighten'd from above, Views Him in all; ascribes to the grand cause The grand effect; . . ."—Cooper: Task, bk. II.

¶ Regarding the difference between the verbs to ascribe, to impute, and to attribute, Crabb considers that to ascribe is to assign anything in one's estimate as the possession or the property of another; to impute is to form an estimate of a person, and to attribute is to assign a thing as a cause. What is ascribed is generally honourable; what is imputed is generally dishonourable." (Crabb: English Synonyms.)

a-scrib'ed, pa. par. [ASCRIBE.]

a-scrib'-ing, pr. par. [ASCRIBE.]

\* a-scri'e, \* a-skri'e, \* a-skr'y'e, v.t. [Cf. Sw. askri = an outcry, scream, cry; Old Fr. escrier = to call out.] To cry out to, to shout to.

"Seraphe was of hem wel war and faste him a-cries." Joseph of Arimathea (de Skeat), 530.

\* a-scri'e, \* as-scri'y, \* a-skri'e, \* es-kr'y'e, \* a-skr'y'e, s. [ASCRIBE, v.] An outcry, a scream, a cry.

"In which camp, about a xl. of the clock at night, ther arose an ascrie, so that the towne of Calcut began alarme."—Hist.: Hen. VIII., an. 5. (Richardson.)

"Then the Breytaynes made an ascrie and sette their beacone on fire."—Ibid.

a-scrip'-tion, s. [Lat. ascriptio = an addition in writing: from ascribo (ASCRIBE); or from ad = to, and scriptio = the act of writing; scribo = to scrape with a sharp point, . . . to write.]

1. The act of attributing, imputing, or assigning, as an effect to a cause, or qualities or actions to any being; the state of being attributed.

"... that noble subsequent life which would render almost impossible the ascription to Faraday of anything unfair."—Fynskott: Prog. of Science, xii. 337.

bōl, bōy; pōut, jōwl; cat, çell, chorns, çhin, bench; go, gem; thin, thîs; sin, aç; expect, Xenophon, exist. ph = f. -cian. = shan. -tion, sion, -tious = shûn; -tion, -tion = zhûn. -tious, -sious, -cions = shûs. -ble, -dle, &c. = bēl, dēl.

B. As a past participle (ashamed, ashamed, ashamedly), it is in common use: Made to blush, or feel abashed or confused, from consciousness of secret guilt, from a feeling of inferiority, from the humiliation produced by the exposure of disreputable moral conduct, or of intellectual folly with which one is chargeable.

"No ye be not ashamed, that daun Johan Schol aiday fastyng thus slengs goon?" Chaucer: C. T., l. 623-3.

In Scripture it is followed by of, or more rarely by for or because, applied to that which causes the shame.

"And Moab shall be ashamed of Chemosh, as the house of Israel was ashamed of Beth-el their confidence."—Jer. xiv. 13.

"... they shall see, and be ashamed for their envy at the people."—1st. xxvi. 11.

"... they shall be ashamed because of their sacrifice."—Hosea iv. 19.

In Ordinary Language: To be ashamed for a person is to blush on account of his misconduct, the desire being felt that he should not disgrace himself.

a-shā'm-ōd-l'y, adv. [Eng. ashamed; -ly.] So as to manifest shame; bashfully. (Hulot.)

āsh-būd, s. [Eng. ash (2), and bud.] A bud on, or from an ash-tree.

"Darker than darkest panicles, and that hair More black than ashbuds in the front of March." Tennyson: The Gardener's Daughter.

ashc, v.t. [ASK.]

āsh-ēn (1), a. [From Eng. ashes.] Of a colour between brown and grey.

"On the Earl's cheek the flush of rage O'ercame the ashc-hue of age." Scott: Marmion, vi. 14.

āsh-ēn (2), ās-shēn, a. [From Eng. ash; and suff. -en. In Ger. eschen.]

1. Pertaining to the ash-tree.

2. Made of ash-wood.

"And each his ashc bow unbent." Scott: Lord of the Isles, lv. 8.

ashen keys. The seed-vessels of the ash-tree. They are called by botanists Samaras, i.e., dry, indehiscent, winged, two-celled, two-seeded capsules. [SAMARA.] Their length and lateral compression create the resemblance to keys. [ASH-KEVA.]

ASHEN KEYS.

Her.: The seed-vessels of the ash-tree, which are occasionally represented on an escutcheon. (Gloss. of Heraldry, 1847.)

āsh-ēt, āsh-ēt, a. [Fr. assiette = a plate, a trencher.] A large flat plate on which meat is brought to the table. (Scotch.)

āsh-lar, āsh-lēr, ā-shēl-or (Eng.), āis-lēr, āis-lair, āst-lēr (Scotch), a. & a. [O. Fr. aisseler, from aisselle = the armpit; Lat. axilla = the armpit.] [AXIL.]

A. As substantive:

Arch.: Hewn or squared stone used in building, as contradistinguished from that which is rough, as when it came from the

ASHLAR.

quarry. "J. H." in Boucher's Dict. states that the earliest instance of the use of the word ashlar which had been discovered when he wrote, was in connection with the erection of the College of Fotheringhay. [See example.]

"... the ground of the body and legs be made within the side under the ground talistones with rough stone; and all the remnant of the said body and legs,

unto the full height of the said quire, with cleve hewne ashlar, altogether in the outer side unto the full height of the said quire."—An Indenture (A.D. 1411), Horest. Anglia, vi. 1, 414.

In Somersetshire it was formerly used of paving stones. (J. H., in Boucher.)

Nipped Ashlar: Stone hewn with a pick or with a pointed hammer, instead of with a chisel. The term is used principally in connection with the hewing of the hard Aberdeen granite. (Weale: Rudiment. Dict. of Terms used in Arch., 1850, pt. iii., p. 304.)

B. As adjective: Pertaining to hewn or squared stones; made of or with ashlar or hewn stones.

"The ashlar buttress braves its force."

Scott: Oudezo Castle.

"It is no square-built gloomy palace of black ashlar marble, shrouded in awe and horror as Gray gives it us."—Carlyle: Heroes and Hero-Worship, Lect. I.

āsh-lēr-īng, s. [Eng. ashlar; -ing.]

Architecture:

1. Pieces of wood, about three feet high, placed in garrets so as to cut off the acute angles formed by the junction of the roof and floor.

2. The act of bedding ashlar in mortar.

a-shō'-ca, a-sō'-ca, s. [In Bengali, &c., ashoka.] A magnificent tree, the Jonesia asoca, called after Sir William Jones, founder of the Asiatic Society, who says that the vegetable world scarce affords a richer sight than an ashoka-tree in full bloom. The flowers, which are in cymes, are of a rich orange colour. The fruit is leguminous. The tree is wild in the Malayan peninsula, and also cultivated in Indian gardens.

a-shō're (1), adv. [Eng. a = on; shore (2).]

1. Aslope, slantwise. (Babes Book (ed. Furnivall), p. 121.)

2. A-straddle. (Ibid., p. 186.)

a-shō're (2), adv. [Eng. a = on; shore (1).]

1. To the shore; upon the shore from the sea. Used (a) of a person landing from a ship:

"Yet then, when called ashore, he sought The tender peace of rural thought." Wordsworth: To the Daisy.

Or (b) of the ship itself flung ashore, or any-thing from the deep similarly hurled upon the land.

"May thy billows rowl ashore, The berry and the golden ore." Milton: Comus.

2. On the shore, as contradistinguished from being on board a ship or in the sea.

"Our position was often ashore."—Hooker: Himalayan Journals, ch. 11.

āsh-tōr-ōth, ās-tōr-ōth, ās-tar-tō (pl. āsh-tār-ōth), a. [Heb. אֲשֶׁרֶת (Ash-tōreth), pl. אֲשֶׁרֶתֶת (Ash-tārōth); Gr. Ἀστάρτη (Astartē); Assy. Ishtar; Pers. Istarah; Gr. ἀστέρ (astēr) = a star.] [STAR.] A goddess worshipped in Phenicia, Philistia, and elsewhere. She was symbolized by the moon, and also by the planet Venos. The place Asteroth Karnaim (Gen. xiv. 5) means the horned or mooned Astartes, probably from images of that goddess set up and worshipped there.

She is supposed to be the "Queen of Heaven," mentioned in Jer. vii. 18 and xlv. 17. אֲשֶׁרֶת and אֲשֶׁרֶתֶת, wrongly translated "grove" or "groves" in Judg. vi. 25, 2 Kings xxiii. 4, and various other places, seems to signify an image of Astarte. It is connected with אֲשֶׁר (āshēr) = happiness, good fortune, Astarte being the goddess of good fortune. She represented the female principle, and was worshipped with impure rites. She is frequently connected with Baal, the corresponding male divinity. [BAAL.]

"For Solomon went after Astarte, the goddess of the Zidonians."—1 Kings xi. 8.

āsh-y, a. [Eng. ash; -y.] Of an ash colour, or tending towards one; whitish-grey, pale.

"And dying eyes gleam'd forth their ashly lights, Like dying coals burnt out in tedious nights." Shakesp.: Tarquin and Lucrece.

ashy-pale, a. Pale like ashes.

"... he looked ash-y-pale and haggard."—Hooker: Himalayan Journals, vol. ii., p. 201.

ashy-green, a. & s.

A. As adjective: Coloured green, commingled with ash colour.

B. As subst.: The colour now described.

"... the back of an ash-green."—Warrington, in Miscell. and Mag. of Nat. Hist., Oct., 1852.

Ā'-sia (sia as sha), s. [Sw. & Dan. Asien; Dut. Azie; Fr. Asie; Sp., Port., Ital., & Lat. Asia; Gr. Ἀσία (Asia).]

A. Classical Mythology:

1. A daughter of Oceanus, mentioned by Hesiod, the first Greek writer who used the term Asia, and then not in a geographical sense.

2. The wife of Prometheus.

B. Geog. [Asia in this sense is said to be derived from the daughter of Oceanus mentioned above.]

1. Apparently the region east of the Archipelago once ruled over by King Attalus, and extending from Pergamos, in Mysia, to Caria. Herodotus is the first writer in which this—the oldest—geographical sense of the word Asia is known to occur. Livy also uses it with the same signification, generally known as Asia Minor.

2. The Roman province of the name, including Phrygia, Mysia, Lydia, and Caria. This is the New Testament sense of the word.

"... the dwellers in Mesopotamia, and in Judea, and Cappadocia, in Pontus, and Asia, Phrygia, and Pauphlyia."—Acts ii. 9, 10.

3. The great continent east of Europe and Africa. When this extended sense was introduced, then the region between the Black Sea, the Archipelago, and the Mediterranean, within which the Roman provinces of Asia was situated, came to be called in Latin, by way of distinction, Asia Minor (Lesser Asia). The first author known to have used the latter term for Asia west of the Taurus was Orosius, in the fifth century, A.D. (See Trench: On the Study of Words, p. 96.)

C. Astron.: An asteroid, the sixty-seventh found. It was discovered by Pogson on the 18th of April, 1861.

Ā'-sian (sian = shan), adj. [Lat. Asiaticus.] Belonging to Asia.

"From Asian Taurus, from Imaus stretch'd." Thomson: Seasons; Autumn.

Ā'-si-arch (or si = shi), s. [In Ger. Asiar-arch; Fr. asiarque; Lat. asiarchus; Greek ἀσιάρχης (asiarchēs).]

Under the Romans: The director-general of religious ceremonies in the province of Asia. The expression occurs in the Greek Testament, Τῶν δὲ καὶ τῶν Ἀσιάρχων (Times de kai tōn Asiarchōn), "And certain also of the Asiarchs" (Acts xix. 31). Properly speaking, there was but one Asiarch residing at Ephesus; the others referred to were his subordinates.

Ā'-si-āt-īc, ā'-si-āt-yok (or si = shi), a. & s. [In Fr. Asiaticque, adj.; Sp., Port., & Ital. Asiatico; Lat. Asiaticus; Gr. ἀσιατικός (Asiaticus).]

A. As adjective: Pertaining, relating, or belonging to Asia in any of the geographical senses of that word.

Now (Spec.): Referring to the Asiatic continent.

"The commerce of Asiatic Russia bears a small proportion to that of European Russia, the proportion being as 4 to 25."—Leoni Lav: Hist. Brit. Com., (1872), p. 467.

Asiatic Society: The name given to any society which makes Asia and its inhabitants the main subject of inquiry. The first modern society of the kind was the Asiatic Society of Bengal, founded at Calcutta by Sir William Jones, in January, 1784. The Royal Asiatic Society of Great Britain and Ireland was formed in March, 1823, and incorporated in August, 1824. It holds its meetings in London, but has affiliated societies or branches at Bombay and Madras. The Bengal Society also, though earlier in point of time, is now virtually a third branch. Other Asiatic Societies exist among the Continental nations, the best known being that of Paris, founded in 1822.

In terms in Zoology, Botany, &c., commencing with Asiatic, such as Asiatic elephant, see the substantives subjoined.

B. As substantive: A native of Asia in any of the geographical senses of the word. Spec., a native of the Asiatic continent.

"If the Japanese and the Malays exhibit a character mainly, enterprising, and different from that of the other Asiatic."—Macleay: Phys. Geog., 2nd ed. (1834), p. 622.

bōil, bōy; pōut, jōwī; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -īng. -cian, -tian = shān. -tion, -sion, -cloun = shūn; -tion, -sion = zhūn. -tious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

**C. As subst.:** Petitioning, expressed wish; solicitation.  
 "Here, too, lands may be had for the asking."  
*Longfellow: Evangeline*, ll. 2.

**ask-íng-lý,** *adv.* [Eng. *asking*; *-ly*.] In an inquiring manner; interrogatively.

**ask-lént,** *ask-lént,* *adv.* [ASLANT.] (Scott.)

\* **a-skóff,** *adv.* [O. Eng. *a*; *skof*=scoff.] In a scoffing manner; deridingly.  
 "Alisander loked askof  
 As he no gef nought therof."  
*Alisander*, 874. (Boucher.)

\* **a-slá'ke,** *v.t. & i.* [Eng. *a*; *slake*=slack; A.S. *aslacian* = to slacken, to loosen, to untie, to remit, to dissolve, to enervate.] To cause to become slack, to slacken, to extinguish.  
 "That thurgh your deeth your lignage schuld askake."  
*Chaucer: C. T.*, 812A.

**as-lá-mí,** *s.* [From Turkish and Tartar *aslan*, *arслан* = a lion: *as*, *Alp Arslan* = Alp the Lion.] An old Turkish coin worth from 115 to 120 aspers. [ASPER.] It is not included in the *Statesman's Year-book* among the coins now current in Turkey. Goodrich and Porter mention, on the authority of Buchanan, that the name *aslan* is sometimes applied to the Dutch dollar in the Levant.

**a-slant,** \* **a-slét,** \* **a-slout,** \* **a-sló'wte,** (*Eng.*), \* **as-klént,** \* **as-klínt'** (Scottic). *adv. & prep.* [Eng. *a*; *slant*.] The *k* of the Scott *asklent* connects it also with *askant*. In Sw. *slinta* = to slip, to elide; Dut. *slinken* = obliquely, *slincksch* = oblique; Wel. *ysglintu* = to slip or elide; O. Fr. *esclinchier* = to slip or slide; Ital. *a schianco*=crosswise, slopingly; in a wrong sense.] [ASKANT, ASKANCE, SLANT, GLANCE.]

**A. As adverb:**  
 1. *Lit.*: Not at a right angle; slantingly; obliquely. Not in a straightforward manner. [B.]  
 "Mazgie coast her head f' high,  
 Looked askint and uno ekigh."  
*Burns: Duncan Gray*.

2. *Fig.*: In a morally oblique manner.  
 "Sti' thou came to the world askint."  
*Burns: To his Illegitimate Child*.

**B. As prep.:** In a slanting direction to anything; obliquely to anything.  
 "The swelling upland, where the sidelong gull  
 Alant the wooded slope, at evening goes."  
*Longfellow: Spirit of Poetry*.

¶ The old forms \* *aslet*, \* *aslout*, and \* *asló'wte* are from *Prompt. Parv.*; and *aslout* in the *Buboes Book* (ed. Furnivall), p. 155. Possibly they may be connected with *aslope* rather than with *aslant*.

**a-slá'we,** *pa. par.* [A.S. *aslegen*, *aslagen* = slain.] Slain.  
 "The eym hadde his brother *aslawe*, ifemod he was theroure."  
*The Holy Rode* (ed. Morris), 20.

**a-slé'ep,** *a. or adv.* [Eng. *a* = on, and *sleep*; A.S. *aslanan* = to be asleep.]  
 I. In asleep. (Applied to rest in the state of sleep.)  
 1. *Lit.*: In literal sleep, sleeping.  
 "The ship was covered with the waves; hot he was asleep."  
*Matt.* viii. 24.  
 2. *Figuratively*:  
 (a) Dead; in the sleep of death.  
 "We which are alive, and remain unto the coming of the Lord, shall not prevent them which are asleep."  
*1 Thess.* iv. 15.  
 (b) Benumbed, numb. [II. 2 (b).]  
 II. Into sleep. (Applied to the passage from the state of waking to the state of sleep.)  
 1. *Lit.*: Into literal sleep.  
 2. *Figuratively*:  
 (a) Into death.  
 "When he had said this he fell asleep."  
*Acts* vii. 60.  
 (b) Benumbed; into a benumbed state.  
 "Leaning long upon any part maketh it numb, and so we call it asleep."  
*Bacon: Nat. Hist.*, cent. viii., § 736.

\* **a-slét,** *adv.* [ASLANT.]

**a-sló'pe,** *a. or adv.* [Eng. *a* = on, and *slope*.] With a slope; slopingly, askant, obliquely.  
 "To set them, not upright, hot *aslópe*."  
*Bacon: Nat. Hist.*, cent. v., § 425.

\* **a-sló'wte,** *adv.* [ASLANT.]

\* **a-slúg,** *adv.* [Eng. *a*; *slug*.] After the manner of a slug—i.e., in a sluggish manner, sluggishly, lazily. (Fotherby.)

**as-mat-óg-ra-phý,** *s.* [Gr. *ἄσμα* (*asma*), genit. *ἄσματος* (*asmatos*) = a song, from *ᾄδω* (*adō*) = to sing; *γραφί* (*graphi*) = a writing.] A writing about songs; a treatise on songs.

**a-smear,** *a.* [Eng. *a* = on, and *smear*, *s.*] Smeared over; befouled. (Dickens: *Great Expectations*, ch. xx.)

**As-môn-ē-an,** **As-môn-sē-an,** *a. & s.* [From *Asmoneus*. (See def.)]  
**A. As adjective:** Pertaining or relating to Asmoneus, the great-grandfather of that Matthias who commenced the Maccabee revolt. (Josephus: *Antiq.*, bk. xii., ch. vi., § 1.) Or pertaining or relating to the illustrious Jewish family of patriots and princes called after him.  
**B. As substantive:** A member of the Asmonean family described above.

**a-sō'ak,** *a. or adv.* [Eng. *a*; *soak*.] Soaking, in a soaking state. (Holdsworth.)

**a-sō-ca,** *s.* [ASHOCA.]

\* **a-sō'l,** *v.t.* [ASSOIL (I).]

**a-sóm-a-toús,** *a.* [Lat. *asomatus*; Gr. *ἀσώματος* (*asōmatos*), from *ἀ*, priv., and *σῶμα* (*sōma*) = body.] Destitute of a body; incorporeal. (Johnson.)

\* **a-sóm-ōn,** *v.t.* [SUMMON.]

\* **a-sōn-dēr,** *adv.* [ASUNDER.]

\* **asonghe,** *v.* [O. Fr. *essoigner*.] To excuse.  
 "And for-do all that wretche fare,  
 And thou maye nocht asonghe the."  
*Katis Rawing*, bk. 1. (ed. Lumby), 999, 1000.

**a-sō-pi-a,** *s.* [From Gr. *Ἀσώπιος* (*Asōpios*), the "god" of the river Asopus in Achaia (there was another in Beotia).] A genus of moths belonging to the family Pyralidae. *A. farinalis* is the so-called Meal-moth. [MEAL-MOTH.]

**asp** (1), *s.* [ASPEN.]

**asp** (2), **ās-piō,** † **ās-piōk,** *s.* [In Sw. *aspig*; Fr. *aspic*; Prov. *aspic*, *aspis*; Sp. *aspid*; Port. *aspide*, *aspid*; Ital. *aspide*; Lat. *aspis*; Gr. *ἀσπίς* (*aspis*) = a round shield; an asp.]

1. The kind of serpent which has obtained great celebrity from having been chosen by Cleopatra to give her an easy death. It is believed to have been the Naja Haje. It is the same genus as the Cobra Capello, but differs in having the neck less wide, and having the colour greenish, bordered with brown. It is probably the "asp" [ἄσπίς (*aspis*)] of the New Testament (Rom. fil. 13), and the "asp" [ἄσπίς (*aspis*)] of the Old (Deut. xxxii. 33; Job xx. 14, 16; Isa. xi. 8).  
 "Their wine is the poison of dragons, and the cruel venom of asps."  
*—Deut.* xxxii. 33.  
 "The poison of asps is under their lips."  
*—Rom.* iii. 13.  
 "Well, boom, with thy fraught,  
 For tis of *aspic's* tongue."  
*Shakespeare: Othello*, III. 2.

2. The Common Asp or Cherssea (*Vipera aspis*) is olive above, with four rows of black spots. Its poison is severe. It is common in Sweden and some other parts of Europe.

3. (Poetically): Any venomous serpent. Describing the Laocoon, Byron says:—  
 "... the enormous asp  
 Enforces pang on pang, and stifles gasp on gasp."  
*Byron: Childs Harold's Pilgrimage*, iv. 160.

\* **ās-pāl-a-thūm,** *s.* [ASPALATHUS.] An obsolete name for Calambac wood. (See Parr's *Med. Dict.*) It is the same as AGALLOCH, AQLIA, EAGLE-WOOD, or LION ALOES (q.v.).

**ās-pāl-a-thūs,** *s.* [In Fr. *aspalat*; Lat. *aspalathus*; Gr. *ἀσπάλθος* (*aspalathos*), a thorny shrub, the bark and roots of which yielded a fragrant oil. It has not been certainly identified. It was called from the island of Aspalathus, on the coast of Lycia, where it grew.]

THE COMMON ASP (VIPERA ASPIS).

1. The unidentified ancient shrub.  
 "I gave a sweet smell like cinnamon and *aspalathus*, and I yielded a pleasant odour like the best myrrh."  
*—Ecclesi.* xiv. 18.

2. A plant called the Rose of Jerusalem, or Our Lady's Rose. (Johnson.)

3. *Mod. Bot.*: A genus of plants belonging to the order Leguminosae and the sub-order Psyllionaceae. It contains about 150 shrubs and under-shrubs, some of them cultivated in British gardens. (The genus stands in classification near *Ulex* (Gorse).)

**ās-pa-lāx,** *s.* [Gr. *ἀσπάλαιξ* (*aspalāx*) or *σπάλαιξ* (*spalāx*) = a mole.] A genus of Rodentia, to which belongs the *A. typhlus* of Turkey, Southern Russia, and Persia. It has no real affinity to our mole, which is ranked under the Insectivora, and not the Rodentia.

**ās-par-āg-ē-ō,** † **ās-par-a-gin-ē-ō,** *s. pl.* [ASPARAGUS.]  
*Bot.*: A tribe or section of the order Liliaceae (Lilyworts), consisting of species with succulent fruits. Type, Asparagus (q.v.). They have usually the stem fully developed, and sometimes, indeed, even arborescent, with branches. Sometimes it is forming. Sometimes, again, there is no stem; in which latter case the leaves are often coriaceous and permanent.

\* **ās-pār-a-gī,** *s. pl.* [ASPARAGUS.]

**ās-pār-a-gin,** **ās-pār-a-mid,** *s.* [In Ger. *asparagin*; from Eng., &c., *asparagus* (q.v.).] A chemical substance found in the roots of marsh-mallows and the shoots of asparagus, and in several other plants. The crystals are brilliant, tasteless, transparent, and colourless. They have a faint cooling taste, and are soluble in water, especially if it is hot. The formula is  $C_4H_8N_2O_3H_2O$ . It is somewhat akin to Malamide. (Fownes.)

**ās-par-a-gin-ē-ō,** *s. pl.* [ASPARAGOEÆ.]

**ās-par-āg-in-ōūs,** *a.* [Mod. Lat. *asparagin(e)*, and Eng. suffix *-ous*.] Pertaining or relating to asparagus.  
*Asparaginous vegetables* (*Gardening*): Those vegetables the tender shoots of which are eaten like those of asparagus.

**ās-pār-a-gūs,** *s.* [In Sw. *sparris*; Dan. *asperges*; Dut. *aspergie*; Ger. *aspergie*, *spargel*; Fr. *asperge*; Sp. *esparago*; Port. *aspargo*; Ital. *spargolo*, *asparago*; Russ. *sperra*; Lat. *asparagus*, *asparagius*; Gr. *ἀσπάραγος* (*asparagos*), Attic *ἀσπάργος* (*asparagos*), from *σπάραγος* (*sparragos*) = to tear. So called because of the strong prickles with which some of the species are armed. Formerly written *sperrage* or *spargae*.]  
**A. Ord. Lang.**: A culinary plant, the tender shoots of which are eaten, it is the Wild Asparagus (*Asparagus officinalis*), developed by cultivation.  
 "Pardons for murder, for robbery, for arson were sold at Whitehall scarcely less openly than asparagus at Covent Garden."  
*—Macaulay: Hist. Eng.*, ch. xl.  
**B. Bot.**: A genus of plants belonging to the order Liliaceae, or Lilyworts, and the tribe Asparagi, of which it is the type. It contains the Common Asparagus (*A. officinalis*), which is a plant with drooping, greenish-white flowers and red berries, growing here and there on the British coasts. As mentioned above, it is the origin of the Garden Asparagus.  
 In the *Plural*. *Asparagi*: A name given by the old botanists to the shoots covered with scales, like those of the asparagus, which are sent forth by some plants. The name now given to such a shoot is *turbo*. (Lindley: *Introduct. to Bot.*, 3rd ed., 1839, p. 72.)  
*Mineralogy*. *Asparagus-stone*: A mineral, a variety of Apatite, found in Spain. Dana couples it with *Moroxite*, and places both as a first sub-variety of ordinary Apatite, its only distinctive characteristic being its yellowish-green colour.

**ās-par-tic,** *s.* [Eng. *aspartic*]; *-ate*.] [ASPARTIC ACID.]

**ās-pār-a-mid,** *s.* [Eng. *asparagus* and *amid* (q.v.).] The same as ASPARAGIN (q.v.). (Watts.)

**ās-par-tic,** *a.* [Formed from *asparagin* (q.v.).]

**bēl,** **bōy;** **pōut,** **jōw!**; **cat,** **çell,** **chorus,** **çhin,** **bençh;** **go,** **çem;** **thin,** **thiç;** **sin,** **çay;** **expect,** **çxenophon,** **exist.** **ph = f**  
**-cian,** **-tian = shan.** **-tion,** **-sion = shün;** **-tion,** **-çion = zhün.** **-tious,** **-sious,** **-çious = shüs.** **-ble,** **-dle,** &c. = **bēl,** **dēl.**

**aspartic acid** (C<sub>4</sub>H<sub>7</sub>NO<sub>4</sub>). An acid formed from animal or vegetable proteids. (Watts.)

**As-pā'-sī-a**, s. [From *Aspasia*, the companion of Pericles; or from Gr. ἀσπασίος (*aspasios*) = gladly welcomed; ἀσπασίματα (*aspasimata*) = to welcome kindly.] A genus of plants belonging to the order Orchidaceae, or Orchids.

**as-pā'-sī-ō-lite**, s. [Gr. ἀσπασίος (*aspasios*) = greatly welcomed, and suffix *-ite*.]

*Min.*: According to the British Museum Catalogue, a variety of Oosite, a mineral placed by Dana under Pinite. Ha regards *Aspasilite* as a variety of *Fahlunite*. It is of a green or greyish colour. It occurs in Norway with *lolite*, of which it may be only an altered state. [FAHLUNITE, OOSITE, LOLITE.]

\* **áspe**, a. [ASPEN.]

**ás-pect**, \* **as-pect**, \* **as-pecte**, s. [In Sw. & Dan. *aspekt*; Ger. *aspekt*, *aspekt*; Fr. *aspect*; Sp. *aspecto*; Port. *aspecto*, *aspecto*; Ital. *aspetto*; Lat. *aspectus* = (1) a seeing, view; (2) the sense of sight; (3) (by metonymy) the look, aspect, mien; from *aspectus*, pa. par. of *aspicio* = *aspicio* = to look to or at: *ad* = to, at; *specio* = to look at, to behold.]

**A. Ordinary Language:**

† I. The act of looking, a glance.

"The tradition is not less ancient, that the basilisk killeth by *aspect*, and that the wolf if he see a man first, by *aspect* striketh a man nears."—*Bacon: Nat. Hist.*, Cent. x., § 924.

† II. The appearance presented.

1. *Of persons:*

(i.) *Gen.*: Countenance, look, also mien. (Applied to a man, or at least to a living being.)

"Which when Beelzebub perceived, than whom Satan except, none higher sat, with grave *Aspect* he rose, . . ."—*Milton: P. L.*, bk. II.

(ii.) *Spec. Figuratively*: (In the astrological sense.) [B. 2.]

"To praise the clear unmatched red and white, Which triumphed in that sky of his delight, Where mortal stars, as bright as heaven's beauties, With pure *aspects* did him peculiar duties."—*Shakspeare: Tarquin and Lucrece*.

" . . . another Pollio shine, With *aspect* open, shall erect his head, And round the orb in lasting notes be read."—*Pope: Moral Essays: Epistle v.* 64-66.

2. *Of things:*

(i.) *Of material things*: The appearance presented by a place; also the adaptation which a building or other station possesses for affording an outlook in any particular direction. (Used with more or less tacit allusion to the astrological sense.)

"The whole *aspect* of the place has been altered."—*Macaulay: Hist. Eng.*, ch. ix.

"I have built a strong wall, faced to the south *aspect* with brick."—*Swift*.

† Often in the plural, both with this and other significations.

"The *aspects* of nature are more varied and impressive in Alpine regions than elsewhere."—*Tyndall: Frag. of Science*, 3rd ed., li 51.

(ii.) *Of things not essentially material*: The appearance presented to the mind instead of to the eyes.

"The *aspect* of affairs was, on the whole, cheering."—*Macaulay: Hist. Eng.*, ch. xviii.

"The character, thus formed, has two *aspects*."—*Deid.*, ch. xii.

**B. Technically:**

1. *Old Astron.*: The position of a planet in the heavens, especially with respect to other planets. Five different aspects received names. If two planets had the same longitude, they were said to be in *conjunction*; if 60° apart, the aspect was *sextile*; if 90°, *quartile*; if 120°, *trine*; if 180°, then the two bodies were said to be in *opposition*. The symbols were the following:—

Conjunction . . . . .	♄
Sextile . . . . .	♁
Quartile . . . . .	♁
Trine . . . . .	♁
Opposition . . . . .	♁

*Of these terms only the first and last are now retained.* [CONJUNCTION, OPPOSITION.] In the abjoined example, *square* is the same as *quartile*, and *opposite* means in *opposition*.

"To the blank moon, Her office they prescribed: to the other three, Their planetary motions and *aspects*. In sextile, square, and trine, and opposite."—*Milton: P. L.*, bk. x.

2. *Astrol.* This pseudo-science, recognising the different aspects of the planets described under No. 1 (*Old Astron.*), further superadded

the notion that these could, on the one hand, exert good, and on the other, an evil or malign influence on human affairs.

" . . . if Nature's concord broke, Among the constellations war were sprung, Two planets, rushing from *aspect* malign Of fiercest opposition, in mid sky Should combat, and their jarring spheres confront."—*Milton: P. L.*, bk. vi.

" . . . and the astrologers call the evil influence of the stars evil *aspects*."—*Bacon: Essays (Civil & Mor.)*, ch. ix.

3. *Her.*: The position which an animal occupies with regard to the eye of the spectator. It may be (1) *full aspect*, that is, full-faced, looking towards the spectator; or (2) *passant* that is, with its side towards him; or (3) of *trian aspect*, that is, neither the one nor the other, but between the two.

4. *Painting.* A *double aspect*: A single figure representing two or more different objects. (*Glossog. Nova*.)

\* **as-pect**, v. t. [From *aspect*, a. (q.v.).] To look at, to behold, to contemplate.

"Happy in their mistake, those people, whom The northern pole attracts; whom fear of death, The greatest of all human fears, ne'er moves."—*Temple*.

**as-pect-a-ble**, a. [Lat. *aspectabilis*.] That may be looked at or beheld.

"To this use of informing us what is in this *aspectable* world, we shall find the eye well fitted."—*Ray: Creation*.

**as-pect-ant**, a. [Lat. *aspectans*, pr. par. of *aspecto* = to look at.] Looking at.

*Her.*: A term applied to two birds facing one another, or looking at one another. (The term *aspecting* has the same meaning.)

**as-pect-éd**, pa. par. & a. [ASPECT, v.]

1. *As pa. par.*: Looked at, beheld.

2. *As adj.*: Having an aspect.

**as-pect-ing**, pr. par. & a. [ASPECT, v.]

I. *Ordinary Language:*

1. *As pr. par.*: Looking at, beholding.

2. *As adj.*: Having an aspect.

II. *Her.*: The same as ASPECTANT (q.v.).

\* **as-pec-tion**, s. [Lat. *aspectio* = a look, a view.] The act of looking at anything.

"A Moorish queen upon *aspection* of the picture of Andromeda conceived and brought forth a fair one."—*Brown*.

**ás-pén**, \* **asp** (l), \* **áspe**, \* **éspe**, a. & s. [A.S. *æsp*, *æspe*, *æse* = an aspen; *æspe* (adj.) = tremulous; Sw. *asp*; O. Icel. *ösp*; Dan. *æspetræ*; Dut. *esp*, *espeboom*; Ger. *espe*, *aspe*, *áspe*; O. H. Ger. *aspa*.]

**A. As adjective:** Pertaining in any way to the trembling poplar. [See A., subst.] *Spec.*, consisting or made of its wood.

"You see those lifeless stumps of *aspen* wood."—*Wordsworth: Hare- Leap Well*, pt. II.

**B. As substantive:** A tree, the *Populus tremula*, or Trembling Poplar. The leaves are nearly orbicular, and are bluntly sinuate-toothed. They soon become glabrous on both

sides. The tremulous movement of the leaves which exists in all the poplars, but culminates in the aspen, mainly arises from the length and slender character of the petiole or leaf-stalk, and from its being much and laterally compressed. The aspen is more unequivocally a native of Britain, and especially of Scotland, than the other poplars, being often found in the middle of large woods remote from cultivation.

"Willows whiten, *aspens* quiver."—*Tennyson: The Lady of Shalott*.

(1) Tree, (2) leaves, and (3) catkins.

**aspen-leaf**, s.

1. *Lit.*: The leaf of the aspen. "And his joints, with nerves of iron twined, Shook like the *aspen-leaves* in wind."—*Scott: Lay of the Last Minstrel*, II. 24.

2. *Fig.*: The tongue

"For if they (i.e. wines) might be supposed to begin ones in the congregation to fall in disputing, those *aspen leaves* of theirs would never leave wagging."—*Sir T. More's Works*, p. 769. (S. in *Boucher*.)

**ás-pér**, **as-pre** (pre as **pér**), a. & s. [Lat. *asper* = rough.]

**A. As adjective:**

1. Rough; not smooth on the surface.

" . . . he saith that the way to heaven is straits and *asper* and painful."—*Sir T. More's Works*, p. 74. (S. in *Boucher*.)

"Cold maketh the arteries and flesh more *asper* and rough."—*Bacon: De Caters et Frigore*.

2. Sharp in sound.

"All base notes, or very treble notes, give an *asper* sound."—*Bacon: Nat. Hist.*, Cent. II., § 174.

3. Bitter in spirit.

"For if *Cresside* had erst complained sore, Tho' she gan the plain a thousand times more, And in her *asper* plaint, thus she scide."—*Chaucer: Troil & Cres.*, bk. iv.

**B. As substantive:**

*Greek Grammar*: The rough breathing (Lat. *spiritus asper*) (') placed over the initial letter of many Greek words, when that letter is itself a vowel, and over the second letter if a diphthong. It indicates that the vowel is to be aspirated, i.e., pronounced as if *h* preceded it, as *ἄσπρος* (*áspros*). It is used also before *ρ*, at the beginning of a word, to indicate that it should be pronounced like *rh*, as *ῥόδον* (*rhodon*). When a double *ρ* occurs in the middle of a word, some authors mark the first with the soft breathing (Lat. *spiritus lenis*), and the second with the rough one, as *ῥῆνον* (*errhinon*). Liddell and Scott generally omit ' writing the word simply *ῥῆνον*; but whether ' is inserted or omitted, the second *ρ* must be pronounced with an aspirate.

**ás-pér**, s. [Low Lat. *asperus*, *asprus*, *asperum*, *asprum*; Mod. Gr. *áσπρος* (*aspron*); from *áσπρος* (*aspros*) = white; the rendering of Turkish *aqtscheh*, *aktsche*, as adj. = white; as subst. = an old Turkish coin, called by Europeans *atsche* or *atche* (q.v.). (*Mahn*.)]

*Numis*: An old Turkish coin of silver, the third of a medine. It was worth about an English halfpenny.

\* **ás-pér-a**, a. [The fem. of Lat. *asper*, -a, -um = rough.]

† *Anatomy.* *Aspera arteria*: The windpipe.

† The ancients considered all arteries to contain air, and not blood.

" . . . the veanand or wind-pipe, which we call *aspera arteria*, . . ."—*Bacon: Nat. Hist.*, Cent. II., § 174.

† **ás-pér-áte**, v. t. [In Ital. *asperare* = to exasperate; Lat. *aspero* = (1) to make rough, (2) to sharpen, (3) to exasperate.] To roughen; to make rough.

"These corpuscles of colour insinuating themselves into all the pores of the body to be dyed, may *asperate* its superficies, according to the higness and texture of the corpuscles."—*Boyle*.

† **ás-pér-á-téd**, pa. par. & a. [ASPERATE.]

† **ás-pér-á-tion**, pr. par. [ASPERATE.]

**ás-pér-á-tion**, s. [Lat. *asperatio*.] Roughness. The act of making rough; the state of being made rough; that which imparts the roughness. (*Johnson*.)

\* **ás-pér-áunt**, a. [Lat. *asperans*, pr. par. of *aspero*.] [ASPERATE.] Bold. (*Alisander*, 4, 871.)

**as-per-gés**, s. [Lat. = thou shalt sprinkle.]

1. The rod for sprinkling holy water.

2. The Antiphon, "Asperges me, Domine," which is sung before a High Mass, or a Missa Cantata, while the priest is sprinkling the congregation with holy water.

**as-pér-gíl-li-form**, a. [Low Lat. *aspergillus* (q.v.), and Lat. *forma* = form, shape.]

*Bot.*: Shaped like an aspergillus; brush-shaped. Example, the stigmas of grasses.

**as-pér-gíl-lüm**, s. [From Low Lat. *aspergillus* (q.v.).] Watering-pot shell. A genus of molluscs belonging to the family Gastropoda.

*Bot.*: Shaped like an aspergillus; brush-shaped. Example, the stigmas of grasses.

**as-pér-gíl-lüm**, s. [From Low Lat. *aspergillus* (q.v.).] Watering-pot shell. A genus of molluscs belonging to the family Gastropoda. The shell, which is small, is cemented to the lower end of a long chelly tube. This tube is closed at the end by a perforated

fáte, fáf, fáre, amidst, whát, fáll, fáther; wé, wét, hère, camel, hër, thére; píne, píť, síre, sír, maríne; gó, pót, or, wóre, wólf, wórk, wóh, són; múte, cúb, círe, únite, cūr, rúle, fúll; trý, Sýrian. æ, œ = é. ey = á. qu = kw.

disc like the spout of a watering-pot. The species occur in the warmer seas. In 1875, Tate enumerated twenty-one recent and one fossil, the latter from the Miocene.

**as-pér-gil-lús, s.** [Low Lat. *aspergillus*; from Lat. *aspergo* = a sprinkling; *aspergo* = to scatter, to sprinkle.]

1. *Roman Catholic Ritual*: The brush used for sprinkling holy water in Roman Catholic churches.

2. *Bot.*: Mouldiness. A genus of fungi belonging to the cohort Concomycetes. The species are found on rotten substances, on decaying fungi, on damp plants, in herbaria, and in similar situations.

**as-pér-goire (oire as wâr), s.** [Fr. *aspergo*; Lat. *aspergo* = to sprinkle.]

*Roman Catholic Ritual*: A sprinkling with holy water.

**as-pér-i-fó-ly-és, s. pl.** [Lat. *asper* = rough, and *folium* = a leaf.] Linnaeus's name for the natural order of plants now called Boraginaceae, or Borageworts. It was given because, as a rule, they have hairy leaves.

**as-pér-y-fó-li-âte, a.** [Lat. *asper* = rough, and *foliatus* = leaved; from *folium* = a leaf.] Having rough leaves, i.e., leaves roughened with hairs.

**as-pér-y-fó-ly-ôis, a.** [Lat. *asper* = rough, and *folium* = a leaf.]

*Bot.*: The same as ASPERIFOLIATE. (Todd.)

**as-pér-y-tý, s.** [In Fr. *asperité*; Ital. *asperita*; Lat. *asperitas*; from *asper* = rough.]

I. *Of things tested by the senses*:

1. Roughness of surface; unevenness of surface.

"Sometimes the pores and asperities of dry bodies are so inconspicuous to the particles of the liquor, that they glide over the surface."—Boyle: *Works*, vol. 1, p. 682.

2. Roughness of sound, unpleasant sharpness; also harshness of pronunciation.

3. Roughness of taste; tartness, sourness.

II. *Of things tested by the mind*:

1. Roughness to be encountered in one's path, difficulties in one's way; something distasteful to the feelings requiring to be done. "... the activities and asperities of duty."—Borrow, vol. III, Ser. 42.

2. Sourness or bitterness of feeling; bitterness in soul.

3. Roughness of temper, moroseness, sourness, crabbedness. This may be temporary and produced by provocation, or it may be permanent and resulting from long-indulged ill-nature.

"... and was answered with equal asperity and even more than equal ability by Sir John Dalrymple."—Macaulay: *Hist. Eng.*, ch. xvi.

**as-pér-ly, \*as-pre-ly (pre as pér), adv.** [Eng. & Lat. *asper*, and Eng. suff. *-ly* = like.] Roughly.

"... and there assailed them so asperly, that the Captain of the Romans, called Lucretius, might easily take them."—Sir Thomas Elyot: *The Governour*, p. 67.

**as-pér-môis, a.** [Gr. *áspermos* (*aspermós*), from *ás, pri*, and *spérma* (*sperma*) = a seed; *spéiro* (*spéiro*) = to sow.] Without seed, destitute of seed. (Brande.)

**as-pér-ná-tion, s.** [Lat. *aspermatio*, from *aspermor* = to spurn away; *as* = from, and *spernor* = to despise; *sperno* = to separate, to despise.] Contempt, disdain. (Johnson.)

**as-pér-nesse, \*as-pre-ness, s.** [Eng., &c. *asper*; O. Eng. suff. *-ness*.] Roughness, bitterness, unpleasantness to the taste or feelings; adveneness, calumitaneous.

"The asperness of his estate."—Chaucer: *Boecius*, bk. iv.

**as-pér-ô-lite, s.** [Lat. *asper* = rough; *o*, euphonious; and *-lité*, from Gr. *λίθος* (*líthos*) = stone. "Named asperolite on account of its great brittleness." (Dana.)] A mineral, a variety of Chrysozoila. It is of a bluish-green colour, and comes from Tagilak, in Russia.

**as-pér-ôis, a.** [Eng. & Lat. *asper*.] Full of roughness, very uneven.

"The asperous edge..."—Wilson: *Great Britain* (1853), (Halliwell: *Conc. to Lexic.*)

"Black and white are the most asperous and unequal of colours, so like that it is hard to distinguish them; black is the most rough."—Boyle.

**as-pér-se, v. t.** [In Fr. *asperger*; Port. *aspergir*; Ital. *aspergere*; Lat. *aspergo*, sup. *aspersum* = to scatter or strewn upon, to besprinkle; *ad* = to, and *spargo* = to throw here and there. Cognate with Gr. *σπείρω* (*spéiro*) = to sow.]

† I. *Lit.*: To besprinkle one, to scatter or cast over one.

2. *Fig.*: To bespatter one with calumnies; to act in motion injurious charges against one, made either to his face or behind his back; to vituperate one.

"For he who tempts, though in vain, et laet asperes  
The tempted with dishonour foul..."  
Milton: *P. L.*, bk. ix.

**as-pér-sed, pa. par. & a.** [ASPERSE, v.]

1. *Ord. Lang.*: In a sense corresponding to those of the verb.

2. *Her.*: Strawed or powdered with a number of small charges, such as *feur de lis*, cinquefoils, &c. It is the same as *Fr. semé* (q.v.). (Gloss. of Her.)

**as-pér-sér, s.** [Eng. *asperse*(e); *-er*.] One who besprinkles or bespatters another, either in a literal or in a figurative sense. (Todd.)

**as-pér-sing, pr. par.** [ASPERSE, v.]

**as-pér-sion, s.** [In Fr. & Sp. *aspersión*; Port. *aspersão*; Ital. *aspersione*, *aspersione*; Lat. *aspersio*.]

I. The act of sprinkling; the state of being sprinkled—

† I. *Lit.*: With water or other liquid; or with any material thing capable of division into minute drops.

"... as when the armourers make their steel more tough and pliant, by aspersion of water or juice of herbs."—Bacon: *Physiol. Rem.*

2. *Fig.*: With anything not of a material kind. *Spec.*—

\* (a) With allusions or references to, or illustrations derived from, certain departments of human knowledge.

"And if the book of Job be turned over, it will be found to have much aspersion of natural philosophy."—Bacon: *Inter. of Nat.*, ch. 1.

(b) With injurious or calumnious charges.

"The same aspersions of the king, and the same grounds of a rebellion."—Dryden.

† II. That with which one is aspersed. *Spec.*, an injurious statement against one.

"... yet how can fighting or killing my adversary wipe off my aspersion, or take off my blow, or prove that I did not beat?"—Jerome Taylor: *Of Duels*. *Works* (ed. 1839), vol. III, p. 65.

**as-pér-sive, a.** [Eng. *asperse*(e); suff. *-ive*.] Involving aspersions, containing aspersions; calculated to asperse. (Ogilvie.)

**as-pér-sive-ly, adv.** [Eng. *asperse*(e); *-ly*.] By way of aspersion.

"... these many envious and injurious detractions which the ignorant may aspersively cast thereon."—Sir T. Drake *Revived. To the Reader*. (Richardson.)

**as-pér-sô-r-î-um, s.** [Low Lat. *aspersorium*, whence the Ital. *aspersorio*.]

1. The stoup, or holy-water basin, in medicinal churches.

2. The aspergillus, or sprinkler. (Gloss. of Arch.)

**as-pér-sôr-y, a.** [Eng. *asperse*(e); *-ory*.] Tending to asperse, calculated to asperse; defamatory. (Webster.)

**as-pér-û-gô, s.** [In Sp. *asperugo*; Ital. *asperugine*; Lat. *asperugo*, a plant with prickly leaves; from *asper* = rough.] Madwort. A genus of plants belonging to the order Boraginaceae (Borageworts). It contains only one species, *A. procumbens*, or German Madwort, a very biennial plant, with solitary blue flowers in the axils of the leaves. It is naturalised in Britain.

**as-pér-u-la, s.** [In Fr. *asperule*; from Lat. *asper* = rough, so called on account of the roughness of some species of the genus.] Woodruff. A genus of plants belonging to the order Gallaceae, or Stellatae. It contains two genuine British species—*Asperula odorata*, the Sweet Woodruff, which has six to eight leaves in a whorl; and *A. cynanchica*, the Small Woodruff, or Squinancy-root, which has but four. The former species has white flowers, and grows in woods and other shady places; the latter has lilac or pinkish flowers, and is found chiefly on chalk downs. At least one other species has been naturalised.

**as-phât, as-phâl-te, as-phâl-tum, as-phâl-tüs, as-phâl-tös, s. & a.** [In Dut. & Ger. *asphalt*; Fr. *asphalte*; Port. *asphaltito*; Sp. *asfalto*; Ital. *asfalto*, *asfalto*; Mod. Lat. *asphaltum*, *asphaltus*; Gr. *ἀσφαλτος* (*asphaltos*), according to Liddell and Scott, not a proper Greek word. Mahn deems it of Phœnician origin; but in Hebrew, which is closely akin to Phœnician, *asphalt* is *חֶמְלָר* (*chém-lar*) (Gen. xi. 8; xiv. 10; Exod. II. 3), which is from quite another root.]

A. *As substantive*:

1. *Ordinary Language* (of the forms asphalt, asphalt, and † asphaltus): Bitumen, Jews' pitch.

1. The mineral substance described under II. 1.

"Unwholesome fogs hang perpetually over the lake, and the stagnant surface is broken by clots of asphaltus, which are constantly habbling up from the bottom."—Milton: *Disc. Voss*, 2d ed., bk. 1, vol. 1, p. 17.

2. The artificially-made substance described under II. 4.

II. *Technically*:

1. *Mineralogy* (of the form asphaltum): A mineral placed by Dana in the Appendix to his Hydro-carbona. Pliny called it *bitumen*, a name still in common use. More specifically, it is compact bitumen. It has been termed also *mineral pitch* and *Jews' pitch*. It is amorphous; the spec. grav., 1—1.8; the colour, brownish black and black; the lustre, pitchy; the odour, bituminous, especially when it is rubbed. There are more fluid and more solid kinds of it. It melts at 90° to 100° C., and burns with a bright flame. It may be dissolved either in whole or in part in oil of turpentine, ether, or alcohol. It consists of oils, vapourable at different temperatures, resins, black or brownish-black substances, and others of a nitrogenous character. It contains about eighty per cent. of carbon, eight or nine per cent. of hydrogen, with varying proportions of oxygen, nitrogen, and ash. It exists in and along the shores of the Dead Sea, which was thence called Lake *Asphaltites* or *Asphaltitis*. (Josephus: *Wars*, bk. iv., ch. viii.) The "slime-pits" with which the "vale of Siddim" was "full," were of asphalt (Gen. xiv. 10). It also constituted both the "slime" and the "pitch" (there is only one substance mentioned in Hebrew) with which the ark of bulrushes designed for the reception of the infant Moses was daubed (Exod. II. 3). It was found at Hit, above Babylon, on the Euphrates, and was the "slime" which the builders of the tower of Babel employed instead of mortar (Gen. xi. 3). It occurs also near the Tigris and in the Caucasus. In America, it is met with in the island of Trinidad, where a large lake of it exists [see A., II. 2]; in Peru, and in California. In Europe it is found in the island of Zante; in Albania and Dalmatia; in Carinthia; in the Harz, in Germany; in France; and abundantly in the Val de Traversa, in the Canton of Neuchâtel, in Switzerland; besides small quantities in our own country, in Derbyshire, Cornwall, and Shropshire. [BUTEMEN.]

2. *Geol.* (chiefly of the forms asphaltum and asphalt). Asphaltum is apparently of vegetable origin. Treating of the pitch lake of Trinidad, Sir Charles Lyell mentions that fluid bitumen is seen to ooze from the bottom of the sea on both sides of the island of Trinidad, and to rise up to the surface of the water. He also states on the authority of Gumilla, that "about seventy years ago" (about 1780?) a spot of land on the west coast of Trinidad sunk suddenly, and was replaced by a small lake of pitch. The celebrated "Pitch Lake" may have had a similar origin. The Orinoco may have for ages been rolling quantities of vegetable matter into the adjacent ocean. Subterranean fires may have converted them into petroleum, which, being forced upwards by similar causes, has been impaasated and transformed into different varieties of asphaltum. (Lyell: *Princip. of Geol.*, ch. xvii., 8th ed., 1850.) It occurs in rocks of various ages, but most abundantly in those of very recent date.

3. *Chem.* (of the forms asphalt and asphaltum). Asphalt is said to consist chiefly of a substance called by Boussingault *asphaltene*. [ASPHALTENE.] Dana, however, considers Boussingault's conclusions as by no means finally established.

4. *Art and Commerce*:

(a) Most of the asphalt of antiquity was brought from the Dead Sea. The Egyptians

used it in embalming their dead. Solid asphalt is still used in Arabia, Egypt, and Persia instead of pitch for ships, and the fluid asphaltum for varnishing and for burning in lamps. It is also used for covering roads and pavements, being smooth, impermeable to water, and durable. Much, however, of the asphalt used for covering streets, pavements, bridges, roofs, &c., in American and European cities, is not that of nature, but is manufactured artificially from bitumen, pitch, and gravel, or from a brown bituminous limestone found near the Jura mountains. When employed for paving, it is melted in large iron caldrons and laid down hot, that it may consolidate into a continuous sheet of impermeable material. It is the same as asphaltic mastic.

(b) A composition of asphalt, lamp black, and oil of spike, or turpentine, used for drawing black figures on dial-plates. (*Nicholson's* (*Webster's* Dict.))

**B. As adjective:** Pertaining to asphalt; consisting of, or at least containing asphalt.

**asphalt-like, a.** Like asphalt.

"... a black lustrous asphalt-like solid, his (Bousstogal's) asphaltene."—*Dana: Mineralogy*, 5th ed., p. 76L

**ās-phāl-tōne, s.** [Eg., &c., asphalt; suff. -ene.]

**Chem.:** Boussingault's name for a substance which consists for the major part of asphalt. Its formula is C<sub>20</sub>H<sub>32</sub>O<sub>2</sub>. It arises probably from the oxidation of petroleum. [ASPHALT, A., II. 3.] (*Foynes: Man. of Chem.*, 10th ed., p. 586.)

**ās-phāl-tio, \*ās-phāl-tick, a.** [Eg. asphalt; -ic.] Pertaining to asphalt; consisting of asphalt; containing asphalt.

"... beyond  
The flowery dale of Sibma clad with vines,  
And Eteülle to the asphaltic pool."  
*Milton: P. L.*, bk. 1.

**ās-phāl-tite, a.** [In Fr. asphaltite; from Gr. ἀσφαλτίτης (asphaltitis).] The same as ASPHALTIC (q.v.). (*Bryant*.)

**ās-phāl-tōs, ās-phāl-tūm, ās-phāl-tūs, s.** [ASPHALT.]

**ās-phō-dēl (Eng.), ās-phō-dēl (Lat.), s.** [In Sw. asfodillrot; Ger. asphodille, afodil, asfodille; Dut. asfodil; Russ. asfalt; Fr. asphodèle; Sp. asfodelo; Port. asphodelo; Ital. asfodelo; Lat. asphodelus; Gr. ἀσφῶδελος (asphōdelos).] Possibly from ā, priv., and φάλλω (sphallō) = to balk, to foil. In this case it would mean a flower which cannot be barked or foiled when in competition with others. Now corrupted into *daffodil*.

**A. Ord. Lang. (of the form asphodel):** The English name of the plants belonging to the genus *Asphodelus* (q.v.). The yellow and white species were introduced into this country during the sixteenth century—the former about the year 1596, and the latter in 1551. Immense tracts of land in Apulia are covered with white asphodel, which affords good nourishment to sheep. The asphodels, being sacred to Proserpine, were used in classic times in funeral ceremonies, and the souls of the departed were supposed by the poets to wander in meadows adorned with these beautiful flowers.

"Resting weary limbs at last on beds of asphodel."  
*Tennyson: The Lotus-eaters: Choric Song*, 2.  
"... flowers were the couch,  
Pansies and violets, and asphodel,  
And hyacinths."  
*Milton: Paradise Lost*, bk. 1x.

**B. Bot. (of the form Asphodelus):** A genus of plants belonging to the order Liliaceae and the section Anthericeae. About eight species are familiar, and are cultivated in English gardens, the best known being *A. luteus*, the Yellow; *A. albus*, the White; and *A. ramosus*, the Branched Lily or Asphodel, called also King's Rod.

YELLOW ASPHODEL.

**ās-phō-dēl-ē-ae, a. pl.** [ASPHODELUS.]

**Bot.:** An old order of plants, separated by Robert Brown from the Liliaceae on account of their possessing a black, crustaceous, brittle seed-coat; but this character has been since deemed unimportant, and the *Asphodeles* are now ranked as a section of the order Liliaceae, or are suppressed even as a section.

**ās-phōd-ēl-ūs, s.** The Latin form of the English word ASPHODEL (q.v.).

**\*ās-phūr-ē-lātes, \*ās-phūr-ē-lā-ta, s. pl.** [Gr. ā, priv., and σφυρηλατος (sphurelatos) = wrought with the hammer; σφύρα (sphura) = a hammer.] An old designation for metals deemed unmeltable. Under it were included diamant, antimony, cobalt, zinc, and mercury.

**ās-phūx-ī-a (Modern Latin), ās-phūx-ŷ (Eng.), s.** [In Fr. asphyxie; Mod. Lat. asphyxia; Gr. ἀσφυξία (asphyxia) = a stopping of the pulse; σφύξις (sphuxis) = the pulse; σφύξω (sphuxō), fut. σφύξω (sphuxō) = to throbb.]

1. Originally: Syncope, fainting.

2. Now. Suspended animation: An interruption of the arterialisatioon of the blood, causing the suspension of sensation and voluntary motion. It may be produced by breathing some gas incapable of furnishing oxygen, by submercion under water, by suffocation, from an impediment to breathing applied to the mouth and nostrils, by strangulation, or by great pressure, external or internal, upon the lungs. If asphyxia continue unrelieved for a short period, it is necessarily followed by death.

**ās-phūx-ī-āte, v. t.** [Mod. Lat. asphyxia, and suff. -ate.] To prevent the arterialization of the blood; to suffocate. (Generally, if not exclusively, in the past participle.)

**ās-phūx-ī-ā-tēd, pa. par.** [ASPHYXIATE.]  
"She died like one asphyxiated."—*Toad & Bowman: Physiol. Anst.*, 1. 305.

† **ās-phūx-ī-ēd, pa. par.** [ASPHYXY, v.]

"Like higher organisms, the bacterial genus are poisoned by the excess and asphyxiated by the defect of oxygen."—*Prof. Tyndall*, quoted in *Times*, 24th May, 1877.

† **ās-phūx-ŷ, v. t.** [From asphyxia, s. (q.v.).]

† **ās-phūx-ŷ, s.** [ASPHYXIA.]

† **ās-pīc, \*ās-pīck, \*ās-pīk, s.** [From Fr. *aspic* = an asp.] [ASP (2).]

† **A. Ord. Lang.:** The same as ASP (2) (q.v.).

**B. Technically:**

1. **Bot.:** The French name of the *Lavandula spica*, the plant which yields the oil of spike. [LAVANDULA.]

† 2. **Gunwery:** A piece of ordnance weighing about 4,250 pounds, and carrying a twelve-pound shot. (*James*.)

3. **Cookery:** A savoury jelly; meat or eggs enclosed in a savoury jelly.

**ās-pīd-ēl-īte, s.** [Apparently from Gr. ἀσπίς (aspis), genit. ἀσπίδος (aspidos) = (1) a small round shield, (2) an asp; δῆλος (dēlos) = clear, manifest, and suff. -ite; Gr. λίθος (lithos) = stone.] A mineral, a variety of Spheene, which again is placed by Dana under Titanite. Aspidelite is of a pale yellowish-green colour, and occurs at Arendal in Norway.

**ās-pīd-ī-ūm, s.** [Gr. ἀσπίδιον (aspidion) = a small shield; ἀσπίς (aspis) = a small round shield, which the involucre of the several species more or less resemble.] Shield-fern. A genus of ferns belonging to the order Polypodiaceae. The aori are roundish, and the involucre covering them orbicular or kidney-shaped. There are ten British species. Some have orbicular reniform involucre fixed by their sinuses, while others have orbicular and peltate involucre. To the former, sometimes called *Lactrea*, belong the *A. Filix mas*, or Blunt; the *A. epiculosum*, or Prickly-toothed; the *A. ocreopteris*, or Heath; and the *A. Thepteris*, or Marsh Shield-fern, with other species more rare: and to the latter, the *A. Lonchitis*, or Rough Alpine; the *A. lobatum*, or Close-leaved Prickly; the *A. aculeatum*, or Soft Prickly; and the *A. angulare*, or Angular-leaved Shield-fern.

**ās-pīd-ōph-ōr-ūs, s.** [Gr. ἀσπίς (aspis), genit. ἀσπίδος (aspidos) = a small round shield, and φέρω (pheros) = bearing, carrying; φέρω (phero) = to bear or carry.] A genus of fishes of the order Acanthopterygii and the family with hard cheeks. The species, six inches long, called *A. Europerus* (Cuv.), the Arched Bull-head, Pogue, Lyrie, Sea-Poacher, Pluck, or Noble, occur in the British seas.

**\*ā-spīe, \*ā-spŷe, v. l.** [ESP.V.] To espy.  
"Oure privete, that no man us aspīe."  
*Chaucer: C. T.*, 13, 996.  
"Til fynally scha gan of bam aspye."  
*Ibid.*, 15, 002-3.

**\*ā-spīe, \*ā-spŷe, s.** [From *aspie*, v. (q.v.).] [SP.V.] A spy.  
"For it were impossible to my wit,  
Though Fame had all the spies  
In all a realm and all apries  
How that yet he should hear all this."  
*Chaucer: House of Fame*, ll. 194.

"Have her my mouth, as thou art his aspye,  
Tel wher he is, or elles thou schalt die."  
*Chaucer: C. T.*, 14, 171, 172.

**\*ā-spīed, \*ā-spŷed, \*ā-spŷyd, pa. par.** [ASPIE, v.]

**\*ā-spīe-ing, \*ā-spŷ-ŷnge, pr. par. & s.** **A. Substant.:** Spying, exploration. (*Prompt Parv.*)

**\*ā-spīle, v. l.** [A.S. *spīllan* = to spill, apoll, deprive of, destroy, kill.] To spill, to destroy, to kill.  
"Hwo so hit leaeth myd gode wille  
Ne may our sūle be a-spīle."  
*An Orison of Our Lord*, xlvi. (ed. Morris), 85-4.

**ās-pīr-ant, a. & s.** [In Fr. aspirant, s. & s.; Port. aspirante; Ital. aspirante, adj.; from Lat. *aspirans*, pr. par. of *aspiro* = to breathe or blow upon.]

**A. As adjective:** Aspiring, aiming at.

**B. As substantive:** One who pants after some object of attainment; one whose desire or ambition it is to gain a certain object.

"In consequence of the resignations which took place at this conjuncture, the way to greatness was left clear to a new set of aspirants."—*Macaulay: Hist. Eng.*, ch. 11.

**ās-pīr-āte, v. l. & t.** [From Lat. *aspiratum*, supins of *aspiro* = to breathe or blow upon: *at* = to or on, and *spiro* = to breathe or blow; Gr. ἀσπείρω (aspeirō) = to pant or gasp; ā, euphonic, and σπείρω (speirō) = to pant or gasp.] [ASPIRE.]

**A. Transitive:** To pronounce with a full breath, the effect being to prefix the sound of *h* to the vowel "aspirated."

**B. Intransitive:** To come forth, or be pronounced with a full breath.

"Where a vowel ends a word, the next begins either with a consonant, or what is its equivalent, for our *w* and *h* aspirate."—*Dryden*.

**ās-pīr-āto, a. & s.** [From Lat. *aspiratus*, pa. par. of *aspiro*.] [ASPIRE.] In Ital. *aspirato* = aspirated.

† **A. As adjective:** Pronounced with a full breath.

"For their being perrious, you may call them, if you please, perspirate; but yet they are not aspirate, i. e. with such an aspiration as *h*."—*Holder*.

**B. As substantive:** A letter pronounced with a full breath, *h*. (For the Greek aspirate see ASPER, 1.)

"With this he mingled the Attic contractions, the broader Doric, and the feebler Æolic, which often rejects its aspirate or takes off its accent..."—*Pope: Prof. to Homer*.

**ās-pīr-ā-tēd, pa. par. & a.** [ASPIRATE, v.]  
"... aspirated checks..."—*Max Müller: Science of Lang.* (6th ed.), vol. II. (1871), p. 163.

**ās-pīr-ā-ting, pr. par.** [ASPIRATE, v.]

**ās-pīr-ā-tion, \*ās-pīr-a-ci-on, \*ads-pīr-a-ci-on, s.** [In Ger. & Fr. *aspiration*; Sp. *aspiración*; Port. *aspiração*; Ital. *aspirazione*; Lat. *aspiratio*, from *aspiro* = to breathe or blow upon (ASPIRE).]

**A. Ordinary Language:**

1. The act of breathing upon or after; the act of aspiring to or after anything.

1. In a literal sense. [See B. (2).]

2. Fig.: The act of panting after, or earnestly aiming at, some high object of attainment. (*Shakesp.: Troilus & Cressida*, iv. 5.)

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marīne; gō, pōt, or, wōrc, wōlf, wōrk, whō, sōn; mūte, ōub, cūre, nūite, cūr, rūle, fūll; trŷ, Sŷrian. ae, oe = ē. ey = ā. qu = kw.

II. The state of being thus breathed upon.

III. That which is breathed upon or after.

- 1. *Lit.*: That which is aspirated. [B. (b).]
- 2. That which one greatly desires to attain, and at which he earnestly aims; that to which one aspires.

"A soul inspired with the warmest aspirations after celestial heights keeps its powers attentive."—Watts

B. Technically:

1. Grammar:

(a) The act of pronouncing a letter with a full breath, and in consequence imparting to it the h sound.

(b) That which is so pronounced; the letter h.

2. *Surg.*: The removal of the liquid contents of a cavity without the admission of air. [ASPIRATOR.]

as-pir-ā-tor, s. [Eng. aspirat(e); -or.]

*Surg.*: An explorative instrument for the evacuation of the fluid contents of tumours, serous and synovial effusions, collections of blood and pus, &c. It resembles a subcutaneous injection syringe, with a terminal snub lateral tube, fitted with stop-cocks.

as-pir-ā-tōr-ŷ, a. [Eng. aspirat(e); suff. -ory.] Pertaining to aspiration or breathing.

as-pīre, \* as-pyre (yr as ir), v. t. & i. [In Fr. aspirer; Prov. Sp., & Port. aspirar; Ital. aspirare; from Lat. aspiro = (1) to breathe or blow upon; (2) to be favourable to; (3) to endeavour to reach: ad = to, and spiro = to breathe, to blow.]

A. Intransitive:

\* I. (Of the form aspyre): To inspire.

"God allowed, assisted, and aspyred them by his grace therein."—Sir T. More.

II. To aim at rising high.

1. *Lit.*: Of persons: To pant after some high object of attainment; to aim at something great socially, politically, intellectually, morally, or spiritually. (It is followed by to, after, or an infinitive.)

"By whose aid, aspiring

To set himself in glory." Milton: P. L., l. 38.

2. *Fig.*: Of things: To rise higher, to tower, to reach a considerable elevation.

"Cross the calm lake's blue shades the cliffs aspyre." Wordsworth: Evening Walk.

B. Transitive: To aim at.

"There is properly an ellipsis of to or after, which being supplied, the verb becomes the ordinary intransitive one.

"That gallant spirit hath aspired the clouds."

Shakespeare: Romeo & Juliet, III. 1.

\* as-pīre-ment, s. [Eng. aspire; -ment.] The same as ASPIRATION (q.v.).

"By which aspiement she her wings displays." Brewer: Lingua, III. 4.

as-pīr-ēr, s. [Eng. aspir(e); -er.] One who aspires.

"The aspirer once attained unto the top,

Cuts off those means by which himself got up." Daniel: Civil War, bk. II.

as-pīr-īng, pr. par., a., & s. [ASPIRE, v.]

A. As present participle: In senses corresponding to those of the verb.

B. As participial adjective:

1. Of persons: Aiming at what is high; ambitious.

"Unquiet and aspiring statemen."—Macaulay: Hist. Eng., ch. v.

2. Of things: Rising to a considerable elevation, towering.

"Or some aspiring rock that shrouds

Its perilous froot in mist and clouds." Wordsworth: Willsa Doe of Rydstone, VII.

C. As substantive:

1. Aspiration after; ambition.

"Proud, art thou met? thy hope was to have reach'd

The height of thy aspiring unopposed." Milton: P. L., bk. VI.

"It is sometimes followed by to.

"... all inclination and aspirings to knowledge and virtue."—Howell: Letters, II. 57.

2. A point, a stop.

"Nor are those so fastidious in pyramidal aspirings, nor curious in architecture or inside glory, as in many lesser towers."—Sir T. Herbert: Travels, p. 211.

as-pīr-īng-ly, adv. [Eng. aspiring; -ly.] In an aspiring manner. (Webster.)

† as-pīr-īng-ness, s. [Eng. aspiring; -ness.] The quality or state of being aspiring. (Webster.)

as-plē-nī-ūm, s. [In Sp. & Ital. asplenio; Lat. asplenium; Gr. ἀσπληνον (asplēnon) = a fern, Spleenwort; ἀ, priv., and σπλην (splēn) = the spleen, in Lat. also splen; the asplenium having been supposed to be a remedy for diseases of the spleen.] Spleenwort. A genus of ferns belonging to the order Polypodiaceae. Ten species occur in Britain, among which are the A. Ruta muraria, or

ASPLENIUM. 1. Asplenium Septentrionale. 2. Under surface of a frond. 3. Asplenium Trichomanes. 4. Under surface of a pinna.

Wall-rue; A. Trichomanes, or Common Wall; the A. Adiantum nigrum, or Black-stalked; and the less common A. septentrionale, or Forked Spleenwort.

† as-pōr-tā-tion, s. [Lat. asportatio, from asporto = to carry away: abs = from, and porto = to carry.]

1. Ordinary Language: The act of carrying away; the state of being carried away.

2. Law: The removal of goods with the intention of stealing them. If a person, designing to steal silver plate, be surprised when he has done no more than remove the plate from the chest in which it was and put it on the floor, this is enough to constitute the felonious offence of larceny. (Blackstone: Comment., bk. IV., ch. 17.)

\* as-pre, a. [ASPER.]

as-prē-dō, s. [Lat. aspredo = roughness; asper = rough.] A genus of fishes belonging to the order Malacopterygii Abdominales, and the family Siluridae. They are the only known fishes which have no mobility in the operculum. They have six or eight barbels. They are akin to the famous Silurus electricus, the Electric Silurus or "eel," of the Nile and Senegal rivers.

\* as-pre-ness (pre as pēr), s. ASPER-NESS.]

as-prō, s. [Gr. ἄσπρος (aspros) = Lat. asper = rough.] A genus of spiny-finned fishes belonging to the Percidae, or Perch family. They inhabit the Rhone, Danube, &c.

\* a-spīe, v. t. [ASPIE, v., ESPY.]

\* a-spīe, s. [ASPIE, s., SPY.]

\* a-spyre, (yr as ir), v. t. [ASPIRE.]

\* a-squāre, adv. [Eng. a = on; square (q.v.).] On the square; at a safe distance.

"Yi he hym myght fynd he cothing wold hym spare,

That herd the pardoner wele, and held him better asquare." Frob. to Hist. of Beryn, 59L (Boucher.)

a-squat, adv. [Eng. a = on, and squat (q.v.).] In a cowering manner. (Richardson: Clarissa, I. 101.)

a-squint, adv. [Eng. a = on, and squint (q.v.).] With a squint; with the eye directed to one side, obliquely, not in the direct line of vision.

"A single guide may direct the way better than five hundred, who have contrary views, or look asquint, or about their eyes."—Swift.

as (I), \* asse (pl. as-sēs, \* as-sēn,

\* as-yn-is), [A.S. assa = a he-ass; asse = a she-ass; also, asal, esol, eosol, eosul = an ass without distinction of gender. In Sw. asna; Dan. asen, esel = he-ass; aselinde = she-ass; O. Icel. asni, esne; Dut. ezel; Ger. esel; O. H. Ger. esil; Goth. asilus; Lith. asilas; Boh. osel; Pol. osiol; Russ. ocel; Gael. asal, as; Irish asan; Wel. asyn; Arm. asen;

Mod. Fr. âne, contracted from O. Fr. asne, asen, ase; Prov. aze, azne; Sp. asno = a he-ass, asna = a she-ass; Port. asno; Ital. asino = a he-ass, asina = a she-ass; Lat. asinus = a he-ass, asina = a she-ass.]

1. *Lit.*: A well-known mammalian quadruped. It is the Equus asinus of Linnaeus, and is now sometimes made the type of the genus or sub-genus Asinus. It is known from the most nearly allied animals by its long ears, the tuft at the end of the tail, and the black stripe on the shoulders. Its native country seems to be Central and Southern Asia, where troops of it are still seen, though whether aboriginal or descended from domesticated individuals escaped from servitude it is not easy to determine. [WILD ASS.]

"No he nedde stede ne no palefrey

Ac rod vppe on asse." Passion of Our Lord (ed. Morris), 87, 68.

"And Abraham rose up early in the morning, and saddled his ass."—Gen. xxii. 3.

"The sexes are often distinguished by the terms he-ass and she-ass.

"... and he had sheep and oxen, and he-asses . . . and she-asses."—Gen. xii. 16.

"The young of the ass is called an ass's colt (Gen. xlix. 11; also Matt. xxi. 5)."

"The wild ass is the same species as the domesticated one, but very unlike it in character, being high-spirited and untamable.

"Who hath sent out the wild ass free? or who hath loosed the bands of the wild ass?—Job xxxix. 5; see also verses 6-8.

(For a fossil ass or zebra see ASINUS.)

2. *Fig.*: A person destitute of understanding, the deficiency of the ass in this respect being popularly exaggerated, from the fact that the specimens of the animal seen in this country are much under par.

"That such a crafty devil as is his mother

Should yield the world to this ass!" Shakespeare: Cymbel, II. I.

"... as they think our Doctors asses to them, we'll think them asses to our Doctors."—Pope: Letter to Digby (1717).

ass-camel. [ALLO-CAMELUS.]

ass-head, s. A person of dull intellect, a blockhead.

"Will you help! an ass-head and a cockcomb and a knave, a thin-faced knave, a gull!"—Shakespeare: Twelfth Night, v. I.

ass-like, a. Resembling an ass. (Sidney.)

ass's ear, s.

Conchol. Hallotis asininus: A fine iridescent shell used in the manufacture of buttons and for inlaying in the darker woods.

\* as (2). [ASH.] (Scotch.)

\* as (v). [ASK.] To ask.

as-sa-foot-ī-dā (as as ō). [ASAFETIDA.]

† as-sa-gāl, † as-sa-gāy, s. & a. [ASSEGAI.]

as-sa-gāl, v. t. [ASSEGAI, v.]

as-sa-gāled, pa. par. [ASSEGAI, v.]

as-sai, adv. [Ital. = enough, much, very; Fr. assez = enough; from Lat. ad = to, and satis = enough.]

"Music: Very; as largo assai = very slow; presto assai = very quick.

as-sā'il, \* as-sā'ile, \* as-sā'yle, \* a-sā'ile, \* a-sā'y-īl, v. t. [In Fr. assaillir; O. Fr. assailer, assillir; Prov. assalhir; Ital. assillire; Low Lat. assilio, assailio; Class. Lat. assilio = to leap, spring, or jump upon; ad = to, and salto = to leap, spring, bound or jump.] [ASSAULT.]

I. *Lit.*: To leap or rush upon.

1. Of persons: To rush upon a person with the intention of doing him some more or less serious bodily injury.

"To assa'd a wearied man were shame,

And stranger is a holy name." Scott: Lady of the Lake, IV. 31.

2. Of armies, navies, forts, or communities: To attack with military or naval forces, with the view of overcoming, capturing, slaying or plundering the people on whom the warlike aggression is made. [ASSAULT.]

"... he ne thoeth that no vyeed ons wondy our our mighte he not adnerari ou assaill that we ne mighte overcome."—Apenbis (ed. Morris), p. 170.

"Remember, if He guard thee and secure,

Who'er assails thee, thy success is sure." Cowper: Exposition.

bōil, bōy; pōūt, jōwl; cat, cell, chorus, phin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f -clan, -tian = shan. -clon, -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -sious = shūs. -ble, -dle, &c. = bel, del.

II. Figuratively:

1. Of persons:

(a) To attack a person without doing him bodily violence; as by bringing a true or false charge against him; or ridiculing him or his work. (Used lit. or fig.; in the latter case, a thing, instead of a person, may make the attack.)

"My gracious lord, here in the parliament let us assail the family of York." Shakespeare: 2 Henry VI., l. 1. "Diadeling life, desiring leave to dye, she found her selfe assailed with great perplexity." Spenser: F. Q., l. x. 22.

(b) To attack a person's moral principles by taking means fitted to seduce him or her from the paths of virtue, or from his or her immediate duty.

"... and ayre the like vice nighte huer ha eighth that he is most assaid." Avenbute (ed. Morris), p. 157. "How have I fear'd your fate! but fear'd it most, when love assaid of you on the Libyan coast." Dryden: Virgil; Aeneid vi. 941.

2. Of things:

(a) To attack by word or writing. "All books he reads, and all he reads assails." Pope: Essay on Criticism, 516. (b) To molest.

"Nature haah'd in slumber sweet, No rude noise mine eare assailing." Cowper: Watching with God, No. 2.

as-sail-a-ble, as-sail-a-ble, a. [Eng. assail; -able.] Able to be assailed.

"There's comfort yet, they are assailable." Shakespeare: Macbeth, iii. 2.

as-sail-ant, a. & s. [Eng. assail; -ant. In Fr. assaillant.]

A. As adjective: Assailing; attacking. "And as an evening dragon came, Assailing on the perched roosts And nests in order ranged Of tame viliatle fowl." Milton: Samson Agonistes.

B. As substantive: One who assails or attacks a person or persons, or a thing.

1. One who attacks a person. (In this sense, it is properly opposed to a defendant.)

"The Duke of Saint Albans, with the help of his servants, beat off the assailants." Macaulay: Hist. Eng., ch. xxiii. 2. One who assails an enemy in a military way.

"It is ten to one," says a late writer on the art of war, "but that the assailant who attacks the enemy in his trenches is always victorious." Goldsmith: Essays, iv.

3. One who assails anything, as a philosophy, a religion, &c.

"... both the Christian assailants, as well as the defenders, of paganism..." Grote: Hist. Greece, vol. 1, pt. 1, ch. 1.

as-sail'ed, as-sayld, pa. par. [ASSAIL.]

as-sail'er, s. [Eng. assail; -er.] One who assails; an assailant.

"Palladius heated so pursued our assailers, that one of them slew him." Sidney.

as-sail'ing, pr. par. [ASSAIL.]

"She will not stay the siege of loving terms, Nor bide th' encounter of assailing eyes, Nor ope her lap to saint-astor'd gold." Shakespeare: Romeo and Juliet, l. 1.

as-sail'ment, s. [Eng. assail; -ment.] The act of assailing, an assault; an attack of disease, a malady.

"His most frequent assailment was the headache." Johnson: Life of Pope.

as-sa-mar, s. [Lat. ass(us) = roast, and amar(us) = bitter. (N.E.D.)]

Chem. A bitter substance contained in the brown oil obtained by the destructive distillation of cane sugar.

as-sa-pán, as-sa-pán'le, s. [Native American name.] The name given to a flying squirrel (Pteromys volucella). It inhabits Canada and the United States. [Pteromys.]

as-sar'i-ús, s. [Lat. assarius; Gr. ἀσάριον (asarion); both from Lat. as.] [As.]

In Classic times: A copper coin equal about 3½ farthings. In Matt. x. 29 it is translated "farthing."

as-sart', v. t. [Mod. Fr. essarter; O. Fr. essartier, essartier; Prov. essartier = to grub up trees or bushes; Low Lat. essarto, supine essartum; essartio, euph. essartitum; Class. Lat. sarrio, sup. sarritum; sarrio, supine sarritum = to hoe, to weed.]

1. Gen.: To root up trees or bushes.

"The king granted to him free chase, and free warren, in all those his lands, &c. and also power to assart his lands." Ashmole: Berkshire, ii. 425.

2. Spec. (Old Law): Unauthoritatively to root up the trees which are required in a forest to furnish thickets or coverts.

as-sart', a. & s. [Mod. Fr. (as subst.) essart; O. Fr. (as subst.) essart, essartage, assurtement.] [ASSART, v.]

A. As adjective: Cleared; reclaimed. Assart Lands: Forest lands reclaimed, or cleared of wood, &c., and put into a state of cultivation. (Boucher.)

Assart rents: Rents paid for such lands. (Hutchinson's Hist. Durham, ii. 410; Ibid., iii. 60; and his Hist. Cumb. and Westm., l. 382.) (Boucher.)

B. As substantive:

1. A piece of land cleared. (Ash.) 2. A tree plucked up by the roots. (Ash.) 3. Old Law: The offence against the forest laws of plucking up by the roots the trees requisite to furnish thickets or coverts.

as-sás-sín, As-sás-sín, s. [In Ger. Assassinen (pl.); Fr. & Prov. assassin; Sp. asesino; Port. & Ital. assassino (all sing.); Arab. Haschischin = as substantive, a member of the sect described under No. 1; as adj. inspired by haschisch, an intoxicating liquid or drug called in India bang, prepared from the powdered leaves of Cannabis sativa, or Common Hemp. Many Eastern desperadoes, when they wish to do some nefarious deed, deaden what remnants of conscience they possess and stimulate their passions by means of this bang. (BHANG.) Some etymologists derive assassin from Hassan ben Sabah, the founder of the order (L, 1).]

I. Literally: 1. Hist.: A military and religious order which constituted an offshoot from the Ismaili branch of the great Shi'ah sect of Mohammedans. It was founded in A.D. 1090 by Hassan ben Sabah, at the hill fort of Alamoot, in Persia. A section of them afterwards removed from Persia to Mount Lebanon, where they came in contact with the crusaders, and through them acquired infamous notoriety in Europe. By the rules of their founder, they were bound implicitly to carry out the commands of their chief (popularly known in the West as the "Old Man of the Mountain"), even to the extent of murdering any king or inferior person in Europe, Asia, or anywhere, with whom he might have a quarrel. Several proud potentates are said to have paid him black mail for safety's sake; but the gallant Knights Templars had more of a kingly spirit, and defied his power. The Mongols made a general massacre of the Persian branch of the order in 1256, and Sultan Bibars all but rooted out the Syrian offshoot in 1270, but traces of them are said still to exist in both countries, especially at Kalat el Masryad, in Persia. Despite their origin, the Assassins were not pure Shi'ahs in faith; their religion was a mixture of Magianism, Judaism, Christianity, and Mohammedism. There was a certain resemblance between their tenets and those of the Druse in Mount Lebanon.

2. A ruffian who, either from personal animosity or from having been hired to do the atrocious deed, murders one by open violence or by secret or sudden assault.

"... of all the Jacobites, the most desperate assassin not excepted..." Macaulay: Hist. Eng., ch. xvii.

When, on the 9th Thermidor, 1794, the French National Convention would no longer allow Robespierre to domineer over it, and would not permit him even to defend himself, almost the last words he addressed to it before his arrest were these, "President of assassins, for the last time I ask liberty to speak."

II. Fig.: One who criminally destroys the polity of his country.

"The hired assassins of the commonwealth!" Thomson: Liberty, pt. v.

assassin-like, a. Like an assassin.

"... the Syrian king, who, to surprise One man, assassin-like, had levied war, War unproclaim'd." Milton: P. L., bk. xi.

as-sás-sín, v. t. [From the substantive. In Fr. assassiner; Sp. asesinar; Port. assassinar; Ital. assassinare.] The same as ASSASSINATE (q.v.).

"Can God be as well pleased with him that assassin his parents, as with him that obeys them?" Billingfoote: Sermon, p. 602.

as-sás-sín-a-cy, s. [Eng. assassin; -acy.] Assassination. (Lit. & fig.)

"This spiritual assassination, this deepest dye of blood being most anatomically designed on souls." Hammond: Sermon.

as-sás-sín-ate, v. t. & i. [Eng. assassin; -ate.] [ASSASSIN, v.]

A. Transitive: 1. To murder by open violence or by secret and sudden assault.

"What could provoke thy madness, To assassinate so great, so brave a man?" Phillips.

Sometimes it is only half-seriously applied to the inferior animals, as Cowper does it to a tame bullfinch killed by a rat.

"Oh, spare Maria's grief! Her favourite, even in his cage, (What will not hunger's cruel rage!) Assassinated by a thief." Cowper: Death of Mrs. Throckmorton's Bullfinch.

2. Exceedingly to maltreat. "Such usage as your honourable lords Afford me, assassinated and betrayed." Milton: Samson Agonistes.

B. Intransitive: To perpetrate murder.

"You who those ways feared of late, Where now no thieves assassinate." Sandys: Paraphrase of Sacred Songs; Judges v.

as-sás-sín-ate, s. [ASSASSINATE, v.]

1. An assassin. "The old king is just murdered, and the person that did it is unknown—Let the soldiers seize him for one of the assassins, and let me alone to accuse him afterwards." Dryden.

2. An assassination; a murder. "Were not all assassinations and popular insurrections, wrongfully chastised, if the meanness of the offenders indemnified them from punishment." Pope.

as-sás-sín-ã-téd, pa. par. & a. [ASSASSINATE, v.]

as-sás-sín-ã-tíng, pr. par. [ASSASSINATE, v.]

as-sás-sín-ã-tion, s. [Eng. assassin; -ation.]

The act of assassinating; the act of murdering another by open violence or secret and sudden assault; the state of being assassinated.

"The English regard assassination, and have during some ages regarded it, with a loathing peculiar to themselves." Macaulay: Hist. Eng., ch. xxi.

as-sás-sín-ã-tór, s. [Eng. assassin; -ator. In Port. assassinador.] One who assassinates; an assassin. (Johnson.)

as-sás-sín-ous, a. [Eng. assassin; -ous.] Murderous. (Cockeram.)

as-sá-tion, a. [From Lat. assatum, sup. of assa = to roast or broil; Gr. ἀσσω (assó) = to dry up.] Roasting.

"The egg expiring less in the elixation or boiling; whereas, in the assation or roasting it will sometimes abate a drachm." Brown: Purgar Errors.

as-sáult, as-sáult, as-sáute, a-sáught (sh silent), a. [In Fr. assaut; O. Fr. assault, assolt; Prov. assalt, assaut; Sp. assalto; Port. & Ital. assalto; Low Lat. assaltus; Class. Lat. assultus = a leaping upon an attack; ad = to, and saltus = a leaping; saltio = to leap.] [ASSAIL.]

A. Ordinary Language:

I. Lit.: A violent attack made upon any person, persons, or place, with the hands or with material weapons. [B., I, 2, 3.]

"And by assaut he wan the cite after." Chaucer: C. T., 991.

"But whence there was made an assault of the heathen men." Wycliffe: Dedes xiv. (Richardson.)

"And when there was an assault made both of the Gentiles, and also of the Jews with their rulers, to use them despitfully and to stone them." Acts xiv. 5.

"They resisted his assaults desperately, and obliged him to turn the siege into a blockade." Arnold: Hist. Rome, ch. xlv.

II. Figuratively:

1. (In which the attacking force consists of a person or persons.)

(a) An attack by means of a charge against one; abusive language, calumny, &c.

"After some unhappy assaults upon the prerogative by the parliament, which produced its dissolution, there followed a composure." Clarendon.

(b) An attack upon one's virtue, which may be by seduction rather than violence.

(c) An attack upon a thing, as upon a religion, an opinion, &c.

"Theories built upon narrow foundations are very hard to be supported against the assaults of opposition." Locke.

fate, fát, fáre, amidst, whát, fáll, father; wê, wêt, hère, camêl, hêr, thêre; pine, pít, síre, sír, maríns; gô, pôt, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, ûnte, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = é. ey = ä. qu = kw.

2. (In which the attacking force is a thing.) An adverse natural force brought to bear upon a person or thing.

"... and unshaken bears the assault Of their most dreaded foe, the strong south-west." Wordsworth: Excursion, bk. v.

B. Technically:

1. Mil.: A furious effort to carry a fortified post, camp, or fortress, where the assailants do not screen themselves by any works. (James.) It is the appropriate termination of a siege which has not led to the capitulation of the garrison.

"On the 8th of September [1855] after a furious bombardment of three days, the Allies assaulted the town [Sebastopol] in five places, and, though repulsed in four, the assault of the French attack on the Malakoff completely succeeded."—Times: Annual Summary (1855).

To give an assault: To attack any post. (James.)

To repulse an assault: To cause the assailants to retreat, to beat them back. (Ibid.)

To carry by assault: To gain a post by storm. (Ibid.)

2. Fencing, etc. Assault of Arms: An attack on each other (not in earnest) made by two fencers to exhibit or increase their skill. (Sometimes it is used in a wider sense for other military exercises.)

"The 26th annual assault of arms of the Honourable Artillery Company was held last evening. ... Boxing, fencing, sticks, bayonet exercise, cavalry sword exercise, &c., composed the programme."—Daily Telegraph, March 29, 1871.

3. Law: A movement which virtually imposes a threat to strike one, as when a person raises his hand over his cane in a menacing manner, or strikes at another but misses him. In common law it is not needful to touch one to constitute an assault. When a blow actually takes effect the crime is not simple assault, but assault and battery. If two people fight in private, they are held to have committed assaults on each other; but if they do so in public, they are chargeable with affray. [See AFFRAY.] A person assaulting another may be prosecuted by him for the civil injury, and may also be punished by the criminal law for the injury done to the public. (Blackstone: Comment., bk. iii, chap. 8; iv, chaps. 11, 15.)

¶ In Scots Law the word assault has a somewhat more comprehensive sense than in England, the word battery not being used; but what is here called assault and battery is in Scotland regarded simply as a more aggravated form of assault.

as-sault, \*as-saut, v.t. [O. Fr. assualter. In Sp. asaltar, assaltar, assaltar; Ital. assaltare; Low Lat. assalto.] [ASSAULT, s.]

I. Of persons:

1. To make a hostile attack upon a person, a people, a fortification, a house, &c., using for the purpose material weapons.

"Struck at the sight, the mighty Ajax glows With thirst of vengeance, and assaults the foe." Pope: Homer's Iliad, bk. v, 158-7.

"... and assaulted the house of Jason."—Acts xvii, 5.

2. To attack one in another way than by warlike weapons; to do so, for instance, by making a charge against him, calumniating him, writing against him, &c.

"The mercy I do not assault you with a number of original sonnets and epigrams."—Pope: Letter to Dr. Cromwell, March 7, 1705.

II. Of things: To do that which is fitted to injure (applied to things rather than persons), to threaten with injury.

"Before the gates, the cries of babes new-born, Whom fate had from their tender mothers torn, Assault his ears." Dryden.

as-sault-a-ble, a. [Eng. assault; -able.]

Able to be assaulted.

A breach, be it made never so assaultable, having many hands to defend it with any valour, lightly is never entered."—Sir Roger Williams: Actions of the Low Countries, p. 106.

as-sault-ant, a. & s. [Eng. assault; -ant. Ital. assaltante.]

1. As adj.: Leaping upon, assaulting, assailing.

2. As subst.: An assailant; a term applied to a predatory animal when represented on the escutcheon as if leaping on its prey. (Gloss. of Her.)

as-sault-ed, pa. par. [ASSAULT, v.]

"So long as the assaulted person is in actual danger."—Jeremy Taylor: On Forgiving Injuries.

as-sault-er, s. [Eng. assault; -er. In Ital. assaltore.] One who assaults another; an assailant.

"Neither liking their eloquence, nor fearing their might, we assailed few words in a just defence able to resist many unjust assaillors."—Sidney.

as-sault-ing, pr. par. [ASSAULT, v.]

\*as-saut, s. [ASSAULT, a.]

as-say, \*as-sā'ye, \*as-sā'ic, s. [In Fr. essai; O. Fr. assai, assie; Prov. essay; Sp. ensayo; Ital. saggio; Lat. exagium = a weighing, a weight; exigo, sup. exactum = to drive out, . . . to examine; ex = out, and ago = to lead or drive; Gr. ἡράγιον (heragion) = a weight used in later times; ἡράγιον (heragion) = to examine.] [ASSAY, v., and ESSAY, s. & v.]

A. Ordinary Language:

1. The act of trying or experimenting; a trial, an experiment, an attempt, essay.

"Quod tunc chanoun, "Yet wol I make assay." Chaucer: C. T., 13, 177.

"... never more To give the assay of arms against your majesty."—Hornet: Utopia, ii, 2.

\*2. The state of being tried; trial, suffering, hardship.

"For they were the prouest knights on grownd, And oft approved in many hard assay."—Spenser: F. Q., iii, 11, 15.

\*3. The result of such trial or experiment; spec., purity, value.

"... beholding all the way The goodly workes, and stones of rich assay."—Spenser: F. Q., iv, x, 15.

4. The thing subjected to trial or examination. (B., 1, 2.)

¶ Originally assay and assay were the same word, but now assay is obsolete, except for the testing of metals, while essay is used for bodily or mental attempts. [ESSAY.]

\* At all assays = in every way.

"He is a frende of all assays."—Hornet: Utopia (1590).

"At all assays, you bear a heart true bent."—Taylor: Works (1650). (Halliwell: Contr. to Lexic.)

B. Technically:

I. Chemistry:

1. The determination what percentage of a metal, especially of a precious one, is in any particular ore or alloy. An ordinary or a simple assay is designed to ascertain how much a compound of gold or silver varies from the prescribed standard, whilst a parting assay is designed to separate the two metals from each other in the specimen examined, that the proportion in the bullion of which it is a fair sample may be ascertained. In a gold parting assay, the amount of silver in the gold is ascertained; and in a silver parting assay, the amount of gold in the silver. [ASSAYING, TOUCH.] The analysis, or assay, of an alloy of gold and copper is usually made by cupellation with lead. The weight of the button remaining on the cupel gives directly the amount of gold in the alloy after certain corrections similar to those required in the case of silver. (Graham: Chem., 2nd ed., vol. ii, p. 362.)

2. The alloy or metal assayed.

"... like an assay fused before the blow-pipe."—Darwin: Voyage round the World, ch. iii.

II. Law: The examination or testing of the weights and measures of this or any other country by a fixed standard.

"You shall . . . make the assays of these moneys of gold and silver, and truly report if the said moneys be in weight and fineness according to the standard weights for weighing and testing the coins of the realm."—Oath administered to the jury of goldsmiths sworn to Test the Pys. (Times, Friday, July 17, 1874.)

assay-balance, s. A delicate balance used in assaying. It is furnished with a rider (q.v.).

assay-furnace, s. A furnace used in assaying.

assay-master, s. An assayer; an officer appointed to ascertain the amount of the two precious metals in coins and bullion.

as-sā'y, \*as-sā'y, v.t. & i. [In Mod. Fr. essayer; O. Fr. assier, assayer; Prov. assaiar; Sp. ensayar; Port. ensaiar; Ital. assaggiare = to try, to attempt; to assay a metal; saggiare = to try, to essay, to taste.] [ASSAY, s.; ESSAY, v.]

A. Transitive:

I. To try anything or any person.

1. Of things:

(a) In the same sense as No. II. (q.v.).

\* (b) To attempt anything; to try its practicability by the test of experience.

"Ulysses, and his brave maternal race, The young Atolych, assay the chase." Pope: Homer's Odyssey, bk. xii, 801-2.

\*2. Of persons: To try a person's strength, courage, skill, and fortitude by attacking him.

"But, seeing thou fall'st on me so luckily, I will assay thee: so defend thyself!"—Shakespeare: 1 Hen. IV., v, 4.

\* II. To proffer.

"Whom thus afflicted when ad Eve beheld, Desolate where she sat; approaching nigh, Soft words to his fierce passion she assu'd." Milton: P. L., s. 587.

III. Chem., Metall., &c.: To subject a ring, a coin, an alloy, &c., to examination, trial, or experiment, with the view of ascertaining what its component parts are, and especially, in the latter case, what proportion of the precious or other metals enters into its composition.

B. Intrans.: To attempt, to endeavour.

as-sā'yed, pa. par. [ASSAY, v.]

as-sā'y-er, s. [Eng. assay; -er. In Dut. & Fr. essayeur.] One who assays bullion. Spec., an officer of the Mint, whose function it is to try the purity of the precious metals used for coin.

"... a confidential man of business, a practical miner and assayer, would have been all that was required."—Darwin: Voyage round the World, ch. xv.

as-sā'y-ing, \*as-sā'i-yinge, pr. par. & s. [ASSAY, v.]

As substantive: The act or process of subjecting coins, quantities of bullion, or alloys, to examination and experiment, with the view of ascertaining what proportion of each of the precious metals they contain. The proportion in gold coin in the British Isles is  $\frac{23}{24}$  of gold and  $\frac{1}{24}$  of alloy. This is called the standard. That it is actually reached is proved by the Trial of the Pys, which from time to time takes place. [P.V.] The process adopted to assay the precious metals is cupellation (q.v.). The assayer's work has been much facilitated by the discovery that the application of sulphuric acid can separate gold and silver. The French call cupellation the dry method of assaying, and adopt another of their own called the humid one. [ASSAY.]

"This method is also sometimes used in the assaying of coins to afford an indication of the quantity of silver required in the cupellation."—Graham: Chem., 2nd ed., vol. ii., p. 362.

\*as-sā'yle, v.t. [ASSAIL.]

\*assch-ën, s. pl. Old form of ASHES.

"His eyes hole a, grisly to behold; His bowe falwe, and pale as aschen cold." Chaucer: C. T., 1, 365-66.

Assch-réint, \*Assh-réint, Assh-réynt, pa. par. of a verb, presumably aschrenche, aschrenche. [A.S. scerenca = to deceive.] Deceived.

"A dame, he saide, Ich was aschrencht, Ich wende thou haddest ben adreint."—Spenser: Faerie Queene, 1, 488.

"Ac so Ich fynde in the booke Hy were aschreynt in her crook."—Alisaunder, 4, 819.

\*as-sé-cle (cle = kel), s. [Lat. asscula, asscula = an attendant, a follower, a hanger-on, a sycophant; assessor = to follow on, to pursue.] An attendant, a follower.

"It mattereth not with the pope and his assces, of what life and conversation their sadta be."—Sheldon: Miracles of Antichrist (1816), p. 325.

\*as-séc-tā-tion, s. [Lat. assectatio; from assessor = to accompany to attend; assessor = to follow on.] Attendance on one, waiting upon one. (Johnson.)

\*as-sé-cū-r-ance, s. [In Sw. asscurans; Ger. asscuranz; Port. seguranga; Low Lat. asscurantia = assurance.] Assurance.

"What may be thought of those asscurances which they give, in the Popish Church, to all such as die in the same, with the copious furniture of their sacraments, and their own merits!"—Sheldon: Miracles of Antichrist, p. 320.

\*as-sé-cūr-ā-tion, s. [Low Lat. asscuratio, from asscuro.] [ASSCURE.] Assurance, making sure. [ASSURANCE.]

"How far, then, reaches this asscuratio? So far as to exclude all fears, all doubting and hesitation?"—Bp. Hall: Rem., p. 268.

\*as-sé-cū-re, v.t. [Low Lat. asscuro, from ad = to, and securus = secure; cura = care.] To make one sure or certain; to give one assurance. (Bullokar: Dict., 1656.) [ASSURE, SECURE, SURE.]

bōll, bōy; pōut, jōwl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -clan, -tian = shān. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -sious, -cious = shūā. -ble, -dle, &c. = bēl, dēl.

• **as-sē-ōū-tion**, s. [Lat. *ad* = to; *secutio* = a following, pursuing: *ad* = to, and *sequor* = to follow.] The act of acquiring or obtaining.

"By the canon law, a person, after he has been in full possession of a second benefice, cannot return again to his first, because it is immediately void by his assecution of a second."—*J. F. Forestry*.

• **ās-sē-ōū-tion**, s. [Lat. *assēō* = assessor.] A term in the Scottish law, importing a settlement, or tenure in landed property for a long term, being generally coupled in deeds and other law instruments of writing with tacks, assignations, translations, &c. (*Spottiswoode: On Stiles*, p. 272 et seq., and p. 402.) (*Boucher*). (See example under **ASSENT**.)

• **ās-sē-gāi**, † **ās-sā-gāi**, † **ās-sā-gāy**, \* **zā-gāye** (*Caffre*), s. & a. [In Fr. *zagaie*; Sp. *azagaya*; Port. *zagaia*, *zagaglia* = javelin; Arab. *alkhazegah*.] A missile weapon, like a javelin, used by the Caffres, Zulus, and other South African tribes in war. It is of some

considerable length. There is also a short stabbing assegai.

"Alert to fight, a thirst to slay,  
They shake the dreaded assegai"  
*Beratford de Rodcliffe* (*Times*, March 20, 1879.)

¶ It is sometimes used in connection with other nouns than those of South Africa.

"Then a terror fell on the King Bugar,  
And the Libyan kings who had join'd his war;  
And their hearts grew heavy, and died away,  
And their hands could not wield an assegai."  
*Hemans: The Chieftain's Funeral Procession*.

**B. As adjective:** Pertaining to or produced by the spear described under **A**.

"No less than thirty-seven assegai wounds . . ."  
*Pictorialistburg Correspondent of the Times*, 5th April, 1879.

• **ās-sē-gāi**, \* **ās-sā-gāi**, v. t. [From the substantive.] To pierce with an assegai.

"Many were drowned, many assegaid, a few shot."  
—*Times*, March 6, 1879.

• **ās-sē-gāied**, † **ās-sā-gāied**, pa. par. [ASSEGAI, v. t.]

• **ās-sēize**, v. t. [SEIZE.]

• **ās-sēm-blāge**, s. [Fr. *assemblage*.] † 1. The act of assembling. † 2. The state of being assembled.

"With innocence and meditation joined,  
In soft assemblage."  
*Thomson*.

3. The persons or things assembled. (a) The persons assembled; a gathering of individuals; an assembly.

"Castile enjoyed the supremacy in that great assemblage of races."  
—*Macaulay: Hist. Eng.*, ch. xxiii.

(b) *Of things assembled:*

"The bases of an assemblage of pyramids."  
—*Herschel: Astron.*, § 277.

• **ās-sēm-blānce** (1), \* **ās-sēm-blānce**, s. [Eng. *assembl(e)*; *ance*.] Assembling, assembly.

"He chaunt to come, where happily he abide  
A rout of many people farre away;  
To whom his course he hastily applide,  
To wett the cause of their assemblance wide."  
*Spenser: F. Q.*, v. iv. 21.

• **ās-sēm-blānce** (2), s. [Lat. *ad* = to, and Eng. *semblance* (q. v.).] Semblance, resemblance.

"Care I for the limb, the thews, the stature, haik,  
and his assemblance of a man!"  
—*Shakespeare: Henry IV.*, iii. 2.

• **ās-sēm-blā-tion**, s. [ASSEMBLY, s.]

• **ās-sēm-ble**, \* **ā-sēm-ble**, v. t. & i. [In Fr. *assembler*; *ensembler* = together; Prov. *assembler*; from Lat. *stimul* = st once, together, at the same time. Cognate with Dut. *verzamen* = . . . to assemble; *zamelen* = to collect; from *samen* = together; Ger. *sammeln* = to assemble; *zusammen*, *beisammen* = together.]

**A. Transitive:**  
\* 1. To compare, to liken. (*Latimer: Works*, 1. 188.)

2. To convene, to call together. (Used both of persons and things.)

¶ (a) Sometimes it is followed by two objectives—the one of the person or being for whom the gathering is brought together, and the other of the persons or things assembled. But before the first objective there is really an ellipsis of *to or for*.

"Then said the king to Amasa, *Assemble* me the men of Judah within three days, and be thou here present."  
—*3 Sam.*, xx. 4.

(b) It is sometimes used reciprocally.

"And all the men of Israel *assembled* themselves unto King Solomon at the feast of the month Ethanim . . ."  
—*1 Kings*, viii. 2.

**B. Intransitive:**  
1. *Gen.*: To come together, to meet together, to gather, to congregate.

"They, however, still *assembled* and prayed in private dwellings . . ."  
—*Macaulay: Hist. Eng.*, ch. xvi.

\* 2. *Spec.*: To meet in a hostile manner, to encounter.

"Now Eulac and Tholomeus tares has *assembled*."  
*Joseph of Arimathea* (ed. Skeat), 520.

\* **ās-sēm-blē**, s. Old spelling of **ASSEMBLY**. (*Early English Alliterative Poems*.)

• **ās-sēm-ble** (**bled** = **beled**), pa. par. & a. [ASSEMBLE.]

"Lordynges, the needes for whiche we be *assembled* in this place, is ful hevy thing . . ."  
—*Chaucer: Tale of Melibee*.

"*Assembled* armies oft have I beheld;  
But ne'er till now such numbers charged a field."  
*Pope: Homer's Iliad*, bk. ii., 968-9.

• **ās-sēm-blēr**, s. [Eng. *assembl(e)*; *-er*. In Fr. *assembleur*.] 1. One who convenes an assembly, or brings a number of people together.

"None of the list-makers, the *assemblers* of the mob, the directors and arrangers, have been convicted."  
—*Burke: Reflections on the Executions in 1790*.

2. One who himself constitutes part of such a gathering.

"For your confession of faith, which you say shall be published by your *assemblers* . . ."  
—*Hammond to Chaynes*. (*Hammonds: Works*, 1. 194.)

• **ās-sēm-blīng**, pr. par. & s. [ASSEMBLE.] **As substantive:** A gathering together, a meeting together.

"Not forsaking the *assembling* of ourselves together, as the manner of some is . . ."  
—*1 Cor.*, x. 28.

"Let all rude and riotous *assemblings* . . . be banished from this day of rest and holiness."  
—*Bishop Fleetwood: Charge*.

\* **ās-sēm-blīt**, pa. par. [ASSEMBLED.]

• **ās-sēm-blīy**, \* **ās-sēm-blē**, s. [In Fr. *assemblée* = a meeting of persons (originally, it is believed, a deliberative political assembly; afterwards also one of the clergy); *assemble* = one of the steps in a dance; Prov. *assemblada*; Sp. *asamblea*; Ital. *assemblea* = a meeting of persons; Sw. *assemble*.] [ASSEMBLE, v.]

**A. Ordinary Language:**  
**I. In a passive sense:**  
1. *Gen.*: That which is convoked; a gathering together of persons, or, in some cases, of things, for any purpose.

"I sat not in the *assembly* of the mockers."  
—*Jer.*, xv. 17. (See also *Gen.*, xlix. 6.)

"I was almost in all evil in the midst of the congregation and *assembly*."  
—*Prov.*, v. 14.

2. *Specialty:*  
(a) A great gathering of people for religious or political purposes, or for both. In Old Testament Scripture it is frequently used of the whole congregation of the Israelites convened for any religious or national object, especially of their assembling at Sinai to receive the law. (See also **A. B.**)

" . . . on the eighth day shall be a holy convocation unto you, and ye shall offer an offering made by fire unto the Lord: it is a solemn *assembly*."  
—*Lev.*, xxiii. 34. (See also *Deut.*, xvi. 8, and 3 Kings, x. 20. In a *fig. sense*: Heb. xii. 28.)

" . . . according to all the words which the Lord spake with you in the mount, out of the midst of the fire, in the day of the *assembly*."  
—*Deut.*, ix. 19. (See also *Deut.*, x. 4; xviii. 16.)

(b) A deliberative body exercising legislative functions, and bearing rule over a nation, province, or district.

"Officers and men muttered that a vote of a foreign *assembly* was nothing to them."  
—*Macaulay: Hist. Eng.*, ch. xi.

(See also *Acts*, xix. 39.)

**II. In an active sense:** That which convokes. [B. 2, *Mil.*]

**B. Technically:**  
1. *Church Hist.*, &c.: The term now given to the highest deliberative body in some Presbyterian churches, and specially to what, when fully named, are termed the "General Assembly of the Established Church of Scotland," and the "General Assembly of the Free Church of Scotland." These consist of ministerial lay or half-lay representatives, equal to each other in number, sent from each presbytery, and in spiritual matters discharge deliberative, legislative, judicial, and executive functions. The word *Assembly*, in this second sense, seems to have been introduced into Scotland from France, whilst the natives of the former country had much intercourse with Calvin. From Scotland it passed to England, where the "Westminster Assembly" was an assembly of 121 divines who, with certain lay assessors, met at Westminster in 1643, by authority of the Parliament, with the view of attempting to produce ecclesiastical formularies which might lead to uniformity of worship in England and Scotland. It sat five years, produced the Directory of Public Worship, the Confession of Faith, and the Larger and Shorter Catechisms, and was ultimately dissolved by Oliver Cromwell.

2. *Mil.*: The second beating of the drum in a camp to summon the soldiers to strike their tents.

• **assembly-room**, s. A room in which public assemblies are wont to be held.

" . . . nor could she enter the *assembly-rooms* . . ."  
—*Johnson: Life of Savage*.

• **ās-sēnde**, v. t. Old spelling of **ASCEND**.

• **ās-sēn-dyt**, pa. par. An obsolete spelling of **ASCEND**.

• **ās-sēn-ēl**, s. Old spelling of **ARSENIC**.

• **ās-sēnt**, \* **ā-pōnte**, s. [O. Fr. *assent*, *assens*; Port. *assenso*; Lat. *assensus*; fr. *assentio* or *assentior* = to assent.] [ASSENT, v.]

**A. Ordinary Language:**  
1. The act of admitting the truth of any statement. Such assent emanates from the understanding, and differs from *consent*, which is an operation of the will. (See ¶ below.)

"I trowe ther needeth litel sermoung  
To make you *assente* to this thing."  
*Chaucer: C. T.*, 5,098-4.

"Her utmost reach, historical *assent*,  
The doctrines warp'd to what they never meant."  
*Cosper: Conversation*.

2. It is not unfrequently, however, used as synonymous with *consent*.

" . . . the talents which obtain the *assent* of divided and tumultuous assemblies to great practical reforms."  
—*Macaulay: Hist. Eng.*, ch. xi.

3. Accord; agreement.

" . . . the words of the prophets declare good to the king with one *assent*."  
—*2 Chron.*, xviii. 12.

¶ We assent to what we admit to be true; we consent to what we allow to be done. *Assent* may be given to anything, whether positively proposed by another or not, but *consent* supposes that what is consented to is proposed by some other person. If *assent* and *consent* are both used of speculative propositions, then *assent* is the act of an individual, and *consent* that of many, as in the phrase, "By the common consent of mankind." Approval, which is a much stronger word, is a species of assent and concurrence of consent. The latter term is properly used only of numbers, not of single individuals. (*Crabb*.)

**B. Technically:**  
*Law*. The royal assent signifies the consent of the king to have his signature affixed to Acts of Parliament which have passed both Houses of the Legislature. This assent gives them the force of law.

"All those acts of the Long Parliament which had received the royal assent were admitted to be still in full force."  
—*Macaulay: Hist. Eng.*, ch. 11.

• **ās-sēnt**, v. t. [In Fr. *assentir*; Sp. *assentir*; Port. *assentir*; Ital. *assentire*; Lat. *assentio* = to assent; *ad* = to, and *sentio* = to discern by the senses, to feel.]

1. To admit a statement to be true.

"And the Jews also *assented*, saying that these things were so."  
—*Acts*, xxiv. 8.

2. To consent to a proposal affecting one's interests.

"The princess *assented* to all that was suggested by her husband."  
—*Macaulay: Hist. Eng.*, ch. vii.

\* 3. To yield to the seductive influence of any vice.

"Loke wal, that ye unto no vice *assent*."  
*Chaucer: C. T.*, 13,922.

**as-sib-il-lā'-tion, s.** [STRIBILLATION.]  
**As-si-dā'-ang, As-si-dē'-ang, Chās-i-dē'-ang, Chās-i-dē'-ang, s. pl.** [In Gr. Ἀσιδαίον (*Asidaiōn*); from Hebrew צדק (*chāsīdīm*) = the pious or the righteous; צדק (*chāsīdā*) = eagerness, especially (1) love to one; (2) envy, animosity; צדק (*chāsīdā*) = to be eager, to be vehement.] A term given in 1 Macc. ii. 42, and 2 Macc. xiv. 6, to those Jews who were zealous for the purity of their faith when Grecian idolatry was beginning to pervade the land, and who, with their swords, supported the Maccabean revolt till it established the partial independence of their country. It is possible that the term may originally have been a nickname, like the word Puritan was in the sixteenth and seventeenth centuries.

**ās-si-dēnt, a.** [Lat. *assidens*, pr. par. of *assideo* = to sit by or near; *ad* = to, and *sedeo* = to sit.]  
*Med.*: Attendant on a disease as a rule, but still not invariably present. Assident are opposed to pathogenomic symptoms, the latter never being absent in any case.

**as-sid'-u-ate, \*as-sy'd'-u-ate, \*as-sid'-u-āt, a.** [Lat. *assiduatus*, pa. par. of *assiduo* = to apply constantly.] [ASSIDUOUS.] Constant, unremitting, &c.  
 "... made *assidue* and daily means unto the kynge's grace, for to have his most bounteous pardon."  
 —*Ibid.*, l. 303. (*Boucher*.)

**as-si-dū'-i-ty, s.** [In Fr. *assiduité*; Port. *assiduidade*; Ital. *assiduità*, *assiduitate*, *assiduitate*; Lat. *assiduitas* = a constant sitting by or near attendance, . . . constant care.] [ASSIDUOUS.]

1. *Properly*: The act of sitting down, or the state of remaining seated, in order to work steadily at any business which one has to do. Hence close application, diligence.  
 "Some cultivated rhetoric with such *assiduity* and success that their discourses are still justly valued as models of style."  
 —*Macaulay: Hist. Eng.*, ch. iii.  
 2. Careful attention to a person.

**as-sid'-u-ōus, a.** [In Fr. *assidu*; Sp. *assiduo*; Port. and Ital. *assiduo*; Lat. *assiduus* = (1) sitting by or near in constant attendance; (2) unremitting; from *assideo*.] [ASSIDENT.]

1. *Of persons or other animated beings (Lit.)*: Sitting closely and unremittingly to one's work, instead of getting up from time to time to take relaxation; hence giving close or constant application to one's work, diligent. (It is used both of specific instances of such unremitting application, and of one's general character.)

"The public were too strenuously employed with their own follies to be *assiduous* in estimating mine."  
 —*Goldsmith: Essays* (Preface).

"Thus as the bee, from bank to bower,  
*Assiduous* sips at every flower."  
 —*Cooper: Annals Memorabilia* (1780).

2. *Of things*: Performed with unremitting constancy and diligence.

"... they became, under *assiduous* training, the first soldiers in Greece."  
 —*Macaulay: Hist. Eng.* (ed. 1861), ch. xxiii. [Note].  
 "... by *assiduous* observation of the sun's transit over the meridian."  
 —*Herschel: Astron.*, § 377.  
 "... finally, *assiduous* and oft-repeated effort."  
 —*Fyndall: Frag. of Science* (3rd ed.), Preface, v.

**as-sid'-u-ōus-ly, adv.** [Eng. *assiduous*; -ly.] In an assiduous manner; with unremitting regularity and diligence.

"For, such as his mind was, it had been *assiduously* cultivated."  
 —*Macaulay: Hist. Eng.*, ch. xi.

**as-sid'-u-ōus-nēss, s.** [Eng. *assiduous*; -ness.] The quality of being assiduous.

"Persons that will have the patience to understand, and press with art and *assiduousness*."  
 —*Let. dat.* 1637; *Sidney State Papers*, vol. ii., 502.

**\*as-siō'ge, \*a-sō'ge, v. t.** [Fr. *assiéger*.] To besiege.

**\*as-siō'ged, \*a-sō'gēd, pa. par. & a.** [AS-SIEGE.]

**\*as-siōg'-ēr, s.** [Eng. *assiege*(s); -er.] A besieger.  
 "No less to keep than cool the *assiegers'* pride."  
 —*Hudson: Judith*, ll. 254.

**ās-si-ōnt'-ist, s.** [Eng., &c., *assistent*(s); -ist.] A shareholder or stockholder of the Assiento Company; also one holding the Assiento contract. (*Bancroft*.)

**ās-si-ōn'-tō, ās-i-ēn'-tō, s.** [Sp. *asiento* = a seal, . . . a contract or lease; from Lat. *assideo* = to sit near.] [ASSIDENT.]

*Commerce & History*: A contract or convention between the King of Spain and other powers for furnishing slaves for the Spanish dominions in America. The contract of the Assiento was made on March 26th, 1713.

*Assiento Company*: Any company entrusted with the function of fulfilling the Assiento contract. The first one which agreed to undertake the degrading task was the French Guinea Company. In July, 1713, the Treaty of Utrecht handed it over to Great Britain, and for twenty-six years the South Sea Company did something towards rendering the odious service required. But the breaking out of war in 1739 placed the Assiento contract in abeyance. It was never revived, and ultimately Britain became the mortal foe, first of the slave-trade, and then of slavery itself.

**as-si'gn, \*as-si'gne, \*as-sy'gne (g silent), v. t.** [In Fr. *assigner*; Prov. *assignar*; Sp. *asignar*; Port. *assignar*, *asignar*; Ital. *assegnare*; from Lat. *assigno* = (1) to mark out, to assign, to allot, (2) to ascribe, to impute, (3) to consign, to seal: *ad* = to, and *signum* = a mark.] [SIGN.]

**A. Ordinary Language:**

1. *Properly*, to sign over to another rights or property which have hitherto belonged to one's self. [B., I. & II.]  
 2. To mark out, to allot, to apportion.  
 "... for the priests had a portion *assigned* them of Pharaoh, and did set their portion which Pharaoh gave them."  
 —*Gen.* xviii, 22.  
 "... which *assigned* each battle, or war, or siege, or other leading event, to its proper counsel."  
 —*Lewis: Early Rom. Hist.*, ch. xii, pt. 1, § 14.  
 3. To designate for a specific purpose; to name, to fix upon.

"And they appointed Kedesh in Galilee in Mount Naphthali, . . . and on the other side Jordan by Jericho *assigned* they *assigned* Beseer . . ." [meaning, named it as a city of refuge].  
 —*Josh.* xx. 7, 8.

4. To attribute to; to allege specifically.  
 "... and with a velocity regulated according to the law above *assigned*."  
 —*Herschel: Astronomy*, 4th ed. (1858), § 361.

**B. Technically:**

**I. Law:**  
 1. To transfer to another by means of a signed document.  
 2. To apportion; to allot.

"If the heir or his guardian do not *assign* her dower within the term of quarantine, or do *assign* it unfairly, she has her remedy at law, and the sheriff is appointed to *assign* it."  
 —*Blackstone: Comment.*, bk. ii, ch. 8.

3. To appoint a deputy. [ASSIGNEE.]  
 4. To set anything forth specifically, or with the full particulars given. Thus, to assign error is to show in what part of the process error is committed; to assign false judgment, is to declare how and where the judgment is unjust; to assign the cessor, is to show how the plaintiff had ceased or given over; to assign waste, is to show wherein especially the waste has been committed. (*Cowell*.)

**II. Comm.** (In the same sense as A. 1, and B., I. 1.) To sign over to another rights or property which have hitherto belonged to one's self. To transfer money or property to a person by the endorsement of a cheque or bill, or by a similar document signed.

**as-si'gn (pl. as-si'gns) (g silent), s.** [From *assign*, v.] (Generally in the plural.)

**I. Ordinary Language & Law:**

\* 1. Appendages; appurtenances.  
 "... six French rapiers and poniards, with their *assigns*, as girdle, hangers, and so."  
 —*Shakespeare: Hamlet*, v. 2.

2. *Law*: Persons to whom any property is or may be assigned.

"Afterwards a man seems to have been at liberty to part with all his own acquisitions, if he had previously purchased to him and his *assigns* by name; but if his *assigns* were not specified in the purchased deed, he was not empowered to alienate."  
 —*Blackstone: Comment.*, bk. ii, ch. 19.

**as-si'gn'-a-ble (g silent), a.** [In Fr. *assignable*.]

**A. Ordinary Language:**

1. Able to be assigned, allotted, or given over as property to an individual named.  
 2. Able to be specified or pointed out.

"So far as that element is concerned, production is susceptible of an increase without any *assignable* bounds."  
 —*J. & Mill: Polit. Econ.*, vol. i, bk. I, ch. xi, § 4.

**B. Technically:**  
**I. Law & Comm.**: Able to be transferred so as to pass from hand to hand, as an endorsed cheque.  
**II. Mathematics:**

1. *Assignable magnitude or quantity*: A magnitude or quantity which, not being infinite, is capable of being definitely stated.  
 2. *Assignable ratio*: A ratio capable of such definite statement.

**ās-si-gnat' (gnat as nyät), s.** [Fr.] An annuity founded on the security of lands. Specially, French Republican paper money. When the revolutionary French Assembly of 1790 took the decisive step of disendowing the church, and appropriating all ecclesiastical property to the state, the prodigious quantity of church lands, amounting to about one-third of the soil of France, thrown upon its lands could not be disposed of all at once. The labour of selling it was therefore devolved on each commune or parish, which was required to pay the proceeds, when realised, into the state treasury. Meanwhile the government, being without adequate revenue, issued paper money on the security of the funds to be paid it by the communes. The bonds issued for the purpose were called *assignats*. Ultimately over-issue of these paper notes greatly depreciated their value, so that in the year 1795, 3,000 instead of about twenty-four of them were given in change for a louis-d'or. (*Evans Grove's Hist. of France; Cabinet Cyclopaedia*, 1831, vol. ii, p. 304; vol. iii., p. 121.)

**ās-si-g-nā'-tion, s.** [In Fr. *assignation*; Sp. *asignacion*; Port. *assignação*; Ital. *assegnazione*; from Lat. *assignatio* = a marking out, an allotment; *assignatum*, supine of *assigno*.] [ASSIGN.]

**A. Ordinary Language:**

**I. The act of assigning. Specially—**  
 1. The act of transferring property by a written deed, or in a similar way.

"It could be converted into private property only by purchase or *assignment*; and *assignment* always proceeded on regular principles, and awarded equal portions of land to every man."  
 —*Arnold: Hist. Rome*, vol. I, ch. xiv., p. 263.

2. The act of making an appointment of time and place for love-interviews.

"The lovers expected the return of this stated hour with as much impatience as if it had been a real *assignment*."  
 —*Spectator*.

**II. The state of being assigned.**

1. That which is assigned.  
 "That by new instances are not always to be understood new recipes, but new *assignments*; and of the diversity between these two."  
 —*Bacon: Inter. of Nat.*, ch. xii., p. 283.

**B. Technically:**

**I. Law & Comm.**: In the same sense as A., I. 1. (q.v.)

2. *Comm.* (In Russia): A bank-note or bill; paper money.

**as-si'gned (g silent), pa. par. & a.** [ASSIGN, v.]  
 "In their *assigned* and native dwelling place."  
 —*Shakespeare: As You Like It*, ll. 1.

**as-si-g-nō'e (g silent), s.** [In Fr. *assigné* = defendant at law.]

**In Law:**  
 1. A person to whom any duty or property is assigned. An assignee may be one *in deed* or *in law*. He is the former if appointed by a person, and the latter if appointed by the administrators of the law.  
 2. *Assignees in bankruptcy*: Persons to whom a bankrupt's estate is assigned, and in whom it shall be vested for the benefit of his creditors. (*Blackstone: Comment.*, bk. ii, ch. 31.)

**as-si-g-n-ēr (g silent), s.** [Eng. *assign*; -er.] One who or that which assigns. [ASSIGNOR.]

"The gospel is at once the *assigner* of our tasks and the magazine of our strength."  
 —*Dr. H. More: Decay of Piety*.

**as-si-g-n-īng, pr. par.** [ASSIGN, v.]

**as-si-g-n-ment, s.** [Eng. *assign*; -ment. In Ital. *assegnamento*.]

**A. Ordinary Language:**

**I. The act of assigning or of designing any person or thing to a particular use.**

1. The act of assigning or allotting any person or thing to a particular use.

"Triumvirs for the *assignment* of lands and the receipt of names, are appointed."  
 —*Lewis: Early Rom. Hist.*, ch. xii., pt. ii., § 4.

fate, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sire, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, quite, cūr, rūle, fūll; try, Sýrian. æ, œ = ē. ey = ā. qu = kw.

\* 2. The act of designing anything; design.
The second Bulwarke was the Hearing sense.
Gainst which the second troupe assignment makes.
Spenser: P. Q. II. xi. 10.
II. The state of being assigned.
I believe the years of assignment are passed away
with discontent and unhappiness.—Darwin: Voyage
round the World, ch. xix.

III. That which is assigned; also the document
by which assignment is made, such as a
signed or endorsed cheque or bill, a lease,
&c.
... to those to whom it has granted a portion of
the revenue, and are indemnified by assignments on
the revenue collectors.—J. & Mill: Fort. Econ.
Prelim. Rem., p. 17.
... on an assignment of hearth money there was
no difficulty in obtaining advances.—Macaulay:
Hist. Eng., ch. x.

B. Technically:
Law, Comm., &c.: The act of signing over to
another rights or property which have hitherto
belonged to one's self. [A., I. I.; III.]
Assignment of estate is a transfer, or making
over to another, of the right a person has in
any estate. It is usually applied to an estate
for life or years. It differs from a lease, for in
a lease he grants an interest less than his own
law, reserving to himself a reversion; while in
an assignment he parts with the whole prop-
erty, which from that time absolutely belongs
to the assignee. (Blackstone: Comment., bk. II,
ch. 20.)

as-sign-or' (or silent), s. Of the same mean-
ing as ASSIGNER.
... in assignments he parts with the whole prop-
erty, and the assignee stands to all intents and
purposes in the place of the assignor.—Blackstone:
Comment., bk. II, ch. 20.

as-sim-il-a-ble, a. & s. [In Fr. assimilable.]
A. As adjective: That may be assimilated.
Able to be made in one or more particulars to
resemble something else. (Webster.)
B. As substantive: That which is capable
of being assimilated.
The spirit of many will find but naked habitations,
merely on assimilables wherein to react their
natures.—Browne: Vulgar Errors

as-sim-il-a-ble, v. t. [Eng. assimilable;
-ity.] Capability of being assimilated. (Cole-
ridge.) (Reid's Dict.)

as-sim-il-a-ble, a. & s. [In Fr. assimilable.]
A. As adjective: That may be assimilated.
Able to be made in one or more particulars to
resemble something else. (Webster.)
B. As substantive: That which is capable
of being assimilated.
The spirit of many will find but naked habitations,
merely on assimilables wherein to react their
natures.—Browne: Vulgar Errors

as-sim-il-ate, v. t. & i. [In Ger. assimilieren;
Fr. assimiler; Sp. assimilar; Port. assimilar;
Ital. assimilare, assimilare; from Lat. assim-
ilatus = similar; ad = to, and similis = like;
or from Lat. assimilato (there is not an assimilo)
= to make like, to compare.]
A. Transitive:
1. Ordinary Language:
1. To compare.
To these 4 brutes, living in this estate,
Four kinds of man we may assimilate."
Times Whistle, E. E. Text Soc. (ed. Cowper),
De quatuor elementis, 77, 78.
2. To create a likeness between two or more
different things; to render one thing like
another.
A serene and necessitous kind of life would easily
assimilate at least the next generation to barbarian
and ferociousness.—Hale.
The downy flakes
Descending, and with never-ceasing lapse
Softly alighting upon all below,
Assimilate all objects." Cowper: Task, iv. 289.

2. To convert into a substance identical
with, or at least similar to, that operating
upon it. [II. Physiol.]
Tasting concoct, digest, assimilate,
And corporeal to incorporeal turn.
Hence also animals and vegetables may assimilate
their nourishment, moist nourishment easily changing
its texture till it becomes like the dense earth."
Newton.
II. Animal and Vegetable Physiol.: In the
same sense as I. 3. (Used of the power pos-
sessed by plants and animals of converting
their appropriate nourishment into portions
of themselves.)
B. Intransitive:
I. Ordinary Language: To become similar.
(Followed by the preposition to.)
With regard to the spelling of native names, ...
I have adopted that which assimilates most to the
English pronunciation.—Hooker: Himalayan Jour-
nal, vol. I, Preface, p. xviii.

II. Animal and Vegetable Physiol.: To be
converted into the substance of an animal or
plant.
as-sim-il-a-ted, pa. par. & a. [ASSIMILATE,
v.]

as-sim-il-a-tion, s. [Eng. assimilate;
-ness.] The quality of being similar to; like-
ness. (Johnson.)

as-sim-il-a-tion, pr. par. [ASSIMILATE, v.]

as-sim-il-a-tion, s. [In Dan & Fr. assimilati-
on; Port. assimilacao; Ital. assimilazioni;
Lat. assimilatio = likeness, similarity.]
1. Ordinary Language: The act or process
of assimilating, i. e., of making one being, per-
son, or thing similar to another; the state of
being so assimilated.
It is as well the instinct as duty of our nature
to aspire to an assimilation with God, even the
most laudable and generous ambition.—Doody of
Fitzly.

2. Animal and Vegetable Physiol.: The pro-
cess by which an animal or plant converts
into textures, identical with its own, such
foreign molecules as are fitted for its nutri-
ment. (See Glossary to Owen's Comparative
Anatomy of the Invertebrate Animals, 2nd ed.,
1855, p. 669.)
These two processes, secretion, or the expulsion of
effete particles, and assimilation of substances from
without, are necessarily mutually dependent.—Todd
& Bowman: Physiol. Anat., vol. I, introd., p. 12.

as-sim-il-a-tive, adj. [Eng. assimilate;
suff. -ive.] Assimilating; having the power
of assimilating.
... an attractive, a retentive, an assimilative, and
an expansive virtue.—Hakewell: Apology, p. 6.

as-sim-il-a-tory, a. [Eng. assimilate;
-ory.] Tending to assimilate. (Webster.)

as-sim-ul-ate, v. t. [Lat. assimula = (1)
to make like; (2) to counterfeit; similitis =
like.] To feign, to counterfeit. (Johnson.)

as-sim-ul-a-tion, s. [Lat. assimilatio =
(1) similarity; (2) Rhet., a feigning that an
audience is unfavourable to the views the
orator expresses when he knows it to be the
very opposite.] A dissembling, a counter-
feiting. (Johnson.)

as-si-né-gó, † as-i-né-gó, s. [Sp. &
Port. asno = an ass.] An ass, a dolt, a stupid
person.
... thou hast no more brain than I have in mine
elbow; an asneigo may turn thee; thou curvy
valiant ass! thou art here put to thrust Trojans ...
Shaksp.: Troilus and Cressida, II. 1.

as-si-que, s. [ASSIZE (2).]

as-si-que, s. [ASSIZE (2).]

as-si-que, s. [ASSIZE (2).]

as-si-que, s. [ASSIZE (2).]

as-si-que, s. [ASSIZE (2).]

as-si-que, s. [ASSIZE (2).]

as-si-que, s. [ASSIZE (2).]

as-si-que, s. [ASSIZE (2).]

as-si-que, s. [ASSIZE (2).]

as-si-que, s. [ASSIZE (2).]

as-si-que, s. [ASSIZE (2).]

as-si-que, s. [ASSIZE (2).]

as-si-que, s. [ASSIZE (2).]

as-si-que, s. [ASSIZE (2).]

as-si-que, s. [ASSIZE (2).]

as-sist-er, s. [Eng. assist; -er.] One who
assists; an assistant. (Ash.)

as-sist-ing, pr. par. & a. [ASSIST.]
Does not demands
Th' assisting force of his native bands."
Pope: Homer's Iliad, bk. xiii. 614, 617.

as-sist-less, a. [Eng. assist, and suffix -less.]
Without assistance. (Poetic.)
"Stupid he stares, and all assistless stands."
Pope: Homer's Iliad, xvi. 970.

as-sith, \* as-syth, v. t. [ASSETH.]
1. Ord. Lang.: To satisfy.
Lauchful or evyna pwaiseloune
May thaim assith be na resoue."
Scott: Rosting, bk. I, (ed. Lumley), 2, 201-2.

2. Scots Law: To make compensation for an
injury.

as-sith-mént (O. Eng.), as-syth-mént
(Scotch), s. [O. Eng. assith = to compensate,
and suffix -ment.]
1. Old Eng.: A wergild, or composition
by a pecuniary mulct.
2. Scotch: Indemnification from persons
injured, without which, in former times,
pardon could not be granted by the king.
(The term assythment is not yet obsolete in
Scots Law.)

"For this reason it was not competent to any one
charged with a crime to plead a remission till he had
given security to indemnify the private party (1467, c.
74; 1528, c. 7); and in case of slaughter, it behoved the
wife or executor of the deceased who were entitled to
that indemnification, or as it is called in the style
of our statutes assythment, to subscribe letters of
aisins acknowledging that they had received satisfac-
tion, or otherwise to concur in soliciting for the
pardon before it could be obtained (1592)."—Erskine:
Instic., bk. IV., title IV.

as-size (1), s. A layer of stone, or one of the
cylindrical blocks in a column. The number
of assizes in the Great Pyramid was 203.
(Knight's Dict. of Mechanics.)

as-size (2), \* as-si-que, \* as-sy-que, \* a-si-que,
\* a-sy-que, \* a-sy-que, s. [In Ger. assisen;
Fr. assises (pl.), from assere = to make one sit
down; O. Fr. assise = a set rate, a tax; assis
= set, seated; assire = to set; Prov. assiza
= (1) an assembly of judges, (2) a decision
pronounced by them, (3) a tax; Low Lat.
assisa, assisia; Class. Lat. assensus = a sitting
by; assideo = to sit by: ad = to, . . . by,
near, and sedeo = to sit.]
A. Ordinary Language:
1. A formal session or sitting; or in the
pl. sessions or sittings specially for judicial
purposes.
1. Literally:
(a) In a general sense: A sitting for any
purpose, as for worship, to hear confessions,
&c.
In daunger he hadde at his owne assise
The yonge gurlis of the deince."
Chaucer: C. T., 968-4.

¶ In daunger is = under his jurisdiction.
(b) (Generally pl.): With the same significa-
tion as that given under B., II. 3.
Henceforward his writs ran and his judges held
assise in every part of Ireland . . .—Macaulay:
Hist. Eng., ch. I.
(c) The time or place of holding a judicial
sitting.
The law was never executed by any justices of
assise; but the people left to their own laws.—Davies:
Ireland.
2. Fig.: The last judgment.
The judging God shall close the book of fate,
And there the lost assises keep,
For those who wake and those who sleep."
Dryden: Mrs. Kildgrew, 152.

II. The result of such judicial or other
sitting.
1. A statute. [B., II. 5.]
"Ekoken thine seven wise,
That han I wrot agan the assise."
Seyn's Siges, 2, 490. (Boucher.)

2. A judgment. [B., II. 5.]
"Ur elder God did Jheunus rise,
The quic gie hang with fals assise."
MS. Coll. Med. Edin., H. III. 12, f. 125 b. (Boucher.)

3. A regulation. [B., II. 5.]
"Add on the same assise serued and allowed
Of alle the franchise, that it was dowed."
Chron. of Rob. de Brunne, p. 77. (Boucher.)
"and after mete the lordys wyse,
Euerichre yu di werc queyethre."
To daunce went by ryght assise."
Octavian, 51. (Boucher.)

III. Things assigned; commodities. [B.,
II. 6.]
"Whan ther comes marchandise,
With coris, wyne, and steel, othir other assise,
To beore lond any sellip."
Alisaunder, 7, 974. (Boucher.)

bel, boy; pent, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -ing.
-clan, -tian = shan. -tion, -sion = shün; -tion, -gion = zhün. -tions, -sious, -cious = shüs. -ble, -dle, &c = bel, del.

IV. Their weight or measure; measurement, dimension. (Now contracted into SIZE.) [B., II. 6.]

"Than was it shorter than the assize. Thrice wrought that with it on this wise." The Story of the Holy Road (ed. Morris), 643, 644. "On high hills top I saw a stately frame, An hundred cubits high, by just assize, With hundred pillars." Spenser: Visions of Belloy, II.

\* V. Form, fashion.

"So al watz dubbet on dere assize." K. Eng. Allit. Poems (ed. Morris), The Pearl, 97. \* VI. Service.

"That we may here hym of lof, as oure lyste bidden, As in the assize of Sodomas to segges that passen." K. Eng. Allit. Poems (ed. Morris); Cleanesse, 843-4.

B. Technically:

I. Law & Government: An assembly of knights and other substantial men met at a certain place and time for the discharge of public business. In this sense, the General Council or Witenagemot of England was called the General Assize. Glanvil, who wrote in the reign of Henry II., says it had never yet been ascertained by the general assize or assembly, but was left to the custom of particular counties. (Blackstone: Comm., bk. i., ch. 2.)

II. Law:

1. A jury, so called from their sitting together. Blackstone thinks that jury was the original meaning of the word assize. The grand assize, or grand jury, was instituted by Henry II., and might be appealed to by one who preferred it to trial by battle. (Blackstone: Comm., bk. iii., chaps. 10, 22, and 23.)

2. The court which summons together such a jury by a commission of assize, or ad assisas capiendas. (Ibid., ch. 10.)

3. The sittings held, by the commission of the sovereign, at stated intervals, by one or more judges in the county towns of England, for the trial of civil and criminal cases. [See A., I., 1 (b).] The judges sit on such circuits by virtue of five authorities—the commission of the peace, that of oyer and terminer, that of general gaol delivery, that of assize, and that of nisi prius. The foundation of the present system was laid by Magna Charta, and by the statute Westm. 2, 13 Edw. I., c. 30. The commission of assize was so called because it was sent to take the verdict of a particular kind of assize—that is, jury. (Ibid., bk. iii., chaps. 22, 23.)

4. An action at law for recovering the possession of lands. It is applicable to no more than two species of injury—by ouster, viz., abatement [ABATEMENT], and recent or novel disseisin. [DISSEISIN.] If the abatement happened upon the death of the demandant's father, mother, brother, sister, nephew, or niece, the remedy is by an assize of mort d'ancestor; if by that of relatives different from these, then various other terms are applied to it. An assize of novel disseisin—that is, of recent disseisin—does not essentially differ from that now described. These actions were called writs of assize. (Ibid., bk. iii., ch. 10.)

¶ A certificate of assize was a second trial granted when a miscarriage of justice appeared to have occurred. (Blackstone: Comm., bk. iii., ch. 24.)

5. A statute or ordinance. [A., II., 1, 2, 3.]

(a) In a general sense: A statute or ordinance of any kind. The assize of arms was an enactment of Henry II. that each person should provide arms suitable to his rank, which on his death should descend to his son or other heir.

¶ The assize of the forest meant rules for the management of the royal forests.

¶ Rents of assize are certain established rents of the freeholders and ancient copyholders of a manor, which cannot be departed from or varied. They are also called quit-rents. [QUIT.] (Blackstone: Comm., bk. ii., ch. 3.)

(b) Spec.: An ordinance for regulating the measure and price of the articles sold in the market; also one for similarly fixing the standard weights and measures.

¶ To break the assize of bread is to violate the laws regulating the sale of bread, as by using false weights or giving short weight. (Blackstone: Comm., bk. iv., c. 12.)

6. The articles officially weighed and measured; also the standard weights. [A., III., IV.]

\* III. Chess:

"The long assize, apparently a term of chess, now disused."—Sir W. Scott.

"And sette he hath the long assize, And endred both ther inne; The play hignesth to arise, Tristrem delect atvaine." Sir Tristrem, F. J., st. xxx. (S. in Boucher.)

as-si-z'e, v. t. [From assize, s.]

1. To fix by a legal ordinance the weight, measure, or price of articles to be exposed for sale.

\* 2. To assess as a tax-payer. (Buners.)

as-si-z'ed, \*as-si-z'ed, pa. par. [ASSIZE.]

as-si-z'er, as-si-z'er, as-si-z'or, as-si-z'or, s. [Eng. assize, v.; -er, or.]

A. Of the forms assizer, assisor, and assisor (Eng.): An officer who fixes the "assize"—that is, the weight, measure or price of articles to be sold.

¶ Daniel (Hist. Eng., p. 169) mentions "false assisors" among those against whom the writ of Trailbaston was issued. (Davies.)

B. Of the form assizor (Scotts Law): A juror.

\*as-sō-bēr, \*as-sō-bre (bre as bër), v. t. [From Fr. sobre = sober.] To sober; to make sober; to keep sober. [SOBER.]

"And thus I rede thou asobre, Thyn heete, in hope of such a grace." Gower: Conf. Amant., bk. vi.

as-sō-ci-a-bil-ity (or ci as shi), s. [Eng. associable; -ity. In Ger. associabilität.] The quality of being capable of associating together.

"When dealing with the Associability of Feelings, and the Associability of Relations between Feelings."—Herbert Spencer: Psychol. (2nd ed., vol. II., p. 459.)

as-sō-ci-a-bil-ity (or ci as shi), a. [Formed as if from a Lat. associabilis, on the analogy of sociable.]

A. Ordinary Language:

\* 1. Of persons: Sociable in disposition, companionable. (Cotgrave, Todd, &c.)

2. Of persons and things: Capable of being united; joined or associated together. (Johnson, &c.)

B. Technically: Capable of being associated together. Used—

1. (Psychol.) Of the feelings.

"... we know feelings to be associable only by the proved ability of one to revive another."—Herbert Spencer: Psychol. (2nd ed., 1870, vol. I., p. 251.)

2. (Med.) Of organs of the body in sympathy with other organs.

as-sō-ci-a-bil-ness (or ci as shi), s. [Eng. associable; -ness.] Associability. (Webster.)

as-sō-ci-ate (or ci as shi), v. t. & i. [From the adj. In Fr. associer; Sp. asociar; Port. associar = to associate.]

A. Transitive:

I. Of persons:

1. To join with one as a companion, a friend, a partner, or a confederate; to associate a person with one's self in some one of these relations; to unite together in friendship or confederacy, as two persons or parties may do.

"One of our order, to associate me. Here in this city visiting the sick." Shakespeare: Romeo and Juliet, v. 2.

"A fearful army, led by Caius Marcius, Associated with Aufidius, rages Upon our territories." Shakespeare: Coriolanus, iv. 6.

"Associate yourselves, O ye people, and ye shall be broken in pieces."—Isa. vii. 9.

\* 2. To show sympathy with, by tears or otherwise, as a sincere associate or friend, even in one's woe.

"Shed yet some small drops from thy tender spring Because kind nature doth require it so; Friends should associate friends in grief and woe." Shakespeare: Titus Andronicus, v. 3.

II. Of things: To unite, blend, or join together, as feelings, mental conceptions, or material substances may do.

"Members of the three great groups of feelings severally associate themselves primarily with members of their own group."—Herbert Spencer: Psychol. (2nd ed., 1870, vol. I., p. 253.)

"Native silver is always associated with gold."—Graham: Chemistry (2nd ed.), vol. II., p. 843.

¶ Formerly the verb to associate was at least occasionally followed by to; now with is employed. (See the subjoined example and the examples above.)

"Some obnoxious particles unperceivedly associated themselves to it."—Boyle.

B. Intransitive:

1. Of persons: To keep company (with), to have intimate friendship with, to be in confederacy with.

"They appear in a manner no way assorted to those with whom they must associate."—Burke.

2. Of things: To unite together in action, to act harmoniously. (The elder Darwin.)

as-sō-ci-ate (or ci as shi), a. & s. [From Lat. associatus, pa. par. of associare: ad = to, and socio = to unite together; socius = a partner, a companion.]

A. As adjective:

I. Ordinary Language:

1. Of persons:

(a) United in interest or for the prosecution of a common purpose; confederate.

"Amphimachus survey'd th' associate band." Pope: Homer's Odyssey, bk. xvi. 267.

(b) United with another in office; sharing with another a common office; as "an associate judge."

2. Of things: Acting in common, exerting a sympathetic influence on each other. [B.]

II. Technically (Med.): Connected by habit or sympathy, as associate motions, such as occur sympathetically in consequence of preceding motions. (The elder Darwin.) (Webster's Dict.)

B. As substantive:

I. Ordinary Language:

1. Of persons:

(1) A companion, a mate; one whom a person keeps company with.

"Sole Eve, associate sole, to me beyond Compare, above all living creatures rank." Milton: P. L., bk. ix.

"How dull! to bear the voice of those Whom rank or chance, whom wealth or power, Have made, though neither friends nor foes, Associates of the festive hour." Byron: Hours of Idleness.

(2) A partner in some office or enterprise.

(a) In a good, or at least an indifferent sense: A comrade, a partner, &c.

"I call'd my fellows, and these words address'd: My dear associates, here indulge your rest." Pope: Homer's Odyssey, bk. ix., 159, 200.

(b) In a bad sense: An accomplice.

"Their less scrupulous associates complained bitterly that the good cause was betrayed."—Macaulay: Hist. Eng., ch. xv.

2. Of things: A concomitant.

"Good health, and its associate in the meet, Good temper." Cowper: Task, bk. I.

B. Technically: One who holds a certain honorary title in connection with the Royal Academy or any similar institution. The dignity of associate is inferior to that of academican. Its abbreviation is A.

¶ A.R.A. is Associate of the Royal Academy; A.R.S.A. is (1) Associate of the Royal Society of Arts, or (2) Associate of the Royal Scottish Academy.

as-sō-ci-ate-ship (or ci as shi), pa. par. & a. [ASSOCIATE, v.]

"With strictly social animals the feeling will be more or less extended to all the associated members."—Darwin: Descent of Man, pt. I., ch. III.

as-sō-ci-ate-ship (or ci as shi), s. [Eng. associate, and suff. -ship.]

1. The state of one associated with another person, or with a party, or sharing with some one else a common office.

"And that, under the present system, rising men were hardly ever admitted to associateship until they were past the age at which the recognition of the Academy could be of service to them."—Sir Charles Dilke: Speech in Parliament, Times, April 10, 1877.

2. The position or dignity of being an associate. [ASSOCIATE, s., II.]

as-sō-ci-ate-ting (or ci as shi), pr. par. [ASSOCIATE, v.]

as-sō-ci-ation (or ci as shi), s. [In Ger. & Fr. association; Sp. asociacion; Port. associacao.]

A. Ordinary Language:

I. The act of associating, uniting, or joining together.

1. Of persons, or other beings capable of action:

"F. Cuvier has observed that all animals that readily enter into domestication consider man as a member of their own society, and thus fulfil their instinct of association."—Darwin: Voyage round the World, ch. xviii., p. 150.

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hêre, camel, hêr, thêre; pine, pît, sire, sir, marine; gô, pô, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, unite, cûr, rûle, fûll; try, Sýrian. æ, œ = é. ey = ä. qu = kw.

2. Of things:

"... his [man's] mental powers, in association with his extraordinarily-developed brain."—Owen: *Classification of Mammalia*, p. 49.

II. The state of being so associated, united, or joined together. (Used of beings, of persons, or of things.)

1. Of beings or persons:

"Self-denial is a kind of holy association with God; and, by making you his partner, interests you in all his happiness."—Boyle.

"... those animals which were benefited by living in close association."—Darwin: *Descent of Man*, pt. I, ch. lii.

2. Of things. [B. 1.]

III. An aggregate of persons or things associated together.

I. Of persons: A society of any kind; persons in union with each other for any purpose, civil or ecclesiastical, political or non-political. [B. 2.]

"The Association also holds itself liable to print in detail those researches on particular points of inquiry which it has requested individuals or societies to undertake."—*Brit. Assoc. Rep.*, vol. I (2nd ed., 1855), p. viii.

2. Of things: An aggregate of things so associated together, as mental conceptions with each other, a mental feeling or thought with nerve action, or material substances with each other.

"We may build more splendid habitations, Fill our rooms with paintings and with sculptures, But we cannot Boy with gold the old associations."

"Here a name of noble intellectual associations..."—*Tyndall: Frig. of Science* (3rd ed.), xii, 859.

IV. A contract containing the rules or articles by which persons uniting with each other mutually pledge themselves to carry out the common objects of their society.

"He... had been the author of that Association by which the Prince's adherents had bound themselves to stand or fall together."—*Macaulay: Hist. Eng.*, ch. x.

"... was forced to contend himself with dropping the Association into a flower-pot which stood in a parlour near the kitchen."—*Ibid.*, ch. xviii.

B. Technically:

1. Mental and Moral Philosophy:

(a) Association of ideas: The connection in the mind, especially in matters relating to memory, between two ideas, so that one tends to recall the other. If, for example, on walking out, one come to a spot where on a previous occasion something exciting happened, the sight of the place will almost certainly recall the occurrence. Dugald Stewart considers that the ideas which tend to suggest each other are those connected together by resemblances, analogy, contrariety, vicinity in time or in place, the relation of cause and effect, of means and of end, or of premises and conclusion.

"Association of ideas is of great importance, and may be of excellent use."—*Watts*.

(b) The association of feelings is a similar connection among the feelings.

"... the ultimate law to which the association of feelings conforms."—*Herbert Spencer: Psychology*, 2nd ed. (1879), vol. I, p. 252.

2. Science, Literature, &c.:

The word Association, though not so common as Society, is still in general use in the sense detailed under A., III. 1. A well-known association in Britain is fully and formally designated "The British Association for the Advancement of Science," but it is generally called simply "The British Association." At its first meeting, that held in York on the 27th of September, 1831, the Rev. William Vernon Harcourt thus defined its aims:—

"I propose then, gentlemen, in the first place, that we should found a British Association for the Advancement of Science, having for its objects, to give a stronger impulse and more systematic direction to scientific inquiry, to obtain a greater degree of national attention to the objects of science, and a removal of those disadvantages which impede its progress, and to promote the intercourse of the cultivators of science with one another and with foreign philosophers."—*Brit. Assoc. Reports*, vol. I, 2nd ed. (1855), p. 22.

The British Association has since greatly developed, having now (1879) about 4,000 members. It is divided into the following sections:—Section A. Mathematics and Physics; B. Chemistry and Mineralogy; C. Geology; D. Biology; E. Geography and Ethnology; F. Statistics; G. Mechanical Science. These sections are again divided into what till 1865 were called sub-sections, but have since been termed departments. (*Brit. Assoc. Rep.*, 1877, p. xxxvi.) The association meets, on invitation being sent to it, in any of the larger towns or cities (London excepted) which can give it accommodation, doing its best at each

place to communicate an impulse towards the cultivation of science which may continue to operate after it has gone.

**as-sô-ci-â-tion-al**, a. [Eng. association; -al.] Pertaining to the act or state of association, or to persons or things associated; pertaining to associationism (q.v.).

**as-sô-ci-â-tion-ism**, s. [Eng. association; -ism.]

*Philos.*: The doctrine of the association of ideas. [ASSOCIATION, B. 1 (a).]

**as-sô-ci-â-tion-ist**, s. [Eng. association (ism); -ist.] (1) An adherent or supporter of associationism (q.v.); (2) A member of an association.

**as-sô-ci-â-tive** (or **ci** as **sh**), a. [Eng. associat(e); -ive.] Possessing the quality of associating. (*Coleridge*). (*Reid*.)

**as-sô-ci-â-tôr** (or **ci** as **sh**), s. [Eng. associate; -or.] One who associates with others for any purpose.

"In Westminster there were thirty-seven thousand associates, in the Tower Hamlets eight thousand, in Southwark eighteen thousand."—*Macaulay: Hist. Eng.*, ch. xxi.

**as-sôil'** (1), v. t. [From Lat. ad = to, and Eng. soil. In Fr. *souiller* = to soil, to defile.] [SOIL.] To soil; to stain.

"... and what can he be, Can with unthankfulness assoil me, Besum. & Fletcher: *Q. of Corinth*, iii. 1. (*Richardson*)

**as-sôil'** (2), \***as-sôil'e**, \***as-sôyl'**, \***as-sôyle**, \***as-sôle**, \***a-sôil'e**, \***a-sôyle** (O. Eng.), **as-sôil'-zie**, \***as-sôil'-yie** (zi as yi) (O. Eng. & Mod. Scotch), v. t. [O. Fr. *assolir*, *assaurre*, *assaudre*, *assoldre*, *absolier*, *absoldre*; from Port. *assolvar*; Ital. *assolvere*; Lat. *absolvere* = (1) to loosen from, (2) to free from, (3) to acquit, (4) to pay off, (5) to finish: ab = from, and solvo = to loosen, to untie.] [ABSOLVE.]

A. Of the Old English forms assol, &c.:

1. To let loose, to set free; to deliver.

"Till from her bonds the spright assol'd is." *Spenser: F. Q.*, I. x. 52.

2. To absolve a sin, or fault, or error; or to absolve a person from a charge, to acquit him.

"Well meeting how their error to assolve." *Spenser: F. Q.*, IV. vi. 25.

"The Pope them assolv'd."—*Chron. of Rob. de Brunne*, p. 206. (*S. in Boucher*.)

"When he was assolv'd of the Pope." *Langtoft: Chron.*, p. 1. (*Boucher*.)

3. To pay.

"Till that you come where ye your vovew assolve." *Spenser: Daphniaida*, vii.

4. To remove.

"To seeking him that should her payn assolve." *Spenser: F. Q.*, IV. v. 30.

B. Of the Scotch forms assolzie, \*assolzie; I. *Scots Law*: To acquit or absolve by sentence of a court.

"... for non-payment of a few duty, ... in which the defender was assolzied."—*Scott: Waverley*, ch. xviii.

2. To absolve from ecclesiastical censure.

\***as-sôil'e**, s. [ASSOIL, v.] Confession.

"When we speak by way of riddle, of which the sense can hardly be picked out but by the parties' own assolis."—*Putsenham*, iii. 167. (*Nares*.)

\***as-sôil-ing**, \***as-sôil-lyng**, \***as-sôyl-inge**, \***a-sôyl-yn**, pr. par. & s. [ASSOIL, v.]

*As substantive*: Absolution.

"And to swyl this manning, and the assoltinge at so, we assigneth the bishop of Winchester to."—*Robert of Gloucester: Chron.*, p. 502. (*S. in Boucher*.)

"Assolyn of synuys."—*Prompt. Parv.*

"For curis woe alle right as assolting saveth." *Chaucer: The Prologue*, 663.

**as-sôil-ment**, s. [O. Eng. *assoil*, and Eng. suff. -ment.] The act of assailing; absolution. (*More*). (*Speed*.)

**as-sôil-zie** (s silent), \***as-sôil'-yie**, v. t. [ASSOIL (2), B.]

**as-sôil'-zied** (s silent), pr. par. [ASSOIL (2), B.]

**as-sôil-zing** (s silent), pr. par. [ASSOIL (2), B.]

**as-sôn-ânce**, s. [In Dan. *assonans*; Ger. *assonanz*; Fr. *assonance*; Sp. *asonancia*; Ital. *assonanza*.]

*Rhetoric & Poetry*: A term used when the words of a phrase or of a verse have the same sound or termination, and yet do not properly rhyme. (*Johnson*.)

**as-sôn-ânt**, adj. & s. [Fr. *assonant*; Sp. *asonante* (s); Lat. *assonans*, pr. par. of *assono* or *assono* = to sound to; ad = to, and sono = to sound.]

A. *As adjective*: Sounding as to resemble another sound. (*Johnson*.)

*Assonant Rhymes*: Verses not properly rhyming. [ASSONANCE.] They are deemed legitimate in Spanish, but in English are considered blemishes in composition.

B. *As substantive*: Spanish verses not properly rhyming. (See the adj.)

\***assonzie**, v. t. [ESSOIN.]

**as-sôrt**, v. t. & i. [Fr. *assortir* = (1) to sort, (2) to match; Ital. *assortire* = to sort, to choose by lot.] [SORT.]

A. Transitive:

1. To arrange or dispose in such a way that one person or thing will suit another, to match; to adapt one person or thing to another.

"Which appear... no way assorted to those with whom they must associate."—*Burke*.

2. To distribute into sorts; arrange things of the same kind into different classes, or into bundles, heaps, &c.

3. To furnish with articles so arranged. [ASSORTED.]

B. *Intrans.*: To suit, to agree, to match; to be in congruity or harmony with.

\***as-sôrt**, s. [ASSORT, v.]

"Sit down here by one assort." *Str. Ferumbra*, (*Bull*, vol. li.) (*Richardson*.)

**as-sôrt-éd**, pr. par. & a. [ASSORT, v.]

"To be found in the well-assorted warehouses of dissenting congregations."—*Burke*.

**as-sôrt-ing**, pr. par. [ASSORT.]

**as-sôrt-ment**, s. [Eng. assort; -ment. In Dan. *assortement*; Fr. *assortiment*; Ital. *assortimento*.]

I. The act of assorting, or disposing in a suitable manner; the state of being assorted.

II. The aggregate of things assorted. *Specially*—

1. Quantities of various articles, such arranged separately from the rest and put in its own proper place.

2. Particular varieties of the same article, so selected as to match with each other; or various articles so selected that each is harmonious or in keeping with the other.

"The a curious assortment of dainty regales, To tickle the negroes with when the ship sails, Fine chains for the neck, and a cat with nine tails." *Cowper: Sweet Meat has Sour Sauce*.

"... also a fine assortment of Assatee India, &c."—*Advt. Times*, 30th Nov. 1875.

"The above assortments are easily dispensed, and have full instructions for firing on each article."—*Advt. Times*, 4th Nov. 1875.

\***as-sôt'**, v. t. [Fr. *assoler* = to infatuate with a passion.]

1. To besot, to infatuate; to cause to dote upon. [BESOT.]

"That monstrous error which doth some assot." *Spenser: F. Q.*, II. x. 2.

2. To bewilder.

"Assotted had his sense, or dazed was his eye." *Spenser: F. Q.*, III. viii. 22.

\***as-sôt'**, a. [ASSOT, v.] Infatuated; foolish.

"The willye, I weue thou be assot." *Spenser: Sheph. Cal.*, iii.

\***as-sôt'-téd**, pr. par. & a. [ASSOT, v. t.]

\***as-sôyle**, v. t. [ASSOIL.]

\***as-sôyled**, pr. par. [ASSOIL.]

\***as-sôyl-inge**, pr. par. & s. [ASSOIL, v.]

\***as-sôyl'ne**, \***as-sôyl'n**, \***as-sôyl'gne** (g silent), \***a-sôyl'ne**, s. [ESSOIN, s.]

\***as-sôyl'ne**, v. t. [ESSOIN, s. & v.]

\***as-spy'e**, v. t. [ESPY.]

**as-suâ-de** (suâ as swâ), v. t. [Pref. as = ad = intens. and Lat. *suadeo*.] To urge persuasively.

"A chance of assuading his own better judgment on the multitudes."—*Annual Review*, iv. 240. (*N.E.D.*)

as-suāge' (suā as swā), as-swāge', v. t. & i. [O. Fr. assouager, as if from Lat. assuavi-; Lat. ad = to, and suavis = sweet, agreeable.]

A. Transitive:

I. Of anything in the arrangements of nature which is extreme: To temper, to allay, to mitigate.

"Refreshing winds the summer's heats assuage, And kindly warmth disarms the winter's rage." Addison.

II. Of human feeling or emotion:

1. Of pain, sorrow, fear, or ought else depressing to the mind: To mitigate, to soothe, to allay, partly to remove.

"Unless he could assuage the woe Which his abhor'd to view below." Byron: The Prisoner of Chillon, l. 4.

2. Of the exciting emotions, and especially of anger, hatred, &c.: To appease, to pacify, to diminish, to allay.

"It's eath his ydle fury to assuage." Spenser: F. Q., II. lv. 11.

"On me, on me your kindred wrath assuage, And bid the voice of lawless riot rage." Pope: Homer's Odyssey, bk. II. si, 82.

B. Intransitive: To abate, to subside.

"And God made a wind to pass over the earth, and the waters assuaged." Gen. viii. 1.

as-suāged (suā as swā), †as-swāged, a-swāged, pa. par. [ASSUAGE, v. t.]

as-suāge-mēt (suā as swā), †as-swāge-mēt, a. [Eng. assuage; -ment.] The act of assuaging; the state of being assuaged; mitigation, abatement.

"Tell me, when shall these weary woes have end, Or shall their ruthless torment never cease, But all my days in pining languor spend, Without hope of assuagement or release." Spenser: Sonnets.

as-suā-ger (suā as swā), s. [Eng. assuage; -er.] One who or that which assuages.

†as-suā-sive (suā as swā), a. [Formed from assuade (q. v.) on model of persuasive.] Persuasive, soothing.

"It in the breast tumultuous joys arise, Music her soft assuasive voice supplies." Pope: St. Cecilia.

\*as-sūb-ju-gāto, v. t. [Lat. ad = to, and subjūgare.] To subjugate. [To subject to.]

"This thirde woth and right vallent lord Must not so stalle his palm, nobly acquir'd: Not, by my will, assubjugate his merit." Shakspeare: Troilus & Cressida, II.

as-sūb-tīle (s silent), v. t. [SUBTILE.] To render subtle. (Pattenham: Eng. Poetrie, bk. III., ch. xviii.)

†as-suō-fac-tion (ue as wē), s. [Lat. assuefacio = to accustom to, from assuetus = accustomed; ad, and sueco = to become accustomed to, and facio = to make.] The state of being accustomed.

"Right and left, as parts invenient unto the motive faculty, are differenced by degrees from use and assuefaction, or according whereto the one grows stronger." Browne: Vulgar Errors.

†as-suō-tūde (ue as wē), s. [In Ital. assuetudine; Lat. assuetudo.] Accustomedness, custom, habit.

"We see that assuetude of things hurtful doth make them lose the force to hurt." Bacon: Nat. Hist., § 67.

as-sūme, v. t. & i. [In Fr. assumer; Sp. asumir; Port. assumir; Ital. assumere. From Lat. assumo = to take to: ad = to, and sumo = to take up.]

A. Transitive:

I. Ordinary Language:

1. To take to one's self.

(1) To take to one's self that which is one's own, or anything held in common of which one has the right to make use. Used—

(a) Of man or other real or imaginary being: "Twere now indeed, to see a bard all fire, Touch'd with a coal from Heaven, assume the lyre." Cooper: Table Talk.

"His majesty might well assume the complaint and expression of King David." Clarendon.

"Trembling they stand, while Jove assumes the throne." Pope: Homer's Iliad, bk. I., 604.

(b) Fig.: Of nature or any other thing as contradistinguished from a person or being: "Nature, assuming a more lovely face, Borrowing a beauty from the works of grace." Cooper: Retirement.

(2) To take to one's self what one is not entitled to; it being eminently characteristic of those who "assume" or take to themselves anything that they take too much.

"... assumes or usurps the ascendancy." Dryden: The Hind and Panther, II. Note.

"Art girt about by demous, who assumes The words of God, and tempt us with our own Dissatisfied and curious thoughts..." Byron: Cain, l. 1.

†(3) To adopt or receive into a society.

"The sixth was a young knight of lesser renown and lower rank, assumed into this honourable company." Scott: Woodruff and Porter.

2. To take upon one's self, to arrogate to one's self authority.

"With ravish'd ears, The monarch hears, Assumes the head, Affects to nod, And seems to shake the spheres." Dryden: Alexander's Feast.

II. Technically:

Logic: To take anything for granted without proof. This may be done either through inadvertence or because what is assumed is really axiomatic.

"In every hypothesis something is allowed to be assumed." Boyle.

"... we must not therefore assume the liberty of setting aside well-ascertained facts of historical evidence." Lewis: Early Rom. Hist., ch. viii., § 1.

B. Intransitive:

1. Ordinary Language: To be arrogant or pretentious; to claim more than is one's due.

2. Law: To undertake an obligation of any kind, as by a verbal or other promise to do anything.

as-sū med, pa. par. & a. [ASSUME.]

As participial adjective:

1. Gen.: In senses corresponding to those of the verb.

"... the assumed uniformity of the exciting causes..." Darwin: Descent of Man, vol. I., pt. I., ch. IV.

2. Spec.: Pretended, hypocritical.

"Disasters new! dark Wycliffe said: Assumed despondence bent his head, While troubled joy was in his eye, The well-forged sorrow to belie!" Scott: Rokeby, l. 14.

"Brutus now throws off his assumed character..." Lewis: Early Rom. Hist., ch. xi., § 87.

\*as-sū-mēt, a. [Lat. assumendum, from assumo = to sew on, to put a patch on: ad = to, and sumo = to sew.] A patch.

"This assumed or addition Dr. Marshal says he never could find anywhere but in this Anglo-Saxonick Translation." Lewis: Hist. Eng. Bible, p. 2.

as-sū-mōr, s. [Eng. assume; -er.] One who takes to himself more than he is entitled to, or takes upon himself what he has no right or is unable to do; a pretender; also a woman who does so.

"Can man be wise in any course in which he is not safe too? But can these high assumers, and pretenders to reason, prove themselves so!" South.

as-sū-m-ing, pr. par., a., & s. [ASSUME.]

A. As pres. participle: In senses corresponding to those of the verb.

B. As adjective: Pretentious, arrogant, presumptuous, self-confident.

"His haughty locks, and his assuming air, The son of Isis could no longer bear." Dryden.

C. As substantive: Assumption, presumption.

"The vain assumings Of some, quite worthless of her [Poetry's] sovereign wreaths." B. Jonson: Poetaster.

†as-sū-m-ing-nōss, s. [Eng. assuming; -ness.] Assumption, presumption.

"Dyalogistic-viz. . . 12. Haughtiness. 13. Assumption. 14. Arrogance." Bowring: Bentham's Works, vol. I., p. 201.

as-sūmp'-sīt, a. [Lat. 3 person sing. pret. of assumo. Lit. = he has taken to or upon (him).]

Law:

1. A verbal promise made by any one, or which he may in justice be held to have more or less directly made. [See No. 2.] In the former case the assumpsit or promise is said to be explicit, and in the latter, implied. One may actually promise to pay a sum of money or build a house by a certain day, in which case the promise is deemed explicit, and an action lies against him if he violate his verbal engagement. Certain contracts are, however, so important that the law requires them to be in writing. Implied promises are such as the following:—A person, when in want of certain articles, is in the habit of obtaining them at a certain shop. Having done so, it is not legally competent for him to turn round on the shopman and say, "Proves that I ever promised to pay for the articles I received."

The law rightly judges that if there was not an explicit, there was at least an implied promise to pay for the goods, else the shopman would not have given them. So also if a person contract to build a house, and erecting it in defiance of the principle of gravity, see it tumble to pieces before his eyes, he is not allowed to plead that he knew nothing of building. His having taken the contract is held to imply that he gave himself out as competent to perform the work which he undertook to do.

"... the assumpsit or undertaking of the defendant. . . A third species of implied assumpsit is . . ." Blackstone: Comment., bk. III., ch. 9.

2. An action at law brought for the enforcement of such a promise, express or implied. (Blackstone: Comm.)

\*as-sūmp't, v. t. [From Lat. assumptus, pa. par. of assumo.] [ASSUME.] To take up.

"The souls of such their worthies as were departed from human conversation, and were assumed into the number of their gods." Sheldon: Miracles of Antichrist, p. 113.

\*as-sūmp't, s. [In Port. assumpto; Ital. assunto. From Lat. assumptum, neuter of assumptus, pa. par. of assumo.] [ASSUME.] Anything assumed.

"The sum of all your assumpsits, collected by yourself, is this." Chillingworth: Ans. to Charis's mainit. by Cath., p. 60.

as-sūmp't-ion, \*as-sūmp-ti-on, a. [In Fr. assumption; O. Fr. assumption; Sp. asunción; Port. assumpcao; Ital. assunzione; Lat. assumptio, from assumptum, sup. of assumo.] [ASSUME.]

A. Ordinary Language:

I. The act of assuming or taking to, up, upon, or for granted.

1. The act of taking to or upon one's self, or taking up, or adopting.

"The personal descent of God himself, and his assumption of our flesh to his divinity. . ." Zarnovius: Fundamentals.

"Now, war with China must mean the acquisition of territory and the assumption of immediate political power." Times, Nov. 10, 1875.

[See also B., I. 1.]

2. The act of taking for granted without proof.

"By showing that by the assumption of this wonderful intangible ether all the phenomena of optics are accounted for." Tyndall: Frag. of Science (3rd ed.), ix. 223.

II. The state of being assumed in any of the ways now mentioned.

"Adam, after a certain period of years, would have been rewarded with an assumption to eternal felicity." Wake.

"These, by way of assumption under the two general propositions, are intrinsically and naturally good or bad." Norris.

III. A thing or things assumed. Spec., a thing taken for granted without proof. (Followed by that.)

"... possible to keep a compact based on the assumption that Turkey either would or could behave like a civilized State." Times, Nov. 9, 1875.

B. Technically:

I. Theol., Church Hist., &c. According to the Greek and Roman Churches:

1. The taking of the Virgin Mary up into heaven.

"Upon the feast of the assumption of the blessed Virgin, the pope and cardinal keep the vesper." Stillingfleet.

2. In an elliptic sense: The festival commemorating this alleged occurrence. It is kept by the Roman and Greek Churches on the 15th of August. The English Church does not observe the festival, being dissatisfied with this evidence that the event which it commemorates ever took place.

II. Scots Law. A deed of assumption: A deed executed by a trustee or trustees under a deed of settlement, appointing and associating with themselves a new trustee or new trustees.

III. Her.: Arms of assumption are those which a person may, in certain circumstances, legitimately assume. They are now distinguished from assumptive arms. [ASSUMPTIVE.]

IV. Logic:

1. The minor or second proposition in a categorical syllogism.

† 2. The consequence drawn from the major and minor. (Dyche.)

3. Anything taken for granted without proof or postulate. [A., III.]

"There are, however, geologists who maintain that this is an assumption, based upon a partial knowledge of the facts." Owen: Classif. of the Mammalia, p. 65.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sīre, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, oūb, cūre, unīte, cūr, rāle, fūll; trȳ, Sȳrian. æ, œ = ē. ey = ā. qu = kw.

1. *As adjective*: Pertaining to Assyria.  
 "There is Sir Henry Rawlinson's *Assyrian Canon* . . . —*Trans. Bib. Arch. Soc.*, vol. III, (1874), p. 3.  
 2. *As substantives*: A native of Assyria, especially if belonging to the dominant race.  
 "The Assyrian came down like the wolf on the fold."  
*Byron: Hebrew Melodist; Dedic. of Sennacherib.*  
*Assyrian Language*: A dead language belonging to the Aramean, or Northern group of the Syro-Arabian tongues. Its nearest living analogue is the Neo-Syriac. It is only in the present century that it has been recovered. From its richness of grammatical forms, the late Dr. Hincks termed it "The Sanscrit of the Schematic family of languages." The researches of Sir Henry Rawlinson on the trilingual inscriptions of Behistun proved the language of Babylonia, in the time of Darius, to be essentially the same as the Assyrian of Tiglath Pileser. (*Trans. Bib. Arch. Soc.*, 1872, vol. I, p. 281.) The Biblical Archaeological Society's publications are full of information regarding Old Assyria, its language, and its history; and the general appearance of the characters in which the language is written is familiar, even to the most illiterate frequenter of the British Museum, from the numerous specimens of it covering the Assyrian sculptures in one portion of the building.

**As-syr-i-ōi-ō-gist, s.** [Lat. *Assyria*; from Gr. *Assyria* (*Assyria*), and *logos* (*logos*) = a discourse.] One who makes the antiquities and history of Assyria his special study.  
 "There is no question among *Assyriologists*, including Mr. Smith, that . . ." —*Trans. Bib. Arch. Soc.*, vol. III, p. 4.

\* **as-syth, v. t.** [ASSITH.]

\* **as-syth-mēt, s.** [ASSITHMENT.]

\* **as-tā'at, s.** [ESTATE, STATE.]

"No of hir heche *astā'at* no remembrance  
 Ne hadde sche, . . ." —*Chaucer: C. T.*, 4,799, 4,800.

\* **a-stā-bil, v. t.** [O. Fr. *establi* = to establish, to settle.] To calm, to compose, to assuage. (*Scotch.*)

"Three mynids meis and *astābils* he,  
 And gan thaim promys rest in time cumming."  
*Douglas: Virgil*, 466.

\* **as-tā-qi-an, s.** [ASTACUS.] An animal belonging to the genus *Astacus*, or at least the family *Astacidae*.

\* **as-tā-q-i-dae, s. pl.** [ASTACUS.] A family of crustaceans belonging to the order Decapoda and the sub-order Macrura. [ASTACUS.]

\* **as-tā-qi-ni, s. pl.** [ASTACUS.] Chviev's name for the *Astacidae*.

\* **as-tā-qi-te, s.** [Lat. *astacus* (q.v.), and suff. *-ite*.] Any fossil crustacean resembling a lobster or crayfish. [ASTACUS.]

\* **as-tā-ō-lite, s.** [Gr. *ἀστακός* (*astakos*) = a lobster, and *λίθος* (*lithos*) = stone.] The same as *ASTACITE* (q.v.).

\* **as-tā-ō-us, s.** [In Ital. *astaco*; from Lat. *astacus*, Gr. *ἀστακός* (*astakos*), a kind of lobster or crayfish.] A genus of decapod, long-tailed Crustaceans, the typical one of the family *Astacidae*. It contains the *A. marinus*, or Lobster, and the *A. fluviatilis*, or Crayfish. [LOBSTER, CRAYFISH.]

\* **as-tā-le, v. t.** [O. Fr. *astaller* = to display, to show.] To deck or set out. (*Scotch.*)  
 "Syne hynt to ahe his hall,  
 That was *astall* with pail."  
*Chaucer & G. D.*, l. 5. (*Jamieson.*)

\* **a-stānd'-an, v. t.** [A.S. *astandan* = to stand out, to endure.] To stand up. (*Layamon*, l. 277.)

\* **a-start, a-stört, \*st-stür-tēn, \*at-stir-tēn, \*st-stör-tēn** (pret. \***a-start-ed, a-stört, \*st-stür-te, \*at-stür-te**), v. i. & t. [Eng. *a; start*.]

**A. Intrans.**: To start from, to escape; to flee, to get free.

"That off out of her bed she did *astart*,  
 As one with view of ghosly feends afright."  
*Spenser: F. Q.*, III. li. 29.

"He to his hous is gon with sorowful *asterte*.  
 He saith, he may not from his deeth *asterte*."  
*Chaucer: C. T.*, 11,823-4.

**B. Transitive**:

1. To cause to start, to startle, to terrify, to affright; to befall, to come upon suddenly.  
 "No danger there the shepheard can *astert*."  
*Spenser: Shep. Cal.*, xl.

2. To release.

"Ther might *astert* him no pennial peyne."  
*Chaucer: C. T.*, 6,806.

3. To avoid. (*Scotch.*)

"Giff ye a goddess be, and that ye like  
 To do one payne, I may it not *astert*."  
*King Lear*, ii. 25. (*Jamieson.*)

**As-tar-tē, s.** [Gr. *Ἀστάρτη* (*Astartē*).]

1. *Myth.*: A Phœnician goddess corresponding to the Ash-toreth of Scripture. [ASH-TORETH.]

"With these in troop  
 Came *Astartē*, whom the Phœnicians call'd  
*Astarte*, queen of heaven, with crescent horns;  
 To whose bright image nightly by the moon  
 Sidonian virgins paid their vows and songs."  
*Milton: P. L.*, bk. I.

2. *Zool.*: A genus of bivalve molluscs belonging to the family Cyprinidae. They have 2-2 hinge teeth, and are suborbicular, compressed, thick, smooth, or concentrically furrowed shells. In 1875, Tate estimated the recent species known at twenty and the fossil at 285. The former belong to the temperate and arctic zones, and the latter to the rocks from the Carboniferous formation upward.

\* **a-stā'te, \*as-tā't, s.** [ESTATE, STATE.]

"And kepte so well his real *astat*,  
 That ther was nowher such a ryal man."  
*Chaucer: C. T.*, 10,340-41.

\* **as-tāt'-ic, a.** [Gr. *ἀστατικός* (*astatikos*) = never standing still; from *ἀ-*, priv., and the pass. of *ἵστημι* (*hístēmi*) = to cause to stand. Not influenced by the earth's magnetism.]

An *astatic needle* is a needle movable about an axis in the plane of the magnetic meridian, and parallel to the inclination. When so situated, the terrestrial magnetic couple acting in the direction of the axis cannot impart to the needle any determinate direction, and therefore it is *astatic*.

An *astatic system* is a combination of two needles of equal force joined parallel to each other, with the poles in contrary directions. They counterbalance each other so that the system becomes completely *astatic*, and sets at right angles to the magnetic meridian.

\* **a-stā'y, adv.** [Eng. *a*, and *stay*.]

*Naut.*: A term used of an anchor, which, on being hauled up, temporarily takes such a position that the cable or chain from which it depends forms an acute angle with the surface of the water.

\* **as-tē'er, a. or adv.** [ASTIR.] (O. Eng. & Scotch.)

\* **a-stē'ir, v. t.** [A.S. *ostyrian* = to excite.] To rouse, to excite, to stir. (*Scotch.*)

"My pleasure pricks my palms to prouke,  
 My solace sorrow sobbing to *astē'ir*."  
*K. Henry's Test. Poems*, 18th cent., p. 262.

\* **as-tē-ism, s.** [Lat. *astetismus*; Gr. *ἀστετικός* (*astetimos*); from *ἀστεῖος* (*astaios*) = urbane, polite, witty, clever; *ἄστυ* (*astu*) = a city.]

*Rhet.*: Refinement of speech; urbanity.

\* **as-tel, \*as-telle, \*as-tyl, s.** [O. Fr. *astelle*, *estelle*, from Low Lat. *astula*.] A thin board or lath. (*Prompt. Parv.*) [ASTYLL.]

\* **as-tē'l, pret. of v.** [A.S. *astelan* = to steal out.] [STEAL, v.] Escaped, stolen from.

"Neuer steuen hem *astel*, so stoken is hor tonge."  
*E. Eng. All. Poems* (ed. Morris), *Cleanliness*, 1, 624.

\* **as-tē'l-lēn, v. t.** [A.S. *astellan*, *astellan* = to appoint, to establish.] (*Stratmann.*)

\* **as-tē'l-ma, s.** [Gr. *ἀ-*, priv., and *στέμμα* (*stelma*) = a girdle, a belt; *στέλλω* (*stellō*) = to set, to place.] A genus of plants belonging to the order Asteraceae, or Compositae. The species are beautiful Cape shrubs with "everlasting" flowers.

\* **as-tē'l-ŷ, adv.** [HASTILY.]

\* **a-stēnt, s.** [Partly connected with Eng. *astent*, and with Scotch *stent* (q.v.).] Valuation. (*Scotch.*)

"That David Helyday, and his moder sal bruk and joyes the worthith of land of ald *astent* of Dalruisk, for the termes content in the lertre of assedacion." — *Act Audit.* (a. 1479), p. 89.

\* **as-teor-ven, v. t.** [A.S. *asteorfan* = to starve.] To starve; to die. (*Stratmann.*)

\* **as-tēr, s.** [In Ital. *astero*; Dnt., Ger., Fr., Sp., & Lat. *aster*; Gr. *ἀστήρ* (*astēr*) = a star; from Sansc. *as* = to shoot, in which case it means the "shooters of rays," "the darters of light," or more probably from Sansc. *star* = to strew, applied to the stars as strewing about or sprinkling forth their sparkling light.

(*Max Müller.*)] [STAR.] A genus of plants, the type of the order Asteraceae, or Compositae. It is so called because the expanded flowers resemble stars. There is but one British species, the *A. tripolium*, Sea Starwort, or Michaelmas Daisy. It is common in salt marshes. The American species are numerous.

"The popular name *Aster* is applied to some species not of this genus. Thus the China Aster is *Callistephus chinensis*, and the Cape Aster *Agathaea amelloides*.

\* **as-tēr-ā-ŷē-ōe, s.** [From the typical genus *aster* (q.v.).]

*Botany*:

\* 1. *Formerly*: An order, the fourth of five arranged to the alliance Compositae, or Asterales, the others being Calyceraceae, Mutisiaceae, Cichoraceae, Asteraceae, and Cynaraceae. These, excluding Cynaraceae, constitute the Compositae proper. The term *Asteraceae* in this sense is called also *Corymbiferae* (*Lindley: Nat. Syst. Bot.*, 2nd ed., 1836), and comprehends the larger portion of the modern Tubuliflorae.

2. *Now*: A vast order, comprising the whole of the Compositae proper. [See No. 1.] It is placed by Lindley, in his *Vegetable Kingdom* (1846), as the last order of his Campanales, or Campanal Alliance. The English equivalent term for it is *Compositae*. It includes plants like the daisy, the thistle, the dandelion, and others, possessing what, to a superficial observer, appears like a calyx, but is in reality an involucre, surrounding a receptacle on which are situated not, as might at first sight appear, numerous petals, but many florets. Their calyxes very frequently take the form of pappus; the corollas are tubular, ligulate, or both; the stamina, four or five, synergoneses, that is, united by the anthers into a tube; their style simple; and the ovaries single, one-celled, with a solitary erect ovule. In 1846, Lindley estimated the known species at 9,000, placed in 1,005 genera. They are believed to constitute about one-tenth of the whole vegetable kingdom. They are everywhere diffused, but in different proportions in different countries; thus they constitute one-seventh of the flowering plants of France, and half those of tropical America. The order is divided into three sub-orders: I. Tubuliflorae; II. Labiatiiflorae; and III. Liguliflorae. All are bitter. For more specific information regarding their qualities, see the sub-orders and some of the genera.

\* **a-stēr-ōn, v. t.** [A.S. *asteran* = to disturb.] To excite, to resuscitate. (*Stratmann.*)

\* **as-tēr-ŷ-a, s.** [In Fr. *astrie*; Port. & Lat. *asteria*; Gr. *ἀστερία* (*asteria*).]

*Min.*: Pliny's name for the sapphire when it shows a silvery star of six rays, if viewed in the direction of the vertical axis of the crystal. [ASTERIATED SAPPHIRE.]

\* **as-tēr-ŷ-as, s.** [Gr. *ἀστερίας* (*asterias*) = starred, spotted; from *ἀστήρ* (*astēr*) = a star, . . . a star-fish.] A genus of radiated animals,

ASTERIAS.

the typical one of the family *Asteridae*. It contains the several species of star-fishes. [STAR-FISH.]

\* **as-tēr-ŷ-ā-tēd, a.** [Gr. *ἀστερίος* (*asterios*) = starry.] Radiated, with rays diverging from a centre, as in a star.

*asteriated sapphire*. A variety of sapphire, having a stellate opalescence when viewed in the direction of the vertical axis of the crystals. It is the *asteria* of Pliny. (*Dana.*) [ASTERIA, ASTROITE.]

\* **as-tēr-ŷ-a-tūte, s.** [From *Asterias* (q.v.), and suff. *-tute*.] A fossil star-fish of the genus *Asterias*, or at least resembling it.

**āste, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pit, sire, sir, marine; gō, pōt, er, wōre, wōlf, wōrk, whō, sōn; mūte, oūb, cūre, unīte, cūr, rāle, fūll; trŷ, Sŷrian. ae, ce = ē. ey = ā. qu = kw.**

ās-tēr-īd, s. [Eng., &c., aster; suffix -id.] An English name for an animal belonging to the genus Asterias, or at least the family Asteriidae. (Huxley: *Class. of Animals*, p. 45.)

ās-tēr-ī-dā, ās-tēr-ī-a-dā, s. pl. [ASTERIAS.] A family of radiated animals belonging to the class Echinodermata, order Stelleriada. It contains the so-called Star-fishes.

ās-tēr-ī-d-ā, s. pl. [From the typical genus *Asterias* (q.v.).] A word used by Professor Huxley and others to designate the Asteriidae.

ās-tēr-ī-nā, s. [Lat. aster; suff. -ina.] A genus of Star-fishes. *A. gibbosa* is the Gibbous Starlet.

ās-tēr-ī-sk, s. [In Fr. *astérisque*; Sp., Port., & Ital. *asterisco*; Lat. *asteriscus*; Gr. *ἀστέρισκος* (*astériskos*) = (1) a small star, (2) an asterisk, dimin. from *ἀστὴρ* (*astēr*) = a star.]

I. Ordinary Language:

1. Lit.: A well-known star-like mark used in printing or writing to refer to a foot-note. When notes are so numerous that they exhaust the separate symbolic marks, \*, †, ‡, §, ¶, then "a" commences a new series. Sometimes one, two, or several asterisks mark an omitted portion of a word or sentence, as Lord D \* \* \*.

"[He] noted by asterisks what was defective, and by obelisks what was redundant."—*Greene*.

\* 2. Fig.: Anything in the shape of a star.

II. Eccles. & Ch. Hist.: A star-shaped frame placed over the paten in the Greek Church, to prevent anything coming in contact with the sacred bread.

\* ās-tēr-īsk, v.t. [ASTERISK, s.] To mark with an asterisk. (North: *Examen*, p. 279.)

ās-tēr-īam, s. [In Sp., Port., & Ital. *asterismo*; Gr. *ἀστέρισμός* (*asterismos*) = a marking with stars.]

1. A constellation; any small cluster of stars.

"Poetry has filled the skies with *asterisms*, and histories belonging to them."—*Bentley*; *Sermons*.

† 2. An asterisk. (*Dryden*: *Dufresnoy*.)

ās-tēr-īte, s. [ASTROITE.]

a-stēr-n, adv. [Eng. a, and stern.]

I. In a ship, near the stern.

1. In the hinder part of a ship. (Used of any person or thing at rest there.)

"The galley gives her side and turns her prow, While these *astern*, descending down the steep, Thro' gaping waves behold the boiling deep."—*Dryden*.

2. Towards the hinder part of a ship. (Used of a person on board moving, or a thing being moved, from the bow towards the stern; or of the ship itself going sternwards.)

II. In or into the water or elsewhere a greater or less distance behind a ship.

"Between latitudes 56° and 57° south of Cape Horn, the net was put *astern* several times . . ."—*Darwin*: *Voyage round the World*, ch. viii.

¶ *Astern* is opposed to *ahead*.

\* as-tēr-ne, a. [Eng. a; and stern = stern.] Stern, austere, severe. (*Scottch.*) (*Douglas*: *Virgil*.)

ās-tēr-ōid, a. & s. [In Ger. *asteroid*; Fr. *astéroïde*; Gr. *ἀστέριον* (*astērion*), and *είδος* (*eidos*) = form.]

A. As adjective: Presenting the aspect of a star.

"The *asteroid* polypes are all compound animals."—*Dallas*: *Nat. Hist. of the Animal Kingdom*, p. 56.

B. As substantives:

1. Astron.: Any single individual of a great group of minute planets placed together between Mars and Jupiter. Prof. Titius, of Wittenberg, having drawn attention in 1772 to the fact that, measuring from Mercury, each planet, with the exception of Jupiter, has an orbit just about double that nearest to it on the side of the sun, Prof. Bode, of Berlin, drew the natural inference that the one exception to the rule would probably be removed by the discovery of a planet less remote from the sun than Jupiter, and more distant than Mars. A society was formed in 1800 for the special purpose of exploring the zodiac with the hope of discovering the supposed planet, but its efforts were not crowned with success. On the first day of the nineteenth century (Jan. 1, 1801) a planetary body, afterwards called *Ceres*, was found by Piazzi (who did not belong to the society) in the part of the solar system theoretically indicated; it was, however, far more diminutive in size than had

been expected. Within the next six years three more asteroids (*Pallas*, *Juno*, and *Vesta*) were found in proximity to *Ceres*, and the suspicion arose that a goodly sized planet had either been blown to pieces by internal forces of an explosive character, or splintered in a collision with some other heavenly body. Sir D. Brewster boldly affirms this in his edition of "Ferguson's Astronomy," while Sir J. Herschel at one time ridiculed the idea. It was reasoned that if such a catastrophe had taken place, many more than four fragments of the shattered planet would probably exist; but the search having been considered futile, it was abandoned in 1816. It was subsequently resumed by M. Hencke, and from 1845 to July, 1879, no fewer than 200 have been met with. All are of minute size, and some angular in place of spherical. According to Mr. Daniel Kirkwood, an American astronomer, they would collectively make a planet only a little larger than Mars.

The term *asteroid*, applied to these small bodies, is now becoming obsolete, the appellation *minor planets* taking its place. *Planetoids* is another name. They are sometimes also called *extra-zodiacal planets*, from their orbits stretching outside the zodiac, which is not the case with those of the normal type. Authorities differ respecting some minute points in the list of asteroids. [PLANET, SOLAR-SYSTEM.]

Among those who have been particularly successful in the search for asteroids may be named the astronomers: Hind, who discovered ten in the years 1847-54; De Gasparis, whose discoveries reached nine, between 1849 and 1865; Goldschmidt, whose researches between 1852 and 1861 added fifteen to the list; and Luther, who discovered nineteen, in the years 1852-1873. Still more successful in their planetary researches have been Peters, of Hamilton College, United States, who, since 1861, has discovered forty-eight; and Palisa, of Vienna, whose first find was in 1872, and whose total discoveries number more than seventy, five of which were found in a single week. The number annually discovered has varied from four or five to seventeen, which number was found in 1875, while during the last twenty years 236 asteroids have been added to the preceding list. In fact, as the number of observers increased, the power of telescopes developed, and the charting of the stars became more full and exact, it grew more and more difficult for an interloper in the celestial spaces to escape detection, while those of a minuteness that would have made them quite imperceptible in former years, yielded the secret of their existence to the increasingly powerful telescopes that were directed towards them, and the drier and clearer atmospheres in which the newer observatories were erected.

What we have so far said is, however, in a measure ancient history as regards the search for asteroids. It applies only to the years preceding 1892. In that and the subsequent years the search for these planetary bodies has been conducted on a new method, of a far more effective character, and new examples are being added to the planetary chart with a remarkable rapidity; an annoying one, indeed, to astronomers, who are beginning to find the crowd of small bodies thus gliding through the starry spaces, and needing to be recognised and named, something of a burden. The naming of them, indeed, has been no small task. The larger planets having been named after the principal mythological gods, with a place reserved among them for a single goddess, the first four and largest of the asteroids were named after the remaining goddesses of high estate. When, later, smaller asteroids began to be added in rapid numbers to the list, they were given the names of the minor goddesses, the nymphs and other deific beings, the Scandinavian mythology supplying a few names to the list. At a later date the "embarrassment of riches" required that names should be taken from other sources than mythology, and the women of history, literature and legend were drawn upon, such titles as Virginia, Sappho, Antiope, Hecuba, Cassandra, Hermione, and various others from ancient times being applied, while more modern times furnished the titles of Brunhilda, Hilda, Bertha, Eva, Ophelia, Maria, and others of the same general character. More recently the method of numbering has been adopted, the available names threatening to become exhausted. This, however, is a matter of curious interest only; the new method by which asteroids are discovered

is of much more moment, and calls for a brief description. The system employed is that of photography, a method which is being applied to the secrets of the heavens generally, with a variety of unexpected and important results. Previous to 1892 the searcher after asteroids was obliged to prosecute his search by a slow and laborious process. He was first obliged to make a careful and accurate chart of all the stars visible within certain fixed localities of the heavens, inserting in his map, in their correct places, all the stars visible in the field of his telescope. This done, he gave himself to a careful re-examination of those spaces, as they come one by one opposite the sun, and took their place in the midnight skies, observing them minutely, and watching to see if any star appeared not already on his chart. If such a star were seen it might possibly be a variable star, but was far more likely to be a planet. To settle this question a few hours' observation alone was needed. If a star, it would remain fixed in relative place; if a planet, it would move, slightly changing its place among the stars. Once shown to have a motion of its own, a few days' observation would serve to determine its orbit, and decide whether it was a new planetoid or a re-discovery of one of the older ones, since some of the latter have escaped from observation and have been "adrift" for many years, the original determination of the elements of their orbits not having been accurate.

This tedious process of star-charting, and slow comparison, star by star, of chart and sky, are no longer necessary. The photographic camera does the work far more surely and satisfactorily, and also serves to trace asteroids of a size below the level of telescopic reach. At present the asteroid hunter does his work with a specially constructed lens of from six to eight inches in diameter, mounted like an equatorial telescope, and so adjusted and arranged that it can be made to follow, hour after hour, the diurnal motion of the stars. By this instrument a photograph can be taken of a field of the heavens several hundred times as great in area as can be commanded by the field of view of an ordinary telescope. Several hours are needed for the process, the light of the stars being so faint that it takes hours to impress itself upon the sensitive film. But this exposure for hours is necessary for the discovery of an asteroid, since it gives time for the motion of the latter to declare itself. If all goes well, each of the thousands of stars in the field of the instrument will be impressed upon the photographic plate as a distinct round dot, but if there be a planet among them it will be indicated by a streak or line, due to its movement, and the length and direction of the line will indicate how the body is moving. In some instances two or three such asteroids have been detected on a single plate. This new method of research has proved highly effective. In 1893 no less than forty such discoveries were made. Some of these had been seen before, and some are doubtful, but twenty-one of them have been added definitely to our system, and received their appropriate numbers. It is to be feared that the photographic plate may eventually add several thousands to the number now known, and that they may come so fast and numerous as to be unwelcome additions to our family of planets.

The largest of the asteroids is believed to be not over 450 miles in diameter. The smallest—to be hereafter discovered—may be but a very few miles. The whole body of them cannot contain more than one-fourth the mass of the earth. Their orbits differ greatly, some of them being of great eccentricity and inclination to the ecliptic, others of small, while their distances from the sun vary similarly, so that their orbits are intricately interlaced and, if viewed perpendicularly, would form a kind of net-work. Of those traced up to 1891, *Medusa* (No. 149) has the shortest period of revolution, 137.69 days; and *Hilda* (No. 153) the longest, 2869.92 days. The latter is nearly twice as far from the sun as the former. *Polyhymnia's* orbit has the greatest eccentricity, amounting to 0.33998; *Lomia's* the least, 0.2176. The nearest approach to the sun is made by *Phocæ*, its perihelion distance being 1.787 the earth's mean distance. *Freia* recedes the farthest, its aphelion distance being 4.002. *Massalia's* orbit makes the smallest angle with the ecliptic of any planet known, it being only 41' 7"; while the inclination of the orbit of *Pallas* reaches the high angle of 34° 42' 41".

**2. Pyrotechnics:** A firework which projects star-like bodies into the air.  
 "... rockets with pearl stars... ditto with magenta stars... Asteroids changing colours while sailing through the air."—*Advt. in Times*, Nov. 4, 1875.

**ās-tēr-ōi-da**, s. pl. [Gr. *ἀστὴρ* (*astēr*) = a star; *εἶδος* (*eidos*) = form, shape.] An order of radiated animals, the second of this class Polyp. All the species are compound animals inhabiting a polypidom. The polypes have eight flat tentacles arranged round the mouth in a single circle. The order consists of four families—the Tubiporidae, the Alcyonidae, the Gorgonidae, and the Pennatulidae.

**ās-tēr-ōi-dal**, a. [Eng. *asteroid*; -al.]

**I. Astronomy:**

1. *Gen.*: Relating to any star.

2. *Spec.*: Relating to the asteroids.

**II. Zool.**: Relating to the Asteroids (q.v.)

**ās-tēr-ō-ite**, s. [Gr. *ἀστὴρ* (*astēr*) = a star, and *αἴμα* (*haima*) (q.v.)] A mineral, a variety of Augite.

**ās-tēr-ō-lēp-is**, s. [Gr. *ἀστὴρ* (*astēr*) = a star, and *λεπίς* (*lepis*) = a scale, from *λέπω* (*lepō*) = to strip off a rind, to peel.] A genus of genoid fishes named on account of the star-like marking of what were at first supposed to be scales, but which were afterwards found to be the dermal plates of the head. A bone of a species belonging to this genus, found at Stromness, the capital of Orkney, suggested to Hugh Miller the writing of his beautiful volume entitled *Footprints of the Creator*; or, the *Asterolepis of Stromness*. It was an elaborate argument against the development hypothesis. According to that hypothesis, the first species of any class appearing on the scene should be low in organisation, and probably small in size. Mr. Miller showed that the *Asterolepis* was large in size and high in organisation, and yet it was at that time believed to be the oldest fossil vertebrate found in Scotland. His argument was subsequently weakened by the discovery that the Stromness rocks were less ancient than the Forfarshire beds, containing *Cephalaspis* and other fish genera subsequently discovered, mostly of small size, though not of low organisation.

**ās-tēr-ō-phyl-lī-tēs**, s. [Gr. *ἀστὴρ* (*astēr*) = a star; *φύλλον* (*phyllon*) = a leaf; and *αἴμα* (*haima*) (q.v.) = of the nature of.] A genus of Cryptogamous plants, allied to Calamites, belonging to the order Equisetaceae. All are fossil, and belong to the Carboniferous period. Their name was given on account of the starry appearance of the verticillate foliage. Their stems were articulated and branched, and it is now known that the fossils termed *Volkmanian* constituted their fructification.

\* **a-stēyate**, v. t. [ATTAINTE.]

**ās-thēn-ī-a**, † **ās-thēn-ī-y**, s. [Gr. *ἀσθένεια* (*asthēnia*); from *ἀσθενής* (*asthēnēs*) = without strength; *ἄ*, priv., and *σθένος* (*sthēnos*) = strength.]

*Med.*: Absence of strength; debility.

**ās-thēn-ī-o**, a. [Gr. *ἀσθενικός* (*asthēnikos*).]

*In Medicine:*

1. *Of persons:* Weakly, infirm; marked by debility.

2. *Of diseases:* Produced by debility; the result of exhausted excitability.

"Upon these principles he [Brown] founded the character and mode of treatment of all diseases, which were supposed to consist but of two families, the *asthenic* and the *asthenic*, the former produced by accumulated, the latter by exhausted, excitability, and marked by indirect debility."—*Dr. Tweedie: Cycl. Pract. Med.*, vol. ii., p. 160.

[See BRUNONIANE.]

**ās-thēn-ōi-ō-gy**, s. [Gr. *ἀσθένεια* (*asthēnia*), and *λόγος* (*logos*) = a discourse.] A discourse concerning asthenic diseases. The department of medical science which treats of those diseases in which debility is a marked feature.

**āsth-ma**, s. [Ger. *asthma*; Fr. *asthme*; Sp., Port., & Ital. *asma*; Gr. *ἀσθμα* (*asthma*); from *ἄω* (*āō*) = to blow.]

*In Medicine:*

1. *Gen.*: Chronic shortness of breath, from whatever cause it may arise. Till a comparatively recent period good medical writers used

the term in this wide sense, and non-professional writers and the public do still.

2. *Specially:* Asthma, or spasmodic asthma, is "a difficulty of breathing, recurring in paroxysms, after intervals of comparatively good health, and usually unaccompanied by fever." It is most common in persons possessing the nervous temperament. After some precursory symptoms, it commences, often at night, with a paroxysm in which there is a great tightness and constriction of the chest. The patient breathes with a wheezing sound, and flings open the door or throws up the window in the effort to obtain more air. After a time the paroxysm passes away. Other fits of it probably succeed on subsequent days, but by no means with the regularity of intermittent fever. It is produced by a morbid contraction of the bronchial muscles. There are two leading varieties of the disease, a nervous and a catarrhal, the former of pure sympathetic and symptomatic forms, and the latter latent, humeral, and mucous chronic sub-varieties, besides an acute congestive, and an acute catarrhal form.

**āsth-māt-īc**, \* **āsth-māt-īok**, adj. & s. [In Fr. *asthmatique*; Sp. Port., & Ital. *asma-tico*; Lat. *asthmaticus*; Gr. *ἀσθματικός* (*asthmaticos*) = asthmatic, panting, breathing hard, from *ἀσθμα* (*asthma*).] [ASTHMA.]

**A. As adjective:**

1. Pertaining or relating to asthma.

"... the *asthmatic* paroxysms..."—*Cyclo. Pract. Med.*, vol. i., p. 188.

2. Affected or threatened with asthma.

"He was *asthmatic* and consumptive."—*Macaulay: Hist. Eng.*, ch. vii.

**B. As substantives:** A person affected or threatened with asthma.

"*Asthmatics* cannot bear the air of hot rooms, and cities where there is a great deal of fuel burnt."—*Arbuthnot: Air*.

"... an old *asthmatic*."—*Cyclo. Pract. Med.*, vol. i., p. 188.

And set it aboue vpon the *astire*."

*Schole House of Women*, 820. (Boucher.)

\* **as-tī't**, \* **as-tī'te**, \* **as-tī'te**, adv. [Eng. *as*, used as a prefix; Icel. *titt* = ready; A.S. *tīd* = time, tide.]

1. At once; immediately, suddenly.

"I schal telle hit, *as-tī't*, as I is toon herde,  
With tongue."

*Str. Gower & the Green Knight* (ed. Morris), 31-2.

2. Quickly.

"Therefore trewely *as-tī't* he told him the sothe."

*William and the Werwolf*, 280. (Boucher.)

"He dyde on bys clothyb *as-tī'te*."

*M.S. Hart*, l. 701, l. 46, b. (Boucher.)

3. Rather. (Jamieson.)

**ās-tī-ūnc**, s. [ASTRON.] A certain kind of precious stone.

"There is saphire and unioce,  
Carbuncle and *astūnc*."

*Watson: Hist. Eng. Poetry*, l. 11. (S. in Boucher.)

**a-stōm-a-ta**, s. pl. [Gr. *ἄ*, priv., and *στόμα* (*stoma*), genit. *στόματος* (*stomatōs*) = mouth.]

*Zoology:* An order of Infusoria, containing those animals which have no true or determinate mouth. It contains the families Astaciadae, Dinohryadae, Peridinidae, and Opallinidae.

**a-stōm-a-tōus**, a. [ASTOMATA.] Pertaining to the above-mentioned astomata. Without a mouth. (Owen.)

**ās-tōm-ōus**, a. [Gr. *ἀστος* (*astomos*); from *ἄ*, priv., and *στόμα* (*stoma*) = a mouth.]

1. *Zool.*: Mouthless.

2. *Biol.*: Without a mouth or similar aperture. (Used of some animals low in organisation, of mosses whose capsules have no aperture, &c.)

\* **as-tōn-ay**, v. t. [ASTONY.]

\* **as-tōne**, v. t. [ASTONY.]

\* **as-tōn-īed**, \* **as-tōn-āyd**, \* **as-tōn-ēyd**, \* **as-tōn-īed**, \* **as-tōn-īed**, \* **as-tōn-īd**, \* **as-tōn-ēd**, \* **as-tōn-ēd**, \* **as-tōn-ēyed**, pa. par. [ASTONY.] Astonished, dismayed.

"Then was King Belshazzar greatly troubled, and his countenance was changed in him, and his lords were *astōnīed*."—*Dan*, v. 9.

"He was so *astōnīed* of that dents  
That ugh he had his lyff reute."

*K. Richard*, 421. (Boucher.)

"She was *astōnīed* in that stowde,  
For in hy face she saw a wounde."

*Gwaine and Gawain*, l. 218. (Boucher.)

"No wonder is though that sche were *astōnīed*,  
To seen so gret a gett come into that place."

*Chaucer: G. T.*, 8, 213-14.

"For which this Enelye *astōnīed* was."

*Ibid.*, 2, 863.

"... were wonderfully therat *astōnīed*."—*Star-hurt*; Ireland, p. 14.

\* **as-tōn-īed-nēss**, s. [Eng. *astontied*; -ness.] The state or quality of being astontied. "Astontiedness or dullness of the mind, not perceiving what is done."—*Barr: Dict.*, "Bewundering."

**as-tōn-īsh**, \* **as-tōn-īsh**, v. t. [Old Fr. *astonner*, *astoner*; Mod. Fr. *astonner*; from Lat. *astontius* = thunder-struck; *astono* = (1) to thunder at, (2) to astupefy; *ad* = to, and *tono* = to thunder (cf. A.S. *astunian* = to stun). Closely akin to ASTONY, ASTOUND, and STUN.]

1. To strike with a hard body, as if one had been smitten with a thunder-bolt. (French.)

2. To send a shock through, so as to benumb the part smitten, or to stun by a blow.

"The cramp-fish [the torped] knoweth her own force and power, and being herself not benumbed, is able to *astontish* others."—*Falton's Fishing*, vol. i. 264. (See French's *Select Glossary*, p. 11.)

"And sure, had not his massy iron wall  
Betwixt him and his hurt been happily,  
It would have cleit him to the living place;  
Yet, as it was, it did *astontish* him long space."

*Spenser: F. Q.*, li. v. 11, 22.

3. To inspire suddenly with great amazement, as if one had been struck by lightning, or at least appalled by a loud peal of thunder. To strike with sudden terror, surprise, or wonder; to amaze.

"... the people were *astontish* at his doctrine."—*Mait*, vii. 23.

**as-tōn-īshed**, pa. par. & a. [ASTONISH.]

"For lo! the god in dusky clouds enshrin'd,  
Approaching, desol't staggering bow behind."

His spear in shivers falls; his baldric strews the field.  
The corselet his *astōnīsh'd* breast forsooke."

*Pope: Homer's Iliad*, bk. xvi., 854-68.

"And start the *astōnīsh'd* shades at female eyes,  
And thundering tube the aged angler hears."

*Wordsworth: Descriptive Sketches*.

**fate**, **fāt**, **fāre**, amidst, **whāt**, **fāll**, father; **wē**, **wēt**, here, camel, **hēr**, there; pine, pit, sire, sir, marine; **gō**, **pōt**, or, **wōre**, **wōlf**, **wōrk**, **whō**, **sōn**; **mūte**, **cūb**, **cūre**, **unite**, **cūr**, **rūle**, **fūll**; **trȳ**, **Sȳria**. **ae**, **ce** = **ē**. **ey** = **ā**. **qu** = **kw**.

as-tōn-īsh-īng, pr. par. & a. [ASTONISH.]

"The short space of sixty years has made an astonishing difference in the facility of distant navigation."—Darwin: Voyage round the World, ch. xxi.

as-tōn-īsh-īng-lī, adv. [Eng. astonishing; -ly.] In an astonishing manner; wonderfully.

"We crossed a large tract of land astonishingly fruitful."—Seaborn: Spain, Lett. 14. "It cannot be denied that the great house of Smith has held its own astonishingly well throughout the ages."—Daily Telegraph, December 5, 1877.

as-tōn-īsh-īng-nēss, s. [Eng. astonishing; -ness.] The quality of being fitted to excite astonishment, or of actually exciting it. (Johnson.)

as-tōn-īsh-mēt, s. [Eng. astonishing; -ment.] In Fr. étonnement.]

1. The act of astonishing.
2. The state of being astonished; the emotion produced when something stupendous, stunning, wonderful, or dreadful is presented to the mind.

"The Lord shall smite thee with madness, and blindness, and astonishment of heart."—Deut. xxviii. 28.

"And Babylon shall become heaps, a dwelling-place for dragons, an astonishment, and a hissing, without an inhabitant."—Jer. li. 37.

\*as-tōn-ŷ, \*as-tōn-aye, \*as-tōnn-ŷ, \*as-tōyne, \*as-tōne, \*as-tū-nī-ēn, v.t. [From O. Fr. estonner.] To stun; to astonish. [ASTONISH, ASTOUND, STUN.] (Almost always in the pa. par.) [ASTONIED.]

¶ It may be followed by *at*. With is now obsolete.

¶ *Astony* and *astonish* co-existed for a considerable period, commencing at least as early as the first part of the sixteenth century. Richardson gives an instance of the use of *astonish* in A. D. 1535. [ASTONISH.]

\*as-tōn-ŷed, \*as-tōn-ŷd, \*as-tōyn'ed, pa. par. [ASTONIED.]

\*as-tōn-ŷ-īng, \*as-tōn-ŷnge, \*as-tōyn-ŷage, pr. par. & s. [ASTONV.]

As *subst.*: Stupefaction, amazement. (Prompt. Parv.)

\*a-stōre, \*a-stōr-ŷn, v.t. [O. Fr. estorer = provisions, equipage.]

A. (Of the form *astoryn*): To store. (Prompt. Parv.)

B. (Of the form *astore*): To provide with stores.

"For sevene yer, and yitt more, The castel he gan astore, Fyftene thousand l fynd in book; He left, that cytē for to look."—Richard, 4, 486. (Boucher.)

as-tōund, v.t. & i. [From O. Eng. astounded, pa. par. of *astone* (q. v.). In A. S. *astundian* = to astound, to grieve, to suffer grief, to bear; O. Fr. *estonner*.] [ASTONISH.]

1. Trans.: To stun; to strike with amazement.

"These thoughts may startle well, but not astound The virtuous mind, that ever walks attended By a strong sidig champion, conscience."—Milton: *Comus*.

"... but Preston, astounded by his master's sight, ... Maccabey: *Hist. Ery.*, ch. x.

2. Intransitive: To send forth a stunning sound; to peal forth as thunder.

"The lightning's flash a larger curver, and more The noise astounds."—Thomson: *Summer*, 1, 137-8.

as-tōund-ēd, † as-tōund, pa. par. & a. [ASTOUND.]

as-tōund-īng, pr. par. & a. [ASTOUND.]

as-tōund-mēt, s. [Eng. astound; -ment.] Astonishment.

\*as-tōun-ŷed, pa. par. [ASTONIED.]

\*as-tōyn-ŷn, \*as-tōyn, v.t. [ASTONV.] To shake, to bruise. (Prompt. Parv.)

Ās-tra-cān', Ās-tra-khān, s. & a. [For etym. see def.]

A. As *substantive*:

1. *Geog.*: A province of Russia, on the north-west of the Caspian.

2. *Comm.*: A name given to curled, woolly skins, obtained from the sheep found in the province of Astracan, and in Persia and Syria; a fabric with a pile in imitation of this.

B. As *adj.*: Made of, or resembling, the skins or fabric described under A. 2.

Ās-træ-a (1), Ās-træ-a, s. [Lat. *Astræa*.]

I. *Class. Myth.*: The goddess of justice. Like other divinities, she lived for a time on the earth, but being disgusted with the iniquity of mankind, she was obliged to quit it, being, however, the last of the deities to depart. When at length she went away she was transformed into a constellation (Virgo).

"This our land contains Some in whose heart, divine *Astræa* reigns."—*Times Whistle*, E. K. Text Soc., act. 4, 1, 330-4.

"In this life of probation for rapture divine, *Astræa* declares that some penance is due."—*Byron: Love's Last Adieu*.

II. *Astronomy*:

\*1. The constellation Virgo, called also *Erigone* and *Isis*. [See No. I.]

"Hung forth in heaven his golden Scales, yet seen Betwixt *Astræa* and the Scorpion sign."—*Milton: P. L.*, bk. iv.

\*2. An asteroid, the fifth found. It was discovered by Hencke on the 8th December, 1845.

Ās-træ-a (2), s. [From Gr. ἀστραία (*astraias*) = stary, starred; ἀστρον (*astron*) = a star; generally in pl. ἀστροα (*astra*) = the stars.]

*Zool.*: A genus of radiated animals, the typical one of the family *Astræida*. It received the name *Astræa* because the animals are thickly studded over it like stars in the sky. There are many recent and also many fossil species.

Ās-træ-an, a. [From *Astræa* (q. v.).] Pertaining to *Astræa*; favoured by the presence of *Astræa*.

" latent on her, who rapt in glorious dreams, The second-sight of some *Astræan* age."—*Tennyson: The Princess*, li.

Ās-træ-i-dæ, s. pl. [From *Astræa*, the typical genus.] [ASTRÆA (2).]

*Zool.*: A family of radiated animals belonging to the class *Polyp* and the order *Hellathoïda*. It is especially in this family that the formation of coral reefs is to be attributed. It contains the genera *Astræa*, *Meandrina*, &c.

Ās-tra-gāl, s. [ASTRAGALUS.]

Ās-tra-gāl-ō-ŷe, s. pl. [ASTRAGALUS.] A tribe of *Papilionaceous* plants, of which the genera *Astragalus* and *Oxytropis* have representatives in the British flora.

as-trag-al-ō-mān-ŷy, s. [Gr. ἀστραγάλος (*astragalos*), in the plur. = dice, and μαντεία (*maneteia*) = divination.] Pretended divination performed by throwing down small dice with marks corresponding to letters of the alphabet, and observing what words they formed. It was practised in the temple of Hercules, in Achaia.

as-trag-al-ūs, ās-tra-gāl, s. [In Fr. *astragale*; Sp., Port., & Ital. *astragalo*; Lat. *astragalus*; Gr. ἀστραγάλος (*astragalos*) = the ball of the ankle-joint. A leguminous plant, so called because its knotted root resembled an ankle-joint. In *Arch.*, a moulding in the capital of an Ionic column.]

A. (Of the form *astragalus*):

1. *Anat.*: One of the bones belonging to the tarsus.

"The tibia rests upon the *astragalus*, and through that bone transmit the weight to the foot."—*Todd & Bowman: Physiol. Anat.*, vol. 1, p. 148.

2. *Bot.*: A genus of plants belonging to the order *Fabaceæ* and the sub-order *Papilionaceæ*. The English name is *Milk Vetch*. The genus contains three British species, of which the best known one is *A. hypoglottis*, the Purple Mountain Milk-vetch. It is not an Alpine plant, but is found at the sea-level. It has large bluish-purple flowers. *A. verus* furnishes *Gum-tragacanth* (q. v.). It is a native of Northern Persia. The seeds of *A. botucius*, after being roasted and ground, are used in Hungary as a substitute for coffee. There are many other foreign species of *Astragalus*, many of them ornamental.

B. (Of the forms *astragal* and *astragalus*):

"... but Preston, astounded by his master's sight, ... Maccabey: *Hist. Ery.*, ch. x.

"The lightning's flash a larger curver, and more The noise astounds."—*Thomson: Summer*, 1, 137-8.

as-tōund-ēd, † as-tōund, pa. par. & a. [ASTOUND.]

as-tōund-īng, pr. par. & a. [ASTOUND.]

as-tōund-mēt, s. [Eng. astound; -ment.] Astonishment.

\*as-tōun-ŷed, pa. par. [ASTONIED.]

\*as-tōyn-ŷn, \*as-tōyn, v.t. [ASTONV.] To shake, to bruise. (Prompt. Parv.)

Ās-tra-cān', Ās-tra-khān, s. & a. [For etym. see def.]

A. As *substantive*:

1. *Geog.*: A province of Russia, on the north-west of the Caspian.

2. *Comm.*: A name given to curled, woolly skins, obtained from the sheep found in the province of Astracan, and in Persia and Syria; a fabric with a pile in imitation of this.

B. As *adj.*: Made of, or resembling, the skins or fabric described under A. 2.

Arch.: "A small semi-circular moulding or Bead, sometimes termed Roundel." (Gloss. of Architecture.)

"I presume the three sets of double *astragali* at the base of the columns, one of which is in the British Museum were all ended with gold fillets, as here described."—*Letter of Mr. Wood, entitled "Diama of the Ephesians," Times*, Feb. 17, 1874.

as-tra-kan-ite, s. [In Ger. *astrakanit*.] From *Astrakan*, near which it occurs.] A mineral, with whitish crystals. It is the same as *Bloedite* (q. v.).

ās-tral, a. [Oer., Fr., Sp., & Port. *astral* (adj.); Ital. *astrale* (adj.); Lat. *astralis* (adj.), from *astrum* = a star; Gr. ἀστρο (*astra*), pl. = the stars.]

A. As *adjective*:

1. Pertaining to the stars; stary.

"Some *astral* forms I must invoke by prayer, Frank! all of purest atoms of the air; Not to their natures simply good or ill, But most subservient to bad spirits' will."—*Dryden*.

2. In *Theosophy*: Noting an ether-like substance said to pervade all space.

B. As *substantive*:

1. The same as *ASTRAL LAMP* (q. v.).

"The tallow candle an *astral* shone."—*Whittier*.

2. An *astral* body.

*astral*-body, s. A wraith, a double; an ethereal body.

*astral* lamp. A lamp similar in character to an Argand Lamp (q. v.).

*astral* spirits, or spirits dwelling in the heavenly bodies, in the demonology of the Middle Ages were conceived of sometimes as fallen angels, sometimes as souls of dead men, or as spirits originating in fire and hovering between heaven, earth, and hell without belonging to either.

a-strānd, a. or adv. [Eng. *a* = *on*; *strānd*.] Stranded.

"As the tall ship, . . . Amid the breakers lies *a-strand*."—*Scott: Lady of the Lake*, vi. 13.

as-trān-tī-a, s. [In Ger. *astrans*; Fr. *astrance*; Port. *astrancia*.]

*Bot.*: Masterwort. A genus of plants belonging to the order *Apiaceæ*, or *Umbellifera*. The *A. major* has escaped from gardens here and there in Britain, but is not wild.

ās-tra-pæ-a, s. [Or. ἀστροπαίος (*astrapaios*) = pertaining to lightning; ἀστραπή (*astrapē*) = a flash of lightning.] A genus of plants belonging to the order *Sterculiaceæ*, or *Sterculiada*, and the tribe *Dombeyæ*. It has large heads of flowers so splendid in colour that they suggested the choice of the generic name. The *A. Wallichii* was introduced into Britain from Madagascar in 1820.

a-strāy, \*a-strāy'e, adv., v., & s. [Eng. *a* = *on*; *strāy*.]

A. As *adverb*:

1. *Lit.*: Out of the right path, or enclosure, or place, where the person or animal described as straying ought to be.

"For ye were as sheep going *astray*; but are now returned unto the shepherd and Bishop of your souls."—*Peter*, ii. 25.

2. *Fig.*: Out of the path of truth, of propriety, or of moral rectitude.

"You run *astray*; for whilst we talk of Ireland, you rip up the original of Scotland."—*Spenser: Ireland*.

B. As *verb*: To stray away.

"They *astray* from God."—*Hudson: Judith*, ii. 352.

C. As *substantive*: An animal or a person out of the right way or place. (Prompt. Parv.)

\*a-strāy-lī, adv. [Eng. *astray*; -ly.] The same as *ASTRAY*, adv. (q. v.). (Prompt. Parv.)

\*as-tre (tre = tēr), s. [Fr. *astre*, from Gr. ἀστρον (*astron*) = a star.] A star. (Scotch.)

"The glittering *astres* bright."—*Burns: Chron. & P.*, iii. 358. (Jamieson.)

Ās-træ-a, s. [ASTRÆA (1).]

\*as-træ-la-bre (bre = bër), s. An old spelling of *ASTROLABE*.

\*a-strength'e, v.t. [A. S. *strengan* = to strengthen; *strengthu* = strength.] To strengthen.

"This is a vale miracle that that godpel of to day us telleth. Therefore as here be-lieve big the betere a-strengthe."—*Old Kentish Sermons* (ed. Morris), p. 22.

\*a-stret'ch-ŷn, \*a-stret'che, v.t. [A. S. *astrecan*, *astrecan*, *astrecan*, *præt. astrette*, pa. par. *astret* = to stretch out, to bow down.] To stretch out, to reach. (Prompt. Parv.)

bēl, bēy; pōut, jōwī; cat, çell, chorus, çhim, bench; go, gem; thin, this; sin, a; expect, Xenophon, exist. -īng -cian, -tian = çhan. -tion, -sion = shūn. -fion, -çion = zhūn. -tious, -çious, -çious = shūs. -ble, -dle, &c = bēl, dēl.

**a-strict**, *v.t.* [From Lat. *astriectus*, pa. par. of *astringo*: *ad*=to, and *stringo*=to draw tight; Gr. *σπράγγω* (*strangō*)=to draw tight.] [ASTRINGE.]

**A. Ord. Lang.:** To contract by means of an application; to bind fast.

"The solid parts were to be relaxed or *astriected*, as they let the humours pass, either in too small or too great quantities."—*Arbuthnot: Aitment.*

**B. Law:** Legally to bind. (*Scotch.*)

"None saide holdin nor *astriect* to mak forder payment of their parts of the said taxation."—*Acts Jas. VI. (1585).*

**a-strict**, *a.* [In Port. *astriecto*; Lat. *astriectus*, pa. par. of *astringo*.] Contracted, concise.

"An epithet is a superscription, or an *astriect* pithy diagram."—*Weaver: Funeral Mon.*

**a-strict-ion**, *s.* [In Fr. *astriktion*; Sp. *astricción*; Port. *adstricção*; Lat. *adstrictio*.] [ASTRICT, *v.*]

**A. Ordinary Language:**

**I.** The act or capability of binding closely. *Used—*

(1) *Of the body:*

"This virtue requirith an *astriktion*, but such an *astriktion* as is not grateful to the body. . . for a pleasing *astriktion* doth rather bind in the humours than expel them; and therefore such *astriktion* is found in things of an harsh taste."—*Bacon: Nat. Hist., Cent. I., § 40.*

(2) *Of the mind and will:*

"So of marriage he is the author, yet hence will not follow any divine *astriktion* more than what is subordinate to the glory of God, and the main good of either party."—*Milton: Doctrines of Divorce, bk. I., ch. 18. (Richardson.)*

**II.** The state of being so bound, physically or mentally.

"Lenitive substances are proper for dry atrahilarian constitutions, who are subject to *astriktion* of the belly and the piles."—*Arbuthnot: Diet.*

**III.** That which binds closely; an *astriectant*.

"*Astriktion* is in a substance that hath a virtual cold, and it worketh partly by the same means that cold doth."—*Bacon.*

¶ See also example under I. (1).

**B. Technically:**

**1. Med.:** In the same senses as those under A. I. (1), II. & III.

**2. Scots Law:** An obligation, whether by contract or by old law, to have corn ground at a particular mill, where it is subject to an impost called *multure* or *thirlage*.

**a-strict-ive**, *a.* [Eng. *astriect*; *-ive*.] Possessing the quality of contracting or binding; styptic.

"The naked branches and bunches whereupon there were grapes have an *astriectiv* vertue."—*Holland: Pliny, bk. xliii., ch. 1. (Richardson.)*

**a-strict-ōr-ŷ**, *a.* [Lat. *astrictorius*.] Possessing the quality of contracting or binding; *astriecting*; actually contracting or binding.

**a-strīde**, *adv.* [Eng. *a*; *stride*.]

**1. Lit.:** With the legs across, as when a person is on horseback.

"And yet for all that rode *astride* on a beast."—*C. Cotton: A Voyage to Ireland.*

**2. Fig.:** Supported on either side of anything, as spectacles on the nose.

" . . . and glasses with horn bows *astride* on his nose, with a look of wisdom supernatural."—*Longfellow: Evangeline, pt. I., 2.*

**as-trif-ēr-ōūs**, *a.* [Lat. *astriifer*; *astrum* = a star, and *fero* = to bear.] Bearing stars; starry. (*Johnson.*)

**as-trig-ēr-ōūs**, *a.* [Lat. *astriger*, from *astrum* = a star, and *gero* = to carry.] Carrying stars; starry. (*Johnson.*)

**a-strīk-kīt**, *pa. par.* [ASTRICT.] (*Scotch.*)

**a-string'e**, *v.t.* [In Fr. *astreindre*; Sp. *astringir*; Port. *adstringir*; Ital. *astringere*; from Lat. *astringo*.] [ASTRICT, *v.*]

**1. Lit.:** To bind together, by compressing the parts which till then have remained separate; to compress.

"Tears are caused by a contraction of the spirits of the brain; which contraction, by consequence, *astringeth* the moisture of the brain, and thereby seedeth tears into the eyes."—*Bacon.*

**2. Fig.:** To bind the mind or conscience by an obligation. (*Walsey.*)

**a-strīn-gēn-cŷ**, *s.* [In Fr. *astringence*; Port. *adstringencia*, *astringencia*; Ital. *astringenza*, *astringencia*; from Lat. *astringens*, pr. par. of *astringo* = to draw close, to bind.] [ASTRINGE.] This act or power of binding or contracting any part of the bodily frame. (It is opposed to RELAXATION.)

"*Astriktion* prohibeth dissolution; as, in medicines, *astriectants* inhibit putrefaction; and by *astriectancy*, some small quantity of oil of vitriol will keep fresh water long from putrefying."—*Bacon: Nat. Hist.*

"Act, acid, austere, and bitter substances, by their *astriectancy*, create horror; that is, stimulate the fibres."—*Arbuthnot.*

**a-strīn-gēnt**, *a. & s.* [In Fr. *astringent*; Sp. & Ital. *astringente*; Port. *adstringente*; from Lat. *astringens*, pr. par. of *astringo*.] [ASTRINGE.]

**A. As adjective:**  
**1.** Contracting and condensing the muscular fibre. (It is opposed to LAXATIVE.)

"*Astriectant* medicines are binding, which act by the asperity of their particles, whee they corrugate the membranes, and make them draw up closer."—*Quincy.*

**2.** It is sometimes used of tastes which seem to contract the mouth.

**B. As substantive:**

**Med.:** A substance which produces contraction and condensation of the muscular fibre: for instance, when applied to a bleeding wound they so contract the tissues as to stop the hemorrhage. The contraction thus produced is different from that effected by an ordinary stimulant, and from that caused by the administration of a tonic. [STIMULANT, TONIC.] They may be divided into (1) those which exert a tonic influence, as tannin combined with gallic acid; also sulphuric, acetic acids, &c.; (2) those which have a sedative effect, as the salts of lead; and (3) those which operate chemically, as chalk or other variety of carbonate of lime. *Astriectants* are rarely in various diseases. (*Dr. A. T. Thomson, in the Cycl. of Pract. Med.*)

"In medicines, *astriectants* inhibit putrefaction."—*Bacon: Nat. Hist.*

**a-strīn-gēnt-lŷ**, *adv.* [Eng. *astriecting*; *-ly*.] In an *astriecting* manner; in the way that *astriectants* act; so as to bind or contract. (*Richardson.*)

**†a-strīn-gēr, \*ān-strīn-gēr, \*ōs-trēg-ī-ēr**, *s.* [Low Lat. *ostercus*, *ostercus* = a goshawk (Nares); O. Fr. *ostour*, *ostour*, *ostorr*, *ostor*; Mod. Fr. *outour*; Prov. *astour*; O. Sp. *astor*; Ital. *astore*; from Lat. *acceptor*, *accipiter* = a goshawk.] A falconer; *spec.*, one who keeps a goshawk.

"Enter a gentle *Astrieger*."  
"This man may help me to his [my] *esty's* ear."  
*Shakeap.:* All's Well that Ends Well, v. 1.

**a-strīn-gēnt-lŷ**, *adv.* [Eng. *astriecting*; *-ly*.] In an *astriecting* manner; in the way that *astriectants* act; so as to bind or contract. (*Richardson.*)

**†a-strīn-gēr, \*ān-strīn-gēr, \*ōs-trēg-ī-ēr**, *s.* [Low Lat. *ostercus*, *ostercus* = a goshawk (Nares); O. Fr. *ostour*, *ostour*, *ostorr*, *ostor*; Mod. Fr. *outour*; Prov. *astour*; O. Sp. *astor*; Ital. *astore*; from Lat. *acceptor*, *accipiter* = a goshawk.] A falconer; *spec.*, one who keeps a goshawk.

"Enter a gentle *Astrieger*."  
"This man may help me to his [my] *esty's* ear."  
*Shakeap.:* All's Well that Ends Well, v. 1.

**a-strīng-īng**, *pr. par.* [ASTRINGE.]

**as-trīp-ō-tēnt**, *adj.* [Lat. *astrum* = a star, and *potens* = potent, powerful.] Ruling the stars.

"The high *astriepotent* euctor of all."  
*MS. Harl., 2,251, f. 80 b. (Boucher.)*

**ās-trī-ōn**, *s.* [Lat., dim. from Gr. *ἀστὴρ* (*astēr*) = a star. The asteriated sapphire (q.v.).

**\*ās-trīte**, *s.* [ASTROITE.]

**as-trō-cār-ŷ-ūm**, *s.* [Gr. *ἀστρον* (*astron*) = a star, and *κάρυον* (*karuon*) = (1) nut, (2) the stone in stone-fruits.

**Bot.:** A genus of palms belonging to the family Coccoineae, from the tropical parts of America. The species range from 10 to 40 feet in height.

**as-trō-dēr-mūs**, *s.* [Gr. *ἀστρον* (*astron*) = a star, and *δέρμα* (*derma*) = the skin.] A genus

ASTRODERMUS GUTTATUS.

of spiny-finned fishes belonging to the Scomberide, or Mackerel family. *A. guttatus* is from the Mediterranean, and is somewhat akin to the Coryphæna.

**ās-trōg-ēn-ŷ**, *s.* [Gr. *ἀστρον* (*astron*) = a star, and *γεννάω* (*gennaō*) = to bring forth, to produce.] The coming into existence of the celestial bodies.

**as-trō-gnō-s-ī-a, as-trō-gnō-sŷ**, *s.* [Gr. *ἀστρον* (*astron*) = a star, and *γνώσις* (*gnōsis*) = inquiry, knowledge; *γνώμη* (*gnōmē*), 2 aor.

inf. of *γινώσκω* (*gignōskō*) = to learn, to know to perceive.] Knowledge of the stars.

**as-trōg-ra-phŷ**, *s.* [Gr. *ἀστρον* (*astron*) = a star, and *γραφῆ* (*graphē*) = . . . a writing, a description.] A writing or treatise on the stars; a description of the stars; a delineation of the stars. (*Johnson.*)

**\*ās-trō-īte, \*ās-trō-īt, \*ās-trīte, \*ās-tēr-īte**, *s.* [In Fr. *astroite*; Lat. *astriectus*, *astriectus*; Gr. *ἀστρον* (*astron*), or *ἀστὴρ* (*astēr*) = a star, and suff. *-ite* = like.] [ASTERIA.]

**1. Gen.:** Any star-stone, i.e., stone of a radiate structure or superficially radiated, whether a mineral or a fossil organism, the necessity of precise identifications in such matters never having been popularly understood. Hence various radiated minerals, also joints of fossil encrinites, and anything similar, have by one unscientific person or other been designated as *astroites* or *star-stones*.

"*Astroites* or star-stones."—*Brome: Travels (1700), p. 12. (Halliwell: Com. to Lexic.)*

"In the arable grounds towards Barton, lying on a bed of stone, has been found a species of the *astroite*, or *starry-stone*, very beautiful, deeply intagliated or engraved like a seal."—*Watson: Hist. of Kidlington, p. 25.*

**2. Spec.:** An ancient gem, called by Pliny *asteris*. Some have thought this the mineral named *cat's-eye*, which possesses a certain faint resemblance to a star, in having a fibrous substance; others, amianthus or asbestos enclosed in quartz; but both Phillips and Dana regard it as a variety of the sapphire—that sometimes called the *asteriated sapphire*. [ASTERIA.]

**3. Spec.:** An ancient gem, called by Pliny *asteris*. Some have thought this the mineral named *cat's-eye*, which possesses a certain faint resemblance to a star, in having a fibrous substance; others, amianthus or asbestos enclosed in quartz; but both Phillips and Dana regard it as a variety of the sapphire—that sometimes called the *asteriated sapphire*. [ASTERIA.]

**ās-trō-lābe, \*ās-trŷ-lābe, \*ās-trō-byre**, *s.* [In Dan., Dnt., & Ger. *astrolabium*; Fr. *astrolabe*; Prov. *astrolabi*; Sp., Port., & Ital. *astrolabio*; Low Lat. *astrolabium*; Gr. & Ital. *astrolabio*; Low Lat. *astrolabium*; Gr. *ἀστρολάβος* (*astrolabos*), *ἀστρολαβικός* (*astrolabikōn*), from *ἀστρον* (*astron*) = a star, and *λαβειν* (*labein*), 2 aor. inf. of *λαμβάνω* (*lambanō*) = to take.] In its etymological sense, any instrument for taking the altitude of a star or other heavenly body, a definition which would include not merely the astrolabe properly so called, but also the sextant, the quadrant, the equatorial, the altitude and azimuth circle, the theodolite, or any similar instrument. But, practically, the word is limited to the three following significations:—

**1.** A planisphere, a stereographic projection of the sphere upon the plane of one of its great circles. This may be either the plane of the equator, in which case the eye is supposed to be at the pole; or the plane of the meridian, in which case the eye is considered to be at the point of intersection of the equinoctial and the horizon.

**2.** A n armillary sphere or any similar instrument. [ARMILLARY.]

ASTROLABE.

This type of astrolabe was in use among astronomers at least from the early part of the second century A.D., if not even from the second or third century B.C.

"His *astrolabe*, longing for his art."  
*Chaucer: C. T., 3,206.*

"Liv'd Tycho now, struck with this ray, which shone  
More bright, 't' the morn than others beam at noon,  
He'd take his *astrolabe*, and seek out here  
What new star 'twas did gild our hemispheres."  
*Dryden: Death of Lord Hastings, v. 48.*

¶ The former use of the word was common in the sixteenth and seventeenth centuries. Such an astrolabe as that first described was the badge of an astrologer.

"She sent for him, and he came;  
With him his *astrolabe* he name,  
With points and circles marvelous,  
Which was of fine gold precious."  
*Gower: Conf. Am., bk. vi.*

¶ The forms *astyllabyre* and *astyriaby* are in *Prompt. Parv.*

... for we see spheres, globes, astrolabes, maps, and the like, have been provided as appendances to astronomy and cosmography, as well as books.— Bacon: *Adv. of Learn.*, bk. II.

3. A graduated circle, with sights attached, in use early in the eighteenth century for taking the altitude of the heavenly bodies at sea. It was ultimately superseded by Hadley's quadrant, introduced to public notice about 1730. (*Penny Cyclopædia*.)

as-trô-lâb-î-cal, a. [Eng. *astrolab(e)*; -ical.] Pertaining to an astrolabe.

as-trô-lâ-trÿ, s. [Gr. *ἀστρα* (*astrā*) = the stars, and *λατρεία* (*latreia*) = worship.] The worship of the stars. (*Cudworth*.)

as-trô-lith-ôl-ô-gÿ, s. [Gr. *ἀστρον* (*astron*) = a star, *λίθος* (*lithos*) = a stone, and *λόγος* (*logos*) = . . . a discourse. [A name proposed by Professor Shepard to designate the science which treats of meteorites or aërolites. (*Southerby: Popular Mineralogy*, 1850; *Aërolites*, p. 218.)

\* as-trô-lôg, \* as-trô-lôgue, s. [Fr. *astrologie*, from Lat. *astrologus*, from *αστρολόγος* (*astrologos*) = an astronomer: *ἀστρον* (*astron*) = a star, and *λόγος* (*logos*) = to tell, to speak of.] An astronomer.

"It was great mastery  
Till o'ny astrology to say  
This pall fall heir and on this day."  
—*Saunders: Bruce*, iv. 707.

as-trôl-ô-gër, \* as-trôl-ô-gère, s. [Eng. *astrology*; -er.] [ASTROLOGY.]

\* 1. Originally: An astronomer.

"A worthy astrologer, by perspective glasses, hath found in the stars many things unknown to the ancients."—*Ralegh*.

¶ As most, if not all the ancient astronomers believed that the heavenly bodies have an influence upon human destinies; and any one who predicted fortunes from the position of the stars, required to study their movements, no need was at first felt for drawing a distinction between an astronomer and an astrologer in the modern sense of these terms.

2. Subsequently and now: An astrologer, as contradistinguished from an astronomer. A man of unscientific mind who studies the heavenly bodies, not to ascertain the laws which affect their existence and movements, but in the vain hope of forecasting the future destiny of himself or others.

"This made the astrologers so idle as to judge of a man's nature and destiny, by the constellation of the moment of his nativity or conception."—*Bacon: Colours of Good and Evil*, ch. x.

"... the astrologers, the star-gazers, and monthly prognosticators, . . ."—*Ibid.*, xvii. 12.

\* as-trô-lô-gÿ-an, s. [Eng. *astrology*; -ian. In Prov. *astrologian*.] The same as ASTROLOGER (q.v.).

"The twelve houses of heaven, in the form which astrologians use."—*Camden*.

"... an astrologian  
That in his works said such a day o' the month  
Should be the day of doom."  
—*Waverley: Duchess of Malb.*, iv. 2.

as-trô-lôg-ic, \* as-trô-lôg-ick, \* as-trô-lôg-ic-al, a. [In Fr. *astrologique*; Sp., Port., & Ital. *astrologico*; from Gr. *αστρολογικός* (*astrologikos*) = pertaining to astrology.]

1. Pertaining or relating to astronomy; commingled, as the old astronomy was, with astrology.

2. Relating to astrology; believing, professing, or practising astrology.

"No astrologick wizard honour gains  
Who has not oft been banished, or in chains."  
—*Dryden: Juvenal*, sat. vi.

as-trô-lôg-ic-al-lÿ, adv. [Eng. *astrologically*; -ly.] After the manner of astrologers, or according to the rules of astrology. (*Johnson*.)

\* as-trôl-ô-gÿe, s. [ASTROLOGY.]

as-trôl-ô-gÿze, v. l. [Eng. *astrology*; -ize. In Gr. *αστρολογέω* (*astrologéō*) = to study or practise astronomy; *ἀστρα* (*astrā*) = the stars, and *λόγος* (*logos*) = discourse.] To study or practise astrology. (*Johnson*.)

as-trô-lôgue, s. [ASTROLOGY.]

as-trôl-ô-gÿ, \* as-trôl-ô-gÿe, s. [In Ger. & Fr. *astrologie*; Dan. & Sw. *astrologi*; Sp., Port., Ital., & Lat. *astrologia* = (1) a knowledge of the stars, astronomy, (2) astrology; from Gr. *ἀστρολογία* (*astrologia*) = astronomy; from *ἀστρον* (*astron*), generally used of stars

in the plural, *ἀστῆρ* (*astēr*) = a single star, *λόγος* (*logos*) = discourse, also reason. A discourse concerning the stars, or the reason of the stars.]

1. Originally: The word *astrology*, as yet unspecialized, included both the true science of astronomy and the pseudo science defined under No. 2. [See etymology.]

2. Now: The word having become specialized, signifies the pseudo science which pretends to foretell future events by studying the position of the stars, and ascertaining their alleged influence upon human destiny. *Natural Astrology* professes to predict changes in the weather from studying the stars [ASTROMETEOROLOGY], and *Judicial or Judiciary Astrology* to foretell events bearing on the destiny of individual human beings or the race of mankind generally.

¶ In the infancy of the world, when the stars were assumed to be, as they seemed, sparkles of light, whose dimmityness so markedly contrasted with the hugeness of the earth, it was a perfectly legitimate conjecture or hypothesis that one main function which the shining specks served in the economy of nature might be to influence human destinies. Hence the Chinese, the Egyptians, the Chaldeans, the Romans, and most other ancient nations, with the honorable exception of the Greeks, became implicit believers in astrology. It was partly the cause and partly the effect of the prevalent worship of the heavenly bodies. The "stargazers," sarcastically referred to by Isaiah (xvii. 18), were evidently astrologers: so also were what are called in the margin "viewers of the heavens;" but the Heb. word rendered "astrologers" in Dan. i. 20; ii. 2, 27; iv. 7; v. 7, is a much vaguer one, meaning those who practise incantations, without indicating what the character of these incantations may be. The later Jews, the Arabs, with other Mohammedan races, and the Christians in mediæval Europe, were all great cultivators of astrology. The ordinary method of procedure in the Middle Ages was to divide a globe or a planisphere into twelve portions by circles running from pole to pole, like those which now mark meridians of longitude. Each of the twelve spaces or intervals between these circles was called a "house" of heaven. The sun, the moon, and the stars all pass once in twenty-four hours through the portion of the heavens represented by the twelve "houses;" nowhere, however, except at the equator, are the same stars uniformly together in the same house. Every house has one of the heavenly bodies ruling over it as its lord. The houses symbolize different advantages or disadvantages. The first is the house of life; the second, of riches; the third, of brethren; the fourth, of parents; the fifth, of children; the sixth, of health; the seventh, of marriage; the eighth, of death; the ninth, of religion; the tenth, of dignities; the eleventh, of friends; and the twelfth of enemies. The houses vary in strength, the first one, that containing the part of the heavens about to rise, being the most powerful of all; it is called the *ascendant* [ASCENDANT]; whilst the point of the ecliptic just rising is termed the *horoscope*. The important matter was to ascertain what house and star was in the ascendant at the moment of a person's birth, from which it was deemed possible to augur his fortune. It followed that all people born in the same part of the world at the same time ought to have had the same future, an allegation which experience decisively contradicted. Even apart from this, astrological predictions of all kinds had a fatal tendency to pass away without being fulfilled; and when, finally, it was discovered that the tiny-looking stars were suns like that irradiating our heavens, and the earth not the centre of the universe, but only a planet revolving round another body, and itself much exceeded in size by several of its compeers, every scientific mind in Europe felt itself unable any longer to believe in astrology, which has been in an increasingly languishing state since the middle of the seventeenth century. It still flourishes in Asia and Africa. Thus when a Brahman boy comes into the world means are at once taken to construct his "horoscope," indicating what his future destiny is to be. But in America, at this advanced period of the nineteenth century, no one can profess to believe in astrology without exciting the gravest doubt regarding his intellect, his knowledge, or his good faith. It is legal to publish a work disfigured with

astrological vaticinations; but the moment one accepts payment for telling, by the help of the stars, the "fortune" of an individual, he or she becomes liable to arrest, in England, as a "rogue and a vagabond." No belief, extensively held and long prevalent, ever passes away without leaving traces in language, *ad ascendans, ascendancy, disaster, disastrous, evil-starred, influence, mercurial, jovial, saturnine, &c.*, are all astrological terms.

"The Marquess of Huntly was in the king's toretoria, but would not join with him, though his sons did. Astrology ruined him; he believed the stars, and they deceived him."—*Burnet: Hist. of his Own Time*, bk. I. (*Richardson*.)

as-trô-mê-tê-ôr-ôl-ô-gÿ, s. [Gr. *ἀστρον* (*astron*) = a star, and Eng. *meteorology* (q.v.).] The investigation of the influence exerted by the sun, moon, and stars upon the weather. The sun, of course, exerts transcendent influence. The notion that changes of the weather take place at changes of the moon is not borne out by impartial inquiry. The stars seem absolutely void of perceptible effect on the weather.

as-trô-mê-tê-ôr-ô-scope, s. [Gr. *ἀστρον* (*astron*) = a star, and Eng. *telescope* (q.v.).] An apparatus invented by Mr. Pichler for demonstrating, by means of the optical lantern, the effects of persistence of vision.

as-trôm-ô-tër, s. [Gr. *ἀστρον* (*astron*) = a star, and *μέτρον* (*metron*) = a measure.] An instrument invented by Sir John Herschel for measuring the apparent relative magnitudes of the stars.

as-trôm-ët-rÿ, s. [ASTROMETER.] The measurement and the numerical expression of the apparent magnitudes of the fixed stars.

\* as-trôm-ÿ-ën, s. [Apparently abbreviated from G. Eng. *astronomien* to make it fit more easily into a line of poetry.] An astronomer, an astrologer, or both in one person.

"Of gold he made a table,  
All full of theories, sunn table,  
And thought to seyn, amonges men,  
That he is an astronomen."  
—*Alisunder*, l. 136. (*Boucher*.)

as-trôn-ôm-ër, \* as-trôn-ôm-ère,

\* as-trôn-ôm-ÿer, s. [Eng. *astronomy*; suffix -er. In Sw. *astronom*; Fr. *astronome*; Sp., Port., & Ital. *astronomo*; Lat. *astronomus*; Gr. *αστρονόμος* (*astronomos*), as *adj.* = classing the stars, as *substant.* = an astronomer; *ἀστρον* (*astron*) = a star, *ἀστρα* (*astrā*) (pl.) = stars, and *νομός* (*nomos*) = to distribute, to pasture (a flock). Hence an astronomer is a classifier of the stars, or, according to Herschel, a "shepherd of the stars."] [ASTRONOMY.]

*Essential signification*: One who studies the stars, the word giving no indication as to his motive in so doing. During ancient and mediæval times the keenest spur to the exploration of the heavens was furnished by the belief, then all but universally entertained, that the stars influenced human destinies; hence *astronomer* signified—

\* 1. Originally: In the main an astrologer; one who studied the stars, partly, no doubt, from scientific curiosity, but chiefly because he believed they influenced human destinies.

"If astronomers say true, every man at his birth by his constellation hath divers things and desires appointed him."—*Pilgrimage: Exposition upon the Prophet Aggeus*, ch. I. (See *Trench: Select Glossary*, p. 12.)

"But what was ominous, that very morn  
The sun was entered into Capricorn,  
Which, by this bad astronomer's account,  
That week the Virgin Balance should remount."  
—*Dryden: Hind and Panther*.

2. Subsequently: As study of the heavens advanced, the more gifted minds discovered the fallacy of the old notion that the stars influenced human destinies, whilst the less talented firmly adhered to the popular delusion on the subject. It consequently became needful to distinguish the two classes of men. The word *astronomer* was therefore reserved for any really scientific student of the stars, whilst the term *astrologer* was abandoned to the credulous, if not even insincere, star-gazer. Convenience dictated this arrangement: if etymology were followed, an astrologer would be regarded as the equal, if not the superior, of an astronomer. [ASTROLOGER.]

"[Encke's comet] was predicted and generally observed in 1825, and so anxious were astronomers to discover it, that two new comets were found in looking for it."—*Astr.: Report on Astronomy. Brit. Assoc. Rep.*, vol. I., 2nd ed. (1832), p. 163.

*Astronomer Royal*: The appellation given to the eminent astronomer entrusted by the

ôul, boy; pout, çowl; cat, çell, chorus, çhin, bench; go, çem; thin, çhis; sin, aç; expect, Xenophon, exist. ph = f -cian, -tian = çhan. -tion, -cion = çhun; -çion, -çion = çhun. -çious, -çious, -çious = çhun. -ble, -dle, &c = çel, çel.

British Government with the care of the Greenwich Observatory, and who is expected to turn to the best account the splendid instruments erected there for the survey of the heavens. There are also Astronomers Royal for Scotland and Ireland.

ás-trò-nòm-ic, \*ás-trò-nòm-íok, ás-trò-nòm-íe-al, a. [In Fr. astronomique; Sp., Port., & Ital. astronomico; Lat. astronomicus; all from Gr. ἀστρονομικός (astronomikos).] Pertaining or relating to astronomy, or to the methods in use among astronomers.

"Can he not pass an astronomical line?"—Black. "The starry heavens, as you know, had for Immanuel Kant a value beyond their astronomical use."—Tyndall: Prag. of Science, 3rd ed., v. 104.

astronomical instruments. Instruments used for observing the heavenly bodies. The following list includes some which are now superseded, but the great majority are still in use.—Armil, armillary sphere, artificial horizon, astrolabe, astrometer, astroscope, azimuth circle, azimuth dial, back-staff, chronometer, clock, collimator, comet-seeker, compass, cosmolabe, dipoleidoscope, dip sector, equatorial telescope, gnomon, heliometer, meridian circle, micrometer, mural circle, orbit-sweeper, orrery, pendulum, planetarium, quadrant, reflecting circle, refraction circle, sextant, spectroscope, telescope, tellurian, transit instrument, zenith sector, zenith tube.

astronomical measurements. The measurement of the arc of the heavens intercepted between two points, as between a star at a certain moment and the horizon. Or a measurement of the exact time of some event, say a transit. This is done by means of a clock, or, more generally, a chronometer. (Herschel: Astron., § 150.)

astronomical observations. Observations of the heavenly bodies made to further the science of astronomy. (Ibid., § 136.)

astronomical year. A year, the precise length of which is determined by astronomical observations. It embraces both the tropical and the sidereal years. It is opposed to the civil year, being that which each nation has adopted for itself. [YEAR]

"Nebuch thinks that the allusion is to a solar eclipse, visible in the Mediterranean, which occurred on the 21st of June, in the astronomical year 559 B.C."—Lewis: Early Rom. Hist., ch. 7, § 11.

ás-trò-nòm-í-cal-ly, adv. [Eng. astronomical; -ly.] In an astronomical manner; after the manner of astronomers; in conformity with the principles or methods of astronomy.

\*ás-trò-nòm-í-còn, a. [Gr. ἀστρονομικός, neut. -κόν.] A treatise on astronomy.

\*ás-trò-nòm-í-òn, \*ás-trò-nòm-ý-èn. [O. Eng. astronomic; Mod. [Eng. astronomy; suff. -en.] An astronomer, an astrologer, or both combined in one individual.

"Astronomers at day here art fallen That whilen warned men byfore what shoulde byfalle after."—P. Plowman. "Lo astronomers came from the east to Jerusalem."—Wycliffe: Matthew II. 1.

†ás-trò-n-ò-mize, v. i. [Eng. astronom(y); -ize.] To study astronomy, as botanize means to study botany. "... thus they astronomized in caves."—Browne: Christ. Mor. II. 8.

ás-trò-n-ò-mý, \*ás-trò-n-ò-mie, \*ás-trò-n-ò-mýe, \*ás-trò-n-ò-m-íge, s. [In Sw. & Dan. astronomi; Ger. & Fr. astronomie; Sp., Port., & Ital. astronomia; Lat. astronomia; Gr. ἀστρονομία (astronomia); ἀστρον (astron) = a star, and νόμος (nomos) = usage, custom, law; νείμω (nemō) = to deal out, to distribute.]

\* 1. Originally: The pseudo science which studied the movements of the stars, with the view of obtaining information (which they were not fitted to give) regarding the destiny of individuals or bodies of men; astrology. [ASTROLOGY. See also ASTROLOGER.]

"And hem leveda, witter like Astronomye and astrologie."—Story of Gen. and Exod. (ed. Morris), 791-2.

"Not from the stars do I my judgment pluck, And yet methinks I have astronomy."—Shakespeare: Sonnets, 14.

\* 2. Subsequently and now: The sublime science which treats of the distances, magnitudes, masses, composition, motions, and all that is discoverable regarding the heavenly

bodies, meaning the sun, the earth, the moon, the planets, the fixed stars, the comets, the meteorites, the nebulae, and all other material bodies really or apparently moving in infinite space. It is founded on careful and oft-repeated observations, made chiefly with elaborately-constructed instruments [ASTRONOMICAL INSTRUMENTS]; these observations being next made the basis of reasoning, founded, wherever it is practicable, as it generally is, on mathematical demonstration. Astronomy may be variously divided. A simple distinction is sometimes made into geography, which treats of the earth, and uranography, the subject of which is the "heavens." Sometimes the branch of science which describes the celestial bodies as they are is called Descriptive Astronomy. When the specific subject treated is the "fixed" stars, it becomes Sidereal Astronomy. The sciences now mentioned have sought rather to record than to explain phenomena; but what is called Physical Astronomy proposes to itself the high aim of accounting for the facts observed. Its chief ally in this arduous task is mathematics, with which every astronomer worthy of the name requires to be very familiar.

¶ The vault of heaven, being visible in all its glory alternately by day and night in every portion of the world, absolute ignorance regarding celestial phenomena cannot have existed in any place or at any time. The people belonging to some nations were, however, more observant in this respect than others, and claims to early proficiency in astronomy, in some cases leading to vehement controversy, have been preferred in favour of the Chinese, the Chaldeans, the Egyptians, and the Hindus. In these and other countries, in early times, the stars were not so much studied as worshipped, there being strong temptation, even in the most pious minds, to this form of religious error (Job xxxi. 26-28). Hipparchus of Bithynia and Rhodes (?), who flourished from B.C. 160 to 125, catalogued the stars visible above the horizon, noting down 1,080. Among his numerous discoveries may be reckoned the precession of the equinoxes, trigonometry, and apparently the stereographic projection of the sphere. The next very great name was that of Ptolemy, the geographer and astronomer of Alexandria, A.D. 180-150, who discovered the lunar evulsion, refraction, &c. [EVECTION, REFRACTION.] He was also the author of the Ptolemaic system, with its primum mobile, its eccentrics, and its epicycles.

"Oh, how unlike the complex works of man Heaven's easy, artless, unnumbered plan!"—Cowper: Truth.

The Arabs translated a work of Ptolemy's called Μεγίστη (Megistē) into their own language, and prefixing to its name their article al = the, transformed it into Almagest. The Christians during the "dark ages" deriving their knowledge of astronomy from the Arabs rather than from a study of the heavens, received from their instructors the Ptolemaic system and the Almagest, which did not lose credit in Western Europe till the seventeenth century. [ALMAGEST, PTOLEMAIC.] In 1472 or 1473 was born Copernicus, who in 1543, just before his death, published his great work, On the Revolutions of the Heavenly Bodies, composed more than thirteen years before. It propounded the Copernican system [COPERNICAN], which, modified and improved, is now received as established truth, being supported by an amount of evidence of which Copernicus had no conception. The next very great name is that of Tycho Brahé, a Dane by birth, but of Swedish ancestry. He was born on the 14th of December, 1546, and died in 1601. Though not accepting the Copernican system, but holding views partly borrowed from Copernicus and partly from Ptolemy [TYCHONIC], his extensive and accurate observations gave a great impulse to astronomy, and prepared the way for further discoveries, in addition to those which he had himself made. Two great names now come together upon the scene, those of Kepler and of Galileo. The former was a pupil of Tycho. He will for ever be remembered for the discovery of the three laws which bear his name, the first and second made known in 1609, and the third in 1618. [KEPLER'S LAWS.] About 1581, Galileo had discovered the isochronism of the pendulum [PENDULUM]; having constructed a telescope, he discovered in 1610 the satellites of Jupiter, the phases of Venus, the mountains of the moon, with other new truths. In 1642, the year in which Galileo died, Sir

Isaac Newton was born, and in 1687 he published his immortal Principia, in which the law of gravitation was announced, thus constituting an epoch in the history of science which probably will never be paralleled at any future time.

"Nature and Nature's laws lay hid in night; God said, 'Let Newton be,' and all was light."—Pope.

The year that Newton died (1727) was the one in which the discovery was made by Bradley of the aberration of light, which irrefragably proved the motion of the earth, and gave the death-blow to the Ptolemaic and Tycheonic systems, both of which were founded on the hypothesis that it was stationary. As we approach modern times the discoveries become far too numerous to be chronicled here; but room must be found to mention the Herschel family—the first of the name, Sir William Herschel, who was born in 1738, and died in 1822, having, among other great discoveries, added nine new members of the solar system, one of them, the planet Uranus, to the eighteen previously known. The work on astronomy so often quoted in these pages was penned by his son, Sir John Herschel, also a great discoverer; and the third generation of the family are now at work. Many discoveries will be found recorded under other articles. [ASTEROID, COMET, CONSTELLATION, GRAVITATION, PLANET, SOLAR SYSTEM, STAR, &c.]

"In astronomy, for instance, the superior departments of theory are completely divorced from the routine of practical observation."—Herschel: Study of Nat. Phil. (1831), § 126.

\*ás-trò-n-ò-m-yèn, s. [ASTRONOMIEN.]

\*ás-trò-n-ò-m-yër, s. [ASTRONOMER.]

ás-trò-phèl, \*ás-trò-fèil, a. [Gr. ἀστρον (astron) = a star; second element doubtful.] A bitter herb; probably what the old botanists called starwort.

"My little flock, whom earst I lov'd so well, And want to feed with finest grass that grew, Feede ye henceforth an bitter astrofèil And stinking annuals and unvariee rue."—Spenser: Daphne, 344

"The gods, which all things see, this same behold, And pitying this pair of lovers true, Transformed them, there lying on the field, Into two flowers that in both red and blew; If first grows red, and then to blew doth fade, Like astrofèil, . . . . . Todd's Spenser, vol. viii., p. 60.

ás-trò-phò-tò-mèt-riò-al, a. [Gr. ἀστρον (astron) = a star; φωτός (phōtós), genit. sing. of φῶς (phōs) = light, and μέτρον (metron) = a measure.] Pertaining to the measurement of the light which reaches the earth from the several stars.

"On a new Astrophotometrical method by Prof. Ch. V. Zeuner."—Astron. Soc. Notices, vol. xxxviii., 63.

ás-trò-phýl-lí'te, a. [In Ger. astrophyllit; Gr. ἀστρον (astron) = a star, and φύλλον (phullon) = a leaf.]

Min.: An orthorhombic mineral classed by Dana under his Mica Group. The hardness is 3; the sp. gr., 3.324; the lustre, sub-metallic, pearly; the colour, bronze-yellow to gold-yellow. It is translucent in thin plates. Composition: Silica, 32.21 to 33.71; protoxide of iron, 18.06 to 25.21; protoxide of manganese, 9.90 to 12.68; titanate acid, 7.09 to 8.84, with lesser quantities of potassa, soda, zirconia, alumina, and other ingredients. It is found in Norway.

ás-trò-phý-tòn, s. [Gr. ἀστρον (astron) = a star, and φυτόν (phuton) = that which has grown: (1) a plant, (2) a creature. "Starry creature."] A genus of starfishes, containing the Shetland Argus. [ARGUS.]

ás-trò-scòpe, a. [In Ger. astroscop; Gr. ἀστρον (astron) = a star, and σκοπέω (skopeō) = to look at.] An astronomical instrument for observing or refreshing the memory with respect to the relative position of the stars. These are delineated on two cones. A celestial globe, however, is both more accurate and more convenient. (Webster, &c.)

ás-trò-scòp-ý, s. [In Ger. astroscopie.] [ASTROSCOPE.] Observation of the stars. (Johnson.)

\*a-ástrò'te, adv. [ASTRUTE.]

ás-trò-thè-òl-ò-gý, s. [In Ger. astrotheologie; Gr. ἀστρον (astron) = a star, and θεολογία (theologia) = theology (q.v.).] Theology founded on what is known of the heavenly bodies and the laws which regulate their movements.

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pine, pít, síre, sír, marine; gô, pôt, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, uníte, cûr, rûle, fûll; trý, Sýrian. æ, œ = é. ey = á. qu = kw.

"That the diurnal and annual revolutions are the motions of the terraqueous globe, not of the sun, I show in the preface of my Astro-Theory."—Derham: Physico-Theology.

**a-strūt**, **\*a-strōte**, adv. [Eng. a; strut (q.v.).]

**\*A.** (Of the form astrote): In a swelling manner.

"Hys yea stode owte astrote forthy." *Le Bone Florence*, 232. (Boucher)

**B.** (Of the form astrut): With a strutting gait. (Couper: Task, v. 268.)

**\*ās-trý-lābe**, s. [ASTROLABE.]

**\*as-tū'ce**, a. [In Fr. *astucieux*; Ital. *astuticio*.] [ASTUTE.] Astute.

"... that your faculties be nocht seduced by their astute and subtil persuasions."—Complaynt of Scotland, p. 151.

**ās-tū'cions**, a. [Fr. *astucieux*.] Astute, cunning. (Scott: Fair Maid of Perth, ch. xxi.)

**ās-tū'cī-tý**, s. [As if from a Low Lat. *astutias*.] Astuteness. (Carlyle: Fr. Revol., pt. i., bk. i., ch. iii.)

**\*as-stūn'**, v.t. [Eng. a; stun. In A.S. *astunian* = to astound.] To stun. [ASTOUND, STUN.]

"He fell rebounding; breathless and astunned, His trunk extended lay."

*Someriville: Rural Games*, c. 11.

**\*a-stūnde**, adv. [Pref. a = on, for; A.S. *stund* = a moment, time.] [ASTUNTE.] For a time.

"Bothe in booke and in bank, I am to be baset astunde."

*A Song on the Passion* (ed. Morris), 13, 14.

**\*a-stūnte**, pret. of verb. [A.S. *astunian* = to stop.] Stood, remained. [ASTINT.]

"The barons astunte without toun beside, And vaire sende unto the toun to the king her sonde, That he asolde, vor Gode's loue, him bet vnderstoude." *Robert of Gloucester's Chronicle*, p. 146. (Boucher.)

**ās-tūr**, s. [Lat. *asur*, whence Ital. *astore* and Fr. *autour*.]

GOSHAWK (ASTUR PALUMBARIUS).

**Ornithology:** A genus of raptorial birds belonging to the family Falconidae and the sub-family Accipitrinae, or Sparrow-hawks. It has a British representative—the *A. palumbarius*, or Goshawk [see GOSHAWK], which is figured in the accompanying illustration; and there are various foreign species.

**\*a-stūrtē**, pret. of verb. [ASTART.] Started.

"Mid thine vaice come thyn trayst monnes tūne. The Gyves vsd asturte that leyen in the grunde."

*The Passion of Our Lord* (ed. Morris), 194-5.

**ās-tūte**, a. [O. Fr. *astut*; Sp., Port., & Ital. *astuto*; Lat. *astutus*, from *astus* = cleverness, craft, cunning (a single act, as distinguished from *astutia* = habitual craftiness).] [ASTUTE.] Penetrating, discerning, subtle; wily, cunning.

"We terms these most astute which are most vertue."—*Sir M. Sandely: Ess.*, p. 168.

"Neither *astute* nor any one of its compounds is in the last edition of Johnson's Dictionary.

**ās-tūte-lý**, adv. [Eng. *astute*; -ly.] In an astute manner; cleverly, penetratingly, discerningly. (Webster.)

**ās-tūte-ness**, s. [Eng. *astute*; -ness.] The quality of being astute; penetration, discernment; mental subtlety.

"The policy of the French Government was marked by vigour and astuteness,..."—*Times*, Nov. 9, 1875.

**†ās-tý**, s. [Lat. *astru*; Gr. *ástru* (*astru*) = a city, especially Athens. (In Anglicising Greek words, *v* becomes *y*; thus *asty* exactly corresponds to the Gr. *ástru* (*astru*)).]

**Architecture:** A city or town.

**\*as-ty-on**, v. [A.S. *astigan* = to go, proceed, step, or mount; *astignes* = an ascent; ascending.] To ascend.

"Ofte he hom mjed spak ther hi weren to-gedere Er he wolde arýgen to heuene to his vedere."

*The Passion of Our Lord* (ed. Morris), 623-4.

**a-stý-lar**, a. [Gr. *ástulos* (*astulos*) = without pillar or prop; *á*, priv., and *stúlos* (*stulos*) = a pillar.]

**Arch.** Without columns or pilasters.

**ās-týll**, s. [Low Lat. *astula*; O. Ger. *ast* and *asti*; Goth. *ast*.] A shingle; a thin board of wood. (*Pöpmil. Parv.*) (Boucher.) [ASTEL.]

**\*as-týl-lá-byre** (*y* = *i*), **\*ās-týr-lá-bý**, s. [ASTOLABE.]

**as-týl-lén**, s. A small ward or stoppage in an adit or mine to prevent the full passage of the water, made by damming up. (Weale.)

**\*as-týt**, **\*as-týtē**. [ASTIT.]

**\*a-sūn-dér**, **\*a-sūn-dýr**, **\*a-sūn-dri**, **\*a-sōn-dér**, **\*a-sōn-dýr**, **\*a-sýn-dre** (*dýr* as *dír*, *dre* as *dér*), adv. [Eng. *a* = on, and *sunder*; A.S. *onsundran* = asunder, apart, alone, privately; Ger. *auseinander*; Sp. *asundre*.] [SUNDER.]

1. Into different pieces, into different places; separately, apart. (*Lit. & fig.*)

"I took my staff, even Beauty, and cut it asunder."

—*Jack*, xl, 10.

"What therefore God hath joined together, let not man put asunder."—*Mark* x, 9.

2. In different pieces; in different places; apart; in a divided state.

"Freres and feendes been hit lital asunder."

—*Chaucer: C. T.*, 7, 356.

"Lucifer. No, we reyn Together; but our dwellings are asunder."

—*Byron: Cain*, ll. 2.

**\*a-sūn-dér-lý**, adv. [Eng. *asunder*; -ly.] Separately; apart.

"Asunderly." *Disjunctiva*...—*Prompl. Parv.*

**\*a-sūn-dri**, adv. [ASUNDER.]

**\*ā-sūr** (*sūr* as *zhūr*), a. [AZURE.]

**\*a-sūr-ā**, s. [SANSKRIT.]

**Indian Mythology:** A demon; an enemy of the gods. The Asuras seem to have been at one time the Turanian aborigines in conflict with the Aryan invaders of India, and at another the Buddhist religionists in conflict with the professors of the Brahmanic faith.

**\*ā-sūre** (*sūr* as *zhūr*), a. [AZURE.]

**\*a-swāge**, v.t. & i. [ASSUAGE.]

**\*a-swéit**, v.t. [A.S. *aswelan* = to die, to depart.] To become extinguished.

"No the fury for thee snow aswéit."

—*Alisaundr*, 6, 608.

**\*a-swéve**, v.t. [A.S. *aswefan* (trans.) = (1) to soothe, to appease; (2) to strike with astonishment; (intransitive) = to be stunned, to be made insensible; *swefan* = to go to sleep.] To stupefy.

"For I came up, I nyne how, For so astounded and aswéved, Was every vertic in my heved, What with his sours and with my drede, That all my feynges gad to dede; For whi hit was to grete afrey."

—*Chaucer: House of Fame*, ll. 40-45.

**\*a-swim'**, adv. [Eng. a; swim.] Afloat. (Scotch.)

"The soldiers sleeping carelessly in the bottom of the ship upon heather, were all *aswim* through the water that came in at the holes and leaks of the ship."—*Spalding*, 1, 60.

**\*a-swōon**, **\*a-swōne**, v.t. [Eng. a, and swoon; A.S. *aswunan* = to swoon.] To swoon.

"Whan shee this herd, aswōndoun schee fallith For pitous joy." *Chaucer: C. T.*, 8, 955-6.

**\*a-swōon**, **\*a-swōūn**, **\*a-swōūne**, **\*a-swōwne**, adv. [Eng. a, and swoon.] [ASWOON, v.]

1. Into a swoon.

"And with that word aswōun schee fel anon."

—*Chaucer: C. T.*, 12, 560.

2. In a swoon.

"Than ever shee did, and flit to ground anon, And lay aswōone, deed as eny stoon."

—*Chaucer: C. T.*, 10, 787-8.

**\*a-swōūnde**, pret. of verb. [A.S. *aswōndan* = (1) to languish through dulness, to enervate; (2) to decay, perish, dissolve.] Passed away; decayed, perished.

"Heli be thou, be seide, thes false god, in thin false heuene ifroude, Nym thin son and thin holigost vor ye both ney aswōunde."

—*Expōsition of the Cross* (ed. Morris), 421-2.

**\*a-swýnde**, v.t. [A.S. *aswōndan* = to decay.] To vanish, to pass away.

"Ye mowen lase the world aswýnde That woude goth forth abak that soth." *A Luse Rom. O. Eng. Miscell., Early Eng. Text Soc.*, 2. (ed. Morris), 50, 60.

**\*a-sý'ce**, s. The same as ASSIZE (q.v.).

**\*a-sý-én**, v.t. [A.S. *asigan* = to languish through dulness, to enervate, to pine away.] To sink; to become faint of heart.

"At we wolden hane a-sýen and seo to the nedes, Ther the crymechild for sumes soe schal drede."

—*On Serving Christ*, ix. (ed. Morris), 10, 11.

**\*a-sý-lūm**, **\*a-sýle**, **\*a-sile**, s. [In Dan. *asyl*; Fr. *asile*; Sp. & Ital. *asilo*; Port. *asilo*, *asilo*; Lat. *asylum*; Gr. *ásulon* (*asulon*) = an asylum; properly the neut. of the adj. *ásulos* (*asulos*) = safe from violence, inviolate; *á*, priv., and *σύλας* (*sulās*) = to strip off, to pillage.]

I. A place of refuge and security.

1. Originally: A sanctuary, a place which it was deemed sacrilege for one to invade, and which, therefore, proved an inviolable retreat for criminals, debtors, and other people liable to be pursued. (See *Archæologia*, viii., A.D. 1787, p. 3.) [SANCTUARY.]

"From every asylum ruffians called forth nightly to plunder and stab."—*Maccarty: Hist. Eng.*, ch. ix.

2. Now:

(a) Gen.: Any place of refuge; any place where one is sheltered, as a foreign land used as a retreat for political or religious refugees.

"... and who knew themselves to be marked out for destruction, had sought an asylum in the Low Countries."—*Maccarty: Hist. Eng.*, ch. 7.

(b) Spec.: An institution designed for the reception and shelter of those who are incapacitated from successfully fighting their own way in the world, as the blind asylum, the lunatic asylum.

II. The protection accorded in such places; refuge, shelter.

"Much he would speak not, but beneath his roof"

They found *asylum* oft, but ne'er reproof." *Byron: Lara*, ll. 2.

**†a-sým-mét-ral**, a. [Eng. *asymmetr(y)*; -al.] Unsymmetrical; destitute of symmetry; having perfection marred by conspicuous defects.

"Long before this time the church had become *asymmetr'al*."—*Moro: Against Idolatry*, ch. 8.

**†a-sým-mét-ri-cal**, a. [Eng. *asymmetr(y)*; -ical.] Unsymmetrical; incapable of adjustment.

"*Asymmetrical* or unsoalable, that is, such as we see not how to reconcile with other things evidently and confessedly true."—*Boyle in Norris on Reason and Faith*, ch. 8.

**\*a-sým-mét-roús**, a. [Eng. *asymmetr(y)*; -ous.] Unsymmetrical. (Barrow.) (Worcester's Diet.)

**a-sým-mét-rý**, s. [Gr. *ásymmetria* (*asymmetria*); from *ásymmetros* (*asymmetros*) = (1) incommensurable, (2) unsymmetrical. Or from *á*, priv., and *συμμετρία* (*symmetria*) = symmetry; *σύμμετρος* (*symmetros*) = commensurate with; *σύν* (*sun*) = together, and *μέτρον* (*metron*) = a measure.]

1. Ord. Lang.: Want of symmetry; want of proportion.

"The *asymmetries* of the brain, as well as the deformities of the legs or face, may be rectified in time."—*Green*.

†2. Math.: The incommensurability of two or more numbers; that is, that the numbers stand to each other in such a relation that they have no common measure. Such, for example, is the relation between the side and diagonal of a square which are in the ratio of 1:√2.

**a-sým-mét-tôte**, s. & a. [In Ger. & Fr. *asymptote*; Port. *asymptota*; Gr. *ásymptotos* (*asymptotos*) = irregular; *á*, priv., and *συμπίπτω* (*sympiptō*) = to fall together; *σύν* (*sun*) = together, and *πίπτω* (*piptō*) = to fall; perf. *πέπτωκα* (*peptōka*).]

**A. As substantive.** Geometry: A term used in describing the characteristics of a hyperbola.

An *asymptote* of a hyperbola is a diameter which, the farther it is produced, always approaches more and more nearly to the curve, and yet, though produced ever so far, does never actually meet it. (The word is generally used in the plural, *asymptotes*.)

**B. As adj.:** Pertaining to such a line as that now described; continually approaching another line without ever reaching it.

ból, bóy; pout, jowl; cat, cell, chorns, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -ing -cian = shan. -cion, -tion, -sion = shün; -tion, -sion = zhün. -tious, -sious; -cions = shüs. -ble, -dle, &c. = bpl, dpl.

"Asymptote lines, though they may approach nearer together, till they are closer than the least assignable distance, yet, being still produced indefinitely, will never meet."—Grew.

**a-symp-tôt-îo, a-symp-tôt-îo-al, s.** [Eng. asymptote; -ic, -ical. In Fr. asymptotique.] Pertaining or relating to the asymptotes of a hyperbola; perpetually approaching anything, but never meeting it.

"Curves are said to be asymptotic when they continually approach without a possibility of meeting."—Johnson.

**a-syn-ar-tôte, a.** [Gr. ἀσυνάρτος (asynartētos) = not united, inconsistent; ἀ, priv., and συναρτάω (synartāō) = to hang up with, to knit or join together; σύν (syn) = together, and ἀρτάω (artāō) = to fasten to.] Not fitted or adjusted; disconnected.

**Asynartete sentences (Gram.):** Those of which the members are not united by connective particles. [ASYNDERON.] (Brande.)

**Asynartete verse (Pros.):** A verse consisting of two members, having different rhythms; as when the first consists of iambuses and the second of trochees, or the first of dactylea and the second of iambuses. (Webster.)

**a-syn-dē-tōn, s.** [In Ger. asyndeton. From Gr. ἀσύνδετον (asundetos), neut. of adj. ἀσύνδετος (asundetos) = (1) unconnected, (2) without conjunction; ἀ, priv., and σύνδετος (sundetos) = bound together; σύνδew (sundew) = to bind together.]

**Gram.:** A figure in which the copulative conjunction and is omitted in a sentence, as in Lat. *Veni, vidi, vici*, "I came, I saw, I conquered," instead of *Veni, vidi, et vici*, "I came, I saw, and I conquered." In most cases, as in that now given, the omission of the copulative gives increased force to the statement or sentiment embodied in the sentence. It is opposed to POLYSYNDETON (q.v.).

**a-sy-ße, s.** [ASSIZE.]

**ät, \*ätte, \*ät-ön, prep. & adv.** [A.S. *æt*, at = (1) at, by, near, to, next, with, against, in, (2) of, from. In Sw. *ät* = (1) sign of the infinit. mood, (2) that; Dan. *at* (same meaning), *ad* = to; (O. Sw., O. Icel., O. Dan., O. L. Ger., and Goth. *at* = at; O. Fria. *et*; O. H. Ger. *az, ez*; W. Gal. *at* = to; Lat. *ad* = to (AD); Sanac. *adhī* = upon.]

**A. As preposition:**

I. Denoting nearness to in place or in time.

1. Denoting nearness in place, i.e., that a person or thing is at rest in proximity to a certain place. As a rule, the proximity is not so great as that indicated by *on*, and considerably less than that designated by *in*.

(a) In immediate proximity to.

"This custom continued among many, to say their prayers at fountains."—*Billingbeck*.

(b) In, within; occupying as a habitation. (Lit. & Fig.)

"... the at here tabernacle was."

*Story of Gen. & Exod.* (ed. Morris), 3,790.

"... whilst we are at home in the body, we are absent from the Lord."—*2 Cor. v. 6.*

(c) On; upon.

"Their various news I heard, of love and strife, Of storms at sea, and travels on the shore."—*Pope*.

(d) In a position, attitude, state, or condition, as at gaze = in a gazing attitude. [GAZE.] (In this sense it is sometimes followed by a superlative.)

"We bring into the world with us a poor, needy, uncertain life, short at the longest, and unquiet at the best."—*Temple*.

2. Denoting nearness in time.

"At the same time that the storm beats upon the whole species, we are falling foul upon one another."—*Addison*.

II. Denoting motion towards any person, place, or thing, in place or in time; denoting also motion through any place.

1. Literally:

(a) Denoting motion towards the place where a person or thing is, a verb being understood, as, "Up, guards, and at them," an exclamation popularly attributed to Wellington at Waterloo. (Colloquial, and often with a tinge of the ludicrous.)

(b) Denoting motion through a place.

"Here, push them out at gates." *Temnyson: The Princess*, iv.

2. Fig.: Denoting effort to realise an aim.

"We find some arrived at that cottishness, as to own roundly what they would be at."—*South*.

III. Denoting the effect produced by proximity of one person or thing to another in place and in time; causation, operation upon.

1. With the preposition prefixed to the source from which this emanates:

(a) In consequence of. "At his touch, Such sanctity hath heaven given his hand, They presently amend." *Shakspeare: Macbeth*, iv. 3.

"They take the timber and harp, and rejoice at the sound of the organ."—*Job xxi. 13.*

(b) On. "Others, with more helpful care, Cry'd out aloud, 'Beware, brave youth, beware!' At this he turned." *Dryden: 1 Conq. of Granada*, l. 1.

(c) Under. "But thou, of all the kings, Jove's care below, Art least at my command, and most my foe." *Dryden: Homer; Iliad* l.

(d) From; of. "Mal he no loue at hire taken." *Story of Gen. & Exod.* (ed. Morris), 2,697.

2. With the preposition prefixed to that which is operated upon: To, into.

"So can on werlde wreche and wrake, For to billess swine sluce same, That it se weze at more bun-frame." *Story of Gen. & Exod.* (ed. Morris), 552-4.

¶ Sometimes when it occurs in O. Eng. and Scotch it is = at the; *atte* is a contraction for *at the*, and *atten* for *at then*, being the dative case of the A.S. article.

B. As adverb:

1. So as, at ever, soever.

2. To (used as a prefix to the infinitive mood).

"Then art to old at bykyr and fyght." *Richard*, l. 611.

¶ This use of the word is borrowed from the Danish.

"And sa that that are all well schrowyns, and deis in the leiths and sacraments of haly kyrk, how wyolently at suer that dea."—*The Craft of Deyng*.

C. Subjoined are the chief expressions and phrases of the word at:

1. \*At after (Scotch). After; afterwards.

2. At all:

(a) At all events.

"That he that stands may stand, and socht do fall, And qnho he fallis, may know the sam at all." *Lauder: Minor Poems; E. Eng. Text Soc.*, 41, 48.

(b) Altogether.

"The first of that four principall Is stalwartnes of hart at all." *Ratis Raving*, bk. l. (ed. Lumby), 1,138-9.

(c) Of any kind.

"Most women have no characters at all."—*Pope*.

(d) To any extent, in any degree, in the least.

"... neither hast thou delivered thy people at all."—*Exod. v. 23.*

3. At arms: Furnished with arms. (Used only in the phrase, "a man at arms" = a man furnished with arms.)

"Iofuse his breast with magnanimity, And make him, naked, foll a man at arms." *Shakspeare: 3 Henry VI.*, v. 4.

4. At a' will (Scotch): To the utmost that one could wish. (Jamieson.)

5. At end. [ATTE ENDE.]

6. At first: At the beginning of any effort, enterprise, or event.

7. At gaze (Her.). [GAZE.]

8. At hand:

(a) Near in place. "... behold, he is at hand that doth betray me."—*Matt. xxvi. 46.*

(b) Near in time. "... the hour is at hand, ..."—*Matt. xxvi. 46.*

9. At it: Engaged with it zealously. (Colloquial.)

"To make pleasure the vehicle of health, is a doctor at it in good earnest."—*Colliter: Friendships*.

10. At large:

(a) Not under any restraint.

"Hence walk'd the Bend at large in spacious field." *Milton: P. L.*, bk. iii.

(b) Copiously, diffusely, at length.

11. At last, \*atte laste: Denoting that an event long foreseen and expected has, after much delay, happened.

"And hath so long a lyl, as we may see, Yet *atte laste* wanged is the tree." *Chaucer: C. T.*, 3, 921-2.

12. At length:

(a) In an extended form; diffusely.

(b) The same as AT LAST (q.v.).

13. At once; all at once:

(a) Without any delay; promptly, as opposed to dilatorily; or at one operation, as opposed to a series of acts or efforts.

"One warns you by degree, the other sets you on fire all at once."—*Dryden: Pabla* (Pref.).

(b) At one time; at the same moment; simultaneously.

14. At pleasure: To any extent, in any place, or in any way that one prefers, with uncontrolled freedom; *ad libitum*.

"The rest, for whom no lot is yet decreed, May run in pasture, and at pleasure feed." *Dryden: Virgil; George* III. 224.

15. At the trouble: Prepared to take the trouble.

"What they will not be at the trouble to deduce by reasoning."—*Arbutnot*.

\*at-anis, \*atanis, \*at-enes, \*atenes (Old Eng.), *atanis, atanis, atanya, atainze* (Scotch), *adv.* [O. Eng. *at*; *anis* = once.] At once.

"Both ire and still, and flesh and banis, His awne hand straik in twa *atanis*." *Ratis Raving*, bk. l. (ed. Lumby), 1,100-07.

"Speche, grace, and voic schul sprige of the touge, And alle turne to the mouth holliche *atenes*." *Joseph of Arimathea* (ed. Bkett), 50, 51.

\*at erst, \*at earst. [Eng. *at*, and A.S. *erst*, from *erast*, *erest* = first, superl. of *er* = ere, before.] Properly "at first," for the first time; but sometimes means also "at present," and in certain cases may, with advantage to the sense, even be rendered "at last," "at length." [ENST.]

"For from the golden age, that first was named, 'Tis now at *earst*, became a stouie one." *Spenser: F. Q. V.*, Intro. l. 2.

at one, \*atone, \*at on, \*at on. [Eng. *at*; *one*.] Used as *adj.*: = at one, specially in feeling, in unity with, in agreement or harmony with instead of being at variance. [ATONE, v., ATONEMENT.]

"If gentlemen, or other of hir contré, Were wuth, schu wolde byryng hem at on, So wys and trye woude hadde schu, And judgement of so grut equité." *Chaucer: C. T.*, 5, 512-15.

"So bene they both at on, and doen appere Thur bevers bright each other for to greet, Goodly comפורטance each to other beere." *Spenser: F. Q. II.*, l. 28.

"And the next day he shewed himself unto them as they strove, and would have set them at one again, saying, Sira, ys are brethren, ..."—*Acts* vii. 28.

\*at-our, *adv.* Over and above.

"... with hyrdis of castell, and multitudine of corne at-our at thaim that was before me in Jerusalem."—*The Wisdom of Solomon* (ed. Lumby), 411, 413.

\*ät, *pro.* [Contr. from Eng. *that* (pro.) (q.v.).] Who, which, that. (Eng. & Scotch.)

"For in ensamill thare of the galf to the maist synare maist meny and grace, as to Felyx at dandy hym."—*The Craft of Deyng* (ed. Lumby), 97, 28.

"He sallis hime [gather] garlands of the gay showrys, At in that seconne spreis so layre." *Early Scotch Lirs*, iv. (ed. Lumby), 46, 47.

\*ät, \*ätte, *conj.* [Contr. from Eng. *that* (conj.) (q.v.).] That. (O. Eng. & Scotch.)

"Thal come tulle him that ikk night Atte that side on the morne light." *How the Balli Croc was Fundin be Seint Elnas* (ed. Morris), 41, 42.

"He has the halghed at mast con ken, And the saile menak al cristen men." *Tud.*, 211, 512.

\*ät, *pret. of v.* [ATE.]

ät-a-bäl, s. [Sp. *atabal* = a kettle-drum. In Fr. *atabale*; Port. *timbale*; Arab. 'at-'*tabl* = a drum; *tabala* = to beat a drum.] A kind of labor or drum used by the Moors.

"Then answered kettle-drum and *atabal*." *Scott: Vision of Don Rodarick*, 10.

a-tac-a-mite, s. [In Ger. *Atacamit*. From Atacama, a region partly belonging to Bolivia and partly to Chili.] An orthorhombic, translucent mineral, classed by Dana under his Oxylchloride. The hardness is 3 to 3½; the sp. gr. 3.7 to 4.3; the lustre verging from adamantine to vitreous; the colour bright green, with an apple-green streak. It is massive or pulverulent. Composition: Chlorine, 14.51 to 16.33; oxide of copper, 60 to 66.25; copper, 18.33 to 56.46; water, 16.91 to 22.60. Occurs in Atacama, in Chili; in Australia, in Africa; in Spain; and at St. Just, in Cornwall.

at-a-gäs, s. Another form of ATTAGAS (q.v.).

at-a-ghän, \*at-ta-ghän, yat-a-ghän (h silent), s. [Fr. *yataghan*, from Turk. *yataghan*.] "A long dagger worn with pistols in the belt, in a metal scabbard, generally of silver, and among the wealthiest gill, or of gold." (Lord Byron: Note to *The Giaour*.) The manner of wearing it is shown in the illustration.

"And silver-sheathed *ataghan*." *Byron: The Giaour*.

ATAGHAN.

äte, fat, färe, amidst, what, fällt, father; wë, wët, hère, camel, hër, there; pine, pit, sire, sir, marine; gö, pö, r, wöre, wölf, wörk, wöh, söng; müte, cüb, cüre, unite, cür, rüle, füll; try, Sÿrian. æ, œ = ä. ey = ä. qu = kw.

\*a-tāke, v.t. [Eng. a; take.] To overtake. "East have I piked, 'quod he, 'for your sake, Because that I wolde 'you atake." Chaucer: C. T., 13,512-13.

At-a-lan-ta, s. [Lat. Atalanta, Atalante; Gr. Ἀταλάντη.]

I. Classical Mythology:

(a) A daughter of Schoeneus, king of Scyros, who from her beauty had many suitors, but would marry none unless she obtained a man who could outrun her. The lover started first, she following and slaying him if she overtook him. At last, by one account Hippomenes, and by another Milanion, safely reached the goal, by dropping in succession three beautiful apples given him by Venus. He therefore became the husband of Atalanta.

(b) A daughter of Lasius, who was the first to wound the boar in the mythic hunt at Calydon.

¶ Some think the two Atalantes were the same person.

2. Astronomy: An asteroid, the thirty-sixth found. It was discovered by Goldschmidt at Paris on the 5th of October, 1855, the date on which Fides was first seen at Bilk by the astronomer Luther.

A-tal-ik-Gha'-zōe, s. [Hindnat., &c., atalik = a private tutor, a preceptor; ghazi, Arab., Hindust., &c. = a Mohammedan hero, especially if victorious in battle against the "infidel." A title given to the last independent ruler of Eastern Turkistan.

"Yakub-Beg, the Atalik-Ghase, or ruler of Eastern Turkistan." Daily Telegraph, Correspond. writing in 1878 from Tashkend.

†at-a-mān, s. [HETMAN.]

āt-a-mān-cō III-ŷ, s. The English name of the Zephyranthes atamasco, a native of North America, introduced into Britain.

\*at-ān-is, adv. [AT-ANIS.]

†āt-ar, s. [ATTAR.] Attar, otto.

atar-gul, s. [From atar (ATTAR), and Pers. gul = a rose.] Attar, generally called otto, of roses. The Persian is the finest.

"She snatch'd the orn wherein was mix'd The Persian atar-gul's perfume." Byron: Bride of Abydos, l. 10.

†āt-ar-āk-ŷ, āt-ar-āk-ŷ-a, s. [In Fr. ataraxie; Port. ataraxia, from Gr. ἀραξία (ataraxia) = freedom from passion: ā, priv., and rapáσω, (arassō) = to stir up, to rouse, to disturb.] Freedom from passion; calmness.

"The scepticks affected an indifferent equiponderous neutrality, as the only means to their ataraxia, and freedom from passionate disturbances." Graville: Scipius.

at-a-rno, v.t. [ATORN.] To run away, escape. [Rob. Glouc.: Chron., p. 539.]

a-tāste, v.t. [G. Fr. ataster.] To taste.

"Atastyn. Freguato." Prompt. Pars.

a-tāunt, a-tāun-tō, adv. [Eng. a; taunt.] Naut.: In the state of being fully rigged. (Used of vessels.)

a-tāv-ic, a. [Fr. atavique.] [ATAVISM.] Pertaining to or derived from a remote ancestor.

āt-a-viŷm, s. [Lat. atavus = (1) the father of the great-great-grandfather or great-great-grandmother; (2) an ancestor, forerunner; avus = (1) a grandfather, (2) an old man.]

1. Biology: The reversion of a descendant to some peculiarity of a more or less remote ancestor.

2. Med.: The recurrence of a disease from which a more or less remote ancestor suffered, but which has not appeared in the intermediate generations.

āt-a-vis-tic, a. [Eng. atavist(m); -istic.] Pertaining to or exemplifying atavism (q.v.).

a-tāx-i-a, s. [ATAXY.]

a-tāx-ic, a. [Eng. ataxy(y); -ic.] Pertaining to ataxia; irregular. [ATAXY.]

ataxic fever. A form of fever attended with cerebral excitement and delirium. It was believed by Pinel to have its chief seat in the brain and nervous system.

a-tāx-ŷ, a-tāx-i-a, s. [In Fr. ataxie; Sp. & Port. ataxia; from Gr. ἀταξία (ataxia) = (1) want of discipline, (2) disorder: ā, priv., and taxis (taxis) = arrangement, especially of soldiers; táσω (tasso) = to arrange.]

†A. Ordinary Language. (Of the form ataxy): Want of order; irregularity in anything.

"... would certainly breed an infinite ataxy and confusion amongst them, and at last the ruin and destruction of their Kingdom, ..." Halliwell: Melampus, p. 16.

B. Med.: Irregularity in the functions of the body, or in the course of a disease. [LOCOMOTOR ATAXY.]

\*at-blēn-che, v.t. [A.S. at = from, and blencan = to start away from. (BLANK, BLINK.) In combination with at, as at dæst = escaped.] To escape.

"And suncea at-blēncha From athanases wrenche, And from his awikleness." Sinners Beware (ed. Morris), 230-2.

āt-ghē-sōn, āt-ghī-sōn, s. [Named after Mr. Atkinson (or the Scotch pronunciation Atcheson), an Englishman, who was assayer of the mint at Edinburgh in the beginning of James VI.'s reign.]

Numis.: A billion coin, or rather a copper coin, washed with silver, struck in the reign of James VI. Its value was = eight pennies Scotch or 3/4 of an English penny. It had on it the royal arms crowned; "Jacobus, D.G., R. Scot., R. Oppid. Edin.;" and a leaved thistle crowned. (Jamieson.)

¶ Bishop Nicolson says that atchesons were coined first in the time of James III., and were four to the penny.

\*at-ghī-ŷe, v.t. [ACHIEVE.]

"With which she wondrous deeds of arms achieved." Spenser: F. Q., IV. iv. 46.

\*at-ghī-ŷe-ment, s. [ACHIEVEMENT.]

\*āte, s. [HATE.]

"And alth, and strit, and ate, and san." Story of Gen. and Exod. (ed. Morris), 373.

\*āt-ē, prep. [Eng. at (th)z.] At the. [AT, ATTAN.] His wyt ate done he bet." Beryn Sages, 230.

āto, \*āt, or ət, pret. of verb. [EAT.] Did eat. (The preterite of the verb to eat.)

"Sum ghe ther at and sunn ghe nam." Story of Gen. and Exod. (ed. Morris), 337.

"... and ate the sacrifices of the dead." -Ps. cvi. 28.

Ā-tō, s. [Gr. Ἄτη (Atē) = the goddess of mischief, authoress of all blind and foolish actions; ἀτή (atē) = (1) bewilderment, judicial blindness, (2) sin, (3) destruction; from āw (aaw) = (1) to hurt, (2) to go astray.]

1. Class. Myth.: The goddess thus described (the term being used by or attributed to persons who may have believed her to have had a real existence).

"Not by myself, but vengeful Atā, driven." Pope: Homer's Iliad, bk. xix. 92.

"And Caesar's spirit, ranging for revenge, With Ate by his side, come hot from hell." Shakesp.: Julius Caesar, III. 1.

2. Gen.: Mischief or destruction personified (the term Ate being used by, or attributed to, those who did not believe in its classical mythology).

"Come, talk not of her; you shall end her the infernal Ate in good apparel." Shakesp.: Much Ado about Nothing, II. 1.

-āte, in compos. [From the Lat. suffix -atus, the pa. par. of verbs belonging to the first conjugation, or sometimes from their supine -atum.]

I. As a termination in adjectives it is equivalent to the participle or participial adjective -ed; as animate, adj., the same as animated = possessed of breath, life, or spirit; determinate = determined.

II. As a termination in verbs it is in almost every case formed from the adjective. It signifies either to make, or to act, or do that which is indicated by the adjective or substantive to which it corresponds; as propitiate = to make propitious; dominate = to act as a domina or lord over; radiate = to make or emit radii, i.e., rays.

III. As a termination in nouns:

1. In ordinary words it is = office or dignity; as tribunate = the office or dignity of a tribune.

2. In chemical terms it is used in naming salts. The -ic of the acid is changed into -ate, and the word thus formed is connected by of with the name of the substance combined with the acid. Thus, from acetic acid comes acetates; as acetates of lead, copper, alumina, &c. From sulphuric acid comes sulphates; as of soda, lime, and alumina.

a-tē'al, at-tē'al, at-tē'ille, at-tī'le, s. [TEAL.] The Scotch name of a duck, the Widgeon (Anas penelope), or an allied species.

\*a-tē'inte, v.t. [Old Fr. atineter.] To give a colouring to.

\*āt-ē-lēne, a. [Gr. ἀτελής (ateles) = without end, . . . imperfect: ā, priv., and τέλος (telos) = end, . . . perfection.] Mineralogy: Imperfect; wanting regular forms in the genus. (Shepard.) (Webster.)

āt-ē-lōŷ, s. [Gr. ἀτελής (ateles) = without end, . . . imperfect: ā, priv., and τέλος (telos) = end, . . . completion.] A genus of Cebidæ, or American monkeys. They have a facial angle of 60°; the thumbs of the fore-hand concealed under the skin, and the prehensile part of the tail naked underneath. There are several species. They are generally called Spider Monkeys. They inhabit Brazil and the neighbouring regions.

a-tē'l-ē-sīte, s. [Gr. ἀτελής (ateles) = without end, . . . imperfect, incomplete; and suffix -ite.] A mineral imperfectly known, containing bismuth. It is found at Schneeberg. Dana places it in the appendix to his Anhydrous Silicates.

†a-tē'l-ŷ-er (er as ā), s. [Fr.] A workshop, a studio.

¶ The word has other meanings in French.

A-tē'l-lan, a. & s. [Lat. Atellanus, from Atella, an ancient Campanian town belonging to the Osci.]

A. As adjective: Pertaining or relating to Atella, or to the farces there acted.

"Their Fescennin and Atellan way of wit was in early days prohibited." Shaftesbury.

B. As substantive: A popular kind of farces acted by the young men of Atella. They seem to have consisted of burlesque metrical imitations of the dialect and manners of the peasantry.

"Many old poets . . . did write fescennines, atellanas, and lascivious songs." -Burton: Anat. of Mel., p. 414.

"Love-stories, plays, comedies, atellana, liqa." -Ibid., p. 642.

āt-ē-lō, in compos. [Gr. ἀτελής (ateles) = . . . imperfect.]

Med.: Imperfect, as alelo-gnathia = malformation of the jaws.

a-tēm-pō, a-tēm-pō prī-mō, used as adv. [Ital, the same as Lat. in tempore = in time, or in tempore primo = in the first time.] Music: In the original time, signifying that after any change of time in a musical composition the original time is to be resumed.

a-tēm-pō gī-ūs-tō, used as adv. [Ital, the same as Lat. in tempore justo = in just time.] Music: In just, marked, or proper time.

\*āt-ēn, prep. [AT, ATTE. Contracted from at then.]

aten end. At end; finally.

a-tē'nd, pa. par. [A.S. atendan.] Set alight, set fire to. (Siv Ferumbraz, 3,280.)

\*at-ē-neŷ, adv. [AT-ANIS, &c.]

\*a-tēnt', s. [From attentum, sup. of attendo.] [ATTEND.] An object, an intention. (Siv Amadas, 372.)

\*a-tē-ōn, v. [A.S. teonan, tynan = to make angry.] To make angry. (Chron. of Eng., 61.)

\*a-tē'yn, v.t. [Fr. tanner = to tire, to tease, to weary.] To overfatigue.

"Kynge Richard was almost atenyng." Richard, 437. (S. in Boucher.)

Āth-ā-bās-cān, Āth-ā-bās-kān, or Āth-ā-pās-kān, a & s.

I. As adjective: Pertaining to a widely distributed family of North American languages and tribes.

II. As substantive: A member or a language of that family.

a-thā-lī-a, s. [From Gr. ἀθάλη (athalēs) = not verdant, withered.] A genus of saw-flies (Tenthredinidæ). A spinarum or centifolia is the Turnip Saw-fly, so called because its larvae, which are the animals called black or ruggers, feed on turnips. The perfect insect is common in some years from May to August. It has a

bōil, bōy; pōut, jōwī; cat, çell, chorus, çhin, bench; go, çem; thin, çhis; sin, aŷ; expect, çenophon, exist. ph = ç -cian, -tian = çhan. -cion, -ticion, -sion = çhün; -çion, -çion = çhün. -çious, -çious = çhüs. -ble, -dle, &c. = bel, çel.

"Thy Father, who is holy, wise, and pure, suffers the hypocrite or atheous priest To tread his sacred courts and minister About his altar, handling holy things" Milton: P. R., bk. 1.

\* a-thër, conj. [EITHER.] (Scotch.)
g-thër-i-äs-tite, s. [From Gr. ἀθεραστὸς (its discoverer says), which is a word not in Liddell and Scott. Should it be ἀθεραστός (atheristos) = unheated (?).] A mineral, a variety of Scapolite, placed by Dana under the mineral Wernerite. It is of a greenish colour, and is found at Arendal, in Norway.

āth-ēr-īne (Eng.), āth-ēr-ī-na, s. [Mod. Lat. atherina; from Gr. ἀθερίνη (atherinē) = a kind of smelt (Aristotle).]
A. Of the form atherine:
Ordinary Language: A pretty little fish, from five to six inches long, called also the Soudsmelt. It is the A. presbyter of Cuvier. It is found along the southern coasts of Britain, occupying a region distinct from that in which the smelt (Osmerus eperlanus) occurs. It is used as food.

B. Of the form atherina:
Zool.: A genus of fishes of the order Acanthopterygii and the family Mugilidae (Mulletts). Several species are known in the Mediterranean and elsewhere. The young, which congregate together, are the Aplysae of the ancients. Now, in the south of Europe, they are called Nonnat.

g-thër-man-çy, s. [From Gr. ἀθερμαντός (athermantos) = not heated; ἀθερμος (athermos) = without heat; ἄ, priv., and θερμός (thermos) = hot.] The term used by Melloni to express the power which certain bodies have of stopping radiant heat. [DIATHERMANCY.] (Atkinson: Ganot's Physics, § 373.)

g-thër-man-ōis, adj. [From Eng. atherman(cy); -ous.] [ATHERMANCY.] Pertaining or relating to athermancy (q.v.). (It is opposed to diathermanous.)

āth-ēr-ō-ma, s. [Lat. atheroma; Gr. ἀθήρωμα (athērōma) = a tumour upon the head filled with matter; from ἀθήρη (athērē), also ἀθήρα (athara); Attic ἀθήρη (athērē) = groats or meal.] A species of wax filled with curdy matter. It does not cause pain, discolour the skin, or yield easily to the touch.
"If the matter forming them resembles milk curds, the tumour is called atheroma; if it be like honey, melicera; and if composed of fat, or a casey substance, steatoma." -Sharp.

āth-ēr-ōm-g-tōis, n. [Gr. ἀθήρωματός (athērōmatos), genit. of ἀθήρωμα (athērōma) (ATHEROMA), and Eng. suffix -ous.] Pertaining or relating to atheroma. Curdy in appearance and consistency.
"... the atheromatous deposits which are so common in peculiar diatheses, or at an advanced period of life." -Todd & Bowman: Physiol. Anat., vol. II., 300.

āth-ēr-ō-spër-ma, s. [Gr. ἀθήρη (athērē) = the beard or spike of an ear of corn; σπέρμα (sperma) = seed. So called from the seed being crowned by a permanent hairy style.]
Bot.: A genus of plants, the typical one of the order Atherospermales (q.v.).

āth-ēr-ō-spër-mā-çë-æ, s. pl. [From the typical genus atherosperma (q.v.).]
Bot.: An order of exogenous plants placed by Lindley in his Menispermal Alliance. Their English name is Plumbe Nutmegs. They

PLUMBE NUTMEG.

are unisexual plants, having neither calyx nor corolla, but only an involucre. In the male

flowers the stamens are numerous; in the females they are less so. Each involucre has several ovaries, with solitary erect ovules, which afterwards become feathered at the summit by the persistent styles. They are natives of New Holland and South America. In 1846 Lindley estimated the known species at four only.

āth-īl, \* āth-īl, a. & s. [ATHEL.] (Scotch.)
\* ā-thīnk, impers. v. [A.S. ofþyncan.] To repent. (Wycliffe: Genesis vi. 7.)

\* ā-thīr, \* ā-thyr, conj. [EITHER.]
ā-thīr, \* ā-thyr (yr as ir), a. [OTHER.]

a-thirst', \* a-thyrst' (yr as ir), a. [Eng. a; thirst.] [THIRST, THIRSTY.]

I. Lit.: Having a necessity and a longing for water or some other liquid wherewith to slake the thirst; craving after something to drink.
"... when thou art athirst, go unto the vessels and drink..." -Ruth II. 9.
II. Figuratively:
1. Gen.: Feeling an intense longing after something.
"Athirst for battle."
Cooper: Homer's Iliad, bk. viii.
2. Spec.: Feeling intense dissatisfaction with worldly pleasure, occupation, or care, and eager longing for spiritual good.
"I will give unto him that is athirst of the fountain of the water of life freely." -Rev. xxi. 6.

āth-lēte, † āth-lēt, s. [In Dan. & Ger. athlet; Fr. athlète; Sp. & Ital. atleta; Port. atleta; Lat. athleta, athletes; Gr. ἀθλητής (athlētēs): from Lat. athlon and athla; Gr. ἀθλον (athlon) = a struggle, a work, a labour.]

I. Literally:
1. Originally: A man trained to contend in some one of the physical exercises established among the Greeks and Romans. These were five in number—viz., running, leaping, boxing, wrestling, and throwing the discus or quoit.
"David's combat compared with that of Diotippus, the Athenian athlete." -Delany: Life of David.
2. Now (in a more general sense): A person with strongly-developed muscles, and trained to contend in exercises which require for success much physical strength.
"Having opposed to him a vigorous athlete." -A. Smith: Theory of Moral Sentiments.

II. Figuratively: An intellectually strong and well-educated man who contends against opponents, not with his muscles, but with his mind.
"Bat I submit, that the dictum of a mathematical athlete upon a difficult problem which mathematics offers to philosophy, has no more special weight than the verdict of that great pedestrian, Captain Barclay, would have had in settling a disputed point in the physiology of locomotion." -Hazley: Lay Sermons, 5th ed.; Prefatory Letter, vi.

ath-lēt-ic, \* ath-lēt-ick, a. & s. [Eng. athlet(e); -ic. In Fr. athlétique; Lat. athleticus; Gr. ἀθλητικός (athlētikos).]

A. As adjective:
1. Pertaining to the games or contests in which the ancient sthletes strove. [ATHLETIC.]
"The athletic diet was of pulse, aliphon, maza, barley, and water." -Sir T. Browne: Misc. Tracts, p. 17.
2. With great muscular development, like that possessed, after training, by the ancient sthletes.
"The hundreds of athletic Celts whom he saw in their national order of battle were evidently not allies to be despised." -Macaulay: Hist. Eng., ch. xiii.
B. As substantive: "The art of activity." Athletics.
"... art of activity, which is called athletic; and art voluptuary, which Tacitus truly calleth eruditus luxus." -Bacon: Adv. of Learning, bk. II.

ath-lēt-ic-al-ly, adv. [Eng. athletic; -ly.] In an athletic manner; with exertion of much physical strength. (Barrow.)

ath-lēt-i-çism, s. [Eng. athletic; suffix -ism.] The art of training one as an athlete; the state of being so trained; athletics. (Maunder.) (Reid's Dict.)

ath-lēt-ics, s. [ATHLETIC.] The art of developing muscular strength for the sake of prize or other contests, or for the ordinary physical work of life.
"Can parents and schoolmasters possibly go on any longer pretending to think that cricket, boating, and athletics, as now conducted, are only recreations?" -Mark Pattison: Academic Organisation (1868), p. 216.

\* āth-lēt-ism, a. [Eng. athlet(e); -ism.] The same as ATHLETICISM (q.v.). (Webster.)

Āth-ōl, Āth-ōio, Āth-ōil, s. [Celtic.] A district in the northern part of Perthshire.
Āthol brose: Honey mixed with aqua vitæ, used in the Highlands as a specific for cold. Meal is sometimes substituted for honey. (Jamieson.)

"The captain swallowed his morning draught of Athol brose and departed." -Scott: Heart of Midlothian, chap. xlviii.

\* at-hōld, \* at-hūld, v. l. To hold back, to withhold.
" And bad him go and hir at-hold."
Sir Orfeo, 49. (S. in Boucher.)

A-thor, s. An asteroid, the 161st found. It was discovered by Watson on April 18th, 1876.

a-thort', prep. & adv. [ATHWART.] (Scotch.)

a-thrō-ūs, s. [Gr. ἀθρός (athrōos) = unpunished; harmless: ἄ, priv., and θωγή (thōgē) = a penalty.]
Entom.: A genus of beetles belonging to the family Elateride. The larvæ of the several species—A. longicollis, the Long-necked Click Beetle; A. niger, the Black Click Beetle; and A. ruficornis, the Red-tailed Click Beetle—produce "wire-worms," but not all destructive to farm crops. (Curtis.)

\* a-thrōe, \* a-thrē, \* a-thrē-ō, adv. [Eng. a; three.] In three.
"This loud was delect athre among three soeces y wyra."
Robert of Gloucester, p. 13. (Richardson.)

a-thrōp-si-g, s. [Gr. ἄ, priv., and θρεψίς (threpsis) = nourishment.] Want of nourishment; the bad habit of body resulting therefrom.

a-thrix-i-g, s. [Gr. ἀτριξ (athrix): ἄ, priv., and τριξ (trix) = hair, in allusion to the absence of hairs from the receptacle and the stigmata of the ray.]
Bot.: A genus of plants belonging to the order Asterales, or Compositae. A. capensis is a pretty greenhouse shrub, with narrow lanceolate leaves and bright crimson solitary heads of flowers.

\* a-thrōb', a. [Eng. a = on, and throbb, s.] Throbbing, palpitating.

\* a-thrōte, v. l. [G. Eng. a; and A.S. throte = the throat.] To struggle, to choke.
" And if thou wilt algates with superfluity of riches be athroted." -Chaucer: Test. of Loue, bk. II.

a-thwärt (Eng.), a-thort' (Scotch), prep. & adv. [Eng. a; thwart (q.v.).]
A. As preposition:
I. Ordinary Language:
1. Literally:
(a) Across, transversely; from one side to the other.
" He sat him down at a pillar's base,
And pass'd his hand athwart his face."
Byron: Siege of Corinth, 19.
(b) So as to cross, without reference to whether it is transversely, longitudinally, or diagonally.
" Her lights, wif' hissing eerie din:
Athort the lift they start and shift,
Like fortune's favours' tint as win."
Burns: A Vision.
2. Figuratively:
(a) So as to cross; so as to thwart.
" Strikes the rough thread of error right athwart
The web of every scheme they have at heart."
Cooper: Esposicion.
(b) Through; in the midst of.
" Now, athwart the terrors that thy vow
Has planted round thee, thou appear'st more fair."
Addison.
II. Technically:
Naut. Athwart hawse: A term applied to the situation of a ship when she lies across the stem of another one, either in immediate contact with her or a short distance off.
Athwart ships: Reaching across the ship from side to side; transversely across the ship.
Athwart the fore-foot: A term applied to the direction of a cannon-ball fired by one ship across the bow of another as a signal or a command for her to lay to.

B. As adverb:
I. Lit. Of material substances and their direction:
1. Seized by the middle, so as to be cross-wise. (Pope: Homer; Iliad III. 111.)
2. Across, so as to pass from side to side. (Thomson: Spring, 509.)

hōll, hōy; pōut, jōwl; cat, çell, chorus, çin, bench; go, gem; thin, this; sin, a; expect, Xenophon, exist. -ing. -cian, -tian = çan. -tion, -sion, -cioun = çhün; -tion, -çion = zhün. -tious, -sious = shüs. -ble, -dle, &c. = bpl, dpl.

**II. Fig. Of adverse influence:**

1. So as to thwart; croakily, vexatiously, perplexingly.

"All *athwart* there came  
A post from Wales, laden with heavy news."  
*Shakesp.: 1 Henry IV., l. 1.*

2. Awry; wrong; to destruction.

"The baby beats the nurse; and quite *athwart*  
Goes all decorum."  
*Shakesp.: Meas. for Meas., l. 3.*

3. Abroad; far and wide. (Scotch.)

"There goes a speech *athort* in the name of the Duke  
of Lennox."  
*Baillie's Letters, l. 88. (Jamieson.)*

**á-thý-mí-s,** s. [Gr. *áthymía* (*athymía*), from *áthymía* (*athymos*) = to be down-hearted; *á*, priv., and *thymós* (*thumos*) = the soul as the seat of passion.] Faint-heartedness, despondency.

\* **á-thyr** (yr as *ir*), conj. [EITHER.] (Scotch.)

\* **á-thyr** (yr as *ir*), a. [OTHER.] (Scotch.)

**á-thýr-l-ím,** s. [Gr. *á*, priv., and *thýron* (*thurion*) = a little fern, a wicket.] A genus or sub-genus of ferns containing, of British plants, the *A. filix femina* and the *A. fontanum*. [ASPLENIUM.]

\* **á-tíl,** \* **á-týle,** v. t. [Old Fr. *attiler*.] To equip, to supply with necessary stores.

"Upe is stede l-armed is, and attiled thorn out al."

*Rob. Glouc.: Chron., p. 525.*

"Al ys tole wal atyled to the batayle scoot."

*Ibid., p. 261. (S. in Boucher.)*

\* **á-tíl,** \* **á-týl,** s. [From the verb.] Furniture, necessary appples.

"And al here *atyl* and tresour was also assenyt."

*Rob. Glouc.: Cron., p. 61. (Boucher.)*

¶ In another MS. it is *catel*, and in a third *atyre*. (S. in Boucher)

**á-tílt,** **at tílt,** adv. & a. [Eng a, and *tílt*; *at tílt*.] [TILT.] As if tilting; as a person would do who tilts.

1. As adv.: as if thrusting at an antagonist.

"when in the city Tours,  
Thou ran'st *atílt*, in honour of my love,  
And stolt' away the ladies' hearts of France."  
*Shakesp.: 2 Hen. VI., l. 3.*

2. As adj.: In the position of a barrel raised or tilted behind, to make it run out.

"Such a man is always *atílt*: his favours come  
hardly from him."  
*Spectator.*

**át-i-mý-s,** s. [Gr. *átimía* (*atimía*) = dishonour; *átimáa* (*atimáa*) = to dishonour; *á*, priv., and *timé* (*timé*) = worship, honour; *ísa* (*tió*) = to pay honour.]

In Ancient Greece: Infamy; public disgrace inflicted on those who had been guilty of certain offences.

**á-tion,** [Eng. suff., from Lat. *atio*, as *oblation*, from Lat. *oblatio* = an offering.] It signifies (1) the act of, (2) the state of being, and (3) that which. For example: "God's creation of the world" means "God's act of creating the world;" "the world's creation" signifies "its state of being created," and by the expression "the viable creation" we mean "the persons who and things which have been created."

**at-lán-tá,** s. [From the Atlantic, in which the species occur (?).] A genus of molluscs, the typical one of the family Atlantidæ (q.v.). The shell, which is minute, is glassy, with a dextral operculum, though it is a dextral shell, a phenomenon of a unique character. According to Tate, in the year 1875 there were known of recent species eighteen, from the Canary Islands and the warmer parts of the Atlantic. A sub-genus *Oxygyrus* added four more to the list.

**At-lán-tō-an,** † **At-lán-tí-an,** **at-lán-tō-an,** \* **At-lán-tic,** a. [Lat. *Atlanteus*; Gr. *Ἀτλαντικός* (*Atlantikos*).]

**A.** (Of the forms *Atlantean* and *atlantean* only)

1. Spec.: Pertaining to Atlas or the mountains called after him. [ATLAS.]

2. Gen.: Strong; capable of bearing great weight. (Used chiefly of shoulders.)

"Sage he stood,  
With *Atlantean* shoulders, fit to bear  
The weight of mightiest monarchies."  
*Milton: P. L., bk. 11.*

"What more than *Atlantean* shoulder props  
The incumbent load."  
*Young: Night Thoughts, 3.*

† **B.** (Of the forms *Atlantian* and *Atlantean*): Pertaining to the probably fabulous island of Atlantis (q.v.).

**At-lán-tēs,** s. pl. [In Fr. *atlante* (sing.); Sp. *atlantides*. From Gr. *Ἀτλαντες* (*Atlantes*), pl. of *Ἀτλας* (*Atlas*), genit. *Ἀτλαντος* (*Atlantos*).]

**Arch.:** Colossal statues of men used instead of pillars to support an entablature. Roman

ATLANTES (FROM POMPEII.)

architects called them *τελαμώνες* (*telamōnes*). (Vitruv., vi. 10.) When statues of women support an entablature they are generally called *Carysides* (q.v.).

**At-lán-tic** (l), a. & s. [In Fr. *Atlantique*; Sp., Port., & Ital. *Atlantico*; Lat. *Atlanticus*; Gr. *Ἀτλαντικός* (*Atlantikos*).]

**A.** As adjective: Pertaining or relating to the ocean so designated.

"The murmurs of th' *Atlantic* wave."  
*Cowper: Task, bk. iv.*

**B.** As substantive: The great ocean between Europe and Africa on the one side and America on the other, divided into the Northern, the Intertropical, and the Southern, or simply into the Northern and Southern Atlantic.

"The doctrine that there has been a continuous formation of Globigerina mud on the bottom of the Atlantic from the Cretaceous epoch to the present time . . . must be admitted as (to say the least) a not improbable hypothesis."  
*Dr. W. Carpenter. (Encyc. Brit., 9th ed., III. 81.)*

\* **At-lán-tic** (2), a. [ATLANTEAN.]

**At-lán-ti-ca,** s. [ATLANTIS.]

**at-lán-ti-dæ,** s. pl. [ATLANTA.]

**I. Ethn.:** According to Latham, one of the primary varieties of the human species. The maxillary profile is projecting; the nasal one generally flat; the frontal one retiring; the cranium dolichocephalic, the parietal diameter being generally narrow. Eyes rarely oblique. Skin often jet black, very rarely approaching a pure white. Hair crisp, woolly, rarely straight, still more rarely light-coloured. Languages with an agglutinate, rarely an amalgamate inflection. Distribution, Africa. Influence on the history of the world inconsiderable.

**II. Zoology:** A family of mollusca belonging to the class Gasteropoda and the order Nucleobranchiata. There is a symmetrical discoidal shell, sometimes closed by an operculum. The gills are contained in a dorsal mantle-cavity. Genera: *Atlanta*, *Bellerophon*, &c.

**At-lán-ti-dēs,** s. pl. [Lat. *Atlantides*, *Atlantides*.]

1. **Class. Myth.:** The daughters of Atlas, seven of whom were called *Alas Pleiades*, after their mother Pleione. After their death they were supposed to have been transformed into the constellation Pleiades.

2. **Astron.:** A designation sometimes given to the stars constituting the Pleiades.

**At-lán-tis,** **At-lán-ti-ca,** s. [From Gr. *Ἀτλαντίς* (*Atlantis*).] An island, said by Plato and others to have once existed in the ocean immediately beyond the Straits of Gades, that is, in what is now called the Atlantic Ocean, a short distance west of the Straits of Gibraltar.

Homer, Horace, and some others made two "*Atlanticas*," distinguished as the *Hesperides* and the *Elysian Fields*, and believed to be the abodes of the blest. The patriotic view, of course, would gladly make these Great Britain and Ireland. Plato states that an easy passage existed from the one Atlantis into other islands, which lay near a continent exceeding in size all Europe and Asia. Some have thought this America. Atlantis is represented as having ultimately sunk beneath the waves, leaving only isolated rocks and shoals in its

place. Geologists have discovered that the coast-line of Western Europe did once run farther in the direction of America than now; but its submergence seems to have taken place long before historic times, so that the whole ancient story about Atlantis was probably founded on erroneous information, or arose from a clever guess put forth by a man of lively imagination.

¶ **The New Atlantis:** The title which Lord Bacon gives to a literary fragment, in which he sketched out an ideal commonwealth.

**át-las,** **At-las,** s. [In Sw., Dan., Dut., Ger., Fr., Sp., & Port. *atlas*, *Atlas*; Lat. *Atlas*, genit. *Atlantis*; Gr. *Ἀτλας* (*Atlas*), *Ἀτλαντος* (*Atlantos*); *ἄτλας* (*atlas*), *ἄτλαντος* (*atlantos*).]

**A.** Of the form *Atlas*:

1. **Class. Myth.:** A king of Mauritania, believed to have been transformed, by looking at the head of Medusa, into the range of mountains of the same name. He was supposed to support the world on his shoulders.

"*Atlas* her sire, to whose far-piercing eye  
The wonders of the deep expanded lie;  
Th' eternal columns which on earth he rears  
End in the stary vault, and prop the spheres."  
*Pope: Homer's Odyssey, bk. 1., 67-70.*

2. **Geog.:** The range of mountains mentioned above. The highest peak, which is in Morocco, is about 11,400 feet in elevation.

**B.** Of the form *atlas*:

**I. Ordinary Language:**

1. A collection of maps, probably so called from the fact that some volumes of maps used to have as a frontispiece a representation of Atlas supporting the world on his shoulders. The celebrated geographer Mercator was the first to use the word in this sense. He lived in the sixteenth century.

2. A large square folio, externally resembling a quarto or a book of maps, but which consists of large engravings, as, for instance, anatomical plates or landscapes illustrative of a country.

"Owen's report of a geological survey of Wisconsin, Iowa, and Minnesota, and part of the Nebraska Territory, with *atlas* of coloured plates."  
*—Name of Book.*

¶ This use of the word is somewhat rare in England and America, but very common in France.

† 3. A book in which the information is presented in a tabular form.

† 4. In the same sense as B. 3.

**II. Technically:**

1. **Arch.:** The supporters of a building. [ATLANTES.]

2. **Anat.:** The first cervical vertebra, the one on which the head is balanced. It is very strong, and has great freedom of movement.

"The first and second cervical vertebrae, called respectively *atlas* and *axis*."  
*—Flemer: Osteology of the Mammalia, p. 22.*

3. **Silk-weaving:** A rich kind of silk or stuff manufactured in the East, and designed to be used in making articles of female attire.

"I have the convenience of buying Dutch *atlases* with gold and silver, or without."  
*—Spectator.*

4. **Paper-making:** A large kind of drawing-paper, 26 in. x 33 or 34 in.

¶ **Atlas Beetle:** A fine lamellicorn beetle found in portions of the East. It is the

ATLAS BEETLE.

*Chalcosoma atlas.* The male is brilliant metallic olive-green; the female duller. The male is about three inches long.

† **atlas-fine,** a. & s. A kind of paper, opposed to *atlas-ordinary* (q.v.). [ATLAS, B., II. 4.]

† **atlas-ordinary,** a. & s. A kind of paper, opposed to *atlas-fine* (q.v.). [ATLAS, B., II. 4.]

"The preservation of this faith is of more consequence than the duties on red lead, or white lead, or on broken glass, or *atlas-ordinary*, or *denry-fine*, or blue royal."  
*—Burke on Amer. Tax.*

**fate, fát, fáre, amidst, whát, fáll, father; wā, wēt, hère, camél, hēr, thère; pine, píť, sírc, sír, maríne; gō, pót, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, uníte, cūr, rúle, fáll; trý, Sýrian. æ, œ = é. ey = á. qu = kw.**

**át-las-ite, s.** [Apparently from Ger., &c., *atlas* = . . . satin, named from the satiny or silky character of the mineral. The term corresponds with Ger. *atlaserz* = fibrous malachite.] A mineral believed by Dana to be not sufficiently distinct from Azurite to constitute a quite independent species. He believes that it may be a mixture of about  $\frac{3}{4}$  parts of Azurite with 1 part of Atacamite. It is from Chili.

**át-mí-dóm-ét-ér, s.** [From Gr. *ἀτμός* (*atmos*) = (atmos), genit. of *ἀτμός* (*atmos*) = the steam of a fomentation. Cognate with *ἀτμός*.] [See **ATMOMETER**.] An instrument still in use, invented by Babington, for measuring the evaporation from water, ice, snow, &c. It consists of two glass or metal bulbs, one of them placed above the other, with which it communicates by a narrow neck. The lower one is weighted with shot or mercury, and the upper has on it a small glass or metal stem, with a scale graduated in grains and half-grains. On the top of all there is a shallow pan. The instrument being immersed in a vessel of water through a circular hole in which the steam rises, distilled water is gradually poured into the pan above, causing it to sink to the point at which the zero of the steam is on a level with the cover of the vessel. As then the water in the pan gradually evaporates, the stem slowly ascends, the amount of evaporation being indicated in grains on the graduated scale. (*Brande*.)

ATMIDOMETER.

**át-möl-ö-gy, s.** The science of the laws and phenomena of aqueous vapor.

**át-mö-lý-se, v.t.** [Gr. (1) *ἀτμός* (*atmos*) = smoke or steam; (2) *λύσις* (*lusis*) = a loosing or setting free; *λύω* (*luo*) = to loose.] To separate, at least partially, two gases or vapours of unequal diffusibility which are combined with each other. (*Fownes*: *Manual of Chemistry*, 10th ed., p. 140.)

**át-mö-lýg-ér, s.** [Eng. *atmolyse*; -*er*.] That which produces atmolyse, the partial separation of gases or vapours of unequal diffusibility.

**Tube atmolyser:** An instrument for effecting this result. It consists of a tube of glazed earthenware, about two feet in length, placed within a shorter tube of glass in contact with an air-pump. The air between the two tubes being to a large extent exhausted, the mixed gases are allowed slowly to traverse the earthenware pipe, when much of the lighter one escapes through the pores into the other. (*Fownes*.)

**át-möl-ýs-is, s.** [ATMOLYSE.] The act or operation of separating two gases in combination from each other. (*Fownes*.)

**át-móm-ö-tér, s.** [Gr. *ἀτμός* (*atmos*) = smoke, steam, vapour; Sansc. *atma* = spirit, soul; and Gr. *μέτρον* (*metron*) = a measure.] An instrument invented by Sir John Leslie for measuring the quantity of moisture exhaled in a given time from any humid surface. It consists of a very thin ball of porous earthenware, from one to three inches in diameter, having a small neck firmly cemented to a long and rather wide tube of glass, to which is adapted a brass cap with a narrow collar of leather to fit closely. It is filled with distilled or pure water, and its cap screwed tightly. It is then suspended out of doors in a situation where it is exposed freely to the action of the wind, but is sheltered from rain. As the water evaporates from the external

ATMOMETER.

surface of the ball, it transudes through its porous substance, and the waste is measured by the corresponding descent of the liquid in the stem. To test the amount of this descent there is a finely-graduated scale. When the water has sunk to the bottom of the stem the latter requires to be filled anew.

**át-mö-sphère, s.** [In Sw. *atmosfer*; Ger. *atmosphäre*; Fr. *atmosphère*; Sp. & Ital. *atmosfera*; Port. *atmosfera*; from Gr. *ἀτμός* (*atmos*) = smoke, steam, vapour, and *σφαῖρα* (*sphaîra*) = a ball, a sphere.]

1. *Lit.*: The air surrounding our planet, and which, as the eymology implies, is, speaking broadly, a "sphere" (not, of course, a solid, but a hollow one). With strict accuracy, it is a hollow apheroid. Its exact height is unknown. At 27 miles above the surface of the earth half its density is gone, and the remainder is again halved for every further rise of 27 miles. Some small density would remain at forty-five miles high. At eighty miles this would have all but disappeared. But from sundry observations, made at Rio Janeiro and elsewhere, on the twilight arc, M. Liais infers that the extreme limit of the atmosphere is between 198 and 212 miles. For its weight, see **ATMOSPHERIC PRESSURE**. In the lower strata of the atmosphere the temperature falls at least a degree for every 352 feet of ascent; hence, even in the tropics, mountains of any considerable elevation are snow-capped. The atmosphere appears to us blue, because, absorbing the red and yellow solar rays, it reflects the blue ones. It revolves with the earth, but being extremely mobile, winds are generated in it, so that it is rarely long at rest. [WIND.] For its composition, see **AIR**. Evaporation continually at work sends into it quantities of water in a gaseous state; clouds are formed (**CLOUDS**), and in due time descend in rain. [**RAIN**, **METEOROLOGY**.] The atmosphere always contains free electricity, sometimes positive and sometimes negative. There appears to be no atmospheres around the Moon; but the case seems different with the Sun, Venus, Mars, Jupiter, and Saturn.

How as a tallman of magic fame,  
This atmosphere conveys th' enlightening beam,  
Reflects, infects, refracts the orient ray  
Anticipating sheds the rising day."  
*Brook*: *Universal Beauty*. (*Richardson*.)

2. *Fig.*: Any pervading intellectual, moral, religious, or other influence by which one is surrounded; as in the expression, "He lives in an atmosphere of suspicion."

\* **Electrical Atmosphere:** An obsolete name for the aphere immediately surrounding an electrified body and operated upon by it.

\* **Magnetic Atmosphere:** The aphere within which the attractive force of the magnet acts.

**át-mö-sphér-ic, át-mö-sphér-ic-al, a.** [Eng. *atmospheric*; -*ic*, -*ical*. In Fr. *atmosphérique*; Sp. *atmosférico*.] [**ATMOSPHERE**.] Pertaining or relating to the atmosphere. *Specially*—

1. Constituting or pervading the atmosphere; made of air.

" . . . the transparent atmospheric envelope . . ."—*Herschel*: *Astronomy*, § 566.

2. Existing within the atmosphere.

" . . . but when we reflect that the Cordillera, running in a north and south line, intercepts, like a great wall, the entire depth of the lower atmospheric current . . ."—*Darwin*: *Voyage round the World*, ch. xv.

3. Produced by the atmosphere.

" Measure of atmospheric pressure, . . ."—*Prof. Atry*: *Sound*, p. 5.

† 4. Under the influence of the atmosphere; affected in temperament by the atmosphere. (*Pope*.)

† **atmospheric air.** The ordinary air belonging to the atmosphere, as contradistinguished from other "airs," the old term for gases. Now that the word *air* has come specifically to mean that in the atmosphere, the expression *atmospheric air* is a tautology, and will probably sink into disuse.

**atmospheric or atmospherical clock.** A machine planned by Sir David Brewster for measuring the mean temperature of the atmosphere.

**atmospheric engine.** An engine in which the piston was forced down by the pressure of the atmosphere, when the steam, which caused it to rise, was condensed so as

to produce a near approach to a vacuum in the cylindrical chamber beneath it. Such was Newcomen's engine, constructed in 1705, and subsequently improved by Smeaton, Brindley, and others, till superseded by Watt's single-acting engine, which was a genuine steam-engine. The atmospheric engine was used only for pumping water.

*Mech.*: A line drawn upon an indicator-card by a pencil worked by the steam of a steam-engine, and designed to register the equilibrium line between steam pressure on the piston and the extent of the vacuum produced on the other. The former is indicated by numbers ascending above the atmospheric line; the latter by numbers descending below it; while itself it stands at zero. [**INDICATOR-CARD**.]

**atmospheric pressure.** The pressure exerted by the atmosphere, not merely downwards, but in every direction. It amounts to 14.7 lbs. of weight on each square inch, which is often called in round numbers 15. On a square foot it is = 2,160 lbs., or nearly a ton. It would act upon our bodies with crushing effect were it not that the pressure, operating in all directions, produces an equilibrium. If any gas or liquid press upon a surface with a force of 15 lbs. on a square inch, it is generally described as having a pressure of one atmosphere; if 60 lbs., of two atmospheres; if 120 lbs., of four atmospheres, and so on.

**atmospheric railway.** A railway in which the propulsive force designed to move the carriages along is that of the atmosphere. The notion of such a method of locomotion seems first to have suggested itself, in the latter part of the seventeenth century, to the French physician, Papin, whose name is forever associated with the celebrated digester. [**DIGESTER**.] In 1810 Mr. Medhurst published a paper entitled *A New Method of conveying Letters and Goods by Air*. His proposal was to construct a closed tunnel, in which the carriages—the last of them provided with a piston fitting the tunnel—should be propelled by air forced in behind them. Vallance, of Brighton, in 1825, recommended as an improvement on this plan the exhaustion of the air in front. About 1835 Mr. Henry Pinkus, an American gentleman residing in England, patented a scheme for placing the carriages in the open air, but connecting them below with a small tunnel, having a narrow slit above, with ingeniously-constructed apparatus to render the tunnel temporarily air-tight notwithstanding the slit. Not much was done to carry out the patent; and Pinkus's scheme of what he called a Pneumatic Railway was considered as having failed, when, in 1840, Messrs. Clegg and Samuda brought forward a somewhat similar project under the name of the "Atmospheric Railway." An experimental fragment of line laid down near Wormwood Scrubs, on the Great Western line, was successful, as was one designed for actual use from Kingstown to Dalkey, in Ireland, another between London and Croydon, and a third in South Devon; all, however, have been since abandoned. For passengers at least, and to a great extent even for the transmission of letters, the railways of the ordinary type, on which steam is the impelling force, have triumphantly held their own against the innovation of the Atmospheric or Pneumatic Railway, and all that now remains of the latter method of propulsion are the pneumatic dispatch tubes, used in London, and recently introduced in some American cities, for transmitting mail and parcels to short distances. [**PNEUMATIC**.]

**atmospheric tides.** Tides which must exist in the atmosphere as they do in the ocean, from the attractions of the moon and the sun.

\* **a-tò, adv.** [ATWO.] (*Scotch*.)

**a-tòk, s.** [South American name.] *Zool.*: A variety of the *Mephitis Americana* found at Quito, whence Humboldt called it *Gulo Quitensis*. It is sometimes termed the Zorra.

**a-tóll, s. & a.** [A Maldivic word Anglicised. In Fr. *atollon*.]

**A. As substantive:** The name applied by geologists and others to any one of the lagoon islands or annular coral reefs found in the Pacific and the Indian Oceans, the Red Sea,

and some other parts of the tropica. An atoll is a ring of coral rock, oval rather than circular in form. One reaches eighty-eight miles in its longer, by twenty in its shorter, diameter; but in general they are of much more limited dimensions. On the top of the coral-rock, which rises but slightly above the sea-level, is vegetation of some luxuriance—the cocoa-nut

ATOLL.

being the most conspicuous plant. On the convex circumference of the ring is a beach of white sand, exterior to which is a line of breakers, and a few feet beyond them the unfathomable ocean. The ring of land, which is less than half a mile across, encircles a lagoon of comparatively still water, which, from reflection, is of a bright but pale-green colour. In the view of Mr. Darwin, now almost universally adopted, there was once an island, possibly even containing high land, in the place now occupied by the lagoon. It was surrounded by a "fringing reef" of living coral close to the shore. As, from geological causes, it slowly subsided into the deep and disappeared, the coral animals built up to the surface of the water, and formed the ring of rock constituting the modern island. In the larger atolls there are generally two or three breaks in the ring, affording ship-channels into the lagoon; these mark the spots where fresh water, discharged from the old subsiding land into the sea, prevented the coral animals, which are marine, from locating themselves or building. [CORAL.]

"... hence I have invariably used in this volume the term 'atoll,' which is the name given to these circular groups of coral islets by their inhabitants in the Indian Ocean, and synonymous with lagoon-island."—*Darwin: Coral Reefs* (1842), p. 2.

**atoll-building, a.** Building atolls.

"If, then, the foundations, whence the atoll-building corals spring, were not formed of sediment..."—*Darwin: Voyage round the World*, ch. xx.

**atoll-formed, a.** Of the shape of an atoll.

"The three classes, atoll-formed, barrier and fringing reefs, together with the modifications just described of the latter, include all the most remarkable coral formations anywhere existing."—*Darwin: Coral Reefs*, p. 59.

**atoll-like, a.** Like an atoll.

"... with their atoll-like structure."—*Darwin: Coral Reefs*, p. 28.

**atoll-shaped, a.** Shaped like an atoll.

"... an atoll-shaped bank of dead rock."—*Darwin: Coral Reefs*, p. 107.

**atoll-structure, s.** The structure of an atoll.

"... the true atoll-structure..."—*Darwin: Coral Reefs*, p. 169.

**B. As adjective:** Pertaining to an atoll.

"... all these reefs are more probably allied to the barrier or atoll classes."—*Darwin: Coral Reefs*, p. 195.

**āt-ōm, \*āt-ōme, \*āt-ōm-ŷ (1), \*āt-ōm-ūs, s.** [In Sw., Dan., & Ger. *atom*; Fr. *atome*; Sp., Port., & Ital. *atomo*; Lat. *atomus*, as *substan.* = an indivisible element; as *adj.* = undivided, indivisible; from Gr. *ἄτομος* (*atomos*) = (1) uncut, (2) that cannot be cut, indivisible; from *ἀ*, priv., and *τέμνω* (*temnō*) = to cut.]

**A. Of the form atomus, pl. atomi.** (This form is found in Bacon.)

**B. Of the forms atom and \*atome.** [ATOMY.]

**I. Ordinary language:**

**1. Lit.:** Anything composed of matter which, to our senses, seems too small to be divided again; anything very minute, without reference to whether or not it can be divided again. [ATOMY.]

"Measures an atom, and now gives a world."—*Cowper: Task*, bk. 1.

"The sun," says Daniel Guiverwell, "discovers atoms, though they be invisible by candle-light, and makes them dance naked in his beams."—*Syndall: Frag. of Science*, 3rd ed., xi. 291.

**2. Figuratively:**

(1.) Any immaterial thing, viewed as very small; the smallest amount.

"He [King James II.] would yield nothing more, not an atom; and, after his fashion, he vehemently repeated many times, 'Not an atom.'"—*Maccaulay: Hist. Eng.*, ch. ix.

(2.) Man, viewed as no more than a speck or invisible point in creation.

"And teach these atoms, thou hast made, thy praise?"—*Cowper: Glory to God Alone*.

**II. Technically:**

**1. Mental Phil.:** A particle of matter so infinitely small that it cannot again be subdivided; the idea of a divided atom—that is, of a division of that which cannot be divided—being self-contradictory. It is a mental conception simply; for the senses cannot take cognizance of anything so minute.

**2. Nat. Phil.:** One of the exceedingly minute ultimate particles of matter, aggregates of an immense number of which, held in their place by molecular forces, constitute all material bodies.

**3. Chem.:** The smallest particle into which an element can be divided. An atom cannot exist in a separate state, but unites with one or more atoms to form a molecule. The atoms of different elements have definite relative weights fixed and invariable for each, the weight of an atom of hydrogen being regarded as unity. [ELEMENT.]

**atom-like, adj.** Like an atom; exceedingly minute.

"They all would vanish, and not dare appear, Who atom-like when their sun shined clear, Danced in his beam."—*Brown: Britannia's Pastorals*, II. 1.

**a-tōm'-io, \*a-tōm'-ick, a-tōm'-ic-al, a.**

[Eng. *atom*; -ic, -ical. In Fr. *atomique*.] Consisting of atoms, or otherwise pertaining or relating to an atom or atoms.

"Vitriolized and pellucid bodies are clearer in their continuities, than in powders and atomical divisions."—*Brown: Vulgar Errors*.

"Vacuum is another principal doctrine of the atomical philosophy."—*Bentley: Sermons*.

**atomic heat.**

**Chem.:** A term introduced by M. Regnault. The atomic heat of the elements in a solid state is nearly a constant quantity, the mean value being 6°. This number is obtained by multiplying the specific heat of an element by its atomic weight. The atomic heat of an element represents the quantity of heat which must be imparted to or removed from atomic proportions of the several elements, in order to produce equal variations of temperature. (See *Watts' Dict. Chem.*)

**atomic or atomical philosophy.**

**Mental and Nat. Phil. The Doctrine of Atoms:** A doctrine or hypothesis originally broached by Leucippus, afterwards developed by Democritus, and which underwent further modifications at the hands of Epicurus. It represented atoms as possessed of gravity and motion, and attributed to their union the formation of all things. Democritus is reported to have said that they come together in different order and position like the letters, which, though they are few, yet by being placed in conjunction in different ways produce innumerable words.

**atomic theory.**

**Nat. Phil. & Chem.:** A theory first propounded by John Dalton in his *New System of Chemical Philosophy*, published in 1807. He stated that the atoms of each element were incapable of being subdivided, and each had a definite relative weight, compared with that of hydrogen as 1; that the composition of a definite chemical compound is constant; that if two elements, A and B, are capable of uniting with each other in several proportions, the quantities of B which unite with a given quantity of A usually bear a simple relation to one another. If an element A unites with certain other elements B, C, D, then the quantities B, C, D, which combine with A, or simple multiples of them, represent the proportions in which they can unite among themselves. Dalton supposed that one element replaced another atom for atom, but it has since been found that one atom of an element can replace one or more atoms of another

element, according to their respective atomicities. [ATOMICITY.]

**atomic volume.**

**Chem.:** A term introduced by Graham in lieu of the phrase "specific volume," used by Dr. Kopp. (*Graham's Chemistry*.) It signifies the volume or measure of an equivalent or atomic proportion in different substances. It is obtained by dividing the molecular weight of a compound by its specific gravity. The specific gravity of a compound gas or vapour referred to hydrogen as unity is equal to half its atomic weight; therefore the atomic volumes of compound gases or vapours referred to hydrogen as unity are, with few exceptions, equal to 2. The densities of isomorphous solid compounds are proportional to their molecular weights, that is, they have equal atomic or specific volumes. The differences of specific or atomic volumes of organic liquids is often proportional to the differences between the corresponding chemical formulae. Thus liquids whose formulae differ by  $nCH_2$  differ in specific or atomic volume by  $n$  times 22. (See *Watts' Dict. Chem.*)

**atomic weight.** (Symbol and abbreviation, At. Wt.)

**Chem.:** The weight of an atom of an element compared with the weight of an atom of H, which is regarded as unity. Thus the atomic weight of oxygen is 16; that is, an atom of O is sixteen times as heavy as an atom of H. The sum of the atomic weights of a chemical compound is called its molecular weight, and, with a few exceptions, the specific gravities of all bodies, simple and compound, in the gaseous state are equal to half their molecular weights. The specific heats of many of the elements are nearly proportional to their atomic weights. (For atomic weights, see ELEMENT.)

**a-tōm'-i-cal-ly, adv.** [Eng. *atomic*; -ally.] After the manner of those holding the atomic philosophy.

"Empedocles, who was a Pythagorean, also did physiologize atomically."—*Cudworth: Intell. System*, p. 14.

**a-tōm'-i-cism, s.** [Eng. *atomic*; -ism.] The doctrine of atoms or of the atomical philosophy. (*Cudworth*.)

**āt-ōm-ic'-i-ty, s.** [Eng. *atomic*; -ity.]

**Chem.:** The combining capacity of an element or radical. It is measured by the number of atoms of H or other monatomic elements with which the element in question can directly combine, or can replace in a substance. When an element does not unite with H its atomicity may be measured by the number of atoms of Cl or some other monatomic element with which it can directly combine, since the atomicity of these elements is equal to that of H, and they may be substituted for it, atom for atom. The atomicity of an element cannot be estimated by the number of diatomic or polyatomic atoms that it can take up, as this number is indefinite. A diatomic element like oxygen may attach itself to another element, or group of elements, by one of its combining bonds, leaving the other free; and to this again another diatomic or polyatomic element may be attached, and so on indefinitely. The atomicity of an element is also called its *quantivalence*.

† **āt-ōm-ism, s.** [Eng. *atom*; -ism.] The doctrine of atoms or of the atomical philosophy; atomicism (q.v.). (*Todd*.)

**āt-ōm-ist, s.** [Eng. *atom*; -ist.] In Ger. *atomist*.] One who holds the doctrine of atoms or of the atomic philosophy.

"The atomists, who define motion to be a passage from one place to another, what do they more than put one synonymous word for another?"—*Locke*.

**āt-ōm-ist'-io-al, a.** [ATOMIC.]

**āt-ōm-ize, v. t. & i.** [Eng. *atom*; -ize.]

**A. Trans.:** To convert into atoms, to reduce to atoms. (*Baxter*.)

**B. Intrans.:** To adopt the tenets of the atomic philosophy. (*Cudworth: Intell. Sys.*, p. 26.)

**āt-ōm-iz'-er, s.** [Eng. *atom*; -izer.] An instrument used for reducing a liquid into spray for disinfecting, cooling, perfuming, and similar purposes.

āte, fāt, fāre, amidst, whāt, sāl, father; wē, wēt, hēre, oamel, hēr, thēre; pine, pīt, eire, aīr, marine; gō, pōt, or, wōre, wōlf, wōrk, wāt, fāll, fāll; mūte, cūb, cūre, unite, cūr, rāle, rāll; trj, Sjrīan. æ, œ = ē. ey = ā. qu = kw.

At-óm-ól-ó-gý, s. [Gr. átomos (atomos) = an atom, and logos (logos) = . . . discourse.] A discourse about atoms. The department of Natural Philosophy which treats of atoms. (Knowles.)

\*át-óm-ý (1), s. [ATOM.] An atom. "It is as easy to count atomies as to resolve the propositions of a lover."—Shaksp. As You Like It, III, 1.

\*át-óm-ý (2) (O. Eng.), \*át-óm-íe, \*át-tam-íe (Scott.), s. [Contr. from atomiey.] Ludicrously: A skeleton. "You starved blood-hound! . . . Thou atomiey, thou!"—Shaksp. 3 Henry IV., v. 4. "They grew like atomies or skeletons."—Serrin. offered to Society's Considerings. (Jamieson.)

\*atone (at-wún), adv. [AT ONE (q.v.)]

\*a-tó-ne, \*at-tó-ne, v.t. & t. [Eng. at; one.] [AT ONE.]

A. Intransitive: Ordinary Language:

\*I. (Properly.) To be "at one," to be reconciled; to cease from strife with, to agree, to accord. [AT ONE.]

"He and Ananias can no more atone, Than violentest contrariety."—Shaksp. Coriol., IV, 2.

2. To make expiation or satisfaction, for some crime, sin, or fault.

" . . . that large class of persons who think that there is no excess of wickedness for which courage and ability do not atone."—Macaulay: Hist. Eng., ch. xiii.

3. Specially. [See II. Theol.]

II. Theol.: To expiate sin. (Used of the death of Christ, viewed as a sacrificial offering.)

"The Lamb, the Dove set forth His perfect innocence, Whose blood of matchless worth Should be the veil's defence; For he who would for sin atone, Must have no failings of his own."—Cowper: Olney Hymns; O. Test. Gospel.

B. Transitive:

1. To make at one; that is, to reconcile those who before were in feeling two; to create sympathy between those who before had antipathy to each other; to make peace where before there was strife or war. Used—

(a) Of individuals:

"I have been atoning twa most wangling neighbors."—Beaum. & Flie. Spanish Curate, II, 4. "Since we cannot atone you, we shall see Justice design the victor's chivalry."—Shaksp. Richard II., I, 1.

Or (b) of nations:

"French. . . I was glad I did atone my countrymen and you; it had been pity you should have been put together with so mortal a purpose as then each bore. . ."—Shaksp. Cymbeline, I, 6.

\*To atone together: To unite together.

2. To appease; to render propitious.

"And may thy god, who scatters darts around, Atón'd by sacrifices, desist to wound."—Pope: Homer's Iliad, bk. I, 680-81. "Neptune atón'd, his wrath shall now refrain, Or thwart the synd of the gods in vain."—Pope: Homer's Odyssey, bk. I, 100, 101.

3. To expiate; to afford satisfaction for.

King James, the Douglas, dined of old, And vainly sought for near and far: A victim to atone the war."—Scott: Lady of the Lake, v. 26.

\*a-tó-ned, pa. par. & a. [ATONE, v.t.]

\*át-one-mā-kér, \*át-tone-mā-kér (one as wun), s. [Eng. at; one; maker.] One who makes two persons or two beings, whom he finds at variance, one with each other in feelings; a reconciler. Spec., Christ.

"Paul sayth (I Tim. II.), One God, one Mediatour (that is to say, advocate, intercessor, or an atone-maker) between God and man; the man Christ Jesus, which gave himselfe a ransom for all men."—Synodus: Works, p. 158. (Richardson.)

"And that there is one mediator, Christ, as Paul (I Tim. II.). And by that word understand an atone-maker, a peace-maker, and bringer into grace and favour. . ."—Ibid.: The Testam. of M. W. Tract. (Richardson.)

\*a-tó-ne-mént, \*at-tó-ne-mént, \*at-tó-ne-ménte, s. [Eng. at, and O. Eng. oment = agreement, harmony; from Eng. one, and suffix -ment.] [AT ONE.]

A. Ordinary Language:

\*I. Originally & properly. "At-one-ment," s making "at one" of those who before were "two" in point of feeling; that is, who were in antipathy to each other; reconciliation, agreement, harmony, peace. Used—

(a) Of reconciliation between men at variance.

"Buck. Ay, madam; he desires to make atonement Between the duke of Gloster and your brothers, And between them and my lord chamberlain."—Shaksp.: Richard III., I, 3.

(b) Of reconciliation, not merely of men together or among themselves, but of God to men, and men to God.

"And like as he made the Jewes and the Gentiles at one betwene themselves, even so he made them both at one with God, that there should be nothing to breake the atonement, but that the thynge in heaven and the thynge in earth should be joynd together as it were into one body."—Udal: Ephes. chap. II (Richardson.)

2. Expiation of a sin against God, or of a crime or offence against man or anything similar. [B., I, 1.]

"Great as Seyvry's offences were, he had made great atonement for them."—Macaulay: Hist. Eng., ch. xv.

B. Technically:

I. Scripture:

1. Old Test.: In the authorised version of the Old Testament the word atonement occurs not less than fifty-eight times in the text, and once in the margin; all but five of the places in which it is found, being in the Pentateuch. It signifies—

(1) Expiation of sin by means of a typical sacrifice, generally of a victim, offered in faith.

"For the life of the flesh is in the blood: and I have given it to you upon the altar to make an atonement for your souls: for it is the blood that maketh an atonement for the soul."—Lev. xvii. 11.

"And one kid of the goats for a sin-offering, to make an atonement for you."—Numb. xxix. 8. (See also Lev. I, 4; iv. 35; x. 17; xvi. 10, 38, 34; Numb. viii. 21; xvi. 46; x. 12; 18; 5 Sam. xii. 6; 2 Chron. xxix. 24, &c.)

(2) The removal, by a sacrificial offering, of ceremonial impurity (Lev. xii. 7, 8). In this sense the term was sometimes used of inanimate things—namely, of the altar (Exod. xxix. 36, 37; Lev. xvi. 18); of a house infected with "leprosy" (xiv. 53); of the holy place, on account of the sins of the worshippers (xvi. 16); of the holy of holies (v. 33); of the tabernacle of the congregation (viii. 17); and of the work of the Temple (Neh. x. 33).

(3) Ransom.

"Then he is gracious unto him, and saith, Deliver him from going down to the pit: I have found a ransom for him."—Job xxxiii. 24.

(4) In one place atonement is used for what was, in its essential features, a thank-offering (Numb. xxxi. 50).

¶ (c) Atonement money: Money paid for purposes of atonement.

"And thou shalt take the atonement-money of the children of Israel."—Exod. xxx. 16.

(b) The Day of Atonement or the Great Day of Atonement was on the tenth of the seventh month. (For details regarding it, see Lev. xxiii. 26-32; xxv. 9.)

2. New Test.: In the New Testament the word occurs only once—viz., in Rom. v. 11: "And not only so, but we also joy in God through our Lord Jesus Christ, by whom we have now received the atonement" (in the margin, reconciliation). The Greek word is καταλλαγῆν (katalalagēn) = (1) the exchange of one thing for another, as, for instance, money for an article; (2) a change from enmity to friendship; reconciliation; from καταλλάσσω (katallassō) = (1) to change money; (2) to change a person from enmity to friendship; to reconcile. The marginal rendering is evidently correct. And in 2 Cor. v. 18, 19, the same Greek substantive is twice rendered "reconciliation," and the same Greek verb, also twice, "reconcile." [A., I.]

II. Theology: The sacrificial offering made by Christ in expiation of the sins, according to the Calvinists, of the elect only; according to the Arminians, of the whole human race.

\*a-tó-nér, s. [ATONE.] One who atones, either in the sense of reconciling alienated persons, or in that of making expiation.

\*a-tó-ní-a, s. [ATON.]

\*a-tón-íc, a, & s. [Gr. átonos (atónos) = not stretched or strained; relaxed.] [ATON.]

A. As adjective:

1. Med.: Pertaining to atony; having no tone in the system.

2. Gram.: Not having an accent.

B. As substantive (Gram.): A word not having an accent.

\*a-tón-íng, pr. par. & a. [ATONE.]

"With an atoning smile more than earthly crown."—Byron: Childs Harold's Pilgrimage, iv. 88.

át-ó-ný, a-tó-ní-a, s. [In Ger. & Fr. atonie; Port. atonia; Gr. átonia (atonia) = slackness, enervation; átonia (atonia) = to be relaxed or languid; á, priv., and tonos (tonos) or tonia (tonos) = to stretch, strain, brace up; trávos (tonos) = that by which anything is braced up; a rope; the sinews; and the tone on a word: trávo (tonos) = to stretch.]

Med.: Want of tone in the system.

\*a-tóp, adv. [Eng. a; top.] On the top, at the top.

"What is extracted by water from coffee is the oil, which often swims atop of the decoction."—Arbuthnot: Atimess.

\*at-orn, \*at-orn, v.t. [A.S. (at)rennan, (at)ernan = to run away.] To run away.

"He atorned as faste as he myght that was his best won."—Rob. of Glouc., p. 419. (S. in Boucher.)

\*a-tóur, s. Old spelling of ATTIRE.

\*a-tóur, prep. & adv. [ATTOUR.]

át-ra-bil-á-íre, a. [Fr.] Attribiliary, attribilious. [ATRABILIAN.]

"A preposterous love of mirth hath turned you all into wits; quite down from the sanguine orator of the independent Whig to the attribiliary hispanier of the miracle."—Warburton: Divine Legation of Moses, Dedice (Richardson.)

át-ra-bil-á-r-í-an, a. [Fr. atrabilaire; Sp. atrabilar(ó); Eng. suff. -ian or -an. From Fr. and Ital. atrabile; Sp. & Port. atrabilis = black bile; Lat. atrá, fem. of ater = black, and bilis = gall, bile. Cognate with Gr. χολή (cholē), χολος (cholos) = gall, bile.] [TRABILLA, Cholera, MELANCHOLY.] Pertaining to "black-bile," which the ancients supposed to be the cause of the melancholic temperament and its product melancholy; hence atrabilian and the cognate adjectives signify also melancholy.

"The atrabilian constitution (for a black, viscous, pitchy consistence of the fluids) makes all secretions difficult and sparing."—Arbuthnot: Diet.

át-ra-bil-á-r-í-óus, a. [Fr. atrabile = black bile, and Eng. suffix -ous. In Sp. atrabilario.] [ATRABILIAN.] Full of black choler; atrabilious.

"The blood, deprived of its due proportion of serum, or finer and more volatile parts, is atrabilarious, whereby, it is rendered gross, black, unctuous, and earthy."—Quincy.

át-ra-bil-á-r-í-óus-nèss, s. [Eng. atrabilarious; -ness.] The state of being affected with "black bile;" the state of being melancholic or melancholy. (Johnson.)

át-ra-bil-í-ar, át-ra-bil-í-ar-ý, a. [From Port. & Ital. atrabilioso, and Eng. suff. -y.] The same as ATRABILIAN (q.v.).

" . . . splenic atrabilian reflections on his own misery. . ."—Carlyle: Heroes and Hero-Worship, Lect. III.

¶ The form atrabilioso is in Dunglison, Webster, &c.

át-ra-bil-í-ar-ý, a. [ATRABILIAN.]

atrabiliary capsules. Anat.: Two small gland-like bodies situated one on the upper and inferior edge of each kidney. They are called also the renal or suprarenal glands or capsules.

át-ra-bil-í-óus, a. [Fr. atrabile, and Eng. suffix -ous. In Sp. atrabilioso.] [ATRABILIAN.] The same as ATRABILIOUS (q.v.).

á-tra-bi-lis, s. [Lat. atra and bilis.] [ATRABILIAN.]

Old Anatomy: Black bile; a thick, black, acrid fluid, which the ancients believed to be secreted by the spleen, the pancreas or the atrabiliary capsule, but which was really only the ordinary bile altered by morbid influence.

át-ra-óus-pis, s. [Gr. átrapkos (atrapkos) = (1) a spindle, (2) an arrow, (3) the top of a mast; and ówis (aspis) = a round shield, . . . an asp.]

Zool.: A genus of venomous snakes, the type of an African family in which the poisonfangs are exceedingly long.

a-tráct-ón-chý-ma, s. [Gr. átrapkos (atrapkos) = a spindle, and ényhma (enyhma) = an infusion; év (en) = in, and χέω (cheo) = to pour.]

Bol.: Professor Morren's name for fusiform, that is, spindle-shaped tissue. It is the fourth division of his Parenchyma (q.v.).

\*a-trá'id, pa. par. [ATRAV.]

ból, bóy; pót, jówl; cat, cèll, chorus, çhin, bench; go, gém; thin, þhis; sin, aþ; expect, Xenophon, exist. -íng. -cian, -tian = shán. -cion, -tion, -tion = shún; -tion, -cion = shún. -tious, -sious = shús. -ble, -dle, &c. = bpl, dpl.

**át-ra-mén-tá-cé-ous, a.** [Lat. *atramentum* = anything black; ink; from *ater* = dull-black, and Eng. *-aceous* (q.v.) = Lat. *-aceus*.] Pertaining or relating to ink; inky, black as ink. (*Derham*.)

**át-ra-mén-tal, a.** [Lat. *atramentum* = . . . ink; Eng. suffix *-al*.] [ATRAMENTACEOUS.] Inky, black as ink; atramentaceous, atramentarious; helping to produce such a colour. (*Browné: Vulgar Errors*, bk. vi., ch. xii.)

**át-ra-mén-tár-i-ous, a.** [Lat. *atramentari(um)* = an inkstand, and Eng. suff. *-ous*.] [ATRAMENTACEOUS.] Suitable to be employed in the manufacture of ink. Applied especially to coppers, one of its ingredients. (*Fourcroy*.)

**át-ra-mén-toús, a.** [Lat. *atramentum* = ink, and Eng. suff. *-ous*.]  
*Lit.*: Inky, inky-looking; very black (*lit. & fig.*). (*Swift: Battle of the Books*.)

\***a-trá'y, v.t.** [A.S. *treġian* = to vex, to trouble, to grieve.] To vex, to trouble.  
"Swithe sore sche him atráyd."  
*Sevyn Sages*, l. 37a. (*Boucher*.)

\***a-trá'yed, pa. par.** [ATRAY.]

\***á-tred (tred as tǽrd), a.** [Lat. *ater* = dull-black, not glossy-black.] Coloured black.  
"It cannot express any other humour than yellow ebolour, or atred, or a mixture of both."  
*Whitaker: Blood of the Grapes*, p. 7a.

\***át-ré'de, v.t.** [A.S. (*at*)*redan*.] To surpass in counsel or wisdom. (*Chaucer: C. T.*, 2,451.)

\***át-rén'ne, v.t.** [A.S. (*at*)*rennan*.] To outrun, to beat in running. (*Chaucer: C. T.*, 2,451.)

\***a-tré'-te, \*a-treét, \*at-réed, adv.** [Fr. *à trait* = at a draught.] Continually, distinctly. (*Prompt Parv.*)

**á-tri-al, a.** [ATRIUM.]  
*Biol.*: Pertaining to the atrium (q.v.).

\***át-ri'de, v.t.** [A.S. (*at*)*ridan*.] To beat in riding, or on horseback. (*Layamon*, iii. 264.)

\***a-tri'e, v.t.** [O. Eng. *a*; *trie* = try.] To try as a judge.  
"Chief justice he sette the sothe to atrie."  
*Rob. de Brunns: Chron.*, p. 89. (*S. in Boucher*.)

**a-tríp, adv.** [Eng. *a*; *trip*.]  
*Naut.*: A term used (1) of an anchor, which is atrip when it is drawn out of the ground at right angles to it; (2) of the topsails of a vessel, when they are hoisted as high as possible on the masts, or just started from the caps.

**át-rip-léx, s.** [In Ital. *atriplex*; Lat. *atriplex*, originally *atriplexum*; Gr. *ἀράπαξις* (*Aráparxis*) = an orch plant; *á*, priv., and *τρέφω* (*trephō*) = . . . to nourish.] A genus of plants belonging to the order Chenopodiaceæ (Chenopods). Eight species are indigenous, and one or two more partially naturalised, in Britain. Of the former may be mentioned the *A. laciniata*, or Frosted Sea-orache; the *A. Babingtoni*, or Spreading Fruited; the *A. patula*, or Spreading Halberd-leaved; the *A. angustifolia*, or Narrow-leaved Orache; and the *A. littoralis*, or Grass-leaved Sea-orache. The leaves may be used as pot-herbs.

**á-tri-úm, s.** [Lat. In Ital. *atrio* means a portico or vestibule.]

ATRIUM OF A ROMAN HOUSE.

**I. Architecture:**

(1) The hall or principal room in an ancient Roman house. It communicated with the

street by the vestibule and the front door. There was in the centre of its ceiling a large aperture, called *compluvium*, designed to admit light. [COMPLUVIUM.] Beneath it there was scooped out in the pavement a cistern called *impluvium*. [IMPLUVIUM.] In a large house rooms opened into the atrium from all sides, and were lighted from it.

(2) A covered court, somewhat on the model of the ancient atrium, constructed in front of the principal doors of an edifice.

(3) The churchyard.

**2. Biology:**

(1) That part of the uricæ into which the venous blood is discharged.

(2) The large cavity into which the intestine opens in the Tunicates.

**a-tró'-cious (cious as shūs), a.** [In Fr. & Ital. *atroce*; Sp. & Port. *atroz*; from Lat. *atrox*, genit. *atrocis*; cognate with *trux* = wild, rough, savage.]

**A. Ordinary Language:**

**I. Of deeds:**

1. Excessively cruel, or enormously wicked in any other respect.

"When Catiline was tried for some atrocious murders . . ."  
*Porteus: Beneficial Effects of Christianity*, (Richardson.)

"An advocate is necessary, and therefore audience ought not to be denied him in defending causes, unless it be an atrocious offence."  
*Asylis: Paragon*.

2. Stern, expressive of cruelty.

"The fierce atrocious frown of snowed Mars."  
*Thomson: Liberty*, pt. ii.

3. Colloquially (in a hyperbolic and humorous sense): Very bad, as when it is said, without any real imputation of moral guilt, that one's handwriting is "atrocious."

**II. Of persons: Savage, cruel, fierce, harsh, severe.**

**B. Technically:**

\***Old Medicine.** Of diseases: Very violent; angry.

**a-tró'-cious-ly (cious as shūs), adv.** [Eng. *atrocious*; suff. *-ly*.] In an atrocious manner; with much cruelty or other flagrant wickedness.

"As to my publishing your letters, I hold myself fully justified by the injury you have done me by showing me so ignominiously and atrociously."  
*Loach to Warburton*, Lett. 2.

**a-tró'-cious-něss (cious as shūs), s.** [Eng. *atrocious*; *-ness*.] The quality of being atrocious.

"He [Harod] thought of John's character, the atrociousness of the murder, and the opinion which the world would entertain of the murderer."  
*Horne: Life of St. John Baptist*, p. 21a.

**a-tróc'-i-tý, \*a-tróc'-ý-tě, a.** [In Fr. *atrocité*; Ital. *atrocità*; Lat. *atrocitas* = fierceness.] Excessive cruelty or other flagrant wickedness; atrociousness.

" . . . in this case there was no peculiar atrocity, no deep-seated malice, no suspicion of foul play."  
*Macaulay: Hist. Eng.*, ch. xxv.

¶ It is often used in the plural for excessively cruel deeds.

" . . . the disgrace and scandal brought upon Liberty by the atrocities committed in that holy cause."  
*De Quincey: Works* (ed. 1838), vol. ii., p. 185.

¶ The expression "Bulgarian atrocities" has become historic. It is used to signify the cruel deeds perpetrated by the Turks in 1876 whilst repressing an abortive rising of the Christians in parts of Bulgaria. The defiance by the Porte of the moral sentiment of Europe, when the punishment of those who were the active agents in perpetrating these crimes was demanded by this and other countries, led to the Russo-Turkish war of 1877-8, which resulted, among other effects, in the emancipation of a large part of Bulgaria from the Turkish yoke.

"On September 21 [1876], Lord Derby expressed the indignation of the country in a fervid despatch, and called on the Porte to punish the chief authors of the atrocities."  
*Annual Register*, 1876, p. 273.

**át-ró'-pa, s.** [In Sp. & Ital. *atropa*; from Gr. *Ἄτροπος* (*Atropos*), one of the three Fates, infernal goddesses, supposed to determine the life of man by spinning a thread. The genus *Atropa* is so called from its deadly effect.] Nightshade, or Dwale. A genus of plants belonging to the order Solanaceæ, or Nightshades. It contains but one British species, *A. belladonna*, or Deadly Nightshade. It is three or more feet high, has its ovate

leaves paired, large and small together, drooping lurid purple flowers, and black berries, of

DEADLY NIGHTSHADE (ATROPA BELLADONNA).

the size of a small cherry, which if eaten produces delirium, dilation of the pupils of the eyes, and death.

**át-ró'-pal, a.** Another form of *Atropis* (q.v.).

**át-róph-ied, a.** [In Fr. *atrophie*, pa. par. of *atrophier*; Gr. *ἀτροφος* (*atrophos*) = not well fed; *ἀτροφεία* (*atrophēia*) = to have no food, and therefore to waste away; *á*, priv., and *τρέφω* (*trephō*), or *τρέφω* (*trephō*) = . . . to nourish. Or from *á*, priv., and *τροφή* (*trōphē*) = food, nourishment.] Unfed, not supported by their proper nourishment; hence wasting or wasted away. (It is used of muscles, nerves, &c.)

"The muscles were in so atrophied a condition that the experiment failed."  
*Todd & Bowman: Physiol. Anat.*, l. 27a.

"When the eye is destroyed the optic nerve often becomes atrophied."  
*Darwin: Descent of Man*, vol. i., pt. i., ch. iv.

**át-ró'-phous, a.** [ATROPHY, s.] Characterised by atrophy.

**át-ró'-phý, s.** [In Fr. *atrophie*; Sp. & Ital. *atrofia*; Gr. *ἀτροφία* (*atrophia*).] [ATROPHIA.]

*Ord. Lang. & Med.*: A continual wasting of the body or its organs through disease or old age.

"Pituitous atrophy, Marasmus, and wide-wasting pestilence."  
*Milton: P. L.*, bk. xi.

"All the organs, even the bones, tend to atrophy in advancing life."  
*Todd & Bowman: Physiol. Anat.*, vol. ii., p. 270.

**át-ró'-phý, v.t. & i.** [ATROPHY, a.]

**A. Trans.**: To starve, to cause to waste away.

**B. Intrans.**: To become atrophied.

**a-tróp'-ic, a.** [Eng. *atropine*; *-ic*.] Pertaining to atropine (q.v.).

**atropic acid.**

*Chem.*: C<sub>9</sub>H<sub>9</sub>O<sub>2</sub>. A crystalline acid obtained, together with a basic compound tropine, by the action of alkalis on atropine. (*Fowles*.)

**át-ró'-pine, s.** [From *atropa* (q.v).]

*Chem.*: C<sub>17</sub>H<sub>23</sub>NO<sub>3</sub>. An organic base obtained from the Deadly Nightshade, *Atropa belladonna*. It crystallises in colourless needles, and is used in medicine. It dilates the pupils of the eye.

**át-ró'-pous, a.** [Gr. *ἄτροπος* (*atropos*) = not to be turned; *á*, priv., and *τροπός* (*trōpos*) = a turn; *τρέπω* (*trephō*) = to turn.]

*Bot.*: A term used in describing the position of an ovule in the ovary. An atropous (lit., an unturned) ovule is erect, with the chalazæ at its base and the foramen at its apex. It is the same as ORTHOTROPOUS (q.v.). (*Lindley: Introd. to Bot.*, 3rd ed., 1839, pp. 214-15.)

**á-troús, a.** [Lat. *ater* (masc.), *atra* (fem.), *atrum* (neut.) = dead black, corresponding to the Gr. *μέλας* (*melas*).] It is opposed to *niger* = glossy black.]

*Botany, &c.*: Pure black; black without the admixture of any other colour. (*Lindley*.)

**át-ró'ute, \*at-rúte, v.** [Eng. *at*, and *root*, v.] To escape.

fate, fát, fáre, amidst, whát, fáll, father; wē, wēt, hère, camél, hēr, thère; pine, pít, sire, sír, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, quíte, cūr, rúle, fúll; trý, Sýrian. æ, œ = ē. ey = ā. qu = kw.

\*-trý, adv. phr. [Eng. a = on, and try.] Naut.: With the head to the sea (said of a ship in a gale).

\*-trýs, s. pl. [Apparently from Fr. *atour* = a French hood.] An article of female attire, apparently about the middle of the seventeenth century. (Scotch).

"*Atrya*, *vardigala*, *periwiga*."—*Watson: Coll.*, I, 30. (Jamieson.)

\*-trýst, s. [TRYST.] (Scotch.)

\*-at-sitt', \*at-sítte, \*at-sýt'e, v.t. & i. [Eng. *at*; O. Eng. *sitt* = sit.]

A. Trans.: To sit against, to withstand.

"In ya rýght hond ya lance he nom that cluped was Ron, Long and gret and strong ynon hym ne myghte alytne non."

*Robert of Gloucester: Chron.*, p. 174. "That in Joustes schude assitte the dynt of the lance." *Havelok*, 2, 200. (Boucher.)

B. Intrans.: To remain sitting; to stay, to remain. (O. E. Chron., N.E.D.)

\*-at-stáid' (pret. *at-stóde*), v.t. [Eng. *at*; stand.] To stand against, to withstand, to oppose.

"That hym ne myghte no man ne geant *astonde*," *Rob. of Glouc.: Chron.*, p. 15. (Boucher.)

\*-at-stóde, pret. of verb. [ATSTAND.]

\*-at-tác'-ca, s. [Ital. *attacco* = a sticking, a cleaving to; *attacare* = to hang, to fasten.]

Music: A direction given at the end of a movement to proceed to the next one without stopping for any intermediate pause. (Often with the word *subito*.)

\*-at-tách' (Eng.), \*-at-tólch' (Scotch), v.t. [In Fr. *attacher* = to fasten, to tie, . . . to allure, &c.; Sp. *atacar* = to lace, to tie up, to ram in, to attack, to tease; Port. *atacar* = to fasten to, to lace, to tag; *atacar*, *atacar* = to attack; Ital. *attaccare* = to hang, to fasten, to apply the mind, to quarrel, to kindle war. Cognate with Eng. ATTACK, TACK, TAKE, &c. (q.v.).]

A. Ordinary Language:

I. To fasten, to tie, or in some similar way to connect one thing with another.

"Then, homeward, every man *attach* the hand of his fair mistress." *Shaksp.: Love's Labour's Lost*, iv. 3.

II. Irresistibly to seize on one by physical force against one's will.

1. Lit. (Used specially of seizing a person or his goods by judicial authority.) [B., I.]

(a) Of seizing himself.

"Par. I do defy thy conjurations, And do *attach* thee as a felon here." *Shaksp.: Romeo and Juliet*, v. 3.

¶ It had formerly of before the offence alleged.

"You, Lord Archbishop, and you, Lord Mowbray, Of capital treason I *attach* you both." *Shaksp.: 2 Henry IV.*, iv. 2.

(b) Of seizing his goods. [B., 2.]

"France hath saw'd the league, and hath *attach'd* Our merchants' goods at Bourdeaux." *Shaksp.: Henry VIII.*, i. 1.

2. Fig. (Used of the irresistible influence of natural agencies or forces.)

"I cannot blame thee; Who am myself *attach'd* with weariness, To the dulling of my spirits." *Shaksp.: Tempest*, III, 2.

¶ The foregoing example shows the essential identity of the verbs *attach* and *attack*.

III. To cause one to adhere to another by moral instead of material force; to unite one to another by the ties of self-interest or of affection.

"God, working ever on a social plan, By various ties *attaches* man to man." *Cowper: Charity*.

"The great and rich depend on those whom their power or their wealth *attaches* to them."—*Rogers*.

IV. To attribute; to ascribe.

"The other party wondered that any importance could be *attached* to the auspense of a nameless scribbler of the thirteenth century."—*Macaulay: Hist. Eng.*, ch. xi.

B. Law:

1. To arrest a person by judicial authority. [A., II. 1. (a).]

¶ It is now used specially respecting the process adopted in cases of contempt of court. (See Blackstone's *Comment.*, bk. III, ch. 27.) [ATTACHMENT.]

2. Similarly to arrest or seize upon one's goods by process of law. [A., II. 1. (b).]

\*-at-tách'-a-ble, a. [Eng. *attach*; -able.] That may be attached by a legal writ or process issued for the purpose. (Webster, &c.)

attaché (at-tách'-á), s. [Fr.] One attached to a person or thing. (Specially used with respect to an *attaché* of an embassy, one connected with an embassy, who, being of much inferior dignity to the ambassador, can move about without attracting much notice, and in consequence can often pick up items of information valuable to his chief or even to his country.)

\*-at-tách'ed, pa. par. & a. [ATTACH.]

\*-at-tách'-ing, pr. par. [ATTACH.]

\*-at-tách'-mént, \*at-tách'e-mént, s. [Eng. *attach*; -ment. In Fr. *attachement*; Ital. *attaccamenta*.]

A. Ordinary Language: The set of attaching; the state of being attached; that which is attached. Specially—

1. Lit.: The state of being attached to a person or thing in a literal sense.

" . . . and when the rest of the cranium is modified concomitantly, for the attachment of muscles to work the jaw."—*Owen: Classif. of the Mammalia*, p. 6.

2. Fig.: The state of being bound to a person, a party, or a principle, by moral or other ties not of a material kind; as by affection or self-interest.

"But Friendship can vary her gentle dominion; The attachment of years in a moment expires." *Eyron: To George, Earl Delasarr*.

" . . . poured forth their blood for a leader unworthy of their attachment."—*Macaulay: Hist. Eng.*, ch. v.

"But though he was very unwilling to die, attachment to his party was in his mind a stronger sentiment than the fear of death."—*Ibid.*, ch. xxii.

¶ It may be used in the plur. for friendship with various individuals.

"Attachments by fate or by falsehood reft." *Pringle: Afor in the Desert*.

¶ Drawing the distinction between *inclination*, *attachment*, and *affection*, Crabb shows that *inclination* is the weakest of the three words. *Inclinations*, he says, arise of themselves, *attachments* are formed; *inclination*, moreover, has respect chiefly to things, *attachment* to either persons or things, and *affection* to persons only. "*Attachment*, as it regards persons, is not so powerful or solid as *affection*. Children are *attached* to those who will minister to their gratifications; they have an *affection* for their nearest and dearest relatives. *Attachment* is sometimes a tender sentiment between persons of different sexes; *affection* is an affair of the heart without distinction of sex. The passing *attachments* of young people are seldom entitled to serious notice; although sometimes they may ripen by long intercourse into a laudable and steady *affection*. Nothing is so delightful as to see *affection* among brothers and sisters."

B. Technically (Law):

1. Of the ordinary courts: The act or process of attaching, i.e., arresting a person or his goods. It is especially used of cases in which contempt of court is being shown. If a person cited to appear before a court as defendant in an action fail to present himself, a writ of attachment is issued against him. If he keep out of the way, so that it cannot be put in force, then an attachment with proclamation follows, that is, an attachment coupled with a public proclamation requiring him to surrender himself. If this also have no effect, other measures follow, till finally, failing himself, his goods are attached or seized by judicial authority. Others than defendants can incur attachment for contempt of court. [CONTEMPT.] (*Blackstone: Comment.*, bk. III, ch. 23, 27; iv., ch. 20.)

1. An *attachment out of Chancery* is a process designed to be used to enforce answers and obedience to the decrees and orders of the Chancery Division Court.

A *writ of attachment or pone* is a writ issued to the sheriff requiring him to attach a person by taking gage, that is, certain of his goods, or requiring him to find security for his appearance in the court. (*Blackstone: Comment.*, bk. III, ch. 19.)

*Foreign Attachment*: A local custom existing in parts of England to arrest the money or goods of a foreigner within a certain liberty or city (like arrestment in Scotland), till some claims against him be satisfied.

2. Of the Old Forest Courts:

*Court of Attachments*, wood-mote or forty-days' court: A court formerly held before the verders of a forest every forty days to inquire regarding all offenders against vert and venison, and report offences to higher courts. [ROARD, SWEINMOTE, JUSTICE-SEAT.] (*Blackstone: Comment.*, bk. III, ch. 6.)

An *attachment of the forest* is the proceeding in the old courts of attachments, wood-mote or forty-days' courts.

\*-at-táck', v.t. & i. [In Fr. *attaquer*; Sp. & Port. *atacar*; Ital. *attaccare* = to hang or fasten, . . . to engage in battle. Cognate with *attach*. This specially appearing in the Italian.]

A. Transitive:

I. Ordinary Language:

1. Of assaults, direct or indirect, upon persons: To make an assault on an army, a fortification, &c., with weapons of war, or on a person with material weapons of any kind.

"Untie thy forces and *attack* their lines." *Dryden: Virgil's Æneid*, bk. IX.

(1) To assail a person by hostile words, writings, &c., with the view of damaging his reputation with the community or insulting himself; to censure, to find fault with.

"It would be easy to *attack* them. It would be hardly possible to defend them."—*Macaulay: Hist. Eng.*, ch. xxiv.

(2) To assail a person, the assailant being a thug. (Specially used of diseases.)

"On the fourth of March he was *attacked* by fever . . ."—*Macaulay: Hist. Eng.*, ch. xxv.

2. Of assaults on things instead of persons:

Specially: To attempt to gain knowledge by what may be figuratively considered as a hostile assault on some portion of nature.

" . . . we have never been able to effect these parts of the sun's surroundings . . ."—*Transit of Venus*. (*Times*, April 20, 1874.)

II. Technically:

Mil. To *attack in front and flank*: To attack the salient angle or both sides of a bastion. It is also used colloquially in the army for military attacks made by bodies of men on each other.

† B. Intransitive: To make an assault as contradistinguished from standing on the defensive.

"Those that *attack* generally get the victory, though with disadvantage of ground."—*Crom: Campaigns*.

¶ *Attack*, v. & a., is not in Bullock's *Dictionary* (1656), though "*attacha*" and "*attachement*" are. Richardson says that *attack* is not an old word in the English language, and that the term preceding it was *assault*.

\*-at-táck', s. [From the verb. In Fr. *attaque*; Sp. & Port. *ataque*; Ital. *attacco*.] [ATTACK, v.]

A. Ordinary Language:

I. Of assaults, direct or indirect, on persons:

1. An assault upon an army, a place, or upon an individual with material weapons, whether natural or acquired.

" . . . a tumultuary *attack* of the Celtic peasantry."—*Macaulay: Hist. Eng.*, ch. xii.

2. An assault upon a person's feelings, reputation, &c.

"But, whenever any personal *attack* has been made on my lord, I have done him the best service that I could."—*Macaulay: Hist. Eng.*, ch. xxiv.

¶ It may be used where the assailant is a disease or some other thing.

" . . . the sudden manner in which the *attack* [of erysipelas, or small-pox] commences."—*Dr. Anderson: Domestic Med.*, p. 501.

II. Figuratively. Of assaults upon things:

1. When the assailant is a person. [ATTACK, v.]

"The Committee of the Royal Society laid so much stress upon this part of the *attack* that no less than three instruments were devoted to it by the Siam party alone. . . ."—*Transit of Venus*. (*Times*, April 20, 1875.)

2. When the assailant is a thing.

" . . . the dark rays, after having passed through the receiver, still possessing sufficient power to ignite the oxygen, and thus initiate the *attack* of the oxygen."—*Tyndall: Frag. of Science*, 3rd ed., viii, 7, p. 191.

B. Technically:

Mil.: Any general assault or onset made to gain a post or break a body of troops. (*James*.)

*Attack and Defence*: A part of the drill for recruits learning the sword exercise. It is carried on first on horseback; afterwards, when more proficiency is gained, at a walk, and finally, "in speed," which, however, does not exceed three-quarters of that which a

trained soldier would attain were he really pursuing or being pursued. (*Ibid.*)

**False attack:** One carried on to compel the enemy to divide his forces, thus weakening his position in front of what is meant to be the real attack. (*Ibid.*)

**Regular attack:** One carried out according to military rules. (*Ibid.*)

**at-tack'-a-ble, a.** [Eng. *attack*; -*able*. In Fr. *attaquable*.] Able to be attacked. (*Webster.*)

**at-tack'-ed, pa. par. & a.** [ATTACK, *v.*]

**at-tack'-er, s.** [Eng. *attack*; -*er*.] One who attacks.

"To so much reach the attackers pretend to answer." —*Elphinstone: Prin. of Eng. Lang.*, II. 408.

**at-tack'-ing, pr. par. & a.** [ATTACK, *v.*]

"... it would have been difficult for an attacking army to force a passage." —*Frédéric: Hist. Eng.*, vol. III, p. 144.

**at-tac'-ól-ite, s.** [In Ger. *Attakolith*. From Gr. *áttakós (attakós)*, a salmon which the mineral resembles in colour. (*Dana*.)] A pale-red mineral, of which the chief constituents, according to Blomstrand, are—Phosphoric acid, 36.06; silumina, 29.75; lime, 13.19; and water, 6.90. It occurs in Scania, in Sweden.

**át-ta-cúis, s.** [Lat. *attacus*; Gr. *áttakós (attakós)* and *áttakós (attakós)*, a kind of locust.] A genus of moths belonging to the family Bombycidae. *A. cynthia* is the *Ailanthus Silk-*

ATTACUS CYNTHIA (ONE-THIRD REAL SIZE).

worm, so called because its caterpillar feeds upon the *Ailanthus*-tree (*Ailanthus glandulosus*). It is a hardy insect, living well in this country, though it is a native of China. The *Ailanthus* is hardy also; and the rearing of the *Attacus* silkworm upon it is an easy process. (*Wood, &c.*)

**át-ta-gás, át-ta-gén, s.** [In Gr. *áttayás (attagás)*, a long-billed bird, fond of the water, and esteemed a great delicacy. The Godwit (?). (*Liddell & Scott*.) Also *áttayay (attagén)*; Lat. *attagen* = a hazel-hen or heath-cock (*Tetrao bonasia*, Linn., or *T. alchata*, Linn.), found in Spain, the south of France, &c. (*Dr. Wm. Smith*.)]

**Ornith.** = A name applied by early writers to different birds, chiefly gallinaceous, though it was employed for one of the frigate-birds. It has also been for a genus of grouse, and for the sand-grouse (q.v.). As a popular name it is obsolete, but when used it is a synonym of francolin (q.v.).

**át-ta-għan, s.** [ATAGHAN, YATAGHAN.]

**at-tá'ine, \*at-tá'ine, \*at-té'ine, \*at-té'ine, v. i. & t.** [Apparently from Lat. *attineo* = (1) to hold on, to hold fast, delay, (2) to stretch to, to reach to; from *ad* = to, and *teneo* = to hold fast, to hold, . . . to reach, attain. The corresponding word in Mod. & O. Fr. is *atteindre* = to attain, to reach, overtake, strike, catch, equal, come to; Port. *atingir*: these are not from Lat. *attineo*, but from *atingo* = (1) to touch, (2) to assault, to reach, to arrive at: *ad* = to, and *tango* = to touch, to reach, to strike. The Eng. *attain* agrees better in signification with the Fr. *atteindre* and Lat. *atingo* than with Lat. *attineo*, though its form is modified from the last-mentioned verb.]

**A. Intransitive:**

1. To reach, grasp, or arrive at some object of pursuit or of desire, physical, mental, moral, or spiritual.

"... the more part advised to depart thence also, if by any means they might attain to Phenice. . . ." —*Acts xxvii. 12.*

"... have not attained unto the days of the years of the life of my fathers in the days of their pilgrimage." —*Gen. xlvii. 9.*

"... a man of understanding shall attain unto wise counsels." —*Prov. I. 5.*  
"... how long will it be ere they attain to innocency?" —*Hos. viii. 4.*  
"If by any means I might attain unto the resurrection of the dead." —*Phil. iii. 11.*  
"Bot to her purpose schol they never atteyne." —*Chaucer: C. T.*, 13, 257.

2. It is used also of material objects in process of reaching a certain state.

"Milk will soon separate itself into cream, and a pure serous liquor, which, after twelve days, attains to the highest degree of acidity." —*Arbuthnot: Atm.*

¶ It is rarely followed by an infinitive. In the subjoined example "attain to know" is = attain to the knowledge of.

"... and wherein lies The offence that man should thus attain to know!" —*Milton: P. L.*, bk. ix.

**B. Transitive** (formed from the intransitive verb by the omission of the preposition to):

**I. Of persons:**

1. *Lit.*: To reach a place at which one seeks to arrive, or a person with or at whom one wishes to be.

"Canaan he now attains; I see his tents Fitch'd above Shechem, and the neighbouring plain Of Moreh." —*Milton: P. L.*, bk. xii.

"The earl hoping to have overtaken the Scottish king, and to have given him battle; but not attaining him in time, set down before the castle of Aton." —*Bacon.*

2. *Fig.*: To reach or grasp any object, physical, mental, moral, or spiritual, at which one is aiming.

¶ To say that a person attains a thing is not the same as to say that he obtains it. *Attain* implies that one is making active efforts, or at least indulging earnest wishes, to gain the object; whilst *obtain* can be used though he be passive, or even indifferent.

"The eminence on which her spirit stood, Mine was unable to attain." —*Wordsworth: Excursion*, bk. III.

**II. Of things: To reach.**

"Things that rigour never shold atteine." —*Chaucer: C. T.*, II. 987.

"It is when the sun has attained its greatest height that such scenes should be viewed." —*Darwin: Voyage round the World*, chap. xxi.

**\*at-tá'in, s.** [ATTAIN, *v.*]

1. The act or process of attaining.

2. The thing attained.

**at-tá'in-a-ble'-i-tý, s.** [Eng. *attainable*, -*ity*; or *attain*, and -*ability*.] Attainableness. (*Colebridge*.)

**at-tá'in-a-ble, a.** [Eng. *attain*; -*able*.]

1. Able to be attained; able to be reached by proper effort.

"Tending all To the same point—attainable by all: Peace in ourselves, and union with our God." —*Wordsworth: Excursion*, bk. iv.

2. *Less properly*: Obtainable; that is, which may possibly be reached without its being implied that effort has been put forth at all.

**at-tá'in-a-ble-ness, s.** [Eng. *attainable*; -*ness*.] The quality of being attainable.

"Persons become often enamoured of outward beauty, without any particular knowledge of its possessor, or its attainableness by them." —*Cheyne*.

**\*at-tá'in-ant, a.** [O. Fr. *ateignant* = proprio to gain an end.] Snitable, appropriate. (*N.E.D.*)

**at-tá'in-dér, s.** [From O. Fr. *atteindre* = to corrupt or attain, or to reach, to strike, to hit, to injure; Port. *atingir*; from Lat. *atingo*. (ATTAIN.) The meaning has been confused by erroneous association with O. Fr. *teindre*, Fr. *teindre* = to dye, to stain. (*N.E.D.*)

**A. Ordinary Language:**

1. The act of attainting a criminal; and the state of being so attainted.

"A bill for reversing the attainder of Stafford was passed by the Upper House. . . ." —*Macaulay: Hist. Eng.*, chap. iv.

2. That which constitutes, establishes, or declares an attainer; an act or a bill of attainer.

"... the great Act of Attainder." —*Macaulay: Hist. Eng.*, ch. xii.

"The terrible words, Bill of Attainder, were pronounced. . . ." —*Ibid.*, ch. xxii.

3. *Figuratively*: Taint upon one's character, whether of proved crime or fault, or of suspicion only.

"So smooth he deaul'd his vice with show of virtue, That He lived from all attainder of suspect." —*Shakspeare: Richard III.*, III. 4.

**B. Law:** The state or condition of being attainted, which, according to Blackstone, meant "stained" or "blackened."

**I. In England:**

1. *Formerly*. Attainder, in its old and more rigorous form, followed, not when a criminal was convicted of a capital offence, but when sentence of death upon him was pronounced. No formalities were then needed to attain him; the attainer followed as a natural consequence from the sentence. He was regarded as being out of the pale and protection of the law. He was not allowed to be witness in any case. Nay, more, there were forfeiture of his real and personal estates, and the "corruption of his blood;" the last-mentioned phrase implying that not merely could he not inherit any property from his ancestors, but he could not transmit it to any descendants, all of whom, even to the remotest generations, were thus to suffer for a crime in which they had taken no part. (*Blackstone: Comment.*, bk. iv., ch. 29, &c.)

2. *Now*. By 3 & 4 William IV., c. 106, the consequences of attainder are, as much as possible, limited to the person who actually committed the capital offence, and by the 6 & 7 Victoria, c. 85, § 1, an attainted person may even in certain circumstances be witness in a court of law.

II. *In the United States:* The Constitution of the United States requires that "No bill of attainder shall be passed, and no attainder of treason, in consequence of a judicial sentence, shall work corruption of blood or forfeiture except during the life of the person attainted." (*Webster*.)

**at-tá'ined, pa. par. & a.** [ATTAIN.]

**at-tá'in-ing, pr. par.** [ATTAIN.]

**at-tá'in-mént, s.** [Eng. *attain*; -*ment*.]

**I. The act of attaining.**

1. The act or process of reaching any place.

2. The act or process of reaching any object of desire.

"The great care of God for our salvation must appear in the concern he expressed for our attainment of it." —*Rogers*.

**II. The state of being attained.**

"Education in extent more large, of time shorter, and of attainments more certain." —*Milton*.

III. That which is attained. *Specially*—*In the plural*: Knowledge, acquaintance with branches of science or literature.

"His manners were polished, and his literary and scientific attainments respectable." —*Macaulay: Hist. Eng.*, ch. xiii.

**at-tá'int, \*at-tá'ynte, \*at-té'ynt, \*at-té'ynt, \*at-tá'ynte, v. t.** [Fr. *atteint*, a., from O. Fr. *attain*, *attainre*, pa. par. of *atteindre*; Mod. Fr. *atteindre*.] [ATTAINER.]

**A. Ordinary Language:**

1. To disgrace, specially in the way described under B., 1. [ATTAINER.]

"Was not thy father, Richard Earl of Cambridge, For treason executed in our late king's days; And by his treason stand'st not thou attainted, Corrupted, and exempt from ancient guilt?" —*Shakspeare: I. Hen. VI.*, II. 4.

"If we try the Act which attainted Fenwick. . ." —*Macaulay: Hist. Eng.*, ch. xxvii.

¶ It is often followed by *of* standing before the crime.

"They had conspired against the English government, and had been attainted of treason." —*Macaulay: Hist. Eng.*, ch. I.

2. *Fig.*: To taint, to attain, to dim, obscure, to blacken, to darken, as an attainer was supposed to stain or blacken the person against whom it was directed. [ATTAINER.] *Used*—

(a) *Of a person's reputation.*  
"How would the sons of Troy, in arms renown'd, And Troy's proud dames, whose garments sweep the ground, Attain'd the lustre of my former name?" —*Shakspeare: I. Hen. VI.*, II. 594.

"For he attaints that rival's fame With treason's charge. . ." —*Scott: Marmion*, II. 22.

(b) *Of anything lustrous in nature capable of being dimmed; or anything, whether lustrous or not, capable of being tainted or stained.*

"His wrinkles shield all closely covered was For so exceeding shone his glittering ray That Phoebus' golden face it did outshine, As when a cloud his beams did overday." —*Spenser: F. Q.*, I. vii. 83, 84.

**átte, fát, fáre, amidst, whát, fáll, fátter; wé, wét, hóre, camél, hér, thére; pine, píť, síre, sír, maríne; gó, pót, or, wóre, wólf, wórk, whó, sún; míte, cúb, cüre, únite, cür, rúle, füll; trý, Sýrian. se, ce = é. ey = ä. qu = kw.**

3. To corrupt, as the blood of a person under attainer was supposed to be legally "corrupted." [ATTAINT, particip. adj. (2).]

B. Old Law:

1. To declare a jury infamous, and inflict on them a punishment severe even to extravagance, on account of their having given a false verdict. [See ATTAINT, s. B. 1.] (Blackstone: Comment., bk. III, chaps. 23-25.)

2. To place one under an attainer, which is done upon sentence of outlawry, or on that of death for treason or felony. (Blackstone: Comm., bk. iv. 29.) [ATTAINDER.] Formerly a man might be attainted in two ways: (1) By appearance, by which was meant that he really presented himself in the court, and was subject to attainer, having confessed his crime, been vanquished in battle, or adjudged guilty by the verdict. Or (2) by process, when having fled and failed to answer, after being five times called publicly in the county, he was at last outlawed for non-appearance.

at-táint, \*at-téinct, s. [From the verb. In Fr. attaint; O. Fr. attaint.] [ATTAINT, v.]

A. Ordinary Languages:

I. Literally:

1. Gen.: A stain, a blot. (Now shortened into TAINT.)

"No man hath a virtue that he hath not a glimpse of; nor any man an estate, but he carries some stain of it."—Shakespeare: Troth & Cross, l. 2.

2. Spec.: In the legal sense described under B., 1.

"... shall be sued of an attaint, and bound to appear at the Starre Chamber."—Holshed: Chron., bk. ii, ch. iv.

\*II. Fig.: Anything injurious; as illness, weariness.

"Nor doth he dedicate one jot of colour Unto the weary and all-watched night; But freshly looks, and overbears attaints With cheerful semblance."—Shakespeare: Hen. V., iv, Chorus.

B. Technically:

1. Old Law: A process commenced against a former jury for bringing in a false verdict. The jury empanelled to try such a case was the grand one, consisting of twenty-four of the best men in the county; the appellation "grand" being used to distinguish it from the "petit," or small jury—the first one. If convicted, they were pronounced infamous, their goods were forfeited, their wives and families were turned out of doors, their houses razed, their trees rooted up, &c. At length the practice of setting aside verdicts, upon motion made for the purpose, and granting new trials, superseded the old system of attaints, which was finally swept away by 4 Geo. IV., c. 50. (Blackstone: Comment., bk. iii., ch. 25.)

2. Veterinary Medicine: A blow or wound on the hinder foot of a horse.

at-táint, particip. adj. [Fr. attaint; O. Fr. attaint.] [ATTAINT, v.]

1. Under an attainer; attainted.

"He is then [when convicted of a capital crime and sentenced to die] called attaint, attinctus, stained or blackened."—Blackstone: Comment., bk. iv, ch. 29.

2. Corrupted.

"My tender youth was never yett attaint With any passion of inflaming love."—Shakespeare: 1 Henry VI., v. 2.

at-táint-éd, \*at-táynt-éd, pa. par. & a. [ATTAINT, v.]

As participial adjective:

"... there are more attainted lands, concealed from her Majesty, than she hath now possessions in all Ireland."—Spenser: Present State of Ireland.

"Whether Flora Macdonald was justified in concealing the attainted heir of the Stuarts, ..."—Macaulay: Hist. Eng., ch. v.

at-táint-íng, pr. par. [ATTAINT, v.]

at-táint-mént, s. [Eng. attaint; -ment.] The state of being attainted.

"This manor and castle was made over by Henry VIII. to that great man [Cardinal Wolsey] upon whose attainment, that scrupulous prince re-annexed it to the crown."—Ashmole: Berkshire, l. 48.

at-táint-tíre, s. [Eng. attaint; -ure.] The act of attainting; the state of being attainted; the writ or Act of Parliament attainting one.

"Hume's knavery will be the duchess's woe. And her attainsture will be Humphrey's fall."—Shakespeare: 2 Henry VI., l. 2.

at-tal'-s-s, s. [From Attalus III., Phlometer, king of Pergamus.] A genus of palms belonging to the section Coccoth. The species are found in the tropical parts of South

America. *A. funifera* is called by the Brazilians *Piassaba*. Its fibres afford the finest cordage for the navy of their country. Here it is used for brooms to sweep the streets. The seeds are called *coquilla nuts*. They are hard, and being large, are used in turnery for making the handles of doors, umbrellas, and other articles. *A. compta* is the Pindaivo Palm of Brazil. The seeds are eaten as a delicacy, and the leaves used for thatching, for making hats, &c. *A. speciosa* and *A. excelsa* furnish nuts, which are burnt to dry the juice of *Siphonia elastica*, whence india-rubber is obtained. *A. cohune*, a native of Honduras, produces nuts called *cahoun nuts*, which furnish a valuable oil.

\*at-tá-me (1), \*a-tá-me, \*a-tá-mí-én, v.t. [A.S. *atemian* = to tame.] To tame.

"And specially his pride gan attame."—Booiaz: Fall of Princes, p. 108. (Boucher.)

\*at-tá-me (2), v.t. [Fr. *entamer* = to make an incision into, . . . to touch, . . . to begin, . . . to attack, &c.]

1. To commence, to begin.

"And right anon his tale he hath attamed."—Chaucer: C. T. (ed. Urry). (Boucher.)

¶ The reading is *tamyd* in more modern editions.

2. To make an incision into.

"I pray ye ayr emperours, shewe me thy munde, whether is more accordyng, to attame thy fyashe here pessaute fyrste at the heade or at the taylor. The emperours answered shortly and sayde, At the head the fyashe shall be fyrste attamed."—Palsan: Chron., l. 18. (Boucher.)

\*át-tám-íe, s. [ATOMY.]

\*at-tám-in-áto, v.t. [From Lat. *attaminio* = (1) to touch, to attack, to rob, (2) to contaminate, to defile.] To corrupt, to spoil. (Coles, 1685.)

¶ CONTAMINATE is now used instead of it.

\*át-tán, prep. [ATTE.]

\*at-tá-nis, adv. [AT-ANIS.]

\*át-tar (1), s. [ATTER.]

át-tar (2), \*a'-tar, ót-tó. [In Hindustani, *Mahratta*, &c., *átár*; from Arab. *ár* = perfume, *átára* = to smell sweetly.] Essence, especially of roses.

attar or otto of roses. The essential oil obtained from roses by distillation. It is said that 100,000 roses yield only 180 grains of attar; hence the temptation to adulterate it is very great. The oil is first pale-green, then, after being kept, it becomes darker, and exhibits various tints of green, yellow, and red. It is manufactured in various villages and towns of Turkey just south of the Balkans, as well as in India.

"And attar of rose from the Levant,"—Longfellow: A Wayside Inn; Prelude.

attar-gul, atar-gul. (1) *Attar*, and (2) *gul*, in various Indian languages = a rose.] The same as ATTAR or ROSES (q. v.).

"... festooned with only those rarest roses from which the *Attar Gul*, more precious than gold, is distilled, ..."—Moore: Lalla Rookh; Light of the Haram.

\*at-ta'sk, v.t. [Old form of TASK (q. v.).] To take to task, to blame.

"You are much more *at-ta'sk'd* for want of wisdom, Than praise'd for harmful mildness."—Shakespeare: King Lear, l. 4.

\*at-tá'ste, \*a-tá'st, v.t. [O. Fr. *taster*.] [TASTE, v.] To taste.

"This is his own staff, then sayst, therof he shall attast."—Chaucer: The Pardoner and the Shipman. (Richardson.)

"For gentlemen (they said) was nought so fit, As to attaste by bold attempts the cup Of conquest's wine, whereof I thought to sup."—Murray: For Mag., p. 297.

\*átte, \*at-tén, \*át-tán, a contraction for *at-tá*. [ÁT.] At, at the.

"Kyng William attelaste."—E. Glouc., p. 573. (E. T. in Boucher.)

\*átte, prep. of v. [HATTE.]

\*at-tól'ph, v.t. [ATTACH.] (Scotch.)

\*at-tól'ne, v.t. & a. [ATTAIN.]

at-tól'-g-bús, s. [From Lat. *atellabus*; Gr. *ἀττέλαβος* (*atellabos*) = a small, wingless species of locust.]

Entom.: A genus of Coleoptera (Beetles), belonging to the family Curculionidae (or

Weevils). It was originally introduced by Linnaeus with the character, "Head attenuated, behind inclined. Antennae somewhat thick towards the apex." In the 13th edition of his *Systema Naturae* (1767), as many as thirteen species are enumerated. Most of these, however, are now transferred to other genera of Coleoptera. In Stephens' *Illustration of British Entomology* (1828), only one species is mentioned, *A. curculionoides*.

ATTELABUS.

át-téle, v.t. [ETILE.]

† at-tém'-pér, v.t. [In O. Fr. *attemperer*; Ital. *attemperare*; Lat. *attempero* = to fit, to adjust, to accommodate; from *ad* = to, and *tempero* = duly to proportion.] [TEMPER.]

1. To mix anything with another in just proportion; to regulate.

2. To temper; to dilute or reduce to a more moderate strength or amount anything that is excessive.

"Nobility *attempers* sovereignty, and draws the eyes of the people somewhat aside from the line royal."—Bacon.

3. To soften; to mollify.

"His early province could likewise have *attempred* his nature therein."—Bacon.

"Those smiling eyes, *attemp'ring* every ray, Shone sweetly lambent with celestial day."—Pope: *Eloisa to Abelard*, 63-4.

4. To fit to something else.

"Phœnius! let acts of gods and heroes old, *Attempred* to the lyre, your voice employ."—Pope: *Homer; Odyssey* l. 436.

\*at-tém'-pér-áncé, \*at-tém'-pér-áncé, s. [Eng. *attemper*; -ance.] Temperance, moderation.

1. Gen.: In all things.

"The felawes of abstinence bea *attemperance*, that holdeth the mean in all things: also shame, that seeke with all dishonesty."—Chaucer: *Persones Tale*.

2. Spec.: In the use of liquor, or of food, or of both.

"By this virtue, *attemperance*, the creature reasonable keepeth hyma from to much drinke, and from to much mete."—Instruction of a Christian Man.

\*at-tém'-pér-áte, v.t. [ATTEMPERATE, a.] [ATTEMPER.] To render proportionate to anything, to regulate.

"*Attemperate* his actions accordingly."—Barrow: *Math. Lectures*, lect. iv.

\*at-tém'-pér-áte, a. [Lat. *attemperatus*, pa. par. of *attempero*.] [ATTEMPER, ATTEMPERATE.] Regulated, proportioned.

"Hope must be proportioned and *attemperate* to the promise; if it exceed that temper and proportion, it becomes a tumour and tympany of hope."—Hammond: *Practical Catechism*.

† at-tém'-péred, \*at-tém'-pred (pred as *péred*), pa. par. & a. [ATTEMPER, v.]

"And to her gueses doth bounteous basket delight *Attempred* goodly well for health and for delight."—Spenser: *F. Q.*, II, xl. 2.

"A bard amid the joyous circle sings High airs, *attempred* to the vocal strings."—Pope: *Homer's Odyssey*, bk. IV., 23-4.

\*at-tém'-pér-él, a. [Error for *attemperate* or *attemper*.] Temperate, moderate.

"But though *attemperel* weyng be granted, outrageous waypate certes is desired."—Chaucer: *Tale of Melibeus*.

\*at-tém'-pére-ly, adv. [ATTEMPERLY.]

† at-tém'-pér-íng, \*at-tém'-príng, pr. par. & a. [ATTEMPER, v.]

\*at-tém'-pér-ly, \*at-tém'-pére-ly, \*at-tém'-pre-ly (pre as *pér*), adv. [Eng. *attemper*; -ly.] In a temperate manner; moderately, in moderation.

"... when it is y-granted him to take thlike vengeance hastily, or *attemperly*, as the laws requiereth."—Chaucer: *Tale of Melibeus*.

"Governeth you also of your diete *Attempred*, and namely in this bete."—*Ibid.*: *Shipman's Tale*.

at-tém'-pér-mént, s. [Eng. *attemper*; -ment.] The act of tempering, or the state of being tempered. (Dr. Chalmers.)

\*at-tém'-pre (pre as *pér*), a. [ATTEMPER.] Temperate.

"*Attemper* dyte was al hir phylis. And exercise, and herbes sufficiencye."—Chaucer: *C. T.*, l. 16, 82-4.

ból, bóy; pout, jówl; cat, çoll, chorus, çhin, bench; go, gem; thin, this; sin, aj; expect, Xenophon, exist. -íng- -cian, -tian = shán, -tion, -sion, -cioun = shún; -tion, -gion = zhún. -tious, -sious = shúis. -ble, -dle, &c. = bpl, ðpl.

**at-tēpt', \*at-tēpt'e** (p mute), v. t. & i. [In Old Fr. *attemper*, *attemper*; Mod. Fr. *attemper*; Prov. & Port. *attemper*; Sp. *attemper*; Ital. *attemperare*; Lat. *attemperare* = to reach after, to try; freq. from *attemperare* = . . . to attend (ATTEND): *ad* = to, and *tendo* = to stretch.]

**A. Transitive :**

**I. Gen. :** To make trial or experiment of; to try, to endeavour.

1. (Followed by an adjective of the person or thing of which one makes trial or experiment, or after whom or which one puts forth an endeavour.

"Something attempted, something done,  
Has earned a night's repose."  
*Longfellow: The Village Blacksmith.*

2. (Followed by the infinitive.)  
"The government regarded these infant colonies with aversion, and attempted violently to stop the stream of emigration."—*Macaulay: Hist. Eng., ch. 1.*

**II. Specially :**

\*1. To try in the sense of tempting; to tempt. (In this sense the word *tempt* has taken its place.)

"Who in all things wise and just,  
Hindered not Satan to attempt the mind  
Of man, with strength entire and free-will armed."  
*Milton: P. L., x. 3.*

2. To attack.

"Tript me behind, got praises of the king,  
For him attempting who was self-advanced."  
*Shakespeare: Lear, II. 2.*

**B. Intrans. :** To make an attack.

"I have been so hardy to attempt upon a name,  
which, among some, is yet very sacred."—*Glanville: Scæptis Scientiæ.*

**at-tēpt', \*at-tēpt'e** (p mute), s. [From the verb.]

1. An endeavour, an effort.

"An attempt was made with great excess to set on iron works."—*Macaulay: Hist. Eng., ch. xi.*

2. An attack, an assault.

"If we be always prepared to receive an enemy, we shall long live, in peace and quietness, without any attempts upon us."—*Bacon.*

**at-tēpt-a-bil'-i-ty** (p mute), s. [Eng. attempt + ability.]

1. Capability of being attempted.

2. A person or persons, or a thing or things capable of being attempted.

"Short way ahead of us, it is all dim; an unworldly akin of possibilities, of apprehensions, attemptabilities, vague-looking hopes, . . ."—*Carlyle: Heroes and Hero-Worship, Lect. vi.*

**at-tēpt'-a-ble, at-tēpt'-i-ble** (p mute), a. [Eng. attempt + -able, -ible.] Capable of being attempted; capable of being attacked.

"The gentleman vouching his to be more fair, virtuous, wise, and least attemptable than the rarest of our ladies."—*Shakespeare: Cymbeline, I. 4.*

**at-tēpt'-tāte** (p mute), s. [Lat. *attentatum*, neut. of *attentatus*, pa. par. of *attento*.] In Fr. *attentat*. An attempt, an endeavour, especially to commit a crime. In 1589, Puttenham ranked this word as one quite recently introduced in the language. It arose, however, somewhat earlier.

"To forbear that attempt,"—*Sadler* [A. D. 1643], in *Froude: Hist. Eng., vol. IV., p. 241.*

**at-tēpt'-ēd** (p mute), pa. par. & a. [ATTEMPT, v.]

**at-tēpt'-ēr** (p mute), s. [Eng. attempt + -er.] One who attempts. Specially :

1. One who assails a person or his virtue; an assailant; a tempter.

"The Son of God, with godlike force endued,  
Against th' attempter of thy Father's throne."  
*Milton: P. R., IV. 608.*

2. One who endeavours to do anything.

"You are no factors for glory or treasure, but disinterested attempters for the universal good."—*Glanville: Scæptis Scientiæ.*

**at-tēpt'-i-ble** (p mute), a. [ATTEMPTABLE.]

**at-tēpt'-ing** (p mute), pr. par. & s. [ATTEMPT, v.]

**A. As pr. par. :** (In senses corresponding to those of the verb).

**B. As subst. :** Perpetration, commission (in a bad sense, followed by of). (Scottish.)

"The attempting of evil foel and schameful enormities."—*Acts Jas. VI., 1681* (ed. 1814), p. 217. (*Jamieson.*)

**at-tēpt'-lēss** (p mute), a. [Eng. attempt + -less.] Without trying. (*Marlowe: 1 Tamburlaine, II. 5.*)

**at-tēnd', v. t. & i.** [In Fr. *attendre* = to wait, stay, put off, delay; Prov. *attendre*; Sp. *atender*; Port. *atender*; Ital. *attendere*. From Lat. *attendo* = (1) to stretch or bend anything material—a bow, for example; (2) to stretch or bend the mind to: *ad* = to, and *tendo* = to stretch, implying that one who attends to any person or thing is as if he stretched out his neck to hear and see more effectively.]

**A. Transitive :**

**I. Lit.** (When the subject of the verb is a person.)

1. To turn the thoughts towards; to apply the mind to.

(a) To bend the desires towards attaining any object.

"Their hunger thus appeased, their care attends  
The doubtful fortune of their absent friends."  
*Dryden: Virgil; Æneid I. 299.*

(b) To fix the mind upon anything; to listen to anything; to turn the eyes fixedly upon it, or reflect upon it earnestly.

"Sing then, and Damon shall attend the strain."  
*Pope: Pastorals: Spring, 28.*

2. To wait upon or for a person.

(1) In a good sense :

(a) To wait upon a person as a servant does upon a master. (It may be used when a servant ministers to his master at home, but is more frequently employed when his accompanias him on a journey.)

" . . . his companion, youthful Valentine,  
Attends the emperor in his royal court."  
*Shakespeare: Two Gent. of Ver., I. 3.*

" . . . with devoted loyalty, though with a sore heart and a gloomy brow, he prepared to attend William thither."—*Macaulay: Hist. Eng., ch. xxiii.*

(b) To come to a superior when summoned; to present one's self in obedience to a summons.

"The lord mayor and the sheriffs of London were summoned to attend the king."—*Macaulay: Hist. Eng., ch. ix.*

(c) To wait for the expression of a superior will. (It is used by Milton in an analogous sense for the Son of God reverentially and submissively attending to the will of his Heavenly Father.)

"Glad to be offered, as a sacrifice  
Of his great Father."—*Milton: P. L., bk. III.*

(d) To wait upon a person in a professional capacity, as a physician may do upon a patient.

"The fifth had charge sick persons to attend,  
And comfort those in point of death which lay."  
*Spenser.*

(ii) In a bad sense :

† (a) To accompany with hostile intentions.  
"He was at present strong enough to have stopped or attended Wailer in his western expedition."—*Clarendon.*

(b) To lay wait for.

"Thy interpreter, full of despite, bloody as the hunter, attends thee at the orchard end."—*Shakespeare: Twelfth Night, III. 4.*

3. To wait for or expect an event, whether one desire or deprecate its coming.

¶ This signification is possessed also by the French *attendre*.

"Three days I promise'd to attend my doom,  
And two long days and nights are yet to come."  
*Dryden: Indian Emperor, III. 2.*

"So dreadful a tempest, as all the people attended therein the very end of the world and judgment day."  
—*Raleigh: History.*

**II. Fig.** (When the subject of the verb is a thing.)

1. To accompany, to be appendant to.

"Dangers of every shape and name  
Attend the followers of the Lamb."  
*Cowper: Olney Hymns, xxxvii.*

2. To follow upon, to be consequent to.

"Secure of conquest, where the prize  
Attends superior worth."  
*Cowper: Promotion of Theodosius.*

3. To await, to be in store for.

"To him who hath a prospect of the state that attends all men after this, the measures of good and evil are changed."—*Locke.*

**B. Intransitive :**

**I.** To bend the mind to, or concentrate it upon, some object of study or pursuit.

"Since man cannot at the same time attend to two objects, if you employ your spirit upon a book or a bodily labour, you have no room left for sensual temptation."—*Faust.*

**II.** To yield attention to; to listen to anything audible, or turn the eyes fixedly on anything visible.

"Hear, ye children, the instruction of a father, and attend to know understanding."—*Prov. I. 1.*

¶ It is used in Scripture in the sense of God's "hearing a prayer" and answering it.

"But verily God hath heard me; he hath attended to the voice of my prayer."—*Ps. lxxv. 18.*

**III.** To be present or within call; to wait upon, as a servant may do on a master.

(I.) As a companion or servant of the person accompanied, or to render professional service, sacred or secular.

"His squire, attending in the rear,  
Bore high a quarter on a spear."  
*Scott: Lay of the Last Minstrel, IV. 18.*

"Look how thy servants do attend on thee,  
Each in his office ready at thy beck."  
*Shakespeare: Taming of the Shrew; Induction, II.*

Or (2), in obedience to a summons, in compliance with a wish.

"The nurse attended with her infant boy,  
The young Astyanax, the hope of Troy."  
*Pope: Homer; Iliad VI. 486.*

**IV.** To wait for, to wait to, delay. [See Fr. *attendre* in the etym.]

"Plant anemones after the first rains, if you will have flowers very forward; but it is surer to attend till October."—*Boissier.*

¶ (a) Crabt thus distinguishes between the verbs *attend*, to mind, to regard, to heed, and to notice.—*Attend* is the generic; the real are specific terms. "To mind is to attend to a thing, so that it may not be forgotten; to regard is to look on a thing as of importance; to heed is to attend to a thing from a principle of caution; to notice is to think on that which strikes the senses . . . Children should always attend when spoken to, and mind what is said to them; they should regard the counsels of their parents, so as to make them the rule of their conduct, and heed their warnings, so as to avoid the evil; they should notice what passes before them, so as to apply it to some useful purpose."

(b) *Attend* to and *wait upon* are thus discriminated:—"Attendance is an act of obligation; waiting on, that of choice. A physician attends his patient; a member attends on Parliament; one gentleman waits upon another."

(c) The following is the distinction between *attend*, to attend, to hearken, and to listen:—"Attend is a mental action; hearken, both corporeal and mental; listen, simply corporeal. To attend is to have the mind engaged on what we hear; to hearken and listen are to strive to hear. People attend when they are addressed; they hearken to what is said by others; they listen to what passes between others." (*Crabb: Eng. Synon.*)

\* **at-tēnd', s.** [ATTEND, v.] Attendance. (*Greene: Looking Glass for England, I. 1.*)

**at-tēnd'-ançe, \*at-tēnd'-ånçe**, s. [O. Fr. *attendance*.]

**I.** The act of attending.

1. The act of waiting upon a person or upon people; a service, ministry; as that of—

(i) A servant waiting upon a master, or followers upon a chief.

"And the meet of his table, and the sitting of his servants, and the attendances of his ministers, and their apparel . . ."—*3 Chron. ix. 4.*

"Attendance is a bribe, and then 'tis bought."  
*Dryden: The Hind and Panther, III.*

¶ For the difference between *attendance* and *waiting upon*, see ATTEND, IV. (b).

(ii) A professional man making a point of being present at proper times at the place where he discharges his public duties.

" . . . another tribe, of which no man gave attendance at the altar."—*Job. vii. 13.*

"The next morning he held a Privy Council, discharged Chief Justice Keeling from any further attendance at the board, . . ."—*Macaulay: Hist. Eng., ch. xii.*

¶ (a) *In attendance*: Attending, attendant upon.

"A guard of honour was everywhere in attendance on him."—*Macaulay: Hist. Eng., ch. xxiii.*

(b) *To dance attendance upon*: To wait upon a superior who is regardless of the comfort of his inferiors, or a government similarly inconsiderate, and find one's self kept in lively moment, like that of a dancer, no profitable result, to the performer at least, following from all this activity.

"I had thought  
They had parted so much honestly among em,  
At least, good manners, as not thus to suffer  
A man of his place, and so near our favor,  
To dance attendance on their lordships pleasures,  
And at the door, too, like a post with packets."  
*Shakespeare: Henry VIII., v. 2.*

2. Concentration of the mind upon; attention.

" . . . give attendance to reading, to exhortation, to doctrine."—*1 Tim. IV. 13.*

3. Expectation.

"That which cansteth bitterness in death, is the languishing attendance and expectation thereof, as it cometh."—*Hooker.*

**II.** The state of being attended.

**âte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pine, pît, sire, sir, marine; gô, pôt, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, ûnite, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = é; æ = ê. qu = kw.**

III. The persons attending; a train, a retinue. (Milton: P. L., bk. x.)

at-tend-ant, a. & s. [From Fr. attendant, pr. par. of attendre = to attend; Ital. attendente.]

A. As adjective:

I. Ordinary Language:

1. Accompanying; being present with and ministering or lending dignity to. (Applied in a literal sense to persons, or figuratively to things.)

"Not to the court (replied th' attendants train), Nor mix'd with matrons to Miuerva's fans: To Hion's steepy tower she bent her way, To mark the fortunes of the doubtful day."

Pope: Homer's Iliad, bk. vi., 478-481.

"... in the reign of Henry the Seventh, fresh meat was never eaten even by the gentlemen attendants on a great Earl, except during the short interval between Midsummer and Michaelmas."—Macaulay: Hist. Eng., ch. III.

"Why did the fiat of a God give birth To you fair Sun, and his attendant Earth?" Cooper: Trocintum.

2. Following as a consequence of; related to, as an effect is to a cause.

II. Technically:

1. Law: Dependent on or doing duty or service to. [B.]

2. Music. Attendant keys: The keys or scales on the fifth above and fifth below (or fourth above) any key-note or tonic considered in relation to the key or scale or that tonic. (Calcott.)

B. As substantive:

I. Ordinary Language:

(a) Of persons:

(a) One who waits upon another, as a servant on a master or mistress, a courtier on a sovereign, or one of a train upon its head.

"Yet the Queen, whose kindness had endeared her to her humblest attendants, ..."—Macaulay: Hist. Eng., ch. xv.

(b) One who waits upon a person with the view of preferring some request to him, or transacting some business with him.

"I endeavour that my reader may not wait long for my meaning; to give an attendant quick dispatch is a civility."—Barnes: Theory.

(c) One present at a meeting or at any gathering.

"He was a constant attendant at all meetings relating to charity, without contributing."—Swift.

2. Of things: A consequent, a concomitant of anything related to another, as an effect is to a cause.

"He had an unlimited sense of fame, the attendant of noble spirits, which prompted him to engage in travels."—Pope.

"It is hard to take into view all the attendants or consequents that will be concerned in a question."—Watts.

II. Law: A person who owes a duty or service to another, or in some way depends upon him. (Covell.)

at-tend-éd, pa. par. [ATTEND.]

† at-tend-ér, a [Eng. attend; suff. -er.] An attendant.

"The gypsies were there, Like lords to appear; With such their attenders As you sought offenders."—Ben Jonson.

at-tend-ing, pr. par. & a. [ATTEND.]

"Th' attending heralds, as by office bound, With kindled flames the tripod-vase surround." Pope: Homer's Iliad, bk. xxiii., 49, 50.

\* at-tend-mént, s. [Eng. attend; suffix -ment.] That which attends.

"The uncomfortable attendments of hell."—Browne: Fulgar Errors, bk. vii., ch. 14.

† at-tend-réss, s. [Eng. attend(e)r; -ess.] A female attendant. "A female attendress at the table." (Fuller: Worthies; Somersetshires.)

\* at-té-ne, v.t. [From Lat. attinere = to pertain to; ad = to; tenere = to hold; Fr. s'atténir = to be linked to.] To pertain to. "That attend to the partie defendeur."—Acta James VI., 1567 (ed. 1814), p. 44.

\* at-tént, a. [In Sp. atento; Port. & Ital. attento; Lat. attentus.] Attentive.

"Now, my God, let, I beseech thee, thine eyes be open, and let thine ears be attent unto the prayer that is made in this place."—2 Chron. vi. 40.

"With an attent ear ..."—Shaksp.: Hamlet, l. 2.

at-tént, s. [In Fr. attente = waiting.] Attention.

"And kept her sheeps with diligent attent, Watching to drive the ravenous Wolfe away" Spenser: F. Q., VI. ix. 97.

at-tén-tátes, s. pl. [In Fr. attentat = an attempt; Lat. attentata, n. pl. of pa. par. of attento = to stretch out, to attempt.]

1. Proceedings in a court of judicature, pending suit, and after an inhibition is decreed. (Aylife.)

2. Things done after an extra-judicial appeal. (Ibid.)

\* at-tén-tá-tion, s. [As if from Low Lat. attentatio.]

1. Attention. (Hacket: Life of Williams, l. 99.)

2. Temptation. (Davies.)

at-tén-tion, a. [In Fr. attention; Sp. atencion; Port. attenção; Ital. attenzione; from Lat. attentio = a bending of the mind, attention; from attentum, sup. of attendo.] [ATTEND.]

A. Ordinary Language:

I. The act of attending.

1. Gen.: The act of concentrating the mind on any object of sense or on any mental conception.

"Yet, while I recommend to our actresses a skilful attention to gesture, I would not have them study it in the looking-glass."—Goldsmith: The Bee, No. 11.

2. Spec.: An act of civility; thoughtful consideration, kindness, or love shown to a person from appreciation of his or her character. (Often in the pl.)

"The Secretary shared largely in the attentions which were paid to his chief."—Macaulay: Hist. Eng., ch. xxiii.

II. The state of being attended to.

"... the labour bestowed by him upon what he has hereafter and now laid before the public, entitled him to candid attention ..."—Wordsworth: Preface to the Excursion.

III. The power, ability, or faculty which man possesses to attend to anything. [B. I.]

"Hardly any faculty is more important for the intellectual progress of man than the power of attention."—Darwin: Descent of Man, pt. I., ch. II.

¶ To draw or to call the attention to: To point out to any one an object calculated to a greater or less extent to attract the notice.

"My attention was called to this subject."—Darwin: Descent of Man, pt. I., ch. I.

B. Technically:

1. Mental Phil.: Intelligent consciousness voluntarily applied; consciousness concentrated in order intellectually to conquer a particular object; the positive act of concentrating consciousness.

"Attention is consciousness and something more. It is consciousness voluntarily applied, under its law of limitations, to some determinate object; it is consciousness concentrated."—Sir W. Hamilton: Metaph., vol. I., p. 288.

"Attention is consciousness applied by an act of will or desire under a particular law. ... This law, which we call the law of limitation, is, that the intension of our knowledge is in the inverse ratio of its extension—in other words, that the fewer objects we consider at once, the clearer and more distinct will be our knowledge of them."—Ibid., p. 246.

"Attention, then, is to consciousness what the contraction of the pupil is to sight; or to the eye of the mind what the microscope or telescope is to the bodily eye. The faculty of attention is not, therefore, a special faculty, but merely consciousness acting under the law of limitation to which it is subjected. But whatever be its relation to the special faculties, attention doubles all their efficiency, and affords them a power of which they would otherwise be destitute. It is, in fact, as we are at present constituted, the primary condition of their activity."—Ibid., p. 248.

2. Mil.: A command given to soldiers, who for a time have been permitted to "stand at ease," to resume a more normal military attitude. When "Attention" is ordered, the hands are to fall smartly down the outside of the thighs, and the right foot to be brought up on a level with the left.

at-tén-tive, \* at-tén-týve, a. [Fr. attentif.]

1. Of persons: With the mind fixed on the object to which the person is said to be attending; heedful. If the object be one of which the eye takes cognizance, then the eye is directed keenly to it; if one cognizable by the ear, then the ear is similarly intent; if on a book, then the eye and the mental powers are in operation; if its own thoughts are the subject of reflection, then the mind intraverted becomes vividly conscious of its own working.

"... Knowledge dwells In heads replete with thoughts of other men; Wisdom in minds attentive to their own." Cooper: Task, bk. vi.

¶ It may be used also figuratively of God. "... let now thine ear be attentive to the prayer of thy servant, ..."—Nehem. l. 11.

2. Of things:

"I bring a trumpet to awake his ear; To set his sense on the attentive bent, And then to speak."

Shaksp.: Troil. & Cress., l. 2.

"Its various parts to his attenties note." Cooper: Trocintum.

at-tén-tive-lý, adv. [Eng. attentive; -ly.] In an attentive manner; heedfully; with the mind fixed on what is in progress.

"Hear attentively the noise of his voice, and the sound that goeth out of his mouth."—Job xxviii. 2.

at-tén-tive-ness, s. [Eng. attentive; -ness.] The state or quality of being attentive; attention.

"... at the relation of the queen's death, ... briefly confessed and lamented by the king, how attentiveness wounded his daughter."—Shaksp.: Winter's Tale, p. 2.

† at-tént-ly, adv. [Eng. attent; -ly.] In an attentive manner; attentively.

"Those who attently regard a locust or a caterpillar ..."—Barrow, vol. II., Sermon 8.

at-tén-n-ant, a. & s. [In Fr. attenuant; Sp. atenuante; Port. atenuante; Lat. attenuans, pr. par. of attenuo = to make thin.] [ATTENUATE.]

A. As adj.: That has the power of making a liquid thin, or diluting it.

"They put into the stomach those things that be attenuans, incisiva and sharp, for to provoke and stir up the appetite."—Holland: Plutarck. (Richardson.)

B. As substantive (Pharm.): That which possesses the power of imparting to the blood a more thin and fluid consistency than it previously possessed. Water, and other aqueous fluids, have this property to a greater or less extent. (Castle.)

at-tén-n-áte, v.t. [From Lat. attenuatus, pa. par. of Lat. attenuo = to make thin; ad = to, and tenuo = to make thin; tenuis = thin. (TRIN.)] The Fr. atténuer, Sp. atenuar, Port. atenuar, Ital. attenuare (pa. par. attenuato), correspond in signification to our English word.]

I. Lit.: To make thin.

1. Of liquids: To make thin in the sense of less dense; to render more watery and of less consistency.

"Of such concernment too to drink and food T' increase, or attenuate the blood." Dryden: Lucretius, bk. iv.

2. Of solids: To render finer, as a wire which is filed away or partially dissolved in an acid.

"It is of the nature of acids to dissolve or attenuate; and of alkalies to precipitate or incrassate."—Newton: Optics.

II. Fig.: To lessen, to diminish.

"... for this fatal sect hath justified her out of divers large regions in Africk, in Tartary, and other places, and attenuated their number in Asia."—Howell: Letters, II. 10.

at-tén-n-áte, a. [From Lat. attenuatus, or Ital. attenuato.] [ATTENUATE, v.]

A. Ordinary Language:

1. Of liquids: Made thin in consistency; rendered less dense.

"Vitrication ever completeth in spirits attenuata, which the cold doth congeal and coagulate."—Bacon.

2. Of solids: Rendered finer or more slender.

B. Bot.: Made thin or slender; tapering. (Louden.)

at-tén-n-á-téd, pa. par. & a. [ATTENUATE, v.]

at-tén-n-á-tíng, pr. par. [ATTENUATE, v.]

at-tén-n-á-tion, s. [In Fr. attenuation; Sp. atenuacion; Port. atenuação; Ital. attenuazione; Lat. attenuatio.]

1. The act of rendering thinner; the state of being rendered thinner.

¶ Used specially (a) of a liquid or gas rendered less dense.

"... the diminished density, or attenuation of the wort, ..."—Fowles: Manual of Chem., 10th ed., p. 604.

"Chiming with a hammer upon the outside of a bell, the sound will be according to the inward concave of the bell; whereas the elision or attenuation of the air can be only between the hammer and the outside of the bell."—Bacon.

Or (b) of a solid rendered finer or more slender in form, as, for instance, ductile wire drawn out to a greater or less extent of tenacity.

† 2. A person or thing attenuated.

"I am ground even to an attenuation."—Dodd: Devotions, p. 517.

bóil, hóy; pout, jówl; cat, çell, chorus, çhin, bench; go, çem; thin, this; sin, aç; expect, Xenophon, exist. ph = f. -cian, -tian = shán. -cion, -tion, -sion = shún; -fion, -fion = zhún. -tious, -sious = shús. -ble, -dle, &c. = bel, del.

\*ät-tër, \*ät-tyr (yr = ir), s. [A.S. atter, ator, ater = poison; matter, pus. In Sw. etter; Dan. edder.] Poison venom; pus from an ulcer.

"And nithful neddra, loth and lither, Sel gliden on his breast nether, And erthe freten wile he mai liuen, And atter on is tunge elinen." Story of Gen. & Exod. (ed. Morris), 369-72.

\*ät-tër-cöppe, \*ät-tir-cöppe, \*ät-tyr-cöppe, \*ät-tër-cöb, \*ät-tër-cäp, \*äd-ër-cöp, \*ä-dyr-cöp (yr = ir), s. [A.S. attercoppa = a spider; from atter = poison, and coppa, prob. = spider. Cf. Dut. spinne-cop = spider.] [COBWEB.]

I. Literally:

1. A spider. (Prompt. Parv., &c.) "Arneus; an adercop or a spider." Vocab. Stanh., Sig. D, 2. b. (Boucher.)

2. Less properly: A spider's web. "I seee her krookin astride o' th' bawik, her hair an ful of attercopp." Craven Dialogues, p. 228. (S. 62 Boucher.)

II. Figuratively: A peevish, ill-natured person.

"Thou yreful attercopp, Pylat, apostate, Judas, Jew's jangler, Lollard lawreute." Ever Green, ll. 74. (Boucher.)

¶ Trench says that it was first in general use among the English race; then it became confined to a portion of them, including those of the Irish pale and of the north of England, whilst now it is confined to these last. (Trench: Eng. Past and Present, p. 84.)

\*ät-tër-filth, s. [O. Eng. atter, and Eng. filth.] Corruption. (Prompt. Parv.)

\*ät-tër-läthe, s. [A.S. atterläthe, aterläthe = betony, penny-grass.] A plant, betony. (Stratmann.)

\*ät-tër-lý, adv. [From O. Eng. atter (q.v.) and suffix -ly.] With poison; venomously (Chaucer.)

\*ät-tër-nerne, \*ät-tër-ner, a. [A.S. atternerne, atterner, atteryn = poisonous; M. H. Ger. atterin.]

- 1. Venomous; poisonous. (Stratmann.)
2. Fierce, cruel, snarling, ill-natured. (Grose.)

\*ät-tër-nesse, s. [From A.S. atter = poison.] [ATTER.] Venomousness. (Stratmann.)

ät-tër-räte, v.i. [Lat. ad = to, and terra, = terra = dry land, as distinguished from the heavens, the sea, the air, &c.] To add to the land, to form into dry land.

ät-tër-rä-töd, pa. par. [ATTEENATE.]

ät-tër-rä-tüng, pr. par. [ATTEENATE.]

ät-tër-rä-tion, s. [Eng. atterrat(e); -ion.] The process of adding to the land, or of forming into dry land.

at-tëst, v.i. & t. [In Fr. attester; Sp. atestar, atestiguar; Port. attestar; Ital. attestare; Lat. attestor; from ad = to, and testor = to be a witness; testis = a witness.]

A. Transitive:

\*I. To call to witness. "But I attest the gods." Shakesp.: Troil. & Cress., ll. 2.

II. To bear witness.

1. Lit.: Where the witness is a person. (a) Properly: To bear witness to the genuineness of a document and the truth of its contents by appending one's signature to it; to certify.

(b) In any other way, whether by word or deed, to confirm the truth of an allegation or fact.

"Live thou: and to thy mother dead attest That chauce the dide from bleasib criminal." Spenser: K. Q., II. l. 87. "Idomeneus, whom Ilioo fields attest Of matchless deeds." Pope: Homer's Odyssey, bk. xix., 911-12.

2. When the witness is a thing, as, for instance, a book, a passage or passages in a book, coincidences of fact in a statement, or anything similar.

"... they formerly did so, as is attested by passages in Piny." Darwin: Orig. of Species (1859), ch. 1, p. 34. "... the casual coincidences of fact, with which contemporary literature abounds, serve to attest the narrative of the historian, and to confirm its veracity." Lewis: Early Rom. Hist., ch. vi., § 8.

B. Intrans.: To bear witness. "Till from the feet our presents be convey'd, And, Jove attesting, the firm compact made." Pope: Homer's Iliad, bk. xix., 180-90.

†at-tëst, s. [From the verb.] Attestation. "... the exalted man, to whom Such high attest was given." Milton: P. E., bk. 1.

at-tës-tä-tion, s. [In Fr. attestation; Sp. atestacion; Port. attestacao; Ital. attestazione; all from Lat. attestatio.] The act of attesting; the state of being attested; that which attests.

Specialty:

1. Of persons: The act of bearing witness to any document by appending one's signature to it; also the act of witnessing any opinion or statement in a less formal manner.

"... men, as we know them, do not sacrifice their lives in the attestation of that which they know to be untrue." Tyndall: Frag. of Science (3rd ed.), tit. 63.

2. Of things: That which attests anything; specially historical evidence of an external character to the authorship or events of a history.

"... the external attestation, corroborated by the internal evidence of the narrative." Lewis: Early Roman Hist., ch. xiv., § 1.

at-tës-tä-tive, adj. [From Lat. attestativus, perf. par. of attestor (ATTEST), and Eng. suff. -ive.] Attesting.

"Of attestative satisfaction: Satisfaction arising from establishing truth by evidence against a false statement prejudicial to one." Bowring: Bentham's Works, vol. 1, p. 274.

at-tëst-öd, pa. par. [ATTEST, v.]

at-tëst-ör, at-tëst-ör, s. [Eng. attest; -er, -or.] One who attests.

"The credit of the attestors, and truth of the relations." J. Spencer: Prodiges, p. 397. "This arch-attester for the publick good By that one deed enables all his blood." Dryden: Absalom and Achitophel.

at-tëst-ing, pr. par. [ATTEST, v.]

"Nor speak I rashly, but with faith averr'd, And what I speak attesting Heaven has heard." Pope: Homer's Odyssey, bk. xiv., 175-8.

"Alternate each th' attesting sceptre took, And, rising solem, each his sentence spoke." Pope: Homer's Iliad, bk. xviii., 587-8.

at-tëst-ive, a. [Eng. attest; -ive.] Attesting; containing an attestation. (Worcester.)

at-tëst-ör, s. [ATTESTER.]

at-tëyn-ant, a. [From Lat. attinens, pr. par. of attineo.] Appertaining, belonging. "That to my dull writte it is not atteynant." Fabian: Chron. (Prologue, p. 2). (S. 62 Boucher.)

\*at-tëyne, v.i. & t. [ATTAIN.]

Ät-tic, ät-tic, \*Ät-tick, a & s. [In Fr. Attique; Sp. Atico; Port. & Ital. Attico; Lat. Atticus; Gr. Ἀττικός (Attikos), from Attica.]

A. As adjective:

I. Ordinary Language:

1. Of or belonging to Attica, a province of Greece, or to Athens, its world-renowned capital; to the inhabitants of Attica or Athens; or, finally, to their writings and other productions.

"Who, scarcely skill'd an English line to pen, Scans Attic metres with a critic's ken." Byron: A College Examination.

2. Classical. (Used especially of poetic or other compositions, in whatever language they may be written.)

"How can I Pultney, Chesterfield forget, While Roman Spirit charms, and Attic Wit." Pope: Epilogue to the Satires; Dial. ll. 84, 85.

II. Technically:

I. Philology:

Attic dialect: The dialect of ancient Athens. The old Attic was the same as the Ionic, from which the Attic properly so called somewhat diverged. The latter was the accepted standard of the Greek language; the other dialects were regarded as provincial forms of speech.

2. Architecture:

(a) Attic base: A peculiar base which the ancient architects used in buildings of the Ionic and Corinthian orders, and which Palladio introduced also into the Doric style.

(b) Attic order: An order of small square pillars placed by Athenian architects at the uppermost parts of a building.

B. As substantive:

I. Ordinary Language:

1. A native of Attica. Spec., an Athenian. "A time when the Atticks were as unlearned as their neighbours." Bentley: Dissert. upon Phalaris, p. 390.

2. A room or series of rooms at the top of a house just under the roof; a garret. "... betaking himself with his books to a small lodging in an attic." Macaulay: Hist. Eng., ch. xv. ¶ It is often used in the plural. "The wild wind rang from park and plain, And round the attics rumbled." Tennyson: The Goose.

II. Architecture:

1. A low storey placed above an entablature or a cornice, and limiting the height of the

ATTIC ON THE ARCH OF CONSTANTINE.

main part of an elevation. It occurs chiefly in the Roman and Italian styles. (Gloss. of Arch.)

2. In the same sense as B., 1. 2.

Attio muse. A fine poetic vein.

†Ät-ti-cal, a. [Eng. Attic; -al.]

- 1. Lit.: Of or belonging to Attica.
2. Fig.: Pure or classical in style.

"If this be not the common Attical acception of it, yet it will seem agreeable to the meaning of the New Testament; in which, whosoever will observe, may find words and phrases, which perhaps the Attick poetry, perhaps grammar, will not approve of." Hammond: Serm., 12.

Ät-ti-cism, s. [In Ger. atticism; Fr. atticisme; Port. atticismo; Gr. ἀττικισμός (attikismos) = (1) a siding with the Athenians; (2) the Attic style; an atticism.]

†I. Attachment to the Athenian people. (Used specially in narratives of the Peloponnesian war.)

"Tydides and his accomplices were put to death for Atticism." Hobbes: Thucydides, bk. viii. (Richardson.)

2. A mode of expression characteristic of the Attic dialect; classic elegance; a well-turned phrase.

"They made sport, and I laughed; they mispronounced, and I unliked; and to make up the atticism, they were out, and I missed." Milton: Apology for Smectymnus.

"There is an elegant Atticism which occurs, Luke xlii. 9. 'If it bear fruit, well.'" Newcome: View of the Eng. Bib. Trans., p. 278.

ät-ti-gi-ze, v.t. & t. [In Lat. atticiizo; from Gr. ἀττικίζω (attikizō).]

A. Transitive: To cause to conform to the idiom of Attica, or of its capital, Athens.

B. Intransitive: To speak or write like a native of Attica.

"If any will still excuse the tyrant for atticing in those circumstances." Bentley: Dissert. upon Phalaris, p. 317.

†Ät-tios, s. pl. [From Gr. Ἀττικός (Attika), the title of the first Book in Pausanias's Itinerary of Greece, which treats of Attica and Megaris.] A geographical, topographical, historical, or other description of Attica.

¶ Attics, the pl. of attic, has a slightly different etymology. [ARRIC, B. 2.]

\*at-tig-u-öus, a. [Lat. attiguus, from attiguo, old form of attingo.] [ATTINGOE.] Contiguous, bordering on, near, hard by. (Ogilvia.)

at-tig-u-öus-ness, s. [Eng. attiguus; -ness.] The quality of being attiguus; contiguity. (Ogilvia.)

at-tinge, v.t. [Lat. attingo = to touch, to handle; ad = to, and tango = to touch.] To touch lightly or gently. (Coles: Dict., 1685.)

at-tire, \*a-tire, v.t. [Connected apparently with two classes of words. It has affinity with O. Fr. attirer, attirer, attirer = to provide, to array, to dispose, to adorn. (This is not

closely akin in signification to Mod. Fr. *attirer*, which is to attract, to procure.) From O. Fr. *tier* = rank, order; Prov. *attayar*; Sp. *ataviar* = to adorn. Compare also Ger. *zieren* = to adorn; *zier* = ornament. The Eng. *attire* has also intimate relations with O. Fr. *attourner* = to clothe; Mod. Fr. *attourner* = to adorn; from O. Fr. *atour*, *attour* = (1) a hood, (2) a head-dress for a woman. The Eng. word *tire-woman*, to a certain extent, connects both classes of words. [ATTIRE, s., TIRE, TIRE-WOMAN.] To clothe one in garments, especially of a gorgeous character. (Used literally or figuratively, followed by *with* or *in*.)

... and with the linen mitre shall he be attired." —Lev. xvi. 4.  
"Religion, if in heavenly truths attired, Needs only to be seen to be admired."  
Cowper: *Expatriation*.

**at-ti-re**, \* **a-ti-re**, \* **at-ty-re**, \* **a-ty-re** (yr as ir), \* **at-tour**, a. [O. Fr. *attirer* = to attire.]

**A. Ordinary Language:**  
**I. (Of the form atour):** A woman's head-dress.

"This lady was of good estate, Right wondrousful of apparayle; By hir attire so bright and shene, Mea myght perceyve well, and see, She was not of religion. Nor I neelle make mercious Nor of robe, nor of treasure, Of broche, neithir of hir rich attour." —*Romanet of the Rose*, s. 713-3, 720.

**II. (Of the other forms of the word):** Dress, apparel, vestments.

- 1. **Spec.:** Of a splendid kind.  
"Cac a maid forgot her ornaments, or a bride her attire." —*Jer. II. 32.* (See also *Esak. xxiii. 15.*)
- 2. **Gen.:** Whether splendid or not.  
"Not brothers they in feature or attire." —*Wordsworth: Excursion*, bk. viii.

¶ In ordinary language it is rarely used in the plural.  
"But, when returned, the good Ulysses' son With better hand shall grace with fit attire His guest." — *Pope: Homer's Odyssey*, bk. xiv, 553-5.

**B. Technically:**

1. **Old Bot.:** The name given by Grew to the stamens, pistils, &c., of a plant included within the calyx (called *impalement*) and the corolla (denominated *foliation*).

"Attira... [In Botany]. The flower of a plant is divided into three parts—the impalement, the foliation, and the attire, which is either doric or semi-form. Florid attire, called thrums or aita, as in the flowers of marigold and tansy, consists sometimes of two, but commonly of three parts: the outer part is the flower, the body of which is divided at the top, like the cowslip sower, into five distinct parts. Semi-form attire consists of two parts—the chives and apices; one upon each side." —*Grew: Anatomy of Plants*.

2. **Her.:** (1) Clothing; (2) a single horn of a stag. The plur. *attires* is used for two horns. (*Gloss. of Her.*)

**at-ti-red**, pa. par. & a. [ATTIRE, v.]

1. **Ord. Lang.:** With a signification corresponding to that of the verb.

2. **In Heraldry:** Ornamented with horns or antlers. (Used of the Stag or Hart.) A reindeer is represented in Heraldry with double attires—one pair erect and the other drooping. (*Boutell: English Heraldry*.)

ATTIRED.

"Attired" a term used among Heralds when they have occasion to speak of the horns of a Buck or Stag." —*Sullivan: Eng. Expo.* (ed. 1650).

**at-ti-re-mént**, s. [Eng. *attire*; *ment*.] Outfit, dress, apparel, furniture, decoration, adornment. (N.E.D.)

**at-ti-r-ér**, s. [Eng. *attire*; *-er*.] One who attires another; a dresser. (*Johnson*.)

**at-ti-r-íng**, pr. par. & s. [ATTIRE, v.] **A. As present par.:** With a signification corresponding to that of the verb.

- B. As substantive:**  
1. **Spec. Plur.:** The head-dress of women.  
"... attiring, that which gentlewomen wear on their heads, *redmills*, ... —*Fulcol.*
- 2. **Gen.:** Dressing; dress of any kind.

(a) **Literally:**  
"In the attiring and ornament of their bodies, the dukes had a fine and unaffected politeness." —*Sir H. Wotton: Romaine*, p. 171.

(b) **Figuratively:** Ornamental covering of any kind. (*Sidney: Astrophel & Stella*.)

**at-ti-r-íng**, s. [A.S. *attor*, *aterpoison*.] A shrew, a villain.

"Meekely thou him answer, and not as an attiring." —*Babees Book* (ed. Furnivall), p. 88.

\* **at-ti-tle** (tle = tel), v. f. [Lat. *attitulo*.] To entitle.

¶ Its place is now supplied by ENTITLE (q.v.).  
"This Arles out of the twelve Hath March attitled for hym selfe." —*Gower: Conf. Am.*, bk. 7.

**at-ti-túde**, \* **at-ti-tú-dó**, s. [In Sw. *attitud*; Fr. & Port. *attitude* = posture; Sp. *actitud*; Ital. *attitudine* = (1) aptness, fitness, (2) posture; Low Lat. *aptitudo*; from Class. Lat. *optus* = fitted, adapted. (A.P.T.) Whilst the signification aptness, fitness, suggests Low Lat. *aptitudo*, from Class. Lat. *optus* = fitted, adapted, the Sp. *actitud* points to Class. Lat. *actio* = doing, action, and to *actus* = an impulse, an act; from *actus*, pa. par. of *ago* = to drive, ... to do. The Ital. *attitudine* also is connected with Ital. *ato* = action, deed, which comes from the Lat. *actus*. (ACT.) Richardson and Mahn adopt the first of these ultimate etymologies; Johnson, Webster, and Wedgwood the second.]

1. The posture in which a person stands, or in which a human being or animal is represented in a painting or sculpture.

"They were famous originals that gave rise to statues, with the same air, posture, and attitudes." —*Addison*.

"Declining was his attitude." —*Byron: Siege of Corinth*, 12.

2. The posture or position of a nation, of a person's mind or heart, or even of inanimate things.

"... the attitudes assumed by idealists and sceptics." —*Herbert Spencer: Psychol.* (2nd ed.), vol. II, p. 312, § 385.

¶ Malone points out that in Evelyn's *Idea of the Perfection of Painting* (A.D. 1688), *attitudo* occurs instead of *attitude*, and even it is defined as being a word little known. (*Todd*.)

**at-ti-tú-din-al**, a. [Apparently from Ital. *attitudin(e)*, and Eng. suff. *-al*.] Pertaining or relating to attitude. (*Smart, Worcester*, &c.)

**at-ti-tú-din-ár-í-an**, s. [Apparently from Ital. *attitudin(e)*, and Eng. suff. *-arian*.] One who gives particular attention to attitudes. (*Galt, Worcester*, &c.)

**at-ti-tú-din-í-ze**, v. [Apparently from Ital. *attitudin(e)*, and Eng. suff. *-ize*.] To practise or assume attitudes.

"They had the air ... of figurantes, *attitudinising* for effect." —*De Quincey: Works*, vol. v, p. 158.

† **at-ti-tle** (tle = tel), s. [Cognate with ADDLE (q.v.).] (*Mahn*.)

**Mining:** Refuse or rubbish, consisting of broken fragments of the rock, rejected after examination as containing no ore worth extraction. (*Weale*.)

† **at-tól-lent**, a. & s. [Lat. *attolens*, pr. par. of *attollo* = to lift up; *ad* = to, and *tollo* = to lift up.]

**A. As adjective:** Lifting up, raising, elevating. (Used chiefly in Anatomy.)

"I shall farther take notice of the exquisite liberities of the *attolent* and deprimt muscles." —*Derham: Physico-Theol.*

**B. As substantive:**  
**Anat.:** A term applied to one of the muscles whose function is to raise any portion of the bodily frame.

\* **at-ton'ge** (once as *wúnce* [?]), adv. [Eng. *at*; *once*.] At once; together in place, or simultaneously in point of time. [ATTONE.]

"The mov'd with wrath, and shame, and Ladies sake, Of all *atonce* he cast a venged to be." —*Spenser: F. Q.*, I. v. 12.

\* **at-ton'e** (one as *wún*), adv. [O. Eng. *att* = at; and Eng. *one*.]

1. **Of proximity or identity in place:** Together, connected with; side by side.

"But what are you whom like unkeg attone? Hath linkt with me in the same chains attone?" —*Spenser: F. Q.*, IV. vii. 14.

"... as white seems layrer machit with hiecke attone." —*Ibid.*, III. ix. 2.

2. **Of proximity or identity in time:** At once; simultaneously.

"... and from one rest both life and light attone." —*Spenser: F. Q.*, III. v. 7.

"The warlike Dame was on her part assaid Of Claribell and Blandamour attone." —*Ibid.*, IV. ix. 30.

¶ FOR AT ONE as quite separate words, see AT ONE, ATONEMENT.]

\* **at-tó-ne-mént**, s. [ATONEMENT.]

**at-tór-n'**, \* **at-túr-n'**, v. t. & i. [O. Fr. *at-torner* = to direct, to dispose, to atturn; from *torner*, *tourner* = to turn; Ital. *attorniare* = to encompass, to enclose; *attorno* = about; Low Lat. *attornare*, *attorniare*, *attornare* = to commit business to another, to atturn; from Class. Lat. *ad* = to, and *torno* = to turn in a lathe, to round off; Gr. *ρότρον* (*toron*) = (1) a carpenter's tool, like our compasses, for drawing a circle, (2) a turner's chisel, a lathe chisel, (3) a circle. [TURN.]

**A. Transitive:**  
**Old Feudal Law or Custom:** "To transfer the feudal allegiance of a vassal, or the vassals generally, to a new lord on his obtaining an estate from his former possessor.

"In some cases a lord might *atturn* and assign his vassals services to some other; but he might not *atturn* him to his deadly foe." —*Saunders: Rights of the Kingdom*, p. 16.

**B. Intransitive:**  
1. **Old Feudal Law or Custom:** To profess to become the tenant of a new lord; that is, to give consent to one's landlord transferring his estate to another, and intimating one's willingness to become the tenant of the new proprietor.

"This consent of the vassal was expressed by what was called *atturning*, or professing to become the tenant of the new lord." —*Blackstone: Comment.*, bk. II, ch. 19.

2. **Mod. Law:** To agree to become tenant to a landlord to whom the estate on which one is located is about to pass by reversion. [ATTORNE.]

**at-tór-neý**, \* **at-túr-neý**, \* **a-túr-neý**, (pl. **at-tór-neýs**, **at-tór-nies**), s. [From O. Fr. *attorné*, *attorné*, *attourné*, pa. par. of *attorner*, *atturner*; Low Lat. *attornatus*, *attornatus*, pa. par. of *attorno*, *attorno* = to commit business to another; Lat. *ad* = to, and *torno* = to round off.] [ATTORN.]

**A. Ordinary Language:**  
\* **I. Formerly, in a general sense:** One appointed to act for another in important matters, and especially in those pertaining to law.

1. **Literally:**  
"Rich. Tell me, how fares our loving mother? Bran. I, by attorney, bless thee from thy mother, Who prays continually for Richmond's good." —*Shaksp.: Richard III.*, v. 2.

And I challenge law: *attorners* are devalued me; And therefore personally I lay my claim To my inheritance of free descent." —*Shaksp.: Richard II.*, II. 2.

2. **Figuratively:**  
"But when the heart's attorney once is mute, The silent breaks, as desperate in his suit." —*Shaksp.: Venus and Adonis*.

**II. Now. Spec.:** (In the same sense as B.)  
"He frequently poured forth on plaintiffs and defendants, barristers and attorneys, witnesses and jurymen, torrents of frantic abuse, intermixed with oaths and curses." —*Maccusay: Hist. Eng.*, ch. IV.

\* **B. Law:** One who managed any legal matters for another in a common law court; in this differing from a solicitor who practised in a court of equity. He corresponded to the procurator or proctor of the civilians and canonists. The attorneys were formed into a regular body, to which no new members were admitted, except those who had conformed to the regulations laid down in the Act 6 and 7 Vict., c. 73. By the Judicature Act of 1873, § 87, what were previously called *attorneys* are now denominated *solicitors* of the Supreme Court. In the United States, the term attorney-at-law is used for one who acts in the interest of another in matters of law, and takes the place of the several English and Scotch terms of advocate, attorney, barrister, counsellor-at-law, lawyer, proctor and solicitor. All these terms, except barrister, are used to a greater or less extent in this country, but as noted above, attorney-at-law is the general term in use.

**Letter or Power of Attorney:** A legal document by which a person appoints another to act for him in some particular matter, as to claim or receive a debt due to him. One who acts in consequence of being named in such a document is called a *private attorney*, and need not be a lawyer at all.

**bell**, **bóy**; **poút**, **jówl**; **eat**, **cell**, **ohorus**, **phín**, **bench**; **go**, **gem**; **thin**, **this**; **sin**, **as**; **expect**, **Xenophon**, **exist**, **-ing**.  
**-clan** = **shán**. **-clon**, **-tion**, **-ston** = **shún**; **-flon**, **-ston** = **zhún**. **-tious**, **-sious**, **-clous** = **shús**. **-ble**, **-dle**, &c. = **depl**, **depl**.

attorney-general, s.

\*1. Gen.: A lawyer permanently retained by a general commission.

"If you do wrongfully seize Hereford's rights, Call in the letters patent that he hath By his attorney-general to sue His livery, and deny his offer'd homage." Shakespeare: Richard II., II. 1.

2. Spec.: The highest legal functionary permanently retained, on a salary, to take the part of the Crown in any suits effecting the royal (by which is really meant the public) interest. In precedence, he ranks above the Solicitor-General. Under the United States government, the Attorney-General is a member of the President's Cabinet, and is at the head of the Department of Justice. Nearly all the states have attorney-generals, their duties being to serve as legal adviser of the executive and defender of the state government in case of suits at law.

Attorney-Generalship, s. The office or dignity of the Attorney-General. (Mon. Rev.)

† at-tōr-neŷ (pa. par. at-tōr-neyed, at-tōr-niéd), v. t. [ATTORNEY, s.]

1. To employ as one's deputy or proxy.

"As I was then Advertising and busy to your business, Not changing heart with habit, I am still Attorned to your service." Shakespeare: Measure for Measure, v. 1.

2. To perform an act by attorney, deputy, or proxy.

"... their encounters, though not personal, have been royally attorned with interchange of gifts, letters, loving embassies."—Shakespeare: Winter's Tale, I. 1.

at-tōr-ney-ship, s. [Eng. attorney, and suff. -ship.] The office of an attorney, in its full and more general sense; or, in the modern and specific one, of an attorney-at-law acting for one in a legal matter. [ATTORNEY, s.]

"Marriage is a matter of more worth Than to be dealt in by attorneyship." Shakespeare: 1 Henry VI., v. 1.

at-tōrn-ing, pr. par. [ATTORN.]

at-tōrn-mēt, s. [O. Fr. *attornement*; from Low Lat. *attornamentum*.] [ATTORN.]

Old Feudal Law: Consent given by tenants or vassals to a lord's alienating his estate. By the old feudal arrangements, both lords and tenants were supposed to have mutual obligations, so that the former could not sell his estates without the *attornment* or permission of the tenant, or the tenant transfer his land to another tenant without the lord's permission. But the lords very speedily managed to wriggle out of their part of the obligation, though for some time afterwards they succeeded in holding the tenants to their's. (Blackstone: Comment., bk. II., chaps. 5, 19.)

at-tōur, \*at-tōure, \*at-tō're, \*a-tō'ur, \*a-tō'ure, \*at-tū're (Old Eng. & Scotch), prep. & adv. [Fr. *atour* = round about; or Eng. *out*, over (pronounced rapidly and indistinctly).]

A. As preposition: Over, across, beyond, above, further onward than, exceeding in number, past. (Scotch.)

"Na, na, lad! O'd! she is, maybe, four or five years younger than the like o' me, by and atour her gentile havings."—Scott: Redgauntlet, Letter XII.

B. As adverb: Moreover.

¶ *Attour alquhere*: Anywhere, anywhither. (Scotch.) (Jamieson.)

"Attour, the king shall remain in thy government and keeping, till he come to perfect age."—Piscatorie, p. 13. (Jamieson.)

¶ *To go atour*: To remove to some distance. (Jamieson.)

To stand atour: To keep off. (Jamieson.)

By and atour: Besides all that, moreover, over and above.

"By and atour, the same few farm dooty allanerly."—A Charter on Birk Topog., vol. v. (Zetland), p. 71.

at-trāct', v. t. [Low Lat. *tracto*; from *tractum*, sup. of *trahō* = to draw to or towards; *ad* = to, and *trahō* = to draw. In Mod. Fr. *attirer*; O. Fr. *attracter*; Sp. *atraer*; Port. *atrahir*; Ital. *attharre*.]

I. Lit.: To draw any material substance to or towards another one, or exert an influence which, but for counteracting causes, would so attract it. [ATTRACTION.]

"The single atoms each to other tead, Attract, attracted to, the next in place Form'd and impelled its neighbour to embrace." Pope.

"The law of gravitation enunciated by Newton is, that every particle of matter in the universe attracts every other particle with a force which diminishes as the square of the distance increases."—Tyndall: Frag. of Science, 3rd ed., i. 5.

II. Figuratively:

1. To draw hearts by influences fitted to operate upon them; to allure.

"Adorn'd She was indeed, and lovely, to attract Thy love, not thy subjection." Milton: P. L., bk. x.

"This stipend, coupled with the hope of a pension, does not attract the English youth in sufficient numbers."—Macaulay: Hist. Eng., ch. III.

2. To arrest, to fix (applied to the mind or attention), to draw the notice of.

"The former is the error of minds prone to reverence whatever is old; the latter of minds readily attracted by whatever is new."—Macaulay: Hist. Eng., ch. VII.

"... to attract a large share of the public attention."—Ibid., ch. II.

\*at-trāct', s. [O. Fr. *attract*.] Attraction, gen. in pl. = charms, attractions.

"Feel darts and charms, attracts and flames, And woo and contract in their names." Hudibras.

at-trāct-a-bīl-i-tŷ, † at-trāct-i-bīl-i-tŷ, s. [Eng. *attract*; *ability*.] Capability of being attracted.

"There is a strong propensity, which dances through every atom, and attracts the minutest particle to some peculiar object; . . . thou wilt not find a corpuscle destitute of that natural attractibility."—Sir W. Jones: Tr. of Shtin and Perhad. (Asiat. Res., IV. 178.)

at-trāct'-a-ble, † at-trāct'-i-ble, a. [Eng. *attract*; *-able*.] That may be attracted. (Kerr, Lavoisier.)

at-trāct'-ēd, pa. par. & a. [ATTRACT, v.]

† at-trāct'-ēr, s. [ATTRACTOR.]

\*at-trāct'-ic, † at-trāct'-ic-al, a. [Eng. *attract*; *-ic*, *-ical*.] Possessing the power of drawing to or towards.

"Some stones are ended with an electrical or attractal virtue."—Ray on the Creation.

at-trāct'-ile, a. [Eng. *attract*; *-ile*.] Having the power to attract anything. (More commonly written ATTRACTIVE.) [ATTRACTIVE.]

at-trāct'-ing, pr. par. & a. [ATTRACT, v.]

"... especially if that thing upon which they look has an attracting virtue upon the foolish eye."—Bunyan: P. P., pt. II.

at-trāct'-ing-ly, adv. [Eng. *attracting*; *-ly*.] So as to exert attraction. (Todd.)

at-trāct'-tion, s. [In Ger. † *attraction*, † *attraktion*; Fr. *attraction*; Sp. *atraccion*; Port. *attractao*; Ital. *attrazione*.] All from Lat. *tractio*, from *trahō* = to draw together; *ad* = to, and *trahō* = to draw.]

A. Ordinary Language:

I. The act or power of attracting.

1. Lit.: The act of one material body in drawing another to or towards itself; also the power of doing so. [B.]

"... in so far as their orbits can remain unaltered by the attractions of the planets."—Herschel: Astron. (1858), § 564.

2. Fig.: The act or power of drawing a person by moral means to one's self; the power of alluring.

"... in his eye There is a fastening attraction which Fixes my fluttering eyes on his: my heart Beats quick; he awes me, and yet draws me near, Nearer, and nearer." Byron: Cain, I. 1.

II. The state of being attracted, either in a literal or in a figurative sense.

"Since Newton's time the attraction of matter by matter was experimentally established by Cavendish."—Atkinson: Ganot's Physics, § 58.

III. That which attracts, either in a literal or in a figurative sense; attractive qualities.

"... to female attractions."—Macaulay: Hist. Eng., ch. xxIII.

B. Technically:

I. Nat. Phil., or Universal Attraction: A force in virtue of which the material particles of all bodies tend necessarily to approach each other. It operates at whatever distances the bodies may be from each other, whether the space between them be filled with other masses of matter or is vacant, and whether the bodies themselves are at rest or are in motion. When they are not closely in contact, the attraction between them is called that of gravitation or of gravity.

It is of various kinds:—

(1) The Attraction of Gravitation or of Gravity is the operation of the above-mentioned attraction when the bodies acting and acted upon are not closely in contact. It is often called the Law of Gravity, or Gravitation, but the term Law in this case means simply generalisation. It states the universality of a fact, but does not really account for it. By this law or generalisation, the attraction between any two material particles is directly proportional to the product of their masses, and inversely proportional to the square of their distance asunder. [GRAVITY.]

"Thus the attraction of gravity at the earth's surface is expressed by the number 32, because, when acting freely on a body for a second of time, it imparts to the body a velocity of thirty-two feet a second."—Tyndall: Frag. of Science (3rd ed.), I. 10.

(2) Molecular attraction differs from the former in acting only at infinitely small distances. It ceases to be appreciable when the distances between the molecules become appreciably large. It is divided into COHESION, AFFINITY, and ADHESION (q. v.).

"And for the attraction of gravity substitute that of chemical affinity, which is the name given to the molecular attraction."—Tyndall: Frag. of Science (3rd ed.), I. 10.

Capillary Attraction (from Lat. *capillus* = a hair), meaning the attraction excited by a hair-like tube on a liquid within it, is, properly speaking, a variety of adhesion. [ADHESION, CAPILLARY.]

II. Chemistry. Chemical Attraction: The same as Chemical Affinity. [AFFINITY.] [See also I., 2.]

III. Magnetism. Magnetic Attraction: The power excited by a magnet or loadstone of drawing and attaching iron to itself.

IV. Electricity. Electrical Attraction: The power possessed by an electrified body of drawing certain other bodies to itself. The repulsions or attractions between two electrified bodies are in the inverse ratio of the squares of their distance. The distance remaining the same, the force of attraction or repulsion between two electrified bodies is directly as the product of the quantities of electricity with which they are charged. (Atkinson; Ganot's Physics.)

at-trāct'-ive, a. & s. [Eng. *attract*; *-ive*. In Fr. *attractif*; Sp. *attractivo*; Port. *attractivo*; Ital. *attractivo*.]

A. As adjective:

1. Lit.: Drawing, or having the power to draw to or towards. (Applied to the action of gravity, cohesion, &c., or material bodies.) [ATTRACT (q. v.).]

"... other stars, By his attractive virtue and their own Incited, dance about him various rounds Their wandering course now high, now low, then hid, Progressive, retrograde, or standing still." Milton: P. L., bk. VIII.

"The reason of this stability is that two forces, the one attractive and the other repulsive, are in operation between every two atoms."—Tyndall: Frag. of Science (3rd ed.), x. 281.

2. Fig.: Drawing the mind or heart; allure.

(a) Chiefly by physical beauty. Hence an "attractive" female as a rule means a beautiful one. The term may be applied, in an analogous sense, to the inferior animals.

"... successive males display their gorgeous plumage and perform strange antics before the females, which, standing by as spectators, at last choose the most attractive partner."—Darwin: Origin of Species (ed. 1859), ch. IV., p. 89.

(b) Chiefly by mental or moral graces, or by both combined.

"... and with attractive graces won The most averse, these chiefly..."

Milton: P. L., bk. II.

B. As substantive: That which draws; an attraction, an allure.

"The condition of a servant staves him off to a distance; but the gospel speaks nothing but attractive and invitation."—South.

at-trāct'-ive-ly, adv. [Eng. *attractive*; *-ly*.] In an attractive manner. (Johnson.)

at-trāct'-ive-ness, s. [Eng. *attractive*; *-ness*.] The quality of being attractive.

"... the same attractiveness in riches."—South: Works, vol. VII., Ser. 14.

at-trāct'-ōr, at-trāct'-ēr, s. [Eng. *attract*; and suffixes *-or*, *-er*.] One who or that which attracts.

"... and meet prevalent attracter, the earth"

Derham: Physico-Theol., bk. I., ch. 8.

"If the straws be in oil, amber draweth them out; all makes the straws to adhere so that they cannot rise unto the attractor."—Browne: Vulgar Errors.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, quīte, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = é. ey = ä, qu = kw.

at-tra-hent, a. & s. [In Fr. attrayant, attirant; Port. atrahente; all from Lat. attrahens, pr. par. of atraho = to draw or towards: ad = to, and traho = to draw.]

A. As adjective: Drawing to or towards.

B. Substantive:

1. Gen.: That which draws to or towards. "Our eyes will inform us of the motion of the steel to its atrahent."—Glanville: Scopis. "2. Specially. Old Med.: An external application, which was formerly supposed to draw the humours to the part of the body on which it was put. It is now known that the action, easily excited, is that of the part itself. Sinapisms, rubefacients, &c., fall under the category.

\* at-tráp (1), v.t. [From Lat. ad, and Eng. trap (q.v.). In Sw. drapera; Fr. draper = to line with cloth, especially with black cloth; to drape; drap = woollen cloth, stuff, sheets; Sp. and Port. trapo = a rag, tatter, clout, cloth; a suit of sassa; ragged people; Low Lat. trapus = cloth; trappatura = trappings.] [DRAPE, TRAP, TRAPPINGS.] To clothe, to dress.

(a) In ornate style.

"Attrapped royally; 'Instratus ornatu regio.'"—Baret: Alcearis.

(b) In plebeian fashion.

"... all his stool With caken leather atrapp'd, yet seemed fit For savage wight..."—Spenser: F. Q., IV, iv. 29.

\* at-tráp (2), v.t. [From Fr. attraper = to catch, to seize, to deceive, to trick.] To entrap.

"... he was not atrapped eyther with net or snare."—Grafton: Henry VIII., an. 17. (Richardson.)

\* at-tráp ped (1), \* at-trápt, pa. par. [AT-TRAP (1)]

\* at-tráp ped (2), pa. par. [ATTRAP (2)]

át-tréo-tá-tion, s. [Lat. attractio, from attraho = to touch, to handle: ad = to, and traho = to drag about; freq. from traho = to draw.] The act of handling frequently: the state of being frequently handled. (Johnson.)

\* át-trí, \* át-tré-a, a. [ATTRY.]

át-tríb'-u-ta-ble, a. [Eng. attribut(e), -able; Fr. attribuable.] That may be attributed, ascribed, or imputed to.

"The errors which were almost entirely attributable to carelessness in the adjustments."—Hooker: Himalayan Journals, vol. II, Appendix I.

át-tríb-úte, \* át-trí-búte, v.t. [In Fr. attribuer; Sp. atribuir; Port. atribuir; Ital. attribuire; Lat. attribuo: ad = to, and tribuo = to distribute, grant; tribus = the third part of the Roman people, hence a tribe.]

1. Of persons: To ascribe to, to impute; to consider as having been done by one.

(a) That which is ascribed to one being good or indifferent.

"Little as either the intellectual or the moral character of Blount may seem to deserve respect, it is in a great measure to him that we must attribute the emancipation of the English press."—Macaulay: Hist. Eng., ch. xix.

(b) That which is ascribed being bad.

"... the treason of Godolphin is to be attributed altogether to timidity..."—Macaulay: Hist. Eng., ch. xvii.

2. Of things: To ascribe to, as when a certain effect is ascribed to a particular cause.

"I now admit... that in the earlier editions of my 'Origin of Species' I probably attributed too much to the action of natural selection, or the survival of the fittest."—Darwin: Descent of Man, pt. I, ch. iv.

"In one place, as Nares remarks, Spenser accents the verb attribute on the first syllable, like the substantive.

"Right true: but faulty men use oftentimes To attribute their folly unto fate."

Spenser: F. Q., V, iv. 28.

In another, however, he does so on the second, as is now universally done.

"Ye may attribute to yourselves as kings."

Ibid., I, Cant. on Mucab., st. 49.

át-trí-búte, s. [In Sw. Dan., Ger., & Fr. attribut; Sp. atributo; Port. & Ital. attributo; from Lat. attributus, pa. par. of attribuo.]

A. Ordinary Language:

1. That which is attributed, ascribed, or imputed to any person or thing, as an essential characteristic of him or it. A characteristic quality of any person or thing.

"Reflect his attributes, who placed them there."

Cowper: Tirocinium.

2. That which is symbolic of one's office or character, or of anything. [B., 2.]

"A crown, an attribute of sovereign power." Wordsworth: Excursion, bk. v.

3. Honour, reputation.

"The pith and marrow of our attribute." Shakspeare: Hamlet, I, 4.

B. Technically:

1. Logic: That which is predicated of any subject; that which may be affirmed or denied of anything. Sir William Hamilton divides attributes into Primary, Secundo-primary, and Secondary. Herbert Spencer, objecting that these words have direct reference to the Kantian doctrines of Space and Time, from which he dissents, and that they are in another respect inaccurate, divides attributes into Dynamical, Statico-dynamical, and Stetical (q.v.). (Herbert Spencer: Psychol., 2nd ed., vol. II, p. 136, § 317.)

2. Painting and Sculpture: That which is represented with one as being symbolical of one's office or character. Thus the trident is the attribute of Neptune. [A., 2.]

at-trib-ú-téd, pa. par. [ATTRIBUTE, v.]

at-trib-ú-tíng, pr. par. [ATTRIBUTE, v.]

át-trí-bú-tion, s. [In Fr. attribution; Port. atribuição; Ital. attribuzione; Lat. attributio = (1) the assignment of a debt; (2) an attribute.]

1. The act of attributing or ascribing anything; the state of being ascribed.

"... in the attribution and distribution of which honour, we see, activity made this difference."—Bacon: Adv. of Learn., bk. I.

2. That which is ascribed. Spec., commendation, honour.

"Hec. Well said, my noble Scot; if speaking truth, In this fine age, were not thought flattery, Such attributions should the Douglas have." Shakspeare: I Henry IV., iv. 1.

at-trib-ú-tive, a. & s. [Eng. attribute; -ive. In Fr. attributif; Port. attributivo.]

A. As adjective: Attributing.

"And the will does that is attributive." Shakspeare: Troilus and Cressida, II, 2.

B. As substantive (Gram.): A term introduced by Harris to designate words which are significant of attributes. He classifies them as Attributes of the first order, or those which are attributes of substances, namely, Adjectives, Verbs, and Particles; and Attributes of the second order, or those which denote the attributes only of attributes—namely, Adverbs.

"Proper subjects of the attributives good and bad."—Bouring: Bentham's Works, vol. I, p. 216.

at-tríst, v.t. [Fr. attrister.] To sadden. (Walpole: Letters, III, 382.)

at-tríte, a. [Lat. attritus, pa. par. of attero = to rub st., towards, or against: ad = to, and tero = to rub.]

I. Ordinary Language: Rubbed; subjected to the action of friction. (Milton: P. L., X, 1,073.)

II. Roman Catholic Theology: Sorry for having committed sin, but solely on account of the punishment associated with it.

at-tríte-ness, s. [Eng. attrite; -ness.] The quality of being rubbed away or worn down by friction. (Dyche.)

at-trí-tion, \* at-trýc-ý-ón, s. [In Fr. attrition; Ital. attrizione; Lat. attritio.]

1. Ord. Lang. & Nat. Science: The act or process of rubbing down or away; abrasion; the state of being rubbed away. (Used of rocks, teeth, &c.)

"If this great bed of pebbles, without including the mud necessarily derived from their attrition, was piled into a mound, it would form a great mountain chain."—Darwin: Voyages round the World, ch. VIII.

"... the posterior concavity having been smoothly deepened by attrition."—Owen: British Fossil Mammals and Birds, p. 2.

2. Roman Catholic Theology: Sorrow for having committed sin, not, however, through hatred of the sin itself, but merely on account of the punishment brought in its train. It is considered the lowest degree of repentance.

"He the whyche hath eot playne contrycyon, but onely attrycyon, the whyche is a maner of contrycyon mpyartye and unadveysyng for to have the grace of God."—Institution of a Christian Man, p. 162.

\* át-trý, \* át-tér-ý, a. [A.S. attor, atter, ator, ater = poison, venom.] Venomous.

"That the attri heorte vent up to the tuge."—MS. Cott., Nero, A. xiv., f. 21. (In Boucher.)

\* at-trýc-ý-ón, s. [ATTRITION.]

at-tú'ne, v.t. [Lat. ad, and Eng. tune.]

I. Literally:

1. To tune to; to render one musical instrument or one sound accordant with another one.

2. To render musical.

II. Fig.: To render accordant. (Applied to human hearts, the passions, &c.)

"Social friends,"

Attun'd to happy unison of soul." Thomson: The Seasons; Summer.

"... but harmony itself,

Attuning all their passions into love." Ibid., Spring.

at-tú'ned, pa. par. & a. [ATTUNE.]

at-tú-n-ing, pr. par. [ATTUNE.]

\* at-two (two as tú), adv. [Eng. a; two.] [ATWO.]

\* a-tún, s. A fish, the Thyristes atun, belonging to the family of Trichiuridae, or Hair-tailed fishes. It feeds voraciously on the calamary, is found in the ocean near Southern Africa and Australia, and is prized for the delicacy of its flesh.

\* a-tú'o, adv. [ATWO.]

\* a-twá'ín, \* a-twá'ine, \* a-twí'ne, \* a-twý'ne, \* a-twý'ne (ay as wi), adv. [Eng. a; twain (q.v.).] In twain, in two; asunder, apart. (Lit. & fig.)

"He scodred the Sarazins caryens, and fought as a dragon."—A. Bruuna, p. 184. (Richardson.)

"I will not that this compaignye parten a-tweyne." Chaucer: C. T., 313.

"Fleesch and veines nou seo a-twines,

Wherfore I redde of routhe." Mary and the Cross (ed. Morris), 14, 17.

"Tearing of papers, breaking rings a-twain." Shakspeare: A Lover's Complaint.

"Edged with sharp laughter, cuts atwain The knots that tangle human creeds." Tennyson: To —

a-twé'el, adv. [Eng. at = wot; weel = well, or it may possibly be a corruption of awel.] I wot well. (Scotch.) (Scott: Old Mortality, ch. xxxviii.)

\* a-twé'en, \* a-twé'ene, \* a-twé'ne, adv. & prep. [Eng. a; twain.] [ATWAIN, TWAIN. Cf. also BETWEEN.] Between.

"The form ATWENE is now obsolete.

"From her faire eyes wiping the dewy wet Which softly stild, and kissing them atwene." Spenser: F. Q., IV, vii. 35.

"In English the form atween is obsolete in prose, but is employed in poetry. In Scotch it is still used colloquially.

"It was, I wene, a lovely spot of ground; And there a season atween June and May." Thomson: Castle of Indolence, I, 2.

"Low-tinkled with a bell-like flow Atween the blossoms." Tennyson: Song.

"... we'll guide him atween us..."—Scott: Antiquary, ch. xv.

\* a-twé'esh, prep. [ATWIXT.] (Scotch.)

\* atwend, v.t. [A.S. at, denoting opposition; wendan = to go.] [WEND.] To turn away.

"Hoo mai hire gult atwende." Huls and Nightingale, 1, 415.

\* atwindan, \* atwínde, v.i. & t. [A.S. atwindan.]

A. Intrans.: To depart, to go away, to cease.

B. Trans.: To escape from (with dative).

\* a-twín'ne, adv. [ATWAIN.]

\* a-twíst (O. Eng.), \* a-twé'esh (Scotch), a. [Eng. a; twist (q.v.).] Twisted. (Seager, Reid, & Worcester.)

\* a-twíte, \* a-twí-tén, v.t. [A.S. atwitan.] To twit, to reproach, to blame for, to upbraid.

"Thig most slanderous thir nobles to atwite." Chaucer: Certain Ballades, 1, 666. (Boucher.)

\* a-twíxt, \* a-twýx, \* a-twýx-ýn (O. Eng.), \* a-twé'esh (O. Scotch), prep. [Old form of Eng. betwixt. From A.S. a; and tweah = two.] [TWO, BETWIXT.] Betwixt.

"With that an hideous storm of wíed arose,

With dreadful thunder and lightning atwíxt." Spenser: F. Q., III, xii. 2.

"Atweesh themselves they best case their pain." Shakspeare: Poems, p. 38. (Jamieson.)

\* a-twó', \* at-twó', \* a-tu'o (two and tu as tú, or as twó, see the first example), \* a-twé', adv. [Eng. a = in, two.] Into two, in two; asunder, in twain.

ból, bóy; pòut, jòwí; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -tious, -sious, -cious = shüs. -ble, -dle, &c. = bəl, dəl.

"Right as a sword for-katteth and for-kereth  
An arm atuo, my dear sone, right so  
A touge cutteth frendship al atuo."  
Chaucer: C.T., 17, 374-4.

\* **atwond'**, *pret. of v.* [ATWINDAN.]

**At-wood's ma-chine'**, *s.* [See def.]

**Physics:** An apparatus invented by Mr. George Atwood (1745-1807) to illustrate the theory of accelerated motion. It consists of a wooden column about ten feet high, resting on a base and supporting a series of anti-friction wheels, which support a large central roller, over which passes a cord having equal weights at each end, so as to be in *equilibrium*. By means of a graduated staff at one side the rise of one weight and fall of the other are indicated in feet and inches. A small additional weight, being added to one of the large weights, causes it to descend with a velocity due to its excess of gravity over the other. The constant acceleration of speed in a falling body can also be shown and measured.

\* **a-twōt'**, *pret. of v.* (as if from \***a-twīte** = to go away). [A.S. *æt* = at, and *witan* = to depart.]

\* **a-twýnne**, *adv.* [ATWAIN.]

**a-tý-a**, *s.* [From *Atys*; Gr. *Ἄτις* (*Atis*) = the name of several persons mentioned in classic history or mythology. The most notable was an effeminate and foppish youth, killed by Tydeus in the Theban war.] The name given by Leach to a genus of decapod long-tailed crustaceans.

**a-tý-íc, a-týp-íc-al**, *a.* [Gr. *ά* (*a*), *priv.*, and *τύπος* (*typos*) = a model, type.]

1. Possessing no distinct typical characters.
2. Producing loss of typical characters.

**a-týp-íc-al-ly**, *adv.* [Eng. *atypical*; *-ly*.] In an atypical manner.

**át-ý-pūs**, *s.* [Gr. *ά*, *priv.*, and *τύπος* (*typos*) = . . . a type. Not typical.] A genus of spiders belonging to the family Mygalidæ. The *A. solzeri* excavates in the ground, to the depth of seven or eight inches, a cylindrical tube, which it lines with silk. It is found in France.

\* **a-tý-zar**, *a.* [Corrupted Arabic.]

**Astrol.:** Inflamed; angry (?). A technical word of old applied to the planet Mars. (R. Bell, in the *Glossary to his edition of Chaucer*.)

**Au**, [The first two letters of Lat. *aurum* = gold.]

**Chemistry:** The symbol for *aurum* = gold. [AURUM, GOLD.]

**án, ô, ôu**, *interj.* [Dan. *au* = oh, expressive of pain.]

**A.** *Of the form au:* An exclamation expressive of surprise.

**B.** *Of the forms an in Aberdeenshire, and o or on in the southern counties of Scotland:* An exclamation expressive of surprise.

**auale**, *v.i.* [AVALLE.] To descend. (Douglas: *Virgil*, 150, 41.)

\* **aualk**, *v.* [A.S. *awæccan* = to awake (?).] To watch. (O. Scotch.)

\* **ân-ant**, *a.* [AUAUNT.] (O. Scotch.)

**ân-ba'de**, *s.* [Fr.] Open-air music performed at daybreak before the door or window of the person whom it is intended to honour.

**ân-bâinc**, *s.* [Fr. *aubaine* = an escheat to the crown; from *aubain* = a stranger not naturalised. From Lat. *alibi* = elsewhere, and suff. *-anus*. Comp. also *alienus* = an alien.]

**Droit d'aubaine, or Jus albinatus:** A so-called right which the King of France formerly possessed to seize the goods of any alien dying within his dominions, unless the person deceased had in his lifetime been formally promised an exemption from the operation of the law. (Blackstone: *Comment.*, bk. i., ch. 10.)

¶ The natural effect of this unjust and absurd law was to prevent foreigners from settling in France, and thus to deprive the king and the country of all assistance from intellect not of native growth. It was repealed in 1819.

**âube**, *s.* [ALB.]

**ân-börge**, *a.* [Fr.] An inn; a place of entertainment for travellers.

"At the *auberge* near the foot of the Rhone glacier, . . ."—Tyndall: *Frag. of Science*, 3rd ed., ii., 32.

**âu-bör-gine**, *s.* [Fr.] A name for the fruit of a species of *Solanum*.

"That of *Solanum lycopersicum* and *melongena* is served at table in various forms, under the name of Tomatoes and Aubergines.—London: *Encyclop. of Plants* (1829), p. 1,078.

**âu-bin**, *a.* [Fr., from O. Fr. *hobin*, cog. with Eng. *hobby* (q.v.).]

**Horsemanship:** A gait or movement of a horse intermediate between a gallop and a trot or amble; what is generally called a "Canterbury gallop."

**âu-bürn, \*â-bürn, \*â-bürne, \*ân-börne, \*â-brön, \*âl-bürn**, *a.* [Webster and Richardson connect this with A.S. *bernan*, *bernan* = . . . to burn; *bryne* = a burning; Ger. *brennen* = to burn, with which the form *abron* seems akin. On this hypothesis auburn hair would be of a colour like that produced by burning, viz., brown. (Brown.) But the form *alburn*, which occurs in Skinner's and Johnson's Dictionaries, points to the Ital. *alburna* = a white hazel-tree; Lat. *alburnus* = a white fish, the Bleak or Blay; *albus* = dead white, not dazzling white (ALBURNUM); in which case, auburn hair must originally have signified white instead of brown hair. Nahn and Wedgwood adhere to this latter etymology. According to the *Promptorium*, *awburne* colour = *citrinus*—i.e., a pale yellow colour.] A term used chiefly of hair.

\* 1. Originally: White (?). (See etym.)

2. Now: Brown, with a tinge of red or russet. (Byron: *Corsair*, il. 2.)

**A.U.C.** A contraction for *Anna urbis conditæ* = in the year of the city founded, i.e., from the foundation of the city of Rome.

**âu-chan, a-chan**, *a.* [Deriv. uncertain. Probably from some obscure place.] A kind of pear. (Scotch.)

**âu-chê-ni-a**, *a.* [Gr. *αὐχῆν* (*auchēn*) = the neck.] A genus of Mammalia of the order Euminantia and the family Camelidæ. It includes the Llamas, which are the American representatives of the Camels so well known in the Eastern world. They have no dorsal humps, and their toes are completely divided. There are about four species of *Auchenia*: the *A. guanaco*, or Guanaco (GUANACO); the *A. glama*, or LLAMA; the *A. paco*, the Páco or Alpaca (ALPACA); and the *A. vicuña*, or Vicugna (VICUGNA).

\* **âucht**, *v.t.* [AUCHT.]

\* **âucht**, *s.* [AUCHT.]

\* **âucht**, *a.* [AUCHT, EICHT.] (Scotch.)

**âucht, âught, âwcht** (*ch* & *gh* guttural), *pret. of verb.* [In Scotch *aw* = to possess, to owe; from A.S. *ahh*, *ahle*, *ahle*, *pret. of agan* = to own.] [AOH.]

1. Possessed; owned. (Scotch.) [AUCHT.]

"Of kyng, that *aucht* that rewte,  
And mast had rycht thare kyng to be."  
Wynoun, viii., 2, 2. (Jamieson.)

2. Owed; was indebted; ought.

"For lawe or than for threite  
Of fors, he mist pay as he *aucht*."  
Higynous, v., 3, 29. (Jamieson.)

**ân oû-rant** (*ant* as *âng*), *a.* or *adv.* [Fr. *au* = to, in, the, with; the; *courant* = current, running stream, course, way, custom, progress.] "In the current" of progress with regard to anything; well informed with respect to everything which is being said or done in connection with it.

\* **âuc-ta-ry**, *a.* [From Lat. *auclorium* = an addition, an overweight; *auclum*, *supine of augeo* = to increase.] Increase, augmentation. (O. Scotch.)

"An large *auclery* to the library."  
Crawford: *Univ. Edin.*, p. 137.

\* **âuc-tên-tý**, *a.* [AUTHENTIC.] (O. Scotch.)

\* **âuc-tër**, *a.* [ALTAR.] Altar.

"He made an *aucler* on Oodes name."  
Story of *Gen. & Exod.* (ed. Morris), 925.

**âuc-tion**, *s.* [In Sw. & Ger. †*auktion*; Dan. *auktion* = an auction; from Lat. *auclio* = (1) an increasing, (2) an action; *augeo* = to cause to increase.]

1. The public disposal of goods to the highest bidder. None but those who have taken out an auction licence are at present allowed to conduct such sales. To ascertain who the

highest bidder is, two leading processes may be adopted. The goods may be put up at a low figure, and then competitors for them, bidding against each other, will raise this to a higher price. This is what is generally done in this country. In what is called a "Dutch auction," however, the process is reversed. The goods are put up at a price much above their value, and gradually lowered till a bid is given for them, and they are then forthwith knocked down to him from whom it proceeded.

"Then followed an *auclion*, the strangest that history has recorded."—Macaulay: *Hist. Eng.*, ch. vii.

2. The goods sold by auction.

"Ask you why Phine the whole *auclion* buys?  
Phine foresees a general excise."—Pope.

**auclion-catalogue**, *s.* The catalogue of the goods to be disposed of at an auction.

**auclion-mart**, *a.* A place where goods are sold by public auction.

**auclion-room**, *s.* A room used temporarily or permanently for the disposal of goods by public auction.

† **âno-tion**, *v.* [From the substantive.] To sell (goods) by auction.

**âuc-tion-ary**, *a.* [Eng. *auclion*; *-ary*.] Pertaining to an auction.

"Add much more honest, to be hir'd, and stand  
With *auclionary* hammer in thy hand."

"Provoking to give more, and knocking shence  
For the old household stuff, or picture's price."  
Burdan: *Juvenal*.

**âuc-tion-er**, *s.* [Eng. *auclion*; *-er*.] A person whose occupation it is to sell goods by auction.

"Even the *auclioneer* was always a character in the drama."—De Quincey: *Works* (ed. 1853), li. a

**âuc-tion-er**, *v.t.* [From the substantive.] To dispose of goods by auction.

"Estates are landscapes, gazed upon awhile,  
Then advertised, and *auclioner'd* away."  
Cowper: *Task*, bk. III.

**âuc-tion-ered**, *pa. par.* [AUCTIONER, *v.*]

**âuc-tion-er-ing**, *pr. par. & adj.* [AUCTIONER, *v.*]

† **âuc-tive**, *a.* [From Lat. *auclus*, *pa. par. of augeo*.] Increasing. (Johnson.)

\* **âuc-tor-ý-té**, *s.* [Fr. *autorité*.] Authority. ". . . and certes rightly may ye take no vengeance, as of your owne *auclorté*."—Chaucer: *Tale of Melibeu*.

\* **âuc-tour**, *s.* [AUTHOR.]

**âu-ôu-ba**, *s.* [Japanese name.] A genus of plants belonging to the order Conaceæ, or Cornelæ. The only known species is *A. Japonica*, a well-known evergreen, with leaves like those of the laurel in form and mottled with yellow. It grows in British gardens.

**âu-ôu-pâ-tion**, *s.* [Lat. *auclupatio*; from *auclupor* = to go a bird-catching; *auclup*, *contr. for auclup* = a bird-catcher; *avis* = bird, and *capio* = to take.] Bird-catching; fowling. (Johnson.)

**âu-dâ-clous** (*clous* as *shūs*), *a.* [From Fr. *audacieux*; Sp. & Port. *audaz*; Ital. *audace*.] Lat. *audax*; from *aucléo* = to dare, to venture.] Adventurous, bold, daring, spirited.

† 1. In a good or an indifferent sense: Brave; valiant.

"Audacious Hector! if the gods ordain  
That great Achilles rise and rage again,  
What toils attend thee, and what woes remain!"  
Pope: *Homers Iliad*, bk. x., 114-120.

2. In a bad sense:

(a) *Of persons:* Bold, impudent; with shameless effrontery; with contempt for law, human and divine.

"Of the members of the House of Commons who were animated by these feelings, the fiercest and most audacious was Howe."—Macaulay: *Hist. Eng.*, ch. xiv.

(b) *Of conduct:* Proceeding from and indicating boldness in a bad sense; and the offspring of shameless effrontery.

"Such is thy *audacious* wickedness,  
Thy low, pestiferous and dissolutious prank."  
Shakespeare: *1 Henry VI.*, iii. 1.

**âu-dâ-clous-ly** (*clous* as *shūs*), *adv.* [Eng. *audacious*; suff. *-ly*.] In an audacious manner; boldly, impudently. (Shakespeare: *Love's Labour's Lost*, v. 2.)

**âu-dâ-clous-ness** (*clous* as *shūs*), *s.* [Eng. *audacious*; *-ness*.] The quality of being audacious; boldness, impudence, audacity. (P. Holland: *Livy*, p. 458.)

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pine, pît, sire, sir, marine; gô, pôt, er. wôre, wôlf, wôrk, whô, sôn; müte, oüb, cüre, unite, cür, rüle, füll; trý, Sýrian. æ, œ = é. ey = ä. qu = kw.

au-dāc-y-ty, s. [From Lat. audax, genit. of audax = audacious, bold, and Eng. suff. -ity.] In Fr. *audace*; Port., Ital., & Lat. *audacia*.] Capacity for doing daring deeds.

1. In a good, or at least in an indifferent sense: Courage, daring, valour, gallantry.

"Another lawyer of more vigour and audacity."—*Macaulay: Hist. Eng.*, ch. iv.  
2. In a bad sense: Hardhood, effrontery, impudence; capability of boldly doing deeds involving contempt for law, human and divine.

au-dō-an-izm, au-dō-an-izm, au-dī-an-izm, s. [From *Audæus* or *Audius*, a native of Mesopotamia, who lived in the fourth century. He became a Syrian bishop; but having incurred odium among his brethren for censuring their avarice and luxury, he was banished to Scythia.] The followers of the Audæus or Audius mentioned above, who was said to have held the anthropomorphic view, founded on Gen. i. 26, 27, that God had a body in the image of which that of man was created. [ANTHROPOMORPHITE.]

au-dī-hil-y-ty, s. [From Low Lat. *audibilis*; and Eng. suff. -ty.] Audibleness; capability of being heard. [*Journal of Science*.]

au-dī-ble, a. & s. [In Ital. *audibile*; from Low Lat. *audibilis* = audible; *audio* = to hear. Cognate with Gr. ἀκούω (*akouō*) = to utter sounds, to speak, and ἀκοή (*akōē*) = this human voice; from the root *aud* or *aus*, in Sansc. *vad* = to speak; also with Gr. οὖς (*ous*), genit. ὠτός (*ōtōs*) = an ear.] [E.A.R.]

A. *As adjective*: Which may be heard; loud enough to be heard; actually heard.

"His respiration quick and audible."—*Fordworth: Excursion*, bk. viii.

† B. *As substantive*: Anything which may be heard or which is heard.

"... and of articulate voices, tones, songs, and quaverings, in audibles."—*Bacon: Nat. Hist.*, Cent. iii., § 238.

au-dī-ble-ness, s. [Eng. *audible*; -ness.] The quality of being able to be heard; audibility. [*Johnson*.]

au-dī-ble, adv. [Eng. *audible*(e); -ly.] In an audible manner. So as to be heard.

"Main ocean, breaking audibly."—*Wordsworth: View from the Top of Black Com.*

au-dī-ence, s. [In Sw. *audienz*; Ger. *audienz*; Dan. & Fr. *audience*; Sp. & Port. *audiencia*; Ital. *audiencia*, *audiencia*; all from Lat. *audientia*.]

A. *Ordinary Language*:

1. The act or opportunity of hearing; hearing, listening; attention.

"Let thine handmaid, I pray thee, speak in thine audience."—*1 Sam.* xxv. 24.

To give audience is to give ear, to listen, to attend.

"Men of Israel, and ye that fear God, give audience."—*Acts* xiii. 16.

II. The state or opportunity of being heard, listened to, or attended to.

1. In a general sense:

"Unhappily sarcasm and to evective directed against William were but too likely to find favourable audience."—*Macaulay: Hist. Eng.*, ch. xi.

2. *Spec.*: A formal interview granted to important personage, particularly to an ambassador presenting his credentials or making a communication to a sovereign; also a private interview with a monarch given to a court favourite.

"This was the state of affairs when, on the next day (the 2nd), Lord Augustus Loftus was admitted to an audience."—*Times*, Nov. 24, 1876.

"He was every day summoned from the gallery into the closet, and sometimes had long audiences while peers were kept waiting in the ante-chambers."—*Macaulay: Hist. Eng.*, ch. iv.

III. The person or persons hearing, listening, or attending.

Gen.: An assemblage of hearers; an auditory.

"... still govern thou my song, Urania, and sit audience thou, though few."—*Milton: P. L.*, bk. vii.

"The king meanwhile surveyed his audience from the throne with that bright eagle eye which nothing escaped."—*Macaulay: Hist. Eng.*, ch. xv.

B. *Technically*:

1. In England: The same as AUDIENC-COURT (q. v.).

"None to be cited into the arches or audience, but dwellers within the archbishop's diocese or penitentiary."—*Const. & Canons Eccl.*, § 4.

2. In Spain: One of the seven supreme courts.

3. In Spanish America before it became independent: The supreme court of justice and its jurisdiction.

"... as little as the aboriginal population of Darce regarded the authority of the Spanish Viceroys and Audiencias."—*Macaulay: Hist. Eng.*, ch. xxiv.

audience-chamber, s. A chamber in which formal audiences are granted.

"He summoned all the princes now resident in this court to appear before him in the great audience-chamber."—*Translation of Boccacini* (1826), p. 24.

audience-court, s. A court belonging to the Archbishop of Canterbury. Being accustomed formerly to hear causes extra-judicially in his own palace, he usually requested that difficult points should be discussed by men learned in the law, called *auditors*, whence ultimately sprung up by slow degrees a court held to have equal authority with that of Archa, though inferior to it both in dignity and antiquity. The audience-court is now merged in the Court of Arches, the duties of its former presiding officer being discharged by the Dean of the Arches.

\* au-di-ent, s. [Lat. *audiens*, pr. par. of *audio* = to hear.] A hearer.

"The audients of her sad story felt great motions both of pity and admiration for his misfortune."—*Shelton: Transl. of Don Quixote*, lv. 2.

au-di-om-ē-t-ōr, au-dim-ē-t-ōr, s. [Lat. *audio* = to hear, and Gr. μέτρον (*metron*) = measure.] An instrument devised by Prof. Hughes, the inventor of the microphone, and described by Dr. Richardson at a meeting of the Royal Society in 1879. Its object is to measure with precision the sense of hearing. Among its constituent parts are an induction coil, a microphone key, and a telephone.

au-di-om-ē-t-ric, a. [Eg. *audiometer*; -ic.] Pertaining to or connected with audiology.

au-di-om-ē-t-ry, s. [Eng. *audiometer*; -y.] The act or practice of testing the acnes of hearing, by means of the audiometer (q. v.).

au-di-ō-phonē, s. [Lat. *audio* = to hear, and Gr. φωνή (*phonē*) = a sound.]

*Acoustics*: An instrument which enables deaf mutes to hear, and by which they can be taught to speak. A triangular plate of hardened caoutchouc, very sensitive to sound vibrations, is its essential part. The patient, holding the audiphone, places the upper edge against his upper teeth; the sounds are gathered and conveyed to the auditory nerve by the teeth, and not by the tympanum.

au-dīt, s. [Lat. *auditus* = a hearing.]

1. The examination of an account by persons appointed to test its accuracy, by comparing each item with vouchers, adding up each page, and at last authoritatively stating the amount owing or at credit. (Used literally or figuratively.)

"Yet I see make my audit up, that all From me do back receive the four of all, And leave me but the bran."—*Shaksp.: Coriolanus*, I. 1.

"To steal from spiritual leisure a brief span, To keep your earthly audit."—*Ibid.: King Henry VIII.*, III. 2.

2. The account as thus tested and verified. (Used lit. or fig.)

"He took my father grossly, full of bread, With all his crimes broad blown, and flush as May; And how his audit stands who knows save heav'n?"—*Shaksp.: Hamlet*, III. 3.

audit-house, s. A house appendant to most cathedrals, and designed for the transaction of business connected with them.

"The church of Canterbury (till within this two or three years) had the morning-prayers at seven or eight of the clock in the morning; the sermon at ten in the audit-house; and then the rest of the communion-service, and the communion, in the choir."—*Str. O. Wheeler: Soc. of Churches*, p. 116.

audit-office, s. The office in which the public accounts of the empire are audited.

au-dīt, v. t. & i. [AUDIT, s.]

A. *Transitive*: To certify to examine (the account of another person), and formally and authoritatively certify to (its) accuracy.

"Bishops' ordinaries, auditing all accounts, take twelve pence."—*Ayliffe: Parergon*.

B. *Intransitive*: To ascertain and certify the accuracy of an account.

"I love exact dealing, and let Horus audit; he knows how the money was disbursed."—*Arbutnot*.

au-dī-tion, s. [In Fr. *audition*; from Lat. *auditio*.] Hearing. (*Walpole: Letters*, II. 333.)

au-dī-tive, a. [In Fr. *auditif*; Sp. & Port. *auditivo*.] Having the power of hearing. (*Cotgrave*.)

au-dīt-ōr, \* au-dīt-ōur, s. [In Ger. *auditor* = a regimental judge; Fr. *auditeur* = a hearer, an auditor of accounts; Sp. *auditor*, *oidor*; Ital. *auditors* = an inferior judge; Lat. *auditor* = (1) a hearer, (2) a pupil, (3) the reader of a book; from *audio* = to hear, to understand, to learn, to examine.]

A. *Ordinary Language*:

1. A hearer; one of an audience.

"Workers of Goddes word, not *auditors*."—*Chaucer: C. T.*, 7, 518-19.

"His vigorous and animated discourse doubtless called forth the loud hums of his auditors."—*Macaulay: Hist. Eng.*, ch. x.

2. One appointed to examine accounts, compare the several items with the corresponding vouchers, and finally certify to the accuracy of the whole. In general, two auditors act together, to give greater weight to the statement signed as to the accuracy of the account.

"Plan, if you suspect my husbandry, or falsehood, Call me before the exact auditors, And set me on the proof."—*Shaksp.: Timon of Athens*, II. 2.

Auditors are, of course, required for the Government accounts.

"The house swarmed with placemen of all kinds, tellers, auditors, receivers."—*Macaulay: Hist. Eng.*, ch. xix.

B. *Technically*:

*Account-keeping*:

1. In the United Kingdom:

(a) *Auditors of the Imprest* were officers of the Exchequer who formerly audited the accounts of the Customs' receipts, the naval and military expenditure, &c. This office has been entirely abolished, its functions being now discharged by commissioners appointed for auditing the public accounts, who at first were five in number, but were subsequently raised to ten.

(b) *Auditors of burgh accounts*: By 5 and 6 William IV., c. 76, the burgesses of each municipal corporation annually elect from among those qualified to be councillors two auditors to audit the accounts of the borough. By subsequent acts they have been rendered disqualified to be councillors.

2. In Scotland, the Auditor of the Court of Session is a functionary who, when costs are awarded, examines the several accounts, taxes the charges if needful, and finally gives a certificate, without which the money cannot be paid.

au-dīt-ōr-y-ūm, s. [AUDITORY, s.]

1. The place allotted to an audience as in a church or public hall, or to visitors as in a monastery.

2. Also (U. S.) a building for public meetings or public performances.

au-dīt-ōr-ship, s. [Eng. *auditor*; and suff. -ship.] The office, dignity, or functions of an auditor.

"... the auditorship of the exchequer."—*Johnson: Life of Hallifax*. (*Richardson*.)

au-dīt-ōr-y, \* au-dīt-ōr-īe, a. [From Lat. *auditorius* = relating to a hearer or hearing; from *audio* = to hear.]

1. *Ord. Lang. & Anat.*: Pertaining to the organs of hearing.

2. Perceived by means of the organs of hearing.

"... the auditory perception of the report."—*Ainslie on Sound* (1868), p. 135.

¶ The Auditory Artery is a ramification of the internal carotid one, the several branches of which are distributed through the brain.

The Auditory Canal, or external meatus of the ear, is considered to belong to the external portion of that organ. It extends inward from the concha for rather more than an inch. Part of it is cartilaginous and part osseous. (*Todd & Bowman: Physiol. Anat.*, vol. II., p. 67.)

The Auditory Nerve, called also the Acoustic Nerve, enters the ear by the internal auditory canal, and divides into two leading branches, which again subdivide to an amazing extent. It is remarkably soft in texture. The auditory and the facial nerves together constitute the seventh pair of nerves in Willia's arrangement.

"We wish to extend our inquiries from the auditory nerve to the optic nerve."—*Tyndall: Frag. of Science* (3rd ed.), vii. 108.

bēl, bōy; pōut, fōwī; cat, cōll, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -īng. -cian, -tian = shān. -tion, -sion = shūn; -fion, -gion = zhūn. -tious, -sious, -cious = shūs. -hle, -dle, &c = bēl, dēl.

**au dit-ôr-y, \*âu-dit-ôr-ie, âu-di-to-r-i-um.** [In Fr. *auditoire*; Port. *auditoria*=the tribunal of an auditor; *auditorio*=people assembled for hearing; Sp. & Ital. *auditorio*=a court, a sessions house; Sw. Dan., & Ger. *auditorium*, from Lat. *auditorium*=(1) a lecture-room, a hall of justice; (2) a school; (3) (by metonymy) an audience, persons assembled for hearing.] [AUNDRORV, *adj.*]

**A. Of the form auditorium:**

**Arch.** In ancient churches: The nave; that part of the church in which the audience sat.

**B. Of the forms auditory and \*anditorie:**

**I. Of places or things:**

1. A hall, an apartment, or a portion of a hall or apartment in which an audience sits.

2. A bench on which a judge sits in a law-court.

**II. Of persons:** An audience; people assembled to hear.

"Several of this *auditory* were, perhaps, entire strangers to the person whose death we now lament."—*Atterbury*.

**âu-di-trêssa.** [The feminine form of Eng. *auditor*.] A female hearer.

"... such pleasure she reserv'd,  
Adam relating, she sole *auditress*."  
Milton: P. L., bk. viii.

† **âu-dit-ô-al, a.** [From Lat. *auditus*=hearing, and Eng. suffix *-al*.] Pertaining to hearing. (*Coleridge*)

\* **auen, \*auen, v.** Old forms of HAVE.

\* **auede, pret. of v.** Old form of HAD.

**âu-êr-bach-ite, s.** [Named after Dr. Auerbach.] A mineral, believed by Dana to be simply altered zircon.

**âuf, s.** [Dut. *alf*.] A fool, a silly person. [*OLV*.]

**âu-fâ-it** (it silent), used as an *adj.* [Fr. (*lit.*)=to the deed; also in fact, indeed, in reality.] Acquainted with, skilled in.

\* **âu-fald, a.** The same as *AFALD* (q.v.).

**Âu-gê-an, a.** [From Lat. *Augeas*, in Gr. *Αύγας* (*Augeas*), or *Αυγείας* (*Augeias*); and Eng. suff. *-an*.]

1. *Class. Myth.*: Pertaining to Augeas, one of the Argonauts, king of Elis, who was represented as having a stable, or cow-house, which had been occupied for thirty years by 300 of his cattle, without ever once having been cleansed. Hercules undertook the great task, and succeeded completely in his endeavour, by turning the course of the rivers Alpheus and Peneus through the polluted stable. He next slew the king, who had defrauded him of his hire, and put on the throne Phyleus, the son of the erring monarch.

2. Pertaining to whatever has been too long neglected, and cannot now, without Herculean labour, be put right.

**âu-gê-lite, s.** [In Ger. *augelith*; from Gr. *αυγή* (*auge*)=bright light, radiance, and suff. *-ite*.] A colourless or pale-red mineral, with its lustre strongly pearly on cleavage surfaces. The composition is—phosphoric acid, 35.3; alumina, 51.3; and water, 13.4=100. It is found in the province of Scania, in Sweden.

**âu-gêr, \*âu-gre (gre as gêr), s.** [A.S. *nafu*, *nafu*=the nave or middle of a wheel,

*gar*=a borer, piercer; *nafu-bor*=a nave-borer, an auger. Bosworth asks if *nafegar* has not also the same meaning; *gar*=a dart, javelin, spear, lance, or weapon; in Sw. *nafegare*; Icel. *nafarr*; Dut. *avegar*; Mod. Ger. *naber*; G. H. Ger. *nabager* mean =an auger. Thus *n* has been dropped from the beginning of the word.]

1. An instrument used for boring holes in wood, or other soft substance. It is used by carpenters, shipwrights, joiners, wheelwrights, and cabinet-makers. It con-

AUGER.

sists of a wooden handle and an iron shank, with a steel bit terminating it at the bottom.

"The *auger* hath a handle and bit; its office is to make great round holes. When you use it, the stuff you work upon is commonly laid low under you that you may the easier use your strength: for in twisting the bit about by the force of both your hands, on each end of the handle one, it cuts great chips out of the stuff."—*Mozon: Mechanical Exercises*.

"Men. What's the news? what's the news? Come, Your temples burned in their consent, and Your franchises, wherof you stood, confined Into an *auger's* bore."  
Shaksp.: *Coriolanus*, iv. 4.

2. An instrument of a similar kind, but on a much larger scale, used for boring into the soil, or through the geological strata for water, to ascertain the character of the subsoil or of the beds traversed. It has connecting-rods to adapt it to the different depths required.

**auger-hole, \*augre-hole, s.** A hole drilled by an auger.

"What should be spoken here, where our fate,  
Hid in an *auger-hole*, may rush, and seize us!"  
Shaksp.: *Macbeth*, ii. 4.

**auger-shell, s.** The English name of the shells belonging to the genus *Terebra*. It is given in consequence of their being long and pointed. None of the recent species are British. [*TEREBRA*.]

**âu-gôt, âu-gôte, s.** [Fr. *auge*=a trough.] *MIL.*: A wooden pipe containing the powder designed to be used in exploding a mine. (*James*.)

**âugt, †ought (ou as â), \*âucht, \*âght, \*âht** (*gh* and *h* guttural or mute), *s.* & *adv.*
